Note 1: Amounts charged in August, September, and October 2022 for FOMB Advisory Costs allocated to PREPA and P3 Authority Transaction Cost were reversed in December 2022 due to charges corresponding to prior Fiscal Years. Note 2: Amounts charged to Monthly Generation Expenses for July 2022 - April 2023 were revised down in the April B2A due to findings that certain necessary maintenance expenses were funded with Federal Funds.

Note 3: For FY2023 B2A reporting through March, EcoElectrica Fuel was included in Purchased Power for budget and actuals. Starting in April, EcoElectrica Fuel is reported in the Fuel account consistent with the FOMB Certified Budget. Note 4: GenCo Operating Expenses were revised in June 2023 to reflect additional items from PREPA's FY23 second amended budget certified on June 23, 2023.

Note 5: Operations & Maintenance Reserve and Genera Working Capital Reserve are balance sheet items that were presented as operating expenses in the second amended FY23 budget. PREPA received a loan of \$447.4 million from the Commonwealth, of which \$15 million was applied to the Genera mobilization fee and \$432.4 million was applied to

funding of the Genera service accounts in June 2023.

Variance #1

FOMB Category: Maintenance

Account: Generation

Expenses	Budget YTD	Actual YTD		Var	riance(\$)	Variance (%)
Generation	\$ 105	\$	83	\$	22	20.97%

Variance Explanation

Due to the complexities of aggregating project costs and determining if capitalization policy and other accounting guidelines have been met, interim monthly accounting does not consistently reflect the actual progress on NME.

Root Cause

Constrained administrative and finance resources.

Corrective Action

PREPA Finance will inform Genera Finance team about the need to improve process to better report NME spend should there be limited resources.

Variance #2

FOMB Category: Non-Labor/Other Operating Expense - GenCo. Account: Utilities & Rents

Expenses	Budget YTD		Actu YT		Variance (\$)	Budget Horizontal Variance YTD (%)
Utilities & Rents	\$	0	\$	15	\$ (15)	-40612.89%

Variance Explanation

This is a permanent year-to-date variance resulting from underbudgeting by PREPA, due to (i) expected increases in water utility costs; and (ii) a flat 35% haircut adjustment applied by the FOMB to PREPA's proposed FY23 budget.

Root Cause

Insufficient budget allocation to cover costs.

Corrective Action

Consider budget reapportionment for FY2023 cost when appropriate and improve input to FY2024 budget process.

Variance #3

FOMB Category: Revenues

Account: Basic Revenues

Expenses	Budget YTD	Actual YTD	Variance (\$)	Budget Horizontal Variance YTD (%)
Total Basic Revenue	\$ 1,170	\$ 1,024	\$ (146)	-12.47%

Variance Explanation

Base rate revenues are approximately 13% below budget in part due to below budget kWh sales results, approximately 6% lower than projected for FY2023. Approximately 45% of the negative sales variance occurred in September, the month in which Hurricane Fiona impacted the system. June was the only month in FY23 where actual sales slightly exceeded the budgeted amount by 4%.

Root Cause

Largest identifiable impact due to Hurricane Fiona in September.

Corrective Action

N/A

Variance #4

FOMB Category: Fuel & Purchased Power

Account:	Fuel	& Pu	rchased	Power	Expense

Expenses	Budget YTD	Actual YTD	Variance (\$)	Budget Horizontal Variance YTD (%)
Total Fuel & Purchased Power	\$ 3,441	\$ 2,898	\$ 543	15.79%

Variance Explanation

The favorable variance in Total Fuel & Purchased Power expense of approximately \$540 million is due to lower than expected bunker, AES, and renewable generation and fuel prices, offset by higher than expected diesel and LNG generation.

Root Cause

The main drivers of the favorable 16% budget variance in Fuel & Purchased Power Cost relative to the FY23 certified budget were the combined effects of lower than budget bunker, AES, and renewables dispatch and fuel prices offset by higher than budget diesel and LNG generation.

Bunker generation and fuel prices consistently remained below budget amounts for FY23, with total bunker generation 14% below budget and fuel prices approximately 17% below budget. Approximately 40% of this favorable variance occurred in September and October 2022, when there was a heavier reliance on and more generation from diesel plants due to Hurricane Fiona. Additionally, there were several outages in bunker plants in FY23, leading to changes in fuel mix and higher generation from diesel plants. AES generation was 16% below budget for FY23 and over half of this favorable variance occurred between February - April 2023, when AES unit 1 was undergoing annual maintenance. Renewable generation was also 18% below budget, with 35% of this variance occurring in September and October 2022 due to intermittency issues caused by Hurricane Fiona.

This was offset by diesel generation, which was the largest negative variance, approximately two times higher than the budget amount for FY23. Diesel generation was over 90% higher than budgeted amounts for FY23 and diesel fuel prices were nearly 4% higher than budget. More than 50% of the fuel expense and generation variance occurred in September - November 2022 due to the impact of Hurricane Fiona and 30% of the variance occurred in May and June 2023 due to outages in various bunker plants, leading to increased diesel burn. Costa Sur LNG generation was approximately 30% above budget, offset by San Juan LNG generation, which was approximately 22% below budget.

Corrective Action	
N/A	

Variance #5

FOMB Category: Revenues

Account: Purchased Power Revenues

Expenses	Budget YTD		Actual YTD	Variance (\$)	Budget Horizontal Variance YTD (%)
Total Purchased Power Revenue	\$	3,441	\$ 2,951	\$ (491)	-14.26%

Variance Explanation

Purchased power revenues are approximately 14% below budget predominantly due to 6% lower billed sales than projected for FY23 (largely driven by the impact from Hurricane Fiona) and the resulting impact on overall generation, which is approximately 7% below budget. Billed rates for the purchased power rider are also below budget due to lower-than-budget purchased power expenses.

Root Cause

Overall system load and purchased power expenses are below budget, resulting in lower than budget generation requirements and billed rates for purchased power.

Corrective Action

N/A

Variance #6

FOMB Category: GenCo Operating Expenses

Account: Emergency PREPA Employee Retirement System Contribution

Expenses	Budget YTD		Actual YTD	Variance (\$)	Budget Horizontal Variance YTD (%)
Emergency PREPA Employee Retirement System Contribution	\$	65 \$	30 \$	35	53.31%

Variance Explanation

The favorable variance of \$35 million is due to PREPA not utilizing the full budget after the first of two injections of emergency contributions to the Employee Retirements System (ERS) in FY23.

Root Cause

PREPA complied with the requests of contributions from ERS and funded \$4 million in May and \$26 million in June. PREPA will continue to make contributions in FY24, and plans to contribute \$22 million in July and \$24 million in August.

Corrective Action

N/A - PREPA will continue to make contributions in FY24.

Variance #7

FOMB Category: GenCo Operating Expenses

Account: Emergency PREPA Employee Retirement System Contribution

Expenses	Budget YTD	Actual YTD	Variance (\$)	Budget Horizontal Variance YTD (%)
Second Emergency PREPA Employee Retirement System Contribution	\$ 108	\$ -	\$ 108	100.00%

Variance Explanation

The favorable variance of \$108 million is due to the full budget for contributions to the Employee Retirements System (ERS) not being utilized in FY23.

Root Cause

PREPA made monthly contributions in May and June for approximately \$30 million as requested by the ERS but the full budget amount was not utilized in FY23. However, this budget amount will be needed in FY24 as PREPA has received contribution requests for July and August and plans to make further contributions in FY24.

Corrective Action

N/A - PREPA will continue to make contributions in FY24.

Variance #8

FOMB Category: Other Income

Account: Other Income

Expenses	Budget YTD		ctual YTD	Variance (\$)	Budget Horizontal Variance YTD (%)
Other Income	\$	37 \$	152	\$1	15 307.27%

Variance Explanation

The favorable variance in Other Income of approximately \$115 million is driven by FEMA reimbursements for FAAST projects.

Root Cause

PREPA submitted various requests for reimbursement (RFRs) related to FAAST projects and received these reimbursements from FEMA in FY23. These reimbursements are reflected in DFMO's Master Tracker and were accurately deposited in the Banco Popular FEMA Reimbursement Account ending in 678 throughout FY23.

Corrective Action
