GOBIERNO DE PUERTO RICO

INVITATION FOR REQUEST FOR SEALED PROPOSALS
27DJ-00415

TITLE: Design-Build of Puerto Rico's New Trauma Hospital

PUBLICATION DATE: September 2, 2026

PURPOSE: The Puerto Rico Medical Services Administration (ASEM) has identified the need to contract planning, design, permitting, procurement, construction, commissioning, activation, and operational readiness of Puerto Rico's New Trauma Hospital (the Project) using the Design-Build Project Delivery Method.

Puerto Rico has limited infrastructure to care for its citizens in situations involving physical trauma, whether caused by natural disasters, serious accidents, violence, or emergencies requiring immediate and specialized care. This limitation leads to significant delays in medical care and increases the risk of complications that threaten the patient's health and life. In the event of high-impact incidents, the population is exposed to higher rates of morbidity and mortality, especially citizens living in rural areas or with limited access to specialized medical care facilities.

This project will not only address current needs for trauma services in Puerto Rico but will also strengthen operational capacity and the quality of care, ensuring a more efficient and effective response to future challenges. It will help prevent future impacts while fully complying with the objectives of the CDBG-MIT program and the risk mitigation goals for critical infrastructure, including risk reduction, resilience enhancement, and continuity of operations.

AVAILABILITY OF THE REQUEST FOR SEALED PROPOSALS DOCUMENTS: The documents for this Request for Sealed Proposals (RFP) must be downloaded (free of charge), starting from the date of publication of the Request for Sealed Proposals notice, from the website https://www.asem.pr.gov/administrativo#Subastas or through the link provided by the J.E.D.I. platform, https://jedi.asg.pr.gov/#/Repository?Identifier=27DJ-00415

PRE-PROPOSAL MEETING: The pre-proposal meeting will be held on September 24, 2026, at 10:00a.m. in Puerto Rico's Medical Center, Auditorium B and C at Cardiovascular Center of Puerto Rico and Caribbean, First Floor, located in the Bo. Monacillos, San Juan, Puerto Rico. This meeting will also be streamed live via Microsoft Teams, as posted on the website https://www.asem.pr.gov/administrativo#Subastas. Proposers are strongly encouraged to attend. Representatives from ASEM will be present to discuss the project scope, evaluation criteria, proposal requirements, terms, and conditions. Attendance at the pre-proposal meeting is not mandatory.

SITE INSPECTION: An opportunity will be provided to conduct a site inspection immediately following the pre-proposal meeting. Although attendance at the site inspection is not mandatory, Proposers and other Key Personnel or Staff on its team are strongly encouraged to examine the site. The site will be open to all interested parties to familiarize themselves with the existing physical conditions, restrictions, and operational limitations.

Outside of the scheduled site inspection, the Proposer may request access to the site to conduct additional evaluations, studies, inspection, measurements, or other site assessments deemed necessary to prepare its Proposal. Any such access must be coordinated in advance with Procurement Division via email subastascompras@asem.pr.gov or through the link provided by the J.E.D.I. platform, https://jedi.asg.pr.gov/#/Repository?Identifier=27DJ-00415. The Proposer shall be solely responsible for all costs, liabilities, safety requirements, and security protocols associated with any independent site evaluation, study or inspection.

REQUEST FOR CLARIFICATION: Any questions or Requests for Clarification regarding the documents of this Request for Sealed Proposals process shall be submitted to the Procurement in writing via email to subastascompras@asem.pr.gov or through the link provided by the J.E.D.I. platform, https://jedi.asg.pr.gov/#/Repository?Identifier=27DJ-00415 on or before October 8, 2026, at 2:00p.m. The email subject line should include the Request for Sealed Proposals number, **27DJ-00415**.

PROPOSAL SUBMISSION: Proposals must be submitted on or before December 1, 2026, at 2:00 p.m., in the following two (2) ways:

1. Physically (Hard Copy), at ASEM's Procurement Division Office, First Floor, Services and Supply Building, Puerto Rico's Medical Center, located in the Bo. Monacillos, San Juan, Puerto Rico

2. Electronically, using the link https://jedi.asg.pr.gov/#/Repository?Identifier=27DJ-00415, and uploading your Proposal in the section identified as "Suplidor or Supplier"

PROPOSALS OPENING: The opening of proposals will be on December 1, 2026, at 2:30p.m. in Puerto Rico's Medical Center, ASEM's Central Laundry Conference Room, located in the Bo. Monacillos, San Juan, Puerto Rico. The Proposal Opening will also be streamed live via Microsoft Teams, as posted on the website https://www.asem.pr.gov/administrativo#Subastas The Proposals Opening will be open to the public, and any interested person may attend. However, the proposal contents will not be read aloud. Only the name of the Proposers will be announced.

GENERAL NOTES:

1. In accordance with 48 CFR Part 6 Subpart 6.203 to 6.208, it is the policy of the Government of Puerto Rico and ASEM to stimulate the growth of small commercial businesses, including M/W/VBE, by encouraging their participation in this Request for Proposals process.

2. ASEM will observe compliance with the provisions set forth in 2 CFR § 200.318-327 and any other provisions applicable to this process.

3. ASEM shall fully observe and comply with all antidiscrimination laws, regulations, and policies in effect in Puerto Rico and with applicable federal laws in accordance with the requirements of the CDBG MIT program including, but not limited to, Title VI of the Civil Rights Act, the Fair Housing Act, Title VII as interpreted by the EEOC, the ADA, the ADEA, and any guidelines or requirements issued by HUD regarding equal opportunity in effect as of the date of publication of this Request for Sealed Proposal.

4. This project will be financed, partially or completely, with funds from ASEM and CDBG-MIT program (Healthcare Strengthening Set-Aside). ASEM has executed a Subrecipient Agreement (SRA) with the Puerto Rico's Department of Housing (PRDOH) to receive funding from CDBG-MIT Program.

5. The Procurement Division Office's hours of operation are Monday though Friday, from 8:00a.m. to 3:00p.m.

In San Juan, Puerto Rico, today September 2, 2026.

1.0 DEFINITIONS/ACRONYMS

1. **ACME**: refers to the Spanish acronym for the Emergency Care and Management Environment.
2. **Action Plan**: refers to the Puerto Rico Mitigation Action Plan, as may be amended, that outlines the uses for the approximately $9.2 billion CDBG-MIT funds allocated to Puerto Rico.
3. **Addendum or Addenda:** refers to a written or graphic document issued by the Procurement Manager prior to the deadline for submitting proposals that modify or interpret the Request for Sealed Proposals (RFP) through additions, deletions, clarifications, or corrections.
4. **Administration**: refers to the General Services Administration of the Government of Puerto Rico.
5. **Allowance**: refers to a budget item intended to cover estimated costs of goods, materials, equipment or services whose selection, final quantity or final specifications are not fully determined at the time of the RFP process.
6. **Area of Benefit (AOB)**: Represents the total beneficiaries or persons receiving · a mitigation benefit from the project. An AOB could be the service area of a wastewater treatment plant, neighborhoods served by an elevated roadway, or a residential neighborhood benefiting from community-level flood mitigation. The geographic area represented by the AOB is then used to determine the Risk Benefit Area. The Area of Benefit for the New Trauma Hospital Project is Islandwide.
7. **ASEM**: refers to the Spanish acronym for the Puerto Rico Medical Services Administration.
8. **ASG**: refers to the Spanish acronym for the General Services Administration of the Government of Puerto Rico.
9. **Authority to Use Grant Funds (AUGF)**: The formal written response from HUD allowing PRDOH to proceed with funding the project.
10. **Authorized Representative:** refers to the person authorized to bind the Proposer in matters related to the RFP and the contract.
11. **Best and Final Offer (BAFO)**: process through which the Bid Board requests from the Proposer (Technically Qualified) a final offer with the best price that they are willing to offer, prior to issuing a notice or resolution of award.
12. **Bid Board**: Bid Board of any Exempt Entity, appointed or constituted, pursuant to Act 73-2019 acts as an administrative entity for the study, evaluation, and award of Formal Bids, Requests for Sealed Proposals, and Requests for Qualifications.
13. **Bid Review Board**: an independent entity, for administrative purposes assigned to the ASG, with jurisdiction to review administrative appeals regarding the determinations or awards made by the ASG's Bid Board or the Bid Board an Exempt Entity, with such exceptions and limitations as may be provided in current legislation.
14. **Bidder or Proposer**: natural or legal person registered in the Single Registry of Bidders of the ASG, that is available and interested in attending and submitting quotations, offers, or proposals in any procurement process held by the Government of Puerto Rico.

15. **Builder:** refers to the entity or team member responsible for the construction execution of the Project under the Design-Build framework. The Builder shall plan, manage, supervise, coordinate, and perform the construction work, including labor, materials, equipment, subcontractors, means and methods, safety, quality control, sequencing, scheduling, and site logistics. The Builder shall collaborate with the Designer and other Design-Builder team members to support constructability, cost, schedule, phasing, commissioning, and compliance with the RFP Documents, Contract Documents, applicable permits, codes, standards, and all federal, state, and local requirements. The Builder does not assume responsibility for professional design services except to the extent expressly required by the Contract Documents or applicable law.
16. **CAAPR:** refers to the Spanish acronym for the College of Architects and Landscape Architects of Puerto Rico.
17. **CDBG-MIT:** refers to the Community Development Block Grant-Mitigation Program administered by the Puerto Rico Department Housing (PRDOH), as the grantee, representing a unique opportunity to carry out strategic and high-impact activities to mitigate disaster risks and reduce future losses.
18. **Diagnostic and Treatment Center (CDT)**: is an outpatient health center that offers primary medical care, diagnostic services, and treatment without hospitalization. In Puerto Rico, CDTs are an important part of the health system, as they allow for rapid patient care and referrals to hospitals when necessary.
19. **CFR**: refers to the Code of Federal Regulations.
20. **CIAPR:** refers to the Spanish acronym for the College of Engineers and Surveyors of Puerto Rico.
21. **Community Development Block Grant (CDBG):** a federal grant program administered by HUD which provides grant funds to local and state governments. The CDBG Program works to ensure decent, affordable housing, to provide services to the most vulnerable in communities, and to create jobs through the expansion and retention of businesses.
22. **Collusion**: an agreement between several Proposer, with or without the participation of public officials or employees, for the purpose of restricting competition, manipulating procurement or quotation processes, fixing prices, sidestepping legal restrictions or committing fraud to the detriment of the public interest.
23. **Contract**: obligation in writing and agreed upon by virtue of legal provisions and requirements, between any public entity and a Proposer that ensures the procurement of goods, works or services, according to minimum current standards for public contracting. Each contract shall set forth the terms under which the Proposer will offer the goods, works or services under the procurement.
24. **Contractor**: a Proposer who has been awarded procurement process for any goods, works, or nonprofessional service through the issue of a Purchase Order and/or contract, with any public entity.
25. **Covered Project:** Notice 84 FR 45838 defines a Covered Project as an infrastructure project having a total project cost of $100 million or more, with at least $50 million

of CDBG funds (CDBG-DR, CDBG-MIT or CDBG State). HUD defines "infrastructure project" as an activity or group of related activities that develop the physical assets that are designed to provide or support services to the general public in the following sectors: surface transportation, including roadways, bridges, railroads, and transit; aviation; ports, including navigational channels; water resources projects; energy production and generation, including from fossil, renewable, nuclear, and hydro sources; electricity transmission; broadband; pipelines; stormwater and sewer infrastructure; drinking water infrastructure; and other sectors as may be determined by the Federal Permitting Improvement Steering Council. Further, consistent with HUD's National Environmental Policy Act (NEPA) Implementing requirements at 24 C.F.R. §58.32(0), a grantee must group together and evaluate as a single infrastructure project all individual activities which are related to one another, either on a geographical or functional basis, or are logical parts of a composite of contemplated infrastructure-related actions.

26. **Department of Housing and Urban Development (HUD)**: Federal department through which CDBG, CDBG-DR, and CDBG-MIT programs funds are distributed to recipients.
27. **Design-Builder:** refers to the Proposer that submits a proposal as a result of this Request for Sealed Proposals.
28. **Design-Build (DB) Project Delivery Method:** A construction project delivery method in which a single legal entity, referred to as the Design-Builder, is contractually responsible for providing both professional design services and construction services under one contract. The Design-Builder assumes responsibility for the design, engineering, permitting, coordination, scheduling, and construction of the Project, and is accountable for delivering the completed facility in accordance with the ASEM's requirements, performance criteria, budget, and schedule. This method promotes integration of design and construction activities, collaboration among project team members, and a single point of responsibility for project delivery.
29. **Designer:** refers to the duly qualified and licensed professional design entity or design team member responsible for providing, coordinating, signing, sealing, and certifying, as applicable, the architectural, engineering, and other professional design services required for the Project under the Design-Build framework. The Designer shall develop, validate, and coordinate the design, drawings, specifications, calculations, technical criteria, permit documents, construction documents, and other professional deliverables necessary to satisfy the ASEM's requirements, RFP Documents, Contract Documents, applicable permits, codes, standards, healthcare facility requirements, and all federal, state, and local laws and regulations. The Designer shall collaborate with the Builder and other Design-Builder team members to support constructability, cost, schedule, phasing, commissioning, regulatory approvals, and integration of construction means and methods, while retaining professional responsibility for the adequacy, coordination, and code compliance of the design within the scope of its professional services. The Designer shall not assume responsibility for construction

means, methods, techniques, sequences, procedures, or site safety, except to the extent expressly required by the Contract Documents or applicable law.

30. **Disqualification**: action by which the Bid Board excludes a Proposer from a public procurement process due to non-compliance with one or more mandatory requirements, conditions, terms, or specifications for participation. Consequently, any offer, proposal, or statement of qualifications submitted by the Proposer will not be considered or evaluated in the process.
31. **Environmental Review Record (ERR)**: A record of all documents and decisions required to complete the environmental review process.
32. **Evaluation Committee**: a committee constituted by the ASEM's Executive Director thereof, for a particular procurement process, whose principal function will be to evaluate compliance by the Proposer with the requirements established in the RFP documents and issue a non-binding recommendation to the Bid Board.
33. **Evaluation Criteria**: criteria set forth in the procurement notice of a public procurement which are used to evaluate, classify, and recommend offers or proposals for the award of the procurement.
34. **Exempt Entity**: an entity that does not have the obligation to conduct its procurement through the ASG, but that must carry out its procurement process under the procurement methods established in Act No. 73-2019 and must abide by previously bid categories and contracts executed by the ASG.
35. **Federal Government:** means any of the departments of the Executive Branch of the United States of America, or any department, corporation, agency or instrumentality created, or which may be created, designated or established by the United States of America.
36. **First-tier subcontractor**: an entity subcontracted directly by the prime contractor to provide supplies, materials, equipment, or services of any kind required under the prime contractor a first-tier subcontract.
37. **Functional Operation:** refers to the condition achieved when the Project, or an approved phase of the Project, has been designed, constructed, installed, tested, commissioned, inspected, certified, and turned over in a manner that allows the ASEM to use and operate the applicable facilities, systems, equipment, spaces, utilities, life-safety components, clinical support areas, and related infrastructure for their intended purpose, in accordance with the RFP Documents, Attachment 1 [Scope of Work], Contract Documents, applicable permits, codes, healthcare facility requirements, regulatory approvals, and all federal, state, local, HUD, PRDOH, CDBG-MIT, and ASEM requirements. Functional Operation does not necessarily constitute Final Completion, but requires that all work necessary for safety, compliance, coordinated, and effective use of the applicable phase or facility area has been completed, accepted, and made available for ASEM occupancy, activation, operations, training, and use.
38. **Healthcare**: a comprehensive system encompassing all activities, institutions, and professionals working to prevent, diagnosis, treat, and maintain health. This includes Diagnostic and Treatment Centers (CDT), but also clinics, public health,

prevention, telemedicine, pharmaceuticals, insurance, therapies, rehabilitation, and community programs.

39. **Hospital**: It is a physical institution primarily dedicated to the diagnosis, treatment, and management of complex medical conditions, with the capacity for intensive care, surgeries, emergencies, and 24/7 hospitalization.
40. **Low-to-Moderate Income (LMI)**: Low to moderate income people are those who have incomes not more than the 'moderate income' level (80% Area Median Family Income) set by the federal Government for HUD-assisted housing programs. This income standard changes annually and varies by household size, county, and the metropolitan statistical area.
41. **Mitigation:** Through notice 84 FR 45838, 45840, HUD defines mitigation "as those activities that increase resilience to disasters and reduce or eliminate the long-term risk of loss of life, injury, damage to and loss of property, and suffering and hardship, by lessening the impact of future disasters."
42. **Minority-Owned Business**: an entity whose day-to-day management and operations are controlled by, and in which at least fifty-one percent (51%) of the voting shares are owned by a person(s) belonging to a racial, ethnic, or cultural group.
43. **Owner**: the Puerto Rico Medical Services Administration.
44. **POC:** refers to the Point of Contact.
45. **PRDOH:** refers to the Puerto Rico Department of Housing.
46. **Project:** The total undertaking to be accomplished for ASEM by Design-Builder, consultants, subcontractors, and others, including planning, study, design, construction, testing, start-up, and commissioning, and of which the Work to be performed under the Contract Documents is a part.
47. **Proposal**: document that a Proposer submits in response to this RFP, including all required forms, certifications, technical information, pricing and supporting documentation.
48. **Proposer:** natural or legal person registered in the ASG's Single Registry of Bidders, available and interested in appearing and submitting quotes, offers or proposals in any procurement process held by the Government of Puerto Rico.
49. **Recipient:** a non-federal legal entity that receives a federal award directly from a federal awarding agency which is accountable for the use of funds to carry out an activity under a federal program. The term recipient does not include subrecipients.
50. **Redacted Copy of Proposal:** A redacted copy of the Proposal means a complete copy of the Proposal from which the Proposer has removed or obscured only those portions that the Proposer, in good faith, considers confidential, proprietary, trade secret, or otherwise exempt from public disclosure under applicable law. The redacted copy shall be submitted for public inspection or records-request purposes and shall not replace the unredacted Proposal submitted for evaluation. The Proposer must ensure that any redactions are limited, clearly marked, and accompanied by a brief written explanation identifying the basis for each redaction. Information relating to prices, required certifications, compliance with

mandatory requirements, and other information subject to disclosure under applicable procurement or public records laws may not be withheld solely because the Proposer designates it as confidential. ASEM reserves the right to determine, in accordance with applicable law, whether any information identified by the Proposer as confidential may be withheld from disclosure.

51. **Regulation No. 8823:** Regulations of the Bid Board of the ASEM. These regulations are promulgated for the purpose of establishing the responsibility and jurisdiction of the Bid Board of the ASEM and the policy to be followed in procurement.
52. **Regulation No. 8824:** Regulations of the ASEM's procurement. Establishing the administrative policy regarding purchase and sale procedures and the creation and operation of the Bid Board that will have direct involvement in the several procurement activities that require its participation.
53. **Regulation No. 9301**: ASG Regulation Governing the Single Registry of Bidders for the Government of Puerto Rico.
54. **Regulation No. 9302**: ASG Regulation Governing the Single Registry of Professional Service Providers for the Government of Puerto Rico.
55. **Regulation No. 9734**: ASG Uniform Regulations on Procurement, Bidding, and Contracting for Goods, Construction Work, and Non-Professional Services of the General Services Administration of the Government of Puerto Rico.
56. **Rejection**: a formal decision by the Bid Board not to accept a bid or proposal submitted by a Proposer, for administrative, technical, or legal reasons, or due to noncompliance with the requirements set forth in this Request for Sealed Proposals.
57. **Request for Sealed Proposals (RFP)**: requests that allow for the negotiated procurement, modification, and updating of Proposers' proposals while they are being evaluated, and that authorize the Bid Board to request a Best and Final Offer.
58. **Responsible Entity (RE)**: The governmental entity responsible for conducting, approving and maintaining the environmental review process and ERR, and for certifying compliance with applicable HUD environmental requirements
59. **RFP**: means this Request for Sealed Proposals.
60. **RFP Documents**: Refers collectively to this Request for Sealed Proposals, including all instructions, terms, conditions, procurement requirements, forms, exhibits, attachments, technical information, scope documents, drawings, specifications, data, reference materials, addenda, clarifications, and any other documents issued, incorporated, or made available by the Procurement Manager or Procurement Division in connection with this procurement. The RFP Documents establish the requirements for preparing, submitting, evaluating, and awarding proposals for the Design-Build services for Puerto Rico's New Trauma Hospital and shall be read together as a complete procurement package.
61. **RPT:** is the Spanish acronym for Technology Provider Regulations.
62. **Section 3**: provision of the Housing and Urban Development Act of 1968, 12 U.S.C. § 1701u (HUD Act). The purpose of Section 3 is to ensure that employment and other economic opportunities generated by certain financial assistance provided

by the Department of Housing and Urban Development (HUD), to the greatest extent possible and in accordance with existing federal, state, and local laws and regulations, are directed toward low- and very low-income individuals, particularly those who are recipients of government housing assistance, and to businesses that provide economic opportunities to low- and very low-income individuals.

63. **Section 3 Business**: a business that meets at least one (1) of the following criteria, as documented over the past six (6) months: (i) at least fifty-one percent (51%) of the business is owned and controlled by individuals with low or very low incomes; (ii) more than seventy-five percent (75%) of the work hours performed for the business during the preceding three (3) months were performed by Section 3 workers; or (iii) the business is owned and controlled, at least fifty-one percent (51%), by public housing residents or residents currently living in Section 8-subsidized housing.
64. **Section 3 Worker**: any worker who currently meets, or who, at the time of hire within the last five (5) years, met at least one of the following categories, as documented; (i) the worker's income during the previous calendar year or on an annualized basis is below the income limit established by HUD; (ii) the worker is employed by a Section 3 business; or (iii) the worker is a "YouthBuild" participant.
65. **Single Bids Registry (RUS)**: an electronic registry of the Government of Puerto Rico, located on the ASG website, where documents related to the processes of conducting and awarding public bids are stored and published.
66. **Single Register of Bidders (RUL)**: a register administered by the ASG that contains the information of individuals or legal entities that have been evaluated and authorized to bid in procurement processes for goods, construction projects, and non-professional services, and to enter contract with the Government of Puerto Rico.
67. **Single Registry of Professional Service Providers (RUP)**: a registry administered by the ASG that contains information on individuals and legal entities authorized to provide professional services to the Government of Puerto Rico.
68. **Team Member**: means a member of the Proposer to execute the works.
69. **Veterans Business Enterprise (VBE)**: is an entity that is owned, operated, and controlled by veterans of the United States Armed Forces.
70. **Vertical Construction Project**: any construction project focused on the development of vertical structures, such as buildings, multi-level facilities, towers, commercial, institutional or residential complexes, as well as any work that involves the creation, rehabilitation or expansion of buildings that are predominantly developed at height.
71. **Women-Owned Small Businesses**: an entity whose management and day-to-day business operations are controlled by, and in which at least fifty-one percent (51%) of the shares are owned by, one or more women; or a small business eligible under the Small Business Program pursuant to 13 C.F.R. Part 127.

2.0 INTRODUCTION

The Puerto Rico Medical Services Administration (ASEM) has identified the need to contract planning, design, permitting, procurement, construction, commissioning, activation, and operational readiness of Puerto Rico's New Trauma Hospital (the Project) using the Design-Build Project Delivery Method. These services will be contracted following the issuance notice for interested Proposers to participate in the Request for Sealed Proposals for Design and Construction. The Project shall be developed in accordance with available CDBG-MIT funding and eligible cost principles. The Design Builder shall strictly adhere to the environmental requirements set forth in the Scope of Works and RFP Documents.

Due to its geographic location, Puerto Rico faces significant vulnerability to various natural disasters, including intense hurricanes, severe storms, floods, and earthquakes. These events have highlighted the fragility of the healthcare system, particularly its limited capacity to address high-severity medical emergencies and trauma. Puerto Rico's New Trauma Hospital will be an essential component of the critical infrastructure needed to ensure the optimization of health services in emergency situations and to reduce mortality associated with traumatic injuries.

Furthermore, Puerto Rico has limited infrastructure to care for its citizens in situations involving physical trauma, whether caused by natural disasters, serious accidents, violence, or emergencies requiring immediate and specialized care. This limitation leads to significant delays in medical care and increases the risk of complications that threaten the patient's health and life. In the event of high-impact incidents, the population is exposed to higher rates of morbidity and mortality, especially citizens living in rural areas or with limited access to specialized medical care facilities.

To mitigate these consequences, it is necessary to strengthen the existing infrastructure by creating and optimizing a specialized trauma hospital, which must incorporate essential teams and technologies. This will increase the health system's response capacity, reduce the negative impact of traumatic events, and ensure more timely and effective care for all citizens.

Currently, the island relies on a Tertiary and Supra-tertiary Trauma Hospital located in the metropolitan area, which operates with structural limitations, reduced capacity, and buildings were not designed according to modern resilience standards. Its location and lack of adequate facilities for the landing of patient transport aircraft cause significant delays in the treatment of patients, who sometimes come from remote regions of the island. Furthermore, our island requires the development of a hospital with modern, state-of-the-art infrastructure to ensure the provision of adequate medical services for the immediate care of patients. We are referring to electrical, technological, water supply, and communications infrastructure, among others, required for this type of facility.

These facilities for immediate care and specialized medical treatment must be designed and built in strict compliance with applicable regulations and the highest standards, to provide our citizens with peace of mind and assurance that the essential, one-of-a-kind resources are available to serve the entire population in the event of any medical emergency.

Furthermore, Hurricanes Irma and Maria, as well as the 2020 earthquakes, due to the large number of medical emergencies treated, highlighted the need to expand the hospital to include additional operating rooms, physical therapy areas, and access points for transporting patients via emergency vehicles. Furthermore, the lack of adequate equipment and infrastructure delayed and/or otherwise affected patient care, as well as the operations of the facility where essential medical services are provided. These events confirmed the urgent need to develop a modern, resilient trauma facility to mitigate risk and strengthen the response to emergency situations.

The significant impact of these events on infrastructure, housing, the energy system, and essential services led to Puerto Rico receiving a historic allocation of funds, including funds under the Community Development Block Grant—Mitigation (CDBG MIT) Program. CDBG-MIT funds were allocated by the U.S. Department of Housing and Urban Development (HUD) to support mitigation activities in jurisdictions affected by natural disasters. These funds are intended to reduce future risks, increase the resilience of vulnerable communities, and protect lives and critical infrastructure in the face of severe natural events. In addition, the CDBG MIT program provides funding for infrastructure designed to reduce future risks and increase community resilience.

This project will be financed, partially or completely, with funds from the CDBG-MIT program. ASEM has executed a Subrecipient Agreement (SRA) with the Puerto Rico Department of Housing (PRDOH) to receive funding from CDBG-MIT Program. Hence, the Proposer must comply with and adhere to all applicable standards, provisions and requirements of all applicable federal, state and local laws, codes, ordinances, rules and regulations, and policies, including those that govern the use of the CDBG-MIT funds.

The design and construction of Puerto Rico's New Trauma Hospital, awarded through a Request for Sealed Proposals under the Design-Build model, aligns with the mitigation objectives set forth by the Program (CDBG-MIT), and involves a hospital facility that incorporates advanced seismic-resistant design, flood protection, redundant power systems, critical communications, water supply, and clinical spaces with surge capacity.

The need for this project stems from a combination of factors related to:

1. the increase in the incidence of accidents and traumatic emergencies;
2. the condition of the existing hospital infrastructure;
3. the centralization of services, which limits access;

4. exposure to natural hazards that disrupt critical services; and
5. the need for a safe hospital facility that ensures the continuity of operations.

The development of Puerto Rico's New Trauma Hospital represents a significant investment that reaffirms the Government of Puerto Rico's commitment to the health and well-being of its citizens, as it is considered a resilient facility designed to withstand, adapt to, and recover quickly from disasters, power outages, or extreme weather events. Furthermore, it is a facility that ensures continuity of operations and access to essential services in emergency situations.

Therefore, the Procurement Division is issuing this Request for Sealed Proposals to contract for design and construction services for Puerto Rico's New Trauma Hospital.

This project will not only address current needs for trauma services in Puerto Rico but will also strengthen operational capacity and the quality of care, ensuring a more efficient and effective response to future challenges. It will help prevent future impacts while fully complying with the objectives of the CDBG MIT program and the risk mitigation goals for critical infrastructure.

3.0 CDBG-MIT PROGRAM OVERVIEW

3.1 Program Overview

Throughout history, Puerto Rico endured and had to recover from numerous past hurricanes, earthquakes, landslides, and other natural disasters. The most devastating were hurricanes Irma and Maria (hereinafter, the "Hurricanes"), both in September 2017. These Hurricanes impacted all seventy-eight (78) municipalities of the Island causing massive islandwide damage and destruction to public and private housing and other facilities. Specific areas were impacted by surges, flooding, standing water, wind, and rain or mudslides. Significant damage to buildings and vacant facilities presented as a public health and safety risk for the community. Hurricanes Irma (DR-4336-PR) and Maria (DR-4339-PR) were declared the worst natural disasters in U.S. history and left millions without power, the ability to communicate, and many without food, water, or homes.

On January 6, 2020, a 5.8 magnitude earthquake shook the Island, followed by a 6.4 magnitude earthquake the next day. The regions most impacted by these earthquakes were declared disaster impact areas under presidential emergency declaration DR-4473. Afterwards, the Island continued to experience aftershocks. These events severely affected the southwestern region of the Island displacing thousands of people from their homes and resulting in extensive damage to individual homes and critical infrastructure.

Puerto Ricans constantly face climate-sensitive and catastrophic weather events, climate-induced erosion, landmass-threatening sea level rise and coastal flooding, and earthquakes and tremors from shifting tectonic plates. Recently, the people of Puerto Rico have also faced the Coronavirus Pandemic (COVID-19).

The U.S. Department of Housing and Urban Development (HUD) has allocated $8.3 billion to Puerto Rico for mitigation activities. These funds will help mitigate disaster risk while providing grantees the opportunity to transform state and local planning. The Community Development Block Grant - Mitigation (CDBG-MIT) Program, administered by the Puerto Rico Department of Housing (PRDOH), as the grantee, represents a unique opportunity to carry out strategic and high-impact activities to mitigate disaster risks and reduce future losses. The rules for administering these funds are outlined in the Federal Register Vol. 84, No. 169 (August 30, 2019), 84 FR 45838, and the Federal Register Vol. 85, No. 17 (January 27, 2020), 85 FR 4676, except where the terms of the Grant Agreement between PRDOH and HUD supersede high risk criteria. Rules and requirements have been incorporated into these Program Guidelines, where applicable.

3.2 Program Summary

The Program Guidelines set forth the requirements for the Infrastructure Mitigation Program and Healthcare Strengthening Set-Aside, as approved by HUD in the PRDOH CDBG-MIT Action Plan. HUD approved a total of $4,566,451,166.00 for the Infrastructure Mitigation Program, which includes a $1 billion set-aside for Healthcare Strengthening, and a $1 billion set-aside for the non-federal match to Puerto Rico's HMGP.

The Design-Builder shall ensure that all design and construction activities align with the mitigation objectives of the CDBG-MIT program, including risk reduction, resilience enhancement, and continuity of operations.

4.0 LEGAL BASIS

In accordance with the provisions of Act 66 of June 22, 1978, as amended—the Puerto Rico Medical Services Administration Act—ASEM has its own legal personality and is autonomous in its operations and management. ASEM provides specialized health services to patients, consumer and educational institutions, medical and hospital institutions, and faculty and researchers.

This project is based on the current legal and regulatory framework designed to protect the health, safety, and well-being of the population. Applicable state and federal provisions establish the obligation to develop, strengthen, and maintain

emergency response capabilities, as well as to ensure the continuity of essential services in critical situations. In this context, the proposed initiative complies with legal mandates related to emergency management, preparedness, and risk mitigation, as well as the uninterrupted provision of critical medical services, thereby ensuring compliance with the principles of resilience and operational continuity required by current regulations.

Furthermore, the allocation of funds under the CDBG-MIT program requires ASEM to fully comply with the competitive procurement process within the federal procurement framework set forth in 2 CFR Part 200, Subpart D, sections 200.318–200.327, which establishes, among other parameters, the obligation to observe and ensure transparency, competition, and the efficient use of public resources. In accordance with applicable regulatory provisions, the project will be implemented in strict compliance with the HUD General Provisions and other Federal Statues, Regulations, and PRDOH Requirements of Healthcare Strengthening Set-Aside, which includes adherence to the requirements set forth in Section 3 and the policies regarding the participation of certified Minority, Women, and Veteran-Owned Businesses (M/W/VBE).

Likewise, the CDBG-MIT program stipulates that grant administrators are responsible for ensuring that all projects are carried out in compliance with laws and regulations, including manuals, guidelines, policies, circular letters, and other applicable provisions.

Additionally, this Request for Sealed Proposals process is conducted in accordance with the provisions of Act 73 of July 19, 2019, as amended, the General Services Administration Act for the Centralization of Government Procurement of the Government of Puerto Rico of 2019, and Regulation No. 9734 of 2026, the Uniform Regulation on Procurement, Bidding, and Contracting for Goods, Construction Work, and Non-Professional Services of the General Services Administration of the Government of Puerto Rico. In addition, Regulation No. 8823, Regulations of the Bid Board of the ASEM. These regulations are promulgated for the purpose of establishing the responsibility and jurisdiction of the Bid Board of the ASEM and the policy to be followed in procurement; Regulation No. 8824, Regulations of the ASEM's procurement. Establishing the administrative policy regarding purchase and sale procedures and the creation and operation of the Procurement Division and Bid Board that will have direct involvement in the several procurement activities that require its participation; and Administrative Procedure Manual.

Also, this Request for Sealed Proposals process will ensure compliance with the provisions of Act 173 of August 12, 1988, the Act on the Examining Board of Engineers, Architects, Surveyors, and Landscape Architects of Puerto Rico, as amended, as well as the provisions of Act 164 of December 16, 2009, as amended, the Puerto Rico Corporations Act. In addition, compliance with the provisions of Act 102 of August 1,

2025, the Act on Universal Recognition of Occupational and Professional Licenses in Puerto Rico, will be ensured.

5.0 LEGAL ENTITIES

Any proposing entity, whether domestic or foreign, must be registered and/or incorporated and listed as active in the Registry of Corporations of the Puerto Rico Department of State as a requirement for submitting its proposal.

This requirement applies to ALL entities created under Act 164 of December 16, 2009, as amended, better known as the "General Corporations Act," including any "Joint Venture," as well as any partnership formed under the provisions of Act 154 of August 20, 1996, as amended, better known as the Puerto Rico Limited Liability Companies Act, or any other entity created under special legislation.

In addition, every entity must submit a "Good Standing" certificate and/or Certificate of Compliance duly issued by the Puerto Rico's Department of State, as applicable, as a requirement for submitting its bid or proposal. Failure to comply with the foregoing will result in the disqualification or rejection of the proposal.

Furthermore, all Proposers must be registered and have eligible status in the RUL. However, if a Proposer: 1) is not registered in the Single Registry of Bidders (RUL); or 2) is not eligible in the RUL at the time of the Proposals Opening, will have a non-extendable period of five (5) business days, beginning on the date of the Proposals Opening, to comply with the requirements established by the ASG's Registry Office and be registered in the RUL. It is the Proposer's sole responsibility to update its information and submit the corresponding documentation within the established timeframe. Failure to do so will be sufficient basis for disqualification or rejection of the proposal. If the Proposer fails to update its records in the RUL within the specified timeframe, it will be disqualified, or its bid or proposal will be rejected. Therefore, the Procurement Division clarifies that it will not accept any documents from the Proposer after the Proposals Opening, except for the RUL Certificate of Eligibility, which must be submitted within the timeframe or documents that are request by the Evaluation Committee or Bid Board through an official request for information or clarification.

Additionally, the project designer must be registered in the General Services Administration's Single Registry of Professional Service Providers (RUP). All designers must be registered with eligible status in the RUP at the time of proposal submission. The proposal must include current proof of such registration with eligible status. Failure to register or the submission of incomplete or expired proof may constitute sufficient basis for the disqualification or rejection of the proposal.

Prior to awarding a Contract, ASEM must obtain Contractor and First Tier Sub-Contractor clearance. To obtain clearance, ASEM will search https://www.sam.gov/SAM/ to verify whether the Contractor and First Tier Sub-Contractor are debarred or not. Therefore, the Proposer(s) and First Tier Sub-Contractor must be registered in the System for Award Management (SAM) at the time of the Proposal submission or initiate the registration process upon Proposal submission. For more information about SAM go to https://www.sam.gov/SAM/. Awards will only be issued to entities which are cleared and not ineligible for award of a Contract due to suspension, debarment, or HUD imposed limited denial of participation.

Please be advised that all subcontractors must strictly comply with the requirements applicable to government contracting, as well as with all provisions, regulations, and obligations related to the CDBG-MIT program to which the contracting party is subject.

6.0 ANTI-DISCRIMINATION CLAUSE

The ASEM shall fully observe and comply with all antidiscrimination laws, regulations, and policies in effect in Puerto Rico and with applicable federal laws in accordance with the requirements of the CDBG MIT program, including but not limited to Title VI of the Civil Rights Act, the Fair Housing Act, Title VII as interpreted by the EEOC, the ADA, the ADEA, and any guidelines or requirements issued by HUD regarding equal opportunity in effect as of the date of publication of this Request for Sealed Proposal.

7.0 SCOPE OF WORKS

The Design-Builder will have the responsibility to comply with, but not limited to, all applicable provisions of federal, state and local laws, codes, ordinances, rules and regulations, and policies that govern the use of the CDBG-MIT funds, including the Program Guidelines, in complying with its obligations under the Infrastructure Mitigation Program (Healthcare Strengthening Set-Aside) for Scope of Work and RFP Documents, ASEM, and HUD and/or PRDOH provisions. The Design-Builder is responsible for the information (or lack of information), being provided.

Also, the Proposer must examine thoroughly the RFP Documents and other related data, site inspection, and promptly notify the Procurement Division in writing of all conflicts, errors, ambiguities, or discrepancies which the Proposer has discovered in or among the RFP Documents and any other related data or documents.

Before submitting a proposal, the Proposer is responsible for obtaining any additional or supplemental examinations, investigations, explorations, tests, studies, and data it

deems necessary regarding conditions at or adjacent to the site, including surface, subsurface, and underground utility conditions. This includes information that may affect cost, progress, performance or furnishing of the work, as well as matters related to proposed construction means, methods, techniques, sequences, procedures, safety precautions and safety programs. The Proposer shall use such information to determine its Proposal for performing and furnishing the work in accordance with the specifications, terms, and conditions of the RFP.

The ASEM and PRDOH INFRA-MIT program is not responsible for discipline/plan coordination, nor for the information being provided. Any criteria/determination or comments/observations included in the proposal evaluation does not constitute automatically that the submission follows all the applicable provisions under the Infrastructure Mitigation Program.

Specific activities for design-build services are included in **Attachment 1** (Scope of Works). The Scope of Work describes the general work to be performed.

7.1 Location

The proposed location for the Puerto Rico's New Trauma Hospital is in La Plazoleta, Pedro Arzuaga at coordinates 18.394292, -66.074302.

7.2 Deliverables

The Project shall be delivered using an integrated Design-Build approach under which the Design-Builder is responsible for coordinating and delivering all design, BIM, construction, commissioning, activation, operational readiness, and closeout deliverables required by the RFP Documents, **Attachment 1** (Scope of Work), and the Contract Documents.

The Design-Builder shall be responsible for coordinating all disciplines, consultants, subcontractors, specialty consultants, equipment vendors, and suppliers necessary to deliver a complete Project, as described in **Attachment 1** (Scope of Works).

General Coordination Considered in the Scope of Works

- Architectural review design
- Medical planning
- Civil engineering
- Structural engineering
- Mechanical engineering
- Electrical engineering
- Plumbing engineering
- Fire protection and life safety
- Medical gas systems
- Information technology infrastructure
- Security systems
- Building automation
- Hospitaller and Medical equipment and/or coordination
- Site development
- Utility infrastructure
- Construction
- Testing and inspections
- Commissioning
- Regulatory approvals
- Licensing support
- Staff training
- Activation and operational readiness

The deliverables shall include all design, construction, commissioning, activation, operational readiness, closeout, record documentation, training, warranties, turnover materials, and regulatory approval support necessary to place the Project, or each approved phase of the Project, into functional operation in accordance with the RFP Documents, **Attachment 1** (Scope of

Work), the Contract Documents, applicable permits, codes, standards, healthcare facility requirements, and all federal, state, local, HUD, PRDOH, CDBG-MIT, and ASEM requirements.

BIM and Design Coordination Approach

The Design-Builder shall implement a coordinated BIM and design management process to support interdisciplinary coordination, constructability, phasing, code compliance, commissioning, facility turnover, and integration of hospital systems. The BIM process shall be used as a project delivery and coordination tool and shall not relieve the Design-Builder, Designer, Builder, consultants, subcontractors, or specialty consultants from their professional, contractual, code, permitting, quality control, and coordination responsibilities.

At a minimum, the Design-Builder shall prepare and maintain a BIM Execution Plan that identifies the proposed software platforms, model uses, level of development or level of information need, modeling responsibilities, coordination schedule, model exchange procedures, naming conventions, quality control procedures, clash detection process, issue tracking workflow, approval responsibilities, and requirements for model updates at each design, construction, commissioning, and closeout milestone.

The Design-Builder shall develop, coordinate, and maintain discipline-specific and federated BIM models for architectural, structural, civil, mechanical, electrical, plumbing, fire protection, medical gas, information technology, security, building automation, hospitaller and medical equipment, site, utility, and other systems necessary for the Project. The federated model shall be used to identify, track, resolve, and document spatial, functional, access, clearance, maintenance, constructability, and interdisciplinary coordination issues before the affected work is released for fabrication, procurement, or construction.

The Design-Builder shall conduct regular design coordination and BIM coordination meetings with the Designer, Builder, consultants, subcontractors, specialty consultants, equipment vendors, and other required parties. Coordination meetings shall include review of design progress, owner requirements, phasing, construction sequencing, logistics, utility interfaces, hospitaller and medical equipment requirements, infection control and operational impacts, permit and regulatory requirements, clash detection results, unresolved design issues, decision logs, assigned action items, and schedule impacts.

BIM deliverables shall include, as applicable, the BIM Execution Plan, discipline models, federated coordination models, clash detection reports, issue logs,

coordination meeting records, model-based design review materials, model extracts or documents required to support permitting and regulatory approvals, as-built or record models, and model information necessary to support ASEM's operation, maintenance, training, asset management, commissioning, and turnover requirements. The final BIM and record deliverables shall be consistent with the Contract Documents and shall be submitted in the formats and at the milestones required by ASEM.

Execution Period

The Base Bid for the Project shall consist of delivery of the Project in accordance with the Scope of Work and the RFP Documents in two phases, within an overall execution period not to exceed **54 months**, divided as follows:

- First Phase not to exceed **21 months**
- Second Phase not to exceed **33 months**

Work on the Second Phase may commence prior to completion of the First Phase, provided that such early commencement is consistent with the approved schedule, phasing plan, permits, site logistics, safety requirements, operational requirements, and all applicable Contract Documents.

Project Phasing

The First Phase consists of the development of the basement and first floor through functional operation, including the building enclosure, but excluding the helipad.

The Second Phase consists of developing the second through ninth floors and the helipad through functional operation, as well as completing all remaining Project areas through final completion and close-out.

7.3 Local Participation

ASEM encourages the Contractor to engage local subcontractors, professionals and relevant service providers headquartered in Puerto Rico ("Local Parties") as Team Members and Key Personnel or Staff to the greatest extent possible. Contractor is encouraged as part of this RFP to provide descriptions of its current and/or anticipated business arrangements with Local Parties and Local Parties who are Team Members, Key Personnel, and Staff for the Project, as applicable.

7.4 CDBG-MIT Requirements

Any Proposer participating in this Request for Sealed Proposals process must be familiar with the current guidelines, manuals, laws, policies, directives, and

regulations issued by HUD that are applicable to this procurement process. Lack of knowledge of these provisions does not exempt the Proposer from compliance.

As part of this Request for Sealed Proposals process, the Proposer is required to comply with all requirements, restrictions, initiatives, objectives, and regulations applicable to the CDBG-MIT grant, as well as with any supplementary provisions governing this Request for Sealed Proposals process.

It is the sole responsibility of the Contractor to verify the CDBG-MIT grant requirements have been amended, revised, or updated by HUD or the Administering Entity. Any activity performed by the Contractor that is not eligible under the CDBG-MIT grant or program may not be included on the invoice, will not be reimbursed, and must be borne entirely by the Contractor.

The Contractor must adhere to applicable requirements of the CDBG-MIT grant initiatives, goals, and regulations, including Federal Register Notices 83 FR5844, 83 FR40314, 84 FR4836 and 85 FR 4681. If the Contractor performs ineligible activities under the CDBG-MIT Program, the Contractor cannot include them in the invoice for payment. The selected Design-Builder agrees to comply with all the requirements included in **Attachment 7** (HUD General Provisions and other Federal Statues, Regulations, and PRDOH Requirements of Healthcare Strengthening Set-Aside).

7.4.1 Minority, Woman, and Veteran-Owned Businesses (M/W/VBE)

ASEM recognizes its obligation to promote opportunities for the greatest possible participation of M/W/VBEs, as well as the employment of members of minority groups and women in the performance of all federally funded contracts, including the CDBG-MIT. Therefore, ASEM is committed to ensuring that businesses certified as M/W/VBEs receive incentives to submit proposals in response to this Request for Sealed Proposals.

Furthermore, ASEM commits to demonstrating an acceptable good-faith effort to meet the M/W/VBE subcontracting targets, which consist of 20% of the total contract value, allocated as 10% for MBE participation and 10% for WBE participation.

The work to be performed under the contract resulting from this Request for Sealed Proposals process will be subject to the regulations set forth on 2 C.F.R. § 200.321. This regulation requires, among other things, that the non-federal entity (ASEM) take the necessary measures to ensure that all sub-recipients, contractors,

subcontractors, and/or developers, funded in whole or in part by CDBG-MIT financial assistance, ensure that, whenever possible, contracts and other economic opportunities are directed toward small businesses and minority-owned businesses (MBEs), women-owned businesses (WBEs), veteran-owned businesses (VBE), and businesses in areas with a labor surplus. In accordance with Executive Orders 11625, 12138, and 12432, ASEM will make every effort to ensure that small businesses, M/W/VBE, and businesses in labor-surplus areas participate in contracting.

Therefore, by submitting a proposal, the Proposer acknowledges and agrees that, if awarded the contract, it will provide the duly completed M/W/VBE Utilization Plan template during the term of the contract as part of its overall efforts to comply with the M/W/VBE policy. Please refer to the following link to access and review the details of the M/W/VBE Utilization Plan template https://recuperacion.pr.gov/en/section-3/enterprise-woman-minority mwbe/utilization-plan/

NOTE: For more information, you can access the PRDOH M/W/VBE Policy via the following link https://recuperacion.pr.gov/en/section-3/enterprise woman-minority-mwbe/m-wbe-policy/

7.4.2 Section 3

By submitting its proposal, the Proposer acknowledges and agrees that the work to be performed under the contract resulting from this solicitation will be subject to the requirements of Section 3 of the Housing and Urban Development Act of 1968, as amended, 12 U.S.C. §1701u, and its implementation in 24 C.F.R. Part 75 (Section 3).

HUD's current benchmark standards for Section 3 projects, established in accordance with the provisions of 24 C.F.R. § 75.23, are:

Regulations on Working Hours	Proportion Formula	Reference percentage *
Section 3 Workers	Working Hours for Section Workers 3 ÷ Total hours worked	25%
Section 3 workers to whom this is addressed	Work Schedule for Workers Selected for the Section 3 Program ÷ Total hours worked	5%

* Federal Register Vol. 85, No. 189 (September 29, 2020), 85 FR 60907

1. For a worker to qualify as a Section 3 worker, he or she must meet one of the following requirements:

    a. Self-certification by the worker that his or her income is below the income limit for the previous calendar year;
    b. Self-certification by the worker of participation in a means-tested program, such as public housing or Section 8 subsidized housing;
    c. Certification by the Department of Public Housing, or by the owner or manager of a project-based Section 8 housing unit, or by the manager of a tenant-based Section 8 housing unit, when the worker participates in one of its programs;
    d. Certification by the employer that the worker's income from that employer is below the income limit, as calculated by the employer based on the worker's annualized full-time wage rate; or
    e. Certification by the employer that the worker is employed by a Section 3 company.

2. For a worker to qualify as a Section 3 Targeted Worker under eligible financial assistance from the Department of Housing and Community Development:

    a. Confirmation from the employer that the worker's residence is located within one mile of the workplace or, if fewer than 5,000 people live within one mile of the workplace, within a circle centered on the workplace that is large enough to encompass a population of 5,000 people according to the most recent U.S. Census;
    b. Certification by the employer that the worker is employed by a Section 3 company; or
    c. Self-certification by the worker that he or she is participating in the YouthBuild program.

NOTE: For more information regarding the requirements, please refer to the PRDOH Section 3 Policy at the following link https://recuperacion.pr.gov/en/download/section-3-Policy/ and in Spanish at: https://recuperacion.pr.gov/download/politica-sobre-seccion-3/.

Specifically, for this contract, if selected Proposer, shall submit a Section 3 Plan to meet the Section 3 minimum goals: (i) for non-construction contracts at least three percent (3%) of the total dollar

amount of the proposal; and (ii) new hiring goals of at least thirty percent (30%) of new hires to be Section 3 Residents.

7.4.3 Davis Bacon and Related Acts

By submitting its proposal, the Proposer acknowledges and agrees that the project that is the subject of this Request for Sealed Proposals receives funding from the CDBG-MIT program. Consequently, the Proposer must fully comply with all applicable federal, state, and local labor standards, as well as with relevant laws and regulations. These provisions include, but are not limited to, the following:

1. The Davis-Bacon Act of 1931 and Related Acts (DBRA), as amended (40 U.S.C. §§ 3141–3148);
2. The Fair Labor Standards Act (FLSA), as amended (29 U.S.C. § 201 et seq.);
3. Contracts Work Safety and Hours Standards Act (CWHSSA), (40 U.S.C. § 3701 et seq.); and
4. Copeland Anti-Bribery Act, (40 U.S.C. § 3145).

The Procurement Division informs you that these laws are intended to ensure that workers on federally assisted construction projects receive: (1) wages no less than the prevailing local wages (including additional benefits), as determined by the U.S. Department of Labor; (2) protection against unfair labor practices, such as unauthorized deductions or bribes; (3) adequate overtime pay; and (4) safe working conditions and reasonable working hours.

The Proposer acknowledges and agrees that, if awarded the contract, it will be responsible for including the following documents in all applicable contracts and subcontracts to ensure full compliance with Federal Labor Standards.

1. Wage Determination: The "wage determination" is the list of wages and fringe benefits for each classification of laborers and tradespeople that the Administrator of the Wage and Hour Division (WHD) has determined to be in effect in a specific area (generally a county) for a specific type of construction. Davis-Bacon wage determinations are available at www.sam.gov (**Attachment 3**: Wage Determination)

2. HUD Form 4010 - Federal Labor Standards Provisions (**Attachment 4**: HUD Form 4010) This document describes the applicable federal labor requirements, including the Davis-Bacon provisions, and must be included in all construction contracts subject to the Davis-Bacon Reform Act (DBRA). This form is a crucial document used in federal contracts to ensure compliance with labor standards. It includes labor provisions that require contractors to comply with Davis-Bacon wage determination and reporting requirements, and it establishes remedies and penalties for noncompliance.

7.4.4 Preference Laws

The preference for acquiring goods produced in the United States, established in 2 CFR § 200.322, applies to all acquisitions financed with CDBG-MIT funds. This provision requires that, whenever possible and in accordance with the law, preference be given to goods and materials of U.S. origin. HUD has confirmed that this requirement is equally applicable to funds under the CDBG-MIT program; therefore, all procurement or purchases made under these programs must comply with this domestic preference. For this project, the provisions of 2 CFR § 200.322 apply.

7.4.5 Others

The Design-Builder acknowledges that the Project is funded, in whole or in part, with CDBG-MIT funds awarded to ASEM pursuant to the Subrecipient Agreement executed between ASEM and the Puerto Rico Department of Housing (PRDOH). Accordingly, the Design-Builder shall comply with, and shall cause its subcontractors, consultants, suppliers, and lower-tier subcontractors to comply with, all applicable terms, conditions, requirements, policies, procedures, and obligations imposed on ASEM under the Subrecipient Agreement, including all exhibits and attachments thereto, to the extent applicable to the Work.

Without limiting the generality of the foregoing, the Design-Builder shall comply with all applicable federal, state, local, HUD, PRDOH, and CDBG-MIT requirements, including procurement, eligibility, cost allowability, financial management, reporting, monitoring, audit, inspection, recordkeeping, labor standards, Section 3, M/W/VBE, environmental review, URA, nondiscrimination, conflict of interest, debarment and suspension, insurance, bonding, safety, and closeout requirements. The Design-Builder shall also comply with any

additional written guidance, directives, determinations, procedures, or corrective actions issued by ASEM, PRDOH, HUD, or any other governmental authority with jurisdiction over the Project.

The Design-Builder shall cooperate fully with ASEM, PRDOH, HUD, the Comptroller General of the United States, the Government of Puerto Rico, and their authorized representatives in connection with any monitoring, compliance review, audit, site inspection, investigation, reporting request, document request, or corrective action related to the Project. The Design-Builder shall maintain complete and accurate records sufficient to demonstrate compliance with the Contract Documents, the RFP Documents, the Subrecipient Agreement, and all applicable CDBG-MIT requirements, and shall make such records available upon request.

The Design-Builder acknowledges that failure to comply with applicable Subrecipient Agreement requirements, CDBG-MIT requirements, PRDOH requirements, or HUD requirements may result in withholding of payment, disallowance of costs, rejection of work, corrective action, suspension of work, termination for cause, recapture or repayment of funds, or any other remedy available to ASEM under the Contract Documents or applicable law. The Design-Builder shall be solely responsible for any costs, damage, disallowed costs, ineligible costs, repayment obligations, penalties, or delays resulting from its failure, or the failure of its subcontractors or consultants, to comply with such requirements.

8.0 RFP PROCESS

This procurement process began with the publication of the RFP's notice for Design-Build services. This document outlines the details of the process and its milestones. The Procurement Manager has structured a procurement process designed to achieve the desired outcomes described in this document, while establishing a competitive environment to ensure that each Proposer has an equal opportunity to submit a proposal in response to this Request for Sealed Proposals. Proposals will be reviewed and evaluated by the Procurement Division, Bid Board or Evaluation Committee; however, the Bid Board with the approval of the ASEM's Executive Directo will make the final determination regarding which proposal offers the best value, taking into consideration the price and other evaluation factors, as set forth in this Request for Sealed Proposals. Before the Technical Evaluation being evaluated, each proposal will be reviewed to determine if it meets the Mandatory Requirements established in this Request for Sealed Proposals. Proposals that meet the Mandatory Requirements will then undergo the Technical Evaluation.

The issuance of this Request for Sealed Proposals does not constitute, nor will it in any way constitute a formal agreement between the parties, nor will it confer any rights on the Awarded Proposer, even if a Notice of Award has been issued.

8.1 Schedule

The timeline for this Request for Sealed Proposals process is detailed below:

September 2, 2026	**Publication of the Request for Sealed Proposals**
immediately following the publication of the Request for Sealed Proposals	**Availability of Documents for the Request for Sealed Proposals**
September 24, 2026 10:00a.m.	**Pre-Proposal Meeting**
immediately after the pre-proposal meeting ends	**Site Inspection**
After the orientation meeting was completed. to December 1, 2026 at 2:00p.m.	**Timeframe for coordinating the additional site inspection**
October 8, 2026 2:00p.m.	**Last day to submit Request for Clarifications**
December 1, 2026 2:00p.m.	**Submission deadline for proposal**
December 1, 2026 2:30p.m.	**Proposals Opening**

The Procurement Manager reserves the right to change the date and time of any event scheduled in the Request for Sealed Proposals. Any changes will be published via addenda in the RUS and on the website, https://www.asem.pr.gov/administrativo#Subastas and through the link provided by the J.E.D.I. platform, https://jedi.asg.pr.gov/#/Repository?Identifier=27DJ-00415

8.2 Publication of the Request for Sealed Proposals

The Procurement Division will publish this Request for Sealed Proposals on the ASEM's website, https://www.asem.pr.gov/administrativo#Subastas, on the RUS platform, and other print and digital media outlets.

8.3 Availability of the Request for Sealed Proposals Documents

The documents for this Request for Sealed Proposals must be downloaded (free of charge), starting from the date of publication of the Request for Sealed Proposals notice, from the website https://www.asem.pr.gov/administrativo#Subastas or through the link provided by the J.E.D.I. platform, https://jedi.asg.pr.gov/#/Repository?Identifier=27DJ-00415.

8.4 Request for Clarifications

Any questions or Requests for Clarification regarding the documents of this Request for Sealed Proposals process must be submitted to the Procurement Division in writing via email to subastascompras@asem.pr.gov or through the link provided by the J.E.D.I. platform, https://jedi.asg.pr.gov/#/Repository?Identifier=27DJ-00415, on or before the date and time established in the Request for Sealed Proposals documents. The email subject line should include the Request for Sealed Proposals number, 27DJ-00415.

The Request for Clarification must be submitted by the Proposer using the document titled "Request for Clarification," included as **Exhibit 1** (Request for Clarification) to this document. The question must be clearly identified and indicate the section(s) and page number of this document or other document that serves as the basis for the question. The question may be written in English or Spanish. Responses to questions will be published on the website https://www.asem.pr.gov/administrativo#Subastas and through the link provided by the J.E.D.I. platform, https://jedi.asg.pr.gov/#/Repository?Identifier=27DJ-00415

Procurement Division reserves the right to determine not to answer any question or Request for Clarification submitted after the established date and time. The Procurement Manager and Procurement Division will not respond to verbal requests, except those made during the pre-proposal meeting.

8.5 Pre-Proposal Meeting

A pre-proposal meeting will be held on the date and time specified in section 8.1 of this RFP documents. The pre-proposal meeting will be conducted in person at Puerto Rico's Medical Center, Auditorium B and C at Cardiovascular Center of Puerto Rico and the Caribbean, First Floor, located in the Bo. Monacillos, San Juan, Puerto Rico, and will be also streamed lice via Microsoft Teams, as posted on ASEM's website https://www.asem.pr.gov/administrativo#Subastas. Proposers are strongly encouraged to attend. Representatives from ASEM will be present to discuss the project scope, evaluation criteria, proposal requirements, terms, and conditions.

Attendance at the pre-proposal meeting is not mandatory. Therefore, attendance by the Proposer or its authorized representative is not a requirement for submitting a proposal. Under no circumstances will absence from the pre-proposal meeting constitute basis for a subsequent appeal to the award, a claim for additional compensation, or an extension of the project execution deadline.

During the pre-proposal meeting the following will not be permitted: (1) loud or disruptive comments, (2) addressing the Procurement Manager, ASEM officials, or any other meeting attendee in an aggressive or offensive manner, and (3) interruptions (talking out of turn), or (4) any other conduct that disrupts the ordinary course and purpose of the meeting. Any instance of inappropriate or disruptive conduct by any Proposer or interested party participating in this Request for Sealed Proposals process during the pre-proposal meeting will be documented and constitute sufficient basis for the disqualification or rejection of its proposal.

Verbal statements made during the pre-proposal meeting shall not be binding or legally valid. Any changes, additions, or clarifications to the Request for Sealed Proposals or related documents resulting from the pre-proposal meeting, or otherwise deemed necessary by the Procurement Division, shall be issued through a written addenda formally approved and issued by the Procurement Division. All addenda will be posted at ASEM's website https://www.asem.pr.gov/administrativo#Subastas Proposers are responsible for regularly monitoring the website to remain informed of any posted responses, addenda or other RFP related document.

8.6 Site Inspection

An opportunity will be provided to conduct a site inspection immediately following the pre-proposal meeting. **Although attendance at the site inspection is not mandatory**, Proposers and other Key Personnel or Staff on its team are strongly encouraged to examine the site. The site will be open to all interested parties to familiarize themselves with the existing physical conditions, restrictions, and operational limitations.

Outside of the scheduled site inspection, the Proposer may request access to the site to conduct additional evaluations, studies, inspection, measurements, or other site assessments deemed necessary to prepare its Proposal. Any such access must be coordinated in advance with Procurement Division via email subastascompras@asem.pr.gov or through the link provided by the J.E.D.I. platform, https://jedi.asg.pr.gov/#/Repository?Identifier=27DJ-00415 The Proposer shall be solely responsible for all costs, liabilities, safety requirements, and security protocols associated with any independent site evaluation, study or inspection.

Any evaluation, study, inspection, or site access conducted by the Proposer shall not modify the Request for Sealed Proposals or any of its items, conditions, requirements, or documents, nor shall it relieve the Proposer's of its obligation to review and rely on the complete Request for Sealed Proposals documents.

Since the project will be developed within a complex with various continuously operating medical facilities, it is essential that Proposers have prior knowledge of the area's physical, functional, operational, and logistical conditions. The complex contains essential services operating 24/7 that cannot be interrupted or affected by the project activities. Therefore, the Proposer must carefully evaluate access points, patient and clinical staff flows, supply routes, critical areas, operational restrictions, and any other element that could impact the safe execution of the work.

Lack of knowledge of physical conditions, operational, functional, and logistical conditions will not exempt the Proposer from its responsibility to comply with the project requirements, nor will it justify subsequent claims. For the Proposer's information and to facilitate its understanding of the operations carried out in the facilities located within the project area, this document includes a detailed graphic representation illustrating the location, distribution, and functional relationship of the existing facilities, operations, and activities within the project area. This representation is intended to support the evaluation of the operational environment, identify critical elements that could influence project execution, and ensure that the Proposer considers,

from the proposal preparation stage, the physical, logistical, operational, and functional conditions that characterize the site. See **Attachment 2** (Representation of the physical, logistical, operational, and functional conditions that characterize the site).

The Procurement Division will not be responsible for incorrect interpretations arising from the site inspection or the graphic representation provided in this document; each Proposer is responsible for properly evaluating the information.

As part of the information gathering process and solely for use in the Request for Sealed Proposals process, the Procurement Division authorizes the Proposers to take photographs, videos, and/or measurements of the site.

The Proposer is expected to ensure they are aware of all local conditions, physical limitations, and site characteristics that may affect the cost, schedule, or performance of the required work. Under no circumstances will the failure to inspect the site constitute basis for a post-award dispute, a claim for additional compensation, or an extension of the project execution deadline.

Verbal statements made during the site inspection(s) will not be legally valid. Any changes, additions, or clarifications to the Request for Sealed Proposals documents resulting from this event will be formally issued by the Procurement Division through addenda.

Communications with ASEM personnel regarding the proposed project is not permitted during the site inspections. Any questions related to the site inspection must be submitted in writing, following the instructions provided herein.

8.7 Proposal Submission

Proposals must be submitted in the following two (2) formats. Refer to Section 8.1 to know the deadline.

1. Physically (Hard Copy), at ASEM's Procurement Division Office, First Floor, Services and Supply Building, Puerto Rico's Medical Center, located in the Bo. Monacillos, San Juan, Puerto Rico

2. Electronically (digital), using the link https://jedi.asg.pr.gov/#/Repository?Identifier=27DJ-00415, and uploading your Proposal in the section identified as "Suplidor or Supplier"

Proposers who fail to submit its proposal in both (2) required formats (Physically and Electronically) may be disqualified.

The envelope containing the proposal that will be physically (hard copy) submitted must be identified as Section 9.2.1 of this document.

The document physically (hard copy) submitted to the Procurement Office will be considered the official proposal. Upon receipt of the envelope containing the proposal at the Procurement Office, it will be marked with the exact date and time of receipt, which will constitute the official date and time of submission of the proposal.

Documents submitted via the link provided here must include a true and exact copy of the physically (hard copy) submitted proposal documents. The date and time of receipt of the electronically submitted proposal will be those printed on the document. As an exception, the Procurement Manager may authorize the physical submission of supplementary attachments that, due to their size, exceed the space available for submitting the electronic proposal.

In the event that, for any reason, a Proposer's proposal has been received in physical form, but the electronic proposal has not been received by the deadline indicated above, the Proposer will be notified during the Proposals Opening and will have until the end of the Proposals Opening to send the proposal.

The submission of a duly completed proposal constitutes the Proposer's acceptance of all the terms, specifications, and conditions communicated in this Request for Sealed Proposals. The obligations, duties, and limitations arising from mandatory federal and state clauses duly disclosed herein, and those that may arise from competent authorities, constitute binding regulations that shall not, under any circumstances, be recognized as basis for refusing to enter into a contract to provide the goods, works, and services tendered herein.

Furthermore, the Proposer agrees to comply with all applicable federal and Puerto Rico laws and regulations, including, but not limited to, those related to the practice of regulated professions and those that may affect its ability to perform the scope of work under this contract. The Proposer certifies that it possesses all necessary licenses, certifications, permits, authorizations, and approvals to perform the work, which must be valid and current throughout the term of the contract. The Proposer and each of its employees, agents, subcontractors, and subconsultants must possess all certifications, licenses, permits, authorizations, consents, and approvals necessary for the execution of the scope of work under this contract. Therefore, the Proposer must always ensure that professional, architectural, or engineering service is performed by

qualified professionals with the appropriate training, knowledge, experience, and licenses to perform such service, in accordance with applicable federal and local laws and regulations. As part of the evaluation process, the Procurement Division, Bid Board or Evaluation Committee will conduct a validation process to verify the Proposer's compliance with these requirements.

Likewise, by submitting a proposal, the Proposer acknowledges that: (a) it has read and understood the Request for Sealed Proposals; (b) the proposal is made in accordance with the requirements of the Request for Sealed Proposals; (c) the proposal is based on labor, materials, equipment, and any other associated costs required for the Design-Build, without exception; and (d) the proposal will remain valid for a period of one hundred eighty (180) calendar days from the deadline for submitting the proposal. Therefore, any proposal that establishes a validity period shorter than one hundred eighty (180) calendar days from the deadline for submitting the proposal will be disqualified or rejected.

The Procurement Division will only accept the proposal until the date and time specified in the Request for Sealed Proposals documents. The exact date and time of receipt will be stamped on Proposal's envelope or package. Evidence of receipt of the stamped envelope or package will be retained in the official procurement process file.

Proposals submitted after the deadline established in the Request for Sealed Proposals will not be accepted. Therefore, the proposal will be returned to the Proposer informing them of its disqualification from participating in the Request for Sealed Proposals process for having failed to comply with the delivery requirements established in the RFP documents.

Should any natural event or special circumstance occur that causes the ASEM headquarters to close, preventing the receipt of proposals by the deadline established in the RFP documents, the proposals will be accepted when the Procurement Division resumes its operations, at a time duly notified.

The Procurement Division will not assume any responsibility for a Proposer's failure to submit its Proposal within the timeframe established in the Request for Sealed Proposals. It is the Proposer's sole responsibility to ensure compliance with all submission requirements, including proper identification, use of the correct submission method, and strict adherence to the deadline stipulated in the RFP documents. The Procurement Division will not be liable for errors or omissions attributable to the Proposer, third parties, or technical, logistical, or administrative failures that prevent the timely submission of the bid or proposal.

Each Proposer is entitled to submit only one (1) bid or proposal. If the Proposer submits multiple proposals through different legal entities, subsidiaries, or affiliates, resulting in an unfair advantage, this will be basis for its disqualification or rejection of the proposal.

8.7.1 Handling Open or Damaged Envelopes or Packages

If, before the Proposals Opening, the Procurement Division receives a proposal with an open, tampered, or damaged envelope or package, the Procurement Manager, as applicable, will contact the Proposer so that they:

1. Personally verify the envelope or package and the documents it contains; and
2. Formally submit the sealed proposal.

In this circumstance, the delivery date will be the date of the original receipt. The Procurement Manager will prepare an incident report documenting the condition of the envelope or package, which will be attached to the proposal. The Proposer will certify the date and time of the inspection, ensuring transparency in the process; otherwise, the proposal will not be accepted.

8.8 Proposals Received and Registered

All proposals received on or before the established deadline for proposal's submission will be recorded by the Procurement Division in the Proposals Register using the method established by the Procurement Manager for this purpose.

8.9 Corrections to the Offer or Proposal by the Proposer

Any corrections to offer or Proposal resulting from apparent errors must be confirmed by the Proposer's authorized representative for this RFP through its signature or initials before the deadline for submission and Proposals Opening. Failure to comply with this requirement shall render the offer or Proposal invalid for the affected item(s), unless an exception is expressly permitted under the RFP documents or applicable ASG's regulations.

8.10 Modification to the Offer or Proposal Prior to the Proposals Opening

Any modification that alters the terms of the previously submitted offer or proposal must be made in writing and submitted to the Procurement Division, provided that the deadline established in the RFP documents for its submission

has not expired. This modification must be submitted in the same manner as the original offer or proposal, as established in the RFP documents. It must also be properly identified with the same information required for the original offer or proposal and clearly include the word "modification" and signed by the Proposer's authorized representative.

Changes to a submitted Proposal will not be accepted after the established deadline for Proposal submission.

All modifications to the Proposal shall be opened together with the original Proposal at the date, time, and location established for the Proposals Opening.

8.11 Withdrawal of Proposal

The withdrawal of a proposal may be requested in writing and submitted to the Procurement Division at any time prior to the date established for Proposals Opening. The request must be delivered in hard copy to the ASEM's Procurement Division Office, in Puerto Rico's Medical Center, located in the Bo. Monacillos, San Juan, Puerto Rico.

Once a proposal has been withdrawn, the Proposer may not submit a substitute proposal. Under no circumstances will the withdrawal of a proposal be permitted after the Proposals Opening.

8.12 Amendment to the Request for Sealed Proposals (Addenda)

The Procurement Manager may amend the terms of this Request for Sealed Proposals if: (1) it discovers a substantial and irremediable error therein, (2) it is necessary to modify its terms, conditions, specifications, or scope of work, (3) it is desired to increase or decrease terms or quantities, or to change conditions or specifications, and (4) or other circumstances warrant it.

The terms may be amended within the following timeframes:

1. Up to five (5) business days before the Proposals Opening, if the amendment involves changes or additional requests that must be included in the proposal; or
2. One (1) business day before the Proposals Opening when the amendment does not affect the submission of proposals.
3. The Procurement Division will publish Addenda in the RUS, and on the ASEM website, https://www.asem.pr.gov/administrativo#Subastas

All Addenda will become part of the RFP documents, and this RFP and interested Proposers must consider them when submitting proposals.

Proposers should continuously monitor the site to ensure they are aware of and take note of any posted Addenda.

8.13 Cancellation of the Request for Sealed Proposals Process

The Procurement Division may partially or completely cancel the Request for Sealed Proposals, even after the Proposals Opening has been held, provided that a contract has not been formalized or a purchase order has not been issued, if the cancellation of the Request for Sealed Proposals is in the best interest of the Government of Puerto Rico. After the process is canceled, the Procurement Division will notify the Proposer of the Cancellation Notice through https://www.asem.pr.gov/administrativo#Subastas and in the RUS.

Prior to the execution of a contract for the services requested here, this RFP may be canceled and terminated at its discretion without liability by ASEM, PRDOH, the Government of Puerto Rico and HUD.

8.14 Proposals Opening

The Procurement Manager will open the proposals on the date and at the time specified in Section 8.1 of this Request for Sealed Proposals in Puerto Rico's Medical Center, ASEM's Central Laundry Conference Room, located in the Bo. Monacillos, San Juan, Puerto Rico. The Proposal Opening will also be streamed live via Microsoft Teams, as posted on the website https://www.asem.pr.gov/administrativo#Subastas The Proposals Opening will be open to the public, and any interested person may attend. However, the proposal contents will not be read aloud. Only the name of the Proposers will be announced.

All proposals, evaluations, discussions, and negotiations will remain confidential throughout the evaluation and negotiation process until the contract is signed. During this period, only personnel from the Procurement Division, members of the Bid Board and the Evaluation Committee, will have access to the proposals and the evaluation results.

The submitted proposals will remain in the custody of the Procurement Division and will not be opened under any circumstances until the date and time for the Proposals Opening.

8.15 Ownership of Documents and Proposal

All documents and materials submitted as part of the Proposer's proposal in response to this Request for Sealed Proposals process shall become the

property of the Procurement Division. Cancellation, selection, rejection, or disqualification shall not affect this provision.

8.16 Cost of Proposal Documents

The costs associated with preparing the proposal are the sole responsibility of the Proposer. The Procurement Division shall not pay any costs associated with preparing the Proposer's proposal or any additional documents, materials, or samples, if any, as requested in the Request for Sealed Proposals process.

8.17 Blackout Period

Any verbal communication related to the content of this Request for Sealed Proposals from its publication until its award with personnel of Procurement Division, members of the Bid Board, Evaluation Committee members, buyers, liaisons, and specialists involved in the Request for Sealed Proposals is strictly prohibited. Failure to comply with this requirement may result in the disqualification or rejection of the proposal that does not comply with the provisions of this section.

In order to guarantee transparency, integrity, and uniformity in the Request for Sealed Proposals process, *ex parte* communications, outside of the mechanisms contemplated in the acquisition methods, between ASEM and PRDOH officials, employees, or consultants, including personnel of Procurement Division, members of the Evaluation Committee, the Bid Board, with one (1) or more Proposers, regarding matters related to this RFP are categorically prohibited.

This prohibition is in effect at all stages from the publication of this RFP and continuing through the issuance of the notification of an award or resolution. This prohibition does not apply to communications that must take place during public meetings, interviews with Proposers, requests for information, and any other procedures that may be requested by the Procurement Division, Evaluation Committee or Bid Board.

8.18 Proposer's responsibility

It is the responsibility of each Proposer before submitting a Proposal to:

1. Carefully read and examine the RFP documents, including all appendices, reference documents, reports, drawings addenda, and other information make available by the Procurement Division.

2. Review, understand, and comply with all applicable federal, state, and local laws, regulations, codes, ordinances, permits, and requirements

that may affect cost, schedule, design, construction, operation, or performance of the project.

3. Review and evaluate the RFP documents; and all site-related investigations, reports, studies, surveys, geotechnical documents, drawings, and other data identified in or made available with the RFP documents, and determine their impact on (1) the cost, schedule, and performance of the works; (2) the proposed project design and achievement of the project; (3) the means, methods, techniques, sequences, and procedures of design and construction; and (4) Proposer's safety plans, precautions and programs.

4. Request from the Procurement Division, prior to submission of its Proposal, any additional information that the Proposer reasonably considers necessary for the preparation of its Proposal. Failure to request such information shall not relieve the Proposer of responsibility for submitting a complete and responsive Proposal.

5. Promptly notify the Procurement Division in written of any conflicts, errors, ambiguities, or discrepancies that Proposer identifies in the RFP documents.

6. Satisfy itself that the RFP documents are generally sufficient to convey the requirements, terms, conditions, risks, and obligations associated with the project prior to submitting its Proposal.

7. Review all Environmental Review documentation provided by the ASEM and consider such documentation in the development of its Proposal. The Proposer shall be responsible for complying with all applicable environmental review requirements and conditions associated with the Project.

8. ASEM has provided the ERR, and any related environmental review documentation available at the time of issuance of this RFP. If the environmental review process has not been completed before the Proposal Submission Deadline, the Proposers shall review and consider the provided ERR in preparing Proposals.

9. The Proposer acknowledges and agrees that the environmental review documents made available by the ASEM are based on the project scope and conceptual design developed to date. Following contract award, the Design-Builder shall be responsible, at no additional cost to the ASEM unless otherwise expressly provided in the Contract, for identifying any modifications to the Project scope, design, construction

methods, site impacts, or operational characteristics that may require supplemental environmental analysis, environmental reevaluation, updates to the Environmental Review Record, or additional environmental clearances.

10. The Design-Builder shall prepare, support, coordinate, and obtain all information, studies, analyses, technical documentation, and design revisions required to facilitate any environmental reevaluation, amendment, supplementation, or re-approval necessitated by the Design-Builder's final design, means and methods, value engineering proposals, construction sequencing, or other changes introduced after contract award. The Design-Builder shall not proceed with any activity requiring additional environmental approval until such approval has been obtained through the applicable process.

11. By submitting a Proposal, the Proposer represents that it has exercised reasonable diligence in evaluating the information provided and has considered the requirements of the environmental review process in the preparation of its Proposal price and schedule.

8.19 Proposal and Quoted Prices

The Procurement Division and Bid Board will not consider proposals that add to, remove from, alter, modify, or change specifications or conditions required in the RFP documents. Proposals containing ambiguous, incomplete, or undefined phrases, paragraphs, or comments, or that undermine the certainty of the proposal, will also not be considered.

All Proposers must quote fair and reasonable prices for the services, goods, or works included in this RFP process.

8.20 Code of Ethics

All Proposers must comply with the following:

A. CODE OF ETHICS FOR CONTRACTORS

All Proposers must comply with the provisions of Act 2 of January 4, 2018, as amended, known as the "Anticorruption Code for the New Puerto Rico". It is an essential requirement for contracting with the Government all entities committed to abiding by the provisions of the Code of Ethics established in the law.

In addition, any natural or legal person wishing to participate in a bidding process or the awarding of any contract with any government agency or instrumentality, public corporation, municipality, or with the Legislative or Judicial Branch, for the performance of services or the sale or delivery of goods, shall submit a sworn statement before a notary public, in which they shall report whether the natural or legal person or any president, vice president, director, executive director, or member of a board of officers or board of directors, or persons performing equivalent functions for the legal person, has been convicted or has pleaded guilty to any of the crimes listed in Act 8 of February 4, 2017, as amended, known as the "Administration and Transformation of Human Resources in the Government of Puerto Rico Act", or for any of the crimes contained in said Code.

Any person, whether natural or legal, who has been convicted of: violating Articles 4.2, 4.3, or 5.7 of Act 1 of January 4, 2012, as amended, known as the "Puerto Rico Government Ethics Office Organic Act"; violating any of the serious crimes against the exercise of public office or against public funds contained in Articles 250 through 266 of Act 146 of July 30, 2012, as amended, as amended, known as the "Puerto Rico Penal Code"; violating any of the crimes defined in the Code; or violating any other serious crime involving the misuse of public funds or property, including, but not limited to, the crimes mentioned in Section 6.8 of Act 8, supra, shall be disqualified from contracting or bidding with any executive agency of the Government of Puerto Rico for the applicable term. When no term is specified, the person shall be disqualified for ten (10) years from the date on which they complete serving their sentence.

Every contract shall include a termination clause if the person contracting with the executive agencies is convicted, in state or federal court, of any of the offenses that disqualify them from contracting under the preceding paragraph. The contracts certify that the person has not been convicted, in state or federal court, of any of the offenses. The duty to inform shall be ongoing throughout all stages of contracting and contract performance.

All Proposers are subject to the sanctions and penalties established in Article 3.7. — Sanctions and penalties of Act 2-2018, supra.

B. CANONS OF PROFESSIONAL ETHICS

Every person must observe the maxims and principles of excellence and honesty that govern their profession, in addition to the ethical standards or canons of the association or professional college to which they belong, and which regulate their trade or profession, both in relation to their competitors and to the Government of Puerto Rico.

In the case of individuals who do not belong to a professional association or college, or in the case of associations and colleges that do not have a Code of Ethics for their members, they must observe the general principles of ethical conduct that are considered reasonable in their profession or trade.

8.21 Investigation Collaboration

Every person, Proposer, or Contractor will cooperate with any investigation initiated by the state or federal government regarding business transactions, the awarding of contracts, or the granting of government incentives, in which they participated or from which they directly or indirectly benefited.

8.22 Reproduction or distribution

All information provided as part of this RFP process including, but not limited to, scopes of work, drawings, technical specifications, plans, reports, and photographs, is for the exclusive use of this RFP process. Any reproduction or distribution of the material for other purposes is not permitted.

9.0 PROPOSAL FORMAT

9.1 Instructions for the Proposer's Proposal Format

Each Proposer is responsible for the accuracy and completeness of its proposal. The proposal must demonstrate a clear understanding of the requirements of this Request for Sealed Proposals and present a precise description of the proposed services and work, and the offered price. The Proposer must provide as much detail as possible in its proposal, as well as clear and direct descriptions of their capabilities and the members of its team. The Proposer must submit its proposal in a written, legible, clear, complete, and accurate format.

The Proposal must be signed, and each page must be initiated by the Proposer's representative authorized registered in the RUL, as required.

On documents requiring initials and signatures, **the Proposer's authorized representative must handwrite all required initials and signature in blue ink pen (electronic, digital or scanned signatures will not be allowed)**, in the space provided. Any cross-out or revision made to the proposal documents must be initiated by the Proposer's authorized representative next to the change. The use of "correction tape", correction fluid, "liquid paper" or similar products is not permitted.

All fields in forms and any other relevant information must be completed by the Proposer or its authorized representative. In fields where the requested information is not applicable, the Proposer shall indicate this by writing "N/A" (not applicable) in the designated field.

The Proposer must submit its Proposal using the official forms provided by the Procurement Division and must comply with the terms, conditions, and specifications established in RFP documents.

The Proposer may include additional pages to clarify or provide further details about its Proposal; however, such pages may not modify, revise, or alter the Proposal.

Any document authorized by a notary public outside the jurisdiction of Puerto Rico must be authenticated and include an official certificate or apostille from the Secretary of State, the County Clerk, or the corresponding state government entity.

The Proposer must submit their proposal using the official forms provided by the Procurement Division and must comply with the terms, conditions, and specifications established in RFP documents.

The proposal must contain the physical and postal address of the Proposer's main business office in Puerto Rico, and the name and address of the Proposer's resident agent, as applicable.

9.2 Content of the Proposal

The proposer must submit their proposal in both Physically (hard copy/printed) and Electronically (digital) formats. The digital proposal must include a true and exact copy of the physically submitted proposal documents, one (1) redacted copy, and the Cost Breakdown in Excel format.

The proposal submitted by the proposer in hard copy/printed format must be submitted in a sealed envelope or package. It is optional to submit the Price Proposal and Cost Breakdown forms in a separate sealed envelope (within o inside) the Proposal's Sealed Envelope or Package. The proposal must include all documents, forms, and attachments.

9.2.1 Proposal's Sealed Envelope or Package

The Proposer must submit its Proposal in a sealed envelope or package containing the original document and copies (printed and PDF), properly identified with the following:

1. Number of this Request for Sealed Proposals;

2. Title of this Request for Sealed Proposals;

3. Proposer's name, address, and telephone number; and

4. Any other information specified in the RFP documents, as applicable

The Proposal's sealed envelope or package must contain a separate sealed envelope that contains the Price Proposal and Cost Breakdown. The Price Proposal and Cost Breakdown sealed envelope should be identified with the following:

1. Number of this Request for Sealed Proposals;

2. Title of this Request for Sealed Proposals;

3. Identified with "Price Proposal and Cost Breakdown"

4. Proposer's name, postal address and telephone number; and

9.2.2 Front Page

The Proposer shall submit as part of their proposal a front page that includes:

1. Number of the Request for Sealed Proposals;
2. Title of the Request for Sealed Proposals;
3. Date of issuance of the proposal;
4. Name of the Proposer, as registered in the Puerto Rico's Department of State and RUL;
5. Mailing address of the Proposer's main office;
6. Telephone number of the Proposer;
7. Email address of the Proposer; and
8. Name of the Proposer's authorized representative, as registered in the RUL.

9.2.3 Checklist

Proposal documents shall be organized, including the documents indicated on the Proposal Checklist (**Exhibit 2**), as applicable.

As part of the proposal documents, the Proposer must verify the presentation of the documents in accordance with the Proposal Checklist, as applicable, which must be completed and signed by the Proposer's authorized representative.

9.2.4 Table of Contents

The Proposer shall submit, as part of their proposal, a Table of Contents that clearly identifies the documents included, by section and page number, in a continuous manner. This includes the identification of the appendices.

9.2.5 Statement of Proposer

The Proposer will complete the form provided as **Exhibit 3** (Statement of Proposer) of this document, including the following documents, as applicable:

9.2.5.1 Organizational Chart of Proposer's Team Members

The Proposer shall submit an Organizational Chart through a simple graphic presentation that clearly and easily depicts the structure of the Team Member's organization, including:

1. Design-Build Project Manager
2. Safety Manager
3. Scheduler
4. Cost Estimator
5. Commissioning Authority / Agent
6. Design Lead
7. Civil Engineer, P.E.
8. Civil Engineer, P.E. – "Structural Engineer"

9. Environmental Engineer, P.E. or Registered Environmental Manager
10. Electrical Engineer, P.E.
11. Mechanical Engineer, P.E.
12. Technology / IT/ System Engineer, P.E.
13. Construction Manager or Superintendent
14. BIM Manager / BIM Coordinator
15. Quality Control Manager
16. Healthcare Facilities Subject Matter Expert
17. Designer's Staff
18. Builder's Staff
19. Subcontractors
20. Consultants

The chart must depict the levels of authority and relationship between the different roles, departments or positions, for the execution of the activities on the Design Build project.

9.2.5.2 Proposer's Organizational Documents

Every entity must submit a "Good Standing" certificate and/or Certificate of Compliance duly issued by the Puerto Rico's Department of State, as applicable.

In addition, if the Proposer is a partnership, it must submit the Partnership Agreement along with its proposal or if the Proposer is a Joint Venture, it must submit the Joint Venture Agreements along with its proposal. The Partnership Agreement and Joint Venture Agreement must contain, at minimum, the following:

- Parties to the agreement
- Purpose and scope of the joint venture
- Capital contributions and funding obligations

- Profit and loss allocation
- Governance and management structure
- Roles and responsibilities
- Intellectual property provisions
- Confidentiality obligations
- Dispute resolution procedures
- Exit strategy and buyout provisions
- Governing law and execution details

9.2.5.3 Designer's Organizational Documents

Every entity must submit a "Good Standing" certificate and/or Certificate of Compliance duly issued by the Puerto Rico's Department of State, as applicable.

Every legal entity that is a professional corporation of architecture, engineering or surveying must submit the credentials of all its shareholders as a licensed professional.

9.2.5.4 RUL's Eligibility Certificate

If the Proposer has eligible status in the RUL, a copy of the RUL's Eligibility Certificate issued by ASG must be submitted.

Any Proposer who, at the time of the Proposals Opening, is not active or eligible in the RUL will have a non-extendable period of five (5) business days, counted from the Proposals Opening, to comply with the requirements established by the ASG and become registered.

It will be the sole responsibility of the Proposer to update their information and submit the corresponding documentation within the established timeframe. Failure to do this will result in the disqualification of their proposal.

9.2.5.5 Single Provider Certificate

The Designer must submit a copy of the Single Provider Certificate of the RUP issued by ASG.

9.2.5.6 System Award Management (SAM)

The Proposer and Designer must submit evidence demonstrating that, as of the deadline for the proposal submission, it has an active and eligible status or has initiated registration in the System Award Management.

9.2.5.7 Designer's Qualifications

The Proposer must submit the Designer's Qualifications.

9.2.5.8 Professional License(s) and/or Certification(s)

In compliance with regulatory requirements and applicable provisions, the Proposer must submit copies of all current professional licenses and certifications of the Key Personnel and Staff of the Design Team or First-Tier Subcontractors, as applicable.

The purpose of submitting the professional license and/or certification is to evidence the Design Team's legal authority to practice and to demonstrate compliance with the standards and requirements established under applicable laws and regulations.

9.2.5.9 Financial Statements

The Proposer shall submit its Financial Report for the last 2 tax years, according to its circumstances (volume of business), as established in Section 1061.15 of the "Internal Revenue Code for a New Puerto Rico," or "Puerto Rico Internal Revenue Code of 2011," Act 1 of January 31, 2011, as amended. The Financial Report is required to include:

1. Current Assets: Cash, accounts in joint ventures, accounts receivable, notes receivable, accrued interest in deposits of documents and materials, prepaid expenses, net fixed assets, and other assets; and

2. Current Liabilities: Accounts payable, promissory notes, accrued interest in promissory notes, provisions for income taxes, advances received, payroll taxes, other liabilities and equity (share capital, authorized and outstanding shares, retained earnings).

9.2.5.10 Line of Credit and/or Letter of Cash Available

The Design-Builder shall demonstrate that it has liquid assets available for the Project in an amount of not less than sixteen million dollars ($16,000,000.00). To satisfy this requirement, the Proposal shall include an original letter issued by a duly authorized banking or financial institution confirming that the Design-Builder has either: (i) cash available in an amount not less than $16,000,000.00; or (ii) an available line of credit in an amount not less than $16,000,000.00 that may be used for the Project.

The letter from the banking or financial institution, issued on the institution's official letterhead, shall also contain the following:

1. Contact information (name, surname, telephone number, and email address) of the authorized representative of the banking or financial institution issuing the document;

2. Indicate, to the best of their knowledge, the service Proposer is free of encumbrance;

3. Be dated within 30 calendar days of the Proposal Opening of this RFP process;

4. Be duly signed by the authorized representative of the banking or financial institution issuing the document;

5. The amount must be expressed in figures (numbers) and words.

6. Confirmation that the funds or credit capacity are currently available and not subject to conditions that would prevent their use for the project.

9.2.7 Non-Conflict of Interest Certification

The Proposer shall use **Exhibit 4** of this document to submit the Non-Conflict of Interest Certification.

9.2.8 Non-Conflict of Interest Certification on Existing or Pending Contracts

The Proposer shall use **Exhibit 5** of this document to submit the Non-Conflict of Interest Certification on Existing or Pending Contracts.

9.2.9 Limited Denial of Participation (LDP) / Suspension or Debarment Status Affidavit

The Proposer shall use **Exhibit 6** of this document to submit the Limited Denial of Participation (LDP) / Suspension or Debarment Status Affidavit.

9.2.10 Certification Regarding Debarment, Suspension, Ineligibility, and Voluntary Exclusion

The Proposer shall use **Exhibit 7** of this document to submit the Certification Regarding Debarment, Suspension, Ineligibility, and Voluntary Exclusion.

9.2.11 Non-Collusive Affidavit

The Proposer shall use **Exhibit 8** of this document to submit the Non-Collusive Affidavit.

9.2.12 Sworn Statement (Act 2-2018, as amended, Anticorruption Code for the New Puerto Rico)

The Proposer shall use **Exhibit 9** of this document to submit the Sworn Statement (Act 2-2018, as amended, Anticorruption Code for the New Puerto Rico).

9.2.13 Anti-Lobbying Certification or Disclosure of Lobbying Activities

The Proposer shall use **Exhibit 10** of this document to submit the Anti-Lobbying Certification or **Exhibit 11** of this document to submit the Disclosure of Lobbying Activities, as applicable.

9.2.14 Authorization for Background and/or Other Information

The Proposer shall use **Exhibit 12** of this document to submit the Authorization for Background and/or Other Information.

9.2.15 Entities Prior Performance Certifications

The Proposer shall use **Exhibit 13** of this document to submit the Entities Prior Performance Certifications.

9.2.16 Certification Regarding Compliance of Act 173-1988

The Proposer shall use **Exhibit 14** of this document to submit the Certification Regarding Compliance of Act 173-1988.

9.2.17 Certification of Compliance with the Prevailing Federal Wage Rule Davis Bacon Act 40 USC 276A – 276A-71

The Proposer shall use **Exhibit 15** of this document to submit the Certification of Compliance with the Prevailing Federal Wage Rule Davis Bacon Act 40 USC 276A – 276A-71.

9.2.18 Technical Proposal

The Proposer shall submit a Technical Proposal (**Exhibit 16**) demonstrating his knowledge and capability in this type of Design Build project. The Technical Proposal shall describe the Proposer approach to complete the project within the required schedule and quality standard. Also, shall provide their approach to meet the milestones requested on this RFP and maintain the time for substantial completion. The Proposer must include a Design-Build Schedule (Project Schedule) and Resource Loaded Schedule, including the monthly cash flow projections. The Project Schedule shall be computer produced using the Critical Path Method ("CPM") format. The schedule shall contain sufficient activities to clearly show the sequence and interdependencies of the Work. Activity durations shall be expressed in whole day. Work that is to be performed by Subcontractor shall be clearly defined.

The Technical Proposal shall be organized in a manner that allows the Evaluation Committee or Bid Board to evaluate the Proposer's qualifications, experience, project team, and proposed delivery approach in accordance with Section 10.0 of this RFP. The Technical Proposal shall include, at a minimum, the following information.

9.2.18.1 Design-Builder Experience and Past Performance

The Proposer shall provide detailed information demonstrating the Design-Builder's experience and past performance of projects on similar size, scope, complexity, delivery method, and operational risk. At a minimum, the Proposer shall identify and describe projects that demonstrate compliance with the minimum experience.

As a minimum the Proposer shall meet the following requirements:

1. At least one (1) completed hospital construction project within the last twenty years;

2. At least one (1) completed Design-Build healthcare or hospital project by the designer or builder (can be the

hospital construction project required in the first item herein or an additional project);

3. Experience involving critical healthcare environments, including emergency departments, operating rooms, intensive care units, trauma facilities, or comparable critical care environments;

4. Experience delivering projects within active healthcare campuses, mission-critical facilities, or operational environments requiring strict coordination of access, safety, logistics, utilities, and continuity of operations;

5. Experience with vertical construction projects.

6. Demonstrated safety, quality, schedule, regulatory compliance, stakeholder coordination, and risk-management performance.

7. Experience with federally funded projects.

For each submitted project, the Proposer shall include, at a minimum: project name and location; owner/client; contract value; delivery method; project size and relevant scope; completion date; role of the Proposer and major team members; description of hospital or mission-critical components; schedule and budget performance; change order history, if applicable; safety record; quality performance; and owner reference contact information. Refer to Minimum Healthcare / Hospital Experience Form (**Annex III**).

9.2.18.2 Design Firm Experience and Past Performance

The Proposer shall provide information demonstrating the Design Firm's relevant experience and past performance on healthcare or hospital facility planning, design, permitting, regulatory coordination, construction document development, and design support during construction. The Technical Proposal shall specifically address experience with:

1. Acute care hospitals and trauma, emergency, surgical, intensive care, or comparable critical healthcare environments;

2. Hospital facility planning, programming, and clinical workflow coordination;

3. Resilient and mission-critical building systems, including structural, electrical, mechanical, plumbing, medical gas, IT, communications, life safety, and utility infrastructure;

4. Design-Build delivery, fast-track design packages, multidisciplinary coordination, constructability reviews, and support of phased construction;

5. Knowledge of American College of Surgeons (ACS) regulations and requirements.

6. Compliance with applicable healthcare codes, standards, licensing requirements, accessibility requirements, environmental requirements, including Federal Aviation Administration (FAA) requirements, and Puerto Rico professional practice requirements.

9.2.18.3 Organizational Structure and Design-Build Team Integration

The proposed Design-Build organizational structure and explanation of how the Design-Builder, Designer, Builder, subcontractors, specialty consultants, suppliers, vendors, and Key Personnel will be integrated to deliver the Project. The Proposal shall include an organizational chart consistent with Section 9.2.5.1 and shall describe lines of authority, decision-making responsibilities, communication protocols, issue-escalation procedures, design-construction coordination, and the method for managing scope, schedule, quality, safety, cost, risk, commissioning, activation, and operational readiness.

The Proposer shall identify any prior collaboration among major Design-Build team members and describe how such prior collaboration supports efficient project delivery, risk reduction, and accountability.

9.2.18.4 Key Personnel Minimum Qualifications and Commitments

The Technical Proposal shall identify and commit the Key Personnel proposed for the Project. At a minimum, the Proposer shall identify the following Key Personnel:

1. Design-Build Project Manager

2. Safety Manager
3. Scheduler
4. Cost Estimator
5. Commissioning Authority / Agent
6. Design Lead
7. Civil Engineer, P.E.
8. Civil Engineer, P.E. – "Structural Engineer"
9. Environmental Engineer, P.E. or Registered Environmental Manager
10. Electrical Engineer, P.E.
11. Mechanical Engineer, P.E.
12. Technology / IT/ System Engineer, P.E.
13. Construction Manager or Superintendent
14. BIM Manager / BIM Coordinator
15. Quality Control Manager
16. Healthcare Facilities Subject Matter Expert

The Proposer must certify these personnel as committed to the project.

For each Key Personnel position, the Proposer shall provide the following information in **Annex I** (Key Personnel Qualifications and Commitments Form):

- Qualification statement demonstrating relevant education;
- Professional registration or certification, as applicable;
- Years of experience;

- Hospital or mission-critical project experience, as applicable;
- Design-Build experience, as applicable;
- Role on comparable projects, as applicable;
- Availability for the Project; and
- Proposed percentage of time to be committed to the Project.

At a minimum, Key Personnel shall demonstrate qualifications appropriate to their proposed role and shall possess the required professional licenses, registrations, or certifications under applicable federal and Puerto Rico law.

The Healthcare Facilities Subject Matter Expert shall demonstrate experience in planning, design, construction, commissioning, activation, or operation of acute care hospitals or critical healthcare facilities.

The Design Lead and discipline professionals responsible for professional design services shall be duly licensed or otherwise authorized to practice in accordance with applicable Puerto Rico professional practice requirements.

The Proposal shall include resumes, qualifications, licenses, certifications, relevant healthcare and Design-Build experience, role descriptions, proposed level of effort, and availability for each Key Personnel.

Procurement Division, Evaluation Committee or Bid Board shall evaluate all Key Personnel qualifications, but will only score the following during the Technical Evaluation phase of this RFP process:

KEY PERSONNEL'S MINIMUM QUALIFICATIONS	
HUMAN RESOURCE	**MINIMUM QUALIFICATIONS**
Design-Build Project Manager (DBPM)	**Academic Preparation**
	Bachelor's Degree of Engineering Science or Bachelor's Degree in Engineering; or Bachelor's Degree in Architecture or Bachelor's Degree in Landscape Architecture or Master's Degree in Architecture; or Master's Degree in Construction Management or Master's Degree in Project Management
	Professional License
	Professional Engineer; or Professional Architect
	Membership
	Active CIAPR or CAAPR
	Years of experience
	7+ years in vertical construction projects; 7+ years in hospital projects; and 5+ years in Design-Build projects

Safety Manager	**Academic Preparation**
	Bachelor's Degree in Occupational Safety and Health; or Bachelor's Degree of Engineering Science or Bachelor's Degree in Engineering; or Bachelor's Degree in Architecture or Bachelor's Degree in Landscape Architecture or Master's Degree in Architecture; or Bachelor's Degree in Environmental Science or Environmental Management; or Bachelor's Degree in Business Administration with a concentration in Safety; or Associate's Degree in Occupational Safety (accepted for medium-sized projects; a bachelor's degree is recommended for hospitals)
	Professional Certification
	OSHA 30 Construction; and ICRA (Infection Control Risk Assessment); or HAB (Healthcare Construction Safety)
	Years of experience
	5+ years as a construction safety officer; 2+ years of specific experience in construction projects for hospitals, laboratories, or critical facilities; and 2+ years of specific experience in implementing ICRA and ILSM (Interim Life Safety Measures) for health projects

Scheduler	**Academic Preparation**
	Bachelor's Degree of Engineering Science or Bachelor's Degree in Engineering; or Bachelor's Degree in Architecture or Bachelor's Degree in Landscape Architecture or Master's Degree in Architecture
	Professional Certification
	Primavera Certification; or Microsoft Project Advanced Certification
	Years of experience
	5+ years programming vertical construction projects; and 5+ years in Design-Build projects
Cost Estimator	**Academic Preparation**
	Bachelor's Degree of Engineering Science or Bachelor's Degree in Engineering; or Bachelor's Degree in Architecture or Bachelor's Degree in Landscape Architecture or Master's Degree in Architecture; or Bachelor's Degree in Finance or Bachelor's degree in Economics or Bachelor's degree in Business Administration with a concentration in Accounting or Finance
	Professional Certification
	CEP – Certified Estimating Professional; or CCP – Certified Cost Professional; or CPE – Certified Professional Estimator; or BIM Cost Integration Credentials.

	Years of experience
	5+ years in vertical construction estimation; and 3+ years in healthcare projects, hospitals, or laboratories
Commissioning Authority	**Academic Preparation**
	Bachelor's Degree of Engineering Science or Bachelor's Degree in Engineering
	Professional Certification
	CxA – Certified Commissioning Authority; or BCxP – Building Commissioning Professional (ASHRAE); or NABx – NEBB Certified Professional in Building Systems Commissioning
	Years of experience
	5+ years (MEP systems); and 3+ year (healthcare facilities)
Designer Lead (Architect Licensed or Engineer Professional)	**Academic Preparation**
	Bachelor's Degree of Engineering Science or Bachelor's Degree in Engineering; or Bachelor's Degree in Architecture or Bachelor's Degree in Landscape Architecture or Master's Degree in Architecture
	Professional License
	Professional Engineer; or Professional Architect
	Membership
	Active CIAPR or CAAPR
	Years of experience
	7+ years in architectural or engineering design, after obtaining a license as a professional engineer

	5+ years as Design Lead on Design-Build projects, after obtaining a license as a professional engineer 3+ years of specific experience in hospitals or health facilities, including interdisciplinary coordination (MEP, structural, clinical, commissioning), after obtaining a license as a professional engineer
Civil Engineer, P.E.	**Academic Preparation** Bachelor's Degree of Science in Civil Engineering or Bachelor' Degree in Civil Engineering **Professional License** Professional Engineer **Membership** Active CIAPR **Years of experience** 5+ years of professional experience after obtaining the license as a professional engineer
Civil Engineer, P.E. ("Structural Engineer")	**Academic Preparation** Master's Degree of Science in Civil Engineering or Master's Degree in Civil Engineering, specializing in the area of structures **Professional License** Professional Engineer **Membership** Active CIAPR **Years of experience** 10+ years of professional experience after obtaining a license as a professional engineer
Environmental Engineer, P.E. or Registered Environmental Manager (REM)	**Academic Preparation** Bachelor's Degree of Science in Environmental Engineering; or Bachelor's degree in Environmental

		Engineering; or Bachelor's Degree of Science in Environmental Science
		Professional License
		Professional Engineer, only for engineer
		Membership
		Active CIAPR, only for Environmental Engineer P.E.
		Years of experience
		5+ years in environmental engineering matters, only for engineer, after obtaining a licenses as a professional engineer; 3+ years in EPA, PRDNER, OGPe, and SHPO compliance; 2+ years in environmental assessment, permitting, mitigation, waste management, or emissions control
	Healthcare Facilities Subject Matter Expert (SME)	**Academic Preparation**
		Bachelor's degree in architecture, engineering, healthcare administration, public health, clinical healthcare, construction management, facilities management, or another relevant discipline; or Master's degree in architecture, engineering, healthcare administration, public health, clinical healthcare, construction management, facilities management, or another relevant discipline
		Years of experience
		10+ years of pr progressively responsible experience in healthcare facility planning, design, construction, operations, commissioning, activation, regulatory compliance, or facilities management, including at least five (5) years involving acute care hospitals, trauma centers, emergency departments, surgical departments,

	critical care units, or comparable complex healthcare facilities.
Electrical Engineer, P.E.	**Academic Preparation**
	Bachelor's Degree of Science in Electrical Engineering or Bachelor's Degree in Electrical Engineering
	Professional License
	Professional Engineer
	Membership
	Active CIAPR
	Years of experience
	10+ years of professional experience after obtaining a license as a professional engineer
Mechanical Engineer, P.E.	**Academic Preparation**
	Bachelor's Degree of Science in Mechanical Engineering or Bachelor's Degree in Mechanical Engineering
	Professional License
	Professional Engineer
	Membership
	Active CIAPR
	Years of experience
	10+ years of professional experience after obtaining a license as a professional engineer
Technology / IT / System Engineer	**Academic Preparation**
	Bachelor's Degree of Science in Electrical Engineering with a specialization in systems or telecommunications; or Bachelor's Degree of Science in Electrical Engineering with a specialization in systems or telecommunications; or Bachelor's Degree of Science in Information Systems Engineering; or Bachelor's Degree of Science in Computer Engineering; or

		Bachelor's Degree of Science in Telecommunications Engineering; or Bachelor's Degree of Science in Information Technology (IT); or Bachelor's Degree of Science in Computer Science
		Professional License
		Professional Engineer
		Membership
		Active CIAPR, only for engineer
		Years of experience
		10+ years of professional experience after obtaining a license as a professional engineer
	Construction Manager / Superintendent	**Academic Preparation**
		Bachelor's Degree of Science in Civil Engineering or Bachelor's Degree in civil engineering; or Bachelor's Degree of Science in Electrical Engineering or Bachelor's Degree in electrical engineering; or Bachelor's Degree of Science in Mechanical Engineering or Bachelor's Degree in Mechanical Engineering; or Bachelor's Degree of Science in Industrial Engineering or Bachelor's Degree in Industrial Engineering; or Bachelor's Degree in Architecture or Bachelor's Degree in Landscape Architecture or Master's Degree in Architecture
		Years of experience
		10+ years as Construction Manager / Superintendent in vertical construction projects
	BIM Manager / BIM Coordinator	**Academic Preparation**
		Bachelor's Degree of Science in Civil Engineering or Bachelor's Degree of Science in Civil Engineering; or

	Bachelor's Degree in Civil Engineering or Bachelor's Degree in Mechanical Engineering; or Bachelor's Degree in Electrical Engineering or Bachelor's Degree in Industrial Engineering; or Bachelor's Degree in Architecture or Bachelor's Degree in Architecture or Bachelor's Degree in Landscape Architecture or Master's Degree in Architecture; or Master's Degree in Construction Management or Master's Degree in Project Management
	Professional Certification
	BIM Management Professional Certificate (AGC or equivalent); or CM-BIM (AGC); or Navisworks Manage Certified User/Professional
	Years of experience
	5+ years working with BIM in construction projects
Quality Control Manager	**Academic Preparation**
	Bachelor's Degree of Science in Civil Engineering or Bachelor's Degree of Science in Mechanical Engineering or Bachelor's Degree of Science in Electrical Engineering or Bachelor's Degree of Science in Industrial Engineering; or Bachelor's Degree in Civil Engineering or Bachelor's Degree in Mechanical Engineering or Bachelor's Degree in Electrical Engineering or Bachelor's Degree in Industrial Engineering or Bachelor's Degree in Architecture; or

	Bachelor's Degree in Architecture or Bachelor's Degree in Landscape Architecture or Master's Degree in Architecture; or Master of Business Administration or Master of Science in Quality Management or Master of Science in Quality Management; or Master's Degree in Construction Management or Master's Degree in Project Management
	Years of experience
	10+ years of professional experience as Quality Control Manager in construction project

Table 1: Key Personnel's Minimum Qualifications

The Proposer shall not replace Key Personnel identified in the Proposal after submission or award without prior written approval from ASEM. Any proposed replacement shall possess qualifications equal to or greater than those of the originally proposed individual and shall be subject to review and acceptance by ASEM.

9.2.18.5 Key Personnel, Major Subcontractors, and Letters of Commitment

The Technical Proposal shall identify all Key Personnel and Major Subcontractors proposed for the successful performance of the Project (refer to section 9.2.18.4 for the list of Key Personnel).

The Proposer shall provide a signed, unequivocal Letter of Commitment for each Key Personnel and each Major Subcontractor identified in the Proposal (**Refer to Annex I and Annex II**). Each Letter of Commitment shall state that the individual or entity: (i) has agreed to be named in the Proposal; (ii) has reviewed the role, scope, anticipated level of effort, and duration of services applicable to the Project; (iii) will be available to perform the services for the duration of the Project, or for the portion of the Project for which the individual or entity is proposed; and (iv) acknowledges that such commitment is a material representation upon which Bid Board may rely in evaluating the Proposal and awarding the Contract.

For Major Subcontractors, the Proposal shall include a description of the scope to be performed, relevant qualifications, past performance, applicable professional licenses or certifications, and

relevant experience on projects of similar size, scope, complexity, and delivery method. Refer to **Annex II** (Major Subcontractor Experience, Past Performance and Commitment Form.

Proposals submitted without signed Letters of Commitment for Key Personnel and Major Subcontractors identified in the Proposal may be deemed non-responsive, rejected, or adversely evaluated, at ASEM's discretion.

If the Design-Builder proposes to change or replace any major subcontractor identified in its Proposal or otherwise approved for the Project, the Design-Builder shall submit the proposed replacement subcontractor to ASEM for review and prior written approval before such subcontractor initiates any work on the Project. The submission shall include information sufficient for ASEM to verify the replacement subcontractor's qualifications, licensing, certifications, eligibility, capacity, and compliance with all applicable federal, state, local, CDBG-MIT, HUD, PRDOH, and ASEM requirements. No replacement major subcontractor may perform work on the Project unless and until ASEM has issued its written approval.

9.2.18.6 Minimum Technical Qualification Crosswalk

The Proposer shall include a concise crosswalk or matrix identifying where the Proposal demonstrates compliance with the minimum healthcare experience, Key Personnel, bonding, technical capacity, past performance, and technical approach requirements established in Section 10.0. The crosswalk shall reference the applicable Proposal section, page number, and supporting documentation.

9.2.18.7 Work Approach / Technical Proposal

The Proposer shall provide a detailed Work Approach demonstrating a comprehensive understanding of the Project, the Design-Build delivery requirements, and the active Medial Center Campus environment. The Work Approach shall describe the Proposer's integrated strategy for delivering the Project from design through close-out and shall address, at a minimum, the following:

1. **Project delivery strategy:** Integrated approach for design, permitting, procurement, construction, commissioning, activation, turnover and closeout;

2. **Schedule strategy**: Critical path management, resource loading, long-lead procurement, early work packages, recovery planning, and milestone achievement and Substantial Completion;

3. **Campus logistics and site utilization:** Construction access, traffic control, emergency access, pedestrian and vehicular circulation, staging, laydown, temporary facilities, contractor parking, delivery routing protection, and coordination with adjacent facilities;

4. **Operational continuity:** Measures to minimize impacts to clinical, administrative, public, parking, support, emergency response, and existing medical service operations within and around the Project area;

5. **Safety and infection control:** Worker safety, public protection, pedestrian and vehicular safety, site security, emergency access, infection control coordination, and continuity of healthcare operations throughout design and construction;

6. **Environmental protection:** Controls for dust, noise, vibration, air quality, erosion and sedimentation, stormwater management, waste management, and protection of adjacent facilities and operations;

7. **Procurement and materials management:** Delivery, storage, protection, and installation of materials and equipment in accordance with the proposed schedule, including coordination of deliveries to avoid disruption to adjacent medical and support facility operations;

8. **Quality assurance and Quality Control**: Design reviews, coordination, code review, constructability reviews, inspections, testing, commissioning coordination, document control, corrective action procedures, operational continuity planning, and verification of compliance with the RFP and Contract Documents. Including description of the BIM Execution Plan, model uses, Level of Development by phase, clash detection, issue tracking, healthcare-system coordination, record-model requirements, and integration

of BIM information with commissioning, operations, and maintenance;

9. **Risk management:** Methodology for identifying, assessing, mitigating, monitoring, and controlling project risks throughout design and construction;

10. **Commissioning activation:** Approach for commissioning, operational readiness, facility activation, staff training, turnover, and closeout; and

11. **Regulatory compliance:** Compliance with all applicable federal, Puerto Rico, Puerto Rico's Department of Health, ACS, FAA, CDBG-MIT, HUD, PRDOH, ASEM, healthcare, environmental, safety, accessibility, professional licensing, permitting, and Design-Build requirements.

9.2.19 Price Proposal Form

The Proposer shall submit a Price Proposal Form on a stipulated price (lump sum) basis as set forth in the Price Proposal Form **Exhibit 17**.

The Design-Builder will be required to provide a Cost Breakdown (**Exhibit 18**) for each of the line items included.

Every offer submitted will include a detailed Cost Breakdown of the offered price, encompassing the price per unit of the good, service or work, transportation costs, delivery, assembly, warranty, training, maintenance or services, replacements, among others.

In addition to the Base Bid, each Proposer shall provide separate pricing for the alternate bid for *Water Storage Reservoir*. Alternate bid pricing shall be submitted in the format required by the Price Proposal Form and shall be clearly identified as additive, as applicable, so that Evaluation Committee or Bid Board may evaluate and exercise any alternate bid in accordance with the RFP Documents.

9.2.20 Bid Bond and related documents

For this Request for Sealed Proposal process, a Bid Bond of five percent (5%) of the total price of the proposal (Base Bid + Allowances+ Alternate) submitted by the Proposer is required. The Procurement Division will not accept a Bid Bond for an amount less than that required in this section or in the name of any entity other than the Puerto Rico Medical Services Administration (ASEM). Failure

to comply with this requirement will result in the disqualification or rejection of the proposal.

The Bid Bond shall be submitted through a surety company authorized by the Insurance Commissioner of Puerto Rico and through the document provided in **Exhibit 19**. The Bid Bond shall be accompanied by:

1. Acknowledgement of Surety (**Exhibit 20**);
2. Certificate of Appointment of Attorney-in-Fact, as copy;
3. Attorney-in-Fact Licensed, as copy;
4. Certification of the Bonding Entity, as copy; and
5. Contact information of the Attorney-in-Fact.

The Bid Bond must be submitted in original form. If it includes the Attorney-in-Fact's electronic signature, it must be accompanied by a certification from the Bonding Entity confirming that the signature belongs to an authorized representative. With such certification, the electronic signature will be deemed valid and binding, with the same legal effect as a handwritten signature. The Proposer assumes full responsibility if the Bonding Entity indicates that the signature is not that of an authorized representative or if the certification is not provided, which will result in the disqualification or rejection of the proposal.

If the Request for Sealed Proposals process is canceled by the Procurement Manager, all Bid Bonds will be returned within three (3) business days following the date of notification of the cancellation. If the contract resulting from this Request for Sealed Proposals process is executed, as applicable, the Procurement Division will return all Bid Bonds submitted, including the Bid Bond of the Proposer to whom the contract was awarded.

9.2.21 Bond Capacity Letter

The Proposer shall submit a Bond Capacity Letter stating in dollars and cents, Proposer's available bonding capacity for the individual project (single) and in the aggregate. The bonding capacity letter shall meet the following requirements:

1. Must be issued by an entity authorized by the Insurance Commissioner of Puerto Rico;

2. Must be dated and duly signed by authorized representative of the issuing entity; and

3. Be issued within thirty (30) calendar days of the proposal submission deadline submission.

The Proposer must demonstrate sufficient bonding capacity, both for the individual project (single) and in aggregate, as of the proposal. submission date.

For this procurement, the Proposer's single project Bond Capacity must be equal to or greater than cost proposal amount (Base Bid + Allowances+ Alternate). If the Proposer's single project Bond Capacity is less than cost proposal amount (Base Bid + Allowances+ Alternate), the Proposal will be disqualified or rejected.

9.2.22 Preference for Section 3 Business Concern or M/W/VBE Business

If the Proposer seeking Section 3 preference, they should provide one of the following: (1) evidence of business ownership (e.g. Articles of Incorporation, By Laws, proof of 51% company ownership, Partnership Agreement or Joint Venture Agreement); (2) evidence of employees of the business (e.g. roster of permanent full time employees Section 3 Resident Self Certification Form for each employee who qualifies as newly hired Section Resident employee); or (3) duly signed letter evidencing subcontracting at least 25% of the dollar amount.

If the Proposer is seeking M/W/VBE preference, they should provide a copy of their M/W/VBE certification to evidence their status.

10.0 PROPOSAL EVALUATION

10.1 Evaluation

The Procurement Division, Bid Board or Evaluation Committee shall conduct a comprehensive, fair, and impartial evaluation of the proposals in accordance with the specifications, terms and conditions established in the RFP Documents to identify the proposal that offers the best value.

The Project consists of the design and construction of a new acute care hospital facility within the Medical Center Campus. Although the Project is not located within an occupied healthcare building, it will be constructed within an active medical campus that includes hospitals, healthcare facilities, emergency services, ambulance routes, pedestrian circulation

areas, public access roads, parking facilities, and critical utility infrastructure that must remain operational throughout the duration of the Project.

Accordingly, particular emphasis shall be placed on the Proposer's demonstrated ability to successfully execute a complex healthcare project while minimizing impacts to emergency services, healthcare operations, public circulation, campus accessibility, utility systems, and overall site operations.

The evaluation process shall be conducted in the following seven (7) steps, as follows:

1. Mandatory Requirements;
2. Technical Evaluation;
3. Technical Qualification Threshold;
4. Oral Presentation;
5. Final Technical Evaluation Score;
6. Price Proposal Evaluation; and
7. Best Value Determination and Award.

The Procurement Division or Bid Board reserves the right to request clarifications regarding any Proposal. Any clarification shall be limited to information already submitted and shall not be used to materially modify or supplement the Proposal.

Price Proposals and Cost Breakdown sealed envelope shall remain sealed and shall not be opened until completion of the Technical Evaluation process.

10.1.1 Mandatory Requirements

The Evaluation Committee or Bid Board shall review each Proposal to determine compliance with all Mandatory Requirements established in this RFP (section 10.1.1.1 through 10.1.1.9). Mandatory Requirements shall be evaluated on a Pass/Fail basis.

If the Proposer is constituted as a Joint Venture or Partnership, the evaluation will be in accordance with what is established in the Joint Venture Agreement or Partnership.

Any Proposal failing to satisfy one (1) or more Mandatory Requirements of this RFP will result in the disqualification of the Proposer or rejection of the proposal. However, the Bid Board reserves its right to request additional information to address minor irregularities and minor instances of non-compliance.

If the Proposal meets all Mandatory Requirements of this RFP, the Proposal will "Pass" the Mandatory Requirements evaluation and the Proposer becomes a Proposer (Technically Qualified). The Mandatory Requirements are as follows:

10.1.1.1 Proposal Submission

The proposal must be submitted before the deadline established in the RFP documents.

10.1.1.2 Legal Entity

The Proposer's entity is registered and/or incorporated and listed as active in the Puerto Rico Department of State's, as applicable.

10.1.1.3 Active or Eligible Status

1. The Proposer has eligible status in the RUL.
2. The Designer has eligible status in the RUP.
3. The Proposer and Designer has active and eligible status or has initiated registration in SAM.

10.1.1.4 Pre-proposal Meeting

During the pre-proposal meeting, the Proposer's authorized representative did not engage in any inappropriate or disruptive conduct.

10.1.1.5 Validity Period of the Proposal

The proposal states a validity term of one hundred eighty (180) calendar days from the deadline for submitting the proposal.

10.1.1.6 Blackout Period

The Proposer did not violate the Blackout Period as set forth in Section 8.17 of this document.

10.1.1.7 Proposal Documents

1. The Proposer submitted only one (1) offer or proposal.
2. The proposal contains the following duly completed, signed, initiated, and completed documents, as applicable:

   a. Non-Conflict of Interest Certification (**Exhibit 4**)

   b. Non-Conflict of Interest Certification on Existing or Pending Contracts (**Exhibit 5**)

   c. Limited Denial of Participation (LDP) / Suspension or Debarment Status Affidavit (**Exhibit 6**)

   d. Certification Regarding Debarment, Suspension, Ineligibility, and Voluntary Exclusion (**Exhibit 7**)

   e. Non-Collusive Affidavit (**Exhibit 8**)

   f. Sworn Statement (Act 2-2018, Anti-Corruption Code for New Puerto Rico) (**Exhibit 9**)

   g. Anti-Lobbying Certification or Disclosure of Lobbying Activities (**Exhibit 10**)

   h. Price Proposal Form (**Exhibit 17**)

   i. Cost Breakdown (**Exhibit 18**)

   j. Bid Bond (**Exhibit 19**) and Acknowledgement of Surety (**Exhibit 20**)

      - Bid Bond is five percent (5%) of the total price of the proposal (Base Bid + Allowances+ Alternate).
      - If the Bid Bond includes the Attorney-in-Fact's electronic signature, it is accompanied by a certification from the Bonding Entity confirming that the signature belongs to an authorized representative.
      - As part of the evaluation process the Procurement Division, Bid Board or Evaluation Committee verify the amount of the Bid Bond

with Surety Company or other related matters of the Bid Bond.

k. Credit and/or Liquidity

- The Proposer must demonstrate and have a line of credit or economic liquidity of $16,000,000.00 or more.

l. Bond Capacity Letter, according to section 9.2.21 of this document.

- Bond Capacity per project (single) is equal or greater than the amount of the price of their proposal (Base Bid + Allowances + Alternate).

10.1.1.8 Minimum Healthcare/Hospital Experience

The Proposer shall demonstrate successful experience in the delivery of healthcare facilities of similar complexity and scope.

At a minimum, the Proposer shall demonstrate:

1. At least one (1) completed hospital construction project within the last twenty years;

2. At least one (1) completed Design-Build healthcare or hospital project by the designer or builder (can be the hospital construction project required in the first item herein or an additional project);

3. Experience involving critical healthcare environments, including emergency departments, operating rooms, intensive care units, trauma facilities, or comparable critical care environments;

4. Experience delivering projects within active healthcare campuses, mission-critical facilities, or operational environments requiring strict coordination of access, safety, logistics, utilities, and continuity of operations;

5. Experience with vertical construction projects;

6. Demonstrated safety, quality, schedule, regulatory compliance, stakeholder coordination, and risk-management performance; and

7. Experience with federally funded projects.

Refer to Minimum Healthcare / Hospital Experience Form (**Annex III**).

In the event that the Proposer is constituted as a Joint Venture or Partnership, the evaluation of Past Performance and Experience will be carried out considering the expertise, role and responsibilities assumed by each of the entities that comprise it, in accordance with the considerations established in the corresponding Joint Venture Agreement or Partnership Agreement.

10.1.1.9 Key Personnel Requirements

The Proposer shall identify and commit the following Key Personnel to the Project:

1. Design-Build Project Manager
2. Safety Manager
3. Scheduler
4. Cost Estimator
5. Commissioning Authority / Agent
6. Design Lead
7. Civil Engineer, P.E.
8. Civil Engineer, P.E. – "Structural Engineer"
9. Environmental Engineer, P.E. or Registered Environmental Manager
10. Electrical Engineer, P.E.
11. Mechanical Engineer, P.E.

12. Technology / IT/ System Engineer, P.E.

13. Construction Manager or Superintendent

14. BIM Manager / BIM Coordinator

15. Quality Control Manager

16. Healthcare Facilities Subject Matter Expert

Refer to **Exhibit 3** (Statement of Proposer)**.**

The <u>Healthcare Facilities Subject Matter Expert</u> shall possess demonstrated experience in the planning, design, construction, commissioning, activation, or operation of acute care hospitals and critical healthcare facilities.

All Key Personnel shall satisfy the minimum qualifications established in this RFP.

As part of the Mandatory Requirements Review, Evaluation Committee or Bid Board may review whether the Proposer submitted signed Letters of Commitment for all Key Personnel and Major Subcontractors identified in the Proposal (Refer to **Annex I** and **Annex II**). Failure to submit complete and signed Letters of Commitment may result in a finding that the Proposal is non-responsive or does not satisfy the Mandatory Requirements of this RFP.

The availability, qualifications, experience, licenses, certifications, and proposed level of effort of Key Personnel and Major Subcontractors are material elements of the Proposal and may be evaluated under the Technical Evaluation criteria, including Past Performance and Experience, Technical Capacity, Organizational Experience and Key Personnel, and Work Approach / Technical Proposal

If Evaluation Committee or Bid Board determines that the Proposer knowingly or negligently misrepresented the availability, commitment, qualifications, experience, role, or proposed level of effort of any Key Personnel or Major Subcontractor, Bid Board may disqualify the Proposer, reject the Proposal, adversely evaluate the Technical Proposal, refuse to award the Contract, or pursue any other remedy

available under the RFP Documents, Contract Documents, or applicable law.

10.1.2 Technical Evaluation

The Technical Evaluation shall assess the qualifications, experience, organizational capability, financial strength, and proposed delivery approach of the Proposer.

The maximum Technical Evaluation Score shall be one hundred (100) points.

Evaluation Criteria	Maximum Points
General Contractor Experience and Past Performance	25
Design Firm Experience and Past Performance	20
Organizational Experience and Key Personnel	20
Work Approach / Technical Proposal	25
Financial Capacity	10
Total Technical Evaluation Score	**100**

Table 2: Scoring Table – Technical Evaluation

NOTE: If the Proposer is constituted as a Joint Venture or Partnership, the evaluation will be in accordance with what is established in the Joint Venture Agreement or Partnership Agreement regarding the experience. If the Proposer is constituted as a Joint Venture or Partnership, the evaluation of Financial Capacity will be in accordance with what is established in the Joint Venture Agreement or Partnership Agreement regarding the contribution of capital.

All results are rounded to the nearest hundredth, meaning up to two (2) digits after the decimal point (hundredth).

10.1.2.1 General Contractor Experience and Past Performance

The Evaluation Committee or Bid Board shall evaluate the qualifications and past performance of the General Contractor with emphasis on healthcare and mission-critical facilities.

Evaluation factors may include:

- Experience in hospital construction;

- Design-Build experience;
- Experience with projects of similar size, scope and complexity;
- Experience involving critical healthcare infrastructure;
- Safety performance;
- Quality performance;
- Schedule performance;
- Regulatory compliance;
- Risk management capability; and
- Stakeholder coordination.

Consideration may be given to firms demonstrating successful execution of projects within active medical campuses requiring extensive traffic management, logistics coordination, and operational interface management.

10.1.2.2 Design Firm Experience and Past Performance

The Evaluation Committee or Bid Board shall evaluate the qualifications and experience of the Design Firm.

Evaluation factors may include:

- Hospital facility planning and programming;
- Hospital design experience;
- Trauma and emergency care facilities;
- Surgical and intensive care environments;
- Critical infrastructure and resilient systems;
- Design-Build delivery experience;
- Multidisciplinary coordination;

- Regulatory compliance;
- Past performance on projects of similar complexity; and
- Experience with resilient and mission-critical healthcare facilities

10.1.2.3. Organizational Experience and Key Personnel

The Evaluation Committee or Bid Board shall evaluate the organizational resources and project team proposed for the Project.

Evaluation factors may include:

- Organizational structure;
- Availability of dedicated resources;
- Qualifications and healthcare experience of Key Personnel;
- Qualifications of the Healthcare Facilities SME;
- Previous collaboration between Design-Build team members;
- Quality management capabilities;
- Safety management capabilities;
- BIM and digital delivery capabilities;
- Commissioning experience; and
- Facility activation and operational readiness experience.

Particular emphasis shall be placed on the ability of the proposed team to execute an accelerated healthcare Design-Build project.

10.1.2.4 Work Approach / Technical Proposal

The Technical Proposal shall demonstrate a comprehensive understanding of the Project and provide a detailed strategy for successful execution.

The Evaluation Committee or Bid Board shall consider the following elements.

10.1.2.4.1 Project Delivery Strategy

The Design-Builder shall describe how design and construction activities will be integrated to facilitate efficient project delivery, decision-making, schedule management, and coordination among disciplines.

10.1.2.4.2 Campus Logistics and Traffic Management

The Design-Builder shall describe the strategy for managing construction activities within the active Centro Médico Campus environment while maintaining safe and efficient operations.

This approach shall address:

- Ambulance circulation routes;
- Emergency vehicle access;
- Pedestrian circulation and safety;
- Public traffic management;
- Construction access routes;
- Site logistics;
- Utility protection;
- Coordination with adjacent facilities; and
- Temporary traffic control measures.

10.1.2.4.3 Accelerated Delivery Strategy

The Design-Builder shall provide a detailed strategy to achieve completion of the full hospital structural frame and operational readiness of the Emergency Department level within twenty-one (21) months of Notice to Proceed.

The Evaluation Committee or Bid Board may consider:

- Design acceleration methodologies;
- Fast-track delivery techniques;
- Early procurement packages;
- Long-lead equipment strategies;
- Construction sequencing;
- Critical path management;
- Resource loading methodologies; and
- Recovery planning measures.

10.1.2.4.4 Safety, Site Security, Infection Control, and Environmental Protection

The Design-Builder shall describe the safety-management approach for design and construction, including worker safety, public protection, pedestrian and vehicular safety, emergency access, high-risk work, site security, incident response, and coordination with ASEM and campus operations. Also, shall describe infection-control measures appropriate to an active medical campus and controls for dust, noise, vibration, air quality, erosion and sedimentation, stormwater, hazardous materials, construction and demolition waste, and protection of patients, staff, visitors, adjacent facilities, and ongoing healthcare operations.

10.1.2.4.5 Procurement, Materials, Equipment, and Delivery Management

The Design-Builder shall describe the approach for procurement, delivery, receipt, inspection, storage, security, protection, installation, start-up, and turnover of materials and equipment in accordance with the Project Schedule. Address long-lead and healthcare-critical equipment, Owner-furnished/Contractor-installed items, medical-equipment interfaces, delivery coordination, temporary storage, submittals, vendor participation, testing, warranties, spare parts, and measures to avoid disruption to adjacent medical and support operations.

10.1.2.4.6 Quality Assurance and Quality Control

The Design-Builder shall describe the proposed quality assurance and quality control program for design and construction, including design reviews, constructability reviews, multidisciplinary coordination, code reviews, inspections, testing, submittals, RFIs, nonconformance and corrective-action processes, records, document control, and verification of compliance with the RFP and Contract Documents. Describe the BIM Execution Plan, model uses, Level of Development by phase, clash detection, issue tracking, healthcare-system coordination, record-model requirements, and integration of BIM information with commissioning, operations, and maintenance.

10.1.2.4.7 Risk Management and Operational Continuity

The Design-Builder shall describe the methodology for identifying, assessing, assigning, mitigating, monitoring, and controlling risks throughout design and construction. Include schedule, cost, permitting, design coordination, procurement, safety, environmental, utility, campus-interface, clinical-operations, commissioning, and activation risks. Provide measures to minimize impacts to emergency response, existing medical services, utilities, traffic, parking, wayfinding, deliveries, and adjacent clinical, administrative, public, and support operations, including contingency and recovery procedures.

10.1.2.4.8 Commissioning, Activation, Training, Turnover, and Closeout

The Design-Builder shall describe the integrated approach for commissioning and operational readiness, including commissioning planning; pre-functional and functional testing; integrated systems testing; deficiency tracking and retesting; regulatory inspections and approvals; facility activation; staff training; O&M manuals; warranties; as-built and record drawings; record BIM model; asset and equipment information; final permits; occupancy and life-safety documentation; punch list; phased turnover; and final closeout. Address HVAC, electrical, emergency power, plumbing, fire protection, medical gas, BAS, IT/low-voltage, security, nurse-call, and other hospital-critical systems identified in Attachment 1.

10.1.2.4.9 Regulatory Compliance

The Design-Builder shall describe the approach for compliance with all applicable federal, Puerto Rico, CDBG-MIT, HUD, PRDOH, ASEM, healthcare, environmental, labor, safety, accessibility, professional licensing, permitting, and Design-Build requirements.

10.1.2.5 Financial Capacity

The Evaluation Committee or Bid Board shall evaluate the Proposer's financial strength and ability to successfully deliver the Project.

Evaluation factors may include:

- Liquidity;
- Solvency;
- Working capital;
- Available credit facilities;
- Audited financial statements;
- Financial stability;
- Capacity to support procurement activities; an

- Capacity to support construction operations throughout the Project duration.

10.1.3 Technical Qualification Threshold

Upon completion of the Technical Evaluation, each Proposal shall receive a Technical Evaluation Score.

To be considered Technically Qualified, a Proposer must obtain a minimum score of seventy (70) points out of the one hundred (100) points available under the Technical Evaluation. A minimum score of 70 must be obtained in order to proceed or otherwise qualify for further consideration; provided, however, that the Bid Board reserves the right to amend this threshold as necessary to ensure meaningful competition.

Any Proposal receiving less than seventy (70) points, or less than the amended threshold determined by the Bid Board, shall be deemed technically unacceptable and shall not advance to the Oral Presentation phase.

Only Technically Qualified Proposers shall be invited to participate in the Oral Presentation.

10.1.4 Oral Presentation

The Procurement Division shall invite only those Proposers that have achieved the Minimum Technical Qualification Threshold to participate in an Oral Presentation.

The purpose of the Oral Presentation is to validate the Evaluation Committee's or Bid Board's understanding of the Proposal, assess the integration of the Design-Build Team, evaluate the qualifications of Key Personnel, and confirm the Proposer's ability to successfully execute the Project.

The Oral Presentation shall not be used to modify, revise, or materially alter the Proposal.

The maximum Oral Presentation Evaluation Score shall be twenty-five (25) points.

Failure of required personnel to participate may adversely affect the Oral Presentation score.

The Oral Presentation shall not be used to modify, revise, supplement, or materially alter the Proposal. No statement, clarification, response, presentation material, or discussion made during the Oral Presentation shall change the terms, conditions, commitments, technical approach, price, schedule, or other material contents of the submitted Proposal, unless expressly permitted in writing by Procurement Division, Evaluation Committee or Bid Board through the applicable procurement process.

Procurement Division may establish the date, time, format, agenda, duration, presentation requirements, attendees required, and any limitations applicable to the Oral Presentation. At a minimum, the proposed Project Executive, Design-Build Project Manager, Design Lead, Construction Manager, Healthcare Facilities SME, Quality Control Manger, Safety Manager, Commissioning Authority, and other Key Personnel identified by ASEM shall attend and actively participate, unless otherwise authorized by ASEM in writing.

The Evaluation Committee or Bid Board will consider the Oral Presentation as part of its evaluation to the extent permitted by the evaluation criteria established in this RFP. Participation in an Oral Presentation does not guarantee award, selection for negotiations, or any other procurement outcome.

10.1.5 Final Technical Evaluation Score

Upon completion of the Oral Presentation, the Evaluation Committee or Bid Board shall calculate the Final Technical Evaluation Score.

The Final Technical Evaluation Score shall consist of:

- Technical Evaluation Score (Maximum 100 Points); plus
- Oral Presentation Score (Maximum 25 Points).

The maximum Final Technical Evaluation Score shall be one hundred twenty-five (125) points.

10.1.6 Price Proposal Evaluation

Only Proposers that: (1) Successfully satisfy all Mandatory Requirements; (2) Achieve the Minimum Technical Qualification

Threshold; and (3) Participating in the Oral Presentation; shall be eligible for Price Proposal Evaluation.

The maximum Price Proposal Score shall be twenty-five (25) points.

The Price Proposal shall be evaluated using the following formula:

Price Score = (Lowest Responsive Price Proposal ÷ Proposer's Price Proposal) × 25

The lowest responsive Price Proposal shall receive the maximum score of twenty-five (25) points.

All results are rounded to the nearest hundredth, meaning up to two (2) digits after the decimal point (hundredth).

10.1.7 Best Value Determination and Award

The Final Evaluation Score shall consist of:

- Final Technical Evaluation Score (Maximum 125 Points); plus
- Price Proposal Score (Maximum 25 Points).
- Preference Section 3 or M/W/VBE (Maximum 5 Points)

Evaluation Component	Maximum Points
Final Technical Evaluation Score	125
Price Proposal Score	25
Preference Section 3 or M/W/VBE	5
Maximum Final Evaluation Score	**155**

Table 3: Final Evaluation Score

10.1.7.1 Preference Section 3 or M/W/VBE

If the Proposer submits verifiable evidence of Section 3 or M/W/VBE participation that can be validated during the evaluation period, the Procurement Division, Bid Board, or Evaluation Committee will award a 5 points preference.

If the Proposer does not submit such evidence, or if it cannot be validated during the evaluation period, 0 points will be awarded.

Section 3 Business Concern or M/W/VBE preference points apply only after the Proposer meets all Mandatory Requirements and the minimum Technical Qualification Threshold established in this RFP.

Only responsive, responsible, and technically qualified Proposers may receive preference points. Proposers that fail to meet the minimum Technical Qualification Threshold will not advance, regardless of any claimed preference.

When valid, verifiable documentation confirms eligibility, Evaluation Committee or Bid Board will add the applicable preference points after the Technical Qualification Threshold determination and before the final Best Value determination.

The Contract shall be awarded to the Proposer whose Proposal achieves the highest Final Evaluation Score and represents the Best Value to the ASEM.

In determining Best Value, the Evaluation Committee or Bid Board shall consider the Proposer's technical qualifications, healthcare/hospital experience, Design-Build capabilities, organizational strength, project delivery strategy, financial capacity, oral presentation performance, and proposed cost.

The Bid Board reserves the right to award the Contract to a Proposer other than the lowest-priced Proposer when the Evaluation Committee or Bid Board determines that a higher-ranked Proposal provides superior value, lower execution risk, enhanced healthcare/hospital expertise, superior project delivery capability, or a greater probability of successful Project completion.

10.2 Permissible Deviations

The Bid Board may accept deviations in the proposals received, provided that the deviations do not affect the purpose of the process or substantially alter the quality, capacity or essential characteristics of the goods, work or service, and that the price offered is reasonable according to market conditions. Deviations that involve, after the proposal has been submitted, modifications to the essential terms and conditions, or irremediable defects that compromise the validity of the proposal, such as, but not limited to, the late submission of a payment and performance bond, will not be considered minor deviations.

10.3 Negotiations and Best and Final Offer

The Evaluation Committee may recommend, or the Bid Board may determine, that discussions and negotiations are necessary with one (1) or more Proposer(s) (Technically Qualified). Negotiations are exchanges between the Bid Board and Proposers undertaken with the intent of allowing Proposers to revise their Price Proposals or other proposal elements, as applicable and as permitted by the RFP.

The primary objective of discussions and negotiations is to maximize Bid Board's ability to obtain the best possible offers based on the requirements, terms, conditions, evaluation criteria, and objectives set forth in the RFP. Procurement Division or Bid Board may elect to request the submission of Best and Final Offers from one (1) or more of the highest Qualified Proposer(s).

The Bid Board reserves the right to request a Best and Final Offer (BAFO) regarding the terms, conditions, quality, solution, prices, or combination of factors, to obtain the best value for the ASEM and Government of Puerto Rico.

The Bid Board may, at its discretion, require Proposers (Technically Qualified) to submit a Best and Final Offer (BAFO) as part of the evaluation process for this RFP. The BAFO will constitute the Proposers' (Technically Qualified) final opportunity to review, adjust, and submit their final proposal, including price, terms, conditions, methodology, resources, and any other element the Bid Board deems pertinent.

The BAFO request will be issued in writing and will specify the scope of permitted revisions, the required format, evaluation criteria, and the submission deadline. Only Proposers (Technically Qualified) may submit a BAFO. BAFO proposals must comply with all the requirements of the RFP and with any additional instructions provided by the Procurement or Bid Board at their request.

The Evaluation Committee or Bid Board will evaluate the BAFOs according to the established criteria. The Bid Board reserves the right to accept, reject, or negotiate any submitted BAFO.

Once submitted, the BAFO will be final and cannot be modified, corrected, or withdrawn by the Proposer (Technically Qualified).

10.4 Ties

If, after completion of the evaluation process, two (2) or more Qualified Proposers receive the same final ranking, Evaluation Committee or Bid Board may use a tie-breaking procedure to determine which Proposal provides the best value and is most advantageous to ASEM. In resolving a tie, Evaluation Committee or Bid Board may consider, in the following order: (i) the results of any Best and Final Offer requested by Procurement Division or Bid Board, including price, proposed value enhancements, schedule, risk allocation, and other clarifications or improvements; and (ii) the Proposal that, in Bid Board's judgment, best satisfies the Project objectives, operational needs, resilience requirements, continuity-of-operations goals, and overall best interests of ASEM.

In such cases, the Procurement Division or Bid Board will notify the tied Proposers to submit a new RFP, within a period of no more than ten (10) business days from the date of notice.

The new proposals must maintain prices equal or lower than the original proposal. The new proposals will be opened on the date and time scheduled as established in the notice.

If the tie persists after this second round, the same procedure will be repeated until a tie is broken and the contract can be awarded in accordance with the criteria established in Regulation No. 9734.

Procurement Division or Bid Board reserves the right to request additional clarifications, conduct further discussions, request a Best and Final Offer from tied Proposers, or apply any other tie-breaking method permitted under applicable law and the RFP Documents, provided that such method is applied fairly and consistently. The final determination shall be made by the Bid Board based on the written record and the recommendation of the Evaluation Committee, as applicable.

10.5 Mathematician's Error

In case of a mathematical discrepancy between the total cost indicated on the Price Proposal Form (**Exhibit 17**) and the actual sum of the prices per item contained in the Cost Breakdown (**Exhibit 18**), the cost per item will prevail if the difference between the two amounts is not greater than zero point five percent (0.5%). The application of the above rule will only be made if, regardless of which of the two amounts is used, the offer remains the best value.

10.6 Award

The Bid Board will examine all proposals submitted before making any decision regarding the award. The Bid Board is not obligated to accept the recommendation of the Evaluation Committee or Procurement Division. If it does not accept the recommendation, the Bid Board will conduct its own evaluation and award the corresponding score, per the evaluation criteria and points established in the RFP documents.

Price will not necessarily be the most important factor in the award, and the award may be made without a negotiation or BAFO process.

If there is no agreement among the members of the Bid Board, the case must be submitted to the judgment and decision of the ASEM's Executive Director, through an explanatory report on the particularities of the case.

The Bid Board will award this RFP process to the Proposer who meets the requirements and whose proposal represents the best value for the Government of Puerto Rico. The award will be made in favor of the Proposer whose Proposal represents the best value to ASEM, considering the results of the Final Evaluation Score including, where applicable, the BAFO submitted, any applicable preference, and in compliance with the Mandatory Requirements established in the RFP documents. The award must be approved by the ASEM's Executive Director or their authorized representative.

The RFP process and award are directly contingent on availability of funds received from HUD. If the PRDOH or ASEM does not receive the proper fund allocation from HUD, this RFP process will be cancelled and terminated without any responsibility whatsoever for ASEM, the PRDOH, the Government of Puerto Rico and HUD for pre-agreement and non-contractual damages.

Awards will only be issued to entity which are cleared and not ineligible for the RFP due to suspension, debarment, or HUD imposed limited denial of participation.

10.7 Rejection of Proposals

The Bid Board may reject all proposals in any of the following situations:

1. If none of the proposals submitted meet any of the minimum requirements, specifications, terms, or conditions established in the RFP documents;

2. If the prices obtained from all the proposals submitted are unreasonable or the terms are onerous; and
3. If none of the proposals represents the best value for the Government of Puerto Rico.

10.8 Award Notification

The award notification for the RFP process will be duly sent via email to all Proposers who submitted a proposal. The notification will be sent simultaneously to all parties using the same method.

The award of this RFP process may be canceled at any time before the execution of a contract, without any responsibility whatsoever for ASEM, the PRDOH, the Government of Puerto Rico and HUD.

The notification does not constitute, nor will it in any way constitute a formal agreement between the parties, nor will it grant any rights to the Awarded Proposer, even if an Award Notice has been issued. It will be necessary to sign the contract between authorized representative Awarded Proposer and ASEM's Executive Director or their authorized representative.

11.0 ADMINISTRATIVE AND JUDICIAL REVIEW

11.1 Administrative Review

The Administrative Review procedure must be conducted pursuant to the provisions of Act 73-2019. Filing a petition for Administrative Review will not result in a stay of the award process. The award process will only be held by a court order or resolution from the competent administrative body.

11.2 Notice of Administrative Review

The petitioner must immediately send a copy of the request by certified mail with a return receipt requested or by email to the Bid Board. The petitioner must also simultaneously notify the Proposer who was awarded the contract and all Proposer who have been notified of the final decision.

Strict compliance with this requirement is required. The petitioner must certify to the Bid Review Board in the Administrative Review document that the petitioner has complied with this requirement.

Any Notice of Administrative Review must comply with the provisions of Article 8.3 of Regulation No. 9734

11.3 Notice of the Determination

Once the Review Board issues its decision on a matter under consideration, in writing by certified mail or email, the Review Board must notify the requesting Proposer or legal counsel thereof, if any; the Bid Board and all Proposer.

The determination of the Review Board must provide the basis and reasons supporting its determination. The determination must also notify the adversely affected party of the availability and deadline for filing an application for judicial review with the Court of Appeals.

11.4 Judicial Review

The party adversely affected by a determination of the Review Board may file a request for judicial review with the Court of Appeals in accordance with the provisions of the section on Judicial Review of Act 73-2019. A mere filing of a request for Judicial Review under this Section will not stay the award of the disputed public procurement.

12.0 CONTRACT

Prior to awarding a Contract, the ASEM must obtain Contractor and First Tier Sub-Contractor clearance. To obtain clearance, the ASEM will search https://www.sam.gov/SAM/ to verify whether the Contractor and First Tier Sub-Contractor are debarred or not.

The contract resulting from this RFP shall incorporate all applicable federal contract provisions required by 2 CFR Part 200, Appendix II, HUD requirements, and PRDOH CDBG-MIT requirements.

12.1 Bonds

All required bonds will be issued by an entity that is also on the provided list, https://www.fiscal.treasury.gov/surety-bonds/list-certified-companies.html#t. Likewise, the entity issuing the bond will be duly authorized by the Office of the Insurance Commissioner of Puerto Rico.

12.1.1 Performance Bond

The Awarded Proposer in this RFP must submit a Performance Bond to the Procurement Division no later than ten (10) business days after notification of the award. For this RFP, a Performance Bond equal to 100% of the awarded amount is required.

The Procurement Division will not accept a Performance Bond for an amount less than that specified herein or in the name of any entity other than the Puerto Rico Medical Services Administration.

12.1.2 Payment Bond

The Awarded Proposer in this RFP must submit a Payment Bond to the Procurement Division no later than ten (10) business days after notification of the award. For this RFP, a Payment Bond equal to 100% of the awarded amount is required.

The Procurement Division will not accept a Payment Bond for an amount less than that specified herein or in the name of any entity other than the Puerto Rico Medical Services Administration.

12.1.3 Wage Payment Bond

The Awarded Proposer in this RFP must submit a Payment Bond to the Procurement Division no later than ten (10) business days after notification of the award. For this RFP, a Payment Bond equal to twenty percent (20%) of the contract value, guaranteeing payment of wages to the laborers and employees, as required under Puerto Rico Law 111-1961. This bond is in addition to the Payment Bond and must meet all applicable statutory and regulatory requirements.

12.2 Insurance Requirements

The Proposer agrees and acknowledges that ASEM will require the awarded Proposer to provide the policies and insurance coverage as detailed in **Attachment 5** (Insurance Requirements and Bonding Specifications).

All endorsements or policies must be issued by an entity duly authorized by the Office of the Insurance Commissioner of Puerto Rico.

The Contractor must within ten (10) calendar days from contract execution, provide ASEM with the insurances, policies, and coverage required.

12.3 Construction Taxes and Patent Construction Fees

Pursuant to Article 7.206(a)(1) of Law 107 of 2020, any business or industry conducted or operated by and for any agency, subdivision, or instrumentality of the Federal Government, the State Government, or their municipalities is exempt from the payment of the licenses imposed under the provisions of this Code.

Likewise, pursuant to Article 2.110(f)(7)(ii), the exemption from the construction tax does not apply to construction work carried out by a natural or legal person acting on behalf of, representing, or through a contract or subcontract with a public agency, public corporation, or instrumentality of the State, Municipal, or Federal Government.

12.4 Model Contract

A Model Contract for Design-Build Services is included as **Attachment 6**. Please be aware that this Model Contract is a draft and may be subject to modifications before contract execution, at ASEM's discretion, by virtue of law or regulations, or any other event that may affect the dispositions therein contained.

12.4.1 Contract Term and Conditions

12.4.1.1 HUD General Provisions and other Federal Statues, Regulations, and PRDOH Requirements of Healthcare Strengthening Set-Aside

The contract resulting from this Request for Sealed Proposals process involves federal funds, for which HUD is the federal oversight agency. By submitting its proposal, the Proposer agrees to comply with all HUD requirements and general provisions. Refer to **Attachment 7**

12.4.1.2 Uniform General Conditions for Public Works

The Uniform General Conditions for Public Works will be part of the contract. Refer to **Attachment 8**

12.4.1.3 Additional Provisions

1. Throughout the duration of contract, Contractor must comply with Federal Non-Discrimination Policy and Drug-Free Workplace Policy.
2. If applicable the Fuel Oil and Gas (F.O.G.) shall be no more than 25% of the equipment charges.
3. If applicable the Fringe Benefits shall be no more than 30% of the payroll.

12.4.1.4 Supplementary Conditions

Refer to **Attachment 9**

12.4.1 First Tier Subcontractor

All First-Tier Subcontractors must be registered in the General Services Administration's RUL or RUP, as applicable, and have eligible and active status in the SAM.

It is the Contractor's responsibility to present to ASEM the corresponding evidence of registration, within a term of no less than ten (10) calendar days from the date on which the subcontracting is finalized.

12.4.2 Invoicing

1. ASEM will fully comply with the provisions, terms, and conditions established in the Uniform General Conditions of Public Works, Supplementary Conditions, and Additional Provisions related to the payment process.

2. ASEM will process payment for contracted and rendered services, as well as for work performed, in accordance with the respective applicable laws and regulations. The invoice must:

    a. contain, among other things, the name of the contracted entity;

    b. contract number;

    c. disaster designation number;

    d. CDBG-MIT grant number;

    e. information of the contracted entity, including postal address, telephone number, and email address;

    f. Billing period;

    g. invoice number;

    h. invoice issue date;

    i. amount due;

j. include a certification indicating that the services were rendered or work was performed but has not yet been paid;

k. certification of voidability;

l. certification of the accuracy of the invoice content;

m. Breakdown for Payment;

n. Certified payrolls (using the designated form);

o. Supporting documentation for any invoiced materials or equipment;

p. Photographs identifying the work performed;

q. Updated Project Schedule;

r. DBRA compliance certification;

s. Certification of affirmative steps regarding Section 3 or M/W/VBE; and

t. Certification of no debt issued by the corresponding government entities (only last invoice)

u. Other documents required by ASEM.

3. ASEM will withhold 5% of the total amount of each partial invoice, as submitted, for construction works. ASEM may withhold up to ten percent (10%) of the payment due to the Contractor for services rendered, as provided in Section 1062.03 of the 2011 Puerto Rico Internal Revenue Code, as amended, in accordance with the regulations approved by the Secretary of the Treasury, unless otherwise evidenced by the presentation of the corresponding Withholding Release Certificate (total or partial) issued by the Department of the Treasury. It is understood that this withholding will apply to the amount exceeding the first five hundred dollars ($500.00) paid during the calendar year.

4. Pursuant to Law No. 48-2013, if applicable, ASEM will withhold at source from each payment for professional services contracts (aggregate contracting) provided by the Contractor, a special

contribution equivalent to one and a half percent (1.5%) of the total amount of said contract, which will be allocated according to this Law. The calculation of aggregate contracting includes all agencies, instrumentalities of the Government of Puerto Rico, public corporations, as well as the Legislative Branch, the Office of the Comptroller, the Office of the Ombudsman, and the Judicial Branch, or any other entity created by state or federal law, whose funds originate, in whole or in part, from the General Fund. To claim this exemption, the Contractor must submit, along with the signed contract, a Sworn Statement to that effect, using Form SC 1350.

5. All invoices will be processed for payment only after review and approval by the designated ASEM representative. ASEM reserves the right to request additional information before proceeding with payment. The Fiscal Resources Office also reserves the right to review the accuracy of invoices and conduct any audits it deems necessary.

6. All invoices must include the following certification, indicating the absence of any interest on the part of the executive agency's officials and employees in the profits or benefits derived from the contract in question.

   "Under penalty of absolute nullity, I certify that no ASEM public servant is a party to or has any interest in the profits or benefits derived from the contract covered by this invoice, and if any such party or interest is involved, a prior waiver has been granted. The sole consideration for supplying the goods or services covered by the contract has been the payment agreed upon with the authorized representative of (name of the entity). The amount on this invoice is fair and correct. The construction work has been completed, the products have been delivered, and the services have been rendered, and no payment has been received for them."

7. All invoices must be submitted in original, including two (2) copies, to the Office of Engineering and Environmental Care or to the ASEM representative authorized for this purpose.

8. Prior to the approval of the Schedule of Value and Breakdown for Payment, the Contractor must submit to ASEM a formal request for its intention to invoice for materials on-site. This request must include a detailed narrative describing the

mitigation measures to avoid adverse impacts on other project activities, the safety and security measures applicable to the storage and handling of the materials, and the Contractor's acknowledgment and acceptance of any tests, inspections, or analyses that ASEM may require prior to installation or use. The Contractor must certify that the materials will be used exclusively for the project, that they are covered by the corresponding insurance, and that it accepts the obligation to reimburse the funds if installation is not completed. The Contractor must also detail the daily material inspection process and provide any other information or certification that ASEM may request.

Once the complete request is received, ASEM will issue its determination within a period not exceeding fifteen (15) calendar days. The determination issued will be final and not subject to reconsideration by ASEM.

12.4.4 Liquidated Damages

Time is of the essence in the performance of the Work. The Design-Builder acknowledges that failure to achieve Substantial Completion, Final Completion, or any Contract Milestone established in the Contract Documents within the required time may cause ASEM, PRDOH, the Government of Puerto Rico, HUD, patients, healthcare providers, emergency services, and the public to incur substantial damages, including, but not limited to, administrative costs, extended oversight and inspection costs, delayed availability of critical healthcare services, disruption to campus operations, extended project management costs, and other impacts that are difficult or impracticable to determine with precision at the time of contract execution.

Accordingly, if the Design-Builder fails to achieve Substantial Completion, Final Completion, or any Contract Milestone by the applicable date established in the Contract Documents, as such date may be adjusted only by an approved Change Order or written time extension issued in accordance with the Contract Documents, the Design-Builder shall be liable to ASEM for liquidated damages in the amounts set forth below. The parties agree that these amounts represent a reasonable estimate of damages likely to be incurred as a result of delay and are not intended as a penalty.

The following liquidated damages shall apply for each calendar day of delay beyond the applicable milestone date:

1. Failure to achieve Substantial Completion of Phase I: $25,000.00 per calendar day until Substantial Completion of Phase I is achieved.

2. Failure to achieve Substantial Completion of Phase II: $15,000.00 per calendar day until Substantial Completion of Phase II is achieved.

Liquidated damages may be assessed separately for each missed milestone; however, ASEM shall not impose duplicative liquidated damages for the same period of delay for the same portion of the Work unless the delay affects separate and independently required milestones. If delay to an interim milestone also delays Substantial Completion or Final Completion, ASEM may assess liquidated damages for the milestone that best reflects the impact of the delay, or as otherwise provided in the Contract Documents.

ASEM may deduct liquidated damages from any amounts due or to become due to the Design-Builder, including progress payments, retainage, final payment, or any other compensation payable under the Contract. Assessment or deduction of liquidated damages shall not constitute a waiver of ASEM's right to pursue any other remedy available under the Contract Documents or applicable law for separate breaches, defective work, noncompliance, fraud, misrepresentation, abandonment, default, or other damages not compensated by the liquidated damages.

The Design-Builder shall not be liable for liquidated damages to the extent the delay is caused by an excusable delay for which the Design-Builder is entitled to a time extension under the Contract Documents, provided that the Design-Builder gives timely notice, demonstrates the impact on the critical path, and obtains written approval of the time extension in accordance with the Contract Documents. No oral statement, field discussion, meeting note, schedule update, pay application, or informal communication shall modify a milestone date or waive liquidated damages unless expressly approved in writing by ASEM through a duly executed Change Order or other authorized written contract modification.

In addition to the provisions of Article 9.5 of Regulation No. 7998, Uniform General Conditions for Public Works, if the Contractor fails to

comply with federal statutes and regulations, ASEM may take one or more of the following actions:

1. Temporarily withhold cash payments pending correction of the deficiency by the Contractor.

2. Disallow all or part of the cost of the activity or action not in compliance.

3. Initiate suspension or debarment proceedings as authorized under 2 C.F.R. part 180.

4. Withhold further Federal awards for the project or program.

5. Take other remedies that may be legally available.

12.5 Termination of Contract

1. Failure to comply with the provisions of the RFP documents, as well as any breach of the terms and conditions of the awarded contract, will constitute sufficient cause for its termination without prior notice. Furthermore, the Executive Director of ASEM reserves the right to cancel any contract under this Request for Sealed Proposals at any time, when there is just cause and it is in the best interest of the public and/or the Government of Puerto Rico.

2. The Secretary of the Governor's Office of Puerto Rico will have the authority to terminate the awarded contract at any time, as provided in Administrative Bulletin OE-2021-003.

3. No head of a government agency or instrumentality of the Government, public corporation, municipality, or of the Legislative or Judicial Branch, shall award any bidding process or grant any contract to any natural or legal person who has been convicted or pleaded guilty in the state or federal forum, in any other jurisdiction of the United States of America or in any other country, of those crimes constituting fraud, embezzlement or illegal appropriation of public funds provided in Act 2-2018, *supra*, as amended. This prohibition on awarding contracts or conducting bidding processes extends to legal entities whose presidents, vice presidents, directors, executive directors, or members of their Board of Officers or Board of Directors, or any person performing equivalent functions, have been convicted or pleaded guilty in state or federal court, in any other jurisdiction of the United States of America, or in any other country, of the crimes constituting

fraud, embezzlement, or misappropriation of public funds, as listed in the aforementioned law.

The prohibition on contracting, subcontracting, or awarding contracts or conducting bidding processes contained in Act 2-2018, *supra*, shall have a duration of twenty (20) years from the date of the corresponding conviction in felony cases, and a duration of eight (8) years in misdemeanor cases.

A conviction or finding of guilt for any of the offenses listed in Act 2-2018, *supra*, shall entail, in addition to any other penalties, the automatic termination of all contracts in effect as of that date between the convicted or found guilty person and any agencies or instrumentalities of the State Government, public corporations, municipalities, the Legislative Branch, or the Judicial Branch. In addition to the termination of the contract, the Government shall have the right to demand the return of any payments made in connection with the contract or contracts directly affected by the commission of the offense.

12.6 Refusal to sign contract

An Awarded Proposer's refusal to sign a contract duly supported by a Notice or Award Resolution may result in sanctions, including exclusion from the RUL. In turn, the ASEM will be authorized to initiate the Performance Bond execution process. Submitting a Proposal implies informed acceptance of all the terms and conditions that will be established in a prior contract.

The obligations, duties, and bidding requirements under duly disclosed mandatory federal and state clauses, and those that may arise from the competent authorities, shall not under any circumstances be grounds for refusing to enter into a contract to provide the goods, works, and services described therein.

12.7 Contract Review by the Financial Oversight and Management Board for Puerto Rico

The contract resulting from this RFP is subject to review by the Puerto Rico Financial Oversight and Management Board (FOMB) in accordance with FOMB's contract review policy.

KEY PERSONNEL QUALIFICATIONS AND COMMITMENT FORM	SUBMIT ONE FORM PER KEY PERSONNEL

INSTRUCTIONS TO PROPOSERS

Complete one (1) form for each proposed Key Personnel member. All fields are required unless marked optional. Forms must be submitted as part of the Proposal. Incomplete or unsigned forms may result in disqualification. Information provided is subject to verification.

1. PERSONAL INFORMATION

Full Name (Last, First, Middle Initial)

Proposed Role / Position Title

Direct Phone Number

Firm / Organization Name

Email Address

Proposed Level of Effort

2. EDUCATION & QUALIFICATIONS

Provide a concise qualification statement demonstrating relevant education.

Degree / Diploma	Field of Study	Year	Institution

3. PROFESSIONAL REGISTRATION & CERTIFICATION

List all active professional licenses, registrations, and certifications relevant to the proposed role. Attach copies of current license certificates as required.

License / Certification Type	Issuing Authority / State	License No.	Issue Date	Expiration Date

4. YEARS OF EXPERIENCE

Total Years of Professional Experience _____ years	**Years in Current Firm / Organization** _____ years
Years of Healthcare / Hospital Project Experience _____ years	**Years of Design-Build Project Experience** _____ years

5. HOSPITAL / MISSION-CRITICAL PROJECT EXPERIENCE

List up to five (5) representative hospital or mission-critical projects completed within the last ten (10) years. Include only projects in which this individual had a direct, substantive role. Owner references may be contacted. As applicable to the individual

Project Name & Location	Owner / Client	Completion Year	Project Value (Approx.)	Individual's Role & Responsibilities

6. DESIGN-BUILD EXPERIENCE

List up to five (5) Design-Build projects in which this individual held a key role. Highlight any projects involving healthcare, mission-critical, or similarly complex facilities. As applicable to the individual

Project Name & Location	Owner / Client	Completion Year	Project Value (Approx.)	Design-Build Role & Scope

7. OTHER RELEVANT EXPERIENCE

List up to three (3) Design-Build projects in which this individual held a key role. Highlight any projects involving similarly complex facilities.

Project Name & Location	Owner / Client	Completion Year	Project Value (Approx.)	Design-Build Role & Scope

8. ROLE ON COMPARABLE PROJECTS

Describe the specific leadership or functional roles this individual has held on projects comparable in type, scale, and complexity to this Project. Focus on decision-making authority, team oversight, and client interface responsibilities. As applicable to the individual

Narrative Description (attach additional pages if needed):

9. AVAILABILITY & TIME COMMITMENT

Confirm this individual's availability for the Project and identify any known commitments or conflicts. Proposers must ensure that key personnel are available for the duration stated below.

Availability for This Project	**Proposed Percentage of Time Committed**
Available Start Date:	**Design Phase:** _____ %
Full-Time on Project? (circle one): Yes / No	**Construction Phase:** _____ %
Current Other Project Commitments:	**Commissioning / Closeout Phase:** _____ %
	Note: Personnel substitutions after award are subject to Owner approval.

NOTE: The Healthcare Facilities Subject Matter Expert shall possess demonstrated experience in the planning, design, construction, commissioning, activation, or operation of acute care hospitals and critical healthcare facilities.

10. CERTIFICATION & SIGNATURE

A. Certification of Commitment

I, the undersigned, hereby certify my strong and unconditional commitment during the period _____ (commitment dates) to participate in the project, Puerto Rico's New Trauma Hospital with _____,
(Proposer's Name)

To perform the functions described in the proposal and in accordance with the requirements, terms, and conditions established in the Request for Sealed Proposals (27DJ-00415).

1. Specific role within project: _____
2. Equipment and materials: _____
3. Funds: _____
4. Deliverables: _____

B. Certification Statement

I, the undersigned, hereby certify that the information provided in this Key Personnel Qualifications Form is true, accurate, and complete to the best of my knowledge. I understand that any misrepresentation or omission of material facts may result in disqualification of the Proposal and/or termination of any contract awarded. I further acknowledge that I have read and understood my proposed role on this Project and confirm my commitment to dedicating the stated percentage of time as described herein.

Exhibit 4: Non-Conflict of Interest Certification Compliance

I, _____, of legal age, or marital status (married/single), and a resident of _____, have been designated as the authorized representative of _____ ("the Proposer") for the procurement process referenced in the title of this document ("RFP Process"). In such regard, I hereby certify that:

1. No public official or employee of the ASEM possesses any financial interest in any Proposer participating in this Procurement Process, and that, likewise, has had no direct or indirect financial interest in these for the past four (4) years.

2. No public official or employee of the ASEM has solicited or accepted, directly or indirectly, by means of any person or entity with interest in this RFP Process, including the Proposer, any goods of any value -including, gifts, gratuities, contributions, services, donations, loans, and/or any other item of monetary value- for themselves and/or for any member of their immediate family, and/or relatives, and/or for any person, as a form of compensation for performing the duties and responsibilities of their position in connection with this RFP Process.

3. No public official or employee of the ASEM has solicited or accepted, directly or indirectly, by means of any person or entity with interest in this RFP Process, including the Proposer, any goods of any value -including, gifts, gratuities, contributions, services, donations, loans, and/or any other item of monetary value- for themselves and/or for any member of their immediate family, and/or relatives, and/or for any person, in exchange for their actions being an influence in the end result of this RFP Process.

4. I do not have a kindred relationship within the fourth (4^{th}) degree of consanguinity and/or second (2^{nd}) degree of affinity with public official or employee of the ASEM that participates or influences -or has the capacity to do so- in the institutional decisions of the ASEM.

The ASEM is highly committed to management excellence and promotes the effective use of government resources to benefit the people of Puerto Rico. Thus, the ASEM will support and comply with the provisions of Act 2-2018, known as the Anti-Corruption Code

Proposer's Initials: _____

Exhibit 4: Non-Conflict of Interest Certification Compliance

for the New Puerto Rico, as amended, including Title III, Code of Ethics for Contractors, Suppliers and Applicants for Economic Incentives of the Government of Puerto Rico.

Considering the above, I, the Proposer's Authorized Representative, also certify that:

1. I agree to comply with the applicable provisions of Act 2-2018, known as the Anti-Corruption Code for the New Puerto Rico, as amended, including Title III, Code of Ethics for Contractors, Suppliers and Applicants for Economic Incentives of the Government of Puerto Rico and recognize that this is an essential requirement in order to execute transactions or to set up agreements with the ASEM.

In _____, _____ this _____ day of _____ of 20____.

_____
Name of the Proposer's Entity

_____
Printed Name and Title of the Proposer's Authorized Representative

_____ _____
Signature of Proposer's Authorized Representative Date

END OF EXHIBIT 4

Exhibit 5: Non-Conflict of Interest Certification on Existing or Pending Contracts

I, _____, of legal age, or marital status (married/single), and a resident of _____, have been designated as the authorized representative of _____ ("the Proposer") for the procurement process referenced in the title of this document ("RFP Process"). In such regard, I hereby certify that:

1. There are no relevant facts or circumstances that could give rise to an organizational or personal conflict of interest for the Proposer or its staff with respect to the RFP Process with the ASEM. Nonetheless, the Proposer recognizes that situations may arise that may appear to be, or are, conflicts -or potential conflicts- of interest. The term "potential conflict" means reasonably foreseeable conflict of interest.

2. The Proposer will disclose to the ASEM any relevant information of an apparent, potential, or actual conflict of interest that may appear to exist regardless of their opinion that such information would not impair their objectivity.

3. As per 2 C.F.R. § 200.318(c)(1), a conflict of interest would arise when "the employee, officer, or agent, any member of his or her immediate family, his or her partner, or an organization which employs or is about to employ any of the parties indicated herein, has a financial or other interest in or a tangible personal benefit from a firm considered for a contract". Therefore, I understand that conflicts of interest may arise in, but not limited to, the following situations:

    a. Unequal access to information. A potential contractor, subcontractor, employee, or consultant has access to non-public information through its performance on a government contract for disaster recovery services in Puerto Rico.

Proposer's Initials: _____

b. Biased ground rules. A potential contractor, subcontractor, employee, or consultant has worked with a government contract or program with the basic structure or ground rules of another government contract for disaster recovery services in Puerto Rico.

c. Impaired objectivity. A potential contractor, subcontractor, employee, or consultant, or member of their immediate family (spouse, parent, or child) has financial interests, or others, that would impair, or give the appearance of impairing, impartial judgment in the evaluation of government programs in offering advice or recommendations to the government, or in providing technical assistance or other services to recipients of Federal funds as part of its contractual responsibility.

4. In the case in which the Proposer discloses to the ASEM an apparent, potential, or actual conflict of interest, the ASEM will take the appropriate measures to address the disclosure by taking the following actions, which include but are not limited to, eliminating, mitigating or neutralizing the apparent, potential or actual conflict, when appropriate, through such means as ensuring a balance of views, disclosure with the appropriate disclaimers, or by restricting or modifying the work to be performed to avoid or reduce the apparent, potential, or actual conflict.

5. If an apparent, potential, or actual conflict of interest is discovered by the Proposer after the RFP Process concludes, it will make a full disclosure in writing to the contracting officer. This disclosure shall include a description of actions that the Proposer has taken or proposes to take to avoid, mitigate, or neutralize the apparent, potential, or actual conflict of interest.

6. The Proposer has no present or currently planned interests (financial, contractual, organizational, or otherwise) relating to the contract or task order that may result from this RFP Process that would create any apparent, actual, or potential conflict of interest (including conflicts of interest for immediate family members: spouses, parents, children) that would impinge on its ability to render impartial, technically sound, and objective assistance or advice or result in it being given an unfair competitive advantage.

Exhibit 5: Non-Conflict of Interest Certification on Existing or Pending Contracts

7. The Proposer has exercised, and will continue to exercise, due diligence in avoiding, identifying, removing or mitigating any apparent, potential or actual conflicts of interest to the ASEM's satisfaction.

Exhibit 8: Non-Collusive Affidavit

The Proposer certifies that in relation to the procurement process referenced in the title of this document:

1. The prices in the offer have been arrived at independently without directly or indirectly mediating any type of consultation, communication or agreement with any other competitor relating to i) prices, ii) intention to submit an offer, or iii) the methods or factors used to calculate the proceed offered;
2. Prices in the offer have not been and will not be knowingly disclosed by the Proposer, directly or indirectly, to any other Proposer or competitor before Proposal Opening or contract award unless otherwise required by law;
3. No attempt has been made or will be made by the Proposer to induce any other competitor to/not to submit an offer or proposal for the purpose of restricting competition.

The signatory below (select one):

☐ Is the person in the Proposer's organization responsible for determining the prices being offered and has not participated and will not participate in any action contrary to paragraphs (1) through (3) above.

☐ Has been authorized, in writing, to act as agent for the following principals in certifying that those principals have not participated and will not participate in any action contrary to paragraphs (1) through (3) above.

Name[1]	Position[2]	Name	Position

As authorized agent, the Signatory does certify that the principals named above have not participated and will not participate in any action contrary to paragraphs (1) through (3) above.

[1] Insert full name of person(s) in the Proposer's organization responsible for determining the prices offered in the bid or proposal.

[2] Insert the title of the person(s) in the Proposer's organization responsible for determining the prices offered in the bid or proposal.

END OF EXHIBIT 8

Exhibit 9: Sworn Statement (Act 2-2018, Anti-Corruption Code for New Puerto Rico)

I, _____, in my personal capacity and in representation of _____ ("Proposer"), of legal age, or marital status (married/single), with profession _____ and a resident of _____, do hereby solemnly swear as follows:

1. My name and personal circumstances are as stated above.

2. As of the date of execution of this sworn statement, neither the undersigned nor the Proposer, or its president, vice president, director, executive director, member of Board of officers or directors, or any persons performing equivalent functions on Offeror's behalf, has been convicted or has pleaded guilty in state or federal court, or in any other jurisdiction of the United States, for any of the following crimes:

   (a) aggravated misappropriation;

   (b) extortion;

   (c) sabotage of essential public services;

   (d) forgery of documents;

   (e) fraud;

   (f) electronic fraud;

   (g) construction fraud;

   (h) fraudulent use, possession or transfer of cards with electronic bands;

   (i) illicit enrichment;

   (j) illicit enrichment by public official;

   (k) unjustified enrichment;

   (l) illicit enrichment of public work or services;

   (m) improper intervention in government operations;

   (n) negotiation incompatible with the exercise of public office;

   (p) false certifications;

(q) bribery, in all its modalities;

(r) undue influence;

(s) embezzlement of public funds; or

(t) money laundering.

3. As of the date of execution of this sworn statement and **for the twenty (20) years** prior, neither the undersigned nor the Proposer, or any of its officers, including its president, vice president, director, executive director, member of board of officers or directors, or any person performing equivalent functions on Offeror's behalf, has been convicted or has pleaded guilty in the state or federal forum, or in any other jurisdiction of the United States, for any of the following crimes:

(a) aggravated damage;

(b) property retention;

(c) alteration or mutilation of property;

(d) filing of false documents or data;

(e) illegal possession and use of tax information, receipts and payment vouchers;

(f) illegal purchase and sale of goods for the payment of taxes;

(g) filing false writings;

(h) illegal possession of tax receipts;

(i) falsification of entries in registers;

(j) forgery of stamps;

(k) ideological falsehood;

(l) forgery of license, certificates and other documents;

(m) forgery in the exercise of professions or occupations;

(n) possession and transfer of forged documents;

(o) possession of counterfeit instruments;

(p) preparation of false writings.

4. As of the date of execution of this sworn statement and **for the eight (8) years** prior, neither the undersigned nor the Proposer, or any of its officers, including its president, vice president, director, executive director, member of board officers or directors, or any person performing equivalent functions on Proposer's behalf, has been convicted or has pleaded guilty in the state or federal forum, or in any other jurisdiction of the United States, for any of the following crimes:

   (a) omission in the fulfillment of duty;

   (b) illegal sale of goods;

   (c) breach of duty;

   (d) negligence in the fulfillment of duty;

   (e) usurpation of public office; or

   (f) preventing the inspection of records and documents.

5. As of the date of execution of this sworn statement and **for the ten (10) years prior**, neither the undersigned nor the Proposer, or any of its officers, including its president, vice president, director, executive director, member of board officers or directors, or any person performing equivalent functions on Proposer's behalf, has been convicted or has pleaded guilty in the state or federal forum, or in any other jurisdiction of the United States, for crimes against the exercise of public office or public funds as defined in the Puerto Rico Penal Code, ; Law No. 1-2012, as amended, the Government Ethics Office Enabling Act; or any other crime defined in Law 2-2018.

6. I accept and acknowledge my obligation to inform of any change or modification to this statement during the contracting process or the term of the contract, as the result of a guilty plea or conviction for any of the above-mentioned crimes or any other conduct prohibited by the "Code

of Ethics for Contractors, Suppliers of Goods and Services and Applicants for Economics Incentives of the Executive Agencies of the Government of Puerto Rico", Title III, Law 2-2018.

7. I accept and acknowledge that a conviction for any of the crimes specified in the above paragraphs will result, in addition to any other penalties, in the immediate termination of any contract in force at the time of conviction, between the undersigned, the Proposer, and any government entity, public corporation or municipality at the date of conviction or guilty plea.

8. The undersigned and/or the Proposer, as the case may be, commits to complying with the "Code of Ethics for Contractors, Suppliers of Goods and Services and Applicants for Economics Incentives of the Executive Agencies of the Government of Puerto Rico", Title III, Law 2-2018.

9. I execute this sworn statement pursuant to Law 2-2018, and the terms and provisions of this procurement process.

10. I execute this sworn statement so that any government entity, public corporation or municipality has knowledge of what is herewith declared and for any administrative and/or legal purpose in relation thereto.

Exhibit 10: Anti-Lobbying Certification

The undersigned certifies, to the best of his or her knowledge and belief, that:

1. No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence and officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for making lobbying contracts to an office or employee of any agency, a Member of Congress, and officer or employee of Congress, or an employee of a Member of Congress in connection with the Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form – LLL, "Disclosure Form to Report Lobbying", in accordance with its instructions.

3. The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontractors, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by 31 U.S.C. 1352 (as amended by the Lobbying Act of 1995). Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

Exhibit 11: Disclosure of Lobbying Activities

Instructions for Completion of SF-LLL Disclosure of Lobbying Activities

This disclosure form shall be completed by the reporting entity, whether sub awardee or prime Federal recipient, at the initiation or receipt of a covered Federal action, or a material change to a previous filing, pursuant to title 31 U.S.C. section 1352. The filing of a form is required for each payment or agreement to make payment to any lobbying entity for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with a covered Federal action. Complete all items that apply for both the initial filing and material change report. Refer to the implementation of guidance published by the Office of Management and Budget for additional information.

1. Identify the type of covered Federal action for which lobbying activity is and/or has been secured to influence the outcome of a covered Federal action.
2. Identify the status of the covered Federal action.
3. Identify the appropriate classification of this report. If this is a follow-up report caused by a material change to the information previously reported, enter the year and quarter in which the change occurred. Enter the date of the last previously submitted report by this reporting entity for this covered Federal action.
4. Enter the full name, address, city, State and zip code of the reporting entity. Include Congressional District, if known. Check the appropriate classification of the reporting entity that designates if it is, or expects to be, a prime or subaward recipient. Identify the tier of the subawardee, e.g., the first subawardee of the prime is the 1st tier. Subawards include but are not limited to subcontracts, subgrants and contract awards under grants.
5. If the organization filing the report in item 4 checks "Subawardee," then enter the full name, address,

   city, State and zip code of the prime Federal recipient. Include Congressional District, if known.
6. Enter the name of the federal agency making the award or loan commitment. Include at least one organizational level below agency name, if known. For example, Department of Transportation, United States Coast Guard.
7. Enter the Federal program name or description for the covered Federal action (item 1). If known, enter the full Catalog of Federal Domestic Assistance (CFDA) number for grants, cooperative agreements, loans, and loan commitments.

Exhibit 11: Disclosure of Lobbying Activities

8. Enter the most appropriate Federal identifying number available for the Federal action identified in item 1 (e.g., Request for Proposal (RFP) number; Invitations for Bid (IFB) number; grant announcement number; the contract, grant, or loan award number; the application/proposal control number assigned by the Federal agency). Included prefixes, e.g., "RFP-DE-90-001."
9. For a covered Federal action where there has been an award or loan commitment by the Federal agency, enter the Federal amount of the award/loan commitment for the prime entity identified in item 4 or 5.
10. (a) Enter the full name, address, city, State and zip code of the lobbying registrant under the Lobbying Disclosure Act of 1995 engaged by the reporting entity identified in item 4 to influence the covered Federal action. (b) Enter the full names of the individual(s) performing services and include full address if different from 10(a). Enter Last Name, First Name, and Middle Initial (MI).
11. The certifying official shall sign and date the form, print his/her name, title, and telephone number.

According to the Paperwork Reduction Act, as amended, no person is required to respond to a collection of information unless it displays a valid OMB control Number. The valid OMB control number for this information collection is OMB No. 4040-013. Public reporting burden for this collection of information is estimated to average 10 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (4040-013), Washington, DC 20503.

Exhibit 11: Disclosure of Lobbying Activities

DISCLOSURE OF LOBBRYING ACTIVITIES

Complete this form to disclose lobbying activities pursuant to 31 U.S.C. 1352

1. Type of Federal Action

- ☐ a. contract
- ☐ b. grant
- ☐ c. cooperative agreement
- d. loan
- e. loan guarantee
- f. loan insurance

2. Status of Federal Action

- ☐ a. bid/offer/application
- ☐ b. initial award
- ☐ c. post-award

3. Report Type

- ☐ a. initial filing
- ☐ b. material change

4. Name and Address of Reporting Entity:

☐ Prime ☐ Subawardee (Tier, if known: _____)

Name: _____

Street 1: _____ Street 2: _____

City: _____ State: _____ Zip: _____

Congressional District, if known: _____

5. If Reporting Entity in No. 4 is Subawardee, Enter Name and Address of Prime:

Name: _____

Street 1: _____ Street 2: _____

City: _____ State: _____ Zip: _____

Congressional District, if known: _____

6. Federal Department/Agency:

_____

7. Federal Program Name/Description:

CFDA Number, if known: _____

8. Federal Action Number, if known:

_____

9. Award Amount, if known:

$_____

10. (a) Name and Address of Lobbying Registrant:

Name: _____

Street 1: _____ Street 2: _____

City: _____ State: _____ Zip: _____

(b) Individual Performing Services (Including address of different from No. 10a):

Name: _____

Street 1: _____ Street 2: _____

City: _____ State: _____ Zip: _____

Exhibit 11: Disclosure of Lobbying Activities

11. Information requested through this form is authorized by title 31 U.S.C. section 1352. This disclosure of lobbying activities is a material representation of fact upon which reliance was placed by the tier above when this transaction was made or entered into. This disclosure is required pursuant to 31 U.S.C. 1352. This information will be reported to the Congress semi-annually and will be available for public inspection. Any person who fails to file the required disclosure shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

Exhibit 13: Entities Prior Performance Certification

1. Has the Proposer or any of its Team Members (Design-Builder, Designer's Team, First-Tier Subcontractor, and Consultant) been notified with a "Letter of Concern", which refers to any written communication from a government entity notifying the Proposer or any of its Team Members, wariness or caution about the performance under a contract to provide services.

   ☐ Yes ☐ No ☐ Other (specify): _____

   If "Yes", provide a copy of every "Letter of Concern" received from and as a Contractor of a Government entity.

2. Has the Proposer or any of its Team Members (Design-Builder, Designer's Team, First-Tier Subcontractor, and Consultant) been found in default of contract terms with any contracting entity?

   ☐ Yes ☐ No

   If "Yes", indicate below if a Performance Bond or other means was used to resolve the default issue:

   ☐ Yes ☐ No ☐ Other (specify): _____

   Name of Surety Company: _____

   Telephone Number of Surety Company: _____

   Contact Person of Surety Company: _____

   Email Address of Contact Person:

   Provide an explanation regarding the circumstances that created the need for the contracting entity to invoke the terms of the Performance Bond, or other means, to include the current status of the matter. (include additional sheets if necessary).

END OF EXHIBIT 13

Exhibit 14: Certification Regarding Compliance of Act 173-1988

The performance of any engineering, architecture, surveying, and landscape architecture services in Puerto Rico shall be commissioned to a licensed professional or a professional services organization in accordance with the Act 173-1988, as amended, "Act of the Examiner Board of Puerto Rico's Engineers, Architects, Surveyors and Landscapers' Architects", Act 319 of May 15, 1938, as amended, "Act to Create the Board of Engineers and Surveyors". Therefore, the Proposer must certify, by submission of this Certification, that:

1. Proposer expressly acknowledges that only engineers, architects, surveyors, and landscapers' architects (professional services) duly authorized and licensed to practice in the commonwealth of Puerto Rico may perform professional services in Puerto Rico[1].

2. If the professional services organization will perform any services under a partnership or professional association, all partners or principals of the entity shall hold a license in their respective professions and shall be enrolled in the corresponding Register of Professional Partnerships.[2]

3. If the professional services organization is a corporation[3], all the shareholders shall be licensed in their respective professions and this corporation should be organize as a professional corporation pursuant to the provisions of sections 711 to 711z of Act 173, supra, and Act 164-2009, as amended, better known as the "General Corporation Act of Puerto Rico"[4].

4. The professional services organization herein engaged to perform any engineering, architecture, surveying, and landscape architecture services, hereby certifies and guarantees that is duly organized, validly existing and in good standing under the laws of Puerto Rico, particularly Act 173-1988, as amended, "Act of the Examiner Board of Puerto Rico's Engineers, Architects, Surveyors, and Landscapers Architecture", and Act 319 of May 15, 1938, as amended, "Act to

Exhibit 15: Certification of Compliance with the Prevailing Federal Wage Rule Davis Bacon Act 40 USC 276A – 276A-71

I, _____, of legal age, or marital status (married/single), and a resident of _____, have been designated as the authorized representative of _____ ("the Proposer") for the procurement process referenced in the title of this document ("RFP Process"). In such regard, I hereby certify that:

1. I will pay or supervise the payment of all persons employed by _____ (Name of the Proposer) and its subcontractors for the service, and that during the payroll period all persons employed in the service will receive their full earned weekly wages. No reimbursements have been or will be made, either directly or indirectly, on behalf of the aforementioned Proposer and its Subcontractors, for the full earned weekly wages of any person, other than allowable deductions as defined in the regulations, Part 3, CFR Part 3, issued by the Secretary of Labor pursuant to the Copeland Act, as amended (48 Stat. 948, 63 Stat. 108, 72 Stat. 967; 76 Stat. 537; 40 U.S.C. 276c).

2. Under the contract to be entered into as a result of this procurement process, it is required to submit accurate and complete payrolls;

3. The wage rates for workers or mechanics contained therein will not be lower than the applicable wage rates contained in any wage determination incorporated into the contract; that the classifications established therein for each worker or mechanic are appropriate to the work performed.

4. All apprentice employees will be properly registered in a bona fide apprenticeship program registered with a State Apprenticeship and Training Agency recognized by the Bureau of Apprenticeship and Training, U.S. Department of Labor, or if no such recognized agency exists in a State, will be registered with the Bureau of Apprenticeship and Training, U.S. Department of Labor.

Exhibit 16: Technical Proposal

The undersigned, having familiarized himself/herself with the specifications, terms and conditions (including the RFP documents), the Addendum and the Notices issued by the Bid Board, if any, understands that he/she has the qualifications and capacity to execute the project under this RFP process.

1.0 Proposer Identification
_____
Proposer's Name
2.0 Design Firm Experience and Past Performance. Demonstrate the Design Firm's experience in hospital planning, programming, design, permitting, regulatory coordination, construction-document development, and design support during construction. Address Acute care hospitals and trauma, emergency, surgical, intensive care, or comparable critical healthcare environments; Hospital facility planning, programming, and clinical workflow coordination; Resilient and mission-critical building systems, including structural, electrical, mechanical, plumbing, medical gas, IT, communications, life safety, and utility infrastructure; Design-Build delivery, fast-track design packages, multidisciplinary coordination, constructability reviews, and support of phased construction; Knowledge of American College of Surgeons (ACS) regulations and requirements; and Compliance with applicable healthcare codes, standards, licensing requirements, accessibility requirements, environmental requirements, including Federal Aviation Administration (FAA) requirements, and Puerto Rico professional practice requirements.
Proposer should submit additional sheets if the space provided is insufficient. Identify each continuation clearly and reference it here. ☐ Annex ____

2.0 Organizational Structure, Team Integration. Provide the Design-Build organizational structure and explanation of how the Design-Builder, Designer, Builder, subcontractors, specialty consultants, suppliers, vendors, and Key Personnel will be integrated to deliver the Project. The Proposal shall include an organizational chart consistent with Section 9.2.5.1 and shall describe lines of authority, decision-making responsibilities, communication protocols, issue-escalation procedures, design-construction coordination, and the method for managing scope, schedule, quality, safety, cost, risk, commissioning, activation, and operational readiness. The Proposer shall identify any prior collaboration among major Design-Build team members and describe how such prior collaboration supports efficient project delivery, risk reduction, and accountability.

Proposer should submit additional sheets if the space provided is insufficient. Identify each continuation clearly and reference it here. ☐ Annex ____

3.0 Minimum Technical Qualification Crosswalk. Provide a concise crosswalk or matrix identifying where the Proposal demonstrates compliance with the minimum healthcare experience, Key Personnel, bonding, technical capacity, past performance, and technical approach requirements established in Section 10.0. The crosswalk shall reference the applicable Proposal section, page number, and supporting documentation.

Proposer should submit additional sheets if the space provided is insufficient. Identify each continuation clearly and reference it here. ☐ Annex _____

4.0 Work Approach / Technical Proposal. provide a detailed Work Approach demonstrating a comprehensive understanding of the Project, the Design-Build delivery requirements, and the active Medial Center Campus environment. The Work Approach shall describe the Proposer's integrated strategy for delivering the Project from design through close-out and shall address, at a minimum, the following:

a. **Project delivery strategy:** Integrated approach for design, permitting, procurement, construction, commissioning, activation, turnover and closeout:

Proposer should submit additional sheets if the space provided is insufficient. Identify each continuation clearly and reference it here. ☐ Annex ____

b. Schedule Strategy (Project Schedule, Resource Loading, and Monthly Cash Flow Projections). Submit a computer-produced Critical Path Method (CPM) Project Schedule and a resource-loaded schedule with monthly cash-flow projections. Show activity logic, sequence, interdependencies, whole-day durations, subcontracted work, critical path, design reviews, endorsements and permits, early-work packages, procurement and long-lead equipment, construction, inspections, testing, commissioning, activation, approvals, Substantial Completion, Final Completion, and closeout. Demonstrate completion within the maximum fifty-four (54) months, including Phase I within twenty-one (21) months and Phase II within thirty-three (33) months, and provide the accelerated strategy required by Section 10.1.2.4.3 for the full structural frame and operational readiness of the Emergency Department level within twenty-one (21) months of Notice to Proceed. Include recovery planning and schedule-risk controls.

Proposer should submit additional sheets if the space provided is insufficient. Identify each continuation clearly and reference it here. ☐ Annex ____

c. **Campus Logistics, Maintenance of Traffic, and Site Utilization**. Provide an integrated logistics and site-utilization plan for work within the active Medical Center Campus. Identify construction access points, ambulance and emergency-vehicle routes, public and worker access, pedestrian and vehicular circulation, haul and delivery routes, staging and laydown areas, material storage, temporary facilities, contractor parking, equipment and crane/hoisting zones, waste-removal routes, fencing, barriers, utility protection, and coordination with adjacent medical, clinical, administrative, parking, utility, and support facilities. Explain how continuous safe access and campus operations will be maintained.

Proposer should submit additional sheets if the space provided is insufficient. Identify each continuation clearly and reference it here. ☐ Annex ____

d. **Safety, Site Security, Infection Control, and Environmental Protection**. Describe the safety-management approach for design and construction, including worker safety, public protection, pedestrian and vehicular safety, emergency access, high-risk work, site security, incident response, and coordination with ASEM and campus operations. Describe infection-control measures appropriate to an active medical campus and controls for dust, noise, vibration, air quality, erosion and sedimentation, stormwater, hazardous materials, construction and demolition waste, and protection of patients, staff, visitors, adjacent facilities, and ongoing healthcare operations.

Proposer should submit additional sheets if the space provided is insufficient. Identify each continuation clearly and reference it here. ☐ Annex ____

e. **Procurement, Materials, Equipment, and Delivery Management**. Describe the approach for procurement, delivery, receipt, inspection, storage, security, protection, installation, start-up, and turnover of materials and equipment in accordance with the Project Schedule. Address long-lead and healthcare-critical equipment, Owner-furnished/Contractor-installed items, medical-equipment interfaces, delivery coordination, temporary storage, submittals, vendor participation, testing, warranties, spare parts, and measures to avoid disruption to adjacent medical and support operations**.**

Proposer should submit additional sheets if the space provided is insufficient. Identify each continuation clearly and reference it here. ☐ Annex ____

f. **Quality Assurance and Quality Control**. Describe the proposed quality assurance and quality control program for design and construction, including design reviews, constructability reviews, multidisciplinary coordination, code reviews, inspections, testing, submittals, RFIs, nonconformance and corrective-action processes, records, document control, and verification of compliance with the RFP and Contract Documents. Describe the BIM Execution Plan, model uses, Level of Development by phase, clash detection, issue tracking, healthcare-system coordination, record-model requirements, and integration of BIM information with commissioning, operations, and maintenance.

Proposer should submit additional sheets if the space provided is insufficient. Identify each continuation clearly and reference it here. ☐ Annex ____

g. **Risk Management and Operational Continuity**. Describe the methodology for identifying, assessing, assigning, mitigating, monitoring, and controlling risks throughout design and construction. Include schedule, cost, permitting, design coordination, procurement, safety, environmental, utility, campus-interface, clinical-operations, commissioning, and activation risks. Provide measures to minimize impacts to emergency response, existing medical services, utilities, traffic, parking, wayfinding, deliveries, and adjacent clinical, administrative, public, and support operations, including contingency and recovery procedures.

Proposer should submit additional sheets if the space provided is insufficient. Identify each continuation clearly and reference it here. ☐ Annex ____

h. **Commissioning, Activation, Training, Turnover, and Closeout**. Describe the integrated approach for commissioning and operational readiness, including commissioning planning; pre-functional and functional testing; integrated systems testing; deficiency tracking and retesting; regulatory inspections and approvals; facility activation; staff training; O&M manuals; warranties; as-built and record drawings; record BIM model; asset and equipment information; final permits; occupancy and life-safety documentation; punch list; phased turnover; and final closeout. Address HVAC, electrical, emergency power, plumbing, fire protection, medical gas, BAS, IT/low-voltage, security, nurse-call, and other hospital-critical systems identified in Attachment 1.

Proposer should submit additional sheets if the space provided is insufficient. Identify each continuation clearly and reference it here. ☐ Annex ____

i. **Regulatory Compliance**. Describe the approach for compliance with all applicable federal, Puerto Rico, CDBG-MIT, HUD, PRDOH, ASEM, healthcare, environmental, labor, safety, accessibility, professional licensing, permitting, and Design-Build requirements.

Proposer should submit additional sheets if the space provided is insufficient. Identify each continuation clearly and reference it here. ☐ Annex ____

MINIMUM HEALTHCARE / HOSPITAL PROJECTS EXPERIENCE

RFP Section 10.1.1.8 | Submit with Proposal

INSTRUCTIONS

Proposers must complete this form to demonstrate compliance with the Minimum Healthcare/Hospital Projects Experience requirements set forth in Section 10.1.1.8 of the RFP. Read all instructions carefully before completing the form.

- All projects submitted must have been substantially completed within the last twenty (20) years from the date of submission.
- Proposers may list additional projects beyond the stated minimum for each requirement. Attach supplemental sheets as needed using the same format.
- A single project may satisfy more than one (1) requirement (e.g., a completed Design-Build hospital project may count toward both Requirement A and Requirement B of this document).
- All information is subject to verification. The Evaluation Committee or Bid Board reserves the right to contact all listed references.
- Incomplete submissions may be deemed non-responsive. Ensure all fields are completed for every project listed.
- Leave the checkbox fields blank; the Evaluation Committee or Bid Board will not accept pre-filled evaluations on their behalf.

PROJECT 4: Complete Hospital Construction Project					
Project Name:					
Owner / Client:					
Location:		**Contract Value ($):**		**Completion Date:**	
Proposer's Role:		**Gross Square Footage:**		**No. of Stories:**	
Project Delivery Method:	Design-Build _____	Design-Bid-Build _____	CM at Risk _____	Other: _____	
Scope of Work / Project Description:					
Owner Reference Contact:	Name / Title:	**Phone / Email:**			

Minimum required: One (1) project. Use the same format to attach additional project sheets.

MINIMUM HEALTHCARE / HOSPITAL PROJECTS EXPERIENCE

REQUIREMENT B: COMPLETED DESIGN-BUILD HEALHCARE OR HOSPITAL PROJECT

Minimum Requirement: At least one (1) completed Design-Build healthcare or hospital project performed by the designer or builder. This project may be the same as one (1) submitted under Requirement A of this Document. List the primary project first; additional projects may be submitted to further demonstrate experience.

Project 1 – Completed Design-Build Healthcare or Hospital Project					
Project Name:					
Owner / Client:					
Location:		**Contract Value ($):**		**Completion Date:**

Cross-reference to Requirements A–F of this document where the same federally funded project was already listed.

PART II – PROJECT CROSS-REFERENCE SUMMARY

Complete the table below to identify which projects satisfy multiple requirements. Enter the Project Name and mark (X) each requirement it satisfies. This summary assists the reviewing committee in efficiently evaluating your submission.

PROJECT NAME	REQUIREMENTS						
	A (Hospital)	B (Design-Build)	C (Critical Care)	D (Active Campus)	E (Vertical)	F (Safety)	G (Federal)

PART III – CERTIFICATION AND SIGNATURE

The undersigned authorized representative of the Proposer hereby certifies, under penalty of disqualification, that:

- All information provided in this form is true, accurate, and complete to the best of the representative's knowledge and belief;
- All projects listed were substantially completed by the Proposer's firm (or a joint venture/partnership in which the Proposer held a material role), within the last twenty (20) years;
- The Proposer understands that the Evaluation Committee and Bid Board reserves the right to verify all submitted information and to contact listed references;
- Any material misrepresentation in this submission may result in disqualification from this procurement and may be grounds for contract termination if discovered after award;
- The Proposer meets all Minimum Healthcare/Hospital Projects Experience requirements set forth in Section 10.1.1.8 of the RFP, as demonstrated by the projects listed herein.

— END OF MINIMUM HEALTHCARE/HOSPITAL PROJECTS EXPERIENCE FORM —

Exhibit 17: Price Proposal Form

Name of Proposer:	**Date:**

ARTICLE 1 – PROPOSER'S ACKNOWLEDGEMENTS

Proposer accepts all the terms, specifications, and conditions of the Request for Sealed Proposals, including without limitation those dealing with the disposition of Price Proposal security. This Price Proposal and all prices stated herein shall remain valid and subject to acceptance for one hundred eighty **(180) days** from the Proposal Submission Deadline.

ARTICLE 2 – PROPOSER'S REPRESENTATIONS

In submitting this Price Proposal, Proposer represents that:

1. The Proposer has carefully examined and studied the Request for Sealed Proposal documents, as well as all data and reference items identified in the RFP documents, and hereby acknowledges receipt of the following Addenda

Addenda No.	**Addenda Date**

2. Proposer has visited the Site, conducted a thorough, alert visual examination of the Site and adjacent areas, and become familiar with

and satisfied itself as to the general, local, and Site conditions that may affect cost, progress, and performance of the Work.

3. Proposer is familiar with all Laws and Regulations that may affect cost, progress, and performance of the Work and its compliance with CDBG-MIT requirements.

4. Proposer has carefully studied all: (1) reports of explorations and tests of subsurface conditions at or adjacent to the Site, and all drawings (if any) of physical conditions relating to existing surface or subsurface structures at the Site, that ASEM has identified or made available to Proposer, especially with respect to Technical Data in such reports and drawings, and (2) reports and drawings relating to Hazardous Environmental Conditions, if any, at or adjacent to the Site that ASEM has identified or made available to Proposer, especially with respect to Technical Data in such reports and drawings.

5. Proposer has considered the information known to Proposer itself, and to members of Proposer's design-build team; information commonly known to design professionals, design-builders, and contractors doing business in the locality of the Site; information and observations obtained from visits to the Site; the RFP Documents; and the Site-related reports and drawings (if any) identified in the RFP Documents or otherwise made available to Proposer, with respect to the effect of such information, observations, and documents on (1) the cost, progress, and performance of the Work; (2) the project design; (3) the means, methods, techniques, sequences, and procedures of construction to be employed by Proposer; and (4) Proposer's safety precautions and programs.

6. Proposer agrees, based on the information and observations referred to in the preceding paragraph, that no further examinations, investigations, explorations, tests, studies, or data are necessary for the preparation of its Proposal for performance of the Work at the prices stated and within the times required, and in accordance with the other terms and conditions of the RFP Documents.

7. Proposer is aware of the general nature of work to be performed by ASEM and others at the Site that relates to the Work as indicated in the RFP Documents.

8. Proposer has given Engineer written notice of all conflicts, errors, ambiguities, and discrepancies that Proposer has discovered in the RFP Documents and confirms that the written response from ASEM is acceptable to Proposer.

9. The RFP Documents are generally sufficient to indicate and convey understanding of all terms and conditions for the performance and furnishing of the Work.

10. The submission of this Price Proposal constitutes an incontrovertible representation by Proposer that Proposer has complied with every requirement of this Article, and that without exception the Price Proposal and all prices in the Price Proposal are premised upon performing and furnishing the Work required by the RFP Documents.

ARTICLE 3 – PROPOSER'S UNDERSTANDING

1. The undersigned, having familiarized himself with the specifications, terms and conditions of the Request for Sealed Proposal Documents, submits this proposal in response to the Request for Sealed Proposal No 27DJ-00415. whose price proposal includes all related costs, including but not limited to all labor, materials, studies, reports, installation, equipment, professional services, non-professional services, and construction works; as well as having fully understood the scope of the work, specifications, terms and conditions, amendments to the RFP documents, and notifications issued for this RFP.

2. The Proposer acknowledges and accepts that the prices of the proposal, as stated above, may not be changed after the selection or award has been issued and that these will remain fixed during the execution of the contract and until the contracted service is completed.

3. The Proposer acknowledges and accepts that as part of this Request for Sealed Proposals process and in accordance with 48 CFR Part 6 Subpart 6.203 to 6.208, it is the policy of the Government of Puerto Rico and ASEM to stimulate the growth of small commercial businesses by encouraging their participation in this Request for Sealed Proposals process.

BASE BID: <u>Design-Build for Puerto Rico's New Trauma Hospital</u>

A. <u>Delivery Schedule</u>: The Proposer will develop the project work within the period established in the RFP documents in two (2) phases, according to the schedule presented by the Technical Proposer of its proposal.

By submitting this proposal, I accept and certify that the execution of all activities identified in the Scope of Work will be carried out within an execution period of no more than 54 months (First Phase no more than 21 months and Second Phase no more than 33 months), as established in the Request for Sealed Proposals documents.

B. Price Proposal:

Base Bid: The Proposer hereby submits the following Price Proposal for the Project as per the terms, specifications, and conditions of the RFP and Scope of Works, the details and corresponding cost breakdown which are provided in **Exhibit 18** (Cost Breakdown).

Item	Description	Quantity	Unit	Amount
1.	Design	1	LS	
2.	Construction	1	LS	
			Total Base Bid	

ALTERNATE:

A. The Proposer must submit an additional cost proposal (Alternate) to the Base Bid regarding the design and construction of the water reservoir intended to guarantee the facility's operational continuity and compliance with storage, pressure, and potable water quality requirements. The proposal must consider the technical, regulatory, and operational criteria established by the ASEM and demonstrate significant improvements, as per the Scope of Work.

B. The Alternate must include a cost that covers design, materials, labor, equipment, testing, installation, supervision, quality control, commissioning, and applicable contingencies. This cost will not be included in the Base Bid and will only be considered if the Bid Board awards the Alternate. If awarded, (1) the Alternate will be considered part of the contract and will be governed by the same administrative, quality, and safety clauses applicable to the Base Bid; (2) the Alternate must be integrated without affecting the critical path of the main project; and (3) No work related to the Alternate may commence without written authorization from ASEM.

C. This Alternate will be evaluated separately from the base price and may be selected, rejected, or negotiated, as necessary to meet budgetary conditions.

D. By submitting a cost proposal for the Alternate, the Proposer certifies that, for the purposes of its submission, it has considered compliance with all codes, regulations, technical standards, and specifications applicable to the project, as well as the work included in the Base Bid.

Exhibit 17: Price Proposal Form

Item	Description	Quantity	Unit	Amount
1.	Design-Build of the Water Storage Reservoir	1	LS	
			Total Alternate	

ALLOWANCE:

The Proposer acknowledges that the allowance items do not constitute a transfer of contractual risk to ASEM and accepts that the current costs will be reconciled.

The Proposer confirms it has evaluated the project conditions and acknowledges that the administration of allowance items constitutes an integral part of its obligations as a Contractor, including coordination with suppliers, logistics management, and compliance with regulatory requirements.

Specific cases may require the proposer to provide additional services to those stated above. For such services, the contract shall include an allowance, and the Proposer shall provide the PRDOH with unit pricings and/or tariff for the additional services to be performed. A Request for Approval (RFA) is required from the Proposer prior to the use of the allowance and at least three (3) cost estimates should be prepared and submitted for the approval of the use of the funds on any given service or media. No additional task or service may be performed by the Proposer without prior authorization of the ASEM and PRDOH.

1. **Supply and Install Hospitaller and Medical Equipment for Puerto Rico's New Trauma Hospital**

   The Proposer acknowledges and accepts that, as part of the items contemplated in the award, an allowance item is included in the amount of $25,000,000.00 intended to cover the costs related to purchase, taxes, fees, transport, delivery, installation, and commissioning of the specified hospitaller and medical equipment, and warranty of the medical equipment and its General Conditions. Refer to **Attachment H** (Hospitaller and Medical Equipment).

2. **Supply and Install the Furniture, Fixtures and Equipment (FF&E) for Design-Build for Puerto Rico's New Trauma Hospital**

   The Proposer acknowledges and accepts that, as part of the items contemplated in the award, an allowance item is included in the amount of $4,500,000.00 intended to cover the costs related to purchase, taxes, fees, transport, delivery, installation, and commissioning of the specified equipment, and warranty of the equipment. Refer to **Attachment 1** (Scope of Works).

3. **Contingency**

   The Proposer acknowledges and accepts that, as part of the items contemplated in the award, an allowance item is included in the amount of $10,300,000.00 intended to cover the costs related to **unforeseen conditions** (unexpectedly poor soil conditions, hidden interferences, unidentified utility conflicts, archaeological finds, etc.) or **minor variations during construction** (quantity adjustments, minor additional work, and coordination adjustments based on the scope of work included in the RFP).

Item	Description	Quantity	Unit	Amount
1.	Supply and Install Hospitaller and Medical Equipment for Puerto Rico's New Trauma Hospital	1	LS	$25,000,000.00
2.	Supply and Install the Furniture, Fixtures and Equipment (FF&E) for Design-Build for Puerto Rico's New Trauma Hospital	1	LS	$4,500,000.00
3.	Contingency	1	LS	$10,300,000.00

ARTICLE 4 – PROPOSER'S CERTIFICATION

Proposer certifies that:

1. This Price Proposal is genuine and not made in the interest of or on behalf of any undisclosed individual or entity and is not submitted in conformity with any collusive agreement or rules of any group, association, organization, or corporation;

2. Proposer has not directly or indirectly induced or solicited any other Proposer to submit a false or sham Price Proposal;
3. Proposer has not solicited or induced any individual or entity to refrain from submitting a Price Proposal; and
4. Proposer has not engaged in corrupt, fraudulent, collusive, or coercive practices in competing for the Contract:
    a. "corrupt practice" means the offering, giving, receiving, or soliciting of anything of value likely to influence the action of a public official in the RFP process;
    b. "fraudulent practice" means an intentional misrepresentation of facts made (a) to influence the proposal process to the detriment of ASEM, (b) to establish prices at artificial non-competitive levels, or (c) to deprive ASEM of the benefits of free and open competition;
    c. "collusive practice" means a scheme or arrangement between two or more Proposers, with or without the knowledge of ASEM, a purpose of which is to establish prices at artificial, non-competitive levels; and
    d. "coercive practice" means harming or threatening to harm, directly or indirectly, persons or their property to influence their participation in the proposal process or affect the execution of the Contract.
5. As part of the documents of its Proposal, Proposer submitted a sworn statement proving that the undersigned has not participated in any collusion with any person with respect to this request for proposals or any other Request for Sealed Proposals for the contract for which this request is submitted.

The undersigned represents, warrants, and certifies on behalf of the Proposer that:

1. The information contained in the Proposal is true and complete,
2. The Proposal has been duly and properly authorized for submission by the Proposer, and
3. In its preparation and development of the Proposal, the Proposer has not, directly or indirectly, solicited or received any advice, assistance, or information concerning the Proposal from any representative of the ASEM or PRDOH, or its agents or contractors, which was not equally available to other Proposer, and which might contribute to an actual or potential competitive advantage for the Proposer.

Exhibit 17: Price Proposal Form

CERTIFICATION

I, _____, hereby AFFIRM AND CERTIFY that I am authorized to sign this Proposal, and that my name and signature are duly registered in the Single Registry of Bidders (RUL, for Spanish acronym) of the Puerto Rico's General Services Administration (ASG, for Spanish acronym) or will be registered within five (5) business days from the Proposals Opening. Furthermore, I CERTIFY that I RECOGNIZE AND ACCEPT the statements detailed above, as well as my obligation to comply with all requirements, specifications, terms, and conditions during the RFP process, and during the term of the contract that may be awarded.

In witness thereof, the Proposer has executed this Price Proposal Form this _____ day of _____, 20_____.

END OF EXHIBIT 17

Exhibit 18: Cost Breakdown

Name of Proposer:	**Date:**

This Cost Breakdown Form is provided solely to support the analysis and evaluation of the Proposal. It shall not be used as a payment application, schedule of values, basis for payment, Notice of Award, contract award, or authorization to proceed. Any award, payment, or contractual obligation shall be governed exclusively by the final procurement and contract documents approved by the ASEM.

The Proposer hereby submits the following Cost Breakdown of the Price Proposal for the project. The Proposer hereby submits the following Cost Breakdown of the Price Proposal for the Project. The Proposer shall complete every applicable cost line, and include all costs required to provide a complete, functional, code-compliant, permitted, commissioned, and operational facility.

A - DESIGN

DESIGN				
Item	**Description**	**Qty**	**Unit**	**Amount ($)**
1	Design and preconstruction mobilization, project understanding, review of ASEM requirements, and integration of the Bridging Documents, Geotechnical Report, and SARPS recommendations.	1	LS	
2	Required studies and site investigations, including topographic survey; existing infrastructure and subsurface-utility investigation using ground-penetrating radar, underground penetrating sonar, or other appropriate non-destructive methods; traffic and accessibility studies; site-access, easement, and restriction analysis; risk and safety assessment; hydrologic and hydraulic study; scour study, if applicable; applicable-regulations report; methodologies; findings; maps; models; laboratory results;	1	LS	

Exhibit 18: Cost Breakdown

DESIGN				
Item	**Description**	**Qty**	**Unit**	**Amount ($)**
	georeferenced photographs; risk matrix; recommendations; and technical conclusions.			
3	Hazardous-material identification, observation, sampling, analysis, inspection report, negative certifications, mitigation recommendations, and mitigation Work Plan, as applicable.	1	LS	
4	Schematic Design deliverables for all required disciplines, including architecture, landscape, civil, geotechnical, structural, fire protection, electrical, communications, mechanical, plumbing, life safety, interior design, furniture, fixtures and equipment, site plans, functional and circulation analysis, preliminary systems integration, code-compliance report, studies report, submittal log, technical specifications, calculations, Building Information Modeling coordination, cost estimate, and updated design and construction schedules.	1	LS	
5	Design Development deliverables, including advanced 30%-60% drawings, coordinated Building Information Modeling models, complete structural and mechanical, electrical, and plumbing criteria, updated technical specifications, analysis and calculation booklets, bill of quantities, updated cost estimate, updated schedules, regulatory-compliance review, pre-consultations, permitting support, and updated submittal log.	1	LS	
6	Construction Documents deliverables, including final signed and sealed discipline drawings, final technical specifications, fully coordinated Building Information Modeling model, final cost estimate, updated schedules and submittal log, Quality Plan, Design Professional Certification, and	1	LS

CONSTRUCTION				
Item	**Description**	**Qty**	**Unit**	**Amount ($)**
13	Existing conditions, demolition, removals, excavation, trenching, drilling and below-grade disturbance, including documented subsurface investigation before work, shoring, excavation support, dewatering, monitoring, and coordination of findings with the Building Information Modeling model and construction plans	1	LS	
14	Site work, excavation, backfill, grading, drainage, paving, sidewalks, curbs, landscaping, fencing, roads, site utilities, restoration, campus interfaces, and environmental or archaeological protection measures required by the approved design	1	LS	
15	Concrete work, including foundations, footings, mat and basement slabs, basement walls, structural frames, slabs, columns, shear walls, roof structure, and helipad or heliport structural support	1	LS	
16	Masonry, concrete masonry unit walls, shafts, and fire-rated separations throughout the building	1	LS	
17	Metals, embeds, stairs, railings, roof and equipment support, helipad metals, and miscellaneous supports	1	LS	
18	Wood, plastics, and composites, including backing, blocking, millwork support, and related work	1	LS	
19	Thermal and moisture protection, including below-grade waterproofing, roofing, insulation, firestopping, vapor barriers, drainage, joints, and complete building-enclosure work	1	LS	
20	Doors, windows, openings, and hardware throughout the complete facility	1	LS	
21	Finishes, partitions, ceilings, flooring, wall protection, coatings, and clinical finishes throughout the complete facility	1	LS	
22	Specialties, signage, wayfinding, project signage, life-safety accessories, and related accessories throughout the complete facility	1	LS	
23	Medical and general equipment interfaces, fixed-equipment supports, clinical-support infrastructure, medical-equipment clearances, utility and mechanical, electrical and plumbing tie-ins, and Owner-furnished contractor-installed equipment coordination and verification	1	LS	

Exhibit 18: Cost Breakdown

CONSTRUCTION				
Item	**Description**	**Qty**	**Unit**	**Amount ($)**
24	Furnishings, furniture, fixtures and equipment, fixed casework, nurse stations, built-ins, and related infrastructure to the extent required by the Contract Documents	1	LS	
25	Special construction, including seismic-isolation systems and interfaces, joint coordination and covers, flexible mechanical, electrical, and plumbing crossings, and helipad or heliport systems	1	LS	
26	Conveying systems, including elevators and vertical transportation, work for the complete building and helipad interface	1	LS	
27	Heating, ventilation, and air-conditioning systems, including central-plant interfaces, air-handling units, chillers, boilers, variable-air-volume boxes, critical ventilation, pressure control for clinical spaces, controls, smoke control, testing, adjusting and balancing, start-up, and functional testing	1	LS	
28	Plumbing systems, including domestic hot and cold water, sanitary, stormwater, pumps, water heaters, specialty systems, backflow prevention, insulation, testing, certification, and complete distribution throughout the facility	1	LS	
29	Medical-gas systems, including sources, distribution, outlets, valves, alarms, testing, certifications, operating documentation, and staff training	1	LS	
30	Fire-suppression systems, including fire pumps, sprinklers, standpipes, helipad or heliport support, interfaces, testing, certification, and authority acceptance	1	LS	
31	Electrical power and lighting, including service entrance, normal and emergency distribution, grounding, panels, lighting, controls, sensors, emergency branches, testing, labeling, and thermographic scanning when required.	1	LS	
32	Electrical substations and emergency-power systems, including switchgear, generators, automatic transfer switches, uninterruptible power supplies, critical power, load-bank testing, and integrated systems testing	1	LS	

Exhibit 18: Cost Breakdown

CONSTRUCTION				
Item	**Description**	**Qty**	**Unit**	**Amount ($)**
33	Fire-alarm and life-safety systems, including smoke-control interfaces, alarms, controls, programming, testing, certification, and authority acceptance	1	LS	
34	Nurse-call and patient and staff communication systems, including complete infrastructure, programming, testing, integration, training, and turnover	1	LS	
35	Telecommunications, data networks, information technology, security, closed-circuit television, access control, door card readers, disaster monitoring, structured cabling, system programming, testing, credentials, passwords, configuration data, and turnover, coordinated with ASEM's information technology requirements	1	LS	
36	Building Automation System and Energy Management System, including controls, sensors, actuators, sequences, alarms, interlocks, dashboards, trend logs, system integration, testing, configuration records, and ASEM operations training	1	LS	
37	Complete commissioning for heating, ventilation and air conditioning, electrical, plumbing, fire protection, medical gas, low-voltage, Building Automation System, life-safety and other required systems, including commissioning plan and schedule, prefunctional checklists, startup, functional performance testing, integrated systems testing, calibration, balancing, deficiency resolution, retesting, reports, and final acceptance documentation	1	LS	
38	Building Information Modeling implementation during construction and close-out, including model coordination, clash detection, issue tracking, constructability and logistics review, installed-condition updates, record model, native and interoperable file delivery, and structured asset data	1	LS	
39	Training and operational transition for ASEM staff, including heating, ventilation and air conditioning and Building Automation System operations, medical gas, emergency power, nurse call, security, access control, information technology,	1	LS

CERTIFICATION

I, _____, hereby AFFIRM AND CERTIFY that I am authorized to sign this proposal, and that my name and signature are duly registered in the Single Registry of Bidders (RUL, for Spanish acronym) of the Puerto Rico's General Services Administration (ASG, for Spanish acronym) or will be registered within five (5) business days from the Proposals Opening. Furthermore, I CERTIFY that I RECOGNIZE AND ACCEPT the statements detailed above, as well as my obligation to comply with all requirements, specifications, terms, and conditions during the RFP process, and during the term of the contract that may be awarded.

This document is intended as a guide for the Bid Board or Evaluation Committee for the evaluation of the cost analysis of proposals, in compliance with the requirements of 2 CFR 200.324. To this end, it is the Proposer's responsibility to study and analyze the information

contained in the scope of work, drawings, specifications, terms, and other documents that are an integral part of the RFP process, ensuring that the information contained therein is included in the prices of their proposal. It is the Proposer's responsibility to verify the itemized details and report any discrepancies before submitting their proposal.

In witness thereof, the Proposer has executed this Cost Breakdown Form this _____ day of _____, 20_____.

END OF EXHIBIT 18

Exhibit 19: Bid Bond

BE KNOWN IT, BY THESE PRESENTS:

That we, as Principal, and _____ as Surety (collectively with the Principal, the "Obligors"), are held and firmly bound unto the Puerto Rico Medical Services (ASEM), a governmental instrumentality of the Government of Puerto Rico, its successors and assigns, as Obligee, in the full and just amount of _____ equal to **5% of the Cost Proposal (Base Bid + Allowances + Alternate)** for the payment in lawful money of the United States, of which sum well and truly to be made, the Obligors bind ourselves, our heirs, administrators, and successors, jointly and severally, firmly by these presents.

WHEREAS, the Proposer has submitted the accompanying Proposal dated _____ for **Design Build of Puerto Rico's New Trauma Hospital** under the procurement process (27DJ-00415).

NOW, THEREFORE, the conditions of this obligation are such that if the aforesaid Principal is awarded the contract and, the said Principal, within the time required enters into a formal contract and secures the performance of the terms and conditions of the contract, then this obligation will be void. If otherwise, the Principal withdraws his Proposal or fails to enter into a formal contract after award, the Principal and Surety will pay unto the Obligee the difference in money between the amount of the Proposal of the said Principal and the amount for which the Obligee legally contracts with another party to perform the work if the latter amount be in excess of the former, but in no event shall liability hereunder

exceed the penal sum hereof. These conditions shall remain in full force and effect for a period of ninety (90) days after the Proposal Due Date.

IN WITNESS WHEREOF, the above-bound parties have executed this instrument under their several seals this _____ day of _____, the name and corporate seal of each corporation party being hereto affixed and these presents duly signed by the undersigned representative pursuant to authority of its governing body.

END OF EXHIBIT 20

Attachment 1: Scope of Works

I. PROJECT DESCRIPTION

Project: Design-Build of Puerto Rico's New Trauma Hospital

Location: Medical Center, La Plazoleta, Pedro Arzuaga at coordinates 18.39529234, -66.07379206

Owner: Puerto Rico Medical Services Administration (ASEM)

Proposer: Any entity submitting a proposal in response to this RFP

Description: The project will consist of developing the new ASEM Trauma Hospital of Puerto Rico on the campus of the Puerto Rico Medical Center. The Contractor ("Design-Builder") will be responsible for developing, coordinating, and delivering the complete project design in accordance with the functional, regulatory, and performance requirements established by the ASEM.

This Scope of Work establishes the minimum design, construction, commissioning, permitting, quality, safety, BIM, and close-out requirements for delivery of Puerto Rico's New Trauma Hospital under a Design-Build model. The Design-Builder shall serve as the single point of responsibility for integrated delivery of the Project, including all professional design services, construction execution, regulatory compliance, coordination among disciplines and trades, and final operational readiness for ASEM's acceptance.

The Design-Builder shall provide all labor, materials, equipment, supervision, management personnel, professional services, technical services, permits, testing, commissioning, documentation, training, and incidentals necessary to deliver a complete and operational Level I Trauma Center. The Design-Builder shall be responsible for all work reasonably inferable from the Contract Documents and necessary to provide a complete, functional, code-compliant, and operational facility, whether specifically identified or not. Any scope not expressly excluded in the Proposal shall be deemed included in the Contract Price.

II. DESIGN

This section of the Scope of Work is intended as a guide for the Designer and their team to help them understand their overall responsibilities. It does not attempt to identify every activity required during the design phase.

a. Description

The Designer will evaluate the project area by conducting all the necessary tests, studies, and analyses to continue with the development of the design that contemplates the construction of Puerto Rico's New Trauma Hospital.

b. Bridging Documents

The Designer will develop a design in accordance with the Scope of Works and Bridging Documents (Attachment A, B and C), Geotechnical Report, SARPS's Recommendations (Attachment D), Owner's Requirements (Attachment E). Hospitaller and Medical Equipment (Attachment F), and Utilities Plans (Attachment G).

The Design-Builder shall incorporate the Bridging Documents into the final design development process and shall preserve the approved architectural concept, clinical intent, patient flow, space relationships, and project objectives to the maximum extent practicable. The Design-Builder may review, interpret, modify, revise, adjust, supplement, expand, or replace portions of the conceptual design as necessary to comply with applicable laws and regulations, meet permitting requirements, resolve conflicts, address constructability, meet budget and schedule requirements, coordinate building systems, and achieve Project performance requirements. Changes that materially alter the architectural concept, building configuration, clinical workflow, functional program, or project objectives shall require prior written review and approval by ASEM. Upon award, the Design-Builder assumes full responsibility for the final design, and the original designer shall not be liable for revisions, alterations, value engineering decisions, coordination efforts, or other changes made by the Design-Builder after transfer of the Bridging Documents.

c. Hazardous Content Identification

The Designer will carry out the process of identifying hazardous materials. To do so, they must document the process, findings, and mitigation recommendations. This information will form the basis of the "Hazardous

Materials Inspection Report," which will identify the components that will be affected by the construction and demolition activities and where mitigation of these materials is required, based on their identification. The Designer must provide the ASEM's authorized representative with two (2) copies of the "Hazardous Materials Inspection Report."

If mitigation of hazardous materials is required, according to applicable laws and regulations, the Designer will develop a Work Plan for the mitigation of these materials, in accordance with applicable laws, manuals, codes, and regulations. This Work Plan will be an integral part of the design.

If the inspection and analysis of samples yield negative results, the Designer will submit a negative certification for each hazardous material, issued by a duly certified professional in Puerto Rico.

All costs associated with management, coordination, observation, inspection, sampling, analysis, reporting, certification, and development of the Work Plan shall be included in the Design-Builder's proposal and shall not constitute a basis for additional compensation.

d. Cost Estimate

The Contractor shall provide a cost estimate breakdown by architectural and engineering disciplines, and shall separately calculate the costs of materials, equipment and labor, corresponding to direct construction costs, soft costs and administrative costs, including inflation and contingency adjustments.

The Contractor is responsible for submitting a Cost Estimate for each phase of the design. This estimate must include detailed line items and a narrative for each cost item.

The cost estimate must always be accompanied by a narrative that identifies the source and explains the method applied for the cost analysis, which will be dated, along with the name and signature of the professional who prepared the cost estimate, indicating the corresponding design phase.

The Contractor will submit two (2) originals and two (2) copies of the Cost Estimate for each phase, as required and without exceeding the budget allocated for the design and construction of Puerto Rico's New Trauma Hospital.

e. Design Work Schedule and Proposed Construction Schedule

The Design-Builder shall prepare and maintain a work schedule for design development. Design and construction activities shall be performed within the timeframe and dates established in the Notice to Proceed issued by ASEM. The Design-Builder shall update the work schedule approved by ASEM's authorized representative and distribute it at the initial design meeting. The schedule shall be provided in hard copy and in digital formats compatible with Microsoft Project and PDF. It shall identify all project activities and include the start and finish dates for each activity. The Designer and Project Team shall use the schedule to monitor compliance with all design milestones. The Design-Builder shall update the schedule at each design phase, submit periodic performance reports, and obtain review and approval from ASEM's authorized representative. Any deviation from the approved design schedule shall be explained in detail, including the cause, schedule impact, and corrective actions required to maintain the approved delivery dates.

The Design-Builder shall also prepare a work schedule for all construction-phase activities.

The Design-Builder shall provide and maintain a CPM schedule identifying the critical path, design milestones, ASEM review periods of at least 30 days per milestone, permit milestones, construction milestones, commissioning milestones, monthly updates, risk analysis, schedule narrative, and final turnover milestones. Schedule delays or impacts arising from design deficiencies, coordination issues, procurement choices, construction inefficiencies, or failure to maintain required operational continuity shall be the responsibility of the Design-Builder unless otherwise approved by ASEM.

The design documents should identify the requirements and conditions governing construction activities to minimize disruption to operations near the project area. The Design-Builder shall develop a phased construction schedule showing material delivery dates, long-lead items, and the sequence of work.

The Design-Builder shall submit a detailed Operational Continuity Plan and Construction Phasing Plan to ensure that the Medical Center remains fully operational throughout construction. Under no circumstances shall construction activities impede emergency vehicle access, trauma response routes, sterile workflows, clinical operations, or critical care functions. The plans shall address work zones, temporary barriers, patient and staff circulation, temporary facilities, utility shutdowns, phasing

sequence, infection control measures, and coordination with ASEM operations.

The design documents shall include a specific work sequence coordinated with the Project Team and shall address applicable requirements, including safety, pedestrian and vehicular traffic flow, weather-related considerations, and closure procedures.

The design documents shall also identify all special coordination required for utility connections, utility interruptions, and project-related closures.

f. Submittal Log

The Contractor shall include a Submittal Log in the design documents identifying the applicable general conditions, specification section number and title, and required submittal type, including material data, product data, test results, calculations, and similar documentation. The Submittal Log shall compile the project's required submittals and serve as a construction-phase reference tool.

The Submittal Log shall be provided to the Design Builder before the pre-construction meeting. Submission deadlines shall be established and approved by the affected parties during that meeting.

g. Technical Specifications

The Contractor shall provide technical specifications in accordance with the Construction Specifications Institute Master Format standard for each discipline.

The technical specifications shall be certified (signed and sealed) by the professional in all updates, as applicable.

The content of the technical specifications includes, but is not limited to:

a. Cover page containing the seal and signature of the professional, as applicable to the discipline, and the name and address of the Designer;

b. Table of contents;

c. Individual sections on each piece of equipment, product, material, and system;

d. Identification of equipment, material, and product data;

e. Installation instructions;

f. Operating instructions;

g. Maintenance instructions; and

h. Warranty terms and details;

h. Design Calculation and Analysis Booklet

The Contractor shall provide a bill of quantities for each discipline (architecture and engineering) and update it at each phase of the design, as applicable.

a. Civil: Site description and analysis, including geotechnical properties, building layout and other infrastructure (e.g., roads, access roads, and fences), design references, including codes, regulations, design guidelines, publications, etc., site utility systems, including potable water, sewer system, stormwater drainage system, natural gas, electricity, fire protection systems, mechanical systems, telecommunications, etc., and a site inspection report.

b. Architectural: Architectural design, revise building space layout and functional analysis (Functional Area Matrix), revise architectural space calculations, revise safety code analysis, hazard narrative, and design strategy based on the findings of an ASEM (Assessment of Hazards and Evidence) providing hazard and risk analysis.

c. Landscape: Preliminary landscape design, preliminary planting plans, and planting sizes and quantities.

d. Structural: Analysis of the structural design, including but not limited to design references, including codes, regulations, design guides, publications, and load analyses and calculations.

e. Mechanical: Analysis of the mechanical design, including but not limited to design references, including codes, regulations, design guides, publications, design data and calculations used to determine the overall heat transmission coefficients for building elements and roofs, load calculations, ventilation and extraction requirements, including indoor air quality calculations, plumbing fixtures (hot water, cold water, and sewage), roof drainage calculations, etc.

f. Electrical: Analysis of electrical design, design of security systems for access control infrastructure, alarms, and CCTV as needed,

telecommunications infrastructure, and data networks, including but not limited to: design references, including codes, regulations, design guides, and publications; risk analysis of building lighting protection; preliminary load calculations and code analysis; sizing of emergency power generators; building lighting calculations; conduit and cable types; and equipment manufacturer data. g. Fire Prevention System: Analysis of the fire prevention system design, including but not limited to design references, including codes, regulations, design guides, publications, analyses, and calculations

i. General Design Requirements

1. The funds allocated for the construction project come from a grant awarded to ASEM by CDBG-MIT under its Infrastructure and Healthcare Set-Aside Program. Therefore, the Contractor must incorporate into the design all applicable federal and state regulations regarding construction projects, including but not limited to: the Davis-Bacon and Related Acts, the American Disability Act (ADA), the Architectural Barrier Act (ABA), the Energy Conservation Act, the Clean Air Act, the Federal Water Pollution Control Act, the Clean Water Act, and the regulations of the Environmental Protection Agency (EPA) and the State Historic Preservation Office (SHPO), among other provisions.

2. The Design-Builder acknowledges that no choice-limiting action prohibited by 24 CFR §58.22 may occur prior to environmental clearance and issuance of the Authority to Use Grant Funds (AUGF). Although AUGF is expected to be issued before execution of the contract resulting from this RFP, if AUGF has not been approved at the time of contract execution, the Design-Builder shall not initiate, undertake, authorize, or commit HUD or non-HUD funds to any activity that would constitute a choice-limiting action under 24 CFR §58.22, including any activity that may have an adverse environmental impact or limit the choice of reasonable alternatives, until HUD or the State has approved the applicable Request for Release of Funds and certification and AUGF has been issued. No commitment of HUD funds shall occur before environmental clearance authorization.

3. The Design-Builder shall be responsible for identifying whether any Design-Builder-initiated change, design modification, construction means or methods, field condition, permitting requirement, or other project development creates. requiring environmental reevaluation or revision to the Environmental Review Record (ERR) or Authority to

Use Grant Funds (after AUGF). If issuance, ASEM shall determine whether reevaluation or revision is required, and the Design-Builder shall prepare the reevaluation documentation, make all required revisions or additions to the ERR, provide all supporting studies, technical analyses, maps, drawings, certifications, and documentation necessary to support the reevaluation, and coordinate with ASEM and PRDOH for review, submittal, and approval of any reevaluation or revision to the ERR and/or AUGF. The Design-Builder shall not proceed with any activity affected by the reevaluation, including any activity that may constitute a choice-limiting action under 24 CFR §58.22, until the required reevaluation or revision has been reviewed and approved by the appropriate authority and any required revised AUGF or environmental clearance authorization has been issued. All costs, schedule impacts, technical support, and design or construction required for such reevaluation. Design modifications resulting from Design-Builder-initiated changes or conditions requiring reevaluation shall be the responsibility of the Design-Builder and shall be performed at no additional cost unless otherwise approved in writing by ASEM.

4. The Design must include all Architectural, Civil, Structural, Mechanical, Electrical, Plumbing, Life Safety, FF&E design, drawings and specifications as well as any other required for a fully operational and fully permissible building.

5. It shall be the Contractor's responsibility to provide, as part of the design, the artwork for the project sign, as required by the Joint Permit Regulations, and the sign itself, as required by the Signage Manual in effect at the time of the final design submission, including signs required by OSHA, among others.

6. All plans, technical specifications, cost estimates, reports, computer logs, endorsement requests and permits, and proposed work schedules for the project shall be duly certified and signed by the authorized professional in accordance with their profession or specialty.

7. As part of the content of the plans, the Contractor shall clearly and precisely identify the vegetation area, pavement, traffic, emergency zones, areas affected by changes in ground level, and infrastructure of the areas located within a 20-foot radius following the boundary of the project development area, according to the design.

8. The Designer shall make all necessary corrections at no cost to ASEM when their design documents (plans, specifications, or other elements) contain errors, deficiencies, or shortcomings. It is understood that the Designer shall, without additional compensation, correct or revise any errors or deficiencies in their designs, plans, specifications, and other related services.

9. The Designer's services must be reasonably accurate and free from material errors or omissions.

10. ASEM will review the Designer's documentation at the end of each design phase. ASEM's comments or decisions regarding the documentation review will be communicated to the Designer as soon as possible. ASEM will notify the Designer in writing of any errors, omissions, or other material defects in the design, or any conflicts in the contractual documentation of which it becomes aware but will not be obligated to investigate whether such errors, defects, or conflicts exist.

11. ASEM's authorized representative will review each error or omission with the Designer and determine the actual amount of damage, if any, resulting from each negligent act, error, or omission.

12. The Design-Builder shall comply with the intellectual property ownership, use, delivery, and indemnification requirements established by the ASEM.

13. The term Intellectual Property refers to all proprietary and other rights in: (i) trademarks, service marks, registered trademarks, certification marks, trade dress, trade names, business names, and other indications of origin; (ii) patents, inventors' certificates, and disclosures of inventions; (iii) trade secrets and other non-public or confidential business information, including ideas, formulas, compositions, inventions, discoveries and improvements, know-how, manufacturing and production processes and techniques, and research and development information (patentable or not); drawings, specifications, designs, plans, proposals, and technical data; and financial information, pricing and cost information, business and marketing plans, and customer and supplier information and lists; (iv) writings and other works of authorship, whether or not protectable by copyright, including computer programs, databases, and related documentation, and all copyrights in any of the foregoing; (v) job identification masks; (vi) rights, titles, and interests in and to technical know-how, technical

information, processes, practices, and systems, whether or not protected by patents, copyrights, or trade secret laws; (vii) moral rights; (viii) rights to limit the use or disclosure of Confidential Information by any person; (ix) any intellectual property or similar proprietary rights, tangible or intangible, information, and technology; (x) registrations and applications for registration of any of the foregoing with any governmental agency or authority, as well as any renewals or extensions thereof; (xi) the goodwill associated with each of the foregoing; and (xii) any claim or cause of action arising from any infringement or misappropriation of any of the foregoing.

14. The Design-Builder acknowledges that all documents, writings, recommendations, and/or reports produced as part of the contract are to be awarded as a result of this Request for Proposals process will be the exclusive intellectual property of ASEM. All materials, products, documents, or information, as well as applications, programming, and/or any other products developed and/or derived from the contracted services, will be the property of ASEM. It is expressly agreed that all property, code, source code, research, studies, designs, photographs, and/or material created and/or recognized as intellectual property under the laws of the United States of America and Puerto Rico, regardless of the medium in which it is presented, will become the property of ASEM, which is authorized to reproduce it without being obligated to pay the Designer any additional compensation for such production and/or rights thereto, beyond the compensation stipulated in the contract.

15. All products and/or results of services provided (the "Work") as a result of this Request for Proposals process will be for the exclusive benefit of ASEM. The Design-Builder acknowledges and agrees that the work (and all rights therein, including, but not limited to, copyrights, patents, intellectual property rights, and trademarks) shall be the exclusive and perpetual property of ASEM. Notwithstanding the foregoing, the Design-Builder also assigns and transfers to ASEM all rights, titles, and interests in and to the copyrights, trademarks, patents, and intellectual property rights in the work; all copyright registrations and applications relating thereto, as well as all renewals and extensions thereof; and all works based upon, derived from, or incorporating the work. All present and future income, royalties, damages, claims, and payments related thereto, as well as all legal actions, both at law and in equity, for past, present, and future damages, including, but not limited to, future damages related to intellectual property; and all rights in and to the

design worldwide. The Design-Builder undertakes to take all necessary steps to ensure that ASEM and/or its authorized representative retain the rights assigned, as set forth.

16. The Design-Builder shall deliver and return to ASEM all documents, files, reports, materials, programs, and/or applications ("the Materials") delivered, produced, and/or in their possession as a result of the contractual relationship with ASEM, as soon as their tasks are completed, when required, and/or upon termination of the contractual relationship, as applicable in each case. ASEM shall have the right to unrestricted and unlimited use of such Materials. If the contract is terminated and/or rescinded before the expiration date stipulated therein, the delivery of the materials shall be made immediately upon such notification and within a maximum period of fifteen (15) days from the date of notification.

17. The Designer shall be responsible for the professional quality, technical accuracy, and coordination of all designs, drawings, specifications, and other services provided by the Designer. In this regard,

    a. Neither the ASEM's review, approval, or acceptance, nor payment by ASEM for services rendered under this contract, shall be construed as a waiver of any right or cause of action arising from the performance of the contract, and the Contractor shall be and shall remain liable to the ASEM under applicable law for all damages to the ASEM caused by the Contractor's negligent performance of any of the services rendered under this contract.

    b. The Government's rights and remedies provided in this contract are in addition to any other rights and remedies provided by law.

13. The Design-Builder will deliver to the ASEM's Project Team the design drawings, technical specifications, BIM models, BIM-related files, coordination reports, clash detection reports, model review comments, model issue logs, model exports, structured asset data, and all supplementary information required for the Scope of Work. The drawings will be delivered in two (2) sets of printed sheets, 24" x 36", and digitally in the file formats ".dwg" (native file format for AutoCAD) and ".pdf" (Adobe Portable Document Format). BIM deliverables shall be provided in native model formats, federated coordination model formats, and nonproprietary/interoperable exchange formats as required by ASEM, together with all related

reports, schedules, logs, and supporting documentation necessary to review, coordinate, approve, operate, and maintain the Project. The specifications, calculation books, reports, BIM-related reports, coordination documentation, and results will be delivered in one (1) original and one (1) copy, 8-1/2" x 11", and digitally in the file formats ".doc" (native file format for Word), ".pdf" (Adobe Portable Document Format), and other electronic formats required by ASEM for BIM files, models, and related project data.

14. For the corresponding approval, the Design-Builder will submit to ASEM's authorized representative complete documents, as required at each phase of the design. Failure to submit all documents will result in the design being considered incomplete, and payment for services rendered will not be processed until all documents are submitted.

15. The Designer will provide all labor, equipment, and materials necessary for the development and delivery of the design in accordance with applicable laws, codes, guidelines, manuals, and regulations.

16. Architectural, Logistics and Biomedical Program

    a. Two (2) Hybrid Operating Rooms: the First-Floor design (Sheet A-1.2) shall mandatorily incorporate two (2) contiguous Hybrid Operating Rooms, each with a minimum clear area of 650 to 800 sq. ft., sharing a single Centralized Technical Control Room (150–200 sq. ft.). Both rooms shall include perimeter lead radiological shielding (1/16" to 1/8") and structurally reinforced slab beams capable of supporting CT scanners or robotic arms weighing up to 3 tons.

    b. Strategic Third-Floor Connection: an elevated physical connector door and bridge-type corridor shall be designed on the Third Level (Sheet A-1.4) to directly and quickly link the new trauma tower with the ASEM Central Building (Buildings A1/A9), providing exclusive access to the Blood Bank and the Central Clinical Laboratories.

    c. Trauma Elevators with Priority Access Control: the elevators assigned to the vertical route from the rooftop Helipad to the operating rooms shall be equipped with restricted access-control systems using a card reader and a medical override key (Trauma Override Key). Its activation shall instantly

cancel ordinary calls and initiate a direct express trip for critical patients.

d. Medical Reconversion of the Cafeteria (Basement): the walls of the cafeteria located in the basement (Sheet A-1.1) shall include concealed, flush-mounted medical oxygen, medical air, and vacuum outlets, protected by independent zone valve boxes, to enable the immediate reconversion of the space into a mass triage and stabilization area during extreme emergencies.

17. In terms of utilities, a backup design with N+1 redundancy will be required for the electrical system, which must include, in an integrated manner: the direct line from substation 1359, the microgrid network, and the hospital's internal generators.

18. Electrical Infrastructure and Hybrid Redundancy (N+1)

The hospital's electrical design must include a redundant hybrid configuration comprised of:

a. A new dedicated 38 kV to 13.2 kV / 480V substation of the isolated type, independent from the campus's ordinary grid.

b. A secondary underground service feed automatically connected to Medical Center Substation 1359 by means of a medium-voltage automatic transfer switch (ATS).

c. A microgrid with a large-scale Battery Energy Storage System (BESS) functioning as a centralized UPS with zero (0) millisecond response time to stabilize power and back up life-safety loads. (Verify facilities – Micro Grid Project Assessment – Municipality of San Juan).

d. A plant of paralleled internal emergency generators (minimum of three 2,000 kW units at 480V) installed within a Category 5 hurricane-rated building per the site plan, equipped with a double-wall underground diesel tank providing minimum autonomy of 96 hours of continuous operation.

The main MCC located in the basement shall include reserve physical cells equipped with molded-case circuit breakers (MCCB) and quick-connect Cam-Lok type terminals (suggested), dedicated to the safe

interconnection of portable chillers or rental emergency generators, in compliance with NEC Article 702.

19. The hospital's mechanical system must have the same level of backup and N+1 redundancy established for the electrical system.

20. HVAC and Critical Hygrothermal Control

    a. Air Handling Units (AHUs) dedicated exclusively to critical areas (Operating Rooms, the Intensive Care and Recovery Unit, and the Burn Unit) shall be manufactured with a dual internal coil design. The primary coil shall operate on the central Chilled Water system, and the secondary coil shall operate on an independent Direct Expansion (DX / refrigerant) system connected to wind-protected rooftop condensing units, configured to start automatically via the BMS in the event of a chilled-water supply failure.

    b. The HVAC system shall be sized to maintain (in both regular and DX emergency mode) a fixed temperature continuously and uninterruptedly between 65°F and 70°F, with relative humidity strictly controlled between 30% and 55% RH, mitigating condensation-related microbiological infection risk in accordance with ASHRAE 170.

    c. All AHU fan motors, hydraulic pumps, and compressors shall use Variable Frequency Drives (VFDs) controlled by static pressure, temperature, and humidity sensors and transmitters calibrated directly to the Building Management System (BMS).

    d. The main chilled-water loop in the basement shall include a high-pressure bypass "pot feeder" chemical feed system, appropriately sized for the system, for predictive anti-corrosion water treatment without system shutdowns.

    e. Installation of industrial piezoelectric accelerometers (vibration sensors) is mandatory on the motor housing and gearboxes of the rooftop cooling towers (Sheet A-1.12), connected to the BMS with automatic vibration trip switches to prevent structure-borne noise transmission to the ICU below.

21. Automated Pneumatic Tube Logistics (PTS)

a. Interconnected Pneumatic Network: the Contractor shall design and install a 6" nominal diameter High-Speed Computerized Pneumatic Tube System (PTS) network connecting the new hospital with the ASEM Central Building via the Third-Level bridge. The system shall guarantee a transit time of 30 to 45 seconds for biological samples, plasma, and medications.

b. Tracking Technology and Impact Control: sending and receiving stations shall include touchscreen interfaces, RFID tracking technology on hermetically sealed carriers, and VFD-controlled soft, air-cushion deceleration systems to prevent hemolysis of blood samples in the laboratories.

c. Quality Standard and Reference Brands: PTS engineering shall be based on medical-grade systems from Swisslog Healthcare, Pevco, or Bionuclear de Puerto Rico (Smart Tech Division – Sumetzberger System), or an exact technical equivalent approved by the Owner that demonstrates local, island-based technical support 24 hours a day, 7 days a week (24/7).

22. Flood Protection and Plumbing

a. Stormwater Backwater (Back Check) Valve: the hospital's main stormwater drainage system shall incorporate a stormwater backwater valve with a hinged flap and hermetic neoprene seal prior to discharge into the public street, installed within an exterior inspection manhole per the site plan (Sheet AS 1.1), to prevent surcharging of the external network from flooding the basement.

b. Basement Storm Sump Pit: construction is mandated of a waterproofed concrete sump pit within the basement foundation slab (Sheet A-1.1), equipped with a duplex (N+1) automatic-alternation submersible pump system (storm pumps) connected to the emergency electrical network and monitored by the BMS, to evacuate any flooding or groundwater infiltration toward the street.

c. Potable Water Cistern Capacity: the preliminary 60,000-gallon graphic configuration is rejected. The Proposer shall redesign the basement technical area to expand the potable water cisterns to a minimum capacity of 150,000 gallons, ensuring the consumption autonomy required for expanded operation during disasters.

23. Life-Safety and Monitoring Systems

    a. Critical 24/7 Utility Annunciator Panels: installation is required of visual and audible remote annunciator panels, in accordance with NFPA 99, flush-mounted in an operational area staffed 100% of the time – either the ICU Central Nursing Station (Second Floor) or the Disaster Control Center (Ninth Floor). This panel shall reflect, in real time and by means of audible alarms, the critical status of medical gases, generator diesel levels, BMS alarms, and substation status.

    b. Redundant Ring Fire Alarm Interconnection: the new trauma tower's Fire Alarm Control Panel (FACP) shall connect to the existing Central Building's panel by means of a redundant Class A / Style 7 certified fiber-optic ring network (NFPA 72), ensuring that both buildings communicate instantaneously, coordinate zoned voice-evacuation systems, and trigger automatic closure of fire doors in the interconnecting corridors.

24. As part of the design, a note will be included indicating that all materials, including fixtures, equipment, debris, trash and all waste generated as part of the development of the design and construction must be collected and deposited in garbage containers. Making your provision in compliance with the provisions of the corresponding laws and regulations; for what that the accumulation and storage of these outside the containers is not allowed. The frequency of removal debris will be identified in the design specification.

25. If a waste container is required, its location must be shown on the site plan in an area approved by the ASEM's Project Team in a fenced and enclosed construction area.

26. The Designer will identify all barriers and measures, as required, that will be implemented to protect equipment, materials, and personnel.

This is for the purpose of providing safety during all demolition, removal, and construction work, among others.

27. In cases where the Scope of Work and the applicable Design Code conflict, the Design Code shall prevail. In cases where the Design Code and Safety conflict, the Contractor shall immediately inform and consult with the ASEM's Project Manager and ASEM's authorized representative for guidance.

28. Regarding the documents that comprise each phase of the design, they must be clear, legible, and in the required format. In addition, (1) it must be ensured that the edges of the drawing sheets are uniform across all disciplines, (2) that the orientation of the structure is the same, (3) that all symbols and abbreviations are consistent in their use, and (4) that the text scales are the same.

    The documents must: (1) maintain a clear and easily understood structure, (2) establish cross-references, and (3) the sheets identified by discipline (mechanical, fire prevention, plumbing, electrical, civil, structural, among others) are consistent with the architectural drawings.

29. The Contractor shall be responsible for:

    a. Conducting a thorough review of all documents for each phase of the design process prior to their submission to ASEM. This review shall be the responsibility of the Contractor, who shall also be responsible for identifying and resolving any conflicts among the design documents;

    b. Ensuring that all disciplines comply with the required format and are coordinated with each other; and

    c. Ensuring that its consultants meet the requirements established by ASEM for the execution of the contracted service.

j. Design Phases

The purpose of this section is to establish the minimum deliverables required by the Design-Builder during all phases of the project design, ensuring that the technical information is sufficient, verifiable and compliant with ASEM requirements.

The design phase will include preliminary studies, conceptual development, architectural and engineering design, multidisciplinary coordination, production of final buildable drawings and specifications, and documentation required for permits.

i. Schematic Design

The design must include, among others, the following disciplines: architecture, landscape architecture, civil engineering (including geotechnical and structural engineering), fire protection systems, electrical engineering (including communications), and mechanical engineering. All documents submitted by the Contractor must be signed and stamped by the corresponding professional.

This phase will include, at a minimum, the following:

1. Project statement of understanding.
2. Site analysis, constraints, and opportunities. Initial studies (site, topography, surveying, etc.).
3. Spatial, functional, volume, and circulation diagrams.
4. Preliminary definition and integration of structural and MEP systems.
5. Report on compliance with applicable codes and regulations.
6. Project risk identification (Design-Build).
7. Meeting: After the presentation of the preliminary design package and once ASEM has completed its evaluation, a meeting will be held to discuss the documents corresponding to the preliminary phase.
8. Schedule: Submit an updated schedule of design services and the development of the construction project schedule.
9. Submittal Log: Provide a list of the materials and equipment required according to the design, based on the information established in the presented phase.
10. Cost Estimate: The Contractor must provide a cost estimate breakdown by discipline.

11. Report on studies and research

12. Technical Specifications: All specified products, materials, systems, and equipment will have a corresponding technical specification for the design.

13. Analysis and calculation book: The Contractor shall submit an analysis and calculation book considering each discipline, according to the content of the design.

14. Environmental Compliance: The Contractor shall be responsible for preparing, filing, and monitoring all documents required by the Puerto Rico Department of Natural Resources' Environmental Compliance process and any other applicable regulatory entities.

15. Drawings (floor plan, elevations and sections): The drawings must be sufficiently detailed and include all relevant information to adequately represent the basic design characteristics. Drawings for all disciplines at this stage shall emphasize the structural layout, as specified in the architectural design.

    a. Site plan includes the following:

        i. Property boundaries, streets, and general areas surrounding the site, including bodies of water, etc.;

        ii. Baseline and location of proposed facilities;

        iii. Levels of original and proposed finish within the construction area, either by point elevations or contour lines. However, there must be a sufficient number of contour intervals to adequately show the concept and extent of the proposed leveling for the project. Outside the construction area, sufficient data must be provided to show the general topography in relation to the proposed construction works;

        iv. Cut and fill profiles;

        v. Elevations of floor finishes;

        vi. Existing and proposed sites support elements, such as rigid and flexible pavement (i.e.,

sidewalks, parking, driveways including curbs, fences, etc.);

vii. Location of existing and proposed utility lines, including potable water, sanitary sewer, stormwater drainage, telecommunications, data, electricity, and connections to existing utility systems, etc.;

viii. Area reserved for construction (disturbance limits), proposed area for building expansion, including future proposed projects adjacent to the site, parking, etc.;

ix. Show the actual designed quantities of grading and seeding, paving and perimeter, utility extensions, roads, sidewalks, and curbs;

x. Location of historical, archaeological, or environmentally sensitive areas on and near the site that may be impacted as part of the construction project; and

xi. Existing access to and from the parcel that will be affected by the project and proposed access to and from the parcel that will be served by the project.

b. Floor plans, sections, and elevations, including:

i. Plan(s) with overall dimensions and dimensions of each area, showing the functional use of each;

ii. Built area;

iii. Schedule of finishes for the areas;

iv. Relationship between masses, heights, architectural treatment, and use of materials from at least two (2) viewpoints that provide as much information as possible about the proposed design;

v. Typical section(s) showing foundations, floor systems, construction elements, structural treatments, structural support, and roofing

system, including floor-to-ceiling heights and/or showing the roof structure and any height difference with respect to the floor level; and

vi. Any special features.

c. Building utility plan that includes the numbering of the spaces and their use, showing each utility and its connections through a diagram.

d. Ventilation system designed for the more efficient, effective, and consistent management of toxic or harmful gases that could affect human health and the environment.

e. Electrical lighting system, showing the number and type (program) of proposed lighting fixtures, and the locations of electrical/telephone/data outlets.

f. Interior design. The Interior Contractor must determine the desired finishing materials based on aesthetic qualities, durability, and maintenance. This must be clearly shown in plans, sections, finishes schedules, notes, 3D renderings, materials lists, and any other materials that illustrate the design intent.

ii. Design Development

The Designer will proceed with the design development, increasing the level of detail and information in the documents, once ASEM's approval is received. These documents will, in turn, incorporate ASEM's resolutions and decisions from schematic design.

The Designer develops the design with sufficient detail and information for the permitting process and technical coordination.

This phase will include, at a minimum, the following:

1. Meetings: After the presentation of the conceptual design package and once ASEM has completed its evaluation, a meeting will be held to discuss the documents corresponding to the delivery of the conceptual phase.

2. Schedules: Submit the updated design services schedule and the construction project schedule.

3. Submittal Log: Submit the updated list of materials and equipment required for the design, in accordance with the information established in the previous phase.

4. Technical Specifications: All specified products, materials, systems, and equipment shall have a corresponding technical specification for the design.

5. Cost Estimate: Submit an updated cost estimate breakdown by discipline.

6. Analysis and calculation book: Update the analysis and calculation book considering each discipline according to the design content.

7. Permits and Endorsements: The Contractor shall submit a pre-consultation request to the relevant agencies or entities. The Contractor shall also develop and submit the applicable endorsements and permits to all agencies or entities of the Government of Puerto Rico.

8. Drawings (advanced 30%-60%): includes but is not limited to location map, site plan, floor plan, elevation, sections, construction details, interior design, fire protection, building utility plan and other elements necessary to understand the project.

9. BIM models are coordinated at the Design Development level.

10. Complete structural and MEP criteria.

11. Regulatory compliance review

iii. Construction Documents

The Designer will develop the final design for the project which will incorporate ASEM's resolutions and decisions from Design Development.

The Designer is responsible for completing the design for construction and coordinating the phases of the work.

This phase will include, at a minimum, the following:

1. Meetings: After the presentation of the advanced design package and once ASEM has completed its evaluation, a meeting will be held to discuss the documents corresponding to the delivery of the advanced phase.

2. Schedules: Submit the updated design services schedule and the construction project schedule.

3. Submittal Log: Submit the updated list of materials and equipment required for the design, according to the information established in the submitted phase.

4. Technical Specifications: Provide the updated technical specifications for all products, materials, systems, and equipment specified in the design.

5. Cost Estimate: Submit the updated cost estimate breakdown by discipline.

6. Analysis and Calculation Book: Update the analysis and calculation book, considering each discipline, according to the design content.

7. Permits: Updated documents for final permits. The Contractor must prepare and submit the application for the Construction Permit to the OGPe.

8. Drawings: The Contractor shall submit final and complete drawings separated into sections titled by architectural and engineering discipline. The drawings shall include the necessary plans, elevations, sections, and notes, containing sufficient detail to ensure:

    a. Complete construction of all project elements, including exterior support facilities;

    b. Coordination of drawings and specifications to eliminate omissions, conflicts, or ambiguities;

    c. Finalization of details in the specifications; and

    d. Clear and consistent interpretation of the project scope and complexity.

9. Fully coordinated BIM model.

10. Development of the project's Quality Plan

11. Design Professional Certification - certification of a licensed design professional stating that the project design or redesign meets a nationally recognized design and performance standard applicable to the project, including, if applicable, criteria recognized by FEMA for a project of its type, pursuant to FEMA's Hazard Mitigation Assistance Guidance and Hazard Mitigation Assistance Guidance Addendum.

III. STUDY

The Contractor is responsible for conducting and providing all studies, analyses, and technical documentation necessary to support the design, planning, and construction process under the Design-Build model, ensuring that the contractor has accurate, verifiable, and sufficient information to develop the design and execute the project, including but not limited to:

1. Topographic Survey (Detailed survey of the land and existing structures; and contour lines, property lines, easements, access points, nearby infrastructure)

2. Existing Infrastructure Study (Service conditions: water, electricity, telecommunications, drainage, sewage; available capacity vs. project requirements; evaluation of underground infrastructure; and verification of subsurface utilities, structures, voids, obstructions, and potential conflicts through underground penetrating sonar, ground penetrating radar, or other non-destructive subsurface investigation methods, as applicable.

3. Utilities Clearance: The Design-Builder will be responsible for executing all activities necessary to ensure that existing utilities are properly located, documented, secured, coordinated, and, if necessary, rerouted or relocated, in accordance with the requirements of the ASEM and service entities.

    a. Gather and review existing plans, record drawings, as-built drawings, GIS, and any other available documentation.

    b. Request official information from AAA, AEE/LUMA, telecommunications companies, gas providers, sewer providers, fiber optic providers, and institutional systems providers (medical gases, drainage, pipelines).

    c. Prepare an initial Utility Inventory Report consolidating all the information gathered.

    d. Perform location services using GPR, electromagnetic locating, and other approved methods.

    e. Conduct potholing/test pits when required to confirm depth and condition.

f. Physically mark utilities in the field using paint, flags, and stakes.

g. Document findings with photographic and georeferenced evidence.

h. Validate the depth, diameter, material, condition, and functionality of each utility.

i. Identify conflicts with excavations, foundations, pipeline routes, ducts, and temporary and permanent structures.

j. Prepare a Utility Conflict Matrix with severity classification and mitigation recommendations.

k. Formally notify each service provider of findings and potential impacts.

l. Coordinate joint inspections when required.

m. Obtain permits, approvals, letters of no objection, or official instructions.

n. Schedule temporary outages, diversions, or protections according to each provider's guidelines.

o. Design and implement temporary protection for exposed or vulnerable utilities.

p. Develop preliminary and final designs for rerouting or relocation.

q. Perform relocation work according to each supplier's technical standards.

r. Conduct pressure, continuity, and integrity tests, and perform post-installation certifications.

s. Implement OSHA protocols for excavation, utility handling, and work in proximity to critical infrastructure.

t. Comply with NFPA 70, NFPA 99, EPA, OGPe, and other applicable standards.

u. Develop a Utility Emergency Response Plan for incidents involving critical utilities.

v. Train personnel in "Call Before You Dig" procedures.

w. The Design-Builder must submit the Utility Clearance Report, including:

   i. Final utility inventory.

   ii. Updated as-found drawings.

   iii. Conflict and mitigation matrix.

   iv. Photographic and georeferenced evidence.

   v. Service provider certifications.

   vi. Updated design drawings incorporating all findings.

   vii. Final post-relocation as-built drawings, when applicable.

x. The Utilities Clearance will be considered complete when:

   i. All utilities have been located, verified, and documented.

   ii. All identified conflicts have been resolved.

   iii. The ASEM has received certifications from each utility provider.

   iv. The design plans accurately reflect the site's condition

4. Traffic and Accessibility Studies (Impact of the project on vehicle and pedestrian flow; recommendations for geometric design and signage)

5. Analysis of site access, easements and restrictions

6. Risk and Safety Assessment (Identification of natural hazards (floods, seismicity); safety conditions of the surrounding area; and recommendations for mitigation)

7. Hydrological and Hydraulic (H-H) Study

a. The Contractor shall submit a detailed H-H study comparing the existing conditions with the proposed conditions and the effect of the proposed work on the hydraulic condition of the area. This study shall comply with applicable regulations. The H-H study report must be complete before proceeding to the Design Development (60%) design phase. Therefore, its submission will form part of the Schematic (30%) design documentation.

b. The precipitation depth values required for the hydrological analysis shall be obtained from NOAA Atlas 14.

c. The Contractor shall submit a scour study explaining the parameters used to calculate it, as well as the study's conclusions and recommendations. It should also consider the existing conditions and compare them with the effect of the proposed scour or erosion control measures. The scour study shall be conducted in accordance with the latest version of applicable regulations, standards, and guidelines. The study includes, but is not limited to, recommendations on:

   i. Removal or relocation of utilities in areas of significant improvement, as applicable;

   ii. Trench reconstruction/reconditioning areas where significant improvements are recommended, as applicable; and

   iii. Other safety improvements, such as rumble strips, safety edges, high-friction surface treatment, and others, as applicable

8. <u>Report on applicable regulations for design and permits</u>

Each study must include: (1) Methodology used; (2) Findings and data collected; (3) Plans, maps, models, or test results; (4) Certified laboratory results; (5) Georeferenced photos; (6) Comprehensive summary for the design-build team and ASEM; (7) Clear risk matrix and recommendations; and (8) Technical conclusions.

All studies must comply with the following requirements: (1) Puerto Rico building codes; (2) Local and federal environmental regulations; (3) Applicable ASTM standards; and (4) Geotechnical, surveying, and safety regulations

Designer or Consultant Responsibilities: (1) Coordinate permits and access for conducting studies; (2) Comply with all applicable technical

standards; (3) Integrate with the Design-Build team for consultations, reviews, and clarifications; and (4) Assist in technical meetings and preliminary design reviews.

IV. ENDORSEMENT & PERMITS

1. The Contractor shall provide plans, calculations, and detailed documentation for architecture, civil works, plumbing, mechanical, fire protection, electrical, and other documents necessary to obtain all endorsements, permits, and design approvals required for the construction of the project. This includes, but is not limited to, the development of plans, reports, studies, analyses, certification of compliance with codes and design guidelines, certification of graphic file and map, certification of the project designer and specialist, among others, as required by the relevant entity, and shall pay for the processing of these documents.

2. The Contractor shall be responsible for completing all documents required for filing and obtaining the applicable permits and endorsements for the development of the design and its construction. This includes, but is not limited to, the required payments and documents necessary to carry out the work.

3. The Contractor shall be responsible for obtaining all necessary state endorsements, permits, and approvals for the project, including but not limited to:

    a. Environmental Recommendation (REA)

    b. Determination of Environmental Compliance (DEA)

    c. Consultation on monetary compensation for tree planting mitigation

    d. Construction Consultation

    e. Consultations with: Puerto Rico Electric Power Authority (PREPA), LUMA, Puerto Rico Aqueduct and Sewer Authority (PRASA), Telecommunications Regulatory Board (TRB), Department of Transportation and Public Works (DTOP), Puerto Rico Highways and Transportation Authority (PRHTA), Department of Health, Fire Department, Institute of Puerto Rican Culture (ICP), and Municipality of San Juan

    f. ICP (Phase IA – IB)

    g. Construction Permit

h. Pre-consultations with government entities, as applicable and necessary

i. Reforestation Plan

4. The Contractor shall be responsible for the preparation and submission of (1) a request for prior consultation through the OGPe, (2) review of the Reforestation Plan, (3) Environmental Assessment (Law No. 416-2004), and (4) any other as required by the corresponding agencies or entities.

5. The Contractor is responsible for the mandatory process with the Federal Aviation Administration (FAA) to obtain its official comments, operational guidelines and regulations for both the existing heliports and the new heliport to be built as part of the Puerto Rico Trauma Hospital; as well as the development of all documents necessary for the management, including coordination with regulatory entities to ensure that all installed systems, equipment, and interfaces meet the performance, safety, and compliance standards established by the Agency.

V. SUPERVISION

1. The Designer is responsible for providing support during construction and providing: (1) responses to RFIs, review and approval of submittals and shop drawings, (2) design updates due to field conditions; (3) engineering adjustments according to changes approved by ASEM; (4) ongoing technical support to the builder; (5) attendance at periodic technical meetings with the project team; and (6) coordination with the project team for adjustments.

2. The Designer is responsible for delivering: (1) updated BIM models as appropriate; (2) operation and maintenance manuals; (3) regulatory compliance and final inspection certifications; and (4) closure documentation.

3. The Designer, consultants, and subconsultants will attend the pre-construction meeting and all working meetings during the construction phase, as required by ASEM.

4. The Designer, consultants, and subconsultants will provide supervisory services during the construction phase and will address any critical situations and activities requiring their participation. The required services will include, but are not limited to, field observations necessary to verify the quality and progress of the work, in accordance with the design documents. These personnel will also attend, and chair meetings required by the authorized ASEM's authorized representative to resolve specific situations in the project's development.

5. The Designer, Consultant, and Subconsultant(s) will conduct weekly field inspection and observation visits. These inspection and/or observation visits may be conducted in conjunction with the scheduled work meetings held every two (2) weeks, depending on the progress of the work, during the weeks in which the work meetings are scheduled. The Designer, Consultant, and their Subconsultant(s) must submit a field observation report for each project inspection to the ASEM's authorized representative within three (3) calendar days following their site visit. In addition, they will conduct inspections of key activities, including, but not limited to, the following examples: code inspections, final system testing, achievement of each milestone (required in the work schedule), and at the request of the ASEM's authorized representative. The assignment of a consultant and sub-consultant does not relieve the Designer of their obligation to visit, inspect,

and supervise the development of the project activities during the construction phase.

6. The submittals will be reviewed and approved by the Designer. This includes project schedule, Schedule of Values, equipment and materials, shop drawings, procedures, and material samples, among others. The submittal review process must be carried out at each work progress meeting and will include the Designer, Consultant, Subconsultant, Contractor, Project Manager, and ASEM's authorized representative. The Designer will generate an updated Submittal Log at each work meeting, highlighting the status of all required submittals.

7. The Designer will review the "As-Built" drawings submitted by the Contractor monthly to ensure they are up to date. Any deficiencies will be noted by the Designer on a form agreed upon by all parties. The Designer will acknowledge acceptance of the "As-Built" drawings by signing a submission indicating that they have reviewed them and that they reflect the "As-Built" conditions as they exist. Upon receiving the "As-Built" drawings from the Contractor, the Designer will obtain the original reproducible drawings and transfer the "As-Built" conditions to the signed, full-size, reproducible original drawings to reflect the registration conditions within fourteen (14) calendar days following receipt of the "As-Built" information.

8. The Designer will include the following statement on the original RECORD-SET drawings: "The CONSTRUCTION information added to this drawing(s) has been provided by the Contractor(s). The Designer assumes no responsibility for its accuracy, except for conformity with the design concept and the overall adequacy of the "As-Built" information to the best of the Designer's knowledge and belief."

9. As part of the project closure, the Designer will deliver the reproducible original RECORD-SET drawings to the authorized ASEM's Authorized Representative, who will acknowledge receipt in writing. This set of printed drawings and a digital version in ".dwg" (native file format for AutoCAD) and ".pdf" (Adobe Portable Document Format) file formats will be provided.

10. The Designer shall prepare, maintain, and continuously distribute a rolling list of deficiencies to the Contractor and Project Team throughout the construction phase of the project. This list shall be a separate correspondence from the field observation reports and shall not be considered a checklist.

11. The Designer shall evaluate all requests for changes to the work and provide a detailed, written recommendation for the approval or disapproval of the request, including supporting documentation and all other considerations to corroborate that decision with the ASEM's authorized representative.

12. The Designer will determine if the modifications request requires a review of codes, guides, manuals, and regulations. The Designer must also determine if the modifications request require any modifications to the permits, endorsements, certifications, and authorizations issued for the development of the project.

13. The Designer will review all project closure documents submitted by the Contractor to ensure they meet the design requirements. After approving these documents, the Designer must send them to the Project Team within fourteen (14) calendar days of the approval date. The Designer must also submit a letter certifying that the project was completed in accordance with the contract documents, etc.

14. The Designer must complete all modification request documents and send all corresponding supporting documentation to the Project Team within seven (7) calendar days of receiving the request submitted by the Contractor. If the Project Manager considers the contents of the modification package insufficient, they will request the Designer to submit a complete package at no additional cost.

VI. CONSTRUCTION

This section of the Scope of Work is intended as a guide for the Contractor to understand their general responsibilities during the execution of the project activities considered in the design and does not attempt to identify each specific activity or deliverable required during this phase.

1. It will be the Contractor's responsibility to determine the coordination, policies, and procedures regarding the parking area, its use, services, schedule for the execution of the activities contemplated in the design, the need for and location of portable sanitary units, the need for and location of the work area and storage areas, connection to existing utilities, among others.

2. The Contractor will have to coordinate with ASEM's personnel for technical data necessary for the installation and MEP connections of the specialized medical equipment.

3. The Contractor will have to coordinate with ASEM's personnel and its IT Department for the needs of their telecommunications systems.

4. The Contractor must allow within their processes time and coordination for the ASEM to evaluate material and/or equipment submittals that may affect aesthetics, operation or maintenance of the facilities.

5. The construction is to include all demolition, excavation and backfill necessary to complete the work.

6. Prior to any excavation, trenching, drilling, pile installation, utility connection, demolition affecting below-grade elements, or other subsurface disturbance, the Builder shall perform and document underground penetrating sonar, ground penetrating radar, or other appropriate non-destructive subsurface investigation methods to identify existing utilities, buried structures, voids, abandoned infrastructure, obstructions, and potential conflicts. Findings shall be coordinated with the BIM model, construction phasing plan, utility shutdown plan, and ASEM's authorized representative before proceeding with the affected work.

7. The Contractor is responsible for carrying out all laboratory tests necessary to complete the construction, including, but not limited to, geotechnical/compaction tests and concrete compression (cylindrical) tests.

8. The Medical Center campus and facilities will remain open and operating during the construction period. It is important the project complies with all PROSHA/OSHA as well as Medical Center campus safety and security standards. Proper protection of the construction area as well as adjoining buildings will be required during the construction process to minimize dust and dust as well maintain a safe environment. To reduce adverse environmental impacts the construction area will be isolated and sealed from the road with temporary drywall and plastic partitions. To mitigate dust, continuous irrigation with water will be carried out during construction.

9. Construction waste management will be contractually required to the Contractor and is to be conducted in compliance with Construction Waste Management applicable standards as required by US Environmental Protection Agency. Construction and Demolition Waste Management Plan to be implemented has following goals: (1) Outline at least five materials targeted for diversion, (2) Provide the anticipated % of total waste that these materials will represent, (3) Include on-site diversion strategies, (4) Improve the sustainability of construction practices, from procurement to disposal in order to reduce the amount of waste generated, (5) Divert construction and demolition waste from disposal in landfills and incineration facilities by redirecting recyclable and reusable materials to appropriate management companies, (6) At least 75% of construction and demolition waste (by weight) will be diverted from the landfill. Plan encompasses the following areas: (1) Responsibility of parties, (2) Waste reduction, (3) Recycling and salvage, (4) C&D waste to be diverted, (5) Special Handling Instructions, (6) Submittals, (7) Quality control.

10. All materials, debris, trash, and waste generated as part of the project, among others, will be collected daily and stored in garbage containers for disposal outside the Medical Center premises. Their handling will be in accordance with applicable laws and regulations. The approved location of the garbage containers, vehicle parking, material storage trailers, construction equipment, etc., must be coordinated and approved by ASEM at the pre-construction meeting.

11. It shall be the Contractor's responsibility to keep the work areas clean and free of any materials, equipment, and waste that represent a hazardous situation.

12. The Contractor is responsible for carrying out the corresponding tasks and procedure for the connection of PREPA/LUMA and PRASA, including the payment of the fee.

13. It shall be the Contractor's responsibility to submit submittals and RFI containing all the information necessary for the Designer to evaluate the submittal and RFI.

14. The Contractor shall develop and submit a Maintenance of Traffic (MOT) plan to ASEM, which will be implemented during the construction period. When access roads to the construction area need to be closed, it is the Contractor's responsibility to notify ASEM and all users surrounding the project area at least one (1) week in advance of the event.

15. The Contractor is responsible for Multidisciplinary Coordination (BIM model integration and clash detection coordination, design coordination meeting reports, and adjustments and updates by discipline to ensure compatibility).

16. The Design-Builder shall perform, coordinate, and supervise all construction activities to ensure that the work conforms to the approved design, documents, contract requirements, applicable codes, safety regulations, quality standards, and industry best practice.

17. The Contractor commits to strict and non-appealable compliance with the following operational, safety, and service-continuity guidelines throughout the term of the Project.

    a. Preservation of the Plaza: the plaza area shall not undergo any structural, aesthetic, or surface alteration. The Contractor shall return this area in exactly the same physical and clean condition in which it was provided at the start of the Work. Any damage shall be repaired entirely at the Contractor's expense.

    b. Guarantee of Critical Traffic (Ambulances): the free transit, access, and maneuvering of ambulances is of priority and internal national-security character. Under no circumstances shall the obstruction, unauthorized diversion, or stoppage of these emergency vehicles be permitted during the course of the Project.

    c. Continuity of MEP Services (Mechanical, Electrical, and Plumbing): the electrical power and potable water supplies to the outpatient clinics shall not be interrupted under any scenario. The Contractor shall exercise the utmost precaution and guarantee the full integrity of the main electrical feeder energizing those healthcare facilities.

Any work posing a potential risk to these lines shall be coordinated with and approved in advance by Project supervision.

VII. DELIVERABLES

1. The First Phase consists of the development of the basement and first floor through functional operation, including the building enclosure, but excluding the helipad.

    a. Design-build development, mobilization and project controls

    b. Surveys, investigations, validation, agency coordination and user confirmation

    c. Final design, construction documents, reviews, permits and early release packages

    d. Long-lead procurement and major submittal packages

    e. Campus enabling, temporary services, abatement, demolition, required site/off-site work and clearing

    f. Shoring, dewatering, excavation, foundations, basement utilities and basement/Level 1 turnover package

    g. Basement structure, seismic isolation plane and concrete superstructure for nine above-ground levels

    h. Building enclosure, waterproofing, roofing, facade envelope, windows, dry in and heliport/helipad access enclosure

    i. Elevators, vertical transportation, dedicated heliport elevator core and related shaft/core completion

    j. MEP/FP/medical gases/electrical/IT/nurse call systems, including basement utility plant systems

    k. Interior build-out, casework, fixed equipment, finishes and FFE coordination

    l. Exterior site completion, ambulance/patient entries, final paving, plazas and landscaping.

m. Commissioning, TAB, inspections, heliport coordination, licensing support, training and turnover

2. The Second Phase consists of developing the second through ninth floors and the helipad through functional operation, as well as completing all remaining Project areas through final completion and close-out.

    a. Elevators, vertical transportation, dedicated heliport elevator core and related shaft/core completion.

    b. MEP/FP/medical gases/electrical/IT/nurse call systems, including basement utility plant systems

    c. Interior build-out, casework, fixed equipment, finishes and FFE coordination

    d. Exterior site completion, ambulance/patient entries, final paving, plazas and landscaping

    e. Commissioning, TAB, inspections, heliport coordination, licensing support, training and turnover

VIII. SAFETY MANAGER

The Safety Manager shall perform, among others, the following tasks:

1. Design Phase. (1) Participate in design reviews to identify construction risks in clinical settings. (2) Provide safety recommendations during Value Engineering to prevent impacts on hospital operations. (3) Evaluate constructability in sensitive areas (ICUs, operating rooms, emergency departments). (4) Validate that construction phases respect safe routes, barriers, negative/positive pressure, and patient flows. (5) Collaborate with the design team in selecting safer construction methods for occupied hospital environments.

2. Daily Tasks. (1) Conduct daily site walkthroughs to identify unsafe conditions. (2) Verify the proper use of PPE (Personal Protective Equipment). (3) Document safety observations (findings, corrections, hazards). (4) Record incidents, near misses, and unsafe acts. (5) Check machine guards, ladders, scaffolding, and lifting equipment. (6) Ensure emergency routes and assembly points are clear and accessible. (7) Coordinate with supervisors to correct any hazardous conditions identified.

3. Weekly Tasks. (1) Lead toolbox talks and safety training sessions. (2) Review and update the Site Safety Plan weekly. (3) Inspect heavy equipment, cranes, forklifts, and critical machinery. (4) Verify subcontractor documentation regarding training, licenses, and permits. (5) Review weekly incident reports and implement preventative measures. (6) Coordinate testing of emergency systems on site (alarms, fire extinguishers, evacuation routes).

4. Permitting & Compliance. (1) Ensure compliance with OSHA, EPA, and local safety codes. (2) Prepare high-risk work permits: Hot Work Confined Spaces Work at Heights Excavations Verify safety equipment certifications, inspections, and labels.

5. Incident & Accident Management. (1) Respond immediately to incidents and coordinate emergency response. (2) Ensure isolation of the affected area. (3) Investigate incidents and near misses to determine root causes. (4) Prepare incident reports for management and regulatory authorities. Implement corrective actions and follow up.

6. Training & Awareness. (1) Provide initial safety training for new workers. (2) Organize specialized training (working at heights, scaffolding, confined

spaces, chemical handling). (3) Evaluate the safety performance of subcontractors. (4) Promote safe practices through signage and consistent communication.

7. Documentation & Reporting. (1) Maintain records of incidents, observations, work permits, and training. (2) Update the Safety Log. (3) Complete weekly inspection forms. (4) Prepare monthly safety reports for the Project Manager. (5) Document corrective actions with photographic evidence.

8. Coordination & Communication. (1) Coordinate with the Project Manager and superintendents regarding emerging risks. (2) Communicate new policies, regulations, and safety requirements. (3) Participate in coordination meetings with subcontractors. Ensure all workers understand emergency procedures.

9. Emergency Preparedness. (1) Verify the availability and functionality of fire extinguishers, first aid kits, and rescue equipment. (2) Coordinate emergency drills (evacuation, fire, chemical spill). (3) Update evacuation maps and routes on site.

10. Specialized Safety Tasks (if applicable). (1) Monitoring hazardous atmospheres (gas monitoring). (2) Management of hazardous materials (HazMat). (3) Control of noise, vibration, and dust damage. (4) Electrical safety and lockout/tagout (LOTO), as applicable.

IX. QUALITY CONTROL

1. The Contractor shall have a Quality Control and Compliance Manager who takes a holistic approach to ensuring full compliance and quality control throughout the entire process of developing the contracted activities. The Quality Control and Compliance Manager shall be responsible for:

    a. Quality control system management: Overseeing the Contractor's Quality Control (QC) system to ensure that all work meets quality standards;

    b. Review of design quality control plans: Ensuring that the design quality control plan at each phase is carried out by personnel with the necessary experience and authority, and that the execution of the Quality Control Plan is successful;

    c. Implementation of quality assurance processes: Ensuring that assigned personnel properly review the quality control methods.

2. It shall be the Contractor's responsibility: Have an internal quality control and compliance procedure in place, following industry best practices. The quality control or quality assurance procedure should include, among other things:

    a. Written company procedures, as implemented;

    b. Standard quality control and compliance forms; and

    c. Reviewed or commented on plans.

X. PROJECT MANAGER

The Project Manager shall perform, among others, the following tasks:

1. Project Initiation & Planning. (1) Create and configure the project in Project Manager Software. (2) Develop the initial project plan (schedule). (3) Coordinate with ASEM to verify functional and operational requirements. (4) Establish the Design-Build team (design, engineering, construction). (5) Create the project's communication and governance structure. (6) Identify preliminary risks and develop the Risk Management Plan. (7) Prepare the Project Execution Plan (PEP).

2. Design Management (Design Phase). (1) Oversee design development. (2) Coordinate interdisciplinary reviews (architecture, structural, MEP, civil). (3) Manage design deliverables and ensure compliance with codes and standards. (4) Facilitate Value Engineering sessions to optimize cost and constructability. (5) Ensure the design reflects ASEM requirements and performance criteria. (6) Coordinate BIM management (models, federation, clash detection). (7) Manage preliminary permits and coordinate with regulatory authorities.

3. Construction Management. (1) Oversee the execution of the construction plan. (2) Coordinate subcontractors and work sequences. (3) Manage weekly progress meetings. (4) Verify compliance with the IFC (Issued for Construction) design. (5) Supervise quality control and inspection management. (6) Coordinate the management of RFIs, submittals, comments, and changes. (7) Monitor the schedule and adjust the plan according to deviations. (8) Implement safety strategies in collaboration with the Safety Manager. (9) Maintain active communication with ASEM, inspectors and Project Team.

4. Cost Management. (1) Prepare and maintain the project budget. (2) Manage forecasts, cash flow, and S-curves. (3) Review and approve proposed change orders. (4) Control subcontractor and supplier costs. (5) Validate invoices and payment requests.

5. Stakeholder Coordination. (1) Serve as the primary point of contact between ASEM, inspector, design, construction, and Team Project. (2) Facilitate transparent and effective communication. (3) Manage client expectations regarding scope, cost, and timeline. (4) Prepare monthly executive project status reports.

6. Quality Management. (1) Ensure implementation of the QA/QC plan. (2) Supervise quality inspections and testing. (3) Document deviations and coordinate corrective actions. (4) Verify conformity of materials and construction methods with specifications.

7. Safety Oversight. (1) Monitor compliance with the project safety plan. (2) Provide support to the Safety Manager during incidents and audits. (3) Ensure that high-risk activities comply with protocols (working at heights, hot work, excavation).

8. Commissioning Coordination. (1) Develop the commissioning strategy with the technical team. (2) Coordinate functional testing by discipline (HVAC, electrical, plumbing, BAS, etc.). (3) Ensure that commissioning is integrated with design and construction. (4) Validate documentation, reports, and defect closure.

9. Close-Out & Turnover. (1) Oversee punch list completion. (2) Validate delivery of updated as-built drawings and BIM models. (3) Coordinate delivery of O&M manuals and training to ASEM. (4) Manage certifications, final permits, and regulatory documentation. (5) Conduct final walkthrough and prepare acceptance certification. (6) Execute financial close-out of the project (final payments, retention).

10. Project Reporting & Documentation. (1) Maintain complete project documentation. (2) Prepare reports for internal and external audits. (3) Ensure that project files comply with company standards and regulations.

XI. LEED CERTIFICATION

This project does not require LEED certification for compliance, but this does not exempt the Contractor from implementing energy efficiency strategies. This approach affects the entire facility (interior and exterior) and all systems (architecture, plumbing, mechanical, and electrical), including design, construction, and operation, to reduce environmental impact, improve the health and comfort of building occupants, decrease operating costs, and optimize building performance.

XII. COMMISSIONING

1. The Contractor will develop and execute a comprehensive Total Building Commissioning (Cx) field validation and inspection process, in accordance with ASHRAE Guideline 0 2019 and ASHRAE Guideline 1.1-2007 for HVAC systems in health care facilities. The purpose of this phase is to subject all systems to physical stress testing and certify that they operate in strict compliance with the Owner's Project Requirements Form (OPR Checklist) prior to final acceptance of the Work by the ASEM.

2. Requirement for an Independent Commissioning Authority (CxA)

    a. Third-Party Engagement: the Design-Builder shall subcontract an Independent Commissioning Authority (Third-Party CxA) qualified and certified by the Building Commissioning Association (BCA) or the AABC Commissioning Group (ACG).

    b. Legal Independence: the CxA shall report its findings directly and simultaneously to both the Contractor and the Owner's representative (ASEM), and its validation logs shall be a mandatory requirement for approval of payments tied to construction financial milestones.

3. The Commissioning phase encompasses all activities required to verify that the project's systems, equipment, and components are installed, tested, and operating in accordance with the design intent, contractual requirements, and applicable codes and standards. The Contractor shall perform all commissioning tasks necessary to ensure the project's operational readiness prior to final acceptance.

4. The Contractor shall plan, manage, and execute commissioning activities in coordination with the ASEM, design professionals, subcontractors, and other relevant stakeholders. Responsibilities include preparing commissioning documentation, conducting functional performance tests, facilitating inspections, and addressing deficiencies identified during the commissioning process.

5. Commissioning activities include, but are not limited to:

    a. Design Phase

1. Verify that the project's functional, operational, and performance objectives are clearly established.
2. Document any required adjustments or clarifications.
3. Ensure that the design criteria are adequately addressed.
4. Confirm technical consistency across disciplines.
5. Establish activities, responsibilities, sequence, and acceptance criteria for the commissioning process for all project phases. Coordinate this plan with the designer and the general contractor.
6. Conduct systematic reviews of design documents at their different stages: schematic, preliminary design, and final design.
7. Verify that the proposed systems meet the requirements for efficiency, indoor environmental quality, controls, maintainability, and operational safety.
8. Identify technical interdependencies among mechanical, electrical, control, architectural, structural, and special systems.
9. Coordinate solutions with the design team.
10. Preliminary Identification of Tests and Verifications.
11. Define the types of functional tests expected in the acceptance phase.
12. Document access requirements, instrumentation, loads, and anticipated operating conditions.
13. Initiate the structure of system manuals, checklists, and commissioning responsibility matrices.
14. Identification of Technical Risks Related to Performance.
15. Analyze risks that could affect the commissioning, early operation, or ongoing performance of the building.

16. Recommend mitigation measures.

17. Confirm that the project specifications include the required commissioning, testing, documentation, and deliverables.

18. Commissioning tests must verify and document full compatibility with existing operational systems in ASEM's central building, ensuring proper integration with communications subsystems, required voltage levels, network and data infrastructure, information exchange protocols, and any other associated critical interfaces.

b. Verification of correct installation of all systems and equipment;

c. Execution of testing and start-up procedures as specified in the contract documents;

d. Conducting functional performance tests to confirm compliance with design intent and manufacturer requirements;

e. Calibration and adjustment of systems to achieve specified performance;

f. Documenting findings, test results, and corrective actions; and

g. Coordinating retesting as necessary to demonstrate full compliance.

h. System-Specific Validation Protocols

i. Pneumatic Tube Logistics System (PTS – Bionuclear / Swisslog / Pevco)

1. Speed and Transit Testing: The CxA shall oversee physical tests of continuous carrier dispatch from the First Floor (Trauma) and Second Floor (ICU), through the Third-Floor connection, to the ASEM Central Building's Central Laboratories, validating the 30-to-45-second transit time.

2. Anti-Hemolysis and RFID Certification: a minimum of fifty (50) test dispatches shall be performed using vials with biological control samples. A pathologist certified by the ASEM laboratory shall audit the samples to certify the total absence of cellular hemolysis caused

by the air cushion and the VFDs. 100% of RFID tag reads and PIN-code security lockout at the terminal stations shall be validated.

3. Biological Spill Simulation: a simulated vial breakage inside a carrier shall be triggered to certify activation of the automatic containment sequence, HEPA-filtered air purge, and isolation of the affected section of tubing without contaminating clinical ceiling plenums.

ii. Dual-Coil HVAC Climate Control and Containment System

1. Hygrothermal Stress Testing: the AHUs serving the Hybrid Operating Rooms, ICU, Recovery, and Burn Unit shall undergo continuous 72-hour testing to certify that the automated BMS sustains temperature strictly between 65°F and 70°F and relative humidity between 20% and 55% RH.

2. Chilled-Water Failure Simulation: the main basement hydraulic supply valves (Sheet A-1.1) shall be physically closed to simulate a central plant collapse. The CxA shall certify that the BMS activates the exterior rooftop DX condensing units (Sheet A-1.12) and that emergency Direct Expansion mode assumes 100% of the thermal load in under 60 seconds, while maintaining design positive pressures and air change rates (ACH).

3. Vibration and Noise Monitoring: using calibrated portable acoustic spectrum analyzers, the CxA shall measure noise levels inside Second-Floor ICU rooms with the cooling towers and chillers operating at maximum capacity. It shall be certified that the vibration sensors installed on the roof trigger emergency shutdown if the ISO 10816 thresholds are exceeded, in order to prevent structure-borne noise transmission.

iii. Hybrid Electrical Infrastructure and Emergency Plant (N+1)

1. General Blackout Test: a full shutdown of the 38 kV street supply to the new substation shall be

coordinated with LUMA Energy to evaluate the hospital's resiliency response.

2. Microgrid (BESS) and Generator Validation: the CxA shall certify that the battery bank (Micro-Grid) instantaneously (0 milliseconds) assumes operating-room life-safety loads, eliminating voltage fluctuations, and that the paralleled generator plant (3 units of 2,000 kW) starts, automatically synchronizes, and assumes 100% of the hospital load in under 10 seconds, in accordance with NFPA 110.

3. Fuel Autonomy: the automated pumping and filtration system from the underground diesel tanks in the exterior service yard to the generators' day tanks shall be physically inspected, certifying continuous flow for 96 hours of operation.

iv. Flood Protection, Plumbing, and Life-Safety Systems

1. Stormwater Surcharge Simulation: high-pressure water shall be injected into the exterior street drainage lines to certify the automatic, hermetic closure of the stormwater backwater valve at the exterior manhole (Sheet AS-1.1), preventing backflow of runoff into the building.

2. Basement Flood (Sump Pit) Test: the basement storm sump pit (Sheet A-1.1) shall be intentionally filled to validate the automatic alternation of the duplex submersible pumps, start-up under emergency power, forced pumping capacity (GPM) discharged to the street, and activation of the critical-level alarm at the BMS and the ICU's 24/7 central annunciator panel.

3. Fiber-Optic Ring Fire Alarm Interconnection: manual pull stations and sprinkler flow sensors in the new trauma tower shall be randomly activated. The CxA shall validate that the Fire Alarm Control Panel (FACP) transmits the signal to the ASEM Central Building in under 2 seconds via the Style 7 fiber-optic ring (NFPA 72), triggering closure of fire doors in the connecting corridors and zoned, pre-programmed voice-evacuation messages.

i. Turnover Documentation (Cx Turnover Package)

i. As a mandatory condition for execution of the Certificate of Substantial Completion and disbursement of the final retained payment, the Design-Builder shall deliver to ASEM three (3) hard copies in binders and an indexed digital file containing.

1. A complete field test log bearing original signatures and seals of the CxA, the inspecting engineers, and the authorized manufacturer's representatives (Bionuclear, Swisslog, etc.).

2. Current calibration certifications for all temperature, humidity, medical gas pressure, and vibration accelerometer sensors.

3. Customized Operation and Maintenance (O&M) manuals for the interconnection of both buildings, including BMS logic diagrams and contingency guides for automation-loop failures.

6. The Contractor shall prepare and submit all commissioning-related documentation, including:

a. Commissioning plan and schedule;

b. Pre-functional checklists and functional performance test forms;

c. Start-up reports, testing results, and inspection records;

d. Documentation of deficiencies, resolutions, and retesting activities; and

e. Final Commissioning Report summarizing results, verification procedures, outstanding issues, and recommendations.

7. The Contractor shall ensure ongoing communication with all stakeholders throughout the commissioning phase. This includes scheduling tests, facilitating inspections, coordinating access to systems, and providing advance notice of required participation by the ASEM or design team.

8. The Contractor shall commission all HVAC systems, including air-handling units, chillers, boilers, VAV boxes, control systems, heat pumps, ventilation systems, and associated components.

9. HVAC Commissioning Tasks:

    a. Verification of correct installation, alignment, and anchorage.

    b. Start-up and testing of mechanical equipment per manufacturer specifications.

    c. Functional performance testing of cooling, heating, and ventilation modes.

    d. Calibration and programming of HVAC controls, sensors, and actuators.

    e. Testing of automation sequences (BAS/EMS), alarms, and interlocks.

    f. Airflow and waterflow balancing.

    g. Verification of indoor environmental quality (IEQ) targets.

10. HVAC Documentation:

    a. Pre-functional checklists for each piece of HVAC equipment.

    b. Air and hydronic balancing reports.

    c. Controls sequences verification reports.

    d. Start-up logs and test results.

    e. Final HVAC Commissioning Report

11. The Contractor shall commission all electrical systems, including service entrance equipment, switchgear, panels, lighting systems, emergency power systems, UPS devices, grounding systems, and electrical controls.

    a. Electrical Commissioning Tasks

1. Verification of installation: wiring, conduit routing, labeling, and grounding.
2. Energization procedures following safety protocols.
3. Functional testing of distribution systems and circuits.
4. Testing automatic transfer switches (ATS) and generator systems.
5. Load testing of critical UPS equipment.
6. Verification of lighting controls, sensors, and emergency lighting pathways.
7. Infrared thermographic scanning (when required).

b. Electrical Documentation

1. Electrical checklists and panel schedules.
2. ATS and generator test reports.
3. UPS load test certifications.
4. Lighting control commissioning results.
5. Grounding system verification documentation.
6. Final Electrical Commissioning Report

12. The Contractor shall commission all plumbing systems, including potable water distribution, sanitary sewer, stormwater drainage, pumps, water heaters, and specialty plumbing systems.

a. Plumbing Commissioning Tasks:

1. Verification of pipe installation, labeling, slopes, supports, and insulation.
2. Pressure testing of domestic water systems.
3. Testing functionality of valves, pumps, heaters, and fixtures.
4. Verification of hot water delivery times and temperature stability.

5. Testing sanitary and stormwater systems under flow conditions.
6. Inspection of backflow prevention devices and certifications.
7. Verification of water conservation features (as applicable).

b. Plumbing Documentation

1. Pressure test forms and certifications.
2. Hot water system performance logs.
3. Pump start-up and function test reports.
4. Backflow test certificates.
5. Final Plumbing Commissioning Report

13. Whole-building commissioning ensures that building systems work together as an integrated and efficient whole. This includes coordination among HVAC, electrical, plumbing, fire protection, IT/low-voltage systems, building automation, and life-safety systems.

a. Whole-Building Commissioning Tasks

1. Verification of system interoperability across all disciplines.
2. Integrated Systems Testing (IST) covering alarms, controls, and sequencing.
3. Validation of building automation dashboards, alarms, and trend logs.
4. Energy performance verification against established baseline criteria.
5. Confirming compliance with sustainability targets (LEED, ASHRAE, etc.).
6. Occupancy-readiness testing (lighting, HVAC scheduling, emergency systems).

b. Whole-Building Documentation

1. Integrated Systems Testing reports.
2. Energy performance verification results.
3. Building automation system (BAS) configuration logs.
4. Comprehensive Whole-Building Commissioning Report summarizing all disciplines

14. The Contractor shall:

a. Coordinate scheduling with all involved trades.

b. Provide advance notice for tests requiring Client or design team presence.

c. Maintain continuous communication on deficiencies, retesting, and results.

d. Ensure safe conditions during all testing activities

15. Commissioning shall be considered complete when:

a. all functional tests meet design intent and manufacturer criteria;

b. all systems perform in accordance with project specifications;

c. all deficiencies have been resolved, corrected or formally documented;

d. all required commissioning documentation has been submitted and approved;

e. integrated systems demonstrate seamless and reliable operation;

f. building meets all performance requirements necessary for final acceptance; and

g. all required commissioning deliverables have been submitted and approved by the ASEM.

Final acceptance of the project will not occur until commissioning requirements have been fulfilled.

XIII. BIM REQUIREMENTS

1. A BIM Execution Plan (BEP) defining model uses, software platforms, file exchange formats, version control procedures, coordination workflows, and discipline responsibilities.

2. Development and maintenance of BIM models for, at a minimum, architectural, structural, mechanical, electrical, plumbing, fire protection, medical gas, and low-voltage systems.

3. Use of BIM for multidisciplinary design coordination and 3D spatial validation.

4. Use of BIM for clash detection, issue tracking, and timely resolution of coordination conflicts prior to construction or fabrication.

5. Identification of model authorship, discipline responsibilities, and model management procedures.

6. Defined Level of Development (LOD) requirements by phase, discipline, and milestone.

7. Coordination of critical clinical areas, including ER, OR, ICU, imaging, trauma bays, and related support spaces.

8. Coordination of Owner-Furnished, Contractor-Installed (OFCI) equipment and all related infrastructure requirements.

9. Coordination of healthcare-specific systems and constraints, including medical equipment clearances, ceiling-space congestion, maintainability access, and mission-critical utilities.

10. Regular BIM coordination meetings and issuance of coordination and clash reports.

11. Use of BIM for constructability review, installation planning, and project logistics.

12. Use of BIM for phasing and sequencing analysis, where applicable.

13. Procedures for model review, approval, revision control, and management of superseded models.

14. Delivery of required BIM files in native formats, federated coordination models, and interoperable formats as required by the ASEM.

15. Delivery of nonproprietary exchange formats and structured asset data, if required by the ASEM for operations and maintenance.

16. Updating of BIM deliverables during construction to reflect final installed conditions.

17. Delivery of a record model / as-built BIM model at project closeout.

18. Inclusion of model-linked information necessary for commissioning, operations and maintenance documentation, equipment data, and maintainable assets.

19. Identification of BIM key personnel, coordination workflow, and proposed software environment as part of the technical proposal.

XIV. PROJECT CLOSE-OUT

1. Administrative Close-Out (Hospital-Specific Requirements)

    a. Submit all final contract documentation.

    b. Submit complete and final as-built drawings, including architectural, structural, civil, MEP, medical gas, fire protection, nurse-call, security, and IT systems.

    c. Submit final specifications with healthcare-related revisions and all regulatory compliance documents required by hospital authorities (Puerto Rico Department of Health, Joint Commission, etc.).

    d. Provide warranties, guarantees, and extended service agreements.

    e. Provide final O&M Manuals with manufacturer documentation.

    f. Submit final occupancy documentation, including life-safety compliance certifications.

    g. Submit final certificates (completion, occupancy, regulatory approvals).

    h. Delivery of medical equipment coordination records (layout validation, infrastructure verification).

    i. Deliver final permit close-out documentation.

2. Technical / Construction Close-Out

    a. Completion of punch list items for all hospital functional areas (patient care zones, imaging, surgery, ICU, labs, etc.).

    b. Final inspection of installation accuracy and system performance based on contract requirements.

    c. Final inspection and certification of critical hospital systems:

i. Fire alarm and fire suppression.

ii. Medical gas systems (oxygen, vacuum, nitrous oxide, etc.).

iii. Emergency power and life-safety branches.

iv. Isolation rooms and pressure-sensitive areas.

v. Specialized HVAC controls (negative/positive pressure rooms).

d. Site cleaning and restoration, with attention to infection control protocols.

e. Close-out of temporary utilities, fencing, and construction facilities.

f. Removal and proper disposal of construction materials per hospital environmental requirements.

3. Commissioning Close-Out (Hospital Systems)

a. Completion of commissioning for all hospital-critical systems:

i. HVAC systems serving surgery, ICU, pharmacy, and isolation rooms.

ii. Electrical emergency systems, ATS, generators, UPS.

iii. Medical gas systems and alarm panels.

iv. Nurse-call and communication systems.

v. Plumbing, hot water recovery, and sterilization systems.

b. Submit commissioning reports, deficiency lists, and retesting results.

c. Confirmation that all life-safety and patient-care systems meet performance criteria.

d. Submit resolution or documentation of all remaining commissioning deficiencies.

e. Delivery of commissioning certificates required by health authorities.

4. As-Built Documentation & Records

a. Provide "Issued for Record" hospital as-built drawings with medical gas zones, critical branches, and life-safety pathways clearly identified.

b. Provide redline drawings to reflect field conditions.

c. Updated BIM models reflect real installation of all systems.

d. Equipment submittals marked "as-built".

e. Medical equipment infrastructure verification drawings (MEP tie-ins, power requirements).

f. O&M manuals specifically tailored for hospital systems:

i. HVAC system control for sterile environments.

ii. Generator and ATS maintenance cycles.

iii. Medical gas equipment and valves.

g. Life-safety system maintenance schedules.

h. Documentation of infection-control compliance during construction.

5. Training & Operational Transition

a. Conduct formal training sessions for ASEM's operation staff covering:

i. HVAC/BAS operation for surgery suites, isolation rooms, pharmacy.

ii. Medical gas system operation, shut-off protocols, and emergency response.

iii. Emergency electrical systems and generator operation.

iv. Nurse-call, security, access control, and IT systems.

v. Fire alarm and emergency evacuation systems.

b. Provide training materials, videos, certifications, and manuals, as required by ASEM.

c. Verification that clinical staff can access and operate monitoring dashboards (BAS, EMS).

d. Turnover of access credentials, control passwords, and digital configurations.

e. Deliver keys, access cards, passwords, and system configuration data.

6. Safety & Compliance Close-Out (Healthcare Standards)

a. Submit final safety reports and incident logs.

b. Submit final infection control documentation (ICRA reports).

c. Delivery of environmental safety close-out documents:

i. Air quality testing results (surgical zones, isolation rooms).

ii. Water quality and Legionella testing reports.

d. Provide certification of fire protection systems per hospital code requirements.

e. Provide final inspection and approval by relevant hospital regulatory authorities.

f. Ensure proper disposal of hazardous materials and close-out of environmental permits.

7. Financial Close-Out

a. Submit final payment application.

b. Closure of change orders, claims, and cost adjustments.

c. Release of retainage following satisfaction of hospital regulatory approvals.

d. Delivery of lien waivers and affidavits.

8. Project Handover (Hospital-Specific Turnover)

   a. Conduct formal turnover meeting with ASEM's staff.

   b. Delivery of the final close-out package (digital + hard copy) including:

      i. As-builts

      ii. Warranties

      iii. O&M manuals

      iv. Commissioning results

      v. Regulatory approvals

   c. Confirmation of the final close-out package (digital + printed).

   d. Confirmation of warranty period and process for claims.

   e. Provide documentation of warranty start dates and response procedures for healthcare-critical failures.

   f. Final Owner walk-through including life-safety and clinical function validation.

   g. Formal acceptance of the hospital facility.

XV. CODES, STANDARDS AND STRUCTURAL RESILIENCE

1. All architectural, structural, mechanical, electrical, plumbing (MEP), and life-safety design shall strictly comply with the versions currently adopted on the island: Puerto Rico Building Code (PRBC 2018) or later, ASCE 7-16, NEC 2020/2023, NFPA 99 (Health Care Facilities), NFPA 101 (Life Safety), ASHRAE 170 standards, and the FGI 2022 Guidelines for Trauma Hospitals. The use of obsolete codes (such as PRBC 2011) is prohibited.

2. As the facility is classified under Occupancy Category IV (Essential Facilities), the structure and all façade systems (including EIFS and glazing systems) shall be designed to withstand hurricane design wind loads of 165 mph to 180 mph and to resist windborne-debris impact in accordance with ASCE 7-16.

3. All mechanical anchorage for heavy rooftop equipment, chillers, substations, equipment suspended in operating rooms, and other equipment (HVAC systems, medical gas systems, etc.) shall be provided with seismic-resistant certifications and supports validated by a structural engineer licensed in Puerto Rico.

XVI. GENERAL CONDITIONS

1. Failure to comply with any of the provisions contained in this document will constitute a material breach of the contractual terms of the Project.

2. The Contractor must incorporate each of the requirements detailed below into their construction plans, engineering reports, and design specifications. The Architect of Record (AOR) or Designer must certify compliance with these requirements with their signature and professional seal in the 30%, 60%, 100%, and As-Built design deliverables.

3. The Contractor will be solely responsible for ensuring the accuracy, timeliness, and completion of all documents related to the design, permitting, specifications and all necessary construction documentation for the Project assigned under this contract.

4. The Contractor will participate in weekly construction meetings with the ASEM and/or their consultants.

5. It shall be the Contractor's responsibility to provide, as part of the design, the artwork for the project sign, as required by the Joint Permit Regulations, and the sign itself, as required by the Signage Manual in effect at the time of the final design submission, including signs required by OSHA, CDBG-MIT, among others.

6. All plans, technical specifications, cost estimates, reports, computer logs, endorsement requests and permits, and proposed work schedules for the construction phase shall be duly certified and signed by the authorized professional in accordance with their profession or specialty.

7. As part of the content of the plans, the Contractor shall clearly and precisely identify the vegetation area, pavement, traffic, emergency zones, areas affected by changes in ground level, and infrastructure of the areas located within a 20-foot radius following the boundary of the project development area, according to the design.

8. The Contractor shall be responsible for providing all labor, knowledge, equipment, materials and programs necessary to carry out the design and construction, as contracted, without this representing an additional cost to its economic proposal or contract amount.

9. The Contractor shall make all necessary corrections at no cost to the Government when the design, plans, specifications, or other elements of the services provided contain errors, deficiencies, or shortcomings. It is understood that the Contractor shall, without additional compensation, correct or revise any errors or deficiencies in its designs, plans, specifications, and other services.

10. The design services must be reasonably accurate and free from material errors or omissions. Upon notification, the professional services provider must promptly correct any known or discovered errors, omissions, or other defects at no additional cost or expense to ASEM. As determined by ASEM's representative, ASEM may order the professional services provider to re-perform such services at no additional cost to ASEM or deduct the corresponding fees from any other payments to the designer.

11. All work performed must be completed to the satisfaction of ASEM or its authorized representative. ASEM or its authorized representative will decide on all matters relating to the performance of the professional services provider, and such decisions will be final and unappealable.

12. ASEM will notify the professional services provider in writing of any material errors, omissions, or other defects in the design, or any conflicts in the contractual documentation of which it becomes aware but will have no obligation to investigate whether such errors, defects, or conflicts exist.

13. The term Intellectual Property refers to all proprietary and other rights in: (i) trademarks, service marks, registered trademarks, certification marks, trade dress, trade names, business names, and other indications of origin; (ii) patents, inventors' certificates, and disclosures of inventions; (iii) trade secrets and other non-public or confidential business information, including ideas, formulas, compositions, inventions, discoveries and improvements, know-how, manufacturing and production processes and techniques, and research and development information (patentable or not); drawings, specifications, designs, plans, proposals, and technical data; and financial information, pricing and cost information, business and marketing plans, and customer and supplier information and lists; (iv) writings and other works of authorship, whether or not protectable by copyright, including computer programs, databases, and related documentation, and all copyrights in any of the foregoing; (v) job identification masks; (vi) rights, titles, and interests in and to technical know-how, technical information, processes, practices, and systems, whether or not protected by patents, copyrights, or trade secret laws; (vii) moral rights; (viii) rights to limit the use or disclosure of Confidential Information by any person; (ix) any intellectual property or similar

proprietary rights, tangible or intangible, information, and technology; (x) registrations and applications for registration of any of the foregoing with any governmental agency or authority, as well as any renewals or extensions thereof; (xi) the goodwill associated with each of the foregoing; and (xii) any claim or cause of action arising from any infringement or misappropriation of any of the foregoing.

14. The professional services provider acknowledges that all documents, writings, recommendations, and/or reports produced as part of the contract to be awarded as a result of this Request for Proposals process will be the exclusive intellectual property of ASEM. All materials, products, documents, or information, as well as applications, programming, and/or any other products developed and/or derived from the contracted services, will be the property of ASEM. It is expressly agreed that all property, code, source code, research, studies, designs, photographs, and/or material created and/or recognized as intellectual property under the laws of the United States of America and Puerto Rico, regardless of the medium in which it is presented, will become the property of ASEM, which is authorized to reproduce it without being obligated to pay the professional services provider any additional compensation for such production and/or rights thereto, beyond the compensation stipulated in the contract.

15. All products and/or results of services provided (the "Work") as a result of this Request for Proposals process will be for the exclusive benefit of ASEM. The professional services provider acknowledges and agrees that the work (and all rights therein, including, but not limited to, copyrights, patents, intellectual property, and trademarks) shall be the exclusive and perpetual property of ASEM. Notwithstanding the foregoing, the professional services provider also assigns and transfers to ASEM all rights, titles, and interests in and to the copyrights, trademarks, patents, and intellectual property rights in the work; all copyright registrations and applications relating thereto, as well as all renewals and extensions thereof; and all works based upon, derived from, or incorporating the work. All present and future revenues, royalties, damages, claims, and payments related thereto, as well as all legal actions, both at law and in equity, for past, present, and future damages, including, but not limited to, future damages related to intellectual property; and all rights in and to the design worldwide. The professional services provider undertakes to take all necessary steps to ensure that ASEM and/or its authorized representative retain the rights assigned, as set forth.

16. The Design-Builder shall deliver and return to ASEM all documents, files, reports, materials, programs, and/or applications ("the Materials")

delivered, produced, and/or in its possession as a result of the contractual relationship with ASEM, as soon as its tasks are completed, when required, and/or upon termination of the contractual relationship, as applicable in each case. ASEM shall have the right to unrestricted and unlimited use of such Materials. If the contract is terminated and/or rescinded before the expiration date stipulated therein, the delivery of the Materials shall be made immediately after such notification and within a maximum period of fifteen (15) days from the date of notification.

17. The Design-Builder represents and warrants to ASEM that its materials, programs, processes, systems, or applications do not infringe or violate any state or federal intellectual property laws, including, but not limited to, patents, trademarks, and copyrights. ASEM shall not be liable for any acts or omissions of the professional services provider in the performance of the agreed-upon services that result in damages to third parties due to the infringement of third-party intellectual property. The professional services provider agrees to defend, indemnify, and hold harmless ASEM and its successors from any and all direct or indirect claims, actions, and demands of any nature whatsoever, brought by third parties in any forum and arising out of the intellectual property used by the professional services provider in the performance of the services. The professional services provider agrees to pay all costs, expenses, and attorneys' fees that ASEM may incur in its defense.

18. The Contractor shall be responsible for the professional quality, technical accuracy, and coordination of all designs, drawings, specifications, and other services provided by the Contractor under the contract awarded as a result of this Request for Proposals process. In this regard,

    a. Neither the Government's review, approval, or acceptance, nor payment for services rendered under the contract, shall be construed as a waiver of any right or cause of action arising from the performance of the contract, and the Contractor shall be and shall remain liable to the Government under applicable law for all damages to the Government caused by the Contractor's negligent performance of any of the services rendered under the contract.

    b. The Government's rights and remedies provided in the contract are in addition to any other rights and remedies provided by law.

19. The proposal should include all necessary labor, materials, tools, equipment, software, supplies, and transportation necessary for the performance of the contractor's duties under the contract. The Contractor shall procure all necessary permits, consents, and licenses to comply with all applicable laws, federal, state, or municipal, along with

all regulations, and ordinances of any regulating body. The proposer shall pay any applicable sales, use, or personal property taxes arising out of this contract and the transactions contemplated thereby. Any other taxes levied upon this contract, the transaction, of the equipment, or services delivered pursuant here shall be borne by the Contractor.

20. The Contractor shall be responsible for the design and implementation of the CES Plan, including all required coordination, permitting support, inspections, corrective measures, and documentation.

21. ASEM will hold working meetings once a week for the duration of the contract. Attendance at these meetings will be in person at ASEM's facilities.

22. The Design and Construction team will thoroughly investigate all conditions that may affect the development and execution of the design and construction activities before the start of the activities.

23. The Project Team will hold a pre-construction meeting with ASEM to define the roles and responsibilities of each member and to discuss various matters relevant to the project's execution. At this meeting, the team will present the Work Plan to define the work schedule for the design phase and a preliminary schedule for the construction phase. ASEM will coordinate this meeting. The meeting will take place within 30 calendar days of the contract signing. The Project Team will consist of:

    a. Design-Builder

    b. Consultant

    c. Subconsultant

    d. ASEM's Authorized Representative

    e. Project Manager

    f. Safety Manager

    g. Quality Control Manager

    h. Subcontractors

    i. Suppliers, if necessary

ASEM will be responsible for preparing, within five (5) days following the meeting, minutes that will be distributed to the Project Team members and other attendees.

24. The Design-Builder shall be fully and solely responsible for the accuracy, completeness, coordination, and constructability of all design documents and design services provided for the Project, including those performed by architects, engineers, consultants, and any other design professionals under the Design-Builder's direction. Any design errors, omissions, inconsistencies, or conflicts—regardless of whether they arise from architectural, engineering, or specialty design services—shall be the responsibility of the Design-Builder.

25. ASEM shall not be responsible for verifying the design nor for resolving disputes between design consultants and contractors. The Design-Builder shall bear all costs, schedule impacts, corrective measures, and performance obligations resulting from design errors or omissions. Under no circumstances shall design responsibility be divided between "designer" and "contractor"; the Design-Builder assumes unified responsibility for both design and construction, ensuring coordinated and fully integrated project delivery.

26. The Design-Builder shall be fully responsible for all services, work, coordination, and deliverables required to perform the Project, including design, engineering, construction, commissioning, quality control, regulatory compliance, and project close-out. The Design-Builder shall provide a fully integrated project delivery approach in which design and construction responsibilities are unified and inseparable.

27. The Design-Builder shall coordinate the work of all design disciplines and construction trades so that drawings, specifications, and field activities are fully aligned.

28. The Design-Builder shall identify and resolve conflicts between design and construction proactively, without reliance on ASEM interpretation or intervention.

29. The Design-Builder guarantees that the finished project will meet all functional, operational, environmental, and performance requirements identified in the contract. The Design-Builder shall correct, at no cost to

the ASEM, any deficiencies affecting performance, regardless of whether caused by design or construction.

30. The Design-Builder shall be responsible for ensuring that all design and construction work complies with applicable laws, codes, regulations, standards, and authority requirements. The Design-Builder shall prepare and submit all documents required for permits, inspections, approvals, and certifications.

31. The Design-Builder shall implement a comprehensive quality management program that encompasses design QA, construction QC, submittals, inspections, testing, and commissioning. Any failure to meet specified quality standards shall be corrected at the Design-Builder's expense, regardless of origin.

32. The Design-Builder shall be responsible for preparing, maintaining, and updating a realistic and achievable project schedule and budget. Delays or cost impacts arising from design deficiencies, coordination issues, procurement choices, or construction inefficiencies shall be the sole responsibility of the Design-Builder.

33. All subcontractors, suppliers, architects, engineers, and consultants engaged by the Design-Builder are the Design-Builder's responsibility. The ASEM shall have no contractual relationship with these entities. The Design-Builder is responsible for their performance, compliance, safety, coordination, and deliverables.

34. The Design-Builder shall conduct all commissioning activities and ensure that systems operate according to design intent and contract requirements.

35. Design development activities, coordination efforts, constructability refinements, sequencing adjustments, and other work necessary to complete the Project shall not constitute compensable changes. Eligible change orders shall be limited to Owner-directed scope changes, differing site conditions, regulatory changes occurring after proposal submission, and force majeure events, subject to the procedures and limitations established in the Contract Documents.

36. The Design-Builder shall deliver complete close-out documentation, training, manuals, and as-built records.

37. The Design-Builder is the single point of responsibility and shall resolve any disputes internally among designers, engineers, subcontractors, or consultants. The ASEM shall not mediate or assume responsibility for internal disputes within the Design-Builder's Team.

38. The Technical Proposal shall clearly address the Design-Builder's design approach, clinical approach, BIM approach, construction approach, schedule approach, cost management strategy, change management strategy, commissioning strategy, QA/QC strategy, safety strategy, team organization, assumptions matrix, exclusions matrix, and deviations matrix. Conditional proposals, undisclosed exceptions, and exclusions not expressly stated in the Proposal may be rejected or deemed included in the Contract Price.

39. The Contractor will deliver the documents for each of the design phases, as applicable, in digital version in the file formats ".dwg" (native file format for AutoCAD) and ".pdf" (Adobe Portable Document Format), and printed (3 sets of drawings in size 11" x 17", 1 set of drawings in size 24" x 36" to scale, 3 books of technical specifications, 3 cost estimates that include the detail of the source of information or database, 3 books of analysis and calculations, etc.).

40. Staging Area. The Staging Area is the designated space for the organization, storage, pre-assembly, and logistical handling of materials, equipment, and support activities during project execution.

    The following requirements establish the minimum criteria that the Design-Builder must meet to ensure safety, operational continuity, risk control, and logistical efficiency.

    a. The Design-Builder must propose a clearly defined Staging Area, with plans indicating dimensions, access points, circulation routes, and proximity to operational areas.

    b. The location must not interfere with critical operations, emergency access, patient routes, or essential infrastructure.

    c. It must comply with the ASEM's restrictions, OGPe regulations, and applicable rules.

d. The area must be fenced, controlled, and marked.

e. Access is limited to authorized personnel only.

f. Implementation of physical security measures:

   i. Adequate lighting.

   ii. Cameras or surveillance depending on the project's criticality.

   iii. Record of incoming and outgoing materials

g. Materials and Equipment Handling

   i. Sufficient space for temporary storage, pre-assembly, and handling heavy equipment.

   ii. Protection from the elements (tarpaulins, tents, containers).

   iii. Segregation of sensitive, flammable, or regulated materials.

   iv. Compliance with OSHA and NFPA standards for safe storage

h. Circulation and Logistics

   i. Design of internal routes for the movement of trucks, forklifts, and equipment.

   ii. Minimizing interference with the ASEM's operations.

   iii. Internal traffic plan including:

      4. Permitted hours.

      5. Access and exit routes.

      6. Safety protocols for maneuvers

i. Operational Impact

i. The Design-Builder must ensure that the staging area does not disrupt essential services, especially in healthcare facilities.

ii. An Operational Impact Mitigation Plan will be required, including measures for noise, dust, vibration, and access.

j. Regulatory Compliance

i. Compliance with local and federal regulations: (1) OGPe, (2) OSHA for occupational safety; (3) EPA for materials and waste management; (4) ASEM's standards; or any other as applicable.

k. Waste Management and Environmental Control

i. Designated area for construction waste management.

ii. Segregation of hazardous waste.

iii. Dust, runoff, and spill control protocols.

iv. Compliance with Good Manufacturing Practices (GMPs).

l. Temporary Infrastructure

i. Installation of temporary facilities as needed:

1. Field offices.

a. Installation Requirements

- Temporary structures such as trailers, modules, or conditioned containers.
- Secure electrical, water, sewer system and telecommunications connections.
- Climate control system appropriate for local conditions.
- Minimum space for meetings, document storage, and administrative equipment.

b. Operational Requirements

- Designated area for coordination meetings and document management.
- Basic furnishings: desks, chairs, filing cabinets, whiteboards, office equipment.
- Controlled access for authorized personnel.
- Compliance with security and information protection standards.
- Available for ASEM's inspection.

2. Portable toilets.

a. Installation Requirements

- Sufficient quantity according to workforce size and OSHA standards.
- Accessible, safe location away from food preparation areas.
- Units with adequate ventilation and sturdy construction

b. Operational Requirements

- Cleaning and emptying at least 3 times per week, or as needed.
- Continuous supply of paper towels, disinfectants, and soap.
- Maintenance log available for ASEM's inspection.
- Waste management in accordance with applicable environmental regulations.

3. Washing stations.

a. Installation Requirements

- Strategically located near portable toilets and food areas.
- Systems with potable water, soap, and disposable towels.
- Stable structures protected from the elements.

b. Operational Requirements

- Daily restocking of supplies.
- Continuous cleaning and disinfection.
- Visible signage indicating mandatory use.
- Compliance with hygiene protocols established by OSHA and EPA.

4. Staff rest areas.

a. Installation Requirements

- A safe, shaded, and well-ventilated space for staff breaks.
- Basic furnishings: tables, chairs, shade or tents.
- Located away from hazardous areas, heavy machinery, and vehicular traffic.

b. Operational Requirements

- Daily cleaning maintenance.
- Smoking is prohibited in non-designated areas.

- Proper solid waste management. Dispose of all food waste outside the Medical Center Field facilities daily.

- Signage indicating rules of use and safety.

ii. All temporary infrastructure must comply with health and safety requirements and federal and local regulations.

iii. The Design-Builder will be responsible for the installation, operation, cleaning, maintenance, security, and removal of all temporary facilities.

iv. The facilities must be located in areas previously approved by the ASEM and must not interfere with critical operations, emergency access, or essential traffic routes.

v. Safe accessibility, adequate lighting, and signage in accordance with applicable standards must be guaranteed.

m. Emergency Plan

The Staging Area must include:

i. Evacuation routes.

ii. Fire extinguishers and emergency equipment.

iii. Protocols for severe weather events.

iv. Procedures for hazardous materials incidents

The Design-Builder shall implement a Safety Plan that includes periodic inspections, maintenance logs, and emergency protocols.

n. Final Restoration

i. Upon completion of the project, the Design-Builder shall completely remove the Staging Area.

ii. Restore the area to its original condition or to the condition specified by the ASEM.

iii. Submit certification of proper disposal of materials and waste.

iv. Upon completion of the project, the Design-Builder shall remove all temporary facilities and restore the area to its original condition or as specified by the ASEM.

v. Evidence of proper disposal of waste and materials must be submitted.

vi. The ASEM will conduct a final inspection to verify compliance.

41. Movilization.

a. Prior to mobilization, the Design-Builder must have a Mobilization Plan approved by ASEM that includes:

b. A detailed schedule of mobilization activities.

c. A list of equipment, machinery, and resources to be mobilized.

d. A plan for the installation of temporary facilities (offices, restrooms, wash stations, break areas).

e. A security and access control plan.

f. An internal and external traffic management plan.

g. Staging Area Plan.

h. Initial safety inspection before commencing construction activities.

i. Initial staff training in emergency and safety procedures.

j. The Design-Builder must obtain ASEM approval regarding: (1) Required insurance certificates or endorsements; (2) Quality Control Plan (QC Plan); (3) Waste Management Plan; (4) Communications and Coordination Plan with ASEM; and (5) Log of equipment and machinery mobilized.

k. ASEM may stop work, issue corrective orders or apply contractual measures if the Design-Builder: (1) Does not comply with mobilization requirements;

(2) Installs temporary facilities without approval; (3) Affects critical AESM operations; and (4) Violates OSHA, EPA, OGPe, or applicable regulations.

42. Demobilization.

a. Prior to project completion, the Design-Builder shall submit a Demobilization Plan that includes: (1) A schedule for the removal of equipment, machinery, and temporary facilities; (2) Procedures for closing work areas; (3) A plan for restoring surfaces, access points, and affected areas; and (4) A plan for the final disposal of waste and materials.

b. The Design-Builder shall: (1) Dismantle and remove field offices, portable toilets, wash stations, and rest areas; (2) Remove fences, temporary signage, barriers, and auxiliary structures; (3) Disconnect and remove temporary electrical, water, and telecommunications connections; and (4) Certify proper waste disposal in accordance with EPA regulations.

c. Complete cleaning of all areas used.

d. Restoration of the land to its original condition or as specified by the ASEM.

e. Repair of damage caused by construction or mobilization activities.

f. Final inspection with the ASEM to verify compliance.

g. The Design-Builder shall deliver: (1) Demobilization Report; (2) Photographic evidence of removal and restoration; (3) Waste disposal certifications; (4) Final as-built drawings and required contractual documentation; and (5) Administrative and financial closure in accordance with the contract.

h. ASEM may issue corrective orders or apply contractual measures if the Design-Builder: (1) Fails to meet demobilization requirements; (2) Affects critical ASEM operations; and (3) Violates OSHA, EPA, OGPe, or other applicable regulations.

43. Protection of Existing Infrastructure

a. The Contractor shall establish minimum requirements for the protection, preservation, and safe handling of all existing infrastructure within or adjacent to the project area, including systems, structures, utilities, operational facilities, and critical elements whose integrity must be maintained during the execution of the works.

b. The Design-Builder will be responsible for implementing all activities and measures to:

i. Identify and document existing infrastructure and utilities.

ii. Protect it against damage, disruption, or impact.

iii. Coordinate with the ASEM and service providers any required interventions.

iv. Restore any damage caused by construction activities.

v. Installation of physical barriers, fences, protective panels, and visible signage.

vi. Protection of surfaces, doors, windows, entrances, and traffic routes.

vii. Protection through support, temporary diversions, or isolation.

viii. Excavation is prohibited without authorization and without completing the Utilities Clearance.

ix. Signage for restricted areas and alternative routes.

x. Vibration monitoring in critical areas.

xi. Implementation of low-impact construction methods.

xii. Acoustic barriers where necessary.

xiii. Installation of dust barriers and filters.

xiv. Proper management of runoff to prevent infiltration into existing infrastructure.

xv. Protection of drains and stormwater system.

xvi. Identification of sensitive or hazardous materials in existing areas.

xvii. Containment and handling protocols in accordance with EPA and OSHA regulations.

xviii. Documentation of incidents and corrective actions.

c. The Design-Builder shall conduct a complete survey that includes:

   i. Existing structures (buildings, walls, slabs, roofs).

   ii. Underground and overhead utilities (electrical, water, telecommunications, gas, sewer).

   iii. Institutional systems (medical gases, ductwork, drainage, HVAC).

   iv. Critical operational areas (rooms, laboratories, emergency access points).

d. Failure to comply with these requirements may result in: (1) Corrective action orders; (2) Work suspension; (3) Contractual adjustments; or (4) Liability for damages and associated costs.

44. Risk Management and Operational Continuity

a. The Contractor must establish the minimum requirements for the identification, assessment, mitigation, and monitoring of risks, as well as for ensuring the operational continuity of the ASEM's facilities during project execution.

   This applies to all design, construction, mobilization, temporary operation, and demobilization activities.

b. The Design-Builder will be responsible for: (1) Ensure the continuity of the ASEM's critical operations; (2) Develop mitigation, contingency, and emergency response plans; (3) Coordinate with the SEM and regulatory entities any intervention that affects essential services; and (4) Document and report risks, incidents, and corrective action.

c. The Design-Builder must prepare a Risk Assessment Report that includes: (1) Technical risks (design, engineering, critical systems); (2) Operational risks (access, traffic flow, essential services); (3) Construction risks (excavation, vibrations, heavy machinery); (4) Regulatory risks (permits, compliance, inspections); and (5) Environmental risks (dust, noise, runoff, hazardous materials).

d. The Contractor must perform the (1) Impact assessment of cost, schedule, scope, and operations; and (2) Identification of critical risks requiring immediate mitigation.

e. The Design-Builder must submit a Risk Mitigation & Contingency Plan that

includes: (1) Preventive measures for each identified risk; (2) Corrective actions and contingency protocols; (3) Assigned resources (personnel, equipment, budget); (4) Implementation schedule; and (5) Communication procedures with the ASEM.

f. All safety measures must be in place before commencing high-risk activities.

g. ASEM may require adjustments to the plan based on operational conditions.

h. The Design-Builder must maintain evidence of implementation of all plans.

i. The Design-Builder shall ensure that project activities do not affect the continued operation of: (1) Clinical and hospital services (if applicable); (2) Emergency electrical systems; (3) Water, medical gas, and HVAC systems; (4) Emergency access, patient routes, and institutional circulation; and (5) Electronic security and telecommunications systems.

j. The Design-Builder must submit an Operational Continuity Plan that includes: (1) Identification of essential ASEM services; (2) Protocols to minimize disruptions; (3) Procedures for scheduled outages; (4) Communication plan for operational impact notifications; and (5) Protection measures for critical infrastructure.

k. The Design-Builder must submit: (1) Weekly Risk Status Reports; (2) Incident reports within 24 hours; (2) Documentation of implemented corrective actions; and (3) Updates to the risk matrix as the project progresses.

l. The Design-Builder must activate the plan immediately upon any incident, notify ASEM immediately, document the event, and take action. This documentation must be submitted within 24 hours.

m. The Design-Builder must submit a Risk Closure Report with evidence of risk closure and certify that there are no residual risks that affect the operation of ASEM.

n. Failure to comply with these requirements may result in: (1) Corrective action orders; (2) Work suspension; (3) Contractual adjustments; and (4) Liability for damages and associated costs.

45. Software Project Manager

a. It will be the Contractor's responsibility to acquire a Software Project

Manager who will provide the necessary tools to plan, organize, lead, and control project activities, thereby ensuring the project's completion within the defined scope, schedule, and budget. These responsibilities include:

- Developing and maintaining the project plan, schedule, and roadmap.
- Coordinating cross-functional teams, including developers and quality assurance.
- Facilitating the scheduling of daily stand-ups, retrospectives, and other meetings.
- Identifying and managing project risks, issues, and dependencies.
- Monitoring progress and preparing weekly status reports.
- Ensuring that project deliverables meet quality standards and stakeholder expectations.
- Managing communication between technical teams and management.
- Overseeing project documentation, change requests, and governance

b. The program must have the capacity to

i. Centralization of information: All project documentation (plans, RFIs, submittals, contracts, photos, etc.) is accessible to all project stakeholders (Designer, Owner, Inspection, Commissioning, Builder, etc.).

ii. Quality control and safety: Forms, inspections, checklists and reports

iii. Access: Works on web and mobile. Ideal for field and office teams.

iv. Integrations with other tools: Connect with accounting, design, and documentation systems.

v. Deliverables, including but not limited to:

- Project charter and scope document

- Detailed project plan and schedules
- Risk and issue log
- Weekly progress reports
- Planning and reviewing documentation
- Processing of Submittals, Submittal Logs, RFIs, and meeting minutes
- Final project closure report

WELDERS - Receive rate prescribed for craft performing operation to which welding is incidental.

==========

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (iii)).

The body of each wage determination lists the classifications and wage rates that have been found to be prevailing for the type(s) of construction and geographic area covered by the wage determination. The classifications are listed in alphabetical order under rate identifiers indicating whether the particular rate is a union rate (current union negotiated rate), a survey rate, a weighted union average rate, a state adopted rate, or a supplemental classification rate.

Union Rate Identifiers

A four-letter identifier beginning with characters other than """"SU"""", """"UAVG"""", ?SA?, or ?SC? denotes that a union rate was prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2024. PLUM is an identifier of the union

whose collectively bargained rate prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. The date, 07/01/2024 in the example, is the effective date of the most current negotiated rate.

Union prevailing wage rates are updated to reflect all changes over time that are reported to WHD in the rates in the collective bargaining agreement (CBA) governing the classification.

Union Average Rate Identifiers

The UAVG identifier indicates that no single rate prevailed for those classifications, but that 100% of the data reported for the classifications reflected union rates. EXAMPLE: UAVG-OH-0010 01/01/2024. UAVG indicates that the rate is a weighted union average rate. OH indicates the State of Ohio. The next number, 0010 in the example, is an internal number used in producing the wage determination. The date, 01/01/2024 in the example, indicates the date the wage determination was updated to reflect the most current union average rate.

A UAVG rate will be updated once a year, usually in January, to reflect a weighted average of the current rates in the collective bargaining agreements on which the rate is based.

Survey Rate Identifiers

The """SU""" identifier indicates that either a single non-union rate prevailed (as defined in 29 CFR 1.2) for this classification in the survey or that the rate was derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As a weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SUFL2022-007 6/27/2024. SU indicates the rate is a single non-union prevailing rate or a weighted average of survey data for that classification. FL indicates the State of Florida. 2022 is the year of the survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. The date, 6/27/2024 in the example, indicates the survey completion date for the classifications and rates under that identifier.

?SU? wage rates typically remain in effect until a new survey is conducted. However, the Wage and Hour Division (WHD) has the discretion to update such rates under 29 CFR 1.6(c)(1).

State Adopted Rate Identifiers

The """SA""" identifier indicates that the classifications and prevailing wage rates set by a state (or local) government were adopted under 29 C.F.R 1.3(g)-(h). Example: SAME2023-007 01/03/2024. SA reflects that the rates are state adopted. ME refers to the State of Maine. 2023 is the year during which the state completed the survey on which the listed classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. The date, 01/03/2024 in the example, reflects the date on which the classifications and rates under the ?SA? identifier took effect under state law in the state from which the rates were

adopted.

WAGE DETERMINATION APPEALS PROCESS

1) Has there been an initial decision in the matter? This can be:

a) a survey underlying a wage determination
b) an existing published wage determination
c) an initial WHD letter setting forth a position on a wage determination matter
d) an initial conformance (additional classification and rate) determination

On survey related matters, initial contact, including requests for summaries of surveys, should be directed to the WHD Branch of Wage Surveys. Requests can be submitted via email to davisbaconinfo@dol.gov or by mail to:

Branch of Wage Surveys
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

Regarding any other wage determination matter such as conformance decisions, requests for initial decisions should be directed to the WHD Branch of Construction Wage Determinations. Requests can be submitted via email to BCWD-Office@dol.gov or by mail to:

Branch of Construction Wage Determinations
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

2) If an initial decision has been issued, then any interested party (those affected by the action) that disagrees with the decision can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Requests for review and reconsideration can be submitted via email to dba.reconsideration@dol.gov or by mail to:

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210.

==========

END OF GENERAL DECISION"

Attachment 4: HUD 4010

A. APPLICABILITY

The Project or Program to which the construction work covered by this Contract pertains is being assisted by the United States of America, and the following Federal Labor Standards Provisions are included in this Contract pursuant to the provisions applicable to such Federal assistance.

1. Minimum wages and fringe benefits

i. All laborers and mechanics employed or working upon the site of the work (or otherwise working in construction or development of the project under a development statute), will be paid unconditionally and not less often than once a week, and without subsequent deduction or rebate on any account (except such payroll deductions as are permitted by regulations issued by the Secretary of Labor under the Copeland Act (29 CFR part 3)), the full amount of basic hourly wages and bona fide fringe benefits (or cash equivalents thereof) due at time of payment computed at rates not less than those contained in the wage determination of the Secretary of Labor which is attached hereto and made a part hereof, regardless of any contractual relationship which may be alleged to exist between the contractor and such laborers and mechanics. As provided in 29 CFR 5.5(d) and (e), the appropriate wage determinations are effective by operation of law even if they have not been attached to the contract. Contributions made or costs reasonably anticipated for bona fide fringe benefits under the Davis-Bacon Act (40 U.S.C. 3141(2)(B)) on behalf of laborers or mechanics are considered wages paid to such laborers or mechanics, subject to the provisions of paragraph (a)(1)(v) of these contract clauses; also, regular contributions made or costs incurred for more than a weekly period (but not less often than quarterly) under plans, funds, or programs which cover the particular weekly period, are deemed to be constructively made or incurred during such weekly period. Such laborers and mechanics must be paid the appropriate wage rate and fringe benefits on the wage determination for the classification(s) of work actually performed, without regard to skill, except as provided in 29 CFR 5.5(a)(4). Laborers or mechanics performing work in more than one classification may be compensated at the rate specified for each classification for the time actually worked therein: *Provided,* That the employer's payroll records accurately set forth the time spent in each classification in which work is performed. The wage determination (including any additional classifications and wage rates conformed under 29 CFR 5.5(a)(1)(iii)) and the Davis-Bacon poster (WH-1321) must be posted at all times by the contractor and its subcontractors at the site of the work in a prominent and accessible place where it can be easily seen by the workers.

ii. Frequently recurring classifications

A. In addition to wage and fringe benefit rates that have been determined to be prevailing under the procedures set forth in 29 CFR part 1, a wage determination may contain, pursuant to § 1.3(f), wage and fringe benefit rates for classifications of laborers and mechanics for which conformance requests are regularly submitted pursuant to 29 CFR 5.5(a)(1)(iii), provided that:

1. The work performed by the classification is not performed by a classification in the wage determination for which a prevailing wage rate has been determined;

2. The classification is used in the area by the construction industry; and

3. The wage rate for the classification bears a reasonable relationship to the prevailing wage rates contained in the wage determination.

B. The Administrator will establish wage rates for such classifications in accordance with 29 CFR 5.5(a)(1)(iii)(A)(3). Work performed in such a classification must be paid at no less than the wage and fringe benefit rate listed on the wage determination for such classification.

iii. Conformance

A. The contracting officer must require that any class of laborers or mechanics, including helpers, which is not listed in the wage determination and which is to be employed under the contract be

classified in conformance with the wage determination. Conformance of an additional classification and wage rate and fringe benefits is appropriate only when the following criteria have been met:

1. The work to be performed by the classification requested is not performed by a classification in the wage determination; and
2. The classification is used in the area by the construction industry; and
3. The proposed wage rate, including any bona fide fringe benefits, bears a reasonable relationship to the wage rates contained in the wage determination.

B. The conformance process may not be used to split, subdivide, or otherwise avoid application of classifications listed in the wage determination.

C. If the contractor and the laborers and mechanics to be employed in the classification (if known), or their representatives, and the contracting officer agree on the classification and wage rate (including the amount designated for fringe benefits where appropriate), a report of the action taken will be sent by the contracting officer by email to DBAconformance@dol.gov. The Administrator, or an authorized representative, will approve, modify, or disapprove every additional classification action within 30 days of receipt and so advise the contracting officer or will notify the contracting officer within the 30–day period that additional time is necessary.

D. In the event the contractor, the laborers or mechanics to be employed in the classification or their representatives, and the contracting officer do not agree on the proposed classification and wage rate (including the amount designated for fringe benefits, where appropriate), the contracting officer will, by email to DBAconformance@dol.gov, refer the questions, including the views of all interested parties and the recommendation of the contracting officer, to the Administrator for determination. The Administrator, or an authorized representative, will issue a determination within 30 days of receipt and so advise the contracting officer or will notify the contracting officer within the 30–day period that additional time is necessary.

E. The contracting officer must promptly notify the contractor of the action taken by the Wage and Hour Division under 29 CFR 5.5 (a)(1)(iii)(C) and (D). The contractor must furnish a written copy of such determination to each affected worker or it must be posted as a part of the wage determination. The wage rate (including fringe benefits where appropriate) determined pursuant to 29 CFR 5.5 (a)(1)(iii)(C) or (D) must be paid to all workers performing work in the classification under this contract from the first day on which work is performed in the classification.

iv. Fringe benefits not expressed as an hourly rate

Whenever the minimum wage rate prescribed in the contract for a class of laborers or mechanics includes a fringe benefit which is not expressed as an hourly rate, the contractor may either pay the benefit as stated in the wage determination or may pay another bona fide fringe benefit or an hourly cash equivalent thereof.

v. Unfunded plans

If the contractor does not make payments to a trustee or other third person, the contractor may consider as part of the wages of any laborer or mechanic the amount of any costs reasonably anticipated in providing bona fide fringe benefits under a plan or program, *Provided,* That the Secretary of Labor has found, upon the written request of the contractor, in accordance with the criteria set forth in 29 CFR 5.28, that the applicable standards of the Davis-Bacon Act have been met. The Secretary of Labor may require the contractor to set aside in a separate account assets for the meeting of obligations under the plan or program.

vi. Interest In the event of a failure to pay all or part of the wages required by the contract, the contractor will be required to pay interest on any underpayment of wages.

2. Withholding

i. Withholding requirements

The U. S. Department of Housing and Urban Development may, upon its own action, or must, upon written request of an authorized representative of the Department of Labor, withhold or cause to be withheld from the contractor so much of the accrued payments or advances as may be considered necessary to satisfy the liabilities of the prime contractor or any subcontractor for the full amount of wages and monetary relief, including interest, required by the clauses set forth in 29 CFR 5.5(a) for violations of this contract, or to satisfy any such liabilities required by any other Federal contract, or federally assisted contract subject to Davis-Bacon labor standards, that is held by the same prime contractor (as defined in 29 CFR 5.2). The necessary funds may be withheld from the contractor under this contract, any other Federal contract with the same prime contractor, or any other federally assisted contract that is subject to Davis-Bacon labor standards requirements and is held by the same prime contractor, regardless of whether the other contract was awarded or assisted by the same agency, and such funds may be used to satisfy the contractor liability for which the funds were withheld. In the event of a contractor's failure to pay any laborer or mechanic, including any apprentice or helper working on the site of the work (or otherwise working in construction or development of the project under a development statute) all or part of the wages required by the contract, or upon the contractor's failure to submit the required records as discussed in 29 CFR 5.5(a)(3)(iv), HUD may on its own initiative and after written notice to the contractor, sponsor, applicant, owner, or other entity, as the case may be, take such action as may be necessary to cause the suspension of any further payment, advance, or guarantee of funds until such violations have ceased.

ii. Priority to withheld funds

The Department has priority to funds withheld or to be withheld in accordance with 29 CFR 5.5(a)(2)(i) or (b)(3)(i), or both, over claims to those funds by:

- **A.** A contractor's surety(ies), including without limitation performance bond sureties and payment bond sureties;
- **B.** A contracting agency for its reprocurement costs;
- **C.** A trustee(s) (either a court-appointed trustee or a U.S. trustee, or both) in bankruptcy of a contractor, or a contractor's bankruptcy estate;
- **D.** A contractor's assignee(s);
- **E.** A contractor's successor(s); or
- **F.** A claim asserted under the Prompt Payment Act, 31 U.S.C. 3901-3907.

3. Records and certified payrolls

i. Basic record requirements

- **A. Length of record retention.** All regular payrolls and other basic records must be maintained by the contractor and any subcontractor during the course of the work and preserved for all laborers and mechanics working at the site of the work (or otherwise working in construction or development of the project under a development statute) for a period of at least 3 years after all the work on the prime contract is completed.
- **B. Information required** Such records must contain the name; Social Security number; last known address, telephone number, and email address of each such worker; each worker's correct classification(s) of work actually performed; hourly rates of wages paid (including rates of contributions or costs anticipated for bona fide fringe benefits or cash equivalents thereof of the types described in 40 U.S.C. 3141(2)(B) of the Davis-Bacon Act); daily and weekly number of hours actually worked in total and on each covered contract; deductions made; and actual wages paid.
- **C. Additional records relating to fringe benefits***.* Whenever the Secretary of Labor has found under 29 CFR 5.5(a)(1)(v) that the wages of any laborer or mechanic include the amount of any

costs reasonably anticipated in providing benefits under a plan or program described in 40 U.S.C. 3141(2)(B) of the Davis-Bacon Act, the contractor must maintain records which show that the commitment to provide such benefits is enforceable, that the plan or program is financially responsible, and that the plan or program has been communicated in writing to the laborers or mechanics affected, and records which show the costs anticipated or the actual cost incurred in providing such benefits.

D. Additional records relating to apprenticeship Contractors with apprentices working under approved programs must maintain written evidence of the registration of apprenticeship programs, the registration of the apprentices, and the ratios and wage rates prescribed in the applicable programs.

ii. Certified payroll requirements

A. Frequency and method of submission The contractor or subcontractor must submit weekly, for each week in which any DBA- or Related Acts-covered work is performed, certified payrolls to HUD if the agency is a party to the contract, but if the agency is not such a party, the contractor will submit the certified payrolls to the applicant, sponsor, owner, or other entity, as the case may be, that maintains such records, for transmission to HUD. The prime contractor is responsible for the submission of all certified payrolls by all subcontractors. A contracting agency or prime contractor may permit or require contractors to submit certified payrolls through an electronic system, as long as the electronic system requires a legally valid electronic signature; the system allows the contractor, the contracting agency, and the Department of Labor to access the certified payrolls upon request for at least 3 years after the work on the prime contract has been completed; and the contracting agency or prime contractor permits other methods of submission in situations where the contractor is unable or limited in its ability to use or access the electronic system

B. Information required The certified payrolls submitted must set out accurately and completely all of the information required to be maintained under 29 CFR 5.5(a)(3)(i)(B), except that full Social Security numbers and last known addresses, telephone numbers, and email addresses must not be included on weekly transmittals. Instead, the certified payrolls need only include an individually identifying number for each worker (*e.g.*, the last four digits of the worker's Social Security number). The required weekly certified payroll information may be submitted using Optional Form WH-347 or in any other format desired. Optional Form WH-347 is available for this purpose from the Wage and Hour Division Web site at *https://www.dol.gov/sites/dolgov/files/WHD/legacy/files/wh347.pdf* or its successor website. It is not a violation of this section for a prime contractor to require a subcontractor to provide full Social Security numbers and last known addresses, telephone numbers, and email addresses to the prime contractor for its own records, without weekly submission by the subcontractor to the sponsoring government agency (or the applicant, sponsor, owner, or other entity, as the case may be, that maintains such records).

C. Statement of Compliance Each certified payroll submitted must be accompanied by a "Statement of Compliance," signed by the contractor or subcontractor, or the contractor's or subcontractor's agent who pays or supervises the payment of the persons working on the contract, and must certify the following:

1. That the certified payroll for the payroll period contains the information required to be provided under 29 CFR 5.5(a)(3)(ii), the appropriate information and basic records are being maintained under 29 CFR 5.5 (a)(3)(i), and such information and records are correct and complete;

2. That each laborer or mechanic (including each helper and apprentice) working on the contract during the payroll period has been paid the full weekly wages earned, without rebate, either directly or indirectly, and that no deductions have been made either directly or indirectly

from the full wages earned, other than permissible deductions as set forth in 29 CFR part 3; and

3. That each laborer or mechanic has been paid not less than the applicable wage rates and fringe benefits or cash equivalents for the classification(s) of work actually performed, as specified in the applicable wage determination incorporated into the contract.

D. Use of Optional Form WH-347 The weekly submission of a properly executed certification set forth on the reverse side of Optional Form WH-347 will satisfy the requirement for submission of the "Statement of Compliance" required by 29 CFR 5.5(a)(3)(ii)(C).

E. Signature The signature by the contractor, subcontractor, or the contractor's or subcontractor's agent must be an original handwritten signature or a legally valid electronic signature.

F. Falsification The falsification of any of the above certifications may subject the contractor or subcontractor to civil or criminal prosecution under 18 U.S.C. 1001 and 31 U.S.C. 3729.

G. Length of certified payroll retention The contractor or subcontractor must preserve all certified payrolls during the course of the work and for a period of 3 years after all the work on the prime contract is completed.

iii. Contracts, subcontracts, and related documents The contractor or subcontractor must maintain this contract or subcontract and related documents including, without limitation, bids, proposals, amendments, modifications, and extensions. The contractor or subcontractor must preserve these contracts, subcontracts, and related documents during the course of the work and for a period of 3 years after all the work on the prime contract is completed.

iv Required disclosures and access

A. Required record disclosures and access to workers The contractor or subcontractor must make the records required under 29 CFR 5.5(a)(3)(i)–(iii), and any other documents that HUD or the Department of Labor deems necessary to determine compliance with the labor standards provisions of any of the applicable statutes referenced by 29 CFR 5.1, available for inspection, copying, or transcription by authorized representatives of HUD or the Department of Labor, and must permit such representatives to interview workers during working hours on the job.

B. Sanctions for non-compliance with records and worker access requirements If the contractor or subcontractor fails to submit the required records or to make them available, or refuses to permit worker interviews during working hours on the job, the Federal agency may, after written notice to the contractor, sponsor, applicant, owner, or other entity, as the case may be, that maintains such records or that employs such workers, take such action as may be necessary to cause the suspension of any further payment, advance, or guarantee of funds. Furthermore, failure to submit the required records upon request or to make such records available, or to permit worker interviews during working hours on the job, may be grounds for debarment action pursuant to 29 CFR 5.12. In addition, any contractor or other person that fails to submit the required records or make those records available to WHD within the time WHD requests that the records be produced will be precluded from introducing as evidence in an administrative proceeding under 29 CFR part 6 any of the required records that were not provided or made available to WHD. WHD will take into consideration a reasonable request from the contractor or person for an extension of the time for submission of records. WHD will determine the reasonableness of the request and may consider, among other things, the location of the records and the volume of production.

C. Required information disclosures Contractors and subcontractors must maintain the full Social Security number and last known address, telephone number, and email address of each covered worker, and must provide them upon request to HUD if the agency is a party to

the contract, or to the Wage and Hour Division of the Department of Labor. If the Federal agency is not such a party to the contract, the contractor, subcontractor, or both, must, upon request, provide the full Social Security number and last known address, telephone number, and email address of each covered worker to the applicant, sponsor, owner, or other entity, as the case may be, that maintains such records, for transmission to HUD, the contractor, or the Wage and Hour Division of the Department of Labor for purposes of an investigation or other compliance action.

4. Apprentices and equal employment opportunity

i. Apprentices

A. Rate of pay Apprentices will be permitted to work at less than the predetermined rate for the work they perform when they are employed pursuant to and individually registered in a bona fide apprenticeship program registered with the U.S. Department of Labor, Employment and Training Administration, Office of Apprenticeship (OA), or with a State Apprenticeship Agency recognized by the OA. A person who is not individually registered in the program, but who has been certified by the OA or a State Apprenticeship Agency (where appropriate) to be eligible for probationary employment as an apprentice, will be permitted to work at less than the predetermined rate for the work they perform in the first 90 days of probationary employment as an apprentice in such a program. In the event the OA or a State Apprenticeship Agency recognized by the OA withdraws approval of an apprenticeship program, the contractor will no longer be permitted to use apprentices at less than the applicable predetermined rate for the work performed until an acceptable program is approved.

B. Fringe benefits Apprentices must be paid fringe benefits in accordance with the provisions of the apprenticeship program. If the apprenticeship program does not specify fringe benefits, apprentices must be paid the full amount of fringe benefits listed on the wage determination for the applicable classification. If the Administrator determines that a different practice prevails for the applicable apprentice classification, fringe benefits must be paid in accordance with that determination.

C. Apprenticeship ratio The allowable ratio of apprentices to journeyworkers on the job site in any craft classification must not be greater than the ratio permitted to the contractor as to the entire work force under the registered program or the ratio applicable to the locality of the project pursuant to 29 CFR 5.5(a)(4)(i)(D). Any worker listed on a payroll at an apprentice wage rate, who is not registered or otherwise employed as stated in 29 CFR 5.5(a)(4)(i)(A), must be paid not less than the applicable wage rate on the wage determination for the classification of work actually performed. In addition, any apprentice performing work on the job site in excess of the ratio permitted under this section must be paid not less than the applicable wage rate on the wage determination for the work actually performed.

D. Reciprocity of ratios and wage rates Where a contractor is performing construction on a project in a locality other than the locality in which its program is registered, the ratios and wage rates (expressed in percentages of the journeyworker's hourly rate) applicable within the locality in which the construction is being performed must be observed. If there is no applicable ratio or wage rate for the locality of the project, the ratio and wage rate specified in the contractor's registered program must be observed.

ii Equal employment opportunity The use of apprentices and journeyworkers under this part must be in conformity with the equal employment opportunity requirements of Executive Order 11246, as amended, and 29 CFR part 30.

5 Compliance with Copeland Act requirements. The contractor shall comply with the requirements of 29 CFR part 3, which are incorporated by reference in this contract.

6 Subcontracts. The contractor or subcontractor must insert in any subcontracts the clauses contained in 29 CFR 5.5(a)(1) through (11), along with the applicable wage determination(s) and such other clauses or contract modifications as the U.S. Department of Housing and
Urban Development may by appropriate instructions require, and a clause requiring the subcontractors to include these clauses and wage determination(s) in any lower tier subcontracts. The prime contractor is responsible for the compliance by any subcontractor or lower tier subcontractor with all the contract clauses in this section. In the event of any violations of these clauses, the prime contractor and any subcontractor(s) responsible will be liable for any unpaid wages and monetary relief, including interest from the date of the underpayment or loss, due to any workers of lower-tier subcontractors, and may be subject to debarment, as appropriate.

7 Contract termination: debarment. A breach of the contract clauses in 29 CFR 5.5 may be grounds for termination of the contract, and for debarment as a contractor and a subcontractor as provided in 29 CFR 5.12.

8 Compliance with Davis-Bacon and Related Act requirements. All rulings and interpretations of the Davis-Bacon and Related Acts contained in 29 CFR parts 1, 3, and 5 are herein incorporated by reference in this contract.

9 Disputes concerning labor standards. Disputes arising out of the labor standards provisions of this contract shall not be subject to the general disputes clause of this contract. Such disputes shall be resolved in accordance with the procedures of the Department of Labor set forth in 29 CFR parts 5, 6, and 7. Disputes within the meaning of this clause include disputes between the contractor (or any of its subcontractors) and the contracting agency, the U.S. Department of Labor, or the employees or their representatives.

10. Certification of eligibility.

i. By entering into this contract, the contractor certifies that neither it nor any person or firm who has an interest in the contractor's firm is a person or firm ineligible to be awarded Government contracts by virtue of 40 U.S.C. 3144(b) or 29 CFR 5.12(a).

ii. No part of this contract shall be subcontracted to any person or firm ineligible for award of a Government contract by virtue of 40 U.S.C. 3144(b) or 29 CFR 5.12(a).

iii. The penalty for making false statements is prescribed in the U.S. Code, Title 18 Crimes and Criminal Procedure, 18 U.S.C. 1001.

11 Anti-retaliation It is unlawful for any person to discharge, demote, intimidate, threaten, restrain, coerce, blacklist, harass, or in any other manner discriminate against, or to cause any person to discharge, demote, intimidate, threaten, restrain, coerce, blacklist, harass, or in any other manner discriminate against, any worker or job applicant for:

- **i.** Notifying any contractor of any conduct which the worker reasonably believes constitutes a violation of the DBA, Related Acts, or 29 CFR parts 1, 3, or 5;
- **ii.** Filing any complaint, initiating or causing to be initiated any proceeding, or otherwise asserting or seeking to assert on behalf of themselves or others any right or protection under the DBA, Related Acts, or 29 CFR parts 1, 3, or 5;
- **iii.** Cooperating in any investigation or other compliance action, or testifying in any proceeding under the DBA, Related Acts, or 29 CFR parts 1, 3, or 5; or
- **iv.** Informing any other person about their rights under the DBA, Related Acts, or 29 CFR parts 1, 3, or 5.

B. Contract Work Hours and Safety Standards Act (CWHSSA)

The Agency Head must cause or require the contracting officer to insert the following clauses set forth in 29 CFR 5.5(b)(1), (2), (3), (4), and (5) in full, or (for contracts covered by the Federal Acquisition Regulation) by reference, in any contract in an amount in excess of $100,000 and subject to the overtime provisions of the Contract Work Hours and Safety Standards Act. These clauses must

be inserted in addition to the clauses required by 29 CFR 5.5(a) or 4.6. As used in this paragraph, the terms "laborers and mechanics" include watchpersons and guards.

1. **Overtime requirements.** No contractor or subcontractor contracting for any part of the contract work which may require or involve the employment of laborers or mechanics shall require or permit any such laborer or mechanic in any workweek in which he or she is employed on such work to work in excess of forty hours in such workweek unless such laborer or mechanic receives compensation at a rate not less than one and one-half times the basic rate of pay for all hours worked in excess of forty hours in such workweek.
2. **Violation; liability for unpaid wages; liquidated damages.** In the event of any violation of the clause set forth in 29 CFR 5.5(b)(1) the contractor and any subcontractor responsible therefor shall be liable for the unpaid wages and interest from the date of the underpayment. In addition, such contractor and subcontractor shall be liable to the United States (in the case of work done under contract for the District of Columbia or a territory, to such District or to such territory), for liquidated damages. Such liquidated damages shall be computed with respect to each individual laborer or mechanic, including watchpersons and guards, employed in violation of the clause set forth in 29 CFR 5.5(b)(1), in the sum of $31 for each calendar day on which such individual was required or permitted to work in excess of the standard workweek of forty hours without payment of the overtime wages required by the clause set forth in 29 CFR 5.5(b)(1).
3. **Withholding for unpaid wages and liquidated damages**

i. **Withholding process** The U.S Department of Housing and Urban Development or the recipient of Federal assistance may, upon its own action, or must, upon written request of an authorized representative of the Department of Labor, withhold or cause to be withheld from the contractor so much of the accrued payments or advances as may be considered necessary to satisfy the liabilities of the prime contractor or any subcontractor for any unpaid wages; monetary relief, including interest; and liquidated damages required by the clauses set forth in 29 CFR 5.5(b) on this contract, any other Federal contract with the same prime contractor, or any other federally assisted contract subject to the Contract Work Hours and Safety Standards Act that is held by the same prime contractor (as defined in 29 CFR 5.2). The necessary funds may be withheld from the contractor under this contract, any other Federal contract with the same prime contractor, or any other federally assisted contract that is subject to the Contract Work Hours and Safety Standards Act and is held by the same prime contractor, regardless of whether the other contract was awarded or assisted by the same agency, and such funds may be used to satisfy the contractor liability for which the funds were withheld.

ii **Priority to withheld funds** The Department has priority to funds withheld or to be withheld in accordance with 29 CFR 5.5(a)(2)(i) or (b)(3)(i), or both, over claims to those funds by:

- **A.** A contractor's surety(ies), including without limitation performance bond sureties and payment bond sureties;
- **B.** A contracting agency for its reprocurement costs;
- **C.** A trustee(s) (either a court-appointed trustee or a U.S. trustee, or both) in bankruptcy of a contractor, or a contractor's bankruptcy estate;
- **D.** A contractor's assignee(s);
- **E.** A contractor's successor(s); or
- **F.** A claim asserted under the Prompt Payment Act, 31 U.S.C. 3901-3907.

4. ***Subcontracts***. The contractor or subcontractor must insert in any subcontracts the clauses set forth in 29 CFR 5.5(b)(1) through (5) and a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. The prime contractor is responsible for compliance by any subcontractor or lower tier subcontractor with the clauses set forth in 29 CFR 5.5(b)(1) through (5). In the event of any violations of these clauses, the prime contractor and any subcontractor(s) responsible will be liable for any unpaid wages and monetary relief, including interest from the date of the underpayment or loss,

due to any workers of lower-tier subcontractors, and associated liquidated damages and may be subject to debarment, as appropriate.

5 Anti-retaliation It is unlawful for any person to discharge, demote, intimidate, threaten, restrain, coerce, blacklist, harass, or in any other manner discriminate against, or to cause any person to discharge, demote, intimidate, threaten, restrain, coerce, blacklist, harass, or in any other manner discriminate against, any worker or job applicant for:

- **i.** Notifying any contractor of any conduct which the worker reasonably believes constitutes a violation of the Contract Work Hours and Safety Standards Act (CWHSSA) or its implementing regulations in 29 CFR part 5;
- **ii.** Filing any complaint, initiating or causing to be initiated any proceeding, or otherwise asserting or seeking to assert on behalf of themselves or others any right or protection under CWHSSA or 29 CFR part 5;
- **iii.** Cooperating in any investigation or other compliance action, or testifying in any proceeding under CWHSSA or 29 CFR part 5; or
- **iv.** Informing any other person about their rights under CWHSSA or 29 CFR part 5.

C. CWHSSA required records clause In addition to the clauses contained in 29 CFR 5.5(b), in any contract subject only to the Contract Work Hours and Safety Standards Act and not to any of the other laws referenced by 29 CFR 5.1, the Agency Head must cause or require the contracting officer to insert a clause requiring that the contractor or subcontractor must maintain regular payrolls and other basic records during the course of the work and must preserve them for a period of 3 years after all the work on the prime contract is completed for all laborers and mechanics, including guards and watchpersons, working on the contract. Such records must contain the name; last known address, telephone number, and email address; and social security number of each such worker; each worker's correct classification(s) of work actually performed; hourly rates of wages paid; daily and weekly number of hours actually worked; deductions made and actual wages paid. Further, the Agency Head must cause or require the contracting officer to insert in any such contract a clause providing that the records to be maintained under this paragraph must be made available by the contractor or subcontractor for inspection, copying, or transcription by authorized representatives of the (write the name of agency) and the Department of Labor, and the contractor or subcontractor will permit such representatives to interview workers during working hours on the job.

D. Incorporation of contract clauses and wage determinations by reference Although agencies are required to insert the contract clauses set forth in this section, along with appropriate wage determinations, in full into covered contracts, and contractors and subcontractors are required to insert them in any lower-tier subcontracts, the incorporation by reference of the required contract clauses and appropriate wage determinations will be given the same force and effect as if they were inserted in full text.

E. Incorporation by operation of law The contract clauses set forth in this section (or their equivalent under the Federal Acquisition Regulation), along with the correct wage determinations, will be considered to be a part of every prime contract required by the applicable statutes referenced by 29 CFR 5.1 to include such clauses, and will be effective by operation of law, whether or not they are included or incorporated by reference into such contract, unless the Administrator grants a variance, tolerance, or exemption from the application of this paragraph. Where the clauses and applicable wage determinations are effective by operation of law under this paragraph, the prime contractor must be compensated for any resulting increase in wages in accordance with applicable law.

F. HEALTH AND SAFETY

The provisions of this paragraph (F) are applicable where the amount of the prime contract exceeds **$100,000**.

1. No laborer or mechanic shall be required to work in surroundings or under working conditions which are unsanitary, hazardous, or dangerous to his or her health and safety, as determined under construction safety and health standards promulgated by the Secretary of Labor by regulation.
2. The contractor shall comply with all regulations issued by the Secretary of Labor pursuant to 29 CFR Part 1926 and failure to comply may result in imposition of sanctions pursuant to the Contract Work Hours and Safety Standards Act, (Public Law 91-54, 83 Stat 96), 40 U.S.C. § 3701 et seq.
3. The contractor shall include the provisions of this paragraph in every subcontract, so that such provisions will be binding on each subcontractor. The contractor shall take such action with respect to any subcontractor as the Secretary of Housing and Urban Development or the Secretary of Labor shall direct as a means of enforcing such provisions.

Attachment 5: INSURANCE REQUIREMENTS AND BONDING SPECIFICATIONS

A. In General

The **DESIGN-BUILD CONTRACTOR** shall obtain and maintain, at its own expense and for the duration of the contract including any warranty periods under the Contract are satisfied, the insurance coverages set forth below.

These insurance requirements are minimum requirements for the Contract and in no way limit any indemnity covenants in the Contract. **ASEM** and the Puerto Rico Department of Housing (**PRDOH**) do not warrant that these minimum limits are sufficient to protect the **DESIGN-BUILD CONTRACTOR** from liabilities that might arise out of the performance of the work under the Contract by the **DESIGN-BUILD CONTRACTOR**, its agents, representatives, employees, or subcontractors.

The insurance required hereunder shall not be interpreted to relieve the **DESIGN-BUILD CONTRACTOR** of any obligations under the Contract. The **DESIGN-BUILD CONTRACTOR** shall remain fully liable for all deductibles and amounts in excess of the coverage actually realized.

B. Minimum scope and limit of insurance:

Coverage should be at least as broad as to be requested in applicable acquisition processes:

1. **Surety Bonds:** The **DESIGN-BUILD CONTRACTOR** must provide or cause those conducting the work to provide and maintain bonds covering the faithful performance of the contract and payment of all obligations in the following amounts:
   a) **Bid Bond**: 5% of the contract value.
   b) **Performance Bond**: 100% of the contract value, including change orders.
   c) **Payment Bond**: 100% of the contract value, including change orders.
   d) **Wage Payment Bond:** At least twenty percent (20%) of the contract value, guaranteeing payment of wages to the **DESIGN-BUILD CONTRACTOR's** laborers and employees, as required under Puerto Rico Law 111-1961. This bond is in addition to the **Payment Bond** and must meet all applicable statutory and regulatory requirements.

2. **Commercial General Liability Insurance**

Attachment 5: INSURANCE REQUIREMENTS AND BONDING SPECIFICATIONS

The **DESIGN-BUILD CONTRACTOR** must provide or cause those conducting the work to provide and maintain Commercial General Liability Insurance (broad form coverage) insuring against claims for bodily injury, property damage, personal injury and advertising injury that shall be no less comprehensive and no more restrictive than the coverage provided by Insurance Services Office (**ISO**) form for Commercial General Liability (**CG 00-01**). By its terms or appropriate endorsements such insurance shall include the following coverage, to wit: Bodily Injury, Property Damage, Fire Legal Liability, Personal Injury, Blanket Contractual, Independent Contractors, Premises Operations, Products and Completed Operations. The policy cannot be endorsed to exclude the perils of explosion (**x**), collapse (**c**) and underground (**u**) exposures without the specific written approval of the Owner.

If Commercial General Liability Insurance or other form with a general aggregate limit and products and completed operations aggregate limit is used, then the aggregate limits shall apply separately to the Project, or the **DESIGN-BUILD CONTRACTOR** may obtain separate insurance to provide the required limit which shall not be subject to depletion because of claims arising out of any other project or activity of the **DESIGN-BUILD CONTRACTOR.**

Type of Coverage:	Occurrence Basis
Amount of Coverage	
• General Aggregate	$2,000,000
• Each Occurrence	$1,000,000
• Products – Completed Operations Aggregate	$1,000,000
• Personal and Advertising Injury	$1,000,000
• Contractual Liability	$1,000,000
• Fire Legal Liability	$ 50,000
• Medical Expense	$ 5,000

a) Policy will include the following additional insured language: Puerto Rico Department of Housing (**PRDOH**), Puerto Rico Government, US Department of Housing and Urban Development **(HUD)**, **ASEM**, its officers, officials, agents, and employees, will be named as additional insureds with respect to liability arising out of the activities performed by or on behalf of the **DESIGN-BUILD CONTRACTOR**.

b) Policy will contain a waiver of subrogation against Puerto Rico Department of Housing (**PRDOH**), Puerto Rico Government, US Department of Housing and Urban Development **(HUD)**, **ASEM**, its officers, officials, agents, and employees, for losses arising from work performed by or on behalf of the **DESIGN-BUILD CONTRACTOR.**

c) Duration of Coverage: liability policies shall continue coverage for a minimum of five (**5**) years for Completed Operations liability coverage. Such Insurance must be maintained, and evidence of insurance must be provided for at least five (**5**) years after completion of the contract of work.

3. Automobile Liability Insurance

The **DESIGN-BUILD CONTRACTOR** must provide or cause those conducting the work to provide and maintain Comprehensive Automobile Liability Insurance insuring against claims for bodily injury and property damage and covering the ownership, maintenance or use of any auto or all owned/leased and non-owned and hired vehicles (Symbols 2, 8 and 9) used in the performance of the Work, both on and off the Project Site, including loading and unloading. The coverage shall be provided by Insurance Services Office form for Commercial Auto Coverage (**CA-00-01**) or equivalent.

Type of Coverage: Occurrence Basis
Amount of Coverage: $1,000,000 combined single limit

a) Policy will include the following additional insured language: Puerto Rico Department of Housing (**PRDOH**), Puerto Rico Government, US Department of Housing and Urban Development **(HUD)**, **ASEM,** its officers, officials, agents, and employees, will be named as additional insureds with respect to liability arising out of the activities performed by or on behalf of the **DESIGN-BUILD CONTRACTOR**.

b) Policy will contain a waiver of subrogation against: Puerto Rico Department of Housing (**PRDOH**), Puerto Rico Government, US Department of Housing and Urban Development **(HUD)**, **ASEM,** its officers, officials, agents, and employees, for losses arising from work performed by or on behalf of the **DESIGN-BUILD CONTRACTOR**.

4. Workers' Compensation and Employer's Liability Insurance

The **DESIGN-BUILD CONTRACTOR** must provide or cause those conducting the work to provide Worker's Compensation Insurance with "Statutory Limits" as required by Act 45 of April 18, 1935, as amended, known as "The Workmen's Accident Compensation Act" (*Ley del Sistema de Compensaciones por Accidentes del Trabajo*).

The **DESIGN-BUILD CONTRACTOR** must provide or cause those conducting the work to provide Employer Liability Insurance covering its legal obligation to pay

damages because of bodily injury or occupational disease (including resulting death) sustained by an employee.

Amount of Coverage:	$1,000,000 bodily injury by accident $1,000,000 bodily injury by disease $1,000,000 policy limit

5. Umbrella/Excess Liability

The **DESIGN-BUILD CONTRACTOR** must provide or cause those conducting the work to provide Umbrella/Excess Liability insurance limits as follows:

Coverage: Written on a following form basis over the primary policies: Commercial General Liability, Employers' Liability and Automobile Liability Insurance.

Limits	Each occurrence	$50,000,000
	General Aggregate	$50,000,000
	SIR	$10,000

a) Any such excess insurance shall be at least as broad as the **DESIGN-BUILD CONTRACTOR's** primary insurance.

b) Policy will include the following additional insured language: Puerto Rico Department of Housing (**PRDOH**), Puerto Rico Government, US Department of Housing and Urban Development **(HUD), ASEM,** its officers, officials, agents, and employees, will be named as additional insureds with respect to liability arising out of the activities performed by or on behalf of the **DESIGN-BUILD CONTRACTOR**.

c) Duration of Coverage: umbrella/excess liability policies shall continue coverage for a minimum of five (**5**) years for Completed Operations liability coverage. Such Insurance must be maintained, and evidence of insurance must be provided for at least five (**5**) years after completion of the contract of work.

6. Contractors Pollution Liability to indemnify for bodily injury, property damage, or amounts which the **DESIGN-BUILD CONTRACTOR**, its employees, its agents, or its Subcontractors are legally obligated to pay for cleanup/remediation work arising out of or related to the services to be provided under this "Agreement". Pollution Liability policy must include contractual liability coverage.

Amount of Coverage:	Per Loss	$5,000,000
	Aggregate	$5,000,000

a) Coverage shall apply to sudden and gradual pollution conditions resulting from the escape or release of smoke, vapors, fumes, acids, alkalis, toxic chemicals, liquids, or gases, natural gas, waste materials, or other irritants, contaminants, or pollutants (including asbestos). Policy shall cover the **DESIGN-BUILD CONTRACTOR** completed operations.

b) If the coverage is written on a **claims-made basis**, the **DESIGN-BUILD CONTRACTOR** warrants that any retroactive date applicable to coverage under the policy precedes the effective date of this Contract; and that continuous coverage will be maintained, or an extended discovery period will be exercised for a period of five (**5**) years beginning from the time that work under this contract is completed.

c) The policy shall be endorsed to include the following as Additional Insureds: Puerto Rico Department of Housing (**PRDOH**), Puerto Rico Government, US Department of Housing and Urban Development **(HUD)**, **ASEM,** its officers, agents, and employees named as an additional insured with respect to liability and defense of suits arising out of the activities performed by, or on behalf of the **DESIGN-BUILD CONTRACTOR**, including completed operations.

d) Endorsements CA9948 and MCS-90 are required on the Automobile Liability Coverage if the **DESIGN-BUILD CONTRACTOR** or its Subcontractors transports any type of hazardous materials.

7. Professional Liability Insurance – Project-Specific Policy

The **DESIGN-BUILD CONTRACTOR** shall procure and maintain **Project-Specific Professional Liability Insurance** covering negligent or wrongful acts, errors or omissions, or failure to render professional services arising out of or in connection with the **Design-Build of Puerto Rico's New Trauma Hospital project**.

Coverage shall apply to professional services performed by or on behalf of the **DESIGN-BUILD CONTRACTOR** in connection with its turn-key responsibilities for the **Project**, including **design, engineering, architectural services, professional supervision, project and construction administration, and other professional services** required for the design and construction of the Project.

The policy shall be specifically written for the **Design-Build of Puerto Rico's Trauma Hospital project**, and the required limits shall be dedicated exclusively to the Project. Such limits shall not be shared with, reduced, impaired, or eroded by

claims, payments, settlements, judgments, defense costs, claim expenses, or any other amounts, expenditures, or disbursements arising from any other project, operation, or professional services of the **DESIGN-BUILD CONTRACTOR** or any other insured.

Amount of Coverage:	Per Claim	$10,000,000
	Aggregate	$10,000,000

a) If coverage is written on a **claims-made basis**, the retroactive date shall precede the commencement of any professional services performed in connection with the Project. Continuous coverage shall be maintained, or an **Extended Reporting Period** shall be provided, for a minimum of **five (5) years** following completion of the professional services under the Project.

8. Builders' Risk Insurance

Unless otherwise provided, **DESIGN-BUILD CONTRACTOR** will procure, pay for, and maintain, Builders' risk (and/or Installation Floater) in the amount of the initial Contract Sum, plus value of subsequent Contract modifications and cost of materials supplied or installed by others, comprising total value for the entire Project at the site on a value-at-risk-at-time-of-loss (**VARTOL**) valuation clause (as defined in the builders' risk policy).

a) Such Builders' Risk insurance shall end when the first of the following occurs:

i. The **PRDOH** interest in the Work ceases;
ii. the policy expires or is cancelled; or
iii. the Work is accepted by **PRDOH**.

b) **DESIGN-BUILD CONTRACTOR** is responsible for the deductible for any claim made against the policy. A separate certificate of insurance evidencing the coverage required herein shall be provided to **ASEM** and **PRDOH.**

c) **ASEM** and **PRDOH** shall be added as Additional Named Insured and Loss Payee.

d) Policy must provide coverage from the time any covered property becomes the responsibility of the **DESIGN-BUILD CONTRACTOR**, and continue without interruption during construction, renovation, or installation, including any time during which the covered property is being transported to the construction installation site, or awaiting

installation, whether on or off site.

e) Builders' Risk Coverage shall be on a Special Covered Cause of Loss Form and shall include theft, vandalism, malicious mischief, collapse, false-work, temporary buildings and debris removal including demolition, increased cost of construction, architect's fees and expenses, flood (including water damage), earthquake, and if applicable, all below and above ground structures, piping, foundations including underground water and sewer mains, piling including the ground on which the structure rests and excavation, backfilling, filling, and grading. Equipment Breakdown Coverage (a.k.a. Boiler & Machinery) shall be included as required by the Contract Documents or by law, which shall specifically cover insured equipment during installation and testing (including hot testing, where applicable).

f) The Builders' Risk shall be written for 100% of the completed value (replacement cost basis) of the work being performed. The Builders' Risk shall include the following provisions:
   i. Replacement Cost Basis - including modification of the valuation clause to cover all costs needed to repair the structure or work (including overhead and profits) and will pay based on the values figured at the time of rebuilding or repairing, not at the time of loss.

g) If the project does not involve new or major reconstruction, at the option of **ASEM** and Puerto Rico Department of Housing (**PRDOH**), the **DESIGN-BUILD CONTRACTOR** may provide an Installation Floater Policy in lieu of a Builders' Risk policy, with similar coverage as the Builders' Risk policy. For such projects, an Installation Floater shall be obtained that provides for the improvement, remodel, modification, alteration, conversion or adjustment to existing buildings, structures, processes, machinery and equipment. The Property Installation Floater shall provide property damage coverage for any building, structure, machinery or equipment damaged, impaired, broken, or destroyed during the performance of the Work, including during transit, installation, and testing at the **DESIGN-BUILD CONTRACTOR's** site.

9. Other Coverages:

ASEM and **PRDOH** reserve the right to require the **DESIGN-BUILD CONTRACTOR** to obtain and maintain additional insurance coverages, provided that such requests are reasonable and consistent with industry standards. The **DESIGN-BUILD CONTRACTOR** shall secure these additional coverages within a reasonable time frame following the Department's request, ensuring continuous compliance with contractual obligations.

C. Other Provisions

1. Acceptability of Insurers

The insurance company providing any of the insurance coverage required herein shall be an Insurance Company duly authorized to do business in Puerto Rico and approved by the Office of the Commissioner Insurance of Puerto Rico and classified by A.M. Best Co. with a rating of no less than financial strength of A or have a financial size of IV or better.

If at any time an insurer issuing any such policy does not meet the minimum A. M. Best rating, the **DESIGN-BUILD CONTRACTOR** shall obtain a policy with an insurer that meets the A. M. Best rating and shall submit another certificate of insurance as required in the contract.

2. Premiums, Deductibles and Self-Insured Retentions

The **DESIGN-BUILD CONTRACTOR** shall be responsible for payment of premiums for all of the insurance coverages required under this Section. The **DESIGN-BUILD CONTRACTOR** further agrees that for each claim, suit or action made against insurance provided hereunder, with respect to all matters for which the **DESIGN-BUILD CONTRACTOR** is responsible hereunder, the **DESIGN-BUILD CONTRACTOR** shall be solely responsible for all deductibles and self-insured retentions. Any deductible or self-insured retentions over **$50,000.00** in the **DESIGN-BUILD CONTRACTOR's** insurance must be declared and approved in writing by **ASEM** and **PRDOH**.

3. Claims Made Policies

If any coverage required is written on a claims-made coverage form:

a) The retroactive date must be shown, and this date must be before the execution date of the contract or the beginning of contract work.
b) Insurance must be maintained, and evidence of insurance must be provided for at least five (**5**) years after completion of contract work.

c) If coverage is canceled or non-renewed, and not replaced with another claims-made policy form with a retroactive date prior to the contract effective, or start of work date, the **DESIGN-BUILD CONTRACTOR** must purchase extended reporting period coverage for a minimum of five (**5**) years after completion of contract work.
d) A copy of the claims reporting requirements must be submitted to the Entity for review.

4. Proof of Insurance

The **DESIGN-BUILD CONTRACTOR** shall submit proof of the Comprehensive General Liability (**CGL**) insurance and Workers' Compensation insurance policies to **ASEM** and **PRDOH** before the execution of the Grant Agreement. The **DESIGN-BUILD CONTRACTOR** shall also ensure that all other insurance policies and bonds required under this Agreement are secured by its subcontractors. The **DESIGN-BUILD CONTRACTOR** is responsible for providing **ASEM** and **PRDOH** evidence of these additional insurance policies and bonds within five (**5**) days after the execution of each individual subcontract agreement.

5. Verification of Coverage

The **DESIGN-BUILD CONTRACTOR** shall provide a Certificate or Certificates of Insurance, in a form satisfactory to **ASEM** and Puerto Rico Department of Housing **(PRDOH)** (i.e., an ACORD Certificate), before commencing any work under the contract or agreement.

Certificates of Insurance shall:

a) Be in the form acceptable to **ASEM** and **PRDOH** (i.e.: an ACORD Certificate);
b) Disclose any Deductible, Self-Insured Retention, Aggregate Limit or any exclusion to the policy that materially changes the coverage required by the contract.;
c) Project/contract number and project description shall be noted on the certificate of insurance.;
d) Be signed by an authorized representative of the Insurance carriers; and
e) Contain the following language in the Description of Operations/Locations/Vehicles section:

"Additional Insured protection afforded is on a primary and non-contributory basis. A waiver of subrogation is granted in favor of the Additional Insureds."

Only original documents (Certificate(s) and any Endorsements or other attachments) or electronic versions of the same that can be directly traced back to the Insurer, Agent or Broker via e-mail distribution or similar means will be accepted.

ASEM and **PRDOH** reserve the right to require complete certified copies of all required insurance policies, including endorsements, required by these specifications, at any time.

All certificates required by this Agreement shall be sent directly to ASEM.

6. Renewal Policies

DESIGN-BUILD CONTRACTOR shall promptly deliver **ASEM** and **PRDOH** a certificate of insurance with respect to each renewal policy, as necessary to demonstrate the maintenance of the required insurance coverage for the terms specified herein. Such certificate shall be delivered to **ASEM** not less than 30 days prior to the expiration date of any policy and bear a notation evidencing payment of the premium thereof.

7. Cancellation and Modification of Insurance Coverages

DESIGN-BUILD CONTRACTOR shall be responsible for immediately notifying **ASEM** and **PRDOH** in writing of any changes or cancellations of its insurance or may be found in breach of the contract and the contract could be terminated. This notice requirement does not waive the insurance requirements contained herein.

8. Policies Primary and Non-Contributory

All policies required above are to be primary and noncontributory with any insurance programs carried by **ASEM** and **PRDOH**.

9. Waiver of Subrogation

DESIGN-BUILD CONTRACTOR hereby grants to **ASEM** and **PRDOH** a waiver of any right to subrogation which any insurer of said **DESIGN-BUILD CONTRACTOR** may acquire against **ASEM** and **PRDOH** by virtue of the payment of any loss under such insurance. **DESIGN-BUILD CONTRACTOR** agrees to obtain any endorsement that may be necessary to affect this waiver of subrogation, but this provision applies regardless of whether or not **ASEM** or **PRDOH** has received a waiver of subrogation endorsement from the insurer.

Attachment 5: INSURANCE REQUIREMENTS AND BONDING SPECIFICATIONS

10. Special Risks or Circumstances

ASEM and PRDOH reserve the right to modify these requirements, including limits, based on the nature of the risk, prior experience, insurer, coverage, or other circumstances.

11. Subcontractors

The **DESIGN-BUILD CONTRACTOR** and its Contractors shall include all Subcontractors as insureds under its policies or shall be responsible for verifying and maintaining the certificates provided by each Subcontractor. Subcontractors shall be subject to all of the requirements stated herein. The agency reserves the right to request copies of Subcontractors' certificates at any time.

12. No Recourse

There shall be no recourse against **ASEM** for the payment of premiums or other amounts with respect to the insurance required from the **DESIGN-BUILD CONTRACTOR** under this Section.

13. Limits of Coverage

If the **DESIGN-BUILD CONTRACTOR** maintains higher limits than the minimums shown below, **ASEM** and **PRDOH** require and shall be entitled to coverage for the higher limits maintained by the **DESIGN-BUILD CONTRACTOR**. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to **ASEM** and **PRDOH**.

14. Indemnification/Hold Harmless Agreement

DESIGN-BUILD CONTRACTOR agrees to protect, defend, indemnify, save, and hold harmless, Puerto Rico Department of Housing (**PRDOH**), Puerto Rico Government, US Department of Housing and Urban Development (**HUD**), **ASEM,** its officers, officials, agents, employees, and volunteers, from and against any and all claims, damages, expenses, and liability arising out of injury or death to any person or the damage, loss, or destruction of any property which may occur, or in any way grow out of, any act or omission of **DESIGN-BUILD CONTRACTOR**, its Contractors, agents, servants, and employees, or any and all costs, expenses and/or attorney fees incurred by **DESIGN-BUILD CONTRACTOR** as a result of any claims, demands, suits or causes of action, except those claims, demands, suits, or causes of action arising out of the negligence of Puerto Rico Department of Housing (**PRDOH**), Puerto Rico Government, US Department of Housing and Urban Development (**HUD**), **ASEM**, its officers, officials, agents, employees, and volunteers. **DESIGN-**

BUILD CONTRACTOR agrees to investigate, handle, respond to, provide defense for and defend any such claims, demands, suits, or causes of action at its sole expense and agrees to bear all other costs and expenses related thereto, even if the claims, demands, suits, or causes of action are groundless, false or fraudulent.

15. Conflict or Difference between the Specifications of the Tendering, Procedure and Special Insurance Conditions and Bonds

In the event of any conflict or difference in the description of coverage or in amounts or limits, etc., with respect to insurance requirements, the conditions of insurance and bonds established in these Insurance Requirements and Bonding Specifications shall prevail over any other insurance specifications.

Attachment 6: MODEL CONTRACT

GOVERNMENT OF PUERTO RICO
PUERTO RICO HEALTH SERVICES ADMINISTRATION

Disclaimer: This contract template contains the basic mandatory provisions applicable to design and build services to be awarded through the RFP process and funded with CDBG-MIT funds. It may be subject to certain modifications to adapt its wording to the type of legal entity selected through the award process for this bid.

CONTRACT NO.:2027-00xxxx
ACCOUNT NO.: xx.xxxx.xxxxx

CONTRACT FOR "DESIGN-BUILD SERVICES UNDER CDBG-MIT PROGRAM
PUERTO RICO'S NEW TRAUMA HOSPITAL"

PREAMBLE

-------THE FIRST PARTY: The Puerto Rico Medical Services Administration, a public instrument, created by Act No. 66 of June 22, 1978, represented by its Executive Director, Dr. Regino Colón Alsina, of legal age, married and a resident of San Juan, Puerto Rico; hereinafter referred to as "ASEM" and/or "Owner". ----------

-------THE SECOND PARTY: _____, a limited liability company created and existing under the Acts of the Government of Puerto Rico with registration number _____, represented by its _____, who in turn is represented by the _____, of legal age, ____, _____ and resident of _____, _____, whose authorization is contained in the Certificate of Eligibility of the Sole Registry of Bidders of the General Services Administration number _____, submitted to ASEM, hereinafter referred to as the "Builder" and/or "Contractor". ----------

----- THE CONTRACTOR notifies ASEM, that it has selected to carry out the design work of this project _____, of legal age, ____, _____ with a professional license number _____ and a resident of _____, _____; whose authorization is stated in the Certificate of Eligibility of the Sole Registry of Professional Service Providers of the General Services Administration number _____ submitted to ASEM hereinafter referred to as the "Designer". ----------

-----The parties declare that they are fully authorized to enter into this Agreement and, to that end, freely and voluntarily: ----------

RECITALS

WHEREAS ASEM is authorized to formalize all contracts that are necessary and convenient to carry out the activities, programs, and operations to fulfill any public purpose that applies to ASEM as conferred on it by Act No. 66 of June 22, 1978, as amended, better known as the "Puerto Rico Medical Services Administration Act." ----------

WHEREAS, the Contractor has the necessary capacity and experience to comply with the obligations and responsibilities assumed by this contract and certifies that he/she is aware of the ethical standards of his/her profession and assumes responsibility for his/her actions. ---------

THEREFORE, the parties have agreed to sign this contract under the following: ----------

TERMS AND CONDITIONS

1. JOB DESCRIPTION: The Contractor shall supply all labor, materials, equipment, services and shall fully perform all the work required in the Request of Proposal (RFP) number ASEM-ACME-2027-001-27DJ00415, referred to as Addendum A and the Contractor proposal referred as Addendum B, which are incorporated and made part of this contract. ----------

2. SERVICES TO BE PROVIDED: ----------

DRAFT

2.1 Builder: The Contractor agrees to provide its services for the Project *Design-Build of Puerto Rico's New Trauma Hospital.* ----------

a. The Contractor shall provide technically qualified personnel under its supervision. The contractor shall comply with all safety regulations (e.g., OSHA, by using the necessary safety materials and equipment to protect its employees). Any damage to ASEM's property or facilities caused by the work to be performed shall be the responsibility of the contractor, who must remedy the damage and cover the costs of repairing the affected area. ----------

b. The Contractor shall be responsible for obtaining all necessary permits from the relevant regulatory authorities, as required in the request for proposals specifications. ----------

c. The Contractor shall be responsible for access to the work site, including, but not limited to, scaffolding, ladders, cranes, barricades, fences, temporary enclosures, and signage. ----------

d. The Contractor shall comply with the Puerto Rico Building Code and any other applicable codes, as well as with relevant state and federal laws, rules, and regulations; the institution's current rules and regulations; and the requirements of the accrediting bodies that regulate Puerto Rico's medical facilities. It shall be ASEM's responsibility to ensure that the design complies with applicable codes, Acts, and regulations. ----------

e. The contractor must ensure that access to the property remains unobstructed, safe, and uninterrupted for all occupants, patients, visitors, employees, etc. -------

f. The contractor shall be responsible for protecting its property against all adverse weather conditions that may occur during the performance of the work, regardless of local conditions. The parties agree and acknowledge that this contract may be temporarily suspended in cases where weather conditions or emergency situations prevent the provision of the contracted services. ----------

g. The contractor shall pay its employees, in addition to their corresponding wages, federal insurance, the Worker's Compensation Insurance, and contributions related to its staff, as required by law. ----------

h. The contractor must submit a copy of its safety program to ASEM. ----------

i. The contractor shall inform ASEM of any anomaly or damage that occurs or is detected during the performance of the work to be carried out. The Contractor shall be responsible for keeping the walkways free of obstacles and shall be responsible for the collection and disposal of debris generated during construction. ----------

j. If applicable, the Contractor guarantees that it will comply with the provisions of Act No. 79 of June 9, 2002, as amended, Act for the Survey of Records and Sewers at the Taxiing Level. The Contractor acknowledges that final payment is subject to evidence of compliance with such Act, as well as compliance with other requirements for final payment. ----------

k. This contract complies with the public policy of the Government of Puerto Rico, to reserve at least twenty percent (20%) of the purchases and contracting Construction Services for services rendered by a Local Construction Services Business or Provider, under Act No. 42 of January 21, 2018, as amended, the Law on Preference for Local Construction Contractors and Suppliers. ----------

l. The Contractor shall comply with the provisions of Act No. 109 of July 12, 1985, as amended, Act to Regulate the Use of Construction Materials Manufactured in Puerto Rico, in Public Works and Buildings that are Constructed, Reconstructed, Conserved or Repaired with Public Funds. Any natural or legal person who carries out any work in contravention of this Act shall not be compensated for any work performed on the work, shall be obliged to return any compensation received for work performed on such work, shall also be obliged to demolish and remove the

DRAFT

illegally constructed at the request of the Commonwealth and, in addition, shall indemnify the State for any damage and prejudice suffered, if any. ----------

m. The Contractor commits itself, in case of labor conflicts (strikes, unemployment, etc.) which may prevent or delay the fulfillment of this contract, to notify and send the Agency all relevant data and information related to these conflicts, within a period of no later than twenty-four (24) hours after being initiated. --------

2.2 DESIGN: The Designer agrees with the Parties to provide their Professional Services for the Project *Design-Build of Puerto Rico's New Trauma Hospital.* ----------

a. Should any change of the Designer arise, it will be subject to ASEM's approval and will require that such change be made by amendment to this contract. ----------

b. The Builder does not assume the risks of the Designer and the Designer does not assume the risks of the Builder. The risks will be distributed in accordance with the provisions of the General Uniform Conditions for the Contracting of Public Works in Puerto Rico, Regulation No. 7998 of the Department of Transportation and Public Works. This does not prevent ASEM from being presented with all the required guarantees, such as bonds, policies, etc. ----------

c. INTELLECTUAL PROPERTY: The term Intellectual Property shall mean all proprietary rights and other rights in and over: (i) trademarks, service marks, certification marks, trade dress, false names, trade names, and other indications of origin; (ii) patents, inventors' certificates, and invention disclosures; (iii) trade secrets and other non-public or confidential business information, including ideas, formulas, compositions, inventions, discoveries and improvements, know-how, manufacturing and production processes and techniques, and research and development information (patentable or not); drawings, specifications, designs, plans, proposals and technical data; and financial information, pricing and cost information, business and marketing plans, and customer and supplier information and lists; (iv) writings and other works of authorship, whether or not copyrightable, including computer programs, databases, and related documentation, and all copyrights in any of the foregoing; (v) work mask; (vi) right, title and interest in knowledge, technical information, processes, practices and systems, whether or not protected by patents, copyrights or trade secrets; (vii) moral rights; (viii) rights to limit the use or disclosure of confidential information by any person; (ix) any tangible or similar intangible intellectual property, or proprietary rights, information, and technology; (x) the registrations and applications for registration of any of the foregoing with any governmental agency or authority and any renewal or extension thereof, (xi) the goodwill associated with each of the foregoing and (xii) any claim or cause of action arising out of or in connection with any infringement or misappropriation of any of the foregoing. ----------

d. The Contractor acknowledges that all documents, writings, recommendations and/or reports produced under this contract shall be the exclusive intellectual property of ASEM. All material, product, document or information, as well as applications, programming and/or any other product developed and/or product of the contracted Services, will be the property of ASEM. It is expressly agreed that all property, code, source, research, studies, designs, photographs and/or material created and/or recognized under the Acts of the United States of America and Puerto Rico as intellectual property, regardless of the medium in which it is reflected, will become the property of ASEM and ASEM is authorized to reproduce it without having to pay the Contractor any compensation for such production and/or rights therein, in addition to the compensation set forth in this Agreement. The Parties clarify that this Agreement does not contemplate the creation of intellectual property that may be subject to this Clause, since the Services are contracted. ----------

e. Perpetual and exclusive license and assignment of all derivatives and materials created and generated in connection with this Agreement. All products and/or results of the Services provided (the "Work") are performed for and for the exclusive benefit of ASEM. The Contractor acknowledges and agrees that the Work (and all rights) therein, including, but not limited to, copyright, patent, intellectual property, trademark, among others, shall be the exclusive and perpetual property of ASEM.

DRAFT

Notwithstanding the foregoing, the Contractor also assigns and transfers to ASEM all right, title, and interest in and to all copyrights, trademarks, patents, and intellectual property in and to the Work; all related copyright registrations and applications, as well as all renewals and extensions thereof; all works based on, derived and/or incorporated in the Work; all revenues, royalties, damages, claims, and payments now or hereafter payable with respect to the Work and all causes of action, whether at Act or in equity, past and present, including but not limited to future intellectual property infringements; and all rights to the foregoing throughout the world. The Contractor agrees to take all necessary measures to guarantee ASEM and/or its representative the rights assigned in this place. The parties clarify that this Agreement does not contemplate the creation of any Work that may be subject to this clause. ----------

f. OBLIGATION TO RETURN MATERIALS: The Contractor must deliver and return to ASEM all writings, files, reports, materials, programs, and/or requests ("the Materials") that are delivered and/or produced in connection with this Agreement and/or that are in its possession as a result of the contractual relationship with ASEM as soon as their assignments are completed, when they are required and/or after the termination of the contractual relationship, as appropriate in each case. ASEM shall be entitled to unrestricted and unrestricted use of such materials. If this Agreement is terminated and/or terminated prior to the expiration date set forth in this Agreement, delivery of the materials must be made upon such notice, no later than fifteen (15) days from the notice. ----------

g. Representations and Indemnification. The Contractor represents and warrants to ASEM that its materials, programs, processes, systems, or applications do not infringe or violate in any way state and federal intellectual property Acts, including, but not limited to, patents, trademarks, copyrights, among others. ASEM will not be responsible for the acts or omissions of the Contractor in the execution of the agreed Services and that are related to damages to third parties due to violation of the intellectual property of third parties. The Contractor undertakes to defend, exempt and hold harmless and to indemnify ASEM and its successors for any claims, causes of action, direct and/or indirect claims of any nature, and in any forum, brought by third parties and arising from the intellectual property used by the Consultant in the provision of the Services that are the subject of this Agreement. The Contractor agrees to pay any expenses, costs and attorney's fees that ASEM may have to incur in its defense. ----------

3. CONTRACT PRICE: The Contractor will receive partial payments for the execution of the work object of this contract, subject to deductions and additions as established in the specifications up to the total sum of _____. Payments for the services subject to this contract will be made against the accounts xx.xxxx.xxxxx. This agreement will remain in force according to the availability of funds and may be terminated without notice if funds are not available for payment. ----------

4. The contract will be registered with the Office of the Comptroller of Puerto Rico under the name of the Contractor and payments will be issued in the name of said The Contractor. This is due to the limitation that the contract is registered under a single entity, and the law prohibits the Association of The Contractors and Designers under the same legal entity. ---

5. INVOICE: ASEM will fully comply with the provisions, terms, and conditions established in the Uniform General Conditions of Public Works, Supplementary Conditions, and Additional Provisions related to the payment process. ----------

a. ASEM will process payment for contracted and rendered services, as well as for work performed, in accordance with the respective applicable Acts and regulations. The invoice must: ----------

i. contain, among other things, the name of the contracted entity; ----------
ii. contract number; ----------
iii. disaster designation number; ----------
iv. CDBG-MIT grant number; ----------
v. information of the contracted entity, including postal address, telephone number, and email address; ----------

DRAFT

vi. Billing period; ----------
vii. invoice number; ----------
viii. invoice issue date; ----------
ix. amount due; ----------
x. include a certification indicating that the services were rendered or work was performed but has not yet been paid; ----------
xi. certification of voidability; ----------
xii. certification of the accuracy of the invoice content; ----------
xiii. Breakdown for Payment; ----------
xiv. Certified payrolls (using the designated form); ----------
xv. Supporting documentation for any invoiced materials or equipment; ----------
xvi. Photographs identifying the work performed; ----------
xvii. Updated Project Schedule; ----------
xviii. DBRA compliance certification; ----------
xix. Certification of affirmative steps regarding Section 3 or M/W/VBE; and ----------
xx. Certification of no debt issued by the corresponding government entities (only last invoice). ----------
xxi. Other documents required by ASEM. ----------

b. ASEM will withhold 5% of the total amount of each partial invoice, as submitted, for construction works. ASEM may withhold up to ten percent (10%) of the payment due to the Contractor for services rendered, as provided in Section 1062.03 of the 2011 Puerto Rico Internal Revenue Code, as amended, in accordance with the regulations approved by the Secretary of the Treasury, unless otherwise evidenced by the presentation of the corresponding Withholding Release Certificate (total or partial) issued by the Department of the Treasury. It is understood that this withholding will apply to the amount exceeding the first five hundred dollars ($500.00) paid during the calendar year. ----------

c. Section 1062.03 (b) of the 2011 Puerto Rico Internal Revenue Code, as amended, and Department of Treasury Circular Letter 17-02 provide that payments for construction services do not require withholding if the Contractor provides an affidavit affirming the provisions of the circular letter. To that end, the Contractor, has filed the affidavit affirming that the payment to be received is not subject to withholding under section 1062.03(b). ----------

d. The Contractor acknowledges the fact that it is an essential requirement to submit the affidavit every calendar year. If it's not submitted, the Contractor will be subject to the withholding of contributions as appropriate. ----------

e. Pursuant to Act No. 48-2013, if applicable, ASEM will withhold at source from each payment for professional services contracts (aggregate contracting) provided by the Contractor, a special contribution equivalent to one and a half percent (1.5%) of the total amount of said contract, which will be allocated according to this Act. The calculation of aggregate contracting includes all agencies, instrumentalities of the Government of Puerto Rico, public corporations, as well as the Legislative Branch, the Office of the Comptroller, the Office of the Ombudsman, and the Judicial Branch, or any other entity created by state or federal Act, whose funds originate, in whole or in part, from the General Fund. To claim this exemption, the Contractor must submit, along with the signed contract, a Sworn Statement to that effect, using Form SC 1350.

f. The Contractor will pay the Designer the entirety of its invoice, within the applicable term; deducting from the latter, only the withholding of contributions that corresponds to payments for professional services, which the Contractor will notify the Department of Treasury. ASEM will not make any withholding of the portion that corresponds to the services provided by the Designer, thus avoiding a double withholding to the licensed professional. ----------

g. The Contractor acknowledges its responsibility to render and pay the corresponding contributions to the Federal Social Security and the Income Tax Bureau of the Department of Treasury. ASEM will notify such bureaus, as well as any other local or Federal agency as required by Act, of the amount accrued by the Contractor by way of this contract. ----------

h. The Contractor further undertakes to cancel any debt that cannot be clarified with

DRAFT

the Department of Treasury, through the mechanism of withholding on the payments to which it is entitled to receive under this contract. ----------

i. All invoices will be processed for payment only after review and approval by the designated ASEM representative. ASEM reserves the right to request additional information before proceeding with payment. The Fiscal Resources Office also reserves the right to review the accuracy of invoices and conduct any audits it deems necessary. ----------

j. All invoices must include the following certification, indicating the absence of any interest on the part of the executive agency's officials and employees in the profits or benefits derived from the contract in question. ----------

"Under penalty of absolute nullity, I certify that no ASEM public servant is a party to or has any interest in the profits or benefits derived from the contract covered by this invoice, and if any such party or interest is involved, a prior waiver has been granted. The sole consideration for supplying the goods or services covered by the contract has been the payment agreed upon with the authorized representative of (name of the entity). The amount on this invoice is fair and correct. The construction work has been completed, the products have been delivered, and the services have been rendered, and no payment has been received for them." ----------

k. All invoices must be submitted in original, including two (2) copies, to the Office of Engineering and Environmental Care or to the ASEM representative authorized for this purpose. ----------

l. Prior to the approval of the Schedule of Value and Breakdown for Payment, the Contractor must submit to ASEM a formal request for its intention to invoice for materials on-site. This request must include a detailed narrative describing the mitigation measures to avoid adverse impacts on other project activities, the safety and security measures applicable to the storage and handling of the materials, and the Contractor's acknowledgment and acceptance of any tests, inspections, or analyses that ASEM may require prior to installation or use. The Contractor must certify that the materials will be used exclusively for the project, that they are covered by the corresponding insurance, and that it accepts the obligation to reimburse the funds if installation is not completed. The Contractor must also detail the daily material inspection process and provide any other information or certification that ASEM may request. ----------

m. Once the complete request is received, ASEM will issue its determination within a period not exceeding fifteen (15) calendar days. The determination issued will be final and not subject to reconsideration by ASEM. ----------

6. The Contractor will include as an annex to your invoice, the invoice that corresponds to the services of the Designer, only for administrative purposes. The responsibility for payment and withholding of the contributions to the services of the Designer will correspond to the Contractor. ----------

7. CONTRACTUAL RELATIONSHIP: The contractual relationship between THE PARTIES will be governed by: ----------

a. Request for Sealed Proposal, including Notifications, Scope of Works, Addenda.---
b. This agreement. ----------
c. HUD 4010. ----------
d. THE GENERAL UNIFORM CONDITIONS FOR PUBLIC WORKS IN PUERTO RICO, Regulation number 7998 of the Department of Transportation and Public Works of the Government of Puerto Rico, of March 3, 2011. ----------
e. SUPPLEMENTARY CONDITIONS. ----------
f. CONTRACTUAL CLAUSES, Appendix II, 2 CFR Part 200. ----------
g. HUD GENERAL PROVISIONS AND OTHER FEDERAL STATUES, REGULATIONS, AND PRDOH REQUIREMENTS OF HEALTHCARE STRENGTHENING SET-ASIDE. ----------
h. INSURANCE REQUIREMENTS. ----------
i. AGREEMENT FOR COMPLIANCE WITH HIPAA AND RED FLAG RULE. ----------
j. AFFIDAVIT-Internal Revenue Circular No. 17-02. ----------

w. Each and every provision of law and clause required by law to be inserted in this contract shall be deemed to be inserted herein and the contract shall be read and enforced as though it were included herein, and if through mistake or otherwise any such provision is not inserted, or is not correctly inserted, then upon the application of either party, the contract shall forthwith be physically amended to make such insertion or correction. ----------

8. CONDENSED FORMS TO BE USED DURING THE EXECUTION OF THE CONTRACT: The Owner, the Contractor, and the subcontractor, as applicable, must use the following forms in the execution of the contract. ----------

a. 500-D1- PROJECT SCHEDULE OF VALUES (PDF + EXCEL). ----------
b. 500-D3- DESIGN-BUILD'S AFFIDAVIT OF FINAL RELEASE. ----------
c. 500-D4- CERTIFICATE OF SUBSTANTIAL COMPLETION. ----------

l. 500-D10- DESIGN-BUILDER'S REQUEST LOG. ----------
m. 620 – Performance Bond ----------
n. 625 – Payment Bond ----------

9. EFFECTIVE TERM: The validity of this contract will be from its signature until ____ of ____ of 20__. Project commencement will begin on the date specified in the "Notice to Procced" issued by ASEM. This contract will remain in effect in accordance with the availability of funds for the fiscal year for which it has been awarded. The contract will be extended, subject to agreement by both parties, and funds are available in the appropriate budget line. It may be terminated without prior notice if funds are not available for payment. ------

10. LIQUIDATED DAMAGES: Time is of the essence in the performance of the Work. The Design-Builder acknowledges that failure to achieve Substantial Completion, Final Completion, or any Contract Milestone established in the Contract Documents within the required time may cause ASEM, PRDOH, the Government of Puerto Rico, HUD, patients, healthcare providers, emergency services, and the public to incur substantial damages, including, but not limited to, administrative costs, extended oversight and inspection costs, delayed availability of critical healthcare services, disruption to campus operations, extended project management costs, and other impacts that are difficult or impracticable to determine with precision at the time of contract execution.----------

a. Accordingly, if the Design-Builder fails to achieve Substantial Completion, Final Completion, or any Contract Milestone by the applicable date established in the Contract Documents, as such date may be adjusted only by an approved Change Order or written time extension issued in accordance with the Contract Documents,

DRAFT

the Design-Builder shall be liable to ASEM for liquidated damages in the amounts set forth below. The parties agree that these amounts represent a reasonable estimate of damages likely to be incurred as a result of delay and are not intended as a penalty. The following liquidated damages shall apply for each calendar day of delay beyond the applicable milestone date: ----------

i. Failure to achieve Substantial Completion of Phase I: $25,000.00 per calendar day until Substantial Completion of Phase I is achieved. -------

ii. Failure to achieve Substantial Completion of Phase II: $15,000.00 per calendar day until Substantial Completion of Phase II is achieved. ------

b. Liquidated damages may be assessed separately for each missed milestone; however, ASEM shall not impose duplicative liquidated damages for the same period of delay for the same portion of the Work unless the delay affects separate and independently required milestones. If delay to an interim milestone also delays Substantial Completion or Final Completion, ASEM may assess liquidated damages for the milestone that best reflects the impact of the delay, or as otherwise provided in the Contract Documents. ----------

c. ASEM may deduct liquidated damages from any amounts due or to become due to the Design-Builder, including progress payments, retainage, final payment, or any other compensation payable under the Contract. Assessment or deduction of liquidated damages shall not constitute a waiver of ASEM's right to pursue any other remedy available under the Contract Documents or applicable Act for separate breaches, defective work, noncompliance, fraud, misrepresentation, abandonment, default, or other damages not compensated by the liquidated damages. ----------

d. The Design-Builder shall not be liable for liquidated damages to the extent the delay is caused by an excusable delay for which the Design-Builder is entitled to a time extension under the Contract Documents, provided that the Design-Builder gives timely notice, demonstrates the impact on the critical path, and obtains written approval of the time extension in accordance with the Contract Documents. No oral statement, field discussion, meeting note, schedule update, pay application, or informal communication shall modify a milestone date or waive liquidated damages unless expressly approved in writing by ASEM through a duly executed Change Order or other authorized written contract modification. ----------

e. In addition to the provisions of Article 9.5 of Regulation No. 7998, Uniform General Conditions for Public Works, if the Contractor fails to comply with federal statutes and regulations, ASEM may take one or more of the following actions: ----------

a) Temporarily withhold cash payments pending correction of the deficiency by the Contractor. ----------
b) Disallow all or part of the cost of the activity or action not in compliance.
c) Initiate suspension or debarment proceedings as authorized under 2 C.F.R. part 180. ----------
d) Withhold further Federal awards for the project or program. ----------
e) Take other remedies that may be legally available. ----------

11. CERTIFICATIONS OF COMPLIANCE WITH FISCAL RESPONSIBILITY----------

a. The contractor certifies compliance with any obligation before the Municipal Tax Collection Center (CRIM), the Puerto Rico Department of Treasury (HACIENDA), the Administration for the Enforcement of Child Support (ASUME) or the elderly, the Puerto Rico Department of Labor and Human Resources (DTRH), and any other government agency or department that is required. ----------

b. The contractor certifies and guarantees that it has fulfilled its tax responsibilities during the past five (5) years, including the filing of income tax returns and the CRIM personal property return; which it demonstrates with a certification that accredits it. It also certifies that it does not owe it to this entity for such concept or for contributions on movable or real property or for contributions to the Government of Puerto Rico of Puerto Rico or that it is covered by a payment plan, for which it attaches certification

DRAFT

in this regard and that it will settle the debt before the expiration of this contract. "It is expressly recognized that this is an essential condition of this contract, and if the above certification is not correct in whole or in part, this causes the nullity of the contract and the contractor will have to reimburse ASEM for all sums of money received under this contract." ----------

c. The contractor has delivered a copy of the Merchant Registration Certificate and undertakes to comply with the provisions established in Act No. 72-2015, which oblige the seller to pay sales and use tax (IVU). By virtue of this, the contractor will comply, and this will be the effect, if applicable. The contractor certifies and guarantees that it has filed the Monthly Sales and Use Form; accredited by official certification provided for this purpose. If you are exempt from filing, you must provide official evidence to that effect. ----------

d. The contractor certifies that it is complying with the orders issued in its name as employer for the withholding of the wages of its employees for the payment of alimony or subsistence of minor children, or related to the maintenance of elderly persons; for which it provides a certification in this regard, in accordance with Act No. 5 of December 30, 1986, as amended, known as the "Organic Act of the Administration for the Support of Minors" and Act No. 168 of August 12, 2000, as amended, known as the "Act for the Strengthening of Family Support and Support of the Elderly", if applicable. In addition, it certifies that, if any obligation arises, it will be kept up to date according to the terms of the same. ----------

e. The contractor certifies that it has complied with its obligations to the Department of Finance (HACIENDA), the Administration for the Support of Minors (ASUME) and the Municipal Tax Collection Center (CRIM); this is stated in the authorized search through the Electronic Identity System of Online Access (IDEAL), as required by Act Number 85 of August 20, 2009, Act on Electronic Certificates and Receipts, as amended and Executive Order OE-2021-008 or through the certification of the Certificate of Eligibility of the Single Registry of Bidders of the General Services Administration. Any certification that was not provided by the IDEAL System has been delivered and is part of the contract file. The contractor will be responsible for keeping all documents up to date in the Single Registry of Professional Service Providers during the term of this contract. Payment will not be processed until all required supporting documents have been submitted to ASEM. ----------

f. The contractor will be responsible for keeping all documents up to date during the term of this contract. You acknowledge that this contract has the documentation required for its formalization, which is made part of this contract. ----------

12. AGREEMENT FOR COMPLIANCE WITH HIPAA AND RED FLAG RULE: As part of the services provided by the contractor, it is estimated that they may be in contact with protected health information (PI) of ASEM patients, which makes said contractor become a "Business Associate" of ASEM for purposes of the Regulations issued under the Federal Health Insurance Portability and Accountability Act (HIPAA). Therefore, it is an integral part of this Agreement that the contractor, as required by federal Act, agrees to and complies with the provisions of Addendum ___. ----------

    a. To the extent required by the provisions of "HIPAA" and the Regulations approved under it, the contractor undertakes and warrants to ASEM that any information of a protected nature under this statute to which it has had access by reason of this contract will be discarded as soon as it is no longer needed. ----------

13. CREDENTIALS: THE CONTRACTOR certifies that all personnel assigned to offer services in accordance with the provisions of this contract, have valid licenses and professional credentials corresponding to the profession they practice, namely: Professional License, Specialty Certificate, Registration of Professionals and Continuing Education, Membership, and other pertinent documents such as the Certificate of "Good Standing", in order to offer services in accordance with the provisions of this contract, you have professional malpractice insurance as required by your profession or by ASEM. The contractor relieves ASEM of liability for any damage derived from the failure of its personnel to comply with the licensing, certification or insurance requirements related to the profession they practice. ----------

DRAFT

a. ASEM may require the contractor to provide evidence of licenses, credentials, insurance and other documents, evidence of the preparation and aptitude of the personnel assigned by the contractor to provide services under this contract. ----------

b. The contractor certifies that it has all the permits, insurances and licenses associated with its business or practice and will make them available when ASEM requires it. -----

c. In the event that the contractor has been accused, administratively or criminally, or convicted of having fraudulently obtained any credential, this will be sufficient reason for ASEM to terminate this contract immediately. ----------

d. It is clearly established that, if the contractor is deprived of the licenses, credentials or insurance necessary for its business or professional practice, or the personnel assigned by the contractor to provide services do not have the required licenses or credentials, this will be sufficient reason to terminate this contract immediately. -------

e. The Contractor certifies and warrants that, in accordance with the Contract Documents, the provision of any engineering, architecture, surveying, and landscape architecture services in Puerto Rico under this contract will be commissioned to a licensed professional or professional services organization pursuant to Act No. 173 of August 12, 1988, as amended, Act of the Board of Examiners of Engineers, Architects, Land Surveyors and Landscape Architects of Puerto Rico, and Act No. 319 of May 15, 1938, as amended, Act of the College of Engineers and Land Surveyors of Puerto Rico. The Contractor hereby expressly acknowledges that only engineers, architects, surveyors, and landscape architects duly authorized and licensed to practice in the Commonwealth of Puerto Rico may perform professional services in Puerto Rico under this contract. In the event that a professional services company performs the services mentioned above under this contract, under a professional association or professional corporation, all partners or directors of such entity must be licensed in their respective professions and be registered in the appropriate Register of Professional Associations. If the professional services company is a corporation, all shareholders shall be licensed in their respective professions and such corporation shall be organized as a professional corporation in accordance with the provisions of Act No. 164 of December 19, 2009, as amended, General Corporations Act of Puerto Rico. The Contractor certifies and warrants that the professional services agreement between the Contractor and the licensed professional or professional services organization at all levels, as applicable, shall include the following clause: ----------

"The professional services organization or licensed professionals herein hired to perform any engineering, architecture, surveying and landscape architecture services under this contract, hereby certifies and warrants that it is properly organized and existing and holds the certification accrediting validity under the Acts of Puerto Rico, particularly Act No. 173 of August 12, 1988, as amended, Act of the Board of Examiners of Engineers, Architects, Land Surveyors and Landscape Architects of Puerto Rico, and Act No. 319 of May 15, 1938, as amended, Act of the College of Engineers and Land Surveyors of Puerto Rico, authorized to do business in the Commonwealth and with full right, power and legal authority to execute, deliver and perform the aforementioned professional services under any applicable Act." ----------

14. JOINT COMMISSION: EXPECTATIONS OF THE SERVICES: The contractor is committed to complying with quantifiable performance indicators that allow ASEM to objectively evaluate the quality, safety and effectiveness of the services provided. These indicators will be monitored continuously and reported periodically. If there are specific indicators, they will be included in a document annexed to this contract. ----------

a. THE CONTRACTOR agrees to comply with at least the following general parameters:

I. Quality aspects (as applicable to the service). ----------
II. Security measures. ----------
III. Compliance with rules and regulations. ----------
IV. Competencies and credentials. ----------
V. Satisfaction and perception for the services provided. ----------
VI. Compliance with schedules and staffing pattern. ----------

DRAFT

VII. Reports requested. ----------

b. ASEM reserves the right to monitor these reports and/or request evaluations of additional indicators based on institutional needs, regulatory changes, or requirements of accrediting agencies. ----------

c. In order to verify the quality of the service provided, the contractor acknowledges and accepts that ASEM may carry out periodic evaluations of the services offered by the contractor. Therefore, the contractor will be subject to periodic evaluation of performance, professional ethics and other related aspects. If any fault is found, the contractor will be informed so that it can be corrected within the terms established by ASEM and if it is not corrected, it may be justified cause for the immediate cancellation of this contract. ----------

15. INDEPENDENT CONTRACTOR: The contractor is an independent contractor and nothing herein shall be construed to imply that it is an employee, partner, agent, representative and/or affiliate of ASEM. The contractor shall be solely responsible for the withholding and/or payment of all federal and/or local income tax, social security and/or any other payroll withholding, in relation to its employees. Since the contractor is an independent contractor, there is no worker-employer relationship, and the requirements for the acquisition of goods and services provided for in the regulations of the General Services Administration will not apply. ----------

16. SMOKE-FREE WORK SCENARIO: The contractor commits to the provisions of Act No. 40 of August 3, 1993, as amended, known as the "Act for the Regulation of the Practice of Smoking in Certain Public and Private Places"; and to the Regulation of the Secretary of Health and the Police of Puerto Rico No. 7304, as amended, which prohibit the practice of smoking in their facilities, including indoor and outdoor areas, both open and closed, among others. The contractor and its employees will refrain from using any tobacco product or derivative in the areas surrounding the facilities of ASEM and Participating Entities. If these products are consumed, it will be done in the areas designated for such purpose in accordance with applicable state and federal Act and regulation. ----------

17. GOVERNMENT ETHICS: THE PARTIES certify that this contract complies with Act No. 1 of January 3, 2012, as amended, known as the Government Ethics Act of Puerto Rico; being aware that a contract granted in violation of the Government Ethics Act may be subject to an action or nullity. ASEM certifies that no public official or government employee has a pecuniary interest in this contract. ----------

18. THE CONTRACTOR CODE OF ETHICS AND GOVERNMENT ETHICS ACT: THE CONTRACTOR AGREES TO COMPLY WITH THE PROVISIONS OF Act No. 2 of January 4, 2018, as amended, known as the Anti-Corruption Code for New Puerto Rico and Act No. 1 of January 3, 2012, as amended, known as the Government Ethics Act. ----------

a. The contractor, certifies that during the last ten years she has not committed any crime that has not been convicted, nor has probable cause been found for her arrest, for any crime against the public treasury, faith and public function; against the exercise of government; or that involves funds or public property at the state or federal level, of any of the offenses listed in Article 3.4 of Act No. 2-2018, as amended, and Article 6.8 of Act No. 8-2017, as amended. ----------

b. This clause shall apply in the case of a legal entity, in which case it certifies that neither it nor any of its shareholders, partners, officers, principals, employees, subsidiaries or parent companies has been convicted, nor has probable cause been found for its arrest, of any crime against the public treasury, faith and public function; against the exercise of government; or that involve funds or public property at the state or federal level. ----------

c. The contractor, meaning neither the undersigned nor the corporation or special partnership it represents, nor any of its shareholders, partners, officers, principals, employees, subsidiaries or parent companies, are under investigation in any legislative, judicial or administrative proceeding, whether in Puerto Rico, the United States of America or any other country for any of the crimes listed in Article 3.4 of Act No. 2-2018, as amended and Article 6.8 of Act No. 8-2017, as amended: The contractor certifies that THE DIRECTORS AND SHAREHOLDERS OF THE CONTRACTOR,

DRAFT

during the last ten (10) years have not committed any crime against the treasury, faith, or public function involving funds or public property. ----------

d. Furthermore, the contractor certifies that it has not been the subject of any investigation, prosecution, or conviction for the aforementioned crimes, either at the federal or state level; therefore, he or she is not listed in the Puerto Rico Department of Justice's Registry of Persons Convicted of Corruption Offenses. The contractor hereby acknowledges that, should an investigation be initiated and probable cause be established for your arrest for the alleged commission of any of the aforementioned crimes, this contract shall be terminated immediately. ----------

e. The contractor hereby states that it is not the subject of civil or criminal investigation or proceedings for acts related to any of the crimes mentioned in the preceding clause. In addition, it states that it is clear and recognizes its duty to continuously inform ASEM of any situation that occurs during all stages of this contracting and during the execution of this contract that is related to the commission of any of the crimes mentioned in Article 3.4 of Act No. 2-2018, as amended. ----------

f. Likewise, the contractor accepts that it will be justified cause for the termination of this contract, if it is guilty of the aforementioned crimes at the state or federal level. -

19. ABSENCE OF PECUNIARY INTEREST: The contractor certifies that: ----------

a. If necessary, the contractor shall have submitted and provided, prior to the signing of the contract, the corresponding waiver from the Government Ethics Office, which shall become part of this contract. ----------

b. No public official or employee who is authorized to contract on behalf of the agency for which he or she works may enter into a contract between his or her agency and an entity or business in which he or a member of his or her household has or has had during the last four (4) years prior to taking up his or her position. directly or indirectly, pecuniary interest. ----------

c. No agency may enter into a contract in which any of its officers or employees or any member of their family units has or has had during the last four (4) years before taking office, directly or indirectly, a pecuniary interest, unless the Governor, on the recommendation of the Secretary of the Treasury and the Secretary of Justice, authorizes it. ----------

d. No public official or employee may be a party to any interest in the profits or benefits arising from a contract with any other executive agency or governmental agency unless expressly authorized by the Governor, upon the recommendation of the Secretary of the Treasury and the Secretary of Justice. ----------

e. No public official or employee who has the authority to approve or authorize contracts may evaluate, consider, approve, or authorize a contract between an executive agency and an entity or business in which he or any member of his or her household has or has had during the last four (4) years prior to his or her position, directly or indirectly, pecuniary interest. ----------

f. No public official or employee may grant or authorize a contract with a private person or know that this person in turn is representing particular interests in cases or matters involving conflicts of interest or public policy between the contracting government agency and the particular interests represented by such private person. To this end, any government agency shall require any private person with whom it contracts to include a contractual clause in which such person certifies that he or she is not involved in a conflict of interest or public policy as described in this subsection. ----------

g. No executive agency shall contract with or for the benefit of persons who have been public officers or employees of such executive agency, until two (2) years have elapsed since such person has ceased to perform his functions as such. The Governor may issue a waiver as to the applicability of this provision provided that such waiver would be in the interest of the public service. This prohibition shall not apply to contracts for the presentation of pro bono services. ----------

DRAFT

h. It is understood that a family unit includes the spouse of the officer or employee, the dependent children of the official or employee, or those persons who share with the employee or official his or her legal residence or whose financial affairs are under his or her legal control. ----------

20. ADMINISTRATION AND TRANSFORMATION OF THE HUMAN RESOURCES OF THE GOVERNMENT OF PUERTO RICO (OATRH). ----------

    a. The contractor, meaning the undersigned, the corporation or special partnership it represents, any of its shareholders, partners, officers, principals, employees, subsidiaries or parent companies, certifies that it has not been removed from public service and/or disqualified from contracting with the government. If you have incurred in any of the disqualifying causes, you must submit the Resolution issued by the Director of the Office of Administration and Transformation of Human Resources of the Government of Puerto Rico (OATRH) certifying your authorization, a copy of which will be attached to this contract. ----------

21. POLITICAL CODE: Designer: In the event that the Designer works as a regular employee of a public agency or instrumentality is empowered by Act to offer the services that are the subject of this contract under the provisions of Article 177 of the Political Code of 1902, as amended. ----------

22. CONFLICTS OF INTEREST: The Contractor recognizes that in the discharge of his services, it will have a duty of absolute/complete loyalty toward the Agency, which includes not having any adverse interests towards this government Agency. In addition, agree to keep this information considered ABSOLUTELY CONFIDENTIAL. These adverse interests include: the representation of clients that have or could possibly have opposing interests with the Agency. this duty also includes the continuous on-going obligation of disclosing to the Agency all circumstances involving these relationships with clients and third parties or any other interests that could influence the Agency at the moment of granting the Contract and throughout its enforcement or applicability. The Contractor represents opposing interests when, in a client's benefit the Agency has the duty to promote what should be opposed to in execution of its obligations, towards another former, actual or potential client. It also represents a conflict of interests, when its conduct is described as such in the recognized work ethic/rules of the said profession, or within the Acts and regulations of the Government of Puerto Rico. The Contractor recognizes the power of auditing by the Executive Director in relation to the compliance of the prohibitions contained within this Contract. If the Executive Director understands that adverse interests exist or have arisen for the Contractor, it will notify the Contractor in writing of these findings and the intention of dissolving the Contract within a thirty (30) day term. The Contractor agrees to immediately notify the Executive Officer, those acts, of which it may have proper and personal knowledge, which constitute violations to any Act, regulation and/or established code. The Agency's determination of noncompliance by the Contractor in this duty shall be sufficient cause for the immediate rescission of this contract. ----------

23. LITIGATION: The contractor certifies that at the time of signing this contract there is no litigation in process against any government agency or instrumentality, including ASEM, or that if it does, it does not conflict with this contract. ----------

24. FIRST-TIER SUB CONTRACTOR: an entity subcontracted directly by the prime contractor to provide supplies, materials, equipment, or services of any kind required under the prime contractor a first-tier subcontract. ----------

    a. Prior to awarding a Contract, ASEM must obtain Contractor and First Tier Sub-Contractor clearance. To obtain clearance, ASEM will search https://www.sam.gov/SAM/ to verify whether the Contractor and First Tier Sub-Contractor are debarred or not. Therefore, the Proposer(s) and First Tier Sub-Contractor must be registered in the System for Award Management (SAM) at the time of the Proposal submission or initiate the registration process upon Proposal submission. For more information about SAM go to https://www.sam.gov/SAM/. Awards will only be issued to entities which are cleared and not ineligible for award of a Contract due to suspension, debarment, or HUD imposed limited denial of participation. ----------

DRAFT

b. Please be advised that all subcontractors must strictly comply with the requirements applicable to government contracting, as well as with all provisions, regulations, and obligations related to the CDBG-MIT program to which the contracting party is subject. ----------

c. Prior to awarding a Contract, the ASEM must obtain Contractor and First Tier Sub-Contractor clearance. To obtain clearance, the ASEM will search https://www.sam.gov/SAM/ to verify whether the Contractor and First Tier Sub-Contractor are debarred or not. ----------

d. The contract resulting from this RFP shall incorporate all applicable federal contract provisions required by 2 CFR Part 200, Appendix II, HUD requirements, and PRDOH CDBG-MIT requirements. ----------

e. All First-Tier Subcontractors must be registered in the General Services Administration's RUL or RUP, as applicable, and have eligible and active status in the SAM. ----------

f. It is the Contractor's responsibility to present to ASEM the corresponding evidence of registration, within a term of no less than ten (10) calendar days from the date on which the subcontracting is finalized. ----------

g. The contractual relationship between the contractor and the First-Tier Subcontractor shall be governed by the documents attached to this contract. The contractor must use the contract templates as provided. ----------

25. AMENDMENT AGREEMENT AND CHANGE ORDERS: Any amendment to this agreement must be in writing in order to be in full force and effect. No verbal agreement before, contemporaneous or subsequent to the signing of this contract may prevail over the clauses and conditions of the same. The parties agree that all terms and conditions of their contractual relationship are contained herein and there is no agreement or oral understanding whatsoever that can prevail over them. No representation, promise, offer, or assertion about the intention of the parties other than those expressly established and contained in this contract shall bind the contracting parties. This agreement shall be in full force and effect as of the day on which it is signed and may be extended by such subsequent terms as may be agreed upon by the parties to the extent that an amendment signed by both parties is processed and it has been filed for registration with the Office of the Comptroller in accordance with the provisions of Act No. 18 of October 30, 1975, as amended. ----------

a. Change Orders: Before proceeding to authorize changes of orders and make amendments to the amount of this contract, the availability of funds for such work must be consulted with ASEM. To this end, a draft Letter of Request and Justification of Change will be issued for approval by ASEM. Once the application has been approved, the following procedure will be followed: ----------

b. THE CONTRACTOR must submit a proposal for evaluation and recommendation by the authorized representative of ASEM. All the necessary data and information that justifies the need for the change must be included. No work on the Change Order will be carried out until the Change Order has been approved and the contract has been amended in writing. ----------

26. NOTICE: All written notices required or permitted under this Agreement shall be deemed duly given when delivered to the other party through the methods determined by ASEM. The date of transmission shall be deemed the date of notice, except in the case of notices of a change of mailing address, which must be received by ASEM to be effective. ----------

If one of the Parties fails to notify the other of any change of address, any notice sent by one Party to the other shall be deemed duly delivered if it was sent in accordance with this section. ----------

ASEM: ASEM
P.O. BOX 2129
SAN JUAN, PR 00922-2129

THE CONTRACTOR:

DRAFT

26. The services provided by the contractor shall not be transferable. The assignment of this contract shall constitute sufficient grounds for its immediate termination, unless the assignment is made to a parent company, a subsidiary, an affiliate, or a legal successor of the assignor, in which case written notice to ASEM and the assignor's consent shall suffice; the assignor may not withhold such consent without just cause. If ASEM does not accept the assignment, it shall terminate the contract by written notice, without this entailing any charge, penalty, or obligation for ASEM. A breach of this clause shall render THE CONTRACTOR liable for any damage or loss caused to ASEM, whether directly or indirectly.

27. TERMINATION: This Agreement may be terminated: ----------

a) Insufficient funds shall be sufficient cause for immediate termination or modification of the Indemnification clause of this contract. ----------

b) There will be sufficient causes for ASEM to declare the contract terminated immediately, due to the infringement or non-compliance by the contractor to the following conditions and ASEM is relieved of all obligation and responsibility under it:
c) The violation or infractions by the contractor of Act No. 1 of January 3, 2012, as amended, known as the Government Ethics Act of Puerto Rico. ----------

d) The negligent performance by the contractor of its functions or by the abandonment of these. ----------

e) Failure by the contractor to comply with the Regulations and Procedures established by ASEM. ----------

f) The conviction or determination of probable cause against the contractor for the commission of any crime against the treasury, faith or public function; against the exercise of government; or that involves public funds or property, at the federal or state level. ----------

g) The contractor is disbarred from contracting with the government. ----------

h) If the contractor incurs in acts that are in contravention of Public Policy legislation, such as: Sexual Harassment, Discrimination and Use and Abuse of Controlled Substances. ----------

i) Failure to comply with the professional credentials necessary to carry out the work for which they are hired, issued by the corresponding Accreditation Board. ----------

j) In the event that the contractor has been accused, administratively or criminally, or convicted of having fraudulently obtained any credential. ----------

k) If the contractor is deprived of its professional license during the term of the contract or does not maintain its professional license in force. ----------

l) The cancellation or modification of any of the insurance policies and bonds required of the contractor under this contract. ----------
m) ASEM may immediately terminate this agreement if ASEM determines in its sole and absolute discretion that the contractor has violated ASEM's privacy, confidentiality, and security agreements regarding the use and disclosure of ASEM's protected health information of patients. Failure to notify ASEM of any violation of the handling of Protected Health Information (PHI) by the contractor, its associates and/or sub The Contractors will be grounds for termination of the contract. ASEM reserves the right to refer uncured violations of the contractor to the U.S. Department of Health and Human Services. ----------

n) Failure to comply with any clause of the contract will be sufficient cause for the immediate termination of the same. ----------

o) The Governors Chief of Staff will have the power to terminate this contract at any time. ----------

DRAFT

p) Failure to comply with the policies established by the Financial Oversight and Management Board regarding contracting with the Government of Puerto Rico and its instrumentalities applicable to the contractor (BOARD POLICY: REVISION OF CONTRACTS of November 6, 2017, modified on April 30, 2021). ----------

q) Failure to comply with the provisions of Executive Order OE2021-029 of April 27, 2021, or any subsequent amendments thereto where applicable. ----------

-

It is expressly agreed that the contractor will complete any work that remains pending until the time of termination. Once resolved, the service rendered will be remunerated for the date of its resolution once the invoice has been certified and accepted. ----------

27. NEGLIGENCE OR ABANDONMENT: Negligence, abandonment of duties or failure to comply with the provisions of this contract by the contractor will constitute sufficient cause to terminate it immediately without the need for prior notice. ASEM will subsequently notify the contractor of its determination to terminate the contract for any of the reasons indicated above. ----------

28. REGISTRY OF PERSONS CONVICTED OF CORRUPTION: ASEM may terminate this contract without prior notice in the event that the contractor is convicted of crimes against the public treasury, faith and public function or that involve public funds or property at the state or federal level. ----------

It is expressly recognized that this is an essential condition of this contract and if he appears in the registry as a person convicted of corruption, ASEM will immediately terminate it, and the contractor will have to reimburse the contracting party any sum of money received under this contract. ----------

29. LIABILITY FOR DAMAGES: The contractor acknowledges and will abide by the ethical standards of its profession or service, that it will render its services in accordance with the best practices of its profession and will comply with all local and federal rules and regulations, as well as Acts applicable to this contract or the performance thereof and assumes responsibility for its actions. The contractor shall be liable for any damage caused by the negligent performance or abandonment of the obligations assumed under this contract and relieves ASEM of any obligation and liability arising as a consequence of the contractor's actions. ----------

30. TERMINATION CLAUSE: The Governors Chief of Staff will have the power to terminate this contract at any time. ----------

31. FINANCIAL OVERSIGHT AND MANAGEMENT BOARD CONTRACT REVIEW POLICY FOR PUERTO RICO: ASEM and the CONTRACTOR acknowledge that the CONTRACTOR has submitted the certification entitled " The Contractor Certification Requirement," required pursuant to the Financial Oversight and Management Board Contract Review Policy for Puerto Rico, signed under penalty of perjury by the Executive Director of the Contractor (or the equivalent highest-ranking officer). Included as an annex to this Contract, a signed copy of the " The Contractor Certification Requirement". ----------

32. CERTIFICATION OF TRANSFER OF SKILLS AND TECHNICAL KNOWLEDGE: Designer: The Certified Fiscal Plan requires that every professional services contract has an adequate transfer of skills and technical knowledge to the relevant ASEM personnel to the extent that such contract contemplates recurring professional services that can be performed by ASEM personnel properly trained. To this end, the Designer certifies that: ----------

☐ You will appropriately transfer your skills and technical knowledge to the relevant ASEM personnel as stipulated in this Agreement. ----------

☐ You are not obliged to transfer your skills and technical knowledge, because the services contemplated in this Contract are not of a recurring nature, so they cannot be performed by existing ASEM personnel. ----------

☐ You are not required to transfer your skills and technical knowledge, because the services contemplated in this Contract are of a specialized nature and/or require independence in order to be performed, as defined by the Code of Conduct of the Financial Oversight and Management Board, so they cannot be performed by existing

DRAFT

ASEM personnel. ----------

32. PROHIBITION OF LOBBYING ACTIVITIES CLAUSE: The Contractor certifies that it has read and is aware of the provisions of the "Code of Ethics for Contractors, Suppliers, and Applicants for Incentives of the Government of Puerto Rico," included as part of the provisions of Act No. 2-2018, as amended, known as the "Anti-Corruption Code for New Puerto Rico." Specifically, the Contractor recognizes that, pursuant to Article 3.2(h) of Act No. 2-2018, it may not intervene "in matters that may lead to a conflict of interest or that have the appearance of one." To this end, the Contractor acknowledges that it has read and is aware of the regulations contained in Memorandum No. OSG-2025-001 issued by the Office of the Chief of Staff, and certifies and guarantees that, during the term of this contract, the latter, its shareholders, officers or employees, will not engage in lobbying activities, direct or indirect, as defined in the aforementioned Memorandum No. OSG-2025-001, against the contracting government entity herein or any of its attached entities. The Contractor recognizes that this is an essential condition of this contract and of this contract incurring in a violation of the regulations established in the "Code of Ethics for contractors, suppliers, and applicants for incentives of the Government of Puerto Rico" of Law No. 2-2018 and/or in Memorandum No. OSG-2025-001, will be sufficient cause for this contract to be terminated and cancelled immediately. ----------

33. CONTRACTUAL RELATIONS WITH OTHER GOVERNMENT ENTITIES: ----------

Check the one that applies: ----------

( ) At the time of signing this contract, the contractor maintains a contractual relationship in force with the following entities of the Government of Puerto Rico: A list is attached. The contractor certifies that the aforementioned entities are all entities of the Government of Puerto Rico with which it has a contractual relationship. In addition, the contractor acknowledges and agrees that failure to mention any governmental entity with which it has a current contractual relationship may result in the termination of this contract if required by ASEM. ----------

( ) THE CONTRACTOR certifies that, at the time of signing this contract, it does not maintain a current contractual relationship with other entities of the Government of Puerto Rico. In addition, the contractor acknowledges and accepts that the failure to mention any governmental entity with which it has a current contractual relationship may result in the termination of this contract if required by ASEM. ----------

34. ADMINISTRATIVE BULLETIN OE-2021-029 AND CIRCULAR LETTER OGP-CC-013-2021: Designer: ASEM certifies that the Designer was selected as the provider of the professional services described in this contract in accordance with the provisions of Executive Order 2021-029. Likewise, both parties certify that they are aware of the provisions of said Executive Order and Circular Letter and that any contracting covered by it that has not followed the processes and requirements established therein will be terminated. ----------

35. PUERTO RICO INNOVATION AND TECHNOLOGY SERVICE (PRITS): BOTH PARTIES commit to comply with the Government of Puerto Rico's Policy for Cyber Security promulgated on October 29, 2021 and PRITS' supporting standards. Any vendors, vendors, partners, the Contractors, service providers, and other third parties with access to government information systems must comply with the policy requirements applicable to them. Any violation of this policy may subject any employee, third-party vendor, or any other affiliated agency to disciplinary action, civil penalties, and/or criminal prosecution. ---------

a. Both parties acknowledge that the services to be provided under contract must have prior authorization of the PRITS Office as established in Administrative Order PRITS-2021-001. ----------

b. The contractor is committed to complying with the special provisions established in administrative order PRITS 2023-001 of the PUERTO RICO INNOVATION AND TECHNOLOGY SERVICE (PRITS). ----------

c. The Contractor is required to register in the Registry of Technology Providers (RPT), as required by Administrative Order PRITS 2023-001 of the PUERTO RICO INNOVATION AND TECHNOLOGY SERVICE (PRITS). The contractor undertakes to register and provide the Certification as an integral part of this contract. ----------

DRAFT

d. Both PARTIES commit to comply with the guidelines established by the PUERTO RICO INNOVATION AND TECHNOLOGY SERVICE (PRITS), as well as with the recommendations offered in the Information Brochure of the Office of the Comptroller of Puerto Rico "Planning, Contracting, Provision of Services and Aspects Related to Disbursements for Technology Projects in the Government, as applicable:

e. All technology services contracted or acquired by the Agencies shall be the property of the Government of Puerto Rico and shall be under the supervision and jurisdiction of PRITS as established in Act-75 and Act-151. ----------

i. The development and implementation of any application or software must be fully documented by the Contractor or supplier for the benefit of the Agency and/or the Government using standard or commonly used development and documentation methodologies. ----------

ii. The source codes that are not proprietary or exclusive to the Contractor or supplier (whether or not contractually agreed) of the developed programs, will be delivered to PRITS in electronic format in a version control system (e.g. Github, DevOps) provided by the agency. ----------

iii. Any design, model or product derived from the contracting or acquisition is certified to be considered the intellectual property of the Government, which will have absolute rights to it at its sole discretion, without having to impose additional licensing costs on the Government for the code or development. --

iv. Every contract must expressly agree that in any development or creation the doctrine of work for hire will prevail, with the Government remaining the owner of the right(s) and the documentation. It may only be contracted outside the doctrine of work for hire, with express dispensation from PRITS. ----------

v. During the implementation phase of the application or software, the Contractor or supplier must commit to providing training and/or technical training to users and Agency personnel to ensure the corresponding transfer of knowledge. ----------

vi. The Agency is responsible for establishing, in coordination with PRITS, the plan that will contain the methodology for maintenance and/or updates of the software to guarantee the availability, continuity and integrity of the solution once put into production. This plan must be submitted to PRITS. ----------

vii. The Agency must ensure that it has complete and up-to-date documentation of the application in production at all times. ----------

viii. No information or development will remain in the custody of third parties and will remain under the supervision and custody of the Government on its servers or cloud as determined by PRITS. ----------

ix. All cloud services have to be contracted directly through PRITS. The hosting service or any storage of data on third-party servers, whether by contract or independent service, is strictly prohibited. For information on available cloud services, you can contact the PRITS Technical Support Area through support@prits.pr.gov. ----------

x. *"The Contractor or Supplier certifies that in no way will this contracting impact and/or adversely affect contractual commitments in force with said Government Agencies of the Government of Puerto Rico. The Contractor specifically represents that this contract or purchase order will in no way negatively impact other obligations of the Contractor or supplier, its affiliates, subsidiaries and/or related entities to the Government of Puerto Rico. Such adverse impact includes, but is not limited to, price, tariff, execution time, duplication of goods or services provided to the Government of Puerto Rico. At any time that the Contractor or Supplier becomes aware of such a possible adverse impact, the Agency in turn is authorized to contact the component of the Government of Puerto Rico related to the adverse situation to consult a solution, which may include that the contract or purchase order remains unaltered. be amended, or be rescinded, with the Contractor or Supplier*

DRAFT

remaining responsible for any impairment suffered by the Government of Puerto Rico if, due to its negligence or non-compliance, it allows the adverse situation to materialize. Proactively, the Contractor or Supplier undertakes not to enter into any additional contract or purchase order with the Government of Puerto Rico, if it can reasonably foresee that it does not have the capacity to assume a new contract or purchase order that adversely affects the obligations assumed by the Contractor or Supplier through a Contract or Purchase Order." ----------

xi. The use of Cloud Technologies shall comply with all applicable state and federal privacy and confidentiality Acts and regulations. The Agency that acquires the Cloud Technology services will be responsible for ensuring that the roles and responsibilities related to data handling and data privacy and confidentiality are clearly and adequately defined in the Cloud Technology provider's service agreement. ----------

xii. The Agency must determine the reason or justification for using a Cloud Technology model, which may include the following, but not limited to: ---------

i. Greater efficiency or effectiveness in the provision of a technological service. ----------

ii. The need for a specific attribute of Cloud Technologies (e.g. elasticity, scalability, utilization-based model). ----------

iii. The need to implement a technological service in a short period of time.

iv. The need to implement new or improved contingency mechanisms, disaster recovery, or strategies to ensure business continuity. ----------

v. As a strategy to establish development, testing, quality control or any other need in line with the best practices in the software development cycle. ----------

f. The agency must be clear about all costs associated with the Cloud Solutions lifecycle, not just the implementation. ----------

g. Service Level Agreements should be established where supplier response levels are established in any incident. ----------

h. The Agency should have a migration plan in place in case you need to change Cloud Technologies solution provider or want to bring the solution into the agency's technology infrastructure. This seeks to reduce and avoid being tied to a single provider or type of technology, guaranteeing the entry and exit of the cloud. ---------

i. "The Contractor, vendor, or provider of the good or service that is the subject of this invoice or contract, consents and agrees that the Puerto Rico Innovation and Technology Service ("PRITS") may contact and request any and all information about the goods and/or services provided to the Government of Puerto Rico without the intervention or consent of the contracting agency and/or acquirer." ----------

j. THE CONTRACTOR represents and warrants to both PRITS and ASEM that it maintains a Business Continuity Plan ("BCP"), and as part thereof, an up-to-date and adequate Disaster Recovery Plan ("DRP") for the services subject to this contract. The "DRP" must guarantee to the greatest extent the recovery of data, hardware and software, so that the Government of Puerto Rico can maintain or restart digital services in the event of a natural or man-made disaster. The "BCP" must be based on and in accordance with established professional continuity practices and in harmony with any governmental continuity plan that the Government of Puerto Rico maintains or in the future adopts, amends, or modifies. To this end, it shall provide the detailed model action plan for the disaster. In the event of an event or occurrence of this nature, the Contractor undertakes to provide PRITS with detailed information within a period of no more than twenty-four (24) hours from its origin. ----------

k. The goods or services proposed must have some type of guarantee associated with them. In the case of goods, the warranty must include a period within which the

DRAFT

supplier of the good is responsible for all repairs to the good and replacement if necessary. In the case of services, the guarantee consists of having to re-provide the services of these services without being accepted by the contracting agency. -------

I. THE CONTRACTOR will submit progress reports on the services, as requested by ASEM in order to notify them in the Quarterly Report of the Strategic Plan required by Act 75-2019, as amended, "Puerto Rico Innovation and Technology Service Act. ----------

36. SERVICES OUTSIDE OF CONTRACT: The contractor has the duty of diligence to ensure that ASEM complies with all the contractual formalities required by Act. Any goods and/or services delivered, supplied or provided by the contractor without a valid, signed and valid purchase order and/or contract or its amendment, will not be paid for by any governmental entity and only the contractor will assume the loss. It is the duty and obligation of the contractor to require ASEM to strictly comply with the contractual formalities before delivering and/or supplying any good, carrying out work and/or providing a service. Resolutions of payment or retroactive amendments will be considered null and void. ----------

45 CONFIDENTIALITY: ASEM and the contractor shall treat as confidential any documentation, data or information requested in connection with this contract to include as complementary documentation, except in cases where the disclosure of the information is required by Act. ----------

46 ASEM and the CONTRACTOR acknowledge that this Agreement with all its annexes constitutes the entire agreement between the Parties and nullifies any negotiation or agreement that conflicts with what is agreed herein. ----------

47 AUDIT: The contractor must retain and keep for a minimum period of six (6) years one (1) intervention of the Comptroller's Office, whichever occurs first, the files of work reports, related documents and expenses incurred in the services for which this contract is derived. In addition, it will have available all the documents that are related to the services contracted here for review by ASEM and will be obliged to render any report when required. The contractor will make available all information pertinent to this government contract, at no cost to the treasury. ----------

48 COMPTROLLER: ASEM and the Contractor acknowledge and accept that no service or consideration subject to this contract may be demanded until it has been presented for registration in the Office of the Comptroller in accordance with the provisions of Act No. 18 of October 30, 1975, as amended. ----------

49 ULTRA VIRES: In accordance with the law and the rules that govern the contracting of services, the parties to this contract are aware that services will not continue to be provided under this contract from its expiration date, unless on the expiration date there is already an amendment signed by the Parties. No payment will be made for services rendered in violation of this clause, as any officer who solicits and accepts services from the other party in violation of this provision is doing so without any legal authority. ----------

50 SEVERABILITY OF CLAUSES: The provisions of this agreement are independent and separate from each other and if any part, section, provision or sentence of this agreement is declared unconstitutional, null or void by a court of competent jurisdiction and competence, the determination to that effect shall not affect the validity of the remaining provisions, which remain in full force and effect. ----------

51 APPLICABLE LAW: This contract shall always be subject to the Laws of the Government of Puerto Rico, Federal Laws and shall be construed in accordance with applicable Laws and Regulations. Should situations arise that are not contemplated or governed by the provisions of this contract, they will be governed by the Health Services Administration Regulations, State or Federal Law, applicable case law, and usage and customs in their proper sense. Any legal action or litigation arising out of the interpretation, validity, enforcement, or termination of this contract shall be heard exclusively before the Court of First Instance of the Superior Court of San Juan, Puerto Rico. ----------

ACCEPTANCE AND SIGNATURE

The parties affirm that they have read this contract in all its parts and find it drafted in

Contractor Certification

The following certification shall be provided to the Oversight Board and the Commonwealth's Contracting Government Entity by the Chief Executive Officer (or equivalent highest rank officer) of each proposed contractor under contracts submitted for review:

1. The expected contractor's subcontractor(s) in connection with the proposed contract[1] is (are) the following:

   (Name of individual or firm, including names of principals, principal stakeholders, and owners of the latter)

   (Principal terms and conditions of the contractual relation and role of the subcontractor) (Amount of proposed contract payable to each subcontractor)

2. Neither the contractor nor any of its owners[2], partners, directors, officials or employees, has agreed to share or give a percentage of the contractor's compensation under the contract to, or otherwise compensate, any third party, whether directly or indirectly, in connection with the procurement, negotiation, execution or performance of the contract, except as follows:

   (Name of individual or firm, including names of principals, principal stakeholders, and owners of the latter)

   (Principal terms and conditions of the compensation sharing arrangement and consideration for such benefit)

3. To the best knowledge of the signatory (after due investigation), no person has unduly intervened in the procurement, negotiation or execution of the contract, for its own benefit or that of a third person, in contravention of applicable law.

4. To the best knowledge of the signatory (after due investigation), no person has: (i) offered, paid, or promised to pay money to; (ii) offered, given, or promised to give anything of value to; or (iii) otherwise influenced any public official or employee with the purpose of securing any advantages, privileges or favors for the benefit of such person in connection with the contract (such as the

Design-Build Institute of America – Contract Documents
LICENSE AGREEMENT

By using the DBIA Contract Documents, you agree to and are bound by the terms of this License Agreement.

1. **License.** The Design-Build Institute of America ("DBIA") provides DBIA Contract Documents and licenses their use worldwide. You acknowledge that DBIA Contract Documents are protected by the copyright laws of the United States. You have a limited nonexclusive license to: (a) Use DBIA Contract Documents on any number of machines owned, leased, or rented by your company or organization; (b) Use DBIA Contract Documents in printed form for bona fide contract purposes; and (c) Copy DBIA Contract Documents into any machine-readable or printed form for backup or modification purposes in support of your permitted use.
2. **User Responsibility.** You assume sole responsibility for the selection of specific documents or portions thereof to achieve your intended results and for the installation, use, and results obtained from the DBIA Contract Documents. You acknowledge that you understand that the text of the DBIA Contract Documents has important legal consequences and that consultation with an attorney is recommended with respect to use or modification of the text. You will not represent that any of the contract documents you generate from DBIA Contract Documents are DBIA documents unless (a) the document text is used without alteration or (b) all additions and changes to, and deletions from, the text are clearly shown.
3. **Copies.** You may not use, copy, modify, or transfer DBIA Contract Documents, or any copy, modification, or merged portion, in whole or in part, except as expressly provided for in this license. Reproduction of DBIA Contract Documents in printed or machine-readable format for resale or educational purposes is expressly prohibited. You will reproduce and include DBIA's copyright notice on any printed or machine-readable copy, modification, or portion merged into another document or program.
4. **Transfers.** You may not transfer possession of any copy, modification, or merged portion of DBIA Contract Documents to another party, except that a party with whom you are contracting may receive and use such transferred material solely for purposes of its contract with you. You may not sublicense, assign, or transfer this license except as expressly provided in this Agreement, and any attempt to do so is void.
5. **Term.** The license is effective for one year from the date of purchase. DBIA may elect to terminate it earlier, by written notice to you, if you fail to comply with any term or condition of this Agreement.
6. **Limited Warranty.** DBIA warrants the electronic files or other media by which DBIA Contract Documents are furnished to be free from defects in materials and workmanship under normal use during the Term. There is no other warranty of any kind, expressed or implied, including, but not limited to the implied warranties of merchantability and fitness for a particular purpose. Some states do not allow the exclusion of implied warranties, so the above exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state. DBIA does not warrant that the DBIA Contract Documents will meet your requirements or that the operation of DBIA Contract Documents will be uninterrupted or error free.
7. **Limitations of Remedies.** DBIA's entire liability and your exclusive remedy shall be: the replacement of any document not meeting DBIA's "Limited Warranty" which is returned to DBIA with a copy of your receipt, or at DBIA's election, your money will be refunded. In no event will DBIA be liable to you for any damages, including any lost profits, lost savings, or other incidental or consequential damages arising out of the use or inability to use DBIA Contract Documents even if DBIA has been advised of the possibility of such damages, or for any claim by any other party. Some states do not allow the limitation or exclusion of liability for incidental or consequential damages, so the above limitation or exclusion may not apply to you.
8. **Acknowledgement.** You acknowledge that you have read this agreement, understand it, and agree to be bound by its terms and conditions, and that it will be governed by the laws of the District of Columbia. You further agree that it is the complete and exclusive statement of your agreement with DBIA which supersedes any proposal or prior agreement, oral or written, and any other communications between the parties relating to the subject matter of this agreement.

You acknowledge that DBIA Contract Documents are protected by the copyright laws of the United States. You have a limited nonexclusive license to: (a) Use DBIA Contract Documents on any number of machines owned, leased, or rented by your company or organization; (b) Use DBIA Contract Documents in printed form for bona fide contract purposes; and (c) Copy DBIA Contract Documents into any machine-readable or printed form for backup or modification purposes in support of your permitted use.
2. **User Responsibility.** You assume sole responsibility for the selection of specific documents or portions thereof to achieve your intended results and for the installation, use, and results obtained from the DBIA Contract Documents. You acknowledge that you understand that the text of the DBIA Contract Documents has important legal consequences and that consultation with an attorney is recommended with respect to use or modification of the text. You will not represent that any of the contract documents you generate from DBIA Contract Documents are DBIA documents unless (a) the document text is used without alteration or (b) all additions and changes to, and deletions from, the text are clearly shown.
3. **Copies.** You may not use, copy, modify, or transfer DBIA Contract Documents, or any copy, modification, or merged portion, in whole or in part, except as expressly provided for in this license. Reproduction of DBIA Contract Documents in printed or machine-readable format for resale or educational purposes is expressly prohibited. You will reproduce and include DBIA's copyright notice on any printed or machine-readable copy, modification, or portion merged into another document or program.
4. **Transfers.** You may not transfer possession of any copy, modification, or merged portion of DBIA Contract Documents to another party, except that a party with whom you are contracting may receive and use such transferred material solely for purposes of its contract with you. You may not sublicense, assign, or transfer this license except as expressly provided in this Agreement, and any attempt to do so is void.
5. **Term.** The license is effective for one year from the date of purchase. DBIA may elect to terminate it earlier, by written notice to you, if you fail to comply with any term or condition of this Agreement.
6. **Limited Warranty.** DBIA warrants the electronic files or other media by which DBIA Contract Documents are furnished to be free from defects in materials and workmanship under normal use during the Term. There is no other warranty of any kind, expressed or implied, including, but not limited to the implied warranties of merchantability and fitness for a particular purpose. Some states do not allow the exclusion of implied warranties, so the above exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state. DBIA does not warrant that the DBIA Contract Documents will meet your requirements or that the operation of DBIA Contract Documents will be uninterrupted or error free.
7. **Limitations of Remedies.** DBIA's entire liability and your exclusive remedy shall be: the replacement of any document not meeting DBIA's "Limited Warranty" which is returned to DBIA with a copy of your receipt, or at DBIA's election, your money will be refunded. In no event will DBIA be liable to you for any damages, including any lost profits, lost savings, or other incidental or consequential damages arising out of the use or inability to use DBIA Contract Documents even if DBIA has been advised of the possibility of such damages, or for any claim by any other party. Some states do not allow the limitation or exclusion of liability for incidental or consequential damages, so the above limitation or exclusion may not apply to you.
8. **Acknowledgement.** You acknowledge that you have read this agreement, understand it, and agree to be bound by its terms and conditions, and that it will be governed by the laws of the District of Columbia. You further agree that it is the complete and exclusive statement of your agreement with DBIA which supersedes any proposal or prior agreement, oral or written, and any other communications between the parties relating to the subject matter of this agreement.

CONSENT OF SURETY TO REDUCTION IN OR PARTIAL RELEASE OF RETAINAGE TO SUBCONTRACTOR

This form has been endorsed by The National Association of Surety Bond Producers and The Surety & Fidelity Association of America

PROJECT: *(Name and location)*	**TO DESIGN-BUILDER /OBLIGEE:** *(Name and address)*
SUBCONTRACTOR/PRINCIPAL: *(Name and address)*	**SURETY:** *(Name and address)*
SUBCONTRACT AGREEMENT DATED:	**Copies To:** □ Design-Builder □ Subcontractor □ Surety □ Other: _____

In accordance with the provisions of the Subcontract Agreement between the Design-Builder and Subcontractor, the Surety on the bond(s) of Subcontractor hereby approves of the reduction in, or partial release of, retainage to the Subcontractor. The Surety also agrees that such reduction in, or partial release of, retainage to the Subcontractor shall not relieve the Surety of any of its obligations to Design-Builder as set forth in the Surety's bond(s) for this Project.

CERTIFICATE OF FINAL COMPLETION

PROJECT: *(Name and location)*	**OWNER:** *(Name and address)*
DATE OF FINAL COMPLETION:	**DESIGN-BUILDER:** *(Name and address)*

Description of Work (or Designated Area) Being Certified for Final Completion:
(describe here)

The above-described Work has been reviewed and found to be complete in accordance with the Construction Documents, except as noted below:
(list any exceptions here)

Article 1

Affidavit and Release

1.1 The undersigned on behalf of Design-Builder, after being duly sworn upon his/her oath, swears that there are no claims, obligations or liens outstanding or unsatisfied for labor, services, material, equipment, taxes or other items performed, furnished or incurred for or in connection with the Work which will in any way affect Owner's interests.

1.2 Design-Builder agrees that upon receipt of final payment to Design-Builder, it waives and releases all claims against Owner, except those claims previously made in writing to Owner and which remaining unsettled at the time of final payment. For clarity, Design-Builder identifies those unsettled claims as follows:
(identify all unsettled claims below, or write "None" if there are no such claims pending)

Article 2

Certification

2.1 Design-Builder certifies that it has achieved Final Completion of all Work described in this Certificate of Final Completion.

2.2 Design-Builder represents that it has:

.1 furnished to Owner a consent of Design-Builder's surety, if any, to final payment;

.2 provided Owner with all operating manuals, warranties and other deliverables required by the Contract Documents; and

.3 furnished Owner with certificates of insurance confirming that required coverages will remain in effect consistent with the requirements of the Contract Documents.

2.3 The undersigned is authorized to make this affidavit, release and certification on behalf of Design-Builder.

Notary:	**Design-Builder:**
Sworn to me and subscribed in my presence this _____ day of _____, 20___. Signature of Notary for State of _____: _____ My Commission Expires: _____ *(NOTE: users should check the notary jurat for compliance with applicable state law)*	_____ Signature of authorized representative _____ Printed name _____ Title _____ **Date**

Article 3

Acceptance

3.1 The Owner agrees that Final Completion of the above-described Work has been achieved as of the date stated above. Signing of this Certificate of Final Completion by the Owner in no way alters the responsibility of the Design-Builder under the Agreement and the Contract Documents including, without limitation, all warranties and guarantees.

Design-Build Institute of America – Contract Documents
LICENSE AGREEMENT

By using the DBIA Contract Documents, you agree to and are bound by the terms of this License Agreement.

1. **License.** The Design-Build Institute of America ("DBIA") provides DBIA Contract Documents and licenses their use worldwide. You acknowledge that DBIA Contract Documents are protected by the copyright laws of the United States. You have a limited nonexclusive license to: (a) Use DBIA Contract Documents on any number of machines owned, leased, or rented by your company or organization; (b) Use DBIA Contract Documents in printed form for bona fide contract purposes; and (c) Copy DBIA Contract Documents into any machine-readable or printed form for backup or modification purposes in support of your permitted use.
2. **User Responsibility.** You assume sole responsibility for the selection of specific documents or portions thereof to achieve your intended results and for the installation, use, and results obtained from the DBIA Contract Documents. You acknowledge that you understand that the text of the DBIA Contract Documents has important legal consequences and that consultation with an attorney is recommended with respect to use or modification of the text. You will not represent that any of the contract documents you generate from DBIA Contract Documents are DBIA documents unless (a) the document text is used without alteration or (b) all additions and changes to, and deletions from, the text are clearly shown.
3. **Copies.** You may not use, copy, modify, or transfer DBIA Contract Documents, or any copy, modification, or merged portion, in whole or in part, except as expressly provided for in this license. Reproduction of DBIA Contract Documents in printed or machine-readable format for resale or educational purposes is expressly prohibited. You will reproduce and include DBIA's copyright notice on any printed or machine-readable copy, modification, or portion merged into another document or program.
4. **Transfers.** You may not transfer possession of any copy, modification, or merged portion of DBIA Contract Documents to another party, except that a party with whom you are contracting may receive and use such transferred material solely for purposes of its contract with you. You may not sublicense, assign, or transfer this license except as expressly provided in this Agreement, and any attempt to do so is void.
5. **Term.** The license is effective for one year from the date of purchase. DBIA may elect to terminate it earlier, by written notice to you, if you fail to comply with any term or condition of this Agreement.
6. **Limited Warranty.** DBIA warrants the electronic files or other media by which DBIA Contract Documents are furnished to be free from defects in materials and workmanship under normal use during the Term. There is no other warranty of any kind, expressed or implied, including, but not limited to the implied warranties of merchantability and fitness for a particular purpose. Some states do not allow the exclusion of implied warranties, so the above exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state. DBIA does not warrant that the DBIA Contract Documents will meet your requirements or that the operation of DBIA Contract Documents will be uninterrupted or error free.
7. **Limitations of Remedies.** DBIA's entire liability and your exclusive remedy shall be: the replacement of any document not meeting DBIA's "Limited Warranty" which is returned to DBIA with a copy of your receipt, or at DBIA's election, your money will be refunded. In no event will DBIA be liable to you for any damages, including any lost profits, lost savings, or other incidental or consequential damages arising out of the use or inability to use DBIA Contract Documents even if DBIA has been advised of the possibility of such damages, or for any claim by any other party. Some states do not allow the limitation or exclusion of liability for incidental or consequential damages, so the above limitation or exclusion may not apply to you.
8. **Acknowledgement.** You acknowledge that you have read this agreement, understand it, and agree to be bound by its terms and conditions, and that it will be governed by the laws of the District of Columbia. You further agree that it is the complete and exclusive statement of your agreement with DBIA which supersedes any proposal or prior agreement, oral or written, and any other communications between the parties relating to the subject matter of this agreement.

Design-Build Institute of America – Contract Documents
LICENSE AGREEMENT

By using the DBIA Contract Documents, you agree to and are bound by the terms of this License Agreement.

1. **License.** The Design-Build Institute of America ("DBIA") provides DBIA Contract Documents and licenses their use worldwide. You acknowledge that DBIA Contract Documents are protected by the copyright laws of the United States. You have a limited nonexclusive license to: (a) Use DBIA Contract Documents on any number of machines owned, leased, or rented by your company or organization; (b) Use DBIA Contract Documents in printed form for bona fide contract purposes; and (c) Copy DBIA Contract Documents into any machine-readable or printed form for backup or modification purposes in support of your permitted use.
2. **User Responsibility.** You assume sole responsibility for the selection of specific documents or portions thereof to achieve your intended results and for the installation, use, and results obtained from the DBIA Contract Documents. You acknowledge that you understand that the text of the DBIA Contract Documents has important legal consequences and that consultation with an attorney is recommended with respect to use or modification of the text. You will not represent that any of the contract documents you generate from DBIA Contract Documents are DBIA documents unless (a) the document text is used without alteration or (b) all additions and changes to, and deletions from, the text are clearly shown.
3. **Copies.** You may not use, copy, modify, or transfer DBIA Contract Documents, or any copy, modification, or merged portion, in whole or in part, except as expressly provided for in this license. Reproduction of DBIA Contract Documents in printed or machine-readable format for resale or educational purposes is expressly prohibited. You will reproduce and include DBIA's copyright notice on any printed or machine-readable copy, modification, or portion merged into another document or program.
4. **Transfers.** You may not transfer possession of any copy, modification, or merged portion of DBIA Contract Documents to another party, except that a party with whom you are contracting may receive and use such transferred material solely for purposes of its contract with you. You may not sublicense, assign, or transfer this license except as expressly provided in this Agreement, and any attempt to do so is void.
5. **Term.** The license is effective for one year from the date of purchase. DBIA may elect to terminate it earlier, by written notice to you, if you fail to comply with any term or condition of this Agreement.
6. **Limited Warranty.** DBIA warrants the electronic files or other media by which DBIA Contract Documents are furnished to be free from defects in materials and workmanship under normal use during the Term. There is no other warranty of any kind, expressed or implied, including, but not limited to the implied warranties of merchantability and fitness for a particular purpose. Some states do not allow the exclusion of implied warranties, so the above exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state. DBIA does not warrant that the DBIA Contract Documents will meet your requirements or that the operation of DBIA Contract Documents will be uninterrupted or error free.
7. **Limitations of Remedies.** DBIA's entire liability and your exclusive remedy shall be: the replacement of any document not meeting DBIA's "Limited Warranty" which is returned to DBIA with a copy of your receipt, or at DBIA's election, your money will be refunded. In no event will DBIA be liable to you for any damages, including any lost profits, lost savings, or other incidental or consequential damages arising out of the use or inability to use DBIA Contract Documents even if DBIA has been advised of the possibility of such damages, or for any claim by any other party. Some states do not allow the limitation or exclusion of liability for incidental or consequential damages, so the above limitation or exclusion may not apply to you.
8. **Acknowledgement.** You acknowledge that you have read this agreement, understand it, and agree to be bound by its terms and conditions, and that it will be governed by the laws of the District of Columbia. You further agree that it is the complete and exclusive statement of your agreement with DBIA which supersedes any proposal or prior agreement, oral or written, and any other communications between the parties relating to the subject matter of this agreement.

Design-Build Institute of America - Contract Documents

LICENSE AGREEMENT

By using the DBIA Contract Documents, you agree to and are bound by the terms of this License Agreement.

1. **License.** The Design-Build Institute of America ("DBIA") provides DBIA Contract Documents and licenses their use worldwide. You acknowledge that DBIA Contract Documents are protected by the copyright laws of the United States. You have a limited nonexclusive license to: (a) Use DBIA Contract Documents on any number of machines owned, leased or rented by your company or organization; (b) Use DBIA Contract Documents in printed form for bona fide contract purposes; and (c) Copy DBIA Contract Documents into any machine-readable or printed form for backup or modification purposes in support of your permitted use.
2. **User Responsibility.** You assume sole responsibility for the selection of specific documents or portions thereof to achieve your intended results, and for the installation, use, and results obtained from the DBIA Contract Documents. You acknowledge that you understand that the text of the DBIA Contract Documents has important legal consequences and that consultation with an attorney is recommended with respect to use or modification of the text. You will not represent that any of the contract documents you generate from DBIA Contract Documents are DBIA documents unless (a) the document text is used without alteration or (b) all additions and changes to, and deletions from, the text are clearly shown.
3. **Copies.** You may not use, copy, modify, or transfer DBIA Contract Documents, or any copy, modification or merged portion, in whole or in part, except as expressly provided for in this license. Reproduction of DBIA Contract Documents in printed or machine-readable format for resale or educational purposes is expressly prohibited. You will reproduce and include DBIA's copyright notice on any printed or machine-readable copy, modification, or portion merged into another document or program.
4. **Transfers.** You may not transfer possession of any copy, modification or merged portion of DBIA Contract Documents to another party, except that a party with whom you are contracting may receive and use such transferred material solely for purposes of its contract with you. You may not sublicense, assign, or transfer this license except as expressly provided in this Agreement, and any attempt to do so is void.
5. **Term.** The license is effective for one year from the date of purchase. DBIA may elect to terminate it earlier, by written notice to you, if you fail to comply with any term or condition of this Agreement.
6. **Limited Warranty.** DBIA warrants the electronic files or other media by which DBIA Contract Documents are furnished to be free from defects in materials and workmanship under normal use during the Term. There is no other warranty of any kind, expressed or implied, including, but not limited to the implied warranties of merchantability and fitness for a particular purpose. Some states do not allow the exclusion of implied warranties, so the above exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state. DBIA does not warrant that the DBIA Contract Documents will meet your requirements or that the operation of DBIA Contract Documents will be uninterrupted or error free.
7. **Limitations of Remedies.** DBIA's entire liability and your exclusive remedy shall be: the replacement of any document not meeting DBIA's "Limited Warranty" which is returned to DBIA with a copy of your receipt, or at DBIA's election, your money will be refunded. In no event will DBIA be liable to you for any damages, including any lost profits, lost savings or other incidental or consequential damages arising out of the use or inability to use DBIA Contract Documents even if DBIA has been advised of the possibility of such damages, or for any claim by any other party. Some states do not allow the limitation or exclusion of liability for incidental or consequential damages, so the above limitation or exclusion may not apply to you.
8. **Acknowledgment.** You acknowledge that you have read this agreement, understand it and agree to be bound by its terms and conditions and that it will be governed by the laws of the District of Columbia. You further agree that it is the complete and exclusive statement of your agreement with DBIA which supersedes any proposal or prior agreement, oral or written, and any other communications between the parties relating to the subject matter of this agreement.

General Instructions

No.	Subject	Instruction
1.	Standard Forms	Standard form contracts have long served an important function in the United States and international construction markets. The common purpose of these forms is to provide an economical and convenient way for parties to contract for design and construction services. As standard forms gain acceptance and are used with increased frequency, parties are able to enter into contracts with greater certainty as to their rights and responsibilities.
2.	DBIA Standard Form Contract Documents	Since its formation in 1993, the Design-Build Institute of America ("DBIA") has regularly evaluated the needs of owners, design-builders, and other parties to the design-build process in preparation for developing its own contract forms. Consistent with DBIA's mission of promulgating best design-build practices, DBIA believes that the design-build contract should reflect a balanced approach to risk that considers the legitimate interests of all parties to the design-build process. DBIA's Standard Form Contract Documents reflect a modern risk allocation approach, allocating each risk to the party best equipped to manage and minimize that risk, with the goal of promoting best design-build practices.
3.	Use of Non-DBIA Documents	To avoid inconsistencies among documents used for the same project, DBIA's Standard Form Contract Documents should not be used in conjunction with non-DBIA documents unless the non-DBIA documents are appropriately modified on the advice of legal counsel. Moreover, care should also be taken when using different editions of the DBIA Standard Form Documents on the same project to ensure consistency.
4.	Legal Consequences	DBIA Standard Form Contract Documents are legally binding contracts with important legal consequences. Contracting parties are advised and encouraged to seek legal counsel in completing or modifying these Documents.
5.	Reproduction	DBIA hereby grants to purchasers a limited license to reproduce its Documents consistent with the License Agreement accompanying these Documents. At least two original versions of the Agreement should be signed by the parties. Any other reproduction of DBIA Documents is strictly prohibited.
6.	Modifications	Effective contracting is accomplished when the parties give specific thought to their contracting goals and then tailor the contract to meet the unique needs of the project and the design-build team. For that reason, these Documents may require modification for various purposes including, for example, to comply with local codes and laws, or to add special terms. DBIA's latest revisions to its Documents provide the parties an opportunity to customize their contractual relationship by selecting various optional contract clauses that may better reflect the unique needs and risks associated with the project. At no time should a document be re-typed in its entirety. Re-creating the document violates copyright laws and destroys one of the advantages of standard forms – familiarity with the terms.
7.	Execution	It is good practice to execute two original copies of the Agreement. Only persons authorized to sign for the contracting parties may execute the Agreement.

© 2025 Design-Build Institute of America

Specific Instructions

Section	Title	Instruction
General	Purpose of This Agreement	DBIA Document No. 525 (“Agreement”) should be used only when the parties intend that Owner pay Design-Builder a lump sum fixed price for the completion of all design and construction services. There will be greater mutual understanding and cooperation if the lump sum is established based on Owner’s Project Criteria that are well defined. If there is uncertainty about Owner’s Project Criteria, or it remains to be developed by Owner and Design-Builder jointly, a cost-plus/guaranteed maximum price (“GMP”) contracting approach may be more suitable. In such case, the parties should use DBIA Document No. 530.
General	Purpose of These Instructions	These Instructions are not part of this Agreement, but are provided to aid the parties in their understanding of the Agreement and in completing the Agreement.
General	Related Documents	This Agreement shall be used in conjunction with the General Conditions of Contract. Other related Contract Documents are listed in Article 2 of this Agreement.
General	Date	On Page 1, enter the date when both parties reach a final understanding. It is possible, due to logistical reasons, that the dates when the parties execute the Agreement may be different. Once both parties execute the Agreement, the effective date of the Agreement will be the date recorded on Page 1. This date does not, however, determine Contract Time, which is measured according to the terms of Article 5.
General	Parties: Owner and Design-Builder	On Page 1 enter the legal name and full address of Owner and Design-Builder, as well as the legal form of each entity, e.g., corporation, partnership, limited partnership, limited liability company, or other.
2.1.2	Basis of Design Documents	The Basis of Design Documents are critical in establishing the scope of work. These documents include the Owner’s Project Criteria and may include Design-Builder’s Proposal, and the Deviation List, if any, contained in the Design-Builder’s Proposal. Prior to the execution of this Agreement, Design-Builder will have submitted its Proposal based on Owner’s Project Criteria. To avoid ambiguities or conflicts between Owner’s Project Criteria and Design-Builder’s Proposal, Design-Builder’s Proposal shall specifically list any deviations from Owner’s Project Criteria. Design-Builder’s Deviation List shall, if accepted by Owner, become a Contract Document and shall have precedence over Owner’s Project Criteria.
2.1.5	Construction Documents	After execution of the Agreement, and consistent with the requirements of Section 2.4 of the General Conditions of Contract, Design-Builder will prepare Construction Documents subject to Owner’s review and approval.
3.2	Order of Precedence	The Contract Documents are listed in Section 2.1 in the order of their precedence. This hierarchy of documents reflects DBIA’s belief that the Basis of Design Documents are critical documents that take precedence over other Contract Documents existing at the time the Agreement is executed. This section also makes clear that if a Deviation List exists it takes precedence over the Owner’s Project Criteria. Moreover, Section 2.1.3 recognizes that there may be other exhibits attached to this Agreement. If this is the case, the parties should discuss whether these exhibits should be part of the Basis of Design Documents. If these exhibits are not made part of the Basis of Design Documents, these exhibits will not take priority over the Basis of Design Documents in the event of a conflict.
3.3	Definitions	Terms, words and phrases used in the Agreement shall have the same meanings used in the General Conditions of Contract.

© 2025 Design-Build Institute of America

Section	Title	Instruction
3.4	Design Specification	The Owner is cautioned that if the Project Criteria include design specifications, there is case law holding that the Design-Builder is entitled to rely on such information, and to the extent such information is not accurate, the Design-Builder will be entitled to an adjustment in the Contract Price and/or Contract Time. Accordingly, to avoid such potential liability, the Owner should consider using performance specifications.
4.1	Work Product	This Agreement provides that the Design-Builder shall retain ownership of the Work Product it produces, but obligates Design-Builder to grant a limited license to Owner to use the Work Product according to the terms and circumstances described in Sections 4.2, 4.3, 4.4 and 4.5.
4.2	Owner's Limited License Upon Payment in Full	Design-Builder shall grant Owner, at Owner's sole risk, a limited license to use the Work Product at the completion of the Work in connection with Owner's occupation of the Project. This Section also provides the parties with the option of transferring ownership of some or all of the Work Product to the Owner upon payment in full for all Work performed. Generally, where the Owner desires ownership of Work Product, it is sufficient to transfer ownership of unique architectural and design elements.
4.3	Owner's Limited License Upon Owner's Termination for Convenience or Design-Builder's Election to Terminate	Owner should not use the Termination for Convenience Clause to obtain Design-Builder's valuable design concepts, and then seek bids from other design-builders. Therefore, where Owner terminates this Agreement for its convenience, and then decides to complete the Project with its own or third-party forces, Design-Builder shall grant Owner the rights set forth in Section 4.2, provided Owner pays Design-Builder all amounts due Design-Builder as required by the Contract Documents, including paying Design-Builder an additional sum per Section 4.3.2 for the use of the Work Product. In the event Design-Builder elects to terminate this Agreement for cause, for reasons set forth in Section 11.4 of the General Conditions of Contract, these same conditions apply to Owner's use of the Work Product.
4.3.2	Additional Compensation	To minimize disputes, the parties should negotiate prior to execution of the Agreement the amount Owner shall pay Design-Builder for the use of Design-Builder's Work Product in the event Owner terminates this Agreement for its convenience or Design-Builder elects to terminate this Agreement for cause. Enter this amount.
4.4	Owner's Limited License Upon Design-Builder's Default	If Design-Builder is properly terminated for default, Owner is granted a limited license to use the Work Product to complete the Project, and Owner shall thereafter have the same rights and obligations as set forth in Section 4.2.
4.5	Owner's Indemnification for Use of Work Product	Owner's use or alteration of the Work Product shall be at its sole risk, and Owner must agree to defend, indemnify and hold harmless Design-Builder and anyone working by or through Design-Builder, including Design Consultants of any tier.
5.1	Date of Commencement	Design-Builder's obligation to commence work is triggered by its receipt of a Notice to Proceed unless the parties mutually agree otherwise.
5.2.1	Substantial Completion of the Entire Work	Enter the calendar days duration by which Substantial Completion has to be achieved. The parties in this Section have the option of modifying the definition of Substantial Completion set forth in the General Conditions of Contract if they want to use a Temporary Certificate of Occupancy as the benchmark. If this option is selected, Substantial Completion will be deemed to be achieved no later than the date a Temporary Certificate of Occupancy is issued, if applicable to the Project.

© 2025 Design-Build Institute of America

Section	Title	Instruction
5.2.2	Interim Milestones	It may be that some portions of the Work must be completed in phases or within a prescribed period of time to accommodate Owner's needs. The parties may, at their option, identify these portions of the Work to be completed prior to Substantial Completion of the entire Work. Enter the number of calendar days, starting from the Date of Commencement, for achieving Substantial Completion of these identified portions of the Work. If these portions of the Work are required to be substantially completed by certain milestone dates, enter those dates. The form does not provide a remedy to the Owner if an interim milestone is not met. If the Owner has special requirements as it relates to interim milestones, the Owner may want to consider a remedy for the Design-Builder's failure to meet an interim milestone, as well as providing a bonus to the Design-Builder for satisfying such interim milestone.
5.4	Liquidated Damages	Owner should make a good faith evaluation of the amount that is reasonably necessary to compensate it for delay. Owner should not establish liquidated damages to penalize Design-Builder. Section 5.4 establishes a grace period between the Scheduled Substantial Completion Date and the assessment of liquidated damages in order to prevent disputes as to which party bears responsibility for only a few days of delay. The parties should enter the calendar days that may pass following the Scheduled Substantial Completion Date before liquidated damages will be assessed. The parties are also provided the option of establishing liquidated damages if the Design-Builder fails to achieve Final Completion within a specified number of days after Substantial Completion. If this option is selected, the parties must negotiate both the number of days and the liquidated damages amount. In negotiating liquidated damages, the parties should keep in mind that the amount of liquidated damages for failing to achieve Final Completion should be a considerably scaled down amount and should reflect the financial harm to the Owner. In no case should the total amount of liquidated damages for the Project exceed an amount that is reasonably necessary to compensate Owner for Project delay. The parties also have the option here of eliminating liquidated damages altogether, in which case the Owner can recover actual damages for Project delay at an amount that is capped by the parties. The Owner is cautioned that even if this option for actual damages is selected it still cannot recover consequential damages, as these are waived under Section 10.5.1 of the General Conditions of Contract.
5.5	Liquidated Damages Cap	The parties can agree to cap liquidated damages for delay at a negotiated amount.
5.6	Early Completion Bonus	If the Project economics justify liquidated damages, then it may also be appropriate to couple these liquidated damages with an early completion bonus. The parties should enter the number of calendar days prior to the Scheduled Substantial Completion Date that will set the Bonus Date. Also, enter the amount of the bonus to be paid per day that will allow Owner to share with Design-Builder the economic benefits of early completion. The parties also have the option in Section 5.6 of capping the early completion bonus at a negotiated amount.
5.7	Compensation for Force Majeure Events	The parties are provided the opportunity of providing the Design-Builder the right to receive compensation for Force Majeure Events. By selecting this option, the parties agree to modify Section 8.2.2 of the General Conditions of Contract, in which case the parties have to negotiate how many cumulative days of Force Majeure delays must occur before the Design-Builder is entitled to either a negotiated amount per day for delay or the direct costs it has incurred as a result of such delay.
6.1	Contract Price	Enter the lump sum price Owner will pay Design-Builder for the Scope of Work. The Contract Price should compensate Design-Builder for the services it provides and the risk it assumes in providing single point responsibility to Owner.

© 2025 Design-Build Institute of America

Section	Title	Instruction
6.2	Markups for Changes	Enter the markups agreed upon by Design-Builder and Owner to be used for pricing Changes to the Work. Prior to negotiating or agreeing to these markups, both parties should familiarize themselves with Article 9 of the General Conditions of Contract, Changes to the Contract Price and Time. For additive Change Orders, the parties have to negotiate the Fee the Design-Builder will receive. For deductive Change Orders, parties have the option by checking the appropriate box of whether there will be no additional reduction or whether there will be an additional reduction based on a negotiated percentage.
6.3.4	Allowance Value	This section recognizes that the parties may agree that certain items of Work should be treated as an Allowance Item and priced based on Allowance Values. The Allowance Value for which the Design-Builder will be entitled to receive compensation includes direct cost of labor, materials, equipment, transportation, taxes and insurance associated with the Allowance Item. All other costs associated with the Allowance Item, such as design fees, general conditions costs and fee, are deemed to be included in the Contract Price. However, the parties agree that in the event the actual cost of the Allowance Item is greater than or less than the Allowance Value by a negotiated percentage, then Design-Builder's right to Fee and markup shall be determined pursuant to Section 6.2.
6.4	Performance Incentives	There may be performance incentives that will influence Project success. Such incentives may include award fees tied to the Design-Builder achieving certain standards relative to client satisfaction, safety and personnel retention. The parties are encouraged to discuss the use of such incentives during negotiation of this Agreement. Any agreement on the use of incentives should be set forth in an exhibit attached to this Agreement.
7.1.1	Progress Payments	Enter the day of the month when Design-Builder shall submit its Application for Payment.
7.2.1	Retainage	Enter the percentage Owner will retain from Progress Payments to Design-Builder until fifty percent (50%) of the Work is completed. Owner should recognize that it creates undue hardship to hold retainage on Subcontractors that have completed their work early in the Project. Owner should accordingly consider releasing retainage on Subcontractors that complete work early in the Project, providing that these Subcontractors have satisfactorily performed their portion of the Work. The parties are provided the option of modifying the retainage provision by checking the box. This option excludes from retainage the Design-Builder's general conditions costs and amounts paid to Design-Builder's Design Consultant. The rationale for selecting this option is that the Design-Builder is obligated to pay its general conditions costs in full each month and that under the design-bid-build delivery method, the Owner typically does not retain sums from its designer.
7.4	Interest	The parties should enter the rate at which interest will accrue on Design-Builder's payments if unpaid five (5) days after due. Late payment creates a hardship for Design-Builder, its Design Consultants and Subcontractors.
7.5	Record Keeping	The Owner is provided access to Design-Builder's accounting information as it relates to changes to the Work. However, if the parties have agreed to multipliers or markups for changes, the time to challenge and negotiate those percentages is at the time the parties execute the Agreement and not during the Project or after it has been completed. Accordingly, the Owner can at any time audit these percentages only to confirm that such percentage has been properly charged and not to challenge the composition of such percentage.

© 2025 Design-Build Institute of America

Section	Title	Instruction
8.1	Termination for Convenience: Overhead and Profit	The parties should choose prior to execution of the Agreement the method that will be used to determine overhead and profit paid to Design-Builder in the event Owner terminates Design-Builder for its convenience. The parties may choose to set percentage rates for overhead and profit prior to execution of the Agreement, or may choose to determine reasonable sums to be paid for overhead and profit at the time of the termination. If the parties choose to set overhead and profit rates prior to execution of the Agreement, the percentages should be entered in Section 8.1.
8.2	Termination for Convenience: Additional Payments	Although it is important for Owner to have a process for terminating this Agreement for convenience, the process must consider the interests of Design-Builder. If Owner terminates this Agreement for its own convenience, compensating Design-Builder for its costs will not be adequate because Design-Builder will have committed its resources for a small amount of revenue. Therefore, in addition to the overhead and profit paid in Section 8.1, Owner shall pay Design-Builder an additional sum, calculated as a percentage of the remaining balance of the Contract Price. Enter the percentages Owner shall pay Design-Builder if Owner terminates this Agreement for its own convenience prior to or after the start of construction.
8.3	Termination for Convenience: Owner's Use of Work Product	Owner should not use the Termination for Convenience clause to obtain Design-Builder's valuable design concepts and then seek lower bids from another design-builder. If Owner terminates this Agreement for its own convenience, and chooses to proceed with the Project using Design-Builder's Work Product, Owner should pay an additional sum for the use of Design-Builder's Work Product pursuant to Section 4.3.
Article 9	Representatives of the Parties	Enter the name, title, address and telephone number of Owner's Senior Representative and Owner's Representative at Sections 9.1.1 and 9.1.2, respectively. Enter the name, title, address and telephone number of Design-Builder's Senior Representative and Design-Builder's Representative at Sections 9.2.1 and 9.2.2, respectively. The parties can elect to establish Representatives during the performance of the Project rather than at the time of execution of this Agreement. If Representatives are identified after execution of the Agreement, an appropriate amendment should be made to the Agreement at the time these individuals are designated.
10.1	Insurance	Attach an Insurance Exhibit setting forth in detail the insurance coverages required for the Project. Parties are advised to familiarize themselves with the terms of Article 5 of the General Conditions of Contract, Insurance and Bonds, and to consult their insurance advisor.
10.2	Bonds	Enter the type and amount of bonds or other performance security required for the Project. Where bonding is not required by statute, Owner may want to evaluate the project risks versus the bonding costs in deciding what type of performance security to require.
11.1	Other Provisions	Insert any other provisions. For example, the parties may elect to have disputes resolved through litigation rather than arbitration in which case the optional language in this Section should be included.

Standard Form of Agreement Between Owner and Design-Builder - Lump Sum

This document has important legal consequences. Consultation with an attorney is recommended with respect to its completion or modification.

This **AGREEMENT** is made as of the _____ day of _____ in the year of 20_____, by and between the following parties, for services in connection with the Project identified below.

OWNER:
(Name and address)

DESIGN-BUILDER:
(Name and address)

PROJECT:
(Include Project name and location as it will appear in the Contract Documents)

In consideration of the mutual covenants and obligations contained herein, Owner and Design-Builder agree as set forth herein.

© 2025 Design-Build Institute of America

Article 1

Scope of Work

1.1 Design-Builder shall perform all design and construction services, and provide all material, equipment, tools and labor, necessary to complete the Work described in and reasonably inferable from the Contract Documents.

Article 2

Contract Documents

2.1 The Contract Documents are comprised of the following:

2.1.1 All written modifications, amendments, minor changes and Change Orders to this Agreement issued in accordance with DBIA Document No. 535, *Standard Form of General Conditions of Contract Between Owner and Design-Builder* (2022 Edition) ("General Conditions of Contract");

2.1.2 The Basis of Design Documents, including the Owner's Project Criteria, Design-Builder's Proposal and the Deviation List, if any, contained in the Design-Builder's Proposal, which shall specifically identify any and all deviations from Owner's Project Criteria;

2.1.3 This Agreement, including all exhibits and attachments, executed by Owner and Design-Builder (List for example, performance standard requirements, performance incentive requirements, markup exhibits, allowances, or unit prices);

2.1.4 The General Conditions of Contract; and

2.1.5 Construction Documents prepared and approved in accordance with Section 2.4 of the General Conditions of Contract.

Article 3

Interpretation and Intent

3.1 Design-Builder and Owner, prior to execution of the Agreement, shall carefully review all the Contract Documents, including the various documents comprising the Basis of Design Documents, for any conflicts or ambiguities. Design-Builder and Owner will discuss and resolve any identified conflicts or ambiguities prior to execution of the Agreement.

3.2 The Contract Documents are intended to permit the parties to complete the Work and all obligations required by the Contract Documents within the Contract Time(s) for the Contract Price. The Contract Documents are intended to be complementary and interpreted in harmony so as to avoid conflict, with words and phrases interpreted in a manner consistent with construction and design industry standards. In the event inconsistencies, conflicts, or ambiguities between or among the Contract Documents are discovered after execution of the Agreement, Design-Builder and Owner shall attempt to resolve any ambiguity, conflict or inconsistency informally, recognizing that the Contract Documents shall take precedence in the order in which they are listed in Section 2.1 hereof. Conflicts existing within Section 2.1.2 shall be resolved by giving precedence first to the Deviation List, if any, then the Owner's Project Criteria, and then the Design-Builder's Proposal.

© 2025 Design-Build Institute of America

3.3 Terms, words and phrases used in the Contract Documents, including this Agreement, shall have the meanings given them in the General Conditions of Contract.

3.4 If Owner's Project Criteria contain design specifications: (a) Design-Builder shall be entitled to reasonably rely on the accuracy of the information represented in such design specifications and their compatibility with other information set forth in Owner's Project Criteria, including any performance specifications; and (b) Design-Builder shall be entitled to an adjustment in the Contract Price and/or Contract Time(s) to the extent Design-Builder's cost and/or time of performance have been adversely impacted by such inaccurate design specification.

3.5 The Contract Documents form the entire agreement between Owner and Design-Builder and by incorporation herein are as fully binding on the parties as if repeated herein. No oral representations or other agreements have been made by the parties except as specifically stated in the Contract Documents.

Article 4

Ownership of Work Product

4.1 Work Product. All drawings, specifications and other documents and electronic data, including such documents identified in the General Conditions of Contract, furnished by Design-Builder to Owner under this Agreement ("Work Product") are deemed to be instruments of service and Design-Builder shall retain the ownership and property interests therein, including but not limited to any intellectual property rights, copyrights and/or patents, subject to the provisions set forth in Sections 4.2 through 4.5 below.

4.2 Owner's Limited License Upon Project Completion and Payment in Full to Design-Builder. Upon Owner's payment in full for all Work performed under the Contract Documents, Design-Builder shall grant Owner a limited license to use the Work Product in connection with Owner's occupancy of the Project, conditioned on Owner's express understanding that its alteration of the Work Product without the involvement of Design-Builder is at Owner's sole risk and without liability or legal exposure to Design-Builder or anyone working by or through Design-Builder, including Design Consultants of any tier (collectively the "Indemnified Parties"), and on the Owner's obligation to provide the indemnity set forth in Section 4.5 below.

[At the parties' option, the following may be used in lieu of Section 4.2.]

☐ Upon Owner's payment in full for all Work performed under the Contract Documents, Design-Builder: (a) grants Owner a limited license to use the Work Product in connection with Owner's occupancy of the Project; and (b) transfers all ownership and property interests, including but not limited to any intellectual property rights, copyrights and/or patents, in that portion of the Work Product that consists of architectural, engineering and other design elements and specifications that are unique to the Project. The parties shall specifically designate those portions of the Work Product for which ownership in the Work Product shall be transferred. Such grant and transfer are conditioned on Owner's express understanding that its alteration of the Work Product without the involvement of Design-Builder is at Owner's sole risk and without liability or legal exposure to Design-Builder or anyone working by or through Design-Builder, including Design Consultants of any tier (collectively the "Indemnified Parties"), and on the Owner's obligation to provide the indemnity set forth in Section 4.5 below.

4.3 Owner's Limited License upon Owner's Termination for Convenience or Design-Builder's Election to Terminate. If Owner terminates this Agreement for its convenience as set forth in Article 8 hereof, or if Design-Builder elects to terminate this Agreement in accordance with Section 11.4 of the General Conditions of Contract, Design-Builder shall, upon Owner's payment in full of the amounts due Design-Builder under the Contract Documents, grant Owner a limited license to use the Work Product to

© 2025 Design-Build Institute of America

complete the Project and subsequently occupy the Project, and Owner shall thereafter have the same rights as set forth in Section 4.2 above, conditioned on the following:

4.3.1 Use of the Work Product is at Owner's sole risk without liability or legal exposure to any Indemnified Party and on the Owner's obligation to provide the indemnity set forth in Section 4.5 below; and

4.3.2 Owner agrees to pay Design-Builder the additional sum of _____ Dollars ($ _____) as compensation for the right to use the Work Product to complete the Project and subsequently use the work Product in accordance with Section 4.2 if Owner resumes the Project through its employees, agents, or third parties.

4.4 Owner's Limited License upon Design-Builder's Default. If this Agreement is terminated due to Design-Builder's default pursuant to Section 11.2 of the General Conditions of Contract, then Design-Builder grants Owner a limited license to use the Work Product to complete the Project and subsequently occupy the Project, and Owner shall thereafter have the same rights and obligations as set forth in Section 4.2 above. Notwithstanding the preceding sentence, if it is ultimately determined that Design-Builder was not in default, Owner shall be deemed to have terminated the Agreement for convenience, and Design-Builder shall be entitled to the rights and remedies set forth in Section 4.3 above.

4.5 Owner's Indemnification for Use of Work Product. If Owner is required to indemnify any Indemnified Parties based on the use or alteration of the Work Product under any of the circumstances identified in this Article 4, Owner shall defend, indemnify and hold harmless such Indemnified Parties from and against any and all claims, damages, liabilities, losses and expenses, including attorneys' fees, arising out of or resulting from the use or alteration of the Work Product.

Article 5

Contract Time

5.1 Date of Commencement. The Work shall commence within five (5) days of Design-Builder's receipt of Owner's Notice to Proceed ("Date of Commencement") unless the parties mutually agree otherwise in writing.

5.2 Substantial Completion and Final Completion.

5.2.1 Substantial Completion of the entire Work shall be achieved no later than _____ (_____) calendar days after the Date of Commencement ("Scheduled Substantial Completion Date").

[At the parties' option, the following supplemental language may be inserted at the end of Section 5.2.1 if the Project is subject to a Temporary Certificate of Occupancy.]

The parties agree that the definition for Substantial Completion set forth in Section 1.2.19 of the General Conditions of Contract is hereby modified to read as follows:

"*Substantial Completion* is the date on which the Work, or an agreed upon portion of the Work, is sufficiently complete in accordance with the Contract Documents so that Owner can occupy and use the Project or a portion thereof for its intended purposes, provided, however, that Substantial Completion shall be deemed to have been achieved no later than the date of issuance of a Temporary Certificate of Occupancy issued by the local building official."

© 2025 Design-Build Institute of America

5.2.2 Interim milestones and/or Substantial Completion of identified portions of the Work ("Scheduled Interim Milestone Dates") shall be achieved as follows: *(Insert any interim milestones for portions of the Work with different scheduled dates for Substantial Completion.)*

5.2.3 Final Completion of the Work or identified portions of the Work shall be achieved as expeditiously as reasonably practicable. Final Completion is the date when all Work is complete pursuant to the definition of Final Completion set forth in Section 1.2.8 of the General Conditions of Contract.

5.2.4 All of the dates set forth in this Article 5 (collectively the "Contract Time(s)") shall be subject to adjustment in accordance with the General Conditions of Contract.

5.3 Time is of the Essence. Owner and Design-Builder mutually agree that time is of the essence with respect to the dates and times set forth in the Contract Documents.

5.4 Liquidated Damages. Design-Builder understands that if Substantial Completion is not attained by the Scheduled Substantial Completion Date, Owner will suffer damages which are difficult to determine and accurately specify. Design-Builder agrees that if Substantial Completion is not attained by _____ (_____) days after the Scheduled Substantial Completion Date (the "LD Date"), Design-Builder shall pay Owner _____ Dollars ($ _____) as liquidated damages for each day that Substantial Completion extends beyond the LD Date.

[The parties may want to consider the following supplemental language within Section 5.4 if they want to assess liquidated damages for failing to meet Final Completion. In this case, the first sentence in Section 5.2.3 should be deleted and the language below should be checked and completed.]

☐ Design-Builder understands that if Final Completion is not achieved within _____ days of the Substantial Completion Date, Owner will suffer damages which are difficult to determine and accurately specify. Design-Builder agrees that if Final Completion is not achieved within _____ _____days of Substantial Completion, Design-Builder shall pay to Owner _____ Dollars ($_____), as liquidated damages for each calendar day that Final Completion is delayed beyond the above-referenced number of days.

[In lieu of the liquidated damages specified in Section 5.4 or the alternate provided herein, the Parties may decide that the Agreement will provide for actual damages in the event of Project delay, with Owner being cautioned that there is a waiver of consequential damages under Section 10.5.1 of the General Conditions of Contract. In this case, delete Sections 5.4 and 5.5 and insert the following.]

☐ **5.4** Design-Builder and Owner have agreed not to provide for liquidated damages in this Agreement for failure of Design-Builder to achieve the Contract Time(s) set forth in this Article 5. Design-Builder understands, however, that Owner may suffer actual damages in the event the Contract Time(s) set forth herein are not timely achieved. Owner shall be able to recover such actual damages from Design-Builder to the extent it can demonstrate that actual damages have been incurred, are directly related and caused by Design-Builder's failure to meet the Contract Time(s) set forth herein, and are not waived by Section 10.5.1 of the General Conditions of Contract. Notwithstanding the foregoing, in no event shall Design-Builder's liability for actual damages for delays exceed _____Dollars ($_____).

5.5 Any liquidated damages assessed pursuant to this Agreement shall be in lieu of all liability for any and all extra costs, losses, expenses, claims, penalties and any other damages, whether special or consequential, and of whatsoever nature incurred by Owner which are occasioned by any delay in achieving the Contract Time(s).

© 2025 Design-Build Institute of America

[The Parties may also desire to cap the liquidated damages payable under this Agreement, in which case the following language should be included at the end of Section 5.5.]

☐ Owner and Design-Builder agree that the maximum aggregate liability Design-Builder has for any liquidated damages that may be assessed under this Agreement for failure to achieve the Contract Time(s) shall be _____ Dollars ($_____).

5.6 Early Completion Bonus. If Substantial Completion is attained on or before _____ (_____) days before the Scheduled Substantial Completion Date (the "Bonus Date"), Owner shall pay Design-Builder at the time of Final Payment under Section 7.3 hereof an early completion bonus of _____Dollars ($ _____) for each day that Substantial Completion is attained earlier than the Bonus Date. *(If an early completion bonus is applicable to any dates set forth in Section 5.2.2 or 5.2.3 hereof, this Section 5.6 will need to be modified accordingly.)*

[The Parties may also desire to cap the early completion bonus payable under Section 5.6, in which case the following language should be included.]

☐ Owner and Design-Builder agree that the maximum aggregate amount that Design-Builder shall receive as the early Completion Bonus is _____ Dollars ($_____).

5.7 ***[The Parties may also desire to modify Section 8.2.2 of the General Conditions of Contract relative to compensability of delays that would cause the Contract Time(s) to be extended. In such case, the following option can be used.]***

☐ In addition to Design-Builder's right to a time extension for those events set forth in Section 8.2.1 of the General Conditions of Contract, Design-Builder shall also be entitled to an appropriate adjustment of the Contract Price for those events set forth in Section 8.2.1 of the General Conditions of Contract, provided, however, for Force Majeure Events, Design-Builder shall only be entitled to an increase in the Contract Price if said events exceed _____ cumulative days. Said additional compensation shall be limited to:

[Check one box only.]

☐ $ _____ dollars a day for each day work is delayed beyond the Scheduled Substantial Completion Date.

or

☐ the direct costs and expenses Design-Builder can demonstrate it has reasonably and actually incurred as a result of such event.

5.8 Owner's Review Time. The parties have established the following maximum and minimum amount of time for the Owner to review Design Submissions and the Project Schedule or any updates thereto unless the parties agree in writing otherwise.

5.8.1 The Owner shall have a minimum of _____ days of receipt by the Owner to review all Design Submissions, the Project Schedule, and any updates thereto.

5.8.2 The Owner shall review and (if applicable) provide a response to Design-Builder on all Design Submissions, the Project Schedule, and any updates thereto within ____ days of receipt by the Owner.

© 2025 Design-Build Institute of America

Article 6

Contract Price

6.1 Contract Price. Owner shall pay Design-Builder in accordance with Article 6 of the General Conditions of Contract the sum of _____ Dollars ($ _____) ("Contract Price"), subject to adjustments made in accordance with the General Conditions of Contract. Unless otherwise provided in the Contract Documents, the Contract Price is deemed to include all sales, use, consumer and other taxes mandated by applicable Legal Requirements.

6.2 Markups for Changes. If the Contract Price requires an adjustment due to changes in the Work, and the cost of such changes is determined under Section 9.4.1 of the General Conditions of Contract, the following markups shall be allowed on such changes:

6.2.1 For additive Change Orders, including additive Change Orders arising from both additive and deductive items, it is agreed that Design-Builder shall receive a Fee of _____ _____percent (_____%) of the additional costs incurred for that Change Order, plus any other markups set forth at Exhibit _____ hereto.

6.2.2 For deductive Change Orders, including deductive Change Orders arising from both additive and deductive items, the deductive amounts shall include:

[Check one box only.]

☐ No additional reduction to account for Design-Builder's Fee or any other markup.

or

☐ An amount equal to the sum of: (a) _____ percent (_____%) applied to the direct costs of the net reduction (which amount will account for a reduction associated with Design-Builder's Fee); plus (b) any other markups set forth at Exhibit _____ hereto applied to the direct costs of the net reduction.

6.3 Allowance Items and Allowance Values.

6.3.1 Any and all Allowance Items, as well as their corresponding Allowance Values, are set forth in an Exhibit hereto.

6.3.2 Design-Builder and Owner have worked together to review the Allowance Items and Allowance Values based on design information then available to determine that the Allowance Values constitute reasonable estimates for the Allowance Items. Design-Builder and Owner will continue working closely together during the preparation of the design to develop Construction Documents consistent with the Allowance Values. Nothing herein is intended in any way to constitute a guarantee by Design-Builder that the Allowance Item in question can be performed for the Allowance Value.

6.3.3 No work shall be performed on any Allowance Item without Design-Builder first obtaining in writing advanced authorization to proceed from Owner. Owner agrees that if Design-Builder is not provided written authorization to proceed on an Allowance Item by the date set forth in the Project schedule, due to no fault of Design-Builder, Design-Builder may be entitled to an adjustment of the Contract Time(s) and Contract Price.

6.3.4 The Allowance Value for an Allowance Item includes the direct cost of labor, materials, equipment, transportation, taxes and insurance associated with the applicable Allowance Item. All other costs, including design fees, Design-Builder's overall project management and general

© 2025 Design-Build Institute of America

conditions costs, overhead and fee, are deemed to be included in the original Contract Price, and are not subject to adjustment, regardless of the actual amount of the Allowance Item.

[In the alternative, the parties may want to delete Section 6.3.4 and add the following provision.]

☐ In the event the actual direct cost of labor, materials, equipment, transportation, taxes and insurance associated with an Allowance Item is _____percent (_____ %) greater than or less than the Allowance Value for such Allowance Item, Design-Builder and Owner agree that Design-Builder's right to Fee and markup shall be adjusted in accordance with Section 6.2.

6.3.5 Whenever the actual costs for an Allowance Item is more than or less than the stated Allowance Value, the Contract Price shall be adjusted accordingly by Change Order, subject to Section 6.3.4. The amount of the Change Order shall reflect the difference between actual costs incurred by Design-Builder for the particular Allowance Item and the Allowance Value.

6.4 Performance Incentives.

6.4.1 Owner and Design-Builder have agreed to the performance incentive arrangements set forth in Exhibit _____.

(The parties are encouraged to discuss and agree upon performance incentives that will influence project success. These incentives may consist of Award Fees, incentives for safety, personnel retention, client satisfaction and similar items.)

Article 7

Procedure for Payment

7.1 Progress Payments.

7.1.1 Design-Builder shall submit to Owner on the _____ (_____) day of each month, beginning with the first month after the Date of Commencement, Design-Builder's Application for Payment in accordance with Article 6 of the General Conditions of Contract.

7.1.2 Owner shall make payment within ten (10) days after Owner's receipt of each properly submitted and accurate Application for Payment in accordance with Article 6 of the General Conditions of Contract, but in each case less the total of payments previously made, and less amounts properly withheld under Section 6.3 of the General Conditions of Contract.

7.2 Retainage on Progress Payments.

7.2.1 Owner will retain _____ percent (_____%) of each Application for Payment provided, however, that when fifty percent (50%) of the Work has been satisfactorily completed by Design-Builder and Design-Builder is otherwise in compliance with its contractual obligations, Owner will not retain any additional retention amounts from Design-Builder's subsequent Applications for Payment. Owner will also reasonably consider reducing retainage for Work completed early in the Project.

[Design-Builder and Owner may want to consider substituting the following retainage provision.]

☐ Owner will retain _____ percent (_____%) from Design-Builder's Applications for Payment, exclusive of general conditions costs, and any amounts paid to Design-Builder's Design Consultant, from each Application for Payment provided, however, that

© 2025 Design-Build Institute of America

when fifty percent (50%) of the Work has been satisfactorily completed by Design-Builder and Design-Builder is otherwise in compliance with its contractual obligations, Owner will not retain any additional amounts from Design-Builder's subsequent Applications for Payment. Owner will also reasonably consider reducing retainage for Work completed early in the Project.

[For public projects, Design-Builder and Owner may want to consider substituting the following retainage provision.]

☐ Owner will retain _____ percent (_____%) from Design-Builder's Applications for Payment pursuant to applicable state law.

[Design-Builder and Owner may want to consider substituting the following retainage provision.]

☐ Because Owner has obtained a performance bond and payment bond pursuant to Article 10 below, Owner will not retain retainage from Design-Builder on this Project.

7.2.2 Within fifteen (15) days after Substantial Completion of the entire Work or, if applicable, any portion of the Work, pursuant to Section 6.6 of the General Conditions of Contract, Owner shall release to Design-Builder all retained amounts relating, as applicable, to the entire Work or completed portion of the Work, less an amount equal to (a) the reasonable value of all remaining or incomplete items of Work as noted in the Certificate of Substantial Completion and (b) all other amounts Owner is entitled to withhold pursuant to Section 6.3 of the General Conditions of Contract.

7.3 Final Payment. Design-Builder shall submit its Final Application for Payment to Owner in accordance with Section 6.7 of the General Conditions of Contract. Owner shall make payment on Design-Builder's properly submitted and accurate Final Application for Payment within thirty (30) days after Owner's receipt of the Final Application for Payment, provided that Design-Builder has satisfied the requirements for final payment set forth in Section 6.7.2 of the General Conditions of Contract.

7.4 Interest. Payments due and unpaid by Owner to Design-Builder, whether progress payments or final payment, shall bear interest commencing five (5) days after payment is due at the rate of _____ _____ percent (_____%) per month until paid.

7.5 Record Keeping and Finance Controls. With respect to changes in the Work performed on a cost basis by Design-Builder pursuant to the Contract Documents, Design-Builder shall keep full and detailed accounts and exercise such controls as may be necessary for proper financial management, using accounting and control systems in accordance with generally accepted accounting principles and as may be provided in the Contract Documents. During the performance of the Work and for a period of three (3) years after Final Payment, Owner and Owner's accountants shall be afforded access to, and the right to audit from time-to-time, upon reasonable notice, Design-Builder's records, books, correspondence, receipts, subcontracts, purchase orders, vouchers, memoranda and other data relating to changes in the Work performed on a cost basis in accordance with the Contract Documents, all of which Design-Builder shall preserve for a period of three (3) years after Final Payment. Such inspection shall take place at Design-Builder's offices during normal business hours unless another location and time is agreed to by the parties. Any multipliers or markups agreed to by the Owner and Design-Builder as part of this Agreement are only subject to audit to confirm that such multiplier or markup has been charged in accordance with this Agreement, with the composition of such multiplier or markup not being subject to audit.

© 2025 Design-Build Institute of America

Article 8

Termination for Convenience

8.1 If Design-Builder is terminated for convenience pursuant to Section 11.6 of the General Conditions of Contract, and the parties have agreed to a payment to Design-Builder in the case of such termination for convenience, Owner shall pay Design-Builder for the following in addition to the amount set forth in Section 11.6.1 of the General Conditions of Contract:

[Choose one of the following.]

☐ The fair and reasonable sums for overhead and profit on the sum of items set forth in Section 11.6.1 of the General Conditions of Contract.

or

☐ Overhead and profit in the amount of _____percent (_____%) on the sum of items set forth in Section 11.6.1 of the General Conditions of Contract.

8.2 In addition to the amounts set forth in Section 8.1 above and Section 11.6.1 of the General Conditions of Contract, Design-Builder shall be entitled to receive one of the following if the parties agree to an additional payment:

8.2.1 If Owner terminates this Agreement prior to commencement of construction, Design-Builder shall be paid _____ percent (_____%) of the remaining balance of the Contract Price.

8.2.2 If Owner terminates this Agreement after commencement of construction, Design-Builder shall be paid _____ percent (_____%) of the remaining balance of the Contract Price.

8.3 The total amount to be paid to Design-Builder, exclusive of costs described in Section 11.6.1.2 of the General Conditions of Contract, shall not exceed the Contract Price.

[The following Article 9 should be used only if the Owner and Design-Builder agree to establish their respective representatives at the time the Agreement is executed rather than during the performance of the Project.]

Article 9

Representatives of the Parties

9.1 Owner's Representatives.

9.1.1 Owner designates the individual listed below as its Senior Representative ("Owner's Senior Representative"), which individual has the authority and responsibility for avoiding and resolving disputes under Section 10.2.3 of the General Conditions of Contract: *(Identify individual's name, title, address and telephone numbers.)*

© 2025 Design-Build Institute of America

9.1.2 Owner designates the individual listed below as its Owner's Representative, which individual has the authority and responsibility set forth in Section 3.4 of the General Conditions of Contract: *(Identify individual's name, title, address and telephone numbers.)*

9.2 Design-Builder's Representatives.

9.2.1 Design-Builder designates the individual listed below as its Senior Representative ("Design-Builder's Senior Representative"), which individual has the authority and responsibility for avoiding and resolving disputes under Section 10.2.3 of the General Conditions of Contract: *(Identify individual's name, title, address and telephone numbers.)*

9.2.2 Design-Builder designates the individual listed below as its Design-Builder's Representative, which individual has the authority and responsibility set forth in Section 2.1.1 of the General Conditions of Contract: *(Identify individual's name, title, address and telephone numbers.)*

Article 10

Bonds and Insurance

10.1 Insurance. Design-Builder and Owner shall procure the insurance coverages set forth in the Insurance Exhibit attached hereto and in accordance with Article 5 of the General Conditions of Contract.

10.2 Bonds and Other Performance Security. Design-Builder shall provide the following performance bond and labor and material payment bond or other performance security:

Performance Bond.

[Check one box only. If no box is checked, then no bond is required.]

☐ Required ☐ Not Required

Payment Bond.

[Check one box only. If no box is checked, then no bond is required.]

☐ Required ☐ Not Required

Other Performance Security.

[Check one box only. If no box is checked, then no other performance security is required. If the "Required" box is checked, identify below the specific performance security that is being required and all salient commercial terms associated with that security.]

☐ Required ☐ Not Required

Article 11

Other Provisions

11.1 Other provisions, if any, are as follows: *(Insert any additional provisions.)*

[In lieu of Sections 10.3.1 through 10.3.3 of the General Conditions of Contract, the parties may want to delete such sections and include the following alternative dispute resolution clause. The title of Section 10.3 of the General Conditions should also be revised to remove the reference to arbitration.]

[11.___]☐ Any claims, disputes, or controversies between the parties arising out of or related to the Agreement, or the breach thereof, which have not been resolved in accordance with the procedures set forth in Section 10.2 of the General Conditions of Contract shall be resolved in a court of competent jurisdiction in the state in which the Project is located.

[Section 2.9.1 of the General Conditions of Contract contains an option for the parties to establish a limited time frame for the Design-Builder's warranty. If the parties agree to such a limited time frame, the parties may insert it below. Insert a section number below and copy that reference number into the blank space provided in Section 2.9.1 of the General Conditions.]

[11.__]☐ The parties have agreed to limit the time frame that the Owner can make a claim pursuant to Section 2.9.1 of the General Conditions of Contract. Owner must make all claims pursuant to Section 2.9.1 of the General Conditions of Contract within _____ years of the date of Substantial Completion of the Project.

Design-Build Institute of America - Contract Documents

LICENSE AGREEMENT

By using the DBIA Contract Documents, you agree to and are bound by the terms of this License Agreement.

1. **License.** The Design-Build Institute of America ("DBIA") provides DBIA Contract Documents and licenses their use worldwide. You acknowledge that DBIA Contract Documents are protected by the copyright laws of the United States. You have a limited nonexclusive license to: (a) Use DBIA Contract Documents on any number of machines owned, leased or rented by your company or organization; (b) Use DBIA Contract Documents in printed form for bona fide contract purposes; and (c) Copy DBIA Contract Documents into any machine-readable or printed form for backup or modification purposes in support of your permitted use.
2. **User Responsibility.** You assume sole responsibility for the selection of specific documents or portions thereof to achieve your intended results, and for the installation, use, and results obtained from the DBIA Contract Documents. You acknowledge that you understand that the text of the DBIA Contract Documents has important legal consequences and that consultation with an attorney is recommended with respect to use or modification of the text. You will not represent that any of the contract documents you generate from DBIA Contract Documents are DBIA documents unless (a) the document text is used without alteration or (b) all additions and changes to, and deletions from, the text are clearly shown.
3. **Copies.** You may not use, copy, modify, or transfer DBIA Contract Documents, or any copy, modification or merged portion, in whole or in part, except as expressly provided for in this license. Reproduction of DBIA Contract Documents in printed or machine-readable format for resale or educational purposes is expressly prohibited. You will reproduce and include DBIA's copyright notice on any printed or machine-readable copy, modification, or portion merged into another document or program.
4. **Transfers.** You may not transfer possession of any copy, modification or merged portion of DBIA Contract Documents to another party, except that a party with whom you are contracting may receive and use such transferred material solely for purposes of its contract with you. You may not sublicense, assign, or transfer this license except as expressly provided in this Agreement, and any attempt to do so is void.
5. **Term.** The license is effective for one year from the date of purchase. DBIA may elect to terminate it earlier, by written notice to you, if you fail to comply with any term or condition of this Agreement.
6. **Limited Warranty.** DBIA warrants the electronic files or other media by which DBIA Contract Documents are furnished to be free from defects in materials and workmanship under normal use during the Term. There is no other warranty of any kind, expressed or implied, including, but not limited to the implied warranties of merchantability and fitness for a particular purpose. Some states do not allow the exclusion of implied warranties, so the above exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state. DBIA does not warrant that the DBIA Contract Documents will meet your requirements or that the operation of DBIA Contract Documents will be uninterrupted or error free.
7. **Limitations of Remedies.** DBIA's entire liability and your exclusive remedy shall be: the replacement of any document not meeting DBIA's "Limited Warranty" which is returned to DBIA with a copy of your receipt, or at DBIA's election, your money will be refunded. In no event will DBIA be liable to you for any damages, including any lost profits, lost savings or other incidental or consequential damages arising out of the use or inability to use DBIA Contract Documents even if DBIA has been advised of the possibility of such damages, or for any claim by any other party. Some states do not allow the limitation or exclusion of liability for incidental or consequential damages, so the above limitation or exclusion may not apply to you.
8. **Acknowledgment.** You acknowledge that you have read this agreement, understand it and agree to be bound by its terms and conditions and that it will be governed by the laws of the District of Columbia. You further agree that it is the complete and exclusive statement of your agreement with DBIA which supersedes any proposal or prior agreement, oral or written, and any other communications between the parties relating to the subject matter of this agreement.

INSTRUCTIONS

For DBIA Document No. 535 Standard Form of General Conditions of Contract Between Owner and Design-Builder (2022 Edition)

General Instructions

No.	Subject	Instruction
1.	Standard Forms	Standard form contracts have long served an important function in the United States and international construction markets. The common purpose of these forms is to provide an economical and convenient way for parties to contract for design and construction services. As standard forms gain acceptance and are used with increased frequency, parties are able to enter into contracts with greater certainty as to their rights and responsibilities.
2.	DBIA Standard Form Contract Documents	Since its formation in 1993, the Design-Build Institute of America (DBIA) has regularly evaluated the needs of Owners, Design-Builders, and other parties to the design-build process in preparation for developing its own contract forms. Consistent with DBIA's mission of promulgating best design-build practices, DBIA believes that the design-build contract should reflect a balanced approach to risk that considers the legitimate interests of all parties to the design-build process. DBIA's Standard Form Contract Documents reflect a modern risk allocation approach, allocating each risk to the party best equipped to manage and minimize that risk, with the goal of promoting best design-build practices.
3.	Use of Non-DBIA Documents	To avoid inconsistencies among documents used for the same project, DBIA's Standard Form Contract Documents should not be used in conjunction with non-DBIA documents unless the non-DBIA documents are appropriately modified on the advice of legal counsel. Moreover, care should also be taken when using different editions of the DBIA Standard Form Document on the same project to ensure consistency.
4.	Legal Consequences	DBIA Standard Form Contract Documents are legally binding contracts with important legal consequences. Contracting parties are advised and encouraged to seek legal counsel in completing or modifying these Documents.
5.	Reproduction	DBIA hereby grants to purchasers a limited license to reproduce its Documents consistent with the License Agreement accompanying these Documents. At least two original versions of the Agreement should be signed by the parties. Any other reproduction of DBIA Documents is strictly prohibited.
6.	Modifications	Effective contracting is accomplished when the parties give specific thought to their contracting goals and then tailor the contract to meet the unique needs of the project and the design-build team. For that reason, these Documents may require modification for various purposes including, for example, to comply with local codes and laws, or to add special terms. DBIA's latest revisions to its Documents provide the parties an opportunity to customize their contractual relationship by selecting various optional contract clauses that may better reflect the unique needs and risks associated with the project. Any modifications to these Documents should be initialed by the parties. At no time should a document be re-typed in its entirety. Re-creating the document violates copyright laws and destroys one of the advantages of standard forms – familiarity with the terms.
7.	Execution	It is good practice to execute two original copies of the Agreement. Only persons authorized to sign for the contracting parties may execute the Agreement.

Specific Instructions

Section	Title	Instruction
General	Purpose of This Document	The General Conditions of Contract provide the terms and conditions under which the Work of the Project will be performed. This document accompanies DBIA Document No. 525 and DBIA Document No. 530 (each referred to herein generally as "Agreement"). It may also be incorporated by reference into other related agreements, as between Design-Builder and Design Consultant, and Design-Builder and Subcontractor.
General	Checklist	The following Sections reference documents that are to be attached to the Agreement: • Section 3.5.1 – Owner's Permit List • Article 5 – Insurance and Bonds
2.1.3	Schedule	The parties are encouraged, if possible, to agree to a schedule for the execution of the Work upon execution of the Agreement or upon establishing the GMP.
2.2.1	Design Professional Services	The parties should be aware that in addition to requiring compliance with state licensing laws for design professionals, some states also require that the design professional have a corporate professional license.
2.3.1	Standard of Care for Design Professional's Services	Design-Builder's obligation is to deliver a design that meets prevailing industry standards. However, DBIA has provided the parties at Article 11 of the Agreement an optional provision whereby if Owner can identify specific performance standards that can be objectively measured, Design-Builder is obligated to design the Project to satisfy these standards if this optional provision is selected. To avoid any confusion and to ensure that the parties fully understand what their obligations are, the specific performance standards should be clearly identified and should be able to be objectively measured. Design-Builder should recognize that this is a heightened standard of care that has insurance ramifications that should be discussed with Design-Builder's insurance advisor.
3.5	Government Approvals and Permits	Design-Builder is responsible for obtaining all necessary permits, approvals, and licenses, except to the extent specific permits, approvals, and licenses are set forth in an Owner's Permit List, which must be attached as an exhibit to the Agreement. The parties, prior to execution of the Agreement, should discuss which permits, approvals and licenses need to be obtained for the Project and which party is in the best position to do so.
5.1.1	Design-Builder's Insurance Requirements	Design-Builder is obligated to provide insurance coverage from insurance carriers that meet the criteria set forth in the Insurance Exhibit attached to Section 10.1 of the Agreement.
5.1.2	Exclusions to Design-Build	Parties are advised that their standard insurance policies may contain exclusions for the design-build delivery method. This Section 5.1.2 requires that any such exclusions be deleted from the policy.
5.2	Owner's Insurance Requirements	Owner, in addition to providing the insurance set forth in this Section and Section 5.3, is also obligated to procure the insurance coverages for the amounts and consistent with the terms set forth in the Insurance Exhibit made part of the Agreement.
5.4	Bonds and Other Performance Security	Design-Builder is only obligated to provide bonds or other forms of performance security to the extent called for in Section 10.2 of the Agreement.

© 2022 Design-Build Institute of America

Section	Title	Instruction
8.2.2	Compensability for Force Majeure Events	The parties are provided the option in the Agreement of negotiating whether Design-Builder is entitled to compensation for Force Majeure Events.
9.4.3	Payment/ Performance of Disputed Services	When Owner disputes Design-Builder's entitlement to a change order or disagrees with Design-Builder regarding the scope of Work, and nevertheless expects Design-Builder to perform the services, Design-Builder's cash flow and ability to complete the Work will be hampered if Owner fails to pay Design-Builder for the disputed services. This Section provides a balanced approach whereby Design-Builder is required to perform the services, but Owner is required to pay fifty percent (50%) of Design-Builder's reasonable estimated direct costs of performing such services until the dispute is settled. By so doing, Owner does not forfeit its right to deny total responsibility for payment, and Design-Builder does not give up its right to demand full payment. The dispute shall be resolved according to Article 10.
Article 10	Contract Adjustments and Disputes	DBIA endorses the use of partnering, negotiation, mediation and arbitration for the prevention and resolution of disputes. The General Conditions of Contract provides for the parties' Representatives and Senior Representatives to attempt to negotiate the dispute or disagreement. If this attempt fails, the dispute shall be submitted to mandatory, non-binding mediation. Any dispute that cannot be resolved by mediation shall then be submitted to binding arbitration, unless the parties elect in the Agreement to submit their dispute to a court of competent jurisdiction.
10.3.4	Prevailing Party Fees	The prevailing party in any arbitration, or any other final, binding dispute proceeding upon which the parties may agree, shall receive reasonable attorneys' fees from the other party. DBIA supports this "loser pays" provision to encourage parties to negotiate or mediate their differences and to minimize the number of frivolous disputes.
10.4	Duty to Continue Performance	Pending the resolution of any dispute or disagreement, both Owner and Design-Builder shall continue to perform their respective duties under the Contract Documents, unless the parties provide otherwise in the Contract Documents.
10.5	Consequential Damages	DBIA believes that it is inappropriate for either Owner or Design-Builder to be responsible to the other for consequential damages arising from the Project. This limitation on consequential damages in no way restricts, however, the payment of liquidated damages, if any, under Article 5 of the Agreement.
11.4	Design-Builder's Right to Terminate for Cause	If Design-Builder properly terminates the Agreement for cause, it shall recover from Owner in the same way as if Owner had terminated the Agreement for convenience under Section 11.6 of the General Conditions. Owner shall pay to Design-Builder its costs, reasonable overhead and profit on the costs, and an additional payment based on a percentage of the remaining balance of the Contract Price, all as set forth in Article 8 of the Agreement.
11.6.2	Termination for Convenience: Owner's Use of Work Product	Owner should not use the Termination for Convenience clause to obtain Design-Builder's valuable design concepts and then seek lower bids from another design-builder. If Owner terminates this Agreement for its own convenience, and chooses to proceed with the Project using Design-Builder's Work Product, Owner should pay an additional sum for the use of Design-Builder's Work Product pursuant to Section 4.3 of the Agreement.
Article 12	Electronic Data	Design-Builder and Owner shall agree on the software and format for the transmission of Electronic Data. Ownership of Work Product in electronic form is governed by Article 4 of the Agreement. The transmitting party disclaims all warranties with respect to the media transmitting the Electronic Data, but nothing in this Article is intended to negate duties with respect to the standard of care in creating the Electronic Data.

Article 1

General

1.1 Mutual Obligations.

1.1.1 *Owner and Design-Builder* commit at all times to cooperate fully with each other and proceed on the basis of trust and good faith, to permit each party to realize the benefits afforded under the Contract Documents.

1.2 Basic Definitions.

1.2.1 *Agreement* refers to the executed contract between Owner and Design-Builder under either DBIA Document No. 525, *Standard Form of Agreement Between Owner and Design-Builder – Lump Sum* (2024 Edition); DBIA Document No. 530, *Standard Form of Agreement Between Owner and Design-Builder – Cost Plus Fee With an Option for a Guaranteed Maximum Price* (2024 Edition); DBIA Document No. 544, *Standard Form of Progressive Design-Build Agreement* (2024 Edition); or DBIA Document No. 545, *Standard Form of Progressive Design-Build Agreement for Water and Wastewater Projects* (2024 Edition).

1.2.2 *Basis of Design Documents* are as follows: For DBIA Document No. 530, *Standard Form of Agreement Between Owner and Design-Builder – Cost Plus Fee With an Option for a Guaranteed Maximum Price*, the Basis of Design Documents are those documents specifically listed in, as applicable, the GMP Exhibit or GMP Proposal as being the "Basis of Design Documents." For DBIA Document No. 525, *Standard Form of Agreement Between Owner and Design-Builder – Lump Sum*, for DBIA Document No. 544, *Standard Form of Progressive Design-Build Agreement*, the Basis of Design Documents are Owner's Project Criteria, Design-Builder's Proposal, and the Deviation List, if any. For DBIA Document No. 545, *Standard Form of Progressive Design-Build Agreement for Water and Wastewater Projects,* the Basis of Design Documents are Owner's Project Criteria, Design-Builder's Proposal and the Deviation List, if any.

1.2.3 *Construction Documents* are the documents, consisting of Drawings and Specifications, to be prepared or assembled by Design-Builder consistent with the Basis of Design Documents unless a deviation from the Basis of Design Documents is specifically set forth in a Change Order executed by both Owner and Design-Builder, as part of the design review process contemplated by Section 2.4 of these General Conditions of Contract.

1.2.4 *Day* or *Days* shall mean calendar days unless otherwise specifically noted in the Contract Documents.

1.2.5 *Design-Build Team* is comprised of Design-Builder, Design Consultant, and key Subcontractors identified by Design-Builder.

1.2.6 *Design Consultant* is a qualified, licensed design professional who is not an employee of Design-Builder, but is retained by Design-Builder, or employed or retained by anyone under contract with Design-Builder, to furnish design services required under the Contract Documents. A Design Sub-Consultant is a qualified, licensed design professional who is not an employee of Design Consultant but is retained by Design Consultant or employed or retained by anyone under contract to Design Consultant, to furnish design services required under the Contract Documents.

1.2.7 *Design Submission* means any and all documents, shop drawings, electronic information, including computer programs and computer generated materials, data, plans, drawings, sketches, illustrations, specifications, descriptions, models, and other information developed, prepared, furnished, delivered or required to be delivered by, or for, Design-Builder.

1.2.8 *Final Completion* is the date on which all Work is complete in accordance with the Contract Documents, including but not limited to, any items identified in the punch list prepared under

© 2022 Design-Build Institute of America

Section 6.6.1 and the submission of all documents set forth in Section 6.7.2.

1.2.9 *Force Majeure Events* are those events that are beyond the control of both Design-Builder and Owner, including the events of war, floods, labor disputes, earthquakes, epidemics, adverse weather conditions not reasonably anticipated, and other acts of God.

1.2.10 *General Conditions of Contract* refer to this DBIA Document No. 535, *Standard Form of General Conditions of Contract Between Owner and Design-Builder* (2022 Edition).

1.2.11 *GMP Exhibit* means that exhibit attached to DBIA Document No. 530, *Standard Form of Agreement Between Owner and Design-Builder – Cost Plus Fee With an Option for a Guaranteed Maximum Price*, which exhibit will have been agreed upon by Owner and Design-Builder prior to the execution of the Agreement.

1.2.12 *GMP Proposal* or *Proposal* means that proposal developed by Design-Builder in accordance with Section 6.6 of DBIA Document No. 530, *Standard Form of Agreement Between Owner and Design-Builder, Cost Plus Fee With an Option for a Guaranteed Maximum* Price or with Section 1.3 of DBIA Document No. 544, *Progressive Design-Build Agreement,* or DBIA Document No. 545, *Progressive Design-Build Agreement for Water and Wastewater Projects.*

1.2.13 *Hazardous Conditions* are any materials, wastes, substances and chemicals deemed to be hazardous under applicable Legal Requirements, or the handling, storage, remediation, or disposal of which are regulated by applicable Legal Requirements.

1.2.14 *Legal Requirements* are all applicable federal, state and local laws, codes, ordinances, rules, regulations, orders and decrees of any government or quasi-government entity having jurisdiction over the Project or Site, the practices involved in the Project or Site, or any Work.

1.2.15 *Owner's Project Criteria* are developed by or for Owner to describe Owner's program requirements and objectives for the Project, including use, space, price, time, site and expandability requirements, as well as submittal requirements and other requirements governing Design-Builder's performance of the Work. Owner's Project Criteria may include conceptual documents, design criteria, design performance specifications, design specifications, and LEED® or other sustainable design criteria and other Project-specific technical materials and requirements.

1.2.16 *Site* is the land or premises on which the Project is located.

1.2.17 *Subcontractor* is any person or entity retained by Design-Builder as an independent contractor to perform a portion of the Work and shall include materialmen and suppliers.

1.2.18 *Sub-Subcontractor* is any person or entity retained by a Subcontractor as an independent contractor to perform any portion of a Subcontractor's Work and shall include materialmen and suppliers.

1.2.19 *Substantial Completion* or *Substantially Complete* means the date on which the Work, or an agreed upon portion of the Work, is sufficiently complete in accordance with the Contract Documents so that Owner can occupy and use the Project or a portion thereof for its intended purposes.

1.2.20 *Work* is comprised of all Design-Builder's design, construction and other services required by the Contract Documents, including procuring and furnishing all materials, equipment, services and labor reasonably inferable from the Contract Documents.

Article 2

Design-Builder's Services and Responsibilities

2.1 General Services.

2.1.1 Design-Builder's Representative shall be reasonably available to Owner and shall have the necessary expertise and experience required to supervise the Work. Design-Builder's Representative shall communicate regularly with Owner and shall be vested with the authority to act on behalf of Design-Builder. Design-Builder's Representative may be replaced only with the mutual agreement of Owner and Design-Builder.

2.1.2 Unless the parties agree on a different time period for submission of a status report, Design-Builder shall provide Owner with a monthly status report detailing the progress of the Work, including (i) whether the Work is proceeding according to schedule; (ii) whether discrepancies, conflicts, or ambiguities exist in the Contract Documents that require resolution; (iii) whether health and safety issues exist in connection with the Work; (iv) status of the contingency account to the extent provided for in the *Standard Form of Agreement Between Owner and Design-Builder – Cost Plus Fee With an Option for a Guaranteed Maximum Price*; and (v) other items that require resolution so as not to jeopardize Design-Builder's ability to complete the Work for the Contract Price and within the Contract Time(s). Status reports shall be submitted with Design-Builder's draft Payment Applications as a pre-requisite to payment.

2.1.3 Unless a schedule for the execution of the Work has been attached to the Agreement as an exhibit at the time the Agreement is executed, Design-Builder shall prepare and submit, at least three (3) days prior to the meeting contemplated by Section 2.1.4 hereof, a schedule for the execution of the Work for Owner's review and response. The schedule shall indicate the dates for the start and completion of the various stages of Work, including the dates when Owner information and approvals are required to enable Design-Builder to achieve the Contract Time(s). The schedule shall be revised as required by conditions and progress of the Work, but such revisions shall not relieve Design-Builder of its obligations to complete the Work within the Contract Time(s), as such dates may be adjusted in accordance with the Contract Documents. Owner's review of, and response to, the schedule shall not be construed as relieving Design-Builder of its complete and exclusive control over the means, methods, sequences and techniques for executing the Work.

2.1.4 The parties will meet within seven (7) days after execution of the Agreement to discuss issues affecting the administration of the Work and to implement the necessary procedures, including those relating to submittals and payment, to facilitate the ability of the parties to perform their obligations under the Contract Documents.

2.2 Design Professional Services.

2.2.1 Design-Builder shall, consistent with applicable state licensing laws, provide through qualified, licensed design professionals employed by Design-Builder, or procured from qualified, independent licensed Design Consultants, the necessary design services, including architectural, engineering and other design professional services, for the preparation of the required drawings, specifications and other design submittals to permit Design-Builder to complete the Work consistent with the Contract Documents. Nothing in the Contract Documents is intended or deemed to create any legal or contractual relationship between Owner and any Design Consultant.

2.2.2 Design-Builder shall employ only Design Consultants and/or Design Subconsultants who are duly licensed and qualified to perform the Work consistent with the Contract Documents. Prior to the date that Design Consultants and/or Design Subconsultants perform Work on the Project, Design-Builder shall identify in writing to Owner all Design Consultants and Design Subconsultants. To the extent that Design-Builder has not selected a Design Consultant or Design Subconsultant prior to performing the Work, Design-Builder shall provide Owner in writing a list of any subsequently added Design Consultants and/or Design Subconsultants and their scope of Work

© 2022 Design-Build Institute of America

prior to their performing Work on the Project. Owner may reasonably object to Design-Builder's selection of any Design Consultant or Design Subconsultant, provided that the Contract Price and/or Contract Time(s) shall be adjusted to the extent that Owner's decision impacts Design-Builder's cost and/or time of performance. Design-Builder shall not substitute a listed Design Consultant or Subconsultant without obtaining Owner's prior written consent; such consent shall not be unreasonably withheld. Nothing in the Contract Documents is intended or deemed to create any legal or contractual relationship between Owner and any Design Consultant or Design Subconsultant, including but not limited to any third-party beneficiary rights.

2.3 Standard of Care for Design Professional Services.

2.3.1 The standard of care for all design professional services performed to execute the Work shall be the care and skill ordinarily used by members of the applicable profession practicing under similar conditions at the same time and locality of the Project.

2.4 Design Development Services.

2.4.1 Design-Builder and Owner shall, consistent with any applicable provision of the Contract Documents, agree upon any interim Design Submissions that Owner may wish to review, which interim Design Submissions may include design criteria, drawings, diagrams and specifications setting forth the Project requirements.

2.4.1.1 Design Submissions shall be consistent with the Owner's Project Criteria as well as the Basis of Design Documents, as the Basis of Design Documents may have been changed or supplemented through the design process set forth in this Section 2.4.1. By submitting Design Submissions, Design-Builder represents to the Owner that the Work depicted and otherwise shown, contained, or reflected in Design Submissions may be constructed in compliance with the then current Contract Price and Contract Time. Notwithstanding the above, Design-Builder may propose Design Submissions that may alter the Basis of Design Documents, the Contract Price and/or Contract Time; however, Design-Builder must provide notice thereof in accordance with Article 10 of the General Conditions and obtain a Change Order before such proposed Design Submissions are incorporated into the Construction Documents.

2.4.1.2 On or about the time of the Design Submissions, Design-Builder and Owner shall meet and confer about the Design Submissions, with Design-Builder identifying during such meetings, among other things, the evolution of the design and any changes to the Basis of Design Documents, or, if applicable, previously submitted Design Submissions. Changes to the Basis of Design Documents, including those that are deemed minor changes under Section 9.3.1, shall be processed in accordance with Article 9. Minutes of the meetings, including a full listing of all changes, will be maintained by Design-Builder and provided to all attendees for review. Following the design review meeting, Owner shall review and approve the interim Design Submissions and meeting minutes in a time that is consistent with the turnaround times set forth in Design-Builder's schedule.

2.4.1.3 Owner shall review and respond to Design Submissions, providing any comments and/or concerns about the Design Submissions. Owner shall provide all comments on the Design Submissions within the time provided by the Contract Documents. Design-Builder shall revise the Design Submissions (and any other deliverables) in response to Owner's comments and incorporate said responses into the next submission of Design Submissions.

2.4.1.4 If incorporation of Owner's comments results in a design that is inconsistent with or otherwise gives rise to a change in Owner's Project Criteria, the Basis of Design Documents, the Contract Price and/or the Contract Time, Design-Builder shall provide notice thereof in accordance with Articles 9 and 10 of the General Conditions. Changes to the Basis of Design Documents, the Contract Price and/or the Contract Time, including

© 2022 Design-Build Institute of America

those that are deemed minor changes, shall be processed in accordance with Article 9 of the General Conditions.

2.4.2 Design-Builder shall submit to Owner Construction Documents setting forth in detail drawings and specifications describing the requirements for construction of the Work. The Construction Documents shall be consistent with the latest set of interim Design Submissions, as such submissions may have been modified in a design review meeting and recorded in the meeting minutes. The parties shall have a design review meeting to discuss, and Owner shall review and approve, the Construction Documents in accordance with the procedures set forth in Section 2.4.1 above. Design-Builder shall proceed with construction in accordance with the approved Construction Documents and shall submit one set of approved Construction Documents to Owner prior to commencement of construction.

2.4.3 Owner's review and approval of interim Design Submissions, meeting minutes, and the Construction Documents is for the purpose of mutually establishing a conformed set of Contract Documents compatible with the requirements of the Work. Neither Owner's review nor approval of any interim Design Submissions, meeting minutes, and Construction Documents shall be deemed to transfer any design liability from Design-Builder to Owner. Design-Builder shall provide Owner with sufficient time in the Project Schedule to review and approve the Design Submissions.

2.4.4 To the extent not prohibited by the Contract Documents or Legal Requirements, Design-Builder may prepare interim Design Submissions and Construction Documents for a portion of the Work to permit construction to proceed on that portion of the Work prior to completion of the Construction Documents for the entire Work.

2.5 Legal Requirements.

2.5.1 Design-Builder shall perform the Work in accordance with all Legal Requirements and shall provide all notices applicable to the Work as required by the Legal Requirements.

2.5.2 The Contract Price and/or Contract Time(s) shall be adjusted to compensate Design-Builder for the effects of any changes in the Legal Requirements enacted after the date of the Agreement affecting the performance of the Work, or if a Guaranteed Maximum Price is established after the date of the Agreement, the date the parties agree upon the Guaranteed Maximum Price. Such effects may include, without limitation, revisions Design-Builder is required to make to the Construction Documents because of changes in Legal Requirements.

2.6 Government Approvals and Permits.

2.6.1 Except as identified in an Owner's Permit List attached as an exhibit to the Agreement, Design-Builder shall obtain and pay for all necessary permits, approvals, licenses, government charges and inspection fees required for the prosecution of the Work by any government or quasi-government entity having jurisdiction over the Project.

2.6.2 Design-Builder shall provide reasonable assistance to Owner in obtaining those permits, approvals and licenses that are Owner's responsibility.

2.7 Design-Builder's Construction Phase Services.

2.7.1 Unless otherwise provided in the Contract Documents to be the responsibility of Owner or a separate contractor, Design-Builder shall provide through itself or Subcontractors the necessary supervision, labor, inspection, testing, start-up, material, equipment, machinery, temporary utilities and other temporary facilities to permit Design-Builder to complete construction of the Project consistent with the Contract Documents.

2.7.2 Design-Builder shall perform all construction activities efficiently and with the requisite expertise, skill and competence to satisfy the requirements of the Contract Documents. Design-

© 2022 Design-Build Institute of America

Builder shall at all times exercise complete and exclusive control over the means, methods, sequences and techniques of construction.

2.7.3 Design-Builder shall employ only Subcontractors who are duly licensed and qualified to perform the Work consistent with the Contract Documents. Prior to the date that Subcontractors perform Work on the Project, Design-Builder shall identify in writing to Owner all Subcontractors. To the extent that Design-Builder has not selected a Subcontractor prior to performing the Work, Design-Builder shall provide Owner in writing a list of any subsequently added Subcontractors prior to their performing Work on the Project. Owner may reasonably object to Design-Builder's selection of any Subcontractor, provided that the Contract Price and/or Contract Time(s) shall be adjusted to the extent that Owner's decision impacts Design-Builder's cost and/or time of performance. Design-Builder may not substitute listed Subcontractors without Owner's prior written consent; such consent shall not be unreasonably withheld.

2.7.4 Design-Builder assumes responsibility to Owner for the proper performance of the Work of Subcontractors and any acts and omissions in connection with such performance. Nothing in the Contract Documents is intended or deemed to create any legal or contractual relationship between Owner and any Subcontractor or Sub-Subcontractor, including but not limited to any third-party beneficiary rights.

2.7.5 Design-Builder shall coordinate the activities of all Subcontractors. If Owner performs other work on the Project or at the Site with separate contractors under Owner's control, Design-Builder agrees to reasonably cooperate and coordinate its activities with those of such separate contractors so that the Project can be completed in an orderly and coordinated manner without unreasonable disruption.

2.7.6 Design-Builder shall keep the Site reasonably free from debris, trash and construction wastes to permit Design-Builder to perform its construction services efficiently, safely and without interfering with the use of adjacent land areas. Upon Substantial Completion of the Work, or a portion of the Work, Design-Builder shall remove all debris, trash, construction wastes, materials, equipment, machinery and tools arising from the Work or applicable portions thereof to permit Owner to occupy the Project or a portion of the Project for its intended use.

2.8 Design-Builder's Responsibility for Project Safety.

2.8.1 Design-Builder recognizes the importance of performing the Work in a safe manner so as to prevent damage, injury or loss to (i) all individuals at the Site, whether working or visiting; (ii) the Work, including materials and equipment incorporated into the Work or stored on-Site or off-Site; and (iii) all other property at the Site or adjacent thereto. Design-Builder assumes responsibility for implementing and monitoring all safety precautions and programs related to the performance of the Work. Design-Builder shall, prior to commencing construction, designate a Safety Representative with the necessary qualifications and experience to supervise the implementation and monitoring of all safety precautions and programs related to the Work. Unless otherwise required by the Contract Documents, Design-Builder's Safety Representative shall be an individual stationed at the Site who may have responsibilities on the Project in addition to safety. The Safety Representative shall make routine daily inspections of the Site and shall hold weekly safety meetings with Design-Builder's personnel, Subcontractors and others as applicable.

2.8.2 Design-Builder and Subcontractors shall comply with all Legal Requirements relating to safety, as well as any Owner-specific safety requirements set forth in the Contract Documents, provided that such Owner-specific requirements do not violate any applicable Legal Requirement. Design-Builder will immediately report in writing any safety-related injury, loss, damage or accident arising from the Work to Owner's Representative and, to the extent mandated by Legal Requirements, to all government or quasi-government authorities having jurisdiction over safety-related matters involving the Project or the Work.

2.8.3 Design-Builder's responsibility for safety under this Section 2.8 is not intended in any way

© 2022 Design-Build Institute of America

to relieve Subcontractors and Sub-Subcontractors of their own contractual and legal obligations and responsibility for (i) complying with all Legal Requirements, including those related to health and safety matters; and (ii) taking all necessary measures to implement and monitor all safety precautions and programs to guard against injuries, losses, damages or accidents resulting from their performance of the Work.

2.9 Design-Builder's Warranty.

2.9.1 Design-Builder warrants to Owner that the construction, including all materials and equipment furnished as part of the construction, shall be new unless otherwise specified in the Contract Documents, of good quality, in conformance with the Contract Documents and free of defects in materials and workmanship. If the parties have opted in Section ___ of the Agreement to establish a limited time frame for the warranty set forth in this Section, the warranty in this section shall be limited to the time frame set forth in Section ____ of the Agreement. Design-Builder's warranty obligation excludes defects caused by abuse, alterations, or failure to maintain the Work in a commercially reasonable manner. Nothing in this warranty is intended to limit any manufacturer's warranty which provides Owner with greater warranty rights than set forth in this Section 2.9 or the Contract Documents. Design-Builder will provide Owner with all manufacturers' warranties upon Substantial Completion.

2.10 Correction of Defective Work.

2.10.1 Design-Builder agrees to correct any Work that is found to not be in conformance with the Contract Documents, including that part of the Work subject to Section 2.9 hereof, within a period of one year from the date of Substantial Completion of the Work or any portion of the Work, or within such longer period to the extent required by any specific warranty included in the Contract Documents.

2.10.2 Design-Builder shall, within seven (7) days of receipt of written notice from Owner that the Work is not in conformance with the Contract Documents, take meaningful steps to commence correction of such nonconforming Work, including the correction, removal or replacement of the nonconforming Work and any damage caused to other parts of the Work affected by the nonconforming Work. If Design-Builder fails to commence the necessary steps within such seven (7) day period, Owner, in addition to any other remedies provided under the Contract Documents, may provide Design-Builder with written notice that Owner will commence correction of such nonconforming Work with its own forces. If Owner does perform such corrective Work, Design-Builder shall be responsible for all reasonable costs incurred by Owner in performing such correction. If the nonconforming Work creates an emergency requiring an immediate response, the seven (7) day period identified herein shall be deemed inapplicable.

2.10.3 The one-year period referenced in Section 2.10.1 above applies only to Design-Builder's obligation to correct nonconforming Work and is not intended to constitute a period of limitations for any other rights or remedies Owner may have regarding Design-Builder's other obligations under the Contract Documents.

Article 3

Owner's Services and Responsibilities

3.1 Duty to Cooperate.

3.1.1 Owner shall, throughout the performance of the Work, cooperate with Design-Builder and perform its responsibilities, obligations and services in a timely manner to facilitate Design-Builder's timely and efficient performance of the Work and so as not to delay or interfere with Design-

© 2022 Design-Build Institute of America

Builder's performance of its obligations under the Contract Documents.

3.1.2 Owner shall provide timely reviews and approvals of interim Design Submissions and Construction Documents consistent with the turnaround times set forth in Design-Builder's schedule.

3.1.3 Owner shall give Design-Builder timely notice of any Work that Owner notices to be defective or not in compliance with the Contract Documents.

3.2 Furnishing of Services and Information.

3.2.1 Unless expressly stated to the contrary in the Contract Documents, Owner shall provide, at its own cost and expense, for Design-Builder's information and use the following, all of which Design-Builder is entitled to rely upon in performing the Work:

3.2.1.1 Surveys describing the property, boundaries, topography and reference points for use during construction, including existing service and utility lines;

3.2.1.2 Geotechnical studies describing subsurface conditions, and other surveys describing other latent or concealed physical conditions at the Site;

3.2.1.3 Temporary and permanent easements, zoning and other requirements and encumbrances affecting land use, or necessary to permit the proper design and construction of the Project and enable Design-Builder to perform the Work;

3.2.1.4 A legal description of the Site;

3.2.1.5 To the extent available, record drawings of any existing structures at the Site; and

3.2.1.6 To the extent available, environmental studies, reports and impact statements describing the environmental conditions, including Hazardous Conditions, in existence at the Site.

3.2.2 Owner is responsible for securing and executing all necessary agreements with adjacent land or property owners that are necessary to enable Design-Builder to perform the Work. Owner is further responsible for all costs, including attorneys' fees, incurred in securing these necessary agreements.

3.3 Financial Information.

3.3.1 At Design-Builder's written request, Owner shall promptly furnish reasonable evidence satisfactory to Design-Builder that Owner has adequate funds available and committed to fulfill all of Owner's contractual obligations under the Contract Documents. If Owner fails to furnish such financial information in a timely manner, Design-Builder may stop Work under Section 11.3 hereof or exercise any other right permitted under the Contract Documents.

3.3.2 Design-Builder shall cooperate with the reasonable requirements of Owner's lenders or other financial sources. Notwithstanding the preceding sentence, after execution of the Agreement Design-Builder shall have no obligation to execute for Owner or Owner's lenders or other financial sources any documents or agreements that require Design-Builder to assume obligations or responsibilities greater than those existing obligations Design-Builder has under the Contract Documents.

3.4 Owner's Representative.

3.4.1 Owner's Representative shall be responsible for providing Owner-supplied information and approvals in a timely manner to permit Design-Builder to fulfill its obligations under the Contract

© 2022 Design-Build Institute of America

Documents. Owner's Representative shall also provide Design-Builder with prompt notice if it observes any failure on the part of Design-Builder to fulfill its contractual obligations, including any errors, omissions or defects in the performance of the Work. Owner's Representative shall communicate regularly with Design-Builder and shall be vested with the authority to act on behalf of Owner.

3.5 Government Approvals and Permits.

3.5.1 Owner shall obtain and pay for all necessary permits, approvals, licenses, government charges and inspection fees set forth in Owner's Permit List attached as an exhibit to the Agreement.

3.5.2 Owner shall provide reasonable assistance to Design-Builder in obtaining those permits, approvals and licenses that are Design-Builder's responsibility.

3.6 Owner's Separate Contractors.

3.6.1 Owner is responsible for all work performed on the Project or at the Site by separate contractors under Owner's control. Owner shall contractually require its separate contractors to cooperate with and coordinate their activities so as not to interfere with Design-Builder in order to enable Design-Builder to timely complete the Work consistent with the Contract Documents.

Article 4

Hazardous Conditions and Differing Site Conditions

4.1 Hazardous Conditions.

4.1.1 Unless otherwise expressly provided in the Contract Documents to be part of the Work, Design-Builder is not responsible for any Hazardous Conditions encountered at the Site. Upon encountering any Hazardous Conditions, Design-Builder will stop Work immediately in the affected area and duly notify Owner and, if required by Legal Requirements, all government or quasi-government entities with jurisdiction over the Project or Site.

4.1.2 Upon receiving notice of the presence of suspected Hazardous Conditions, Owner shall take the necessary measures required to ensure that the Hazardous Conditions are remediated or rendered harmless. Such necessary measures shall include Owner retaining qualified independent experts to (i) ascertain whether Hazardous Conditions have actually been encountered, and, if they have been encountered, (ii) prescribe the remedial measures that Owner must take either to remove the Hazardous Conditions or render the Hazardous Conditions harmless.

4.1.3 Design-Builder shall be obligated to resume Work at the affected area of the Project only after Owner's expert provides it with written certification that (i) the Hazardous Conditions have been removed or rendered harmless; and (ii) all necessary approvals have been obtained from all government and quasi-government entities having jurisdiction over the Project or Site.

4.1.4 Design-Builder will be entitled, in accordance with these General Conditions of Contract, to an adjustment in its Contract Price and/or Contract Time(s) to the extent Design-Builder's cost and/or time of performance have been adversely impacted by the presence of Hazardous Conditions.

4.1.5 To the fullest extent permitted by law, Owner shall indemnify, defend and hold harmless Design-Builder, Design Consultants, Subcontractors, anyone employed directly or indirectly by any of them, and their officers, directors, employees and agents, from and against any and all claims,

© 2022 Design-Build Institute of America

losses, damages, liabilities and expenses, including reasonable attorneys' fees and expenses, arising out of or resulting from the presence, removal or remediation of Hazardous Conditions at the Site.

4.1.6 Notwithstanding the preceding provisions of this Section 4.1, Owner is not responsible for Hazardous Conditions introduced to the Site by Design-Builder, Subcontractors or anyone for whose acts they may be liable. To the fullest extent permitted by law, Design-Builder shall indemnify, defend and hold harmless Owner and Owner's officers, directors, employees and agents from and against all claims, losses, damages, liabilities and expenses, including attorneys' fees and expenses, arising out of or resulting from those Hazardous Conditions introduced to the Site by Design-Builder, Subcontractors or anyone for whose acts they may be liable.

4.2 Differing Site Conditions.

4.2.1 Concealed or latent physical conditions or subsurface conditions at the Site that (i) materially differ from the conditions indicated in the Contract Documents or (ii) are of an unusual nature, differing materially from the conditions ordinarily encountered and generally recognized as inherent in the Work, are collectively referred to herein as "Differing Site Conditions." If Design-Builder encounters a Differing Site Condition, Design-Builder will be entitled to an adjustment in the Contract Price and/or Contract Time(s) to the extent Design-Builder's cost and/or time of performance are adversely impacted by the Differing Site Condition.

4.2.2 Upon encountering a Differing Site Condition, Design-Builder shall provide prompt written notice to Owner of such condition, which notice shall not be later than fourteen (14) days after such condition has been encountered. Design-Builder shall, to the extent reasonably possible, provide such notice before the Differing Site Condition has been substantially disturbed or altered.

Article 5

Insurance and Bonds

5.1 Design-Builder's Insurance Requirements.

5.1.1 Design-Builder is responsible for procuring and maintaining the insurance for the coverage amounts all as set forth in the Insurance Exhibit to the Agreement. Coverage shall be secured from insurance companies authorized to do business in the state in which the Project is located, and with a minimum rating set forth in the Agreement.

5.1.2 Design-Builder's insurance shall specifically delete any design-build or similar exclusions that could compromise coverages because of the design-build delivery of the Project.

5.1.3 Prior to commencing any construction services hereunder, Design-Builder shall provide Owner with certificates evidencing that (i) all insurance obligations required by the Contract Documents are in full force and in effect and will remain in effect for the duration required by the Contract Documents; and (ii) no insurance coverage will be canceled, renewal refused, or materially changed unless at least thirty (30) days' prior written notice is given to Owner. If any of the foregoing insurance coverages are required to remain in force after final payment is reasonably available, an additional certificate evidencing continuation of such coverage shall be submitted with the Final Application for Payment. If any information concerning reduction of coverage is not furnished by the insurer, it shall be furnished by Design-Builder with reasonable promptness according to Design-Builder's information and belief.

5.2 Owner's Liability Insurance.

5.2.1 Owner shall procure and maintain from insurance companies authorized to do business in

© 2022 Design-Build Institute of America

the state in which the Project is located such liability insurance as set forth in the Insurance Exhibit to the Agreement to protect Owner from claims which may arise from the performance of Owner's obligations under the Contract Documents or Owner's conduct during the course of the Project.

5.3 Owner's Property Insurance.

5.3.1 Unless otherwise provided in the Contract Documents, Owner shall procure and maintain from insurance companies authorized to do business in the state in which the Project is located property insurance upon the entire Project to the full insurable value of the Project, including professional fees, overtime premiums and all other expenses incurred to replace or repair the insured property. The property insurance obtained by Owner shall be the broadest coverage commercially available, and shall include as additional insureds the interests of Owner, Design-Builder, Design Consultants and Subcontractors of any tier. Such insurance shall include but not be limited to the perils of fire and extended coverage, theft, vandalism, malicious mischief, collapse, flood, earthquake, debris removal and other perils or causes of loss as called for in the Contract Documents. The property insurance shall include physical loss or damage to the Work, including materials and equipment in transit, at the Site or at another location as may be indicated in Design-Builder's Application for Payment and approved by Owner. Owner is responsible for the payment of any deductibles under the insurance required by this Section 5.3.1.

5.3.2 Unless the Contract Documents provide otherwise, Owner shall procure and maintain boiler and machinery insurance that will include the interests of Owner, Design-Builder, Design Consultants, and Subcontractors of any tier. Owner is responsible for the payment of any deductibles under the insurance required by this Section 5.3.2.

5.3.3 Prior to Design-Builder commencing any Work, Owner shall provide Design-Builder with certificates evidencing that (i) all Owner's insurance obligations required by the Contract Documents are in full force and in effect and will remain in effect until Design-Builder has completed all of the Work and has received final payment from Owner; and (ii) no insurance coverage will be canceled, renewal refused, or materially changed unless at least thirty (30) days' prior written notice is given to Design-Builder. Owner's property insurance shall not lapse or be canceled if Owner occupies a portion of the Work pursuant to Section 6.6.3 hereof. Owner shall provide Design-Builder with the necessary endorsements from the insurance company prior to occupying a portion of the Work.

5.3.4 Any loss covered under Owner's property insurance shall be adjusted with Owner and Design-Builder and made payable to both of them as trustees for the insureds as their interests may appear, subject to any applicable mortgage clause. All insurance proceeds received as a result of any loss will be placed in a separate account and distributed in accordance with such agreement as the interested parties may reach. Any disagreement concerning the distribution of any proceeds will be resolved in accordance with Article 10 hereof.

5.3.5 Owner and Design-Builder waive against each other and Owner's separate contractors, Design Consultants, Subcontractors, agents and employees of each and all of them, all damages covered by property insurance provided herein, except such rights as they may have to the proceeds of such insurance. Design-Builder and Owner shall, where appropriate, require similar waivers of subrogation from Owner's separate contractors, Design Consultants and Subcontractors and shall require each of them to include similar waivers in their contracts. These waivers of subrogation shall not contain any restriction or limitation that will impair the full and complete extent of its applicability to any person or entity unless agreed to in writing prior to the execution of this Agreement.

5.4 Bonds and Other Performance Security.

5.4.1 If Owner requires Design-Builder to obtain performance and labor and material payment bonds, or other forms of performance security, the amount, form and other conditions of such security shall be as set forth in the Agreement.

© 2022 Design-Build Institute of America

5.4.2 All bonds furnished by Design-Builder shall be in a form satisfactory to Owner. The surety shall be a company qualified and registered to conduct business in the state in which the Project is located.

Article 6

Payment

6.1 Schedule of Values.

6.1.1 Unless required by Owner upon execution of this Agreement, within ten (10) days of execution of the Agreement, Design-Builder shall submit for Owner's review and approval a schedule of values for all of the Work. The Schedule of Values will (i) subdivide the Work into its respective parts; (ii) include values for all items comprising the Work; and (iii) serve as the basis for monthly progress payments made to Design-Builder throughout the Work.

6.1.2 Owner will timely review and approve the schedule of values so as not to delay the submission of Design-Builder's first application for payment. Owner and Design-Builder shall timely resolve any differences so as not to delay Design-Builder's submission of its first application for payment.

6.2 Monthly Progress Payments.

6.2.1 On or before the date established in the Agreement, Design-Builder shall submit for Owner's review and approval its Application for Payment requesting payment for all Work performed as of the date of the Application for Payment. The Application for Payment shall be accompanied by all supporting documentation required by the Contract Documents and/or established at the meeting required by Section 2.1.4 hereof.

6.2.2 The Application for Payment may request payment for equipment and materials not yet incorporated into the Project, provided that (i) Owner is satisfied that the equipment and materials are suitably stored at either the Site or another acceptable location; (ii) the equipment and materials are protected by suitable insurance; and (iii) upon payment, Owner will receive the equipment and materials free and clear of all liens and encumbrances.

6.2.3 All discounts offered by Subcontractors, Sub-Subcontractors, and suppliers to Design-Builder for early payment shall accrue one hundred percent to Design-Builder to the extent Design-Builder advances payment. Unless Owner advances payment to Design-Builder specifically to receive the discount, Design-Builder may include in its Application for Payment the full undiscounted cost of the item for which payment is sought.

6.2.4 The Application for Payment shall constitute Design-Builder's representation that the Work described therein has been performed consistent with the Contract Documents, has progressed to the point indicated in the Application for Payment, and that title to all Work will pass to Owner free and clear of all claims, liens, encumbrances, and security interests upon the incorporation of the Work into the Project, or upon Design-Builder's receipt of payment, whichever occurs earlier.

6.3 Withholding of Payments.

6.3.1 On or before the date established in the Agreement, Owner shall pay Design-Builder all amounts properly due. If Owner determines that Design-Builder is not entitled to all or part of an Application for Payment as a result of Design-Builder's failure to meet its obligations hereunder, it will notify Design-Builder in writing at least five (5) days prior to the date payment is due. The notice shall indicate the specific amounts Owner intends to withhold, the reasons and contractual basis

© 2022 Design-Build Institute of America

for the withholding, and the specific measures Design-Builder must take to rectify Owner's concerns. Design-Builder and Owner will attempt to resolve Owner's concerns prior to the date payment is due. If the parties cannot resolve such concerns, Design-Builder may pursue its rights under the Contract Documents, including those under Article 10 hereof.

6.3.2 Notwithstanding anything to the contrary in the Contract Documents, Owner shall pay Design-Builder all undisputed amounts in an Application for Payment within the times required by the Agreement.

6.4 Right to Stop Work and Interest.

6.4.1 If Owner fails to pay timely Design-Builder any undisputed amount that becomes due, Design-Builder, in addition to all other remedies provided in the Contract Documents, may stop Work pursuant to Section 11.3 hereof. All payments due and unpaid shall bear interest at the rate set forth in the Agreement.

6.5 Design-Builder's Payment Obligations.

6.5.1 Design-Builder will pay Design Consultants and Subcontractors, in accordance with its contractual obligations to such parties, all the amounts Design-Builder has received from Owner on account of their work. Design-Builder will impose similar requirements on Design Consultants and Subcontractors to pay those parties with whom they have contracted. Design-Builder will indemnify and defend Owner against any claims for payment and mechanic's liens as set forth in Section 7.3 hereof.

6.6 Substantial Completion.

6.6.1 Design-Builder shall notify Owner when it believes the Work, or to the extent permitted in the Contract Documents, a portion of the Work, is Substantially Complete. Within five (5) days of Owner's receipt of Design-Builder's notice, Owner and Design-Builder will jointly inspect such Work to verify that it is Substantially Complete in accordance with the requirements of the Contract Documents. If such Work is Substantially Complete, Owner shall prepare and issue a Certificate of Substantial Completion that will set forth (i) the date of Substantial Completion of the Work or portion thereof; (ii) the remaining items of Work that have to be completed before final payment; (iii) provisions (to the extent not already provided in the Contract Documents) establishing Owner's and Design-Builder's responsibility for the Project's security, maintenance, utilities and insurance pending final payment; and (iv) an acknowledgment that warranties commence to run on the date of Substantial Completion, except as may otherwise be noted in the Certificate of Substantial Completion.

6.6.2 Upon Substantial Completion of the entire Work or, if applicable, any portion of the Work, Owner shall release to Design-Builder all retained amounts relating, as applicable, to the entire Work or completed portion of the Work, less an amount equal to the reasonable value of all remaining or incomplete items of Work as noted in the Certificate of Substantial Completion.

6.6.3 Owner, at its option, may use a portion of the Work which has been determined to be Substantially Complete, provided, however, that (i) a Certificate of Substantial Completion has been issued for the portion of Work addressing the items set forth in Section 6.6.1 above; (ii) Design-Builder and Owner have obtained the consent of their sureties and insurers, and to the extent applicable, the appropriate government authorities having jurisdiction over the Project; and (iii) Owner and Design-Builder agree that Owner's use or occupancy will not interfere with Design-Builder's completion of the remaining Work.

6.7 Final Payment.

6.7.1 After receipt of a Final Application for Payment from Design-Builder, Owner shall make final payment by the time required in the Agreement, provided that Design-Builder has achieved

© 2022 Design-Build Institute of America

Final Completion.

6.7.2 At the time of submission of its Final Application for Payment, Design-Builder shall provide the following information:

6.7.2.1 An affidavit that there are no claims, obligations or liens outstanding or unsatisfied for labor, services, material, equipment, taxes or other items performed, furnished or incurred for or in connection with the Work which will in any way affect Owner's interests;

6.7.2.2 A general release executed by Design-Builder waiving, upon receipt of final payment by Design-Builder, all claims, except those claims previously made in writing to Owner and remaining unsettled at the time of final payment;

6.7.2.3 Consent of Design-Builder's surety, if any, to final payment;

6.7.2.4 All operating manuals, warranties and other deliverables required by the Contract Documents; and

6.7.2.5 Certificates of insurance confirming that required coverages will remain in effect consistent with the requirements of the Contract Documents.

6.7.3 Upon making final payment, Owner waives all claims against Design-Builder except claims relating to (i) Design-Builder's failure to satisfy its payment obligations, if such failure affects Owner's interests; (ii) Design-Builder's failure to complete the Work consistent with the Contract Documents, including defects appearing after Substantial Completion; and (iii) the terms of any special warranties required by the Contract Documents.

6.7.4 Deficiencies in the Work discovered after Substantial Completion, whether or not such deficiencies would have been included on the punch list if discovered earlier, shall be deemed warranty Work. Such deficiencies shall be corrected by Design-Builder under Sections 2.9 and 2.10 herein and shall not be a reason to withhold final payment from Design-Builder, provided, however, that Owner shall be entitled to withhold from the Final Payment the reasonable value of completion of such deficient work until such work is completed.

Article 7

Indemnification

7.1 Patent and Copyright Infringement.

7.1.1 Design-Builder shall defend any action or proceeding brought against Owner based on any claim that the Work, or any part thereof, or the operation or use of the Work or any part thereof, constitutes infringement of any United States patent or copyright, now or hereafter issued. Owner shall give prompt written notice to Design-Builder of any such action or proceeding and will reasonably provide authority, information and assistance in the defense of same. Design-Builder shall indemnify and hold harmless Owner from and against all damages and costs, including but not limited to attorneys' fees and expenses awarded against Owner or Design-Builder in any such action or proceeding. Design-Builder agrees to keep Owner informed of all developments in the defense of such actions.

7.1.2 If Owner is enjoined from the operation or use of the Work, or any part thereof, as the result of any patent or copyright suit, claim, or proceeding, Design-Builder shall at its sole expense take reasonable steps to procure the right to operate or use the Work. If Design-Builder cannot so procure such right within a reasonable time, Design-Builder shall promptly, at Design-Builder's

© 2022 Design-Build Institute of America

option and at Design-Builder's expense, (i) modify the Work so as to avoid infringement of any such patent or copyright; or (ii) replace said Work with Work that does not infringe or violate any such patent or copyright.

7.1.3 Sections 7.1.1 and 7.1.2 above shall not be applicable to any suit, claim or proceeding based on infringement or violation of a patent or copyright (i) relating solely to a particular process or product of a particular manufacturer specified by Owner and not offered or recommended by Design-Builder to Owner; or (ii) arising from modifications to the Work by Owner or its agents after acceptance of the Work. If the suit, claim or proceeding is based upon events set forth in the preceding sentence, Owner shall defend, indemnify and hold harmless Design-Builder to the same extent Design-Builder is obligated to defend, indemnify and hold harmless Owner in Section 7.1.1 above.

7.1.4 The obligations set forth in this Section 7.1 shall constitute the sole agreement between the parties relating to liability for infringement of violation of any patent or copyright.

7.2 Tax Claim Indemnification.

7.2.1 If, in accordance with Owner's direction, an exemption for all or part of the Work is claimed for taxes, Owner shall indemnify, defend and hold harmless Design-Builder from and against any liability, penalty, interest, fine, tax assessment, attorneys' fees or other expenses or costs incurred by Design-Builder as a result of any action taken by Design-Builder in accordance with Owner's directive. Owner shall furnish Design-Builder with any applicable tax exemption certificates necessary to obtain such exemption, upon which Design-Builder may rely.

7.3 Payment Claim Indemnification.

7.3.1 Provided that Owner is not in breach of its contractual obligation to make payments to Design-Builder for the Work, Design-Builder shall indemnify, defend and hold harmless Owner from any claims or mechanic's liens brought against Owner or against the Project as a result of the failure of Design-Builder, or those for whose acts it is responsible, to pay for any services, materials, labor, equipment, taxes or other items or obligations furnished or incurred for or in connection with the Work. Within three (3) days of receiving written notice from Owner that such a claim or mechanic's lien has been filed, Design-Builder shall commence to take the steps necessary to discharge said claim or lien, including, if necessary, the furnishing of a mechanic's lien bond. If Design-Builder fails to do so, Owner will have the right to discharge the claim or lien and hold Design-Builder liable for costs and expenses incurred, including attorneys' fees.

7.4 Design-Builder's General Indemnification.

7.4.1 Except as set forth in Section 7.4.2 below, Design-Builder, to the fullest extent permitted by law, shall indemnify, hold harmless and defend Owner, its officers, directors, and employees from and against claims, losses, damages, liabilities, including attorneys' fees and expenses, for non-party bodily injury, sickness or death and non-party property damage or destruction (other than to the Work itself) but only to the extent resulting from the negligent acts or omissions of Design-Builder, Design Consultants, Subcontractors, anyone employed directly or indirectly by any of them or anyone for whose acts any of them may be liable.

7.4.2 For indemnity obligations that arise from professional errors and omissions, Design-Builder, to the fullest extent permitted by law, shall indemnify Owner, its officers, directors, and employees from and against claims, losses, damages, liabilities, including attorneys' fees and expenses, for non-party bodily injury, sickness, or death and non-party property damage or destruction (other than to the Work itself) but only to the extent resulting from the negligent acts or omissions of Design-Builder, Design Consultants, Subcontractors, anyone employed directly or indirectly by any of them or anyone for whose acts any of them may be liable.

7.4.3 If an employee of Design-Builder, Design Consultants, Subcontractors, anyone employed

© 2022 Design-Build Institute of America

directly or indirectly by any of them or anyone for whose acts any of them may be liable has a claim against Owner, its officers, directors, employees, or agents, Design-Builder's indemnity obligations set forth in Sections 7.4.1 and 7.4.2 above shall not be limited by any limitation on the amount of damages, compensation or benefits payable by or for Design-Builder, Design Consultants, Subcontractors, or other entity under any employee benefit acts, including workers' compensation or disability acts.

7.5 Owner's General Indemnification.

7.5.1 Owner, to the fullest extent permitted by law, shall indemnify, hold harmless and defend Design-Builder and any of Design-Builder's officers, directors, and employees, from and against claims, losses, damages, liabilities, including attorneys' fees and expenses, for bodily injury, sickness or death, and property damage or destruction (other than to the Work itself) but only to the extent resulting from the negligent acts or omissions of Owner, Owner's separate contractors or anyone for whose acts any of them may be liable.

7.6 Limited Recourse.

7.6.1 None of the obligations set forth in this Agreement (on behalf of any party) constitute personal obligations of any natural persons who are the officers, shareholders, members, partners, employees, or agents of any party unless the natural person is expressly identified as a contracting party. All Parties to this Agreement shall not seek recourse against any natural person described herein. This provision, however, shall not protect such natural persons from liability for willful misconduct, illegal acts or intentional violation of any duty of corporate loyalty.

Article 8

Time

8.1 Obligation to Achieve the Contract Times.

8.1.1 Design-Builder agrees that it will commence performance of the Work and achieve the Contract Time(s) in accordance with Article 5 of the Agreement.

8.2 Delays to the Work.

8.2.1 If Design-Builder is delayed on the critical path in the performance of the Work due to acts, omissions, conditions, events, or circumstances beyond its control and due to no fault of its own or those for whom Design-Builder is responsible, the Contract Time(s) for performance shall be reasonably extended by Change Order. By way of example, events that will entitle Design-Builder to an extension of the Contract Time(s) include acts or omissions of Owner or anyone under Owner's control (including separate contractors), changes in the Work, Differing Site Conditions, Hazardous Conditions, and Force Majeure Events.

8.2.2 In addition to Design-Builder's right to a time extension for those events set forth in Section 8.2.1 above, Design-Builder shall also be entitled to an appropriate adjustment of the Contract Price provided, however, that the Contract Price shall not be adjusted for Force Majeure Events unless otherwise provided in the Agreement.

© 2022 Design-Build Institute of America

Article 9

Changes to the Contract Price and Time

9.1 Change Orders.

9.1.1 A Change Order is a written instrument issued after execution of the Agreement signed by Owner and Design-Builder, stating their agreement upon all of the following:

9.1.1.1 The scope of the change in the Work;

9.1.1.2 The amount of the adjustment to the Contract Price; and

9.1.1.3 The extent of the adjustment to the Contract Time(s).

9.1.2 All changes in the Work authorized by applicable Change Order shall be performed under the applicable conditions of the Contract Documents. Owner and Design-Builder shall negotiate in good faith and as expeditiously as possible the appropriate adjustments for such changes.

9.1.3 If Owner requests a proposal for a change in the Work from Design-Builder and subsequently elects not to proceed with the change, a Change Order shall be issued to reimburse Design-Builder for reasonable costs incurred for estimating services, design services and services involved in the preparation of proposed revisions to the Contract Documents.

9.2 Work Change Directives.

9.2.1 A Work Change Directive is a written order prepared and signed by Owner directing a change in the Work prior to agreement on an adjustment in the Contract Price and/or the Contract Time(s).

9.2.2 Owner and Design-Builder shall negotiate in good faith and as expeditiously as possible the appropriate adjustments for the Work Change Directive. Upon reaching an agreement, the parties shall prepare and execute an appropriate Change Order reflecting the terms of the agreement.

9.3 Minor Changes in the Work.

9.3.1 Minor changes in the Work do not involve an adjustment in the Contract Price and/or Contract Time(s) and do not materially and adversely affect the Work, including the design, quality, performance and workmanship required by the Contract Documents. Design-Builder may make minor changes in the Work consistent with the intent of the Contract Documents, provided, however, that Design-Builder shall promptly inform Owner, in writing, of any such changes and record such changes on the documents maintained by Design-Builder.

9.4 Contract Price Adjustments.

9.4.1 The increase or decrease in Contract Price resulting from a change in the Work shall be determined by one or more of the following methods:

9.4.1.1 Unit prices set forth in the Agreement or as subsequently agreed to between the parties;

9.4.1.2 A mutually accepted lump sum, properly itemized and supported by sufficient substantiating data to permit evaluation by Owner;

9.4.1.3 Costs, fees and any other markups set forth in the Agreement; or

© 2022 Design-Build Institute of America

9.4.1.4 If an increase or decrease cannot be agreed to as set forth in items 9.4.1.1 through 9.4.1.3 above and Owner issues a Work Change Directive, the cost of the change of the Work shall be determined by the reasonable expense and savings in the performance of the Work resulting from the change, including a reasonable overhead and profit, as may be set forth in the Agreement.

9.4.2 If unit prices are set forth in the Contract Documents or are subsequently agreed to by the parties, but application of such unit prices will cause substantial inequity to Owner or Design-Builder because of differences in the character or quantity of such unit items as originally contemplated, such unit prices shall be equitably adjusted.

9.4.3 If Owner and Design-Builder disagree upon whether Design-Builder is entitled to be paid for any services required by Owner, or if there are any other disagreements over the scope of Work or proposed changes to the Work, Owner and Design-Builder shall resolve the disagreement pursuant to Article 10 hereof. As part of the negotiation process, Design-Builder shall furnish Owner with a good faith estimate of the costs to perform the disputed services in accordance with Owner's interpretations. If the parties are unable to agree and Owner expects Design-Builder to perform the services in accordance with Owner's interpretations, Design-Builder shall proceed to perform the disputed services, conditioned upon Owner issuing a written order to Design-Builder (i) directing Design-Builder to proceed; and (ii) specifying Owner's interpretation of the services that are to be performed. If this occurs, Design-Builder shall be entitled to submit in its Applications for Payment an amount equal to fifty percent (50%) of its reasonable estimated direct cost to perform the services, and Owner agrees to pay such amounts, with the express understanding that (i) such payment by Owner does not prejudice Owner's right to argue that it has no responsibility to pay for such services; and (ii) receipt of such payment by Design-Builder does not prejudice Design-Builder's right to seek full payment of the disputed services if Owner's order is deemed to be a change to the Work.

9.5 Emergencies.

9.5.1 In any emergency affecting the safety of persons and/or property, Design-Builder shall act, at its discretion, to prevent threatened damage, injury or loss. Any change in the Contract Price and/or Contract Time(s) on account of emergency work shall be determined as provided in this Article 9.

Article 10

Contract Adjustments and Disputes

10.1 Requests for Contract Adjustments and Relief.

10.1.1 If either Design-Builder or Owner believes that it is entitled to relief against the other for any event arising out of or related to the Work or Project, such party shall provide written notice to the other party of the basis for its claim for relief. Such notice shall, if possible, be made prior to incurring any cost or expense and in accordance with any specific notice requirements contained in applicable sections of these General Conditions of Contract. In the absence of any specific notice requirement, written notice shall be given within a reasonable time, not to exceed twenty-one (21) days, after the occurrence giving rise to the claim for relief or after the claiming party reasonably should have recognized the event or condition giving rise to the request, whichever is later. The claimant shall provide more complete information with respect to the claim within fourteen (14) days of the initial notice. The more complete information shall include sufficient information to advise the other party of the circumstances giving rise to the claim for relief, the specific contractual adjustment or relief requested and the basis of such request.

© 2022 Design-Build Institute of America

10.2 Dispute Avoidance and Resolution.

10.2.1 The parties are fully committed to working with each other throughout the Project and agree to communicate regularly with each other at all times so as to avoid or minimize disputes or disagreements. If disputes or disagreements do arise, Design-Builder and Owner each commit to resolving such disputes or disagreements in an amicable, professional and expeditious manner so as to avoid unnecessary losses, delays and disruptions to the Work.

10.2.2 Design-Builder and Owner will first attempt to resolve disputes or disagreements at the field level through discussions between Design-Builder's Representative and Owner's Representative which shall conclude within fourteen (14) days of the written notice provided for in Section 10.1.1 unless Owner and Design-Builder mutually agree otherwise.

10.2.3 If a dispute or disagreement cannot be resolved through Design-Builder's Representative and Owner's Representative, Design-Builder's Senior Representative and Owner's Senior Representative, upon the request of either party, shall meet as soon as conveniently possible, but in no case later than thirty (30) days after such a request is made, to attempt to resolve such dispute or disagreement. Five (5) days prior to any meetings between the Senior Representatives, the parties will exchange relevant information that will assist the parties in resolving their dispute or disagreement.

10.2.4 If after meeting the Senior Representatives determine that the dispute or disagreement cannot be resolved on terms satisfactory to both parties, the parties shall submit within thirty (30) days of the conclusion of the meeting of Senior Representatives the dispute or disagreement to non-binding mediation. The mediation shall be conducted by a mutually agreeable impartial mediator, or if the parties cannot so agree, a mediator designated by the American Arbitration Association ("AAA") pursuant to its Construction Industry Mediation Rules. The mediation will be governed by and conducted pursuant to a mediation agreement negotiated by the parties or, if the parties cannot so agree, by procedures established by the mediator. Unless otherwise mutually agreed by Owner and Design-Builder and consistent with the mediator's schedule, the mediation shall commence within ninety (90) days of the submission of the dispute to mediation. Representatives of the parties with authority to resolve the dispute shall be present at any mediation.

10.3 Arbitration.

10.3.1 Any claims, disputes or controversies between the parties arising out of or relating to the Agreement, or the breach thereof, which have not been resolved in accordance with the procedures set forth in Section 10.2 above, shall be decided by arbitration in accordance with the Construction Industry Arbitration Rules of the AAA then in effect, unless the parties mutually agree otherwise.

10.3.2 The award of the arbitrator(s) shall be final and binding upon the parties without the right of appeal to the courts. Judgment may be entered upon it in accordance with applicable law by any court having jurisdiction thereof.

10.3.3 Design-Builder and Owner expressly agree that any arbitration pursuant to this Section 10.3 may be joined or consolidated with any arbitration involving any other person or entity (i) necessary to resolve the claim, dispute or controversy; or (ii) substantially involved in or affected by such claim, dispute or controversy. Both Design-Builder and Owner will include appropriate provisions in all contracts they execute with other parties in connection with the Project to require such joinder or consolidation.

10.3.4 The prevailing party in any arbitration, or any other final, binding dispute proceeding upon which the parties may agree, shall be entitled to recover from the other party reasonable attorneys' fees and expenses incurred by the prevailing party. The prevailing party, if any, shall be determined by the applicable binding dispute tribunal.

© 2022 Design-Build Institute of America

10.4 Duty to Continue Performance.

10.4.1 Unless provided to the contrary in the Contract Documents, Design-Builder shall continue to perform the Work and Owner shall continue to satisfy its payment obligations for undisputed amounts to Design-Builder as well as any further amounts pursuant to Section 9.4.3, pending the final resolution of any dispute or disagreement between Design-Builder and Owner.

10.5 CONSEQUENTIAL DAMAGES.

10.5.1 NOTWITHSTANDING ANYTHING HEREIN TO THE CONTRARY (EXCEPT AS SET FORTH IN SECTION 10.5.2 BELOW), NEITHER DESIGN-BUILDER NOR OWNER SHALL BE LIABLE TO THE OTHER FOR ANY CONSEQUENTIAL LOSSES OR DAMAGES, WHETHER ARISING IN CONTRACT, WARRANTY, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY OR OTHERWISE, INCLUDING BUT NOT LIMITED TO LOSSES OF USE, PROFITS, BUSINESS, REPUTATION OR FINANCING.

10.5.2 The consequential damages limitation set forth in Section 10.5.1 above is not intended to affect the payment of liquidated damages or lost early completion bonus, if any, set forth in Article 5 of the Agreement, which both parties recognize has been established, in part, to reimburse Owner or reward Design-Builder for some damages that might otherwise be deemed to be consequential.

Article 11

Stop Work and Termination

11.1 Owner's Right to Stop Work.

11.1.1 Owner may, without cause and for its convenience, order Design-Builder in writing to stop and suspend the Work. Such suspension shall not exceed sixty (60) consecutive days or aggregate more than ninety (90) days during the duration of the Project.

11.1.2 Design-Builder is entitled to seek an adjustment of the Contract Price and/or Contract Time(s) if its cost or time to perform the Work has been adversely impacted by any suspension of stoppage of the Work by Owner.

11.2 Owner's Right to Perform and Terminate for Cause.

11.2.1 If Design-Builder persistently fails to (i) provide a sufficient number of skilled workers, (ii) supply the materials required by the Contract Documents, (iii) comply with applicable Legal Requirements, (iv) timely pay, without cause, Design Consultants or Subcontractors, (v) prosecute the Work with promptness and diligence to ensure that the Work is completed by the Contract Time(s), as such times may be adjusted, or (vi) perform material obligations under the Contract Documents, then Owner, in addition to any other rights and remedies provided in the Contract Documents or by law, shall have the rights set forth in Sections 11.2.2 and 11.2.3 below.

11.2.2 Upon the occurrence of an event set forth in Section 11.2.1 above, Owner may provide written notice to Design-Builder that it intends to terminate the Agreement unless the problem cited is cured, or commenced to be cured, within seven (7) days of Design-Builder's receipt of such notice. If Design-Builder fails to cure, or reasonably commence to cure, such problem, then Owner may give a second written notice to Design-Builder of its intent to terminate within an additional seven (7) day period. If Design-Builder, within such second seven (7) day period, fails to cure, or reasonably commence to cure, such problem, then Owner may declare the Agreement terminated for default by providing written notice to Design-Builder of such declaration.

© 2022 Design-Build Institute of America

11.2.3 Upon declaring the Agreement terminated pursuant to Section 11.2.2 above, Owner may enter upon the premises and take possession, for the purpose of completing the Work, of all materials, equipment, scaffolds, tools, appliances and other items thereon, which have been purchased or provided for the performance of the Work, all of which Design-Builder hereby transfers, assigns and sets over to Owner for such purpose, and to employ any person or persons to complete the Work and provide all of the required labor, services, materials, equipment and other items. In the event of such termination, Design-Builder shall not be entitled to receive any further payments under the Contract Documents until the Work shall be finally completed in accordance with the Contract Documents. At such time, if the unpaid balance of the Contract Price exceeds the cost and expense incurred by Owner in completing the Work, such excess shall be paid by Owner to Design-Builder. Notwithstanding the preceding sentence, if the Agreement establishes a Guaranteed Maximum Price, Design-Builder will only be entitled to be paid for Work performed prior to its default. If Owner's cost and expense of completing the Work exceeds the unpaid balance of the Contract Price, then Design-Builder shall be obligated to pay the difference to Owner. Such costs and expense shall include not only the cost of completing the Work, but also losses, damages, costs and expense, including attorneys' fees and expenses, incurred by Owner in connection with the reprocurement and defense of claims arising from Design-Builder's default, subject to the waiver of consequential damages set forth in Section 10.5 hereof.

11.2.4 If Owner improperly terminates the Agreement for cause, the termination for cause will be converted to a termination for convenience in accordance with the provisions of Section 11.6 hereof.

11.3 Design-Builder's Right to Stop Work.

11.3.1 Design-Builder may, in addition to any other rights afforded under the Contract Documents or at law, stop the Work for the following reasons:

11.3.1.1 Owner's failure to provide financial assurances as required under Section 3.3 hereof; or

11.3.1.2 Owner's failure to pay amounts properly due under Design-Builder's Application for Payment.

11.3.2 Should any of the events set forth in Section 11.3.1 above occur, Design-Builder has the right to provide Owner with written notice that Design-Builder will stop the Work unless said event is cured within seven (7) days from Owner's receipt of Design-Builder's notice. Design-Builder shall not stop work unless it provides such written notice and Owner has failed to cure the reason for default within the seven (7) day cure period. If Owner does not cure the problem within such seven (7) day period, Design-Builder may stop the Work. In such case, Design-Builder shall be entitled to make a claim for adjustment to the Contract Price and Contract Time(s) to the extent it has been adversely impacted by such stoppage.

11.4 Design-Builder's Right to Terminate for Cause.

11.4.1 Design-Builder, in addition to any other rights and remedies provided in the Contract Documents or by law, may terminate the Agreement for cause for the following reasons:

11.4.1.1 The Work has been stopped for sixty (60) consecutive days, or more than ninety (90) days during the duration of the Project, because of court order, any government authority having jurisdiction over the Work, or orders by Owner under Section 11.1.1 hereof, provided that such stoppages are not due to the acts or omissions of Design-Builder or anyone for whose acts Design-Builder may be responsible.

11.4.1.2 Owner's failure to provide Design-Builder with any information, permits or approvals that are Owner's responsibility under the Contract Documents which result in the Work being stopped for sixty (60) consecutive days, or more than ninety (90) days during

© 2022 Design-Build Institute of America

the duration of the Project, even though Owner has not ordered Design-Builder in writing to stop and suspend the Work pursuant to Section 11.1.1 hereof.

11.4.1.3 Owner's failure to cure the problems set forth in Section 11.3.1 above after Design-Builder has stopped the Work.

11.4.2 Upon the occurrence of an event set forth in Section 11.4.1 above, Design-Builder may provide written notice to Owner that it intends to terminate the Agreement unless the problem cited is cured, or commenced to be cured, within seven (7) days of Owner's receipt of such notice. If Owner fails to cure, or reasonably commence to cure, such problem, then Design-Builder may give a second written notice to Owner of its intent to terminate within an additional seven (7) day period. If Owner, within such second seven (7) day period, fails to cure, or reasonably commence to cure, such problem, then Design-Builder may declare the Agreement terminated for default by providing written notice to Owner of such declaration. In such case, Design-Builder shall be entitled to recover in the same manner as if Owner had terminated the Agreement for its convenience under Article 8 of the Agreement.

11.5 Bankruptcy of Owner or Design-Builder.

11.5.1 If either Owner or Design-Builder institutes or has instituted against it a case under the United States Bankruptcy Code (such party being referred to as the "Bankrupt Party"), such event may impair or frustrate the Bankrupt Party's ability to perform its obligations under the Contract Documents. Accordingly, should such event occur:

11.5.1.1 The Bankrupt Party, its trustee or other successor, shall furnish, upon request of the non-Bankrupt Party, adequate assurance of the ability of the Bankrupt Party to perform all future material obligations under the Contract Documents, which assurances shall be provided within ten (10) days after receiving notice of the request; and

11.5.1.2 The Bankrupt Party shall file an appropriate action within the bankruptcy court to seek assumption or rejection of the Agreement within sixty (60) days of the institution of the bankruptcy filing and shall diligently prosecute such action.

If the Bankrupt Party fails to comply with its foregoing obligations, the non-Bankrupt Party shall be entitled to request the bankruptcy court to reject the Agreement, declare the Agreement terminated and pursue any other recourse available to the non-Bankrupt Party under this Article 11.

11.5.2 The rights and remedies under Section 11.5.1 above shall not be deemed to limit the ability of the non-Bankrupt Party to seek any other rights and remedies provided by the Contract Documents or by law, including its ability to seek relief from any automatic stays under the United States Bankruptcy Code or the right of Design-Builder to stop Work under any applicable provision of these General Conditions of Contract.

11.6 Termination for Convenience.

11.6.1 Upon ten (10) days' written notice to Design-Builder, Owner may, for its convenience and without cause, elect to terminate this Agreement. In such event, Owner shall pay Design-Builder for the following:

11.6.1.1 All Work executed and for proven loss, cost or expense in connection with the Work;

11.6.1.2 The reasonable costs and expenses attributable to such termination, including demobilization costs and amounts due in settlement of terminated contracts with Subcontractors and Design Consultants; and

11.6.1.3 The amount set forth in Article 8 of the Agreement.

© 2022 Design-Build Institute of America

11.6.2 If Owner terminates this Agreement pursuant to Section 11.6.1 above and proceeds to design and construct the Project through its employees, agents or third parties, Owner's rights to use the Work Product shall be as set forth in Section 4.3 of the Agreement. Such rights may not be transferred or assigned to others without Design-Builder's express written consent and such third parties' agreement to the terms of Article 4 of the Agreement.

Article 12

Electronic Data

12.1 Electronic Data.

12.1.1 The parties recognize that Contract Documents, including drawings, specifications and three-dimensional modeling (such as Building Information Models) and other Work Product may be transmitted among Owner, Design-Builder and others in electronic media as an alternative to paper hard copies (collectively "Electronic Data").

12.2 Transmission of Electronic Data.

12.2.1 Owner and Design-Builder shall agree upon the software and the format for the transmission of Electronic Data. Each party shall be responsible for securing the legal rights to access the agreed-upon format, including, if necessary, obtaining appropriately licensed copies of the applicable software or electronic program to display, interpret and/or generate the Electronic Data.

12.2.2 Neither party makes any representations or warranties to the other with respect to the functionality of the software or computer program associated with the electronic transmission of Work Product. Unless specifically set forth in the Agreement, ownership of the Electronic Data does not include ownership of the software or computer program with which it is associated, transmitted, generated or interpreted.

12.2.3 By transmitting Work Product in electronic form, the transmitting party does not transfer or assign its rights in the Work Product. The rights in the Electronic Data shall be as set forth in Article 4 of the Agreement. Under no circumstances shall the transfer of ownership of Electronic Data be deemed to be a sale by the transmitting party of tangible goods.

12.3 Electronic Data Protocol.

12.3.1 The parties acknowledge that Electronic Data may be altered or corrupted, intentionally or otherwise, due to occurrences beyond their reasonable control or knowledge, including but not limited to compatibility issues with user software, manipulation by the recipient, errors in transcription or transmission, machine error, environmental factors, and operator error. Consequently, the parties understand that there is some level of increased risk in the use of Electronic Data for the communication of design and construction information and, in consideration of this, agree, and shall require their independent contractors, Subcontractors and Design Consultants to agree, to the following protocols, terms and conditions set forth in this Section 12.3.

12.3.2 Electronic Data will be transmitted in the format agreed upon in Section 12.2.1 above, including file conventions and document properties, unless prior arrangements are made in advance in writing.

12.3.3 The Electronic Data represents the information at a particular point in time and is subject to change. Therefore, the parties shall agree upon protocols for notification by the author to the recipient of any changes which may thereafter be made to the Electronic Data, which protocol shall

© 2022 Design-Build Institute of America

also address the duty, if any, to update such information, data or other information contained in the electronic media if such information changes prior to Final Completion of the Project.

12.3.4 The transmitting party specifically disclaims all warranties, expressed or implied, including, but not limited to, implied warranties of merchantability and fitness for a particular purpose, with respect to the media transmitting the Electronic Data. However, transmission of the Electronic Data via electronic means shall not invalidate or negate any duties pursuant to the applicable standard of care with respect to the creation of the Electronic Data, unless such data is materially changed or altered after it is transmitted to the receiving party, and the transmitting party did not participate in such change or alteration.

Article 13

Miscellaneous

13.1 Confidential Information.

13.1.1 Confidential Information is defined as information which is determined by the transmitting party to be of a confidential or proprietary nature and: (i) the transmitting party identifies as either confidential or proprietary; (ii) the transmitting party takes steps to maintain the confidential or proprietary nature of the information; and (iii) the document is not otherwise available in or considered to be in the public domain. The receiving party agrees to maintain the confidentiality of the Confidential Information and agrees to use the Confidential Information solely in connection with the Project.

13.2 Assignment.

13.2.1 Neither Design-Builder nor Owner shall, without the written consent of the other assign, transfer or sublet any portion or part of the Work or the obligations required by the Contract Documents.

13.3 Successorship.

13.3.1 Design-Builder and Owner intend that the provisions of the Contract Documents are binding upon the parties, their employees, agents, heirs, successors and assigns.

13.4 Governing Law.

13.4.1 The Agreement and all Contract Documents shall be governed by the laws of the location of the Project, without giving effect to its conflict of law principles.

13.5 Severability.

13.5.1 If any provision or any part of a provision of the Contract Documents shall be finally determined to be superseded, invalid, illegal, or otherwise unenforceable pursuant to any applicable Legal Requirements, such determination shall not impair or otherwise affect the validity, legality, or enforceability of the remaining provision or parts of the provision of the Contract Documents, which shall remain in full force and effect as if the unenforceable provision or part were deleted.

13.6 No Waiver.

13.6.1 The failure of either Design-Builder or Owner to insist, in any one or more instances, on the performance of any of the obligations required by the other under the Contract Documents shall not be construed as a waiver or relinquishment of such obligation or right with respect to future

© 2022 Design-Build Institute of America

performance.

13.7 Headings.

13.7.1 The headings used in these General Conditions of Contract, or any other Contract Document, are for ease of reference only and shall not in any way be construed to limit or alter the meaning of any provision.

13.8 Notice.

13.8.1 Whenever the Contract Documents require that notice be provided to the other party, notice will be deemed to have been validly given (i) if delivered in person to the individual intended to receive such notice; (ii) four (4) days after being sent by registered or certified mail, postage prepaid to the address indicated in the Agreement; (iii) if transmitted by facsimile, by the time stated in a machine-generated confirmation that notice was received at the facsimile number of the intended recipient; or (iv) by electronic mail, by the time frame stated in the email-generated confirmation that notice was received by the email of the intended recipient.

13.9 Amendments.

13.9.1 The Contract Documents may not be changed, altered, or amended in any way except in writing signed by a duly authorized representative of each party.

Design-Build Institute of America - Contract Documents

LICENSE AGREEMENT

By using the DBIA Contract Documents, you agree to and are bound by the terms of this License Agreement.

1. **License.** The Design-Build Institute of America ("DBIA") provides DBIA Contract Documents and licenses their use worldwide. You acknowledge that DBIA Contract Documents are protected by the copyright laws of the United States. You have a limited nonexclusive license to: (a) Use DBIA Contract Documents on any number of machines owned, leased or rented by your company or organization; (b) Use DBIA Contract Documents in printed form for bona fide contract purposes; and (c) Copy DBIA Contract Documents into any machine-readable or printed form for backup or modification purposes in support of your permitted use.
2. **User Responsibility.** You assume sole responsibility for the selection of specific documents or portions thereof to achieve your intended results, and for the installation, use and results obtained from the DBIA Contract Documents. You acknowledge that you understand that the text of the DBIA Contract Documents has important legal consequences and that consultation with an attorney is recommended with respect to use or modification of the text. You will not represent that any of the contract documents you generate from DBIA Contract Documents are DBIA documents unless (a) the document text is used without alteration or (b) all additions and changes to, and deletions from, the text are clearly shown.
3. **Copies.** You may not use, copy, modify or transfer DBIA Contract Documents, or any copy, modification or merged portion, in whole or in part, except as expressly provided for in this license. Reproduction of DBIA Contract Documents in printed or machine-readable format for resale or educational purposes is expressly prohibited. You will reproduce and include DBIA's copyright notice on any printed or machine-readable copy, modification or portion merged into another document or program.
4. **Transfers.** You may not transfer possession of any copy, modification or merged portion of DBIA Contract Documents to another party, except that a party with whom you are contracting may receive and use such transferred material solely for purposes of its contract with you. You may not sublicense, assign or transfer this license except as expressly provided in this Agreement, and any attempt to do so is void.
5. **Term.** The license is effective for one year from the date of purchase. DBIA may elect to terminate it earlier, by written notice to you, if you fail to comply with any term or condition of this Agreement.
6. **Limited Warranty.** DBIA warrants the electronic files or other media by which DBIA Contract Documents are furnished to be free from defects in materials and workmanship under normal use during the Term. There is no other warranty of any kind, expressed or implied, including, but not limited to the implied warranties of merchantability and fitness for a particular purpose. Some states do not allow the exclusion of implied warranties, so the above exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state. DBIA does not warrant that the DBIA Contract Documents will meet your requirements or that the operation of DBIA Contract Documents will be uninterrupted or error free.
7. **Limitations of Remedies.** DBIA's entire liability and your exclusive remedy shall be: the replacement of any document not meeting DBIA's "Limited Warranty" which is returned to DBIA with a copy of your receipt, or at DBIA's election, your money will be refunded. In no event will DBIA be liable to you for any damages, including any lost profits, lost savings or other incidental or consequential damages arising out of the use or inability to use DBIA Contract Documents even if DBIA has been advised of the possibility of such damages, or for any claim by any other party. Some states do not allow the limitation or exclusion of liability for incidental or consequential damages, so the above limitation or exclusion may not apply to you.
8. **Acknowledgement.** You acknowledge that you have read this agreement, understand it and agree to be bound by its terms and conditions and that it will be governed by the laws of the District of Columbia. You further agree that it is the complete and exclusive statement of your agreement with DBIA which supersedes any proposal or prior agreement, oral or written, and any other communications between the parties relating to the subject matter of this agreement.

General Instructions

No.	Subject	Instruction
1.	Standard Forms	Standard form contracts have long served an important function in the United States and international construction markets. The common purpose of these forms is to provide an economical and convenient way for parties to contract for design and construction services. As standard forms gain acceptance and are used with increased frequency, parties are able to enter into contracts with greater certainty as to their rights and responsibilities.
2.	DBIA Standard Form Contract Documents	Since its formation in 1993, the Design-Build Institute of America ("DBIA") has regularly evaluated the needs of owners, design-builders and other parties to the design-build process in preparation for developing its own contract forms. Consistent with DBIA's mission of promulgating best design-build practices, DBIA believes that the design-build contract should reflect a balanced approach to risk that considers the legitimate interests of all parties to the design-build process. DBIA's Standard Form Contract Documents reflect a modern risk allocation approach, allocating each risk to the party best equipped to manage and minimize that risk, with the goal of promoting best design-build practices.
3.	Use of Non-DBIA Documents	To avoid inconsistencies among documents used for the same project, DBIA's Standard Form Contract Documents should not be used in conjunction with non-DBIA documents unless the non-DBIA documents are appropriately modified on the advice of legal counsel. Moreover, care should also be taken when using different editions of the DBIA Standard Form Documents on the same project to ensure consistency.
4.	Legal Consequences	DBIA Standard Form Contract Documents are legally binding contracts with important legal consequences. Contracting parties are advised and encouraged to seek legal counsel in completing or modifying these Documents.
5.	Reproduction	DBIA hereby grants to purchasers a limited license to reproduce its Documents consistent with the License Agreement accompanying these Documents. At least two original versions of the Agreement should be signed by the parties. Any other reproduction of DBIA Documents is strictly prohibited.
6.	Modifications	Effective contracting is accomplished when the parties give specific thought to their contracting goals and then tailor the contract to meet the unique needs of the project and the design-build team. For that reason, these Documents may require modification for various purposes including, for example, to comply with local codes and laws, or to add special terms. DBIA's latest revisions to its Documents provide the parties an opportunity to customize their contractual relationship by selecting various optional contract clauses that may better reflect the unique needs and risks associated with the project. Any modifications to these Documents should be initialed by the parties. At no time should a document be re-typed in its entirety. Re-creating the document violates copyright laws and destroys one of the advantages of standard forms – familiarity with the terms.
7.	Execution	It is good practice to execute two original copies of the Agreement. Only persons authorized to sign for the contracting parties may execute the Agreement.

Specific Instructions

Section	Title	Instruction
General	Purpose of This Agreement	DBIA Document No. 555, *Standard Form of Agreement Between Design-Builder and General Contractor – Lump Sum* (2022 Edition) ("Agreement"), sets forth the terms and conditions under which the construction of the Project will be performed and should be used when the parties intend that Design-Builder pay General Contractor on a lump sum basis. This Agreement can be used with DBIA Document No. 525, *Standard Form of Agreement Between Owner and Design-Builder – Lump Sum* (2022 Edition) or DBIA Document No. 530, *Standard Form of Agreement Between Owner and Design-Builder – Cost Plus Fee with an Option for a Guaranteed Maximum Price* (2022 Edition), and including DBIA Document No. 535, *Standard Form of General Conditions of Contract Between Owner and Design-Builder* (2022 Edition). It is also envisioned that Design-Builder and General Contractor will have worked together in the procurement of the prime contract. If the parties execute this Agreement after the Construction Documents are final, the Agreement should be modified accordingly.
General	Purpose of These Instructions	These Instructions are not part of this Agreement, but are provided to aid the parties in their understanding of the Agreement and in completing the Agreement.
General	Date	On Page 1, enter the date when both parties reach a final understanding. It is possible, due to logistical reasons, that the dates when the parties execute the Agreement may be different. Once both parties execute the Agreement, the effective date of the Agreement will be the date recorded on Page 1. This date does not, however, determine Contract Time, which is measured according to the terms of Article 5.
General	Parties: Design-Builder and General Contractor	On Page 1 enter the legal name and full address of Design-Builder, General Contractor and Owner, as well as the legal form of each entity, e.g., corporation, partnership, limited partnership, limited liability company, or other.
1.1	Pass Through	The section recognizes that General Contractor has the same rights, responsibilities and obligations as to Design-Builder as Design-Builder by the Design-Build Agreement has against and to Owner. However, because the Design-Build Agreement also affords Design-Builder and Owner many opportunities to customize their contractual relationship by the selection of optional provisions, DBIA does not believe that these optional provisions should automatically pass through to General Contractor. Accordingly, if Design-Builder and General Contractor believe it is appropriate to afford General Contractor the same rights, responsibilities and obligations as it relates to these optional provisions, the parties should make that clear by adding the necessary and appropriate provisions at Article 18 of this Agreement.
1.2	Definitions	Terms, words and phrases used in the Agreement shall have the same meanings used in the Design-Build Agreement between Owner and Design-Builder except to the extent set forth in Section 1.2.
1.3	Contract Documents	The Contract Documents are listed in Section 1.3 in the order of their precedence.
1.5	Mutual Obligations and Acknowledgements	This Agreement contemplates that Design-Builder and General Contractor have cooperated in the procurement of the Design-Build Agreement and that General Contractor has familiarized itself with the Design-Build Agreement.
2.12	Patents and Copyrights	General Contractor shall pay all license fees and royalties for items or processes it selects which are subject to copyrights or patent rights.
2.14.1	Government Approvals and Permits	General Contractor is responsible for obtaining the specific permits, approvals and licenses set forth in an exhibit to the Agreement.

© 2022 Design-Build Institute of America

Section	Title	Instruction
3.3.1	Furnishing of Information	Design-Builder shall furnish General Contractor with the listed Owner-provided information. General Contractor is entitled to rely on the Owner-provided information to the same extent Design-Builder is entitled to pursuant to the Design-Build Agreement.
5.1.1	Date of Commencement	General Contractor's obligation to commence work is triggered by its receipt of a Notice to Proceed unless the parties mutually agree otherwise.
5.2.1	Substantial Completion of the Entire Work	Enter the calendar days duration by which Substantial Completion has to be achieved. The parties should recognize that Owner and Design-Builder have the option of modifying the definition of Substantial Completion set forth in the General Conditions of Contract if they want to use a Temporary Certificate of Occupancy as the benchmark. If this option is selected, Design-Builder and General Contractor will need to do the same here.
5.2.2	Interim Milestones	It may be that some portions of the Work must be completed in phases or within a prescribed period of time to accommodate Design-Builder's or Owner's needs. The parties may, at their option, identify these portions of the Work to be completed prior to Substantial Completion of the entire Work. As presently drafted, no remedy is provided to General Contractor if an interim milestone is not met. If General Contractor has special requirements as it relates to interim milestones, Design-Builder may want to consider a remedy for General Contractor's failure to meet an interim milestone, as well as providing a bonus to General Contractor for an early satisfaction of such interim milestone.
5.4	Liquidated Damages	Design-Builder should make a good faith evaluation of the amount that is reasonably necessary to compensate it for delay. Design-Builder should not establish liquidated damages to penalize General Contractor. Section 5.4 establishes a grace period between the Scheduled Substantial Completion Date and the assessment of liquidated damages in order to prevent disputes as to which party bears responsibility for only a few days of delay. The parties should enter the calendar days that may pass following the Scheduled Substantial Completion Date before liquidated damages will be assessed. The parties are also provided the option of establishing liquidated damages if General Contractor fails to achieve Final Completion within a specified number of days after Substantial Completion. If this option is selected, the parties must negotiate both the number of days and the liquidated damages amount. In negotiating liquidated damages, the parties should keep in mind that the amount of liquidated damages for failing to achieve Final Completion should be a considerably scaled down amount and should reflect the financial harm to Design-Builder, which may include delay or liquidated damages Design-Builder may be liable for to Owner. In no case should the total amount of liquidated damages for the Project exceed an amount that is reasonably necessary to compensate Design-Builder for Project delay. The parties also have the option here of eliminating liquidated damages altogether, in which case Design-Builder can recover actual damages for Project delay at an amount that is capped by the parties. Design-Builder is cautioned that it may not be able to recover consequential damages, if they are waived by Design-Builder against General Contractor.
5.5.1	Early Completion Bonus	If the Project economics justify liquidated damages, then it is appropriate to couple these liquidated damages with an early completion bonus. The parties should enter the number of calendar days prior to the Scheduled Substantial Completion Date that will set the Bonus Date. Also, enter the amount of the bonus to be paid per day that will allow Design-Builder to share with General Contractor the economic benefits of early completion.

© 2022 Design-Build Institute of America

Section	Title	Instruction
6.1.1	Contract Price	Insert lump sum price Design-Builder will pay General Contractor for the Work.
6.2.1	Markups for Changes	Enter the markups agreed upon by Design-Builder and General Contractor to be used for pricing Changes to the Work.
7.2.1	Progress Payments	Enter the day of the month when General Contractor shall submit its Application for Payment.
7.2.4	Progress Payments	Enter the number of days Design-Builder shall make payment on General Contractor's properly submitted and accurate Application for Payment
7.3.1	Retainage on Progress Payments	Enter the percent Design-Builder will retain from Progress Payments to General Contractor. Note that the contract between Owner and Design-Builder may contain a number of ways to release retainage. The parties in this Agreement should be mindful of these options when developing this provision.
7.8.1	Interest	The parties should enter the rate at which interest will accrue on General Contractor's payments if unpaid five (5) days after due. Late payment creates a hardship for General Contractor and its Subcontractors.
7.12.1	Record Keeping	Design-Builder is provided access to, and the right to audit General Contractor's records with respect to changes in the Work. However, if the parties have agreed to multipliers or markups, the time to challenge and negotiate those percentages is at the time the parties execute the Agreement and not during the Project or after it has been completed. Accordingly, Design-Builder can at any time audit these percentages only to confirm that such percentage has been properly charged and not to challenge the composition of such percentage.
8.2.1.3	Termination for Convenience: Overhead and Profit	The parties should choose prior to execution of the Agreement the method that will be used to determine overhead and profit paid to General Contractor in the event Design-Builder terminates General Contractor for its convenience. The parties may choose to set percentage rates for overhead and profit prior to execution of the Agreement, or may choose to determine reasonable sums to be paid for overhead and profit at the time of the termination. If the parties choose to set overhead and profit rates prior to execution of the Agreement, the percentages should be entered in Section 8.2.1.3.
8.2.2	Termination for Convenience	If Design-Builder terminates General Contractor for convenience because Owner has terminated Design-Builder for its convenience, General Contractor is only entitled to receive such amount as Design-Builder receives from Owner on behalf of General Contractor.
8.5	General Contractor's Right to Terminate for Cause	If General Contractor properly terminates the Agreement for cause, it shall recover from Design-Builder in the same way as if Design-Builder had terminated the Agreement for convenience under Section 8.2 of the Agreement.
Article 9	Representatives of the Parties	Enter the name, title, address and telephone number of Design-Builder's Senior Representative and Design-Builder's Representative at Sections 9.1.1 and 9.1.2, respectively. Enter the name, title, address and telephone number of General Contractor's Senior Representative and General Contractor's Representative at Sections 9.2.1 and 9.2.2, respectively. The parties can elect to establish these Representatives during the performance of the Project rather than at the time of execution of this Agreement. If Representatives are identified after execution of the Agreement, an appropriate amendment should be made to the Agreement at the time these individuals are designated.

Section	Title	Instruction
10.1.1	General Contractor's Insurance Requirements	Attach an Insurance Exhibit setting forth in detail the insurance coverages General Contractor is required to provide for the Project. Parties are advised to familiarize themselves with the terms of Article 5 of the General Conditions of Contract, Insurance and Bonds, and to consult their insurance advisors.
10.1.2	Subcontractor's and Sub-Subcontractor's Insurance Requirements	General Contractor is obligated to require its Subcontractors and Sub-Subcontractors to provide the insurance coverage set forth in the Insurance Exhibit. Parties are advised to consult their insurance advisors.
10.1.3	Exclusions to Design-Build	Parties are advised that standard insurance policies may contain exclusions for the design-build delivery method. This Section 10.1.3 requires that any such exclusions be deleted from the policy.
10.4	Bonds and Other Performance Security	Enter the type and amount of bonds or other performance security required for the Project. Where bonding is not required by statute, Design-Builder may want to evaluate the project risk versus the bonding costs in deciding what type of performance security to require.
13.3	Disputes Involving Owner	Disputes for which Owner is responsible will be resolved in accordance with the dispute resolution clause in the Design-Build Agreement.
13.4	Disputes Not Involving Owner	DBIA endorses the use of partnering, negotiation, mediation and arbitration for the prevention and resolution of disputes. The Agreement provides for the parties' Representatives and Senior Representatives to attempt to negotiate the dispute. If this attempt fails, the dispute shall be submitted to mandatory, non-binding mediation. Any dispute that cannot be resolved by mediation shall then be submitted to binding arbitration pursuant to Section 13.5.
13.5	Arbitration	The prevailing party in any arbitration shall receive reasonable attorneys' fees from the other party. DBIA supports this "loser pays" provision to encourage parties to negotiate or mediate their differences and to minimize the number of frivolous disputes.
13.6	Duty to Continue Performance	Pending the resolution of any dispute, both Design-Builder and General Contractor shall continue to perform their respective duties under the Contract Documents, unless the parties provide otherwise in the Contract Documents.
13.7	Consequential Damages	DBIA believes that it is inappropriate for either Design-Builder or General Contractor to be responsible to the other for consequential damages arising from the Project. This limitation on consequential damages in no way restricts, however, the payment of liquidated damages, if any, under Article 5 of the Agreement.
Article 15	Electronic Data	Design-Builder will determine, after consultation with General Contractor, the software and format for the transmission of Electronic Data. The transmitting party disclaims all warranties with respect to the media transmitting the Electronic Data, but nothing in this Article is intended to negate duties with respect to the standard of care in creating the Electronic Data. In the event the Design-Build Agreement contains a conflicting provision governing Electronic Data, the provision in the Design-Build Agreement takes precedence.
Article 18	Other Provisions	Insert any other provisions. For example, the parties may elect to have disputes resolved through litigation rather than arbitration in which case the optional language in this Section should be included.

Standard Form of Agreement Between Design-Builder and General Contractor – Lump Sum

This document has important legal consequences. Consultation with an attorney is recommended with respect to its completion or modification.

This **AGREEMENT** is made as of the _____ day of _____ in the year of 20_____, by and between the following parties, for services in connection with the Project identified below:

DESIGN-BUILDER:
(Name and address)

GENERAL CONTRACTOR:
(Name and address)

PROJECT:
(Include Project name and location as it will appear in the Contract Documents)

OWNER:
(Name and address)

In consideration of the mutual covenants and obligations contained herein, Design-Builder and General Contractor agree as set forth herein.

© 2022 Design-Build Institute of America

Article 1

General

1.1 Basic Purpose.

1.1.1 Design-Builder has contracted with Owner to provide the services necessary for the design and construction of the Project as set forth in the Design-Build Agreement. General Contractor, through itself and its Subcontractors, agrees to provide all Work to complete the construction of the Project consistent with the Contract Documents. Design-Builder and General Contractor agree that to the extent applicable to the performance of the Work hereunder, General Contractor shall have the same rights, responsibilities and obligations as to Design-Builder as Design-Builder by the Design-Build Agreement has against and to Owner, except as may be modified herein. Notwithstanding the foregoing, if Design-Builder and Owner have checked boxes indicating the selection of optional provisions from the Design-Build Agreement, those optional provisions are only passed through to General Contractor to the extent those provisions have been expressly set forth in Article 18.

1.2 Basic Definitions.

1.2.1 Terms used in this Agreement shall have the meanings set forth in the Design-Build Agreement between Owner and Design-Builder unless otherwise provided herein, with the following specific terms defined as follows:

1.2.1.1 *Agreement* refers to this executed contract between Design-Builder and General Contractor under DBIA Document 555, *Standard Form of Agreement Between Design-Builder and General Contractor – Lump Sum* (2022 Edition).

1.2.1.2 *Construction Documents* are the documents consisting of Drawings and Specifications, to be prepared or assembled by Design-Builder in accordance with the Design-Build Agreement.

1.2.1.3 *Construction Schedule* refers to the schedule setting forth the dates by which General Contractor must perform the various stages of the Work, consistent with the Project Schedule.

1.2.1.4 *Contract Time(s)* refers to the dates set forth in Section 5.2 hereof.

1.2.1.5 *Day* or *Days* shall mean calendar days unless otherwise specifically noted in the Contract Documents.

1.2.1.6 *Design-Build Agreement* refers to the contract between Design-Builder and Owner for the design and construction of the Project under DBIA Document No. 525, *Standard Form of Agreement Between Owner Design-Builder – Lump Sum* (2022 Edition), DBIA Document No. 544, *Standard Form of Progressive Design-Build Agreement* (2022 Edition), or DBIA Document No. 545, *Progressive Design Agreement for Water and Wastewater* (2022 Edition), including the DBIA Document No. 535, *Standard Form of General Conditions of Contract Between Owner and Design-Builder* (2022 Edition), and all exhibits, attachments, and other Contract Documents enumerated and incorporated therein.

1.2.1.7 *Design Consultant* is a qualified, licensed design professional who is not an employee of Design-Builder, but is retained by Design-Builder, or employed or retained by anyone under contract with Design-Builder, to furnish design services required under the Design-Build Agreement.

1.2.1.8 *Final Completion* is the date on which all Work is complete in accordance with the Contract Documents, including but not limited to any items identified in the punch list prepared under Section 7.5.1 and the submission of all documents set forth in Section

© 2022 Design-Build Institute of America

7.6.2.

1.2.1.9 *Force Majeure Events* are those events that are beyond the control of General Contractor, Design-Builder and Owner, including the events of war, floods, labor disputes, earthquakes, epidemics, adverse weather conditions not reasonably anticipated and other acts of God.

1.2.1.10 *Hazardous Conditions* are any materials, wastes, substances and chemicals deemed to be hazardous under applicable Legal Requirements, or the handling, storage, remediation or disposal of which are regulated by applicable Legal Requirements.

1.2.1.11 *Legal Requirements* are all applicable federal, state and local laws, codes, ordinances, rules, regulations, orders and decrees of any government or quasi-government entity having jurisdiction over the parties, the Project or Site, the practices involved in the Project or Site, or any Work.

1.2.1.12 *Owner's Project Criteria* are developed by or for Owner to describe Owner's program requirements and objectives for the Project, including use, space, price, time, site and expandability requirements, as well as submittal requirements and other requirements governing Design-Builder's performance of the Work. Owner's Project Criteria may include conceptual documents, design criteria, design performance specifications, design specifications, and LEED® or other sustainable design criteria and other Project-specific technical materials and requirements.

1.2.1.13 *Project Schedule* refers to the schedule setting forth the dates by which the various stages of both the design and construction of the Project must be performed so as to satisfy Design-Builder's obligations to Owner.

1.2.1.14 *Site* is the land or premises on which the Project is located.

1.2.1.15 *Subcontractor* is any person or entity retained by General Contractor as an independent contractor to perform a portion of General Contractor's Work hereunder and shall include materialmen and suppliers.

1.2.1.16 *Sub-Subcontractor* is any person or entity retained by a Subcontractor as an independent contractor to perform any portion of the Subcontractor's work and shall include materialmen and suppliers.

1.2.1.17 *Substantial Completion or Substantially Complete* is the date on which the Project, or an agreed upon portion of the Project, is sufficiently complete in accordance with the Contract Documents so that Owner can occupy and use the Project or a portion thereof for its intended purposes.

1.2.1.18 *Work* is comprised of all General Contractor's construction and other services required by the Contract Documents, including procuring and furnishing all supervision, labor, inspection, testing, start-up, materials, tools, equipment, machinery, transportation, temporary utilities, temporary facilities and all other items and services reasonably inferable from this Agreement and the other Contract Documents.

1.3 Contract Documents.

1.3.1 The Contract Documents are comprised of the following:

1.3.1.1 All written modifications, amendments, minor changes and Change Orders to this Agreement;

© 2022 Design-Build Institute of America

1.3.1.2 This Agreement, including all exhibits (*list for example, performance standard requirements, performance incentive arrangements, markup exhibits, allowances, unit prices or exhibit detailing offsite reimbursable personnel*);

1.3.1.3 The Construction Documents; and

1.3.1.4 The Design-Build Agreement, but only to the extent the Design-Build Agreement relates to the Work and the terms and conditions under which the Work shall be performed.

1.4 Interpretation and Intent.

1.4.1 Design-Builder and General Contractor, prior to execution of the Agreement, shall carefully review all the Contract Documents for any conflicts or ambiguities. Design-Builder and General Contractor will discuss and resolve any identified conflicts or ambiguities prior to execution of the Agreement.

1.4.2 The Contract Documents are intended to be complementary and interpreted in harmony so as to avoid conflict, with words and phrases interpreted consistent with construction and design industry standards. In the event of any inconsistency, conflict or ambiguity between or among the Contract Documents, the Contract Documents shall take precedence in the order in which they are listed in Section 1.3 hereof.

1.5 Mutual Obligations and Acknowledgments.

1.5.1 Design-Builder and General Contractor commit at all times to cooperate fully with each other, and proceed on the basis of trust and good faith, to permit each party to realize the benefits afforded under the Contract Documents. Design-Builder and General Contractor shall perform their respective responsibilities, obligations and services in a timely manner to facilitate the other's timely and efficient performance and so as not to delay or interfere with the other's performance of its obligations under the Contract Documents.

1.5.2 Design-Builder and General Contractor acknowledge that they have cooperated with each other in the procurement of the Design-Build Agreement and that Design-Builder and General Contractor have met to review, discuss and familiarize themselves with the Design-Build Agreement.

1.6 Entire Agreement.

1.6.1 Subject to the limitation in Section 1.3.1, the Contract Documents, all of which are incorporated by reference into this Agreement, form the entire agreement between Design-Builder and General Contractor and are as fully binding on the parties as if repeated herein. No oral representations or other agreements have been made by the parties except as specifically stated in the Contract Documents.

Article 2

General Contractor's Services and Responsibilities

2.1 General.

2.1.1 Within seven (7) days after execution of this Agreement, Design-Builder and General Contractor will meet to discuss issues affecting the administration and schedule of the Work, and implement the necessary procedures, including but not limited to those relating to schedule updates, submittals and payment, to facilitate the ability of the parties to perform their obligations under this Agreement.

© 2022 Design-Build Institute of America

2.1.2 General Contractor's Representative shall be reasonably available to Design-Builder and shall have the necessary expertise and experience required to supervise the Work. General Contractor's Representative shall communicate regularly with Design-Builder and shall be vested with the authority to act on behalf of General Contractor. General Contractor shall replace its Representative upon the reasonable request of Design-Builder.

2.1.3 General Contractor shall only communicate with Owner, Design-Builder's Design Consultants, or separate contractors of Design-Builder or Owner through Design-Builder.

2.2 Review of Site and Contract Documents.

2.2.1 General Contractor represents that it has examined the Site and the Contract Documents prior to executing this Agreement so as to reasonably ascertain the nature of the Work and the various conditions affecting the Work.

2.2.2 General Contractor shall promptly report to Design-Builder any errors, inconsistencies, omissions, including without limitation variances, or violations of Legal Requirements contained within or omitted from the Contract Documents that General Contractor discovers. In such case, General Contractor will be entitled to any adjustment in the Contract Price and/or Contract Time to the extent General Contractor's cost and/or time of performance are adversely impacted by such errors, inconsistencies or omission. General Contractor shall be liable to Design-Builder for any damages resulting from any such errors, inconsistencies or omissions, or violations of Legal Requirements which General Contractor discovers and fails to report to Design-Builder. Nothing in this Agreement shall be deemed to transfer any design liability from Design-Builder to General Contractor.

2.3 Pre-Construction Services.

2.3.1 General Contractor shall assist Design-Builder regarding the selection of building systems, materials and equipment, as well as Project cost, schedule and construction feasibility studies. Such studies shall address, among other things, labor availability, construction costs and procurement strategies related to the requirements set forth in the Contract Documents.

2.3.2 General Contractor shall, if requested, make recommendations to Design-Builder regarding the preparation and issuance of Construction Documents for a portion of the Project to permit construction to proceed on that portion of the Project prior to completion of the Construction Documents for the entire Project.

2.3.3 General Contractor shall advise Design-Builder regarding a schedule for the procurement of items included in the Work which have long-lead times.

2.3.4 Design-Builder and General Contractor agree that prior to the scheduled date for submitting all design submissions to Owner, Design-Builder and General Contractor will hold meetings for the purpose of monitoring the design for consistency with the requirements of the Contract Documents, including General Contractor's List of Assumptions and Qualifications (if any).

2.4 Control Over Means and Methods.

2.4.1 General Contractor shall perform all construction activities efficiently and with the requisite expertise, skill and competence to satisfy the requirements of the Contract Documents and the Construction Schedule. General Contractor shall at all times exercise complete and exclusive control over the means, methods, sequences and techniques of construction.

2.5 Construction Schedule.

2.5.1 Unless a schedule for the execution of the Work has been attached to the Agreement as an exhibit at the time the Agreement is executed, General Contractor shall prepare and submit for

© 2022 Design-Build Institute of America

Design-Builder's review and response at least three (3) days prior to the meeting required by Section 2.1.1 hereof, a schedule for the execution of the Work in accordance with the Contract Documents, including any milestone dates which may be set forth in a separate exhibit to this Agreement. The schedule shall indicate the dates, consistent with those set forth in the Contract Documents for the start and completion of the various stages of the Work, including the dates when Design-Builder information and approvals are required to enable General Contractor to achieve the Contract Time(s).

The accepted schedule (the "Construction Schedule") shall be revised as required by conditions and progress of the Work, but such revisions shall not relieve General Contractor of its obligations to complete the Work within the Contract Time(s), as such dates may be adjusted in accordance with the Contract Documents. Design-Builder's review and acceptance of the Construction Schedule shall not be construed as relieving General Contractor of its complete and exclusive control over the means, methods, sequences and techniques for executing the Work. Design-Builder shall incorporate the Construction Schedule into the Project Schedule.

2.6 Status Report.

2.6.1 Unless the parties agree on a different time period for submission of a status report, General Contractor shall provide Design-Builder on a monthly basis a status report detailing the progress of the Work, including whether (i) the Work is proceeding according to the Construction Schedule; (ii) discrepancies, conflicts or ambiguities exist in the Contract Documents that require resolution; (iii) health and safety issues exist in connection with the Work; and (iv) other items exist which require resolution so as not to jeopardize General Contractor's ability to complete the Work for the Contract Price and within the Contract Time(s). Status reports shall be submitted with General Contractor's application for payment as a condition for payment.

2.7 Submittals and Substitutions.

2.7.1 In accordance with the Contract Documents and the Construction Schedule, General Contractor shall submit for Design-Builder's review and approval submittals, including shop drawings, product data and samples. Design-Builder shall advise General Contractor on or before the meeting required by Section 2.1.1 hereof of the submittal requirements for the Project. Any variances with the Construction Documents shall be specifically identified in General Contractor's submittals. Design-Builder's review and approval shall not relieve General Contractor of its responsibilities to perform the Work in accordance with the Construction Documents unless Design-Builder expressly approves in writing any such variance in its response to General Contractor's submittals. General Contractor shall make any necessary revisions to the submittals requested by Design-Builder.

2.7.2 General Contractor shall not make any substitutions in the Work or procedures or methods specified by Owner or Design-Builder for performing the Work unless it first receives written approval for such substitution from Design-Builder.

2.8 Subcontractors.

2.8.1 General Contractor shall employ only Subcontractors who are duly licensed and qualified to perform the Work consistent with the Contract Documents. Prior to the date that Subcontractors perform Work on the Project, General Contractor shall identify in writing to Design-Builder all Subcontractors. To the extent that General Contractor has not selected a Subcontractor prior to performing the Work, General Contractor shall provide Design-Builder in writing a list of any subsequently added Subcontractors prior to their performing Work on the Project. General Contractor shall not engage the services of any Subcontractor without first obtaining the approval of Design-Builder, which approval shall not be unreasonably withheld. Design-Builder may reasonably object to General Contractor's selection of any Subcontractor, provided that the Contract Price and/or Contract Time(s) shall be adjusted to the extent that Design-Builder's decisions impact Design-Builder's cost and/or time of performance. General Contractor agrees that

© 2022 Design-Build Institute of America

each Subcontractor shall be fully bound to General Contractor in the same manner as General Contractor is bound to Design-Builder for all the requirements of the Contract Documents to the extent applicable to the Subcontractor's scope of work. Design-Builder shall have the right, but not the obligation, to review and approve the form for each Subcontractor agreement. General Contractor may not substitute a listed Subcontractor without Design-Builder's prior written consent, such consent shall not be unreasonably withheld.

2.8.2 General Contractor assumes responsibility to Design-Builder for the proper performance of the work of Subcontractors and any acts and omissions in connection with such performance. General Contractor shall coordinate the activities of all Subcontractors. Nothing in this Agreement is intended or deemed to relieve General Contractor from responsibility for the work performed by its Subcontractors, or create any legal or contractual relationship between Owner or Design-Builder and any Subcontractor, including but not limited to any third-party beneficiary rights.

2.9 Work of Others.

2.9.1 If Design-Builder or Owner performs other work on the Project or at the Site with separate contractors under Design-Builder's or Owner's control, General Contractor agrees to reasonably cooperate with those separate contractors so that the Project can be completed in an orderly and coordinated manner without unreasonable disruption.

2.9.2 If any part of the Work depends upon other work performed by Design-Builder, or Design-Builder's or Owner's separate contractors, General Contractor shall, prior to proceeding with that part of the Work, inspect such other work and promptly notify Design-Builder of any discovered discrepancies or defects that would render it unacceptable for the proper performance of the Work. General Contractor shall not proceed with such part of the Work without further direction from Design-Builder. Design-Builder shall promptly correct or cause to be corrected any such discrepancy or defect in the other work. Except to the extent such discrepancies or defects in such other work are latent, General Contractor shall be liable for appropriate losses or damages incurred due to any discrepancies or defects in such other work not reported to Design-Builder by General Contractor.

2.10 Site Cleanup.

2.10.1 General Contractor shall keep the Site reasonably free from debris, trash and construction wastes to permit General Contractor to perform its construction services efficiently, safely and without interfering with the use of adjacent land areas. Upon Substantial Completion of the Work, or a portion of the Work, General Contractor shall remove all debris, trash, construction wastes, materials, equipment, machinery and tools arising from the Work or applicable portions thereof to permit Owner to occupy the Project or a portion of the Project for its intended use.

2.11 Inspection.

2.11.1 At all reasonable times, General Contractor shall provide sufficient facilities for inspection of the Work by Design-Builder at the Site and at all locations where portions of the Work are in progress or various stages of completion. When appropriate portions of the Work are ready for inspection, General Contractor shall notify Design-Builder.

2.12 Patents and Copyrights.

2.12.1 General Contractor shall pay all license fees and royalties due for items or processes applicable to the Work which are subject to copyrights or patent rights and which are selected by General Contractor.

2.13 Legal Requirements.

© 2022 Design-Build Institute of America

2.13.1 General Contractor shall perform the Work in accordance with all applicable Legal Requirements.

2.13.2 The Contract Price and/or Contract Time(s) shall be adjusted to compensate General Contractor for the effects, if any, of any changes in the Legal Requirements enacted after the date of the Agreement affecting the performance of the Work.

2.14 Government Approvals and Permits.

2.14.1 General Contractor shall obtain and pay for the necessary permits, approvals, licenses, government charges and inspection fees required for the prosecution of the Work as set forth in Exhibit _____.

2.14.2 General Contractor shall provide reasonable assistance to Design-Builder in obtaining those permits, approvals and licenses, if any, that are the responsibility of Owner or Design-Builder.

2.15 Project Safety.

2.15.1 General Contractor recognizes the importance of performing the Work in a safe manner so as to prevent damage, injury or loss to (i) all individuals at the Site, whether working or visiting; (ii) the Work, including materials and equipment incorporated into the Work or stored on-Site or off-Site; (iii) the work of others on the Project; and (iv) all other property at the Site or adjacent thereto. General Contractor assumes responsibility for implementing and monitoring all safety precautions and programs related to the performance of the Work. General Contractor shall, prior to commencing construction, designate a Safety Representative with the necessary qualifications and experience to supervise the implementation and monitoring of all safety precautions and programs related to the Work. Unless otherwise required by the Contract Documents, General Contractor's Safety Representative shall be an individual stationed at the Site who may have other responsibilities on the Project in addition to safety. The Safety Representative shall make routine daily inspections of the Work and shall hold weekly safety meetings with General Contractor's personnel, Subcontractors and others as applicable.

2.15.2 General Contractor and Subcontractors shall comply with all Legal Requirements relating to safety, as well as any Owner-specific and/or Design-Builder-specific safety requirements set forth in the Contract Documents or established for the Project, provided that such Owner-specific and/or Design-Builder-specific requirements do not violate any applicable Legal Requirement. General Contractor will immediately report in writing any safety-related injury, loss, damage or accident arising from the Work to Design-Builder's Representative and, to the extent mandated by Legal Requirements, to all government or quasi-government authorities having jurisdiction over safety-related matters involving the Project or the Work.

2.15.3 General Contractor's responsibility for safety under this Section 2.15 is not intended in any way to relieve Subcontractors or Sub-Subcontractors of their own contractual and legal obligations and responsibility for (i) complying with all Legal Requirements, including those related to health and safety matters, and (ii) taking all necessary measures to implement and monitor all safety precautions and programs to guard against injury, losses, damages or accidents resulting from their performance of the Work.

2.16 Warranty.

2.16.1 General Contractor warrants to Design-Builder that the construction, including all materials and equipment furnished as part of the construction, shall be new unless otherwise specified in the Contract Documents, of good quality, in conformance with the Contract Documents and free of defects in materials and workmanship. If the parties have opted in the Agreement to establish a limited time frame for the warranty set forth in this Section, the warranty in this section shall be limited to the time frame set forth in the Agreement. General Contractor's warranty obligation excludes defects caused by abuse, alterations or failure to maintain the Work in a commercially

© 2022 Design-Build Institute of America

reasonable manner. Nothing in this warranty is intended to limit any manufacturer's warranty which provides Owner and/or Design-Builder with greater warranty rights than set forth in this Section 2.16.1 or the Contract Documents. General Contractor will provide and, if requested, assign to Design-Builder all manufacturers' warranties upon Substantial Completion.

2.17 Correction of Defective Work.

2.17.1 General Contractor agrees to correct any of the Work that is found not to be in conformance with the Contract Documents, including that part of the Work subject to Section 2.16 hereof, within a period of one year from the date of Substantial Completion of the Work or any portion of the Work, or within such longer period to the extent required by any specific warranty included in the Contract Documents.

2.17.2 General Contractor shall, within seven (7) days of receipt of written notice from Design-Builder that the Work is not in conformance with the Contract Documents, take meaningful steps to commence correction of such nonconforming Work, including the correction, removal or replacement of the nonconforming Work and any damage caused to other parts of the Work or the Project affected by the nonconforming Work. If General Contractor fails to commence the necessary steps within such seven (7) day period, Design-Builder, in addition to any other remedies provided under the Contract Documents, may provide General Contractor with written notice that Design-Builder will commence correction of such nonconforming Work with its own forces. If Design-Builder does perform such corrective Work, General Contractor shall be responsible for all reasonable costs incurred by Design-Builder in performing such correction. If the nonconforming Work creates an emergency requiring an immediate response, the seven (7) day period identified herein shall be deemed inapplicable.

2.17.3 The one-year period referenced in Section 2.17.1 above applies only to General Contractor's obligation to correct nonconforming Work and is not intended to constitute a period of limitations for any other rights or remedies Design-Builder may have regarding General Contractor's obligations under the Contract Documents.

Article 3

Design-Builder's Services and Responsibilities

3.1 Timely Reviews and Approvals.

3.1.1 Design-Builder shall provide timely reviews and approvals of submittals consistent with the turnaround times set forth in the Construction Schedule.

3.1.2 Design-Builder shall timely inspect the Work in accordance with the Contract Documents and so as not to jeopardize General Contractor's ability to complete its Work by the Contract Time(s).

3.2 Design-Builder's Representative.

3.2.1 Design-Builder's Representative shall be responsible for providing Design-Builder-supplied information and approvals in a timely manner to permit General Contractor to fulfill its obligations under the Contract Documents.

3.3 Furnishing of Services and Information.

3.3.1 Unless expressly stated to the contrary in the Contract Documents, and to the extent Design-Builder has received such items from Owner, Design-Builder shall provide for General Contractor's information the items listed below. Design-Builder does not warrant the accuracy or completeness of such items provided, however, that General Contractor is entitled to rely on these

© 2022 Design-Build Institute of America

items to the same extent Design-Builder is entitled to rely upon such items in the Design-Build Agreement:

3.3.1.1 Surveys describing the property, boundaries, topography and reference points for use during construction, including existing service and utility lines;

3.3.1.2 Geotechnical studies describing subsurface conditions, and other surveys describing other latent or concealed physical conditions at the Site;

3.3.1.3 Temporary and permanent easements, zoning and other requirements and encumbrances affecting land use, or necessary to permit the proper construction of the Project and enable General Contractor to perform the Work;

3.3.1.4 A legal description of the Site;

3.3.1.5 Record drawings of any existing structures at the Site;

3.3.1.6 Environmental studies, reports and impact statements describing the environmental conditions, including Hazardous Conditions, in existence at the Site;

3.3.1.7 Owner's Project Criteria;

3.3.1.8 All permits, approvals and licenses set forth in the Owner's Permit List attached as an exhibit to the Design-Build Agreement; and

3.3.1.9 Test and inspection reports.

3.3.2 Design-Builder shall provide General Contractor with a copy of the Design-Build Agreement, including all exhibits, attachments and other Contract Documents enumerated and incorporated therein.

3.3.3 Upon General Contractor's reasonable request in writing, Design-Builder shall provide General Contractor with information in Design-Builder's possession regarding Owner's financial ability to pay for the Work set forth in this Agreement.

3.3.4 Design-Builder shall provide General Contractor with the Project Schedule and appropriate updates thereto.

3.3.5 Design-Builder shall provide General Contractor with the Construction Documents for the Project.

3.3.6 Design-Builder shall obtain those permits, approvals and licenses that are not required to be provided by Owner pursuant to the Design-Build Agreement or by General Contractor pursuant to Section 2.14 hereof. Design-Builder shall provide reasonable assistance to General Contractor in obtaining those permits, approvals and licenses that are General Contractor's responsibility.

3.4 Notification of Errors.

3.4.1 Design-Builder shall notify General Contractor of any errors, inconsistencies or omissions Design-Builder discovers in the Work. Notwithstanding anything to the contrary in this Agreement, nothing in this Agreement shall relieve General Contractor of responsibility for errors, inconsistencies or omissions in the Work.

3.5 Attendance at Design Meetings.

3.5.1 Design-Builder shall afford General Contractor and its Subcontractors the opportunity to attend all necessary design meetings with Owner, Designer and/or Design Consultants.

© 2022 Design-Build Institute of America

3.6 Review and Approval of Submittals.

3.6.1 Design-Builder shall review and approve submittals, including shop drawings, product data and samples, submitted by General Contractor. Design-Builder's review and approval of submittals shall be only for the purpose of confirming general conformance with the Construction Documents. Design-Builder's review and approval shall not relieve General Contractor of its responsibilities to perform the Work in accordance with the Construction Documents unless Design-Builder expressly approves in writing any such variance in its response to General Contractor's submittals. If revisions are necessary to a submittal prior to Design-Builder's approval, Design-Builder shall inform General Contractor of any such necessary revisions.

3.7 Design-Builder's Separate Contractors.

3.7.1 Design-Builder is responsible for all work performed on the Project or at the Site by separate contractors under Design-Builder's control. Design-Builder shall contractually require its separate contractors to cooperate with, and coordinate their activities so as not to interfere with, General Contractor's ability to timely complete its Work consistent with the Contract Documents.

Article 4

Hazardous Conditions and Differing Site Conditions

4.1 Hazardous Conditions.

4.1.1 Unless otherwise expressly provided in the Contract Documents to be part of the Work, General Contractor is not responsible for any Hazardous Conditions encountered at the Site. Upon encountering any Hazardous Conditions, General Contractor will stop work immediately in the affected area and duly notify Design-Builder and, if required by Legal Requirements, all government or quasi-government entities with jurisdiction over the Project.

4.1.2 General Contractor shall be obligated to resume work at the affected area of the Project only after Design-Builder provides General Contractor with a written certification from Design-Builder's or Owner's expert that (i) the Hazardous Conditions have been removed or rendered harmless and (ii) all necessary approvals have been obtained from all government and quasi-government entities having jurisdiction over the Project or Site. To the extent the Hazardous Condition is the responsibility of Owner, Design-Builder agrees to include General Contractor in discussions with Owner to resolve the matter. If Design-Builder and General Contractor are unable to resolve the matter with Owner, the matter will be resolved in accordance with Section 13.3 hereof.

4.1.3 General Contractor will be entitled, in accordance with the Contract Documents, to an adjustment in its Contract Price and/or Contract Time(s) to the extent General Contractor's cost and/or time of performance have been adversely impacted by the presence of Hazardous Conditions.

4.1.4 As provided in the Design-Build Agreement, Design-Builder has caused Owner, to the fullest extent permitted by law, to indemnify, defend and hold harmless General Contractor, anyone employed directly or indirectly by General Contractor, and their officers, directors, employees and agents, from and against any and all claims, losses, damages, liabilities and expenses, including reasonable attorneys' fees and expenses, arising out of or resulting from the presence, removal or remediation of Hazardous Conditions at the Site.

4.1.5 Notwithstanding the preceding provisions of this Section 4.1, General Contractor is responsible for Hazardous Conditions introduced to the Site by itself, Subcontractors, Sub-Subcontractors or anyone for whose acts they may be liable. To the fullest extent permitted by law,

© 2022 Design-Build Institute of America

General Contractor shall indemnify, defend and hold harmless Owner, Design-Builder and their officers, directors, employees and agents from and against all claims, losses, damages, liabilities and expenses, including attorneys' fees and expenses, arising out of or resulting from those Hazardous Conditions introduced to the Site by General Contractor, Subcontractors, Sub-Subcontractors or anyone for whose acts they may be liable.

4.2 Differing Site Conditions.

4.2.1 Concealed or latent physical conditions or subsurface conditions at the Site that (i) materially differ from the conditions indicated in the Contract Documents or (ii) are of an unusual nature, differing materially from the conditions ordinarily encountered and generally recognized as inherent in the Work are collectively referred to herein as "Differing Site Conditions." If General Contractor encounters a Differing Site Condition, General Contractor will be entitled to an adjustment in the Contract Price and/or Contract Time(s) to the extent General Contractor's cost and/or time of performance are adversely impacted by the Differing Site Condition. However, to the extent the Differing Site Condition is the contractual responsibility of Owner, Design-Builder agrees to include General Contractor in its discussions with Owner to resolve the matter. If Design-Builder and General Contractor are unable to resolve the matter with Owner, the matter will be resolved in accordance with Section 13.3 hereof.

4.2.2 Upon encountering a Differing Site Condition, General Contractor shall provide prompt written notice to Design-Builder of such condition, which notice shall be provided in accordance with Contract Documents and within sufficient time to permit Design-Builder to meet its notice requirements to Owner contained in the Design-Build Agreement. General Contractor shall, to the extent reasonably possible, provide such notice before the Differing Site Condition has been substantially disturbed or altered.

Article 5

Contract Time

5.1 Date of Commencement.

5.1.1 The Work shall commence five (5) days after General Contractor's receipt of Design-Builder's Notice to Proceed ("Date of Commencement") unless the parties mutually agree otherwise in writing.

5.2 Substantial Completion and Final Completion.

5.2.1 Substantial Completion of the entire Work shall be achieved no later than _____ _____(_____) calendar days after the Date of Commencement ("Scheduled Substantial Completion Date").

5.2.2 Interim milestones and/or Substantial Completion of identified portions of the Work shall be achieved as set forth in Exhibit _____, and shall be reflected in the Construction Schedule along with the dates for completing other activities.

5.2.3 Final Completion of the Work or identified portions of the Work shall be achieved as expeditiously as reasonably practicable.

5.2.4 All of the dates set forth in this Article 5 (collectively "Contract Time(s)") shall be subject to adjustment in accordance with this Agreement.

5.3 Time is of the Essence.

© 2022 Design-Build Institute of America

5.3.1 Design-Builder and General Contractor mutually agree that time is of the essence with respect to the dates and times set forth in the Contract Documents and the Project Schedule.

5.4 Liquidated Damages.

5.4.1 General Contractor understands that if Substantial Completion is not attained by the Scheduled Substantial Completion Date, Design-Builder will suffer damages which are difficult to specify accurately and ascertain. General Contractor agrees that if Substantial Completion is not attained by _____(_____) days after the Scheduled Substantial Completion Date (the "LD Date"), General Contractor shall pay Design-Builder _____ _____ dollars ($_____) as liquidated damages for each day that Substantial Completion extends beyond the LD Date. The liquidated damages provided herein shall be in lieu of all liability for any and all extra costs, losses, expenses, claims, penalties and any other damages, whether special or consequential, and of whatsoever nature incurred by Design-Builder which are occasioned by any delay in achieving Substantial Completion.

☐ General Contractor understands that if Final Completion is not achieved within _____ _____ days of the Substantial Completion Date, Design-Builder will suffer damages which are difficult to determine and accurately specify. General Contractor agrees that if Final Completion is not achieved within _____(_____) days of Substantial Completion, General Contractor shall pay to Design-Builder _____Dollars ($_____), as liquidated damages for each calendar day that Final Completion is delayed beyond the above-referenced number of days.

☐ General Contractor and Design-Builder agree that the maximum aggregate liability General Contractor has for any liquidated damages that may be assessed under this Agreement for failure to achieve the Contract Time(s) shall be _____Dollars ($_____).

[In lieu of the language in Section 5.4.1 above, General Contractor and Design-Builder may want to include the following language:]

☐ General Contractor and Design-Builder have agreed not to provide for liquidated damages in this Agreement for failure of General Contractor to achieve the Contract Time(s) set forth in this Article 5. General Contractor understands, however, that Design-Builder may suffer actual damages in the event the Contract Time(s) set forth herein are not timely achieved. Design-Builder shall be able to recover such actual damages from General Contractor

(i) to the extent it can demonstrate that actual damages have been incurred,
(ii) are directly related and caused by General Contractor's failure to meet the Contract Time(s) set forth herein, and
(iii) are not waived by Section 13.7 of this Agreement. Notwithstanding the foregoing, in no event shall General Contractor's liability for actual damages for delays exceed _____ Dollars ($_____).

(If liquidated damages are applicable to any dates set forth in Section 5.2.2 hereof, this Section 5.4 will need to be modified accordingly.)

5.5 Early Completion Bonus.

5.5.1 If Substantial Completion is attained on or before _____ (_____) days before the Scheduled Substantial Completion Date (the "Bonus Date"), Design-Builder shall pay General Contractor at the time of final payment under Section 7.6 hereof an early completion bonus of _____dollars ($_____) for each day that Substantial Completion is attained earlier than the Bonus Date.

© 2022 Design-Build Institute of America

(If an early completion bonus is applicable to any dates set forth in Section 5.2.2 hereof, this Section 5.5 will need to be modified accordingly.)

☐ General Contractor and Design-Builder agree that the maximum aggregate amount that General Contractor shall receive as the early Completion Bonus is _____ Dollars ($_____).

5.6 Delays to the Work.

5.6.1 If General Contractor is delayed on the critical path in the performance of its Work due to acts, omissions, conditions, events or circumstances beyond its control and due to no fault of its own or those for whom General Contractor is responsible, the Contract Time(s) for performance shall be reasonably extended by Change Order. By way of example, events that may entitle General Contractor to an extension of the Contract Time(s) include acts or omissions of Design-Builder, Owner or anyone under Design-Builder's or Owner's control (including separate contractors), changes in the Work, Differing Site Conditions, Hazardous Conditions and Force Majeure Events.

5.6.2 In addition to General Contractor's right to a time extension for those events set forth in Section 5.6.1 above, General Contractor shall also be entitled to an appropriate adjustment of the Contract Price provided, however, that the Contract Price shall not be adjusted for Force Majeure Events unless otherwise provided in Article 18.

5.6.3 Notwithstanding any other provision to the contrary, any delay and resulting damages that arise out of, or relate to, problems caused by Owner or for which Owner is responsible shall be resolved pursuant to Section 13.3 hereof.

5.6.4 If the Project is delayed due to General Contractor or anyone for whom General Contractor is responsible, and not due to Design-Builder or Owner, in addition to its obligations to pay Design-Builder liquidated damages pursuant to Section 5.4 above, General Contractor shall, at the direction of Design-Builder and at General Contractor's own cost and expense, work such overtime and take such other measures as may be necessary to make up for all time lost in the completion of the Project due to such delay.

Article 6

Contract Price

6.1 Contract Price.

6.1.1 Design-Builder shall pay General Contractor in accordance with Article 7 hereof the sum of _____ dollars ($_____) ("Contract Price"), subject to adjustments made in accordance with the Contract Documents. Unless otherwise provided in the Contract Documents, the Contract Price is deemed to include all sales, use, consumer and other taxes mandated by applicable Legal Requirements. The parties acknowledge that the Contract Price herein is based upon General Contractor's List of Assumptions and Qualifications attached as Exhibit _____ hereto. To the extent General Contractor is required to perform work which is not consistent with its List of Assumptions and Qualifications, General Contractor shall be entitled to an adjustment in the Contract Price pursuant to Article 12 of this Agreement. Notwithstanding the above, Design-Builder is not responsible for General Contractor's bidding or estimating mistakes or miscalculation of market conditions.

6.2 Markups for Changes.

© 2022 Design-Build Institute of America

6.2.1 If the Contract Price requires an adjustment due to changes in the Work, and the cost of such changes is determined under Sections 12.6.1.3 or 12.6.1.4 hereof, the following markups shall be allowed on such changes:

6.2.1.1 For additive Change Orders, including additive Change Orders arising from both additive and deductive items, it is agreed that General Contractor shall receive a Fee of _____ percent (_____ %) of the additional Costs of the Work incurred for that Change Order, plus any other markups set forth at Exhibit hereto.

6.2.1.2 For deductive Change Orders, including deductive Change Orders arising from both additive and deductive items, the deductive amounts shall include:

[Check one box only.]

☐ No additional reduction to account for General Contractor's Fee or any other markup.

or

☐ An amount equal to the sum of: (a)_____percent (_____ %) applied to the direct costs of the net reduction (which amount will account for a reduction associated with General Contractor's Fee); plus (b) any other markups set forth at Exhibit _____ hereto applied to the direct costs of the net reduction.

Article 7

Procedure for Payment

7.1 Schedule of Values.

7.1.1 Unless required by Design-Builder upon execution of this Agreement, within ten (10) days of execution of the Agreement, General Contractor shall submit for Design-Builder's review and approval a schedule of values for all of the Work. The Schedule of Values will (i) subdivide the Work into its respective parts; (ii) include values for all items comprising the Work; and (iii) serve as the basis for monthly progress payments made to General Contractor throughout the work.

7.2 Progress Payments.

7.2.1 Beginning with the first month after the Date of Commencement, General Contractor shall submit on the _____ (_____) day of each month for Design-Builder's review and approval, General Contractor's Application for Payment requesting payment for all Work performed as of the date of the Application for Payment. The Application for Payment shall be accompanied by all supporting documentation required by the Contract Documents and/or established at the meeting required by Section 2.1.1 hereof. Design-Builder will submit General Contractor's proper Application for Payment to Owner with Design-Builder's application.

7.2.2 The Application for Payment may request payment for equipment and materials not yet incorporated into the Project, provided that (i) Design-Builder is satisfied that the equipment and materials are suitably stored at either the Site or another acceptable location; (ii) the equipment and materials are protected by suitable insurance; and (iii) upon payment, Design-Builder will receive the equipment and materials free and clear of all liens and encumbrances.

7.2.3 The Application for Payment shall constitute General Contractor's representation that the Work has been performed consistent with the Contract Documents, has progressed to the point indicated in the Application for Payment, and that title to all Work will pass to Owner free and clear of all claims, liens, encumbrances and security interests upon the incorporation of the Work into the Project, or upon General Contractor's receipt of payment, whichever occurs earlier.

© 2022 Design-Build Institute of America

7.2.4 Design-Builder shall make payment on General Contractor's properly submitted and accurate Application for Payment within _____days after Design-Builder's receipt of payment from Owner on account of General Contractor's monthly Application for Payment, but in each case less the total of payments previously made, and less amounts properly withheld under this Agreement.

7.2.5 All discounts offered by Subcontractors, Sub-Subcontractors and suppliers to General Contractor for early payment shall accrue one hundred percent to General Contractor to the extent General Contractor advances payment. Unless Design-Builder advances payment to General Contractor specifically to receive the discount, General Contractor may include in its Application for Payment the full undiscounted cost of the item for which payment is sought.

7.3 Retainage on Progress Payments.

7.3.1 Design-Builder will retain from each of General Contractor's Application for Payment ____ _____ percent (_____%). Unless mutually agreed otherwise between the parties, retainage will be included in Design-Builder's final payment to General Contractor, provided Design-Builder has received such retained amounts from Owner.

7.4 Withholding of Payments.

7.4.1 If Design-Builder determines that General Contractor is not entitled to all or part of an Application for Payment, it will notify General Contractor in writing at least five (5) days prior to the date payment is due. The notice shall indicate the specific amounts Design-Builder intends to withhold, the reasons and contractual basis for the withholding, and the specific measures General Contractor must take to rectify Design-Builder's concerns. Design-Builder and General Contractor will attempt to resolve Design-Builder's concerns prior to the date payment is due. If the parties cannot resolve such concerns, Design-Builder shall pay General Contractor the uncontested amount of the Application for Payment, and General Contractor may pursue its rights under the Contract Documents, including those under Article 13 hereof.

7.5 Substantial Completion.

7.5.1 General Contractor shall notify Design-Builder when it believes the Work, or to the extent permitted in the Contract Documents, a portion of the Work, is substantially complete. Within five (5) days of Design-Builder's receipt of General Contractor's notice, Owner, Design-Builder and General Contractor will jointly inspect such Work to verify that it is substantially complete in accordance with the requirements of the Contract Documents. If such Work is substantially complete, Design-Builder shall prepare and issue a Certificate of Substantial Completion that will set forth (i) the date of Substantial Completion of the Work or portion thereof; (ii) the remaining items of Work that have to be completed before final payment; (iii) provisions (to the extent not already provided in the Contract Documents) establishing Design-Builder's and General Contractor's responsibility for the Project's security, maintenance, utilities and insurance pending final payment; and (iv) an acknowledgment that warranties commence to run on the date of Substantial Completion, except as may otherwise be noted in the Certificate of Substantial Completion.

7.5.2 Within fifteen (15) days after Substantial Completion of the entire Work or, if applicable, any portion of the Work, and payment to Design-Builder from Owner, Design-Builder shall release to General Contractor all retained amounts relating, as applicable, to the entire Work or completed portion of the Work, less an amount equal to: (i) the reasonable value of all remaining or incomplete items of Work as noted in the Certificate of Substantial Completion; and (ii) all other amounts Design-Builder is entitled to withhold pursuant to Section 7.4.

© 2022 Design-Build Institute of America

7.5.3 Design-Builder, at its option, may use a portion of the Work which has been determined to be substantially complete provided that (i) a Certificate of Substantial Completion has been issued for the portion of Work addressing the items set forth in Section 7.5.1 above; (ii) General Contractor and Design-Builder have obtained the consent of their sureties and insurers, and to the extent applicable, the appropriate government authorities having jurisdiction over the Project; and (iii) Design-Builder and General Contractor agree that Design-Builder's and/or Owner's use or occupancy will not interfere with General Contractor's completion of the remaining Work.

7.6 Final Payment.

7.6.1 General Contractor shall submit its Final Application for Payment to Design-Builder in accordance with Section 7.6.2 below. Design-Builder shall make payment on General Contractor's properly submitted and accurate Final Application for Payment within ten (10) days after Design-Builder's receipt of final payment from Owner on account of General Contractor's Final Application for Payment, provided also that General Contractor has satisfied the requirements for final payment set forth in Section 7.6.2 below.

7.6.2 At the time of submission of its Final Application for Payment, General Contractor shall provide the following information:

7.6.2.1 an affidavit that there are no claims, obligations or liens outstanding or unsatisfied for labor, services, material, equipment, taxes or other items performed, furnished or incurred for or in connection with the Work which will in any way affect Design-Builder's or Owner's interests;

7.6.2.2 a general release executed by General Contractor waiving, upon receipt of final payment by General Contractor, all claims, except those claims previously made in writing to Design-Builder and remaining unsettled at the time of final payment;

7.6.2.3 consent of General Contractor's surety, if any, to final payment;

7.6.2.4 all operating manuals, warranties and other deliverables required by the Contract Documents; and

7.6.2.5 certificates of insurance confirming that required coverages will remain in effect consistent with the requirements of the Contract Documents.

7.6.3 Upon making final payment, Design-Builder waives all claims against General Contractor except claims relating to (i) General Contractor's failure to satisfy its payment obligations, if such failure affects Design-Builder's or Owner's interests; (ii) General Contractor's failure to complete the Work consistent with the Contract Documents, including defects appearing after Substantial Completion; and (iii) the terms of any special warranties required by the Contract Documents.

7.7 Pay When Paid.

7.7.1 General Contractor agrees that all payments to General Contractor hereunder, whether progress or final payment, or for changes or delays to the Work, shall not be due until after Design-Builder actually receives payment on account of same from Owner. Notwithstanding the preceding sentence, Design-Builder shall pay General Contractor within a reasonable time if it has not been paid by Owner unless Owner's failure to pay Design-Builder is caused by General Contractor's failure to perform in accordance with this Agreement.

7.8 Interest.

7.8.1 Payments due and unpaid under this Agreement shall bear interest commencing five (5) days after payment is due at the rate of _____percent (_____%) per month until paid.

© 2022 Design-Build Institute of America

7.9 Advance Payments.

7.9.1 Design-Builder has the right, at its sole option, to advance any payment due General Contractor under this Agreement.

7.10 Payment Not Acceptance.

7.10.1 No payment to General Contractor under this Agreement shall be evidence of, or construed to be, acceptance of defective, faulty, improper or non-conforming work.

7.11 General Contractor's Payment Obligations.

7.11.1 General Contractor will pay Subcontractors, in accordance with its contractual obligations to such parties, all the amounts General Contractor has received from Design-Builder on account of their work. General Contractor will impose similar requirements on Subcontractors to pay those parties with whom they have contracted. General Contractor will indemnify and defend Owner and Design-Builder against any claims for payment and mechanic's liens as set forth in Section 11.3 hereof, providing Design-Builder is not in breach of its contractual obligations to make undisputed payment to General Contractor for its Work.

7.12 Record Keeping and Finance Controls.

7.12.1 With respect to changes in the Work performed on a cost basis by General Contractor pursuant to the Contract Documents, General Contractor shall keep full and detailed accounts and exercise such controls as may be necessary for proper financial management, using accounting and control systems in accordance with generally accepted accounting principles and as may be provided in the Contract Documents. During the performance of the Work and for a period of three (3) years after final payment of the Work, Design-Builder and Design-Builder's accountants shall be afforded access to and the right to audit from time to time, upon reasonable notice, General Contractor's records, books, correspondence, receipts, subcontracts, purchase orders, vouchers, memoranda and other data relating to changes in the Work, all of which General Contractor shall preserve for a period of three (3) years after final payment. Such inspection shall take place at General Contractor's offices during normal business hours unless another location and time is agreed to by the parties. Any multipliers or markups agreed to by General Contractor and Design-Builder as part of this Agreement are only subject to audit to confirm that such multiplier or markup has been charged in accordance with this Agreement, with the composition of such multiplier or markup not being subject to audit.

Article 8

Stop Work and Termination

8.1 Design-Builder's Right to Stop Work.

8.1.1 Design-Builder may, without cause and for its convenience, order General Contractor in writing to stop and suspend the Work. Such suspension shall not exceed sixty (60) consecutive days or aggregate more than ninety (90) days during the duration of the Project.

8.1.2 General Contractor is entitled to seek an adjustment of the Contract Price and/or Contract Time(s) if its cost or time to perform the Work has been adversely impacted by any suspension or stoppage of work by Design-Builder. Notwithstanding anything to the contrary herein, if Design-Builder's suspension of the Work is the result of Owner's suspension of Design-Builder's work under the Design-Build Agreement, then Design-Builder shall pay General Contractor only those amounts Design-Builder actually receives from Owner on account of the Work.

© 2022 Design-Build Institute of America

8.2 Design-Builder's Right to Terminate for Convenience.

8.2.1 Upon ten (10) days' written notice to General Contractor, Design-Builder may, for its convenience and without cause, elect to terminate this Agreement. In such event, Design-Builder shall pay General Contractor for the following:

8.2.1.1 All Work executed and for proven loss, cost or expense in connection with the Work;

8.2.1.2 The reasonable costs and expenses attributable to such termination, including amounts due in settlement of terminated contracts with Subcontractors; and

8.2.1.3 ***[Choose one of the following.]***

☐ The fair and reasonable sums for overhead and profit on the sum of items 8.2.1.1 and 8.2.1.2 above.

or

☐ Overhead and profit in the amount of _____percent (_____ %) on the sum of items 8.2.1.1 and 8.2.1.2 above.

8.2.2 If Design-Builder's termination of General Contractor for convenience is the result of Owner's termination of Design-Builder for convenience under the Design-Build Agreement, then Design-Builder shall pay General Contractor only those amounts Design-Builder actually receives from Owner on behalf of General Contractor.

8.3 Design-Builder's Right to Terminate for Cause.

8.3.1 If General Contractor persistently fails to (i) provide a sufficient number of skilled workers, (ii) supply the materials required by the Contract Documents, (iii) comply with applicable Legal Requirements, (iv) timely pay, without cause, its Subcontractors, (v) prosecute the Work with promptness and diligence to ensure that the Work is completed by the Contract Time(s), as such times may be adjusted, or (vi) perform material obligations under the Contract Documents, then Design-Builder shall have the rights, in addition to any other rights and remedies provided in the Contract Documents or by law, set forth in Sections 8.3.2 and 8.3.3 below.

8.3.2 Upon the occurrence of an event set forth in Section 8.3.1 above, Design-Builder may provide written notice to General Contractor that it intends to terminate the Agreement unless the problem cited is cured, or commenced to be cured, within seven (7) days of General Contractor's receipt of such notice. If General Contractor fails to cure, or reasonably commence to cure, such problem, then Design-Builder may give a second written notice to General Contractor of its intent to terminate within an additional seven (7) day period. If General Contractor, within such second seven (7) day period, fails to cure, or reasonably commence to cure, such problem, then Design-Builder may declare the Agreement terminated for default by providing written notice to General Contractor of such declaration.

8.3.3 Upon declaring the Agreement terminated pursuant to Section 8.3.2 above, Design-Builder may enter upon the premises and take possession, for the purpose of completing the Work, of all materials, equipment, scaffolds, tools, appliances and other items thereon, which have been purchased or provided for the performance of the Work, all of which General Contractor hereby transfers, assigns and sets over to Design-Builder for such purpose, and to employ any person or persons to complete the Work and provide all of the required labor, services, materials, equipment and other items. In the event of such termination, General Contractor shall not be entitled to receive any further payments under the Contract Documents until the Work shall be finally completed in accordance with the Contract Documents. At such time, if the unpaid balance of the Contract Price exceeds the cost and expense incurred by Design-Builder in completing the Work, such excess shall be paid by Design-Builder to General Contractor. If Design-Builder's cost and expense of

© 2022 Design-Build Institute of America

completing the Work exceeds the unpaid balance of the Contract Price, then General Contractor shall be obligated to pay the difference to Design-Builder. Such costs and expense shall include not only the cost of completing the Work, but also losses, damages, costs and expenses, including attorneys' fees and expenses, incurred by Design-Builder in connection with the reprocurement and defense of claims arising from General Contractor's default, subject to the waiver of consequential damages set forth in Section 13.7 hereof.

8.3.4 If Design-Builder improperly terminates the Agreement for cause, the termination for cause will be converted to a termination for convenience in accordance with the provisions of Section 8.2 of the Agreement.

8.4 General Contractor's Right to Stop Work.

8.4.1 If (i) Owner fails to pay undisputed amounts due to Design-Builder under the Design-Build Agreement for work performed by General Contractor, such failure is not due to the fault of General Contractor, and General Contractor has not been paid such amounts due, or (ii) Design-Builder fails to pay any amounts due to General Contractor under this Agreement, General Contractor may, in addition to any other rights afforded under the Contract Documents or at law, stop work in accordance with Section 8.4.2.

8.4.2 General Contractor shall provide Design-Builder with written notice that General Contractor will stop work unless said failure to pay the amount is not cured within seven (7) days from Design-Builder's receipt of General Contractor's notice. General Contractor shall not stop work unless it provides such written notice and the Design-Builder has failed to cure the reason for default within the seven (7) day cure period. If Design-Builder does not cure the problem within such seven (7) day period, General Contractor may stop work. In such case, General Contractor shall be entitled to make a claim for adjustment to the Contract Price and Contract Time(s) to the extent it has been adversely impacted by such stoppage. To the extent Design-Builder's failure to pay is related to a dispute between the parties, the dispute will be resolved in accordance with Article 13 and the parties will continue performance in accordance with Section 13.6.

8.5 General Contractor's Right to Terminate For Cause.

8.5.1 General Contractor, in addition to any other rights and remedies afforded under the Contract Documents or at law, may terminate the Agreement for cause for the following reasons:

8.5.1.1 The Work has been stopped for sixty-five (65) consecutive days, or more than ninety-five (95) days during the duration of the Project, because of court order, any government authority having jurisdiction over the Work, or orders by Design-Builder under Section 8.1 hereof, provided that such stoppages are not due to the acts or omissions of General Contractor or anyone for whose acts General Contractor may be responsible.

8.5.1.2 Design-Builder's failure to provide General Contractor with any information, permits or approvals that are Design-Builder's responsibility under the Contract Documents which result in the Work being stopped for sixty-five (65) consecutive days, or more than ninety-five (95) days during the duration of the Project, even though Design-Builder has not ordered General Contractor in writing to stop and suspend the Work pursuant to Section 8.1 hereof.

8.5.1.3 Design-Builder's failure to cure the problems set forth in Section 8.4.1 above within thirty (30) days after General Contractor has stopped the Work.

8.5.2 Upon the occurrence of an event set forth in Section 8.5.1 above, General Contractor may provide written notice to Design-Builder that it intends to terminate the Agreement unless the problem cited is cured, or commenced to be cured, within seven (7) days of Design-Builder's receipt

© 2022 Design-Build Institute of America

of such notice. If Design-Builder fails to cure, or reasonably commence to cure, such problem, then General Contractor may give a second written notice to Design-Builder of its intent to terminate within an additional seven (7) day period. If Design-Builder, within such second seven (7) day period, fails to cure, or reasonably commence to cure, such problem, then General Contractor may declare the Agreement terminated for default by providing written notice to Design-Builder of such declaration. In such case, General Contractor shall be entitled to recover in the same manner as if Design-Builder had terminated this Agreement for its convenience under Section 8.2 of the Agreement.

8.6 Bankruptcy of Design-Builder or General Contractor.

8.6.1 If either Design-Builder or General Contractor institutes or has instituted against it a case under the United States Bankruptcy Code (such party being referred to as the "Bankrupt Party"), such event may impair or frustrate the Bankrupt Party's ability to perform its obligations under the Contract Documents. Accordingly, should such event occur.

8.6.1.1 The Bankrupt Party, its trustee or other successor, shall furnish, upon request of the non-Bankrupt Party, adequate assurance of the ability of the Bankrupt Party to perform all future material obligations under the Contract Documents, which assurances shall be provided within ten (10) days after receiving notice of the request; and

8.6.1.2 The Bankrupt Party shall file an appropriate action within the bankruptcy court to seek assumption or rejection of the Agreement within sixty (60) days of the institution of the bankruptcy filing and shall diligently prosecute such action.

If the Bankrupt Party fails to comply with its foregoing obligations, the non-Bankrupt Party shall be entitled to request the bankruptcy court to reject the Agreement, declare the Agreement terminated and pursue any other recourse available to the non-Bankrupt Party under this Article 8.

8.6.2 The rights and remedies under Section 8.6.1 above shall not be deemed to limit the ability of the non-Bankrupt Party to seek any other rights and remedies provided by the Contract Documents or by law, including its ability to seek relief from any automatic stays under the United States Bankruptcy Code.

8.7 Termination for Convenience.

8.7.1 Upon ten (10) days' written notice to General Contractor, Design-Builder may, for its convenience and without cause, elect to terminate this Agreement. In such event, Design-Builder shall pay General Contractor for the following:

8.7.1.1 All Work executed and for proven loss, cost or expense in connection with the Work.

8.7.1.2 The reasonable costs and expenses attributable to such termination, including demobilization costs and amounts due in settlement of terminated contracts with Subcontractors; and

8.7.1.3 The amount set forth in Article 6 of this Agreement.

Article 9

Representatives of the Parties

9.1 Design-Builder's Representatives.

© 2022 Design-Build Institute of America

9.1.1 Design-Builder designates the individual listed below as its Senior Representative ("Design-Builder's Senior Representative"), which individual has the authority and responsibility for avoiding and resolving disputes under Section 13.4 of the Agreement: *(Identify individual's name, title, address and telephone numbers.)*

9.1.2 Design-Builder designates the individual listed below as its Design-Builder's Representative, which individual has the authority and responsibility set forth in Section 3.2 of the Agreement: *(Identify individual's name, title, address and telephone numbers.)*

9.2 General Contractor's Representatives.

9.2.1 General Contractor designates the individual listed below as its Senior Representative ("General Contractor's Senior Representative"), which individual has the authority and responsibility for avoiding and resolving disputes under Section 13.4 of the Agreement: *(Identify individual's name, title, address and telephone numbers.)*

9.2.2 General Contractor designates the individual listed below as its General Contractor's Representative, which individual has the authority and responsibility set forth in Section 2.1.2 of the Agreement: *(Identify individual's name, title, address and telephone numbers.)*

Article 10

Insurance and Bonds

10.1 General Contractor's Insurance Requirements.

10.1.1 General Contractor is responsible for procuring and maintaining, from insurance companies authorized to do business in the state in which the Project is located, the insurance coverages set forth in the Insurance Exhibit to this Agreement, with the minimum ratings set forth in said Exhibit for certain claims which may arise from or out of the performance of this Agreement and obligations under the Contract Documents.

10.1.2 General Contractor shall require its Subcontractors and Sub-Subcontractors to procure and maintain, from insurance companies authorized to do business in the state in which the Project is located, the insurance coverages set forth in the Insurance Exhibit.

10.1.3 General Contractor's and its Subcontractors' and Sub-Subcontractors' insurance coverage set forth in the Insurance Exhibit shall specifically delete any design-build or similar exclusions that could compromise coverages because of the design-build delivery of the Project.

© 2022 Design-Build Institute of America

10.1.4 Prior to commencing any services hereunder, General Contractor shall provide Design-Builder with certificates evidencing that (i) all insurance obligations required by the Contract Documents are in full force and in effect and will remain in effect for the duration required by the Contract Documents and (ii) no insurance coverage will be canceled, renewal refused or materially changed unless at least thirty (30) days' prior written notice is given to Design-Builder.

10.1.5 Except as otherwise stated in the Insurance Exhibit, the insurance policies required herein shall list Design-Builder, and any other entities required by the Contract Documents, if any, as an additional insured.

10.1.6 If any of the foregoing coverages are required to remain in force after final payment, an additional certificate evidencing continuation of such coverage shall be submitted with the final Application for Payment.

10.2 Property Insurance.

10.2.1 In accordance with the Contract Documents, Owner or Design-Builder shall procure and maintain property insurance upon the entire Project.

10.3 Waiver of Subrogation.

10.3.1 Design-Builder and General Contractor waive against each other and Owner, Subcontractors, Design Consultants, Owner's or Design-Builder's separate contractors, agents and employees of each and all of them, all damages covered by property insurance provided herein, except such rights as they may have to the proceeds of such insurance. Design-Builder and General Contractor shall, where appropriate, require similar waivers of subrogation from Design Consultants and Subcontractors and shall require each of them to include similar waivers in their contracts. These waivers of subrogation shall not contain any restriction or limitation that will impair the full and complete extent of its applicability to any person or entity unless agreed to in writing prior to the execution of this Agreement.

10.4 Bonds and Other Performance Security.

10.4.1 General Contractor shall provide the following performance bond and labor and material payment bond or other performance security: *(Indicate the amount of bonds and any other conditions of the bonds or other security.)*

Article 11

Indemnification

11.1 Patent and Copyright Infringement.

11.1.1 General Contractor shall defend any action or proceeding brought against Owner or Design-Builder based on any claim that the Work, or any part thereof, or the operation or use of the Work or any part thereof, constitutes infringement of any United States patent or copyright, now or hereafter issued. Design-Builder shall give prompt written notice to General Contractor of any such action or proceeding and will reasonably provide authority, information and assistance in the defense of same. General Contractor shall indemnify and hold harmless Owner and Design-Builder from and against all damages and costs, including but not limited to attorneys' fees and expenses awarded against Owner or Design-Builder in any such action or proceeding. General Contractor agrees to keep Design-Builder informed of all developments in the defense of such actions.

© 2022 Design-Build Institute of America

11.1.2 If Owner is enjoined from the operation or use of the Work, or any part thereof, as the result of any patent or copyright suit, claim or proceeding, General Contractor shall at its sole expense take reasonable steps to procure the right to operate or use the Work. If General Contractor cannot so procure such right within a reasonable time, General Contractor shall promptly, at General Contractor's option and at General Contractor's expense, (i) modify the Work so as to avoid infringement of any patents or copyrights, or (ii) replace said Work with Work that does not infringe or violate any such patent or copyright.

11.1.3 Sections 11.1.1 and 11.1.2 above shall not be applicable to any suit, claim or proceeding based on infringement or violation of a patent or copyright (i) relating to a particular process or product of a particular manufacturer specified by Owner or Design-Builder or (ii) arising from modifications to the Work by Owner or Design-Builder after acceptance of the Work. If the suit, claim or proceeding is based upon events set forth in the preceding sentence, Design-Builder shall defend, indemnify and hold harmless General Contractor to the same extent General Contractor is obligated to defend, indemnify and hold harmless Design-Builder in Section 11.1.1 above.

11.1.4 The obligations set forth in this Section 11.1 shall constitute the sole agreement between the parties relating to liability for infringement or violation of any patent or copyright.

11.2 Tax Claim Indemnification.

11.2.1 If, in accordance with Design-Builder's direction, an exemption for all or part of the Work is claimed for taxes, Design-Builder shall indemnify, defend and hold harmless General Contractor from and against any liability, penalty, interest, fine, tax assessment, attorneys' fees or other expenses or costs incurred by General Contractor as a result of any action taken by General Contractor in accordance with Design-Builder's directive.

11.3 Payment Claim Indemnification.

11.3.1 Providing that Design-Builder is not in breach of its contractual obligation to make payments to General Contractor for the Work, General Contractor shall indemnify, defend and hold harmless Owner and Design-Builder from any claims or mechanic's liens brought against Owner, Design-Builder or against the Project as a result of the failure of General Contractor, or those for whose acts it is responsible, to pay for any services, materials, labor, equipment, taxes or other items or obligations furnished or incurred for, or in connection with the Work. Within three (3) days of receiving written notice from Design-Builder that such a claim or mechanic's lien has been filed, General Contractor shall commence to take the steps necessary to discharge said claim or lien, including, if necessary, the furnishing of a mechanic's lien bond. If General Contractor fails to do so, Design-Builder will have the right to discharge the claim or lien and hold General Contractor liable for costs and expenses incurred, including attorneys' fees.

11.4 General Contractor's General Indemnification.

11.4.1 General Contractor, to the fullest extent permitted by law, shall indemnify, hold harmless and defend Owner, Design-Builder, their officers, directors, employees and agents from and against claims, losses, damages, liabilities, including attorneys, fees and expenses, for bodily injury, sickness or death, and property damage or destruction (other than to the Work itself) to the extent resulting from the negligent acts or omissions of General Contractor, Subcontractors, anyone employed directly or indirectly by any of them or anyone for whose acts any of them may be liable.

11.4.2 If an employee of General Contractor, anyone employed directly or indirectly by General Contractor, or anyone for whose acts any of them may be liable has a claim against any party indemnified pursuant to Section 11.4.1 above, General Contractor's indemnity obligation set forth in Section 11.4.1 above shall not be limited by any limitation on the amount of damages, compensation or benefits payable by or for General Contractor, Subcontractors, or other entity under any employee benefit acts, including workers' compensation or disability acts.

© 2022 Design-Build Institute of America

11.5 Design-Builder's General Indemnification.

11.5.1 Design-Builder, to the fullest extent permitted by law, shall indemnify, hold harmless and defend General Contractor and its officers, directors, employees and agents from and against claims, losses, damages, liabilities, including attorneys' fees and expenses, for bodily injury, sickness or death, and property damage or destruction (other than to the Work itself) but only to the extent resulting from the negligent acts or omissions of Design-Builder, Design Consultant, Design-Builder's other contractors, anyone employed directly or indirectly by any of them or anyone for whose acts any of them may be liable.

11.5.2 If an employee of Design-Builder, anyone employed directly or indirectly by Design-Builder, or anyone for whose acts any of them may be liable has a claim against any party indemnified pursuant to Section 11.5.1 above, Design-Builder's indemnity obligation set forth in Section 11.5.1 above shall not be limited by any limitation on the amount of damages, compensation or benefits payable by or for Design-Builder, Design Consultant, Design-Builders other contractors or other entity under any employee benefit acts, including workers' compensation or disability acts.

11.6 Limited Recourse.

11.6.1 None of the obligations set forth in this Agreement (on behalf of any party) constitute personal obligations of any natural persons who are the officers, shareholders, members, partners, employees or agents of any party unless the natural person is expressly identified as a contracting party. All Parties to this Agreement shall not seek recourse against any natural person described herein. This provision, however, shall not protect such natural persons from liability for willful misconduct, illegal acts or intentional violation of any duty of corporate loyalty.

Article 12

Changes to the Contract Price and Time

12.1 Owner-Generated Changes.

12.1.1 If Owner issues changes affecting the Work, General Contractor agrees, if directed by Design-Builder, to meet with Design-Builder and Owner to review and discuss the changes. General Contractor shall only be entitled to adjustments in its Contract Price and Contract Time(s) attributable to such Owner-generated changes to the extent Design-Builder actually receives such adjustments from Owner. If General Contractor disputes the adjustment, such dispute shall be resolved pursuant to Section 13.3 of this Agreement.

12.2 Design-Builder Generated Changes.

12.2.1 Changes to the Work issued by Design-Builder shall be governed by the provisions set forth in the following sections of this Article 12.

12.3 Change Orders.

12.3.1 A Change Order is a written instrument issued after execution of the Agreement signed by Design-Builder and General Contractor, stating their agreement upon all of the following:

12.3.1.1 The scope of the change in the Work;

12.3.1.2 The amount of the adjustment to the Contract Price; and

12.3.1.3 The extent of the adjustment to the Contract Time(s).

© 2022 Design-Build Institute of America

12.3.2 All changes in the Work authorized by applicable Change Order shall be performed under the applicable conditions of the Contract Documents. Design-Builder and General Contractor shall negotiate in good faith and as expeditiously as possible the appropriate adjustments for such changes.

12.3.3 If Design-Builder requests a proposal for a change in the Work from General Contractor and subsequently elects not to proceed with the change, a Change Order shall be issued to reimburse General Contractor for reasonable costs incurred for preparing the proposal.

12.4 Work Change Directives.

12.4.1 A Work Change Directive is a written order prepared and signed by Design-Builder directing a change in the Work prior to agreement on an adjustment in the Contract Price and/or the Contract Time(s).

12.4.2 Design-Builder and General Contractor shall negotiate in good faith and as expeditiously as possible the appropriate adjustments for the Work Change Directive. Upon reaching an agreement, the parties shall prepare and execute an appropriate Change Order reflecting the terms of the agreement.

12.5 Minor Changes in the Work.

12.5.1 Minor changes in the Work do not involve an adjustment in the Contract Price and/or Contract Time(s) and do not materially and adversely affect the Work, including the design, quality, performance and workmanship required by the Contract Documents. Design-Builder may make minor changes in the Work consistent with the intent of the Contract Documents, provided, however, that Design-Builder shall promptly inform General Contractor, in writing, of any such changes.

12.6 Contract Price Adjustment.

12.6.1 The increase or decrease in Contract Price resulting from a change in the Work shall be determined by one or more of the following methods:

12.6.1.1 Unit prices set forth in the Agreement or as subsequently agreed between the parties;

12.6.1.2 A mutually accepted, lump sum, properly itemized and supported by sufficient substantiating data to permit evaluation by Design-Builder;

12.6.1.3 Costs, fees and any other markups set forth in the Agreement; and

12.6.1.4 If an increase or decrease cannot be agreed to as set forth in items 12.6.1.1 through 12.6.1.3 above and Design-Builder issues a Work Change Directive, the cost of the change of the Work shall be determined by the reasonable expense and savings in the performance of the Work resulting from the change, including a reasonable overhead and profit, as may be set forth in this Agreement. If the net result of both additions and deletions to the Work is an increase in the Contract Price, reasonable overhead and profit shall be calculated on the basis of the net increase to the Contract Price. General Contractor shall maintain a documented, itemized accounting evidencing the expenses and savings associated with such changes.

12.6.2 If unit prices are set forth in the Contract Documents or are subsequently agreed to by the parties, but application of such unit prices will cause substantial inequity to Design-Builder or General Contractor because of differences in the character or quantity of such unit items as originally contemplated, such unit prices shall be equitably adjusted.

© 2022 Design-Build Institute of America

12.6.3 If Design-Builder and General Contractor disagree upon whether General Contractor is entitled to be paid for any services required by Design-Builder, or if there are any other disagreements over the scope of Work or proposed changes to the Work, Design-Builder and General Contractor shall resolve the disagreement pursuant to Article 13 hereof. As part of the negotiation process, General Contractor shall furnish Design-Builder with a good faith estimate of the costs to perform the disputed services in accordance with Design-Builder's interpretations. If the parties are unable to agree and Design-Builder expects General Contractor to perform the services in accordance with Design-Builder's interpretations, General Contractor shall proceed to perform the disputed services, conditioned upon Design-Builder issuing a written order to General Contractor (i) directing General Contractor to proceed and (ii) specifying Design-Builder's interpretation of the services that are to be performed.

12.7 Emergencies.

12.7.1 In any emergency affecting the safety of persons and/or property, General Contractor shall act, at its discretion, to prevent threatened damage, injury or loss. Any change in the Contract Price and/or Contract Time(s) on account of emergency work shall be determined as provided in this Article 12.

Article 13

Contract Adjustments and Disputes

13.1 Requests for Contract Adjustments and Relief.

13.1.1 If either General Contractor or Design-Builder believes that it is entitled to relief against the other for any event arising out of or related to the Work or the Project, such party shall provide written notice to the other party of the basis for its claim for relief. Such notice shall be in accordance with specific notice requirements contained in applicable sections of the Contract Documents and, if possible, be made prior to incurring any cost or expense. General Contractor shall provide Design-Builder written notice of claims for which Owner may be responsible in sufficient time for Design-Builder to meet its notice requirements to Owner set forth in the Contract Documents. In the absence of any specific notice requirement, written notice shall be given within a reasonable time, not to exceed ten (10) days, after the occurrence giving rise to the claim for relief or after the claiming party reasonably should have recognized the event or condition giving rise to the request, whichever is later. The claimant shall provide more complete information with respect to the claim within ten (10) days of the initial notice. The more complete information shall be in accordance with the Contract Documents and shall include sufficient information to advise the other party of the circumstances giving rise to the claim for relief, the specific contractual adjustment or relief requested and the basis of such request. General Contractor shall comply with all documentation requirements set forth in the Design-Build Agreement when submitting its claim to Design-Builder.

13.2 Dispute Avoidance and Resolution.

13.2.1 The parties are fully committed to working with each other throughout the Project and agree to communicate regularly with each other at all times so as to avoid or minimize disputes or disagreements. If disputes or disagreements do arise, General Contractor and Design-Builder each commit to resolving such disputes or disagreements in an amicable, professional and expeditious manner so as to avoid unnecessary losses, delays and disruptions to the Work.

13.3 Disputes Involving Owner.

13.3.1 To the extent a claim, dispute or controversy arises out of, or relates to, problems caused by Owner or for which Owner is responsible ("Owner Disputes"), such Owner Disputes shall be resolved pursuant to the dispute resolution clause set forth in the Design-Build Agreement. Both Design-Builder and General Contractor agree to cooperate in the presentation and prosecution or

© 2022 Design-Build Institute of America

defense of Owner Disputes. If, after a request for an extension of time or additional compensation from General Contractor, Design-Builder believes that the event causing the delay or additional compensation is the responsibility of Owner, then Design-Builder will cooperate with and assist General Contractor in presenting a request for an extension of time or additional compensation to Owner. Notwithstanding the above, Design-Builder reserves the right not to submit a claim to Owner. In such cases, the claim shall be resolved pursuant to Section 13.4.

13.3.2 Notwithstanding any other provisions herein to the contrary, Design-Builder and General Contractor each agree to accept the relief as to a time extension or additional compensation obtained from Owner, if any, as well as all other aspects of the final decision following appeal or the expiration of the time for appeal, as full and final resolution of any Owner Dispute.

13.3.3 If Design-Builder asserts a claim against Owner involving General Contractor, each party shall bear its own costs for outside counsel and third-party consultants retained to prosecute claims against Owner and for any other litigation costs. Each party shall present its portion of the claim to Owner.

13.3.4 If Owner contends that the Contract Documents have been breached, or otherwise asserts a claim or set-off against Design-Builder, the party determined to be responsible for the breach either by settlement or by the trier of fact shall be responsible for all costs occasioned by the breach, including counsel and litigation costs. If the trier of fact fails to determine the relative degrees of fault of Design-Builder and General Contractor in connection with any claim by Owner, then Design-Builder and General Contractor agree that the allocation of fault shall be determined pursuant to Section 13.4.

13.4 Disputes Not Involving Owner.

13.4.1 For any claim, dispute or controversy not arising out of, or relating to, problems caused by Owner or for which Owner is responsible, General Contractor and Design-Builder will first attempt to resolve such claim, dispute or controversy at the field level through discussions between Design-Builder's Representative and General Contractor's Representative.

13.4.2 If a claim, dispute or controversy cannot be resolved through Section 13.4.1, Design-Builder's Senior Representative and General Contractor's Senior Representative, upon the request of either party, shall meet as soon as conveniently possible, but in no case later than thirty (30) days after such a request is made, to attempt to resolve such claim, dispute or controversy. Five (5) days prior to any meetings between the Senior Representatives, the parties will exchange relevant information that will assist the parties in resolving the claim, dispute or controversy.

13.4.3 If after meeting the Senior Representatives determine that the claim, dispute or controversy cannot be resolved on terms satisfactory to both parties, the parties shall submit within thirty (30) days of the conclusion of the meeting by the Senior Representatives the claim, dispute or controversy to non-binding mediation. The mediation shall be conducted by a mutually agreeable impartial mediator, or if the parties cannot so agree, a mediator designated by the American Arbitration Association ("AAA") pursuant to its Construction Industry Mediation Rules. The mediation will be governed by and conducted pursuant to a mediation agreement negotiated by the parties or, if the parties cannot so agree, by procedures established by the mediator. Unless otherwise mutually agreed by Design-Builder and General Contractor and consistent with the mediator's schedule, the mediation shall commence within ninety (90) days of the submission of the dispute for mediation. Representatives with authority to resolve the dispute shall be present at the mediation.

13.5 Arbitration.

13.5.1 Any claims, disputes or controversies between the parties arising out of or relating to the Agreement, or the breach thereof, which have not been resolved in accordance with the procedures

© 2022 Design-Build Institute of America

set forth in Section 13.4 above, shall be decided by arbitration in accordance with the Construction Industry Arbitration Rules of the AAA then in effect, unless the parties mutually agree otherwise.

13.5.2 The award of the arbitrator(s) shall be final and binding upon the parties without the right of appeal to the courts. Judgment may be entered upon it in accordance with applicable law by any court having jurisdiction thereof.

13.5.3 General Contractor and Design-Builder expressly agree that any arbitration pursuant to this Section 13.5 may be joined or consolidated with any arbitration involving any other person or entity (i) necessary to resolve the claim, dispute or controversy, or (ii) substantially involved in or affected by such claim, dispute or controversy. Both Design-Builder and General Contractor will include appropriate provisions in all contracts they execute with other parties in connection with the Project to require such joinder or consolidation.

13.5.4 The prevailing party in any arbitration, or any other final, binding dispute proceeding upon which the parties may agree, shall be entitled to recover from the other party reasonable attorneys' fees and expenses incurred by the prevailing party.

13.6 Duty to Continue Performance.

13.6.1 Unless provided to the contrary in the Contract Documents, General Contractor shall continue to perform the Work and Design-Builder shall continue to satisfy its payment obligations to General Contractor, pending the final resolution of any dispute or disagreement between Design-Builder and General Contractor.

13.7 CONSEQUENTIAL DAMAGES.

13.7.1 NOTWITHSTANDING ANYTHING HEREIN TO THE CONTRARY (EXCEPT AS SET FORTH IN SECTION 13.7.2 BELOW), NEITHER DESIGN-BUILDER NOR GENERAL CONTRACTOR SHALL BE LIABLE TO THE OTHER FOR ANY CONSEQUENTIAL LOSSES OR DAMAGES, WHETHER ARISING IN CONTRACT, WARRANTY, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY OR OTHERWISE, INCLUDING BUT NOT LIMITED TO LOSSES OF USE, PROFITS, BUSINESS, REPUTATION OR FINANCING.

13.7.2 The consequential damages limitation set forth in Section 13.7.1 is not intended to affect (i) the payment of liquidated damages, if any, set forth in Article 5 of this Agreement, which both parties recognize have been established, in part, to reimburse Design-Builder for some damages that might otherwise be deemed to be consequential or (ii) any liability of General Contractor for consequential damages that may be imposed upon Design-Builder by the Design-Build Agreement.

Article 14

Miscellaneous

14.1 Assignment.

14.1.1 Neither General Contractor nor Design-Builder shall, without the written consent of the other, assign, transfer or sublet any portion or part of the Work or the obligations required by the Contract Documents.

14.2 Successorship.

14.2.1 Design-Builder and General Contractor intend that the provisions of the Contract Documents are binding upon the parties, their employees, agents, heirs, successors and assigns.

14.3 Governing Law.

© 2022 Design-Build Institute of America

14.3.1 The Agreement and all Contract Documents shall be governed by the laws of the location of the Project, without giving effect to its conflict of law principles.

14.4 Severability.

14.4.1 If any provision or any part of a provision of the Contract Documents shall be finally determined to be superseded, invalid, illegal or otherwise unenforceable pursuant to any applicable Legal Requirements or court order, such determination shall not impair or otherwise affect the validity, legality or enforceability of the remaining provision or parts of the provision of the Contract Documents, which shall remain in full force and effect as if the unenforceable provision or part were deleted.

14.5 No Waiver.

14.5.1 The failure of either Design-Builder or General Contractor to insist, in any one or more instances, on the performance of any of the obligations required by the other under the Contract Documents shall not be construed as a waiver or relinquishment of such obligation or right with respect to future performance.

14.6 Headings.

14.6.1 The headings used in this Agreement, or any other Contract Document, are for ease of reference only and shall not in any way be construed to limit or alter the meaning of any provision.

14.7 Notice.

14.7.1 Whenever the Contract Documents require that notice be provided to the other party, notice will be deemed to have been validly given (i) if delivered in person to the individual intended to receive such notice, (ii) four (4) days after being sent by registered or certified mail, postage prepaid to the address indicated in the Agreement, (iii) if transmitted by facsimile, by the time stated in a machine generated confirmation that notice was received at the number of the intended recipient or (iv) by electronic mail, by the time frame stated in the email-generated confirmation that notice was received by the email of the intended recipient.

14.8 Amendments.

14.8.1 The Contract Documents may not be changed, altered or amended in any way except in writing signed by a duly authorized representative of each party.

14.9 Survival.

14.9.1 General Contractor's obligations under this Agreement shall not be released and shall specifically survive the completion of all services hereunder by General Contractor, final payment to General Contractor and the termination of this Agreement for any reason.

Article 15

Electronic Data

15.1 Electronic Data.

15.1.1 The parties recognize that Contract Documents, including drawings, specifications and three-dimensional modeling (such as Building Information Models) and other Work Product may be

© 2022 Design-Build Institute of America

transmitted among Design-Builder, General Contractor and others in electronic media as an alternative to paper hard copies (collectively "Electronic Data").

15.2 Transmission of Electronic Data.

15.2.1 Design-Builder shall determine, after consultation with General Contractor, the software and the format for the transmission of Electronic Data. Each party shall be responsible for securing the legal rights to access the agreed-upon format, including, if necessary, obtaining appropriately licensed copies of the applicable software or electronic program to display, interpret and/or generate the Electronic Data.

15.2.2 Neither party makes any representations or warranties to the other with respect to the functionality of the software or computer program associated with the electronic transmission of Work Product. Unless specifically set forth in the Agreement, ownership of the Electronic Data does not include ownership of the software or computer program with which it is associated, transmitted, generated or interpreted.

15.2.3 By transmitting Work Product in electronic form, the transmitting party does not transfer or assign its rights in the Work Product. The rights in the Electronic Data shall be as set forth in Article 17 of the Agreement. Under no circumstances shall the transfer of ownership of Electronic Data be deemed to be a sale by the transmitting party of tangible goods.

15.3 Electronic Data Protocol.

15.3.1 The parties acknowledge that Electronic Data may be altered or corrupted, intentionally or otherwise, due to occurrences beyond their reasonable control or knowledge, including but not limited to compatibility issues with user software, manipulation by the recipient, errors in transcription or transmission, machine error, environmental factors and operator error. Consequently, the parties understand that there is some level of increased risk in the use of Electronic Data for the communication of design and construction information and, in consideration of this, agree, and shall require their independent contractors, Subcontractors and Design Consultants to agree, to the following protocols, terms and conditions set forth in this Section 15.3.

15.3.2 Electronic Data will be transmitted in the format determined in Section 15.2.1 above, including file conventions and document properties, unless prior arrangements are made in advance in writing.

15.3.3 The Electronic Data represents the information at a particular point in time and is subject to change. Therefore, the parties shall agree upon protocols for notification by the author to the recipient of any changes which may thereafter be made to the Electronic Data, which protocol shall also address the duty, if any, to update such information if such information changes prior to Final Completion of the Project.

15.3.4 The transmitting party specifically disclaims all warranties, expressed or implied, including, but not limited to, implied warranties of merchantability and fitness for a particular purpose, with respect to the media transmitting the Electronic Data. However, transmission of the Electronic Data via electronic means shall not invalidate or negate any duties pursuant to the applicable standard of care with respect to the creation of the Electronic Data, unless such data is materially changed or altered after it is transmitted to the receiving party, and the transmitting party did not participate in such change or alteration.

15.4 In the event the Design-Build Agreement contains a provision governing Electronic Data, and there is a conflict between the provision in the Design-Build Agreement and this Article 15, the provision in the Design-Build Agreement takes precedence, notwithstanding the order of precedence set forth in Section 1.4.2.

© 2022 Design-Build Institute of America

Article 16

Confidential Information

16.1 Confidential and/or Proprietary Information.

16.1.1 Confidential Information is defined as information which is determined by the transmitting party to be of a confidential or proprietary nature and: (i) the transmitting party identifies as either confidential or proprietary; (ii) the transmitting party takes steps to maintain the confidential or proprietary nature of the information; and (iii) the document is not otherwise available in or considered to be in the public domain. The receiving party agrees to maintain the confidentiality of the Confidential Information and agrees to use the Confidential Information solely in connection with the Project and to execute any such additional agreements as may be required by Owner or Design-Builder with respect to such information.

16.1.2 In the event the Design-Build Agreement contains a provision governing Confidential Information, and there is a conflict between the provision in the Design-Build Agreement and this Article 16, the provision in the Design-Build Agreement takes precedence, notwithstanding the order of precedence set forth in Section 1.4.2.

Article 17

Work Product

17.1 Ownership of Work Product.

17.1.1 The General Contractor shall have no ownership and property rights in any drawings, specifications and other documents and electronic data ("Work Product") furnished by Design-Builder to General Contractor under this Agreement. Design-Builder shall be granted ownership of all Work Product, if any, furnished by General Contractor to Design-Builder under this Agreement.

17.2 Indemnification for Use of Work Product.

17.2.1 If consent to re-use is given by written agreement and either Design-Builder or General Contractor uses the Work Product furnished to them by the other on any other project, it agrees that it shall do so at its sole risk and without liability or legal exposure to the other party, Owner or anyone working through them. Such Party further agrees that it shall defend, indemnify and hold harmless the other Party from and against any and all claims, damages, liabilities, losses and expenses, including attorneys' fees, arising out of or resulting from such use of the Work Product on another project.

Article 18

Other Provisions

18.1 Other provisions, if any, are as follows:
(Insert any additional provisions, including those that relate to options that might have been selected by Design-Builder and Owner in the Design-Build Agreement related to Warranty Reserves, alternatives to Liquidated Damages, etc., as the parties may deem commercially appropriate.)

© 2022 Design-Build Institute of America

[In lieu of Sections 13.5.1 through 13.5.3 of the Agreement, the parties may want to delete such sections and include the following alternative dispute resolution clause.]

☐ Any claims, disputes or controversies between the parties arising out of or related to the Agreement, or the breach thereof which have not been resolved in accordance with the procedures set forth in Section 13.4 herein shall be resolved in a court of competent jurisdiction in the state in which the Project is located.

© 2022 Design-Build Institute of America

In executing this Agreement, Design-Builder and General Contractor each individually represents that it has the necessary financial resources to fulfill its obligations under this Agreement, and each has the necessary corporate approvals to execute this Agreement, and perform the Work described herein.

Design-Build Institute of America - Contract Documents

LICENSE AGREEMENT

By using the DBIA Contract Documents, you agree to and are bound by the terms of this License Agreement.

1. **License.** The Design-Build Institute of America ("DBIA") provides DBIA Contract Documents and licenses their use worldwide. You acknowledge that DBIA Contract Documents are protected by the copyright laws of the United States. You have a limited nonexclusive license to: (a) Use DBIA Contract Documents on any number of machines owned, leased or rented by your company or organization; (b) Use DBIA Contract Documents in printed form for bona fide contract purposes; and (c) Copy DBIA Contract Documents into any machine-readable or printed form for backup or modification purposes in support of your permitted use.

2. **User Responsibility.** You assume sole responsibility for the selection of specific documents or portions thereof to achieve your intended results, and for the installation, use and results obtained from the DBIA Contract Documents. You acknowledge that you understand that the text of the DBIA Contract Documents has important legal consequences and that consultation with an attorney is recommended with respect to use or modification of the text. You will not represent that any of the contract documents you generate from DBIA Contract Documents are DBIA documents unless (a) the document text is used without alteration or (b) all additions and changes to, and deletions from, the text are clearly shown.

3. **Copies.** You may not use, copy, modify or transfer DBIA Contract Documents, or any copy, modification or merged portion, in whole or in part, except as expressly provided for in this license. Reproduction of DBIA Contract Documents in printed or machine-readable format for resale or educational purposes is expressly prohibited. You will reproduce and include DBIA's copyright notice on any printed or machine-readable copy, modification or portion merged into another document or program.

4. **Transfers.** You may not transfer possession of any copy, modification or merged portion of DBIA Contract Documents to another party, except that a party with whom you are contracting may receive and use such transferred material solely for purposes of its contract with you. You may not sublicense, assign or transfer this license except as expressly provided in this Agreement, and any attempt to do so is void.

5. **Term.** The license is effective for one year from the date of purchase. DBIA may elect to terminate it earlier, by written notice to you, if you fail to comply with any term or condition of this Agreement.

6. **Limited Warranty.** DBIA warrants the electronic files or other media by which DBIA Contract Documents are furnished to be free from defects in materials and workmanship under normal use during the Term. There is no other warranty of any kind, expressed or implied, including, but not limited to the implied warranties of merchantability and fitness for a particular purpose. Some states do not allow the exclusion of implied warranties, so the above exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state. DBIA does not warrant that the DBIA Contract Documents will meet your requirements or that the operation of DBIA Contract Documents will be uninterrupted or error free.

7. **Limitations of Remedies.** DBIA's entire liability and your exclusive remedy shall be: the replacement of any document not meeting DBIA's "Limited Warranty" which is returned to DBIA with a copy of your receipt, or at DBIA's election, your money will be refunded. In no event will DBIA be liable to you for any damages, including any lost profits, lost savings or other incidental or consequential damages arising out of the use or inability to use DBIA Contract Documents even if DBIA has been advised of the possibility of such damages, or for any claim by any other party. Some states do not allow the limitation or exclusion of liability for incidental or consequential damages, so the above limitation or exclusion may not apply to you.

8. **Acknowledgment.** You acknowledge that you have read this agreement, understand it and agree to be bound by its terms and conditions and that it will be governed by the laws of the District of Columbia. You further agree that it is the complete and exclusive statement of your agreement with DBIA which supersedes any proposal or prior agreement, oral or written, and any other communications between the parties relating to the subject matter of this agreement.

General Instructions

No.	Subject	Instruction
1.	Standard Forms	Standard form contracts have long served an important function in the United States and international construction markets. The common purpose of these forms is to provide an economical and convenient way for parties to contract for design and construction services. As standard forms gain acceptance and are used with increased frequency, parties are able to enter into contracts with greater certainty as to their rights and responsibilities.
2.	DBIA Standard Form Contract Documents	Since its formation in 1993, the Design-Build Institute of America ("DBIA") has regularly evaluated the needs of owners, design-builders and other parties to the design-build process in preparation for developing its own contract forms. Consistent with DBIA's mission of promulgating best design-build practices, DBIA believes that the design-build contract should reflect a balanced approach to risk that considers the legitimate interests of all parties to the design-build process. DBIA's Standard Form Contract Documents reflect a modern risk allocation approach, allocating each risk to the party best equipped to manage and minimize that risk, with the goal of promoting best design-build practices.
3.	Use of Non-DBIA Documents	To avoid inconsistencies among documents used for the same project, DBIA's Standard Form Contract Documents should not be used in conjunction with non-DBIA documents unless the non-DBIA documents are appropriately modified on the advice of legal counsel. Moreover, care should also be taken when using different editions of the DBIA Standard Form Documents on the same project to ensure consistency.
4.	Legal Consequences	DBIA Standard Form Contract Documents are legally binding contracts with important legal consequences. Contracting parties are advised and encouraged to seek legal counsel in completing or modifying these Documents.
5.	Reproduction	DBIA hereby grants to purchasers a limited license to reproduce its Documents consistent with the License Agreement accompanying these Documents. At least two original versions of the Agreement should be signed by the parties. Any other reproduction of DBIA Documents is strictly prohibited.
6.	Modifications	Effective contracting is accomplished when the parties give specific thought to their contracting goals and then tailor the contract to meet the unique needs of the project and the design-build team. For that reason, these Documents may require modification for various purposes including, for example, to comply with local codes and laws, or to add special terms. DBIA's latest revisions to its Documents provide the parties an opportunity to customize their contractual relationship by selecting various optional contract clauses that may better reflect the unique needs and risks associated with the project. At no time should a document be re-typed in its entirety. Re-creating the document violates copyright laws and destroys one of the advantages of standard forms – familiarity with the terms.
7.	Execution	It is good practice to execute two original copies of the Agreement. Only persons authorized to sign for the contracting parties may execute the Agreement.

Specific Instructions

Section	Title	Instruction
General	Purpose of This Agreement	DBIA Document No. 565, *Standard Form of Agreement Between Design-Builder and Design-Build Subcontractor – Lump Sum*, 2022 Edition ("Agreement") sets forth the terms and conditions under which the design and construction of a specified portion of the Project will be performed, and should be used only when the parties intend that Design-Builder pay Design-Build Subcontractor a lump sum fixed price for the completion of the Work. Document 565 is appropriate where there is certainty as to Owner's Project Criteria, or if the Construction Documents are final. If there is uncertainty about Owner's Project Criteria, or it remains to be developed jointly, a cost plus fee/guaranteed maximum price ("GMP") contracting approach may be more suitable. In such case, the parties should use DBIA Document No. 560, *Standard Form of Agreement Between Design-Builder and Design-Build Subcontractor – Cost Plus Fee with an Option for a Guaranteed Maximum Price*, 2022 Edition.
General	Purpose of These Instructions	These Instructions are not part of this Agreement, but are provided to aid the parties in their understanding of the Agreement and in completing the Agreement.
General	Date	On Page 1, enter the date when both parties reach a final understanding. It is possible, due to logistical reasons, that the dates when the parties execute the Agreement may be different. Once both parties execute the Agreement, the effective date of the Agreement will be the date recorded on Page 1. This date does not, however, determine the Date of Commencement, which is measured according to the terms of Article 5.
General	Parties: Design-Builder and Design-Build Subcontractor	On Page 1, enter the legal name and full address of Design-Builder, Design-Build Subcontractor and Owner, as well as the legal form of each entity, e.g., corporation, partnership, limited partnership, limited liability company or other.
1.1.1	Pass Through	The section recognizes that Design-Build Subcontractor has the same rights, responsibilities and obligations as to Design-Builder as Design-Builder by the Design-Build Agreement has against and to Owner. However, because the Design-Build Agreement also affords Design-Builder and Owner many opportunities to customize their contractual relationship by the selection of optional provisions, DBIA does not believe that these optional provisions should automatically pass through to Design-Build Subcontractor. Accordingly, if Design-Builder and Design-Build Subcontractor believe it is appropriate to afford Design-Build Subcontractor the same rights, responsibilities and obligations as it relates to these optional provisions, the parties should make that clear by adding the necessary and appropriate provisions at Article 17 of this Agreement.
1.2	Definitions	Except to the extent set forth in Section 1.2 of this Agreement, terms, words and phrases used in the Agreement shall have the same meanings used in the Design-Build Agreement between Owner and Design-Builder (either DBIA Document No. 525, *Standard Form of Agreement Between Owner and Design-Builder – Lump Sum* (2022 Edition), or DBIA Document No. 530, *Standard Form of Agreement Between Owner and Design-Builder – Cost Plus Fee with an Option for a Guaranteed Maximum Price* (2022 Edition), and including DBIA Document No. 535, *Standard Form of General Conditions of Contract Between Owner and Design-Builder* (2022 Edition).
1.2.1.15	Definition of the Work	The parties must identify the specific portion of the Project which Design-Build Subcontractor is responsible for designing and constructing.

© 2022 Design-Build Institute of America

Section	Title	Instruction
1.3.1	Contract Documents	This section identifies the Contract Documents.
1.4.2	Order of Precedence	The Contract Documents are listed in Section 1.3.1 in the order of their precedence.
1.4.3	Design Specifications	If the Owner has provided design specifications to Design-Builder, Design-Build Subcontractor is entitled to rely on the information provided to the same extent as Design-Builder. If said information is not accurate, Design-Build Subcontractor may be entitled to an adjustment of costs and/or time to the extent Design-Builder recovers from Owner.
1.5.2	Mutual Obligations and Acknowledgments	This Agreement contemplates that Design-Builder and Design-Build Subcontractor have cooperated in the procurement of the Design-Build Agreement and that Design-Build Subcontractor has familiarized itself with the Design-Build Agreement, including the Basis of Design Documents.
2.3.1	Design Professional Services	The parties should be aware that in addition to requiring compliance with state licensing laws for design professionals, some states also require that the design professional have a corporate professional license.
2.3.3	Standard of Care for Design Professional Services	Design-Build Subcontractor's obligation is to deliver a design that meets prevailing industry standards. However, DBIA has provided the parties at Article 17 an optional provision whereby Owner can identify specific performance standards that can be objectively measured. If this optional provision is selected, Design-Build Subcontractor is obligated to design the Work to satisfy these standards. To avoid any confusion and to ensure that the parties fully understand what their obligations are, the specific performance standards should be clearly identified and should be able to be objectively measured. Design-Build Subcontractor should recognize that this is a heightened standard of care that has insurance ramifications that should be discussed with Design-Build Subcontractor's insurance advisor.
2.3.5	Design Development Services	In accordance with the Project Schedule, the parties will hold design monitoring meetings during the development of the Construction Documents for the work so that the final design shall be consistent with the requirements of the Contract Documents.
2.3.7	Deviations from the Basis of Design Documents	If Design-Build Subcontractor fails to identify changes to the Contract Documents, including the Basis of Design Documents, or fails to produce Construction Documents consistent with approved changes, Design-Build Subcontractor is responsible for any additional costs incurred by Design-Builder.
2.10	Patents and Copyrights	Design-Build Subcontractor shall pay all license fees and royalties for items or processes it selects which are subject to copyrights or patent rights.
2.12.1	Government Approvals and Permits	Design-Build Subcontractor is responsible for obtaining the specific permits, approvals and licenses set forth in an exhibit to the Agreement.
3.3.1	Furnishing of Information	Design-Builder shall furnish Design-Build Subcontractor with the listed Owner-provided information. Design-Build Subcontractor is entitled to rely on the Owner-provided information to the same extent Design-Builder is entitled to pursuant to the Design-Build Agreement.
4.1.1	Work Product	This Agreement provides that Design-Build Subcontractor shall retain ownership of the Work Product Design-Build Subcontractor produces, but obligates Design-Build Subcontractor to grant a limited license to Design-Builder to use the Work Product in connection with completing the Project. However, if the Design-Build Agreement conflicts with the above, then Design-Build Subcontractor grants Design-Builder the same rights that Design-Builder has provided Owner.

© 2022 Design-Build Institute of America

Section	Title	Instruction
4.2.1	Agreement to Grant Rights to Owner	Design-Build Subcontractor has reviewed the Design-Build Agreement and understands that it is required to grant Owner the rights to the Work Product according to the terms and circumstances described in the Design-Build Agreement.
4.3.1	Indemnification for Use of Work Product	If either Design-Builder or Design-Build Subcontractor uses the Work Product on any other project that party shall defend, indemnify and hold harmless the other party and Owner.
4.4.1	Design-Builder's Use of Work Product Upon Termination for Convenience or Design-Builder's Default	If Design-Builder terminates this Agreement for convenience or if Design-Build Subcontractor terminates this Agreement due to Design-Builder's default, Design-Build Subcontractor grants Design-Builder and Owner the right to use the Work Product as set forth in Section 4.1.1. The granting of these rights is conditioned on (i) paying Design-Build Subcontractor all amounts due under the Agreement, including paying Design-Build Subcontractor an additional sum (to be negotiated) under Section 4.4.1.2 for the use of the Work Product; and (ii) Design-Builder using the Work Product at its sole risk.
4.4.2	Design-Builder's Use of Work Product Upon Design-Build Subcontractor's Default	If Design-Build Subcontractor is properly terminated for default, Design-Builder shall have the same rights to use the Work Product as set forth in Section 4.1.1.
5.1	Date of Commencement	Design-Build Subcontractor's obligation to commence work is triggered by its receipt of a Notice to Proceed unless the parties mutually agree otherwise.
5.4.2	Compensation for Delay Events	Design-Build Subcontractor is entitled to a time extension and compensation for those events set forth in Section 5.4.1 except Design-Build Subcontractor is not entitled to compensation for Force Majeure events unless compensation for Force Majeure is expressly provided in Article 17 of this Agreement.
6.1	Contract Price	Enter the amount of the Contract Price as a lump sum fee.
6.2.1	Markups for Changes	For additive Change Orders, the parties have to negotiate the Fee Design-Build Subcontractor will receive. For deductive Change Orders, the parties have the option by checking the appropriate box of whether there will be no additional reduction or whether there will be an additional reduction based on a negotiated percentage.
7.2.1	Progress Payments	Enter the day of the month when Design-Build Subcontractor shall submit its Application for Payment.
7.3.1	Retainage on Progress Payments	Insert percent Design-Builder will retain from Progress Payments to Design-Build Subcontractor.
7.7.1	Interest	The parties should enter the rate at which interest will accrue on Design-Build Subcontractor's payments if unpaid five (5) days after due. Late payment creates a hardship for Design-Build Subcontractor and its Design Consultants and Subcontractors.
7.11.1	Record Keeping	Design-Builder is provided access to, and has the right to audit Design-Build Subcontractor's records with respect to changes in the Work. However, if the parties have agreed to multipliers or markups, the time to challenge and negotiate those percentages is at the time the parties execute the Agreement and not during the Project or after it has been completed. Accordingly, Design-Builder can at any time audit these percentages only to confirm that such percentage has been properly charged and not to challenge the composition of such percentage.

© 2022 Design-Build Institute of America

Section	Title	Instruction
8.2.1.3	Termination for Convenience: Overhead and Profit	The parties should choose prior to execution of the Agreement the method that will be used to determine overhead and profit paid to Design-Build Subcontractor in the event Design-Builder terminates Design-Build Subcontractor for its convenience. The parties may choose to set percentage rates for overhead and profit prior to execution of the Agreement, or may choose to determine reasonable sums to be paid for overhead and profit at the time of the termination. If the parties choose to set overhead and profit rates prior to execution of the Agreement, the percentages should be entered in Section 8.2.1.3.
8.2.2	Termination for Convenience	If Design-Builder terminates Design-Build Subcontractor for convenience because Owner has terminated Design-Builder for its convenience, Design-Build Subcontractor is only entitled to receive such amount as Design-Builder receives from Owner on behalf of Design-Build Subcontractor.
8.5	Design-Build Subcontractor's Right to Terminate for Cause	If Design-Build Subcontractor properly terminates the Agreement for cause, it shall recover from Design-Builder in the same way as if Design-Builder had terminated the Agreement for convenience under Section 8.2 of the Agreement.
Article 9	Representatives of the Parties	Enter the name, title, address and telephone number of Design-Builder's Senior Representative and Design-Builder's Representative at Sections 9.1.1 and 9.1.2, respectively. Enter the name, title, address and telephone number of Design-Build Subcontractor's Senior Representative and Design-Build Subcontractor's Representative at Sections 9.2.1 and 9.2.2, respectively.
10.1.1	Design-Build Subcontractor's Insurance Requirements	Attach an Insurance Exhibit setting forth in detail the insurance coverages Design-Build Subcontractor is required to provide for the Project. Parties are advised to consult their insurance advisors.
10.1.2	Design Consultant's and Subcontractor's Insurance Requirements	Design-Build Subcontractor is obligated to require its Design Consultants and Sub-Subcontractors to provide the insurance coverage set forth in the Insurance Exhibit to the Agreement. Parties are advised to consult their insurance advisors.
10.1.3	Exclusions to Design-Build	Parties are advised that standard liability insurance policies may contain exclusions for the design-build delivery method. This Section 10.1.3 requires that any such exclusions be deleted from the policy.
10.1.4	Errors and Omissions Insurance	Should Design-Builder, after its analysis of the risk factors involved, require this insurance, the coverage required shall be as set forth in the Insurance Exhibit attached at Section 10.1.1 of the Agreement.
10.4.1	Bonds and Other Performance Security	Enter the type and amount of bonds or other performance security required for the Project. Where bonding is not required by statute, Design-Builder may want to evaluate the project risk versus the bonding costs in deciding what type of performance security to require.
13.3	Disputes Involving Owner	Disputes for which Owner is responsible will be resolved in accordance with the dispute resolution clause in the Design-Build Agreement.
13.4	Disputes Not Involving Owner	DBIA endorses the use of partnering, negotiation, mediation and arbitration for the prevention and resolution of disputes. The Agreement provides for the parties' Representatives and Senior Representatives to attempt to negotiate the dispute or disagreement. If this attempt fails, the dispute shall be submitted to mandatory, non-binding mediation. Any dispute that cannot be resolved by mediation shall then be submitted to binding arbitration pursuant to Section 13.5 unless the parties elect the option in Article 17 of the Agreement to submit their dispute to a court of competent jurisdiction.

© 2022 Design-Build Institute of America

Section	Title	Instruction
13.5	Arbitration	The prevailing party in any arbitration shall receive reasonable attorneys' fees from the other party. DBIA supports this "loser pays" provision to encourage parties to negotiate or mediate their differences and to minimize the number of frivolous disputes.
13.6	Duty to Continue Performance	Pending the resolution of any dispute or disagreement, both Design-Builder and Design-Build Subcontractor shall continue to perform their respective duties under the Contract Documents, unless the parties provide otherwise in the Contract Documents.
13.7	Consequential Damages	DBIA believes that it is inappropriate for either Design-Builder or Design-Build Subcontractor to be responsible to the other for consequential damages arising from the Project. This limitation on consequential damages in no way restricts, however, Design-Builder's entitlement to recover against Design-Build Subcontractor liquidated damages assessed by Owner against Design-Builder which are attributable to Design-Build Subcontractor and which may include damages that might otherwise be deemed consequential.
Article 15	Electronic Data	Design-Builder will determine, after consultation with Design-Build Subcontractor, the software and format for the transmission of Electronic Data. Ownership of Work Product in electronic form is governed by Article 4 of the Agreement. The transmitting party disclaims all warranties with respect to the media transmitting the Electronic Data, but nothing in this Article is intended to negate duties with respect to the standard of care in creating the Electronic Data. In the event the Design-Build Agreement contains a conflicting provision governing Electronic Data, the provision in the Design-Build Agreement takes precedence.
Article 17	Other Provisions	Insert any other provisions. For example, the parties may elect to have disputes resolved through litigation rather than arbitration in which case the optional language in this Section should be included.

Standard Form of Agreement Between Design-Builder and Design-Build Subcontractor – Lump Sum

This document has important legal consequences. Consultation with an attorney is recommended with respect to its completion or modification.

This **AGREEMENT** is made as of the _____ day of _____ in the year of 20_____, by and between the following parties, for services in connection with the Project identified below:

DESIGN-BUILDER:
(Name and address)

DESIGN-BUILD SUBCONTRACTOR:
(Name and address)

PROJECT:
(Include Project name and location as it will appear in the Contract Documents)

OWNER:
(Name and address)

In consideration of the mutual covenants and obligations contained herein, Design-Builder and Design-Build Subcontractor agree as set forth herein.

© 2022 Design-Build Institute of America

Article 1

General

1.1 Basic Purpose.

1.1.1 Design-Builder has contracted with Owner to provide the services necessary for the design and construction of the Project as set forth in the Design-Build Agreement. Design-Build Subcontractor, through itself, Design Consultants and Sub-Subcontractors, agrees to provide all design, construction and other aspects of the Work consistent with the Contract Documents. Design-Builder and Design-Build Subcontractor agree that to the extent applicable to the performance of the Work hereunder, Design-Build Subcontractor shall have the same rights, responsibilities and obligations as to Design-Builder as Design-Builder by the Design-Build Agreement has against and to Owner, except as may be modified herein. Notwithstanding the foregoing, if Design-Builder and Owner have checked boxes indicating the selection of optional provisions from the Design-Build Agreement, those optional provisions are only passed through to Design-Build Subcontractor to the extent these provisions have been expressly set forth in Article 17.

1.2 Basic Definitions.

1.2.1 Terms used in this Agreement shall have the meanings set forth in the Design-Build Agreement between Owner and Design-Builder unless otherwise provided herein, with the following specific terms defined as follows:

1.2.1.1 *Agreement* refers to this executed contract between Design-Builder and Design-Build Subcontractor under DBIA Document 565, *Standard Form of Agreement Between Design-Builder and Design-Build Subcontractor – Lump Sum* (2022 Edition).

1.2.1.2 *Basis of Design Documents* are as follows: For DBIA Document No. 530, *Standard Form of Agreement Between Owner and Design-Builder – Cost Plus Fee With an Option for a Guaranteed Maximum Price*, the Basis of Design Documents are those documents specifically listed in, as applicable, the GMP Exhibit or GMP Proposal as being the "Basis of Design Documents." For DBIA Document No. 525, *Standard Form of Agreement Between Owner and Design-Builder – Lump Sum*, the Basis of Design Documents include the Owner's Project Criteria, and may include Design-Builder's Proposal and the Deviation List, if any.

1.2.1.3 *Construction Documents* are the documents consisting of Drawings and Specifications, prepared or assembled consistent with the Basis of Design Documents unless a deviation from the Basis of Design Documents is specifically set forth in a Change Order.

1.2.1.4 *Day or Days* shall mean calendar days unless otherwise specifically noted in the Contract Documents.

1.2.1.5 *Design-Build Agreement* refers to the contract between Design-Builder and Owner for the design and construction of the Project under either DBIA Document No. 525, *Standard Form of Agreement Between Owner and Design-Builder – Lump Sum* (2022 Edition), or DBIA Document No. 530, *Standard Form of Agreement Between Owner and Design-Builder – Cost Plus Fee with an Option for a Guaranteed Maximum Price* (2022 Edition), including the DBIA Document No. 535, *Standard Form of General Conditions of Contract Between Owner and Design-Builder* (2022 Edition), and all exhibits, attachments, and other Contract Documents enumerated and incorporated therein.

1.2.1.6 *Design Consultant* is a qualified, licensed design professional who is not an employee of Design-Build Subcontractor, but is retained by Design-Build Subcontractor, to furnish design services required under the Contract Documents. A Design Sub-Consultant is a qualified, licensed design professional who is not an employee of the Design Consultant, but is retained by the Design Consultant or employed or retained by anyone

© 2022 Design-Build Institute of America

under contract to Design Consultant, to furnish design services required under the Contract Documents.

1.2.1.7 *Force Majeure Events* are those events that are beyond the control of the Design-Build Subcontractor, Design-Builder and Owner, including the events of wars, floods, labor disputes, earthquakes, epidemics, adverse weather conditions not reasonably anticipated and other acts of God.

1.2.1.8 *Hazardous Conditions* are any materials, wastes, substances and chemicals deemed to be hazardous under applicable Legal Requirements, or the handling, storage, remediation or disposal of which are regulated by applicable Legal Requirements.

1.2.1.9 *Legal Requirements* are all applicable federal, state and local laws, codes, ordinances, rules, regulations, orders and decrees of any government or quasi-government entity having jurisdiction over the parties, the Project or Site, the practices involved in the Project or Site, or any Work.

1.2.1.10 *Owner's Project Criteria* are developed by or for Owner to describe Owner's program requirements and objectives for the Project, including use, space, price, time, site and expandability requirements, as well as submittal requirements and other requirements governing Design-Builder's performance of the Work. Owner's Project Criteria may include conceptual documents, design criteria, design performance specifications, design specifications, and LEED® or other sustainable design criteria and other Project-specific technical materials and requirements.

1.2.1.11 *Project Schedule* refers to the schedule setting forth the dates by which the various stages of both the design and construction of the Project must be performed so as to satisfy Design-Builder's obligations to Owner.

1.2.1.12 *Site* is the land or premises on which the Project is located.

1.2.1.13 *Sub-Subcontractor* is any person or entity retained by Design-Build Subcontractor as an independent contractor to perform a portion of the construction aspects of Design-Build Subcontractor's Work and shall include materialmen and suppliers.

1.2.1.14 *Substantial Completion* or *Substantially Complete* is the date on which the Project, or an agreed upon portion of the Project, is sufficiently complete so that Owner can occupy and use the Project or a portion thereof for its intended purposes.

1.2.1.15 *Work* is comprised of all Design-Build Subcontractor's design, construction and other services required by the Contract Documents, including procuring and furnishing all supervision, labor, inspection, testing, start-up, materials, tools, equipment, machinery, transportation, temporary utilities, temporary facilities and all other items and services reasonably inferable from this Agreement and the other Contract Documents necessary to complete the portion of the Project described in Exhibit _____. *(Identify with specificity that portion of the Project which Design-Build Subcontractor is responsible for designing and constructing.)*

1.3 Contract Documents.

1.3.1 The Contract Documents are comprised of the following:

1.3.1.1 All written modifications, amendments, minor changes and change orders to this Agreement;

1.3.1.2 The Basis of Design Documents;

1.3.1.3 This Agreement, including all exhibits and attachments, executed by Design-Builder and Design-Build Subcontractor;

1.3.1.4 The Construction Documents; and

© 2022 Design-Build Institute of America

1.3.1.5 The Design-Build Agreement (excluding the Basis of Design Documents), but only to the extent the Design-Build Agreement relates to the Work and the terms and conditions under which the Work shall be performed.

1.4 Interpretation and Intent.

1.4.1 Design-Builder and Design-Build Subcontractor, prior to execution of the Agreement, shall carefully review all the Contract Documents, including the various documents comprising the Basis of Design Documents, for any conflicts or ambiguities. Design-Builder and Design-Build Subcontractor will discuss and resolve any identified conflicts or ambiguities prior to execution of the Agreement.

1.4.2 The Contract Documents are intended to be complementary and interpreted in harmony so as to avoid conflict, with words and phrases interpreted consistent with construction and design industry standards. In the event inconsistencies, conflicts or ambiguities between or among the Contract Documents are discovered after execution of the Agreement, Design-Builder and Design-Build Subcontractor shall attempt to resolve such ambiguities, conflicts or inconsistencies informally, recognizing that the Contract Documents shall take precedence in the order in which they are listed in Section 1.3 hereof.

1.4.3 If Owner's Project Criteria contain design specifications, Design-Build Subcontractor shall be entitled to reasonably rely on the accuracy of the information represented in the design specifications and its compatibility with other information set forth in Owner's Project Criteria, including any performance specifications, to the same extent as Design-Builder is entitled to so rely in the Design-Build Agreement. If Design-Build Subcontractor contends that its costs and/or time of performance have been adversely impacted by such inaccurate design specifications, then it shall proceed in accordance with Article 13.3.

1.5 Mutual Obligations and Acknowledgments.

1.5.1 Design-Builder and Design-Build Subcontractor commit at all times to cooperate fully with each other, and proceed on the basis of trust and good faith, to permit each party to realize the benefits afforded under the Contract Documents. Design-Builder and Design-Build Subcontractor shall perform their respective responsibilities, obligations and services in a timely manner to facilitate the other's timely and efficient performance and so as not to delay or interfere with the other's performance of its obligations under the Contract Documents.

1.5.2 Design-Builder and Design-Build Subcontractor acknowledge that they have cooperated with each other in the procurement of the Design-Build Agreement and that Design-Builder and Design-Build Subcontractor have met to review, discuss, and familiarize themselves with the Design-Build Agreement, including the Basis of Design Documents.

1.5.3 Design-Builder and Design-Build Subcontractor acknowledge that the design services performed by Design-Build Subcontractor hereunder relate to a part of the overall design of the Project and the importance of having Design-Build Subcontractor's design integrated into the Project's overall design concept. The parties commit to working with each other, and with Design-Builder's Design Consultant, to facilitate the coordination and integration of Design-Build Subcontractor's design services and Work Product with the overall design concept and Construction Documents. Design-Builder is responsible for the services performed by the Design Consultant, or other Subcontractors or Design-Build Subcontractors of Design-Builder, but nothing herein is intended to relieve Design-Build Subcontractor of its obligations to coordinate its Work with the services performed by the Design Consultant, other Subcontractor, or Design-Build Subcontractors.

1.6 Entire Agreement.

1.6.1 Subject to the limitation in Section 1.3.1.5, the Contract Documents, all of which are incorporated by reference into this Agreement, form the entire agreement between Design-Builder and Design-Build Subcontractor and are as fully binding on the parties as if repeated herein. No oral representations or other agreements have been made by the parties except as specifically stated in the Contract Documents.

Article 2

Design-Build Subcontractor's Services and Responsibilities

2.1 General.

2.1.1 Within seven (7) days after execution of this Agreement, Design-Builder and Design-Build Subcontractor will meet to discuss issues affecting the administration and schedule of the Work, and implement the necessary procedures, including but not limited to those relating to design submissions, schedule updates, submittals, and payment, to facilitate the ability of the parties to perform their obligations under this Agreement.

2.1.2 Design-Build Subcontractor's Representative shall be reasonably available to Design-Builder and shall have the necessary expertise and experience required to supervise the Work. Design-Build Subcontractor's Representative shall communicate regularly with Design-Builder and shall be vested with the authority to act on behalf of Design-Build Subcontractor. Design-Build Subcontractor shall replace its Representative upon the reasonable request of Design-Builder.

2.1.3 Design-Build Subcontractor shall only communicate with Owner, Design-Builder's Design Consultant or separate contractors of Design-Builder or Owner through Design-Builder.

2.2 Review of Site and Contract Documents.

2.2.1 Design-Build Subcontractor represents that it has examined the Site and the Contract Documents prior to executing this Agreement so as to reasonably ascertain the nature of the Work and the various conditions affecting the Work.

2.2.2 Design-Build Subcontractor shall promptly report to Design-Builder any errors, inconsistencies, omissions or violations of Legal Requirements that Design-Build Subcontractor discovers. Design-Build Subcontractor shall be liable to Design-Builder for any damages resulting from any such errors, inconsistencies, omissions or violations of Legal Requirements which Design-Build Subcontractor discovers and fails to report to Design-Builder.

2.3 Design and Pre-Construction Services.

2.3.1 Design-Build Subcontractor shall, consistent with applicable state licensing laws, provide the architectural, engineering and other design professional services required to perform the Work. Design-Build Subcontractor agrees that such services shall be provided through qualified, licensed design professionals who are either (i) employed by Design-Build Subcontractor or (ii) procured by Design-Build Subcontractor from qualified, licensed Design Consultants.

2.3.2 Design-Build Subcontractor shall not engage the services of any Design Consultant without first obtaining the approval of Design-Builder, which approval shall not be unreasonably withheld. Design-Build Subcontractor agrees that each Design Consultant shall be fully bound to Design-Build Subcontractor in the same manner as Design-Build Subcontractor is bound to Design-Builder for all the requirements of the Contract Documents which are applicable to the Design Consultant's scope of services. Design-Build Subcontractor shall at all times be responsible for the services performed by its Design Consultants, and shall coordinate the services of its Design Consultants to satisfy Design-Build Subcontractor's obligations under the Contract Documents. Nothing in this Agreement shall relieve Design-Build Subcontractor from responsibility for the services performed by its Design Consultants, or create any legal or contractual relationship between Design-Builder and any Design Consultant.

2.3.3 The standard of care for all design professional services performed by Design-Build Subcontractor and its Design Consultants pursuant to this Agreement shall be the care and skill ordinarily used by members of the applicable profession practicing under similar conditions at the same time and locality of the Project.

2.3.4 Design-Build Subcontractor shall assist Design-Builder regarding the selection of building systems, materials and equipment, as well as cost, schedule and construction feasibility assistance for the Work. Such assistance shall include providing advice relative to, among other things, labor availability, construction costs, procurement strategies (including scheduling the procurement of

© 2022 Design-Build Institute of America

items with long-lead times) related to the requirements set forth in the Contract Documents for the Work.

2.3.5 In accordance with the times set forth in the Project Schedule, Design-Build Subcontractor shall submit to Design-Builder all interim design submissions and revisions for the Work as required by the Contract Documents. Interim design submissions shall be consistent with Owner's Project Criteria as well as the Basis of Design Documents as the Basis of Design Documents may have been modified or supplemented in accordance with the Contract Documents. Such interim design submissions shall be in the form and quantity called for in the Contract Documents and may include design criteria, drawings, diagrams and specifications setting forth the Project requirements. The submissions shall also show the relationship of the Work to the overall Project design. Design-Builder and Design-Build Subcontractor agree that prior to the scheduled date for submitting all design submissions to Owner, Design-Builder, Design-Build Subcontractor and Design-Build Subcontractor's Design Consultant will hold meetings for the purpose of discussing and monitoring the design for consistency with the requirements of the Contract Documents.

2.3.6 In accordance with the Contract Documents and with the times set forth in the Project Schedule, Design-Build Subcontractor shall submit to Design-Builder Construction Documents setting forth in detail drawings and specifications describing the requirements for construction of the Work and showing the relationship of the Work to the overall Project. The Construction Documents shall be consistent with the latest set of interim design submissions, as such submissions may have been modified in a design review meeting. Design-Build Subcontractor shall provide the Construction Documents in the form and quantity called for in the Contract Documents. Design-Build Subcontractor shall perform agreed upon revisions and submit revised Construction Documents to Design-Builder for Design-Builder's and Owner's approval.

2.3.7 Design-Build Subcontractor shall attend and participate in such meetings as are held between and among Owner, Design-Builder and Design-Builder's Design Consultant to discuss interim design submissions and the Construction Documents for the Work. Design-Build Subcontractor shall identify during each such meeting, among other things, the evolution of the design and any changes or deviations from the Contract Documents, including the Basis of Design Documents, or, if applicable, previously submitted design submissions. To the extent that Design-Build Subcontractor fails to identify such changes or fails to produce Construction Documents for the Work consistent with the Basis of Design Documents and identified and approved changes and Design-Builder incurs additional uncompensated costs as a result, Design-Build Subcontractor shall be responsible for such costs. Minutes of the meetings, including a full listing of all changes, will be maintained by Design-Builder and provided to all attendees for review. Design-Build Subcontractor shall review such minutes and provide notice of any objections thereto. The Construction Documents for the Work shall be consistent with the latest set of interim design submissions as such submissions may have been modified in a design review meeting and recorded in the meeting minutes.

2.3.8 In addition to the interim design submissions and Construction Documents, if requested by Design-Builder, Design-Build Subcontractor shall prepare (i) those design documents and pricing information for the Work that may be necessary for the establishment of a GMP Exhibit or GMP Proposal and (ii) interim design submissions and Construction Documents for the Work required to permit commencement of construction on a portion of the Project before the entire Construction Documents for the Project are completed.

2.3.9 Design-Builder's and Owner's review and/or approval of interim design submissions and the Construction Documents are for the purpose of mutually establishing a conformed set of Construction Documents for the Work compatible with the requirements of the Contract Documents. The review and/or approval by either Design-Builder or Owner of any interim design submission or the Construction Documents shall not be deemed to transfer any design liability from Design-Build Subcontractor to Design-Builder or Owner.

2.3.10 Design-Build Subcontractor will, at its own cost, revise any interim design submission or Construction Document it has provided to correct any errors, mistakes or omissions. Such revisions shall be performed timely and so as not to jeopardize the Project Schedule.

© 2022 Design-Build Institute of America

2.4 Construction Services Generally.

2.4.1 Design-Build Subcontractor shall perform all construction activities efficiently and with the requisite expertise, skill and competence to satisfy the requirements of the Contract Documents and the Project Schedule.

2.4.2 At the request of Design-Builder, Design-Build Subcontractor shall attend meetings with Design-Builder, Owner and/or separate design professionals or contractors of Design-Builder or Owner to discuss design and/or construction issues which may arise during the Project.

2.5 Submittals and Substitutions.

2.5.1 In accordance with the Contract Documents and the Project Schedule, Design-Build Subcontractor shall submit for Design-Builder's review and approval submittals, including shop drawings, product data and samples. Design-Builder shall advise Design-Build Subcontractor on or before the meeting required by Section 2.1.1 hereof of the submittal requirements for the Project. Any variances with the Construction Documents shall be specifically identified in Design-Build Subcontractor's submittals. Design-Builder's review and approval shall not relieve Design-Build Subcontractor of its responsibilities to perform the Work in accordance with the Construction Documents unless Design-Builder expressly approves in writing any such variance in its response to Design-Build Subcontractor's submittals. Design-Build Subcontractor shall make any necessary revisions to the submittals requested by Design-Builder.

2.5.2 Design-Build Subcontractor shall not make any substitutions in the Work or procedures or methods specified by Owner, Design-Builder or the Construction Documents for performing the Work unless it first receives written approval for such substitution from Design-Builder.

2.6 Sub-Subcontractors.

2.6.1 Design-Build Subcontractor shall employ only Sub-Subcontractors who are duly licensed and qualified to perform the Work consistent with the Contract Documents. Design-Build Subcontractor agrees that each Sub-Subcontractor shall be fully bound to Design-Build Subcontractor in the same manner as Design-Build Subcontractor is bound to Design-Builder for all the requirements of the Contract Documents to the extent applicable to the Sub-Subcontractor's scope of work.

2.6.2 Design-Build Subcontractor assumes responsibility to Design-Builder for the proper performance of the Work of Sub-Subcontractors and any acts and omissions in connection with such performance. Design-Build Subcontractor shall coordinate the activities of all Sub-Subcontractors. Nothing in this Agreement is intended or deemed to relieve Design-Build Subcontractor from responsibility for the work performed by its Sub-Subcontractors, or create any legal or contractual relationship between Owner or Design-Builder and any Sub-Subcontractor, including but not limited to any third-party beneficiary rights.

2.7 Work of Others.

2.7.1 Design-Build Subcontractor agrees to reasonably cooperate with, and coordinate its activities so as not to interfere with, those parties performing work at the Site, including Owner's and Design-Builder's separate contractors, so that the Project can be completed in an orderly and coordinated manner without unreasonable disruption.

2.7.2 If any part of the Work depends upon other work performed by Design-Builder, or Design-Builder's or Owner's separate contractors, Design-Build Subcontractor shall, prior to proceeding with that part of the Work, inspect such other work and promptly notify Design-Builder of any discovered discrepancies or defects that would render it unacceptable for the proper performance of the Work. Design-Build Subcontractor shall not proceed with such part of the Work without further direction from Design-Builder. Design-Builder shall promptly correct or cause to be corrected any such discrepancy or defect in the other work. Except to the extent such discrepancies or defects in such other work are latent, Design-Build Subcontractor shall be liable for appropriate losses or damages incurred due to any discrepancies or defects in such other work not reported to Design-Builder by Design-Build Subcontractor.

© 2022 Design-Build Institute of America

2.8 Site Cleanup.

2.8.1 Design-Build Subcontractor shall keep the Site reasonably free from debris, trash and construction wastes resulting from the performance of the Work. Upon Substantial Completion of the Work, or a portion of the Work, Design-Build Subcontractor shall remove all debris, trash, construction wastes, materials, equipment, machinery and tools arising from the Work or applicable portions thereof to permit Owner to occupy the Project or a portion of the Project for its intended use.

2.9 Inspection.

2.9.1 At all reasonable times, Design-Build Subcontractor shall provide sufficient facilities for inspection of the Work by Design-Builder at the Site and at all locations where portions of the Work are in progress or various stages of completion. When appropriate portions of the Work are ready for inspection, Design-Build Subcontractor shall notify Design-Builder.

2.10 Patents and Copyrights.

2.10.1 Design-Build Subcontractor shall pay all license fees and royalties due for items, materials, methods, systems or processes applicable to the Work which are subject to copyrights or patent rights and which are selected by Design-Build Subcontractor.

2.11 Legal Requirements.

2.11.1 Design-Build Subcontractor shall perform the Work in accordance with all applicable Legal Requirements.

2.11.2 The Contract Price and/or the times for completion of the Work shall be adjusted to compensate Design-Build Subcontractor for the effects, if any, of any changes in the Legal Requirements enacted after the date of the Agreement affecting the performance of the Work.

2.12 Government Approvals and Permits.

2.12.1 Design-Build Subcontractor shall obtain and pay for the necessary permits, approvals, licenses, government charges and inspection fees required for the prosecution of the Work as set forth in Exhibit _____.

2.12.2 Design-Build Subcontractor shall provide reasonable assistance to Design-Builder in obtaining those permits, approvals and licenses, if any, that are the responsibility of Owner or Design-Builder and related to the Work.

2.12.3 Design-Build Subcontractor shall make any revisions to the Construction Documents necessary to secure permits, approvals and licenses, including those which have been denied for failure of the Construction Documents to meet Legal Requirements. If such revisions are necessary for reasons beyond the control of Design-Build Subcontractor or its Design Consultants, Design-Build Subcontractor shall be compensated for such revisions as a change to this Agreement.

2.13 Project Safety.

2.13.1 Design-Build Subcontractor recognizes the importance of performing the Work in a safe manner so as to prevent damage, injury or loss to (i) all individuals at the Site, whether working or visiting, (ii) the Work, including materials and equipment incorporated into the Work or stored on-Site or off-Site, (iii) the work of others on the Project, and (iv) all other property at the Site or adjacent thereto. Design-Build Subcontractor assumes responsibility for implementing and monitoring all safety precautions and programs related to the performance of the Work.

2.13.2 Design-Build Subcontractor and Sub-Subcontractors shall comply with all Legal Requirements relating to safety, as well as any Owner-specific and/or Design-Builder-specific safety requirements set forth in the Contract Documents or established for the Project, provided that such Owner-specific and/or Design-Builder-specific requirements do not violate any applicable Legal Requirement. Design-Build Subcontractor will immediately report in writing any safety-related

© 2022 Design-Build Institute of America

injury, loss, damage or accident arising from the Work to Design-Builder's Representative and, to the extent mandated by Legal Requirements, to all government or quasi-government authorities having jurisdiction over safety-related matters involving the Project or the Work.

2.14 Warranty.

2.14.1 Design-Build Subcontractor warrants to Design-Builder that the construction, including all materials and equipment furnished as part of the construction, shall be new unless otherwise specified in the Contract Documents, of good quality, in conformance with the Contract Documents and free of defects in materials and workmanship. Design-Build Subcontractor's warranty obligation excludes defects caused by abuse, alterations or failure to maintain the Work in a commercially reasonable manner. Nothing in this warranty is intended to limit any manufacturer's warranty which provides Owner and/or Design-Builder with greater warranty rights than set forth in this Section 2.14 or the Contract Documents. Design-Build Subcontractor will provide and, if requested, assign to Design-Builder all manufacturers' warranties upon Substantial Completion.

2.15 Correction of Defective Work.

2.15.1 Design-Build Subcontractor agrees to correct any of the Work that is found not to be in conformance with the Contract Documents, including that part of the Work subject to Section 2.14 hereof, within a period of one year from the date of Substantial Completion of the Work or any portion of the Work, or within such longer period to the extent required by any specific warranty included in the Contract Documents.

2.15.2 Design-Build Subcontractor shall, within seven (7) days of receipt of written notice from Design-Builder that the Work is not in conformance with the Contract Documents, take meaningful steps to commence correction of such nonconforming Work, including the correction, removal or replacement of the nonconforming Work and any damage caused to other parts of the Work or the Project affected by the nonconforming Work. If Design-Build Subcontractor fails to commence the necessary steps within such seven (7) day period, Design-Builder, in addition to any other remedies provided under the Contract Documents, may provide Design-Build Subcontractor with written notice that Design-Builder will commence correction of such nonconforming Work with its own forces. If Design-Builder does perform such corrective Work, Design-Build Subcontractor shall be responsible for all reasonable costs incurred by Design-Builder in performing such correction. If the nonconforming Work creates an emergency requiring an immediate response, the seven (7) day period identified herein shall be deemed inapplicable.

2.15.3 The one year period referenced in Section 2.15.1 above applies only to Design-Build Subcontractor's obligation to correct nonconforming Work and is not intended to constitute a period of limitations for any other rights or remedies Design-Builder may have regarding Design-Build Subcontractor's obligations under the Contract Documents.

2.16 Start-Up and Training.

2.16.1 If required as part of Design-Build Subcontractor's Work, Design-Build Subcontractor shall be responsible for the start-up, testing, and commissioning of the Work, and shall train Owner's personnel with respect to the operation and maintenance of the Work.

2.17 Hazardous Conditions.

2.17.1 Design-Build Subcontractor is responsible for Hazardous Conditions introduced to the Site by itself, Sub-Subcontractors or anyone for whose acts they may be liable. Design-Build Subcontractor shall indemnify, defend and hold harmless Owner, Design-Builder and their officers, directors, employees and agents from and against all claims, losses, damages, liabilities and expenses, including reasonable attorneys' fees and expenses, arising out of or resulting from those Hazardous Conditions introduced to the Site by Design-Build Subcontractor, Sub-Subcontractors or anyone for whose acts they may be liable.

© 2022 Design-Build Institute of America

Article 3

Design-Builder's Services and Responsibilities

3.1 Timely Reviews and Approvals.

3.1.1 Design-Builder shall provide timely reviews and approvals of all interim design submissions, Construction Documents and submittals, consistent with the turnaround times set forth in the Project Schedule, or as agreed to by the parties at the meeting required under Section 2.1.1 hereof.

3.2 Design-Builder's Representative.

3.2.1 Design-Builder's Representative shall be responsible for providing Design-Builder-supplied information and approvals in a timely manner to permit Design-Build Subcontractor to fulfill its obligations under the Contract Documents.

3.3 Furnishing of Services and Information.

3.3.1 Unless expressly stated to the contrary in the Contract Documents, and to the extent Design-Builder has received such items from Owner, Design-Builder shall provide for Design-Build Subcontractor's information the items listed below. Design-Builder does not warrant the accuracy or completeness of such items provided, however, that Design-Build Subcontractor is entitled to rely on these items to the same extent Design-Builder is entitled to rely upon such items in the Design-Build Agreement:

3.3.1.1 Surveys describing the property, boundaries, topography and reference points for use during construction, including existing service and utility lines;

3.3.1.2 Geotechnical studies describing subsurface conditions, and other surveys describing other latent or concealed physical conditions at the Site;

3.3.1.3 Temporary and permanent easements, zoning and other requirements and encumbrances affecting land use, or necessary to permit the proper construction of the Project and enable Design-Build Subcontractor to perform the Work;

3.3.1.4 A legal description of the Site;

3.3.1.5 Record drawings of any existing structures at the Site;

3.3.1.6 Environmental studies, reports and impact statements describing the environmental conditions, including Hazardous Conditions, in existence at the Site;

3.3.1.7 Owner's Project Criteria;

3.3.1.8 All permits, approvals and licenses set forth in the Owner's Permit List attached as an exhibit to the Design-Build Agreement; and

3.3.1.9 Test and inspection reports.

3.3.2 Design-Builder shall provide Design-Build Subcontractor with a copy of the Design-Build Agreement, including all exhibits, attachments and other Contract Documents enumerated and incorporated therein.

3.3.3 Upon Design-Build Subcontractor's written request, Design-Builder shall provide Design-Build Subcontractor with information in Design-Builder's possession regarding Owner's financial ability to pay for the Work set forth in this Agreement.

3.3.4 Design-Builder shall provide Design-Build Subcontractor with the Project Schedule and appropriate updates thereto.

© 2022 Design-Build Institute of America

3.3.5 Design-Builder shall, upon request of Design-Build Subcontractor, provide Design-Build Subcontractor with interim design documents and Construction Documents for portions of the Project that are not being designed by Design-Build Subcontractor.

3.3.6 Design-Builder shall obtain those permits, approvals and licenses that are not required to be provided by Owner pursuant to the Design-Build Agreement or by Design-Build Subcontractor pursuant to Section 2.12.1 hereof. Design-Builder shall provide reasonable assistance to Design-Build Subcontractor in obtaining those permits, approvals and licenses that are Design-Build Subcontractor's responsibility.

3.4 Notification of Errors.

3.4.1 Design-Builder shall notify Design-Build Subcontractor of any errors, inconsistencies or omissions Design-Builder discovers in the Work. Notwithstanding anything to the contrary in this Agreement, nothing in this Agreement shall relieve Design-Build Subcontractor of responsibility for errors, inconsistencies or omissions in the Work.

3.5 Attendance at Design Meetings.

3.5.1 Design-Builder shall afford Design-Build Subcontractor and its Sub-Subcontractors the opportunity to attend all necessary design meetings with Owner, Design-Builder's Design Consultant or others furnishing portions of the design for the Project.

3.6 Review and Approval of Submittals.

3.6.1 Design-Builder shall review and approve submittals, including shop drawings, product data and samples, submitted by Design-Build Subcontractor. Design-Builder's review and approval of submittals shall be only for the purpose of confirming general conformance with the Construction Documents. Design-Builder's review and approval shall not relieve Design-Build Subcontractor of its responsibilities to perform the Work in accordance with the Construction Documents unless Design-Builder expressly approves in writing any such variance in its response to Design-Build Subcontractor's submittals. If revisions are necessary to a submittal prior to Design-Builder's approval, Design-Builder shall inform Design-Build Subcontractor of any such necessary revisions.

3.7 Design-Builder's Separate Contractors.

3.7.1 Design-Builder is responsible for all work performed on the Project or at the Site by separate contractors under Design-Builder's control. Design-Builder shall contractually require its separate contractors to cooperate with, and coordinate their activities so as not to interfere with, Design-Build Subcontractor's ability to timely complete the Work consistent with the Contract Documents.

Article 4

Ownership of Work Product

4.1 Work Product.

4.1.1 All drawings, specifications and other documents and electronic data furnished by Design-Build Subcontractor to Design-Builder under this Agreement ("Work Product") are deemed to be instruments of service and Design-Build Subcontractor shall retain ownership and property interests therein provided, however, that Design-Build Subcontractor hereby grants Design-Builder (for the purpose of allowing Design-Builder to grant to Owner), upon Design-Builder's payment to Design-Build Subcontractor of amounts properly due under this Agreement, a limited license to use the Work Product in connection with completing this Project. Notwithstanding the preceding sentence, if the Design-Build Agreement grants ownership and/or property rights to Owner that conflict with the above, then Design-Build Subcontractor hereby grants such rights to Design-Builder (for the purpose of allowing Design-Builder to grant to Owner) under the same terms and conditions that Design-Builder grants such rights to Owner.

© 2022 Design-Build Institute of America

4.2 Agreement to Grant Rights to Owner.

4.2.1 Design-Build Subcontractor has reviewed the Design-Build Agreement and is fully aware of the ownership and property rights to use the Work Product which may be granted to Owner therein. Design-Build Subcontractor accepts and agrees to Owner's ownership and property rights with respect to the Work Product contained in the Design-Build Agreement.

4.3 Indemnification for Use of Work Product.

4.3.1 If either Design-Builder or Design-Build Subcontractor uses the Work Product on any other project, such party agrees that it shall do so at its sole risk and without liability or legal exposure to the other party, Owner or anyone working through them. Such party further agrees that it shall defend, indemnify and hold harmless the other party and Owner from and against any and all claims, damages, liabilities, losses and expenses, including attorneys' fees, arising out of or resulting from such use of the Work Product on another project.

4.4 Use of Work Product On Termination or Default.

4.4.1 If Design-Builder terminates this Agreement for its convenience as set forth in Section 8.2 hereof, or if Design-Build Subcontractor elects to terminate this Agreement in accordance with Section 8.5 of this Agreement, Design-Build Subcontractor, upon Design-Builder's payment in full of the amounts due Design-Build Subcontractor under the Contract Documents, grants Design-Builder and Owner the same rights as set forth in Section 4.1.1 above to use the Work Product to complete the Project and subsequently occupy the Project, conditioned on the following:

4.4.1.1 Use of the Work Product is at Design-Builder's sole risk without liability or legal exposure to Design-Build Subcontractor or anyone working by or through Design-Build Subcontractor, and on Design-Builder's obligation to provide the indemnity set forth in Section 4.3 herein, and

4.4.1.2 Design-Builder agrees to pay Design-Build Subcontractor the additional sum of __ _____Dollars ($_____) as compensation for the right to use the Work Product to complete the Project and subsequently use the Work Product in accordance with Section 4.1.1 if Design-Builder resumes the Project through its employees, agents, or third parties.

4.4.2 If this Agreement is terminated due to Design-Build Subcontractor's default pursuant to Section 8.3 of this Agreement, then Design-Builder shall have the same rights as set forth in Section 4.1.1 above to use the Work Product to complete the Project and subsequently occupy the Project, and Design-Builder and Owner shall thereafter have the same rights and obligations as set forth in Section 4.1.1 above. Notwithstanding the preceding sentence, if it is ultimately determined that Design-Build Subcontractor was not in default, Design-Builder shall be deemed to have terminated the Agreement for convenience, and Design-Build Subcontractor shall be entitled to the rights and remedies set forth in Section 4.4.1 above.

Article 5

Time of Performance

5.1 Date of Commencement.

5.1.1 The Work shall commence five (5) days after Design-Build Subcontractor's receipt of Design-Builder's Notice to Proceed ("Date of Commencement") unless the parties mutually agree otherwise in writing.

5.2 Time of Completion.

© 2022 Design-Build Institute of America

5.2.1 Design-Build Subcontractor shall diligently and continuously prosecute and complete the Work in accordance with the Project Schedule as it may be revised and issued from time to time during the performance of the Work, and any other scheduling requirements listed in the Contract Documents.

5.2.2 Design-Build Subcontractor shall participate and cooperate in the development of schedules and other efforts to achieve timely completion of the Work. Design-Build Subcontractor shall provide Design-Builder information for the scheduling of the times and sequence of operations required for the Work to meet Design-Builder's overall schedule requirements, shall continuously monitor the Project Schedule, including any revisions thereto, so as to be fully familiar with the timing, phasing and sequence of operation of the Work and of other work on the Project, and shall execute the Work in accordance with the requirements of the Project Schedule including any revisions thereto.

5.2.3 Design-Build Subcontractor shall timely perform the various stages of the Work so that Design-Builder can achieve the dates set forth in the Project Schedule, including any revisions thereto.

5.3 Time is of the Essence.

5.3.1 Design-Builder and Design-Build Subcontractor mutually agree that time is of the essence with respect to the dates and times set forth in the Contract Documents and the Project Schedule.

5.4 Delays to the Work.

5.4.1 If Design-Build Subcontractor is delayed on the critical path in the performance of the Work due to acts, omissions, conditions, events or circumstances beyond its control and due to no fault of its own or those for whom Design-Build Subcontractor is responsible, the time for performance shall be reasonably extended by Change Order. By way of example, events that may entitle Design-Build Subcontractor to an extension of the time for completion of the work include acts or omissions of Design-Builder, Owner or anyone under Design-Builder's or Owner's control (including separate contractors), changes in the Work, Differing Site Conditions, Hazardous Conditions and Force Majeure Events.

5.4.2 In addition to Design-Build Subcontractor's right to a time extension for those events set forth in Section 5.4.1 above, Design-Build Subcontractor shall also be entitled to an appropriate adjustment of the Contract Price provided, however, that the Contract Price shall not be adjusted for Force Majeure Events unless otherwise expressly provided in Article 17 of this Agreement.

5.4.3 Notwithstanding any other provision to the contrary, any delay and resulting damages that arise out of, or relate to, problems caused by Owner or for which Owner is responsible shall be resolved pursuant to Section 13.3 hereof.

5.4.4 If the Project is delayed due to the Design-Build Subcontractor or anyone for whom Design-Build Subcontractor is responsible, and not due to Design-Builder or Owner, Design-Build Subcontractor shall compensate and indemnify Design-Builder for all costs, damages and expenses arising from such delay, including but not limited to any liquidated damages or other damages that Owner may assess against Design-Builder which are attributable to Design-Build Subcontractor or anyone for whom Design-Build Subcontractor is responsible. In addition, Design-Build Subcontractor shall, at the direction of Design-Builder and at Design-Build Subcontractor's own cost and expense, work such overtime and take such other measures as may be necessary to make up for all time lost in the completion of the Project due to such delay.

Article 6

Contract Price

© 2022 Design-Build Institute of America

6.1 Contract Price.

6.1.1 Design-Builder shall pay Design-Build Subcontractor in accordance with Article 7 hereof the sum of _____ Dollars ($_____) ("Contract Price"), subject to adjustments made in accordance with the Contract Documents. Unless otherwise provided in the Contract Documents, the Contract Price is deemed to include all sales, use, consumer and other taxes mandated by applicable Legal Requirements. The parties acknowledge that the Contract Price herein is based upon Design-Build Subcontractor's List of Assumptions and Qualifications. To the extent Design-Build Subcontractor is required to perform work which is not consistent with its List of Assumptions and Qualifications, Design-Build Subcontractor shall be entitled to an adjustment in the Contract Price pursuant to Article 12 of this Agreement. Notwithstanding the above, Design-Builder is not responsible for Design-Build Subcontractor's bidding or estimating mistakes or miscalculation of market conditions.

6.2 Markups for Changes.

6.2.1 If the Contract Price requires an adjustment due to changes in the Work, and the cost of such changes is determined under Sections 12.6.1.3 or 12.6.1.4 hereof, the following markups shall be allowed on such changes:

6.2.1.1 For additive Change Orders, including additive Change Orders arising from both additive and deductive items, it is agreed that Design-Build Subcontractor shall receive a Fee of _____ percent (_____%) of the additional Costs of the Work incurred for that Change Order, plus any other markups set forth at Exhibit _____ hereto.

6.2.1.2 For deductive Change Orders, including deductive Change Orders arising from both additive and deductive items, the deductive amounts shall include:

[Check one box only.]

☐ No additional reduction to account for Design-Build Subcontractor's Fee or any other markup.

or

☐ An amount equal to the sum of: (a) _____ percent (_____%) applied to the direct costs of the net reduction (which amount will account for a reduction associated with Design-Build Subcontractor's Fee); plus (b) any other markups set forth at Exhibit _____ hereto applied to the direct costs of the net reduction.

Article 7

Procedure for Payment

7.1 Schedule of Values.

7.1.1 Unless required by Design-Builder upon execution of this Agreement, within ten (10) days of execution of the Agreement, Design-Build Subcontractor shall submit for Design-Builder's review and approval a schedule of values for all of the Work. The Schedule of Values will (i) subdivide the Work into its respective parts; (ii) include values for all items comprising the Work; and (iii) serve as the basis for monthly progress payments made to Design-Build Subcontractor throughout the Work.

7.2 Progress Payments.

7.2.1 Beginning with the first month after the Date of Commencement, Design-Build Subcontractor shall submit on the _____ (_____) day of each month for

© 2022 Design-Build Institute of America

Design-Builder's review and approval, Design-Build Subcontractor's Application for Payment requesting payment for all Work performed as of the date of the Application for Payment. The Application for Payment shall be accompanied by all supporting documentation required by the Contract Documents and/or established at the meeting required by Section 2.1.1 hereof. Design-Builder will submit Design-Build Subcontractor's proper Application for Payment to Owner with Design-Builder's application.

7.2.2 The Application for Payment may request payment for equipment and materials not yet incorporated into the Project, provided that (i) Design-Builder is satisfied that the equipment and materials are suitably stored at either the Site or another acceptable location, (ii) the equipment and materials are protected by suitable insurance and (iii) upon payment, Design-Builder will receive the equipment and materials free and clear of all liens and encumbrances.

7.2.3 The Application for Payment shall constitute Design-Build Subcontractor's representation that the Work has been performed consistent with the Contract Documents, has progressed to the point indicated in the Application for Payment and that title to all Work will pass to Owner free and clear of all claims, liens, encumbrances and security interests upon the incorporation of the Work into the Project, or upon Design-Build Subcontractor's receipt of payment, whichever occurs earlier.

7.2.4 Design-Builder shall make payment on Design-Build Subcontractor's properly submitted and accurate Application for Payment within three (3) days after Design-Builder's receipt of payment from Owner on account of Design-Build Subcontractor's monthly Application for Payment, but in each case less the total of payments previously made, and less amounts properly withheld under this Agreement.

7.3 Retainage on Progress Payments.

7.3.1 Design-Builder will retain from each of Design-Build Subcontractor's Application for Payment _____ percent (_____%). Unless mutually agreed otherwise between the parties, retainage will be included in Design-Builder's final payment to Design-Build Subcontractor, provided Design-Builder has received such retained amounts from Owner.

7.4 Withholding of Payments.

7.4.1 If Design-Builder determines that Design-Build Subcontractor is not entitled to all or part of an Application for Payment, it will notify Design-Build Subcontractor in writing at least five (5) days prior to the date payment is due. The notice shall indicate the specific amounts Design-Builder intends to withhold, the reasons and contractual basis for the withholding, and the specific measures Design-Build Subcontractor must take to rectify Design-Builder's concerns. Design-Builder and Design-Build Subcontractor will attempt to resolve Design-Builder's concerns prior to the date payment is due. If the parties cannot resolve such concerns, Design-Builder shall pay Design-Build Subcontractor the uncontested amount of the Application for Payment, and Design-Build Subcontractor may pursue its rights under the Contract Documents, including those under Article 13 hereof.

7.5 Final Payment.

7.5.1 Design-Build Subcontractor shall submit its Final Application for Payment to Design-Builder in accordance with Section 7.5.2 below. Design-Builder shall make payment on Design-Build Subcontractor's properly submitted and accurate Final Application for Payment within ten (10) days after Design-Builder's receipt of final payment from Owner on account of Design-Build Subcontractor's Final Application for Payment, provided also that Design-Build Subcontractor has satisfied the requirements for final payment set forth in Section 7.5.2 below.

7.5.2 At the time of submission of its Final Application for Payment, Design-Build Subcontractor shall provide the following information:

7.5.2.1 An affidavit that there are no claims, obligations or liens outstanding or unsatisfied for labor, services, material, equipment, taxes or other items performed, furnished or

© 2022 Design-Build Institute of America

incurred for or in connection with the Work which will in any way affect Design-Builder's or Owner's interests;

7.5.2.2 A general release executed by Design-Build Subcontractor waiving, upon receipt of final payment by Design-Build Subcontractor, all claims, except those claims previously made in writing to Design-Builder and remaining unsettled at the time of final payment;

7.5.2.3 Consent of Design-Build Subcontractor's surety, if any, to final payment;

7.5.2.4 All operating manuals, warranties and other deliverables required by the Contract Documents; and

7.5.2.5 Certificates of insurance confirming that required coverages will remain in effect consistent with the requirements of the Contract Documents.

7.5.3 Upon making final payment, Design-Builder waives all claims against Design-Build Subcontractor except claims relating to (i) Design-Build Subcontractor's failure to satisfy its payment obligations, if such failure affects Design-Builder's or Owner's interests; (ii) Design-Build Subcontractor's failure to complete the Work consistent with the Contract Documents, including defects appearing after final completion of the Work; and (iii) the terms of any special warranties required by the Contract Documents.

7.6 Pay When Paid.

7.6.1 Design-Build Subcontractor agrees that all payments to Design-Build Subcontractor hereunder, whether progress or final payment, or for changes or delays to the Work, shall not be due until after Design-Builder actually receives payment on account of same from Owner. Notwithstanding the preceding sentence, Design-Builder shall pay Design-Build Subcontractor within a reasonable time if it has not been paid by Owner unless Owner's failure to pay Design-Builder is caused by Design-Build Subcontractor's failure to perform in accordance with this Agreement.

7.7 Interest.

7.7.1 Payments due and unpaid under this Agreement shall bear interest commencing five (5) days after payment is due at the rate of _____percent (_____%) per annum.

7.8 Advance Payments.

7.8.1 Design-Builder has the right, at its sole option, to advance any payment due Design-Build Subcontractor under this Agreement.

7.9 Payment Not Acceptance.

7.9.1 No payment to Design-Build Subcontractor under this Agreement shall be evidence of, or construed to be, acceptance of defective, faulty, improper or non-conforming work.

7.10 Design-Build Subcontractor's Payment Obligations.

7.10.1 Design-Build Subcontractor will pay its Design Consultants and Sub-Subcontractors, in accordance with its contractual obligations to such parties, all the amounts Design-Build Subcontractor has received from Design-Builder on account of their work. Design-Build Subcontractor will impose similar requirements on its Design Consultants and Sub-Subcontractors to pay those parties with whom they have contracted. Design-Build Subcontractor will indemnify and defend Owner and Design-Builder against any claims for payment and mechanic's liens as set forth in Section 11.3 hereof, providing Design-Builder is not in breach of its contractual obligations to make payment to Design-Build Subcontractor for its Work.

7.11 Record Keeping and Finance Controls.

7.11.1 With respect to changes in the Work performed on a cost basis by Design-Build Subcontractor pursuant to the Contract Documents, Design-Build Subcontractor shall keep full and

© 2022 Design-Build Institute of America

detailed accounts and exercise such controls as may be necessary for proper financial management, using accounting and control systems in accordance with generally accepted accounting principles and as may be provided in the Contract Documents. During the performance of the Work and for a period of three (3) years after final payment of the Work, Design-Builder and Design-Builder's accountants shall be afforded access to and the right to audit from time-to-time, upon reasonable notice, Design-Build Subcontractor's records, books, correspondence, receipts, subcontracts, purchase orders, vouchers, memoranda and other data relating to the changes in the Work performed on a cost basis in accordance with the Contract Documents, all of which Design-Build Subcontractor shall preserve for a period of three (3) years after final payment. Such inspection shall take place at Design-Build Subcontractor's offices during normal business hours unless another location and time is agreed to by the parties. Any multipliers or markups agreed to by the Design-Builder and Design-Build Subcontractor as part of this Agreement are only subject to audit to confirm that such multiplier or markup has been charged in accordance with this Agreement, with the composition of such multiplier or markup not being subject to audit.

Article 8

Stop Work and Termination

8.1 Design-Builder's Right To Stop Work.

8.1.1 Design-Builder may, without cause and for its convenience, order Design-Build Subcontractor in writing to stop and suspend the Work. Such suspension shall not exceed sixty (60) consecutive days or aggregate more than ninety (90) days during the duration of the Project.

8.1.2 Design-Build Subcontractor is entitled to seek an adjustment of the Contract Price and/or times for completion of the Work if its cost or time to perform the Work has been adversely impacted by any suspension or stoppage of work by Design-Builder. Notwithstanding anything to the contrary herein, if Design-Builder's suspension of the Work is the result of Owner's suspension of the Design-Builder's work under the Design-Build Agreement, then Design-Builder shall pay Design-Build Subcontractor only those amounts Design-Builder actually receives from Owner on account of the Work.

8.2 Design-Builder's Right to Terminate for Convenience.

8.2.1 Upon ten (10) days' written notice to Design-Build Subcontractor, Design-Builder may, for its convenience and without cause, elect to terminate this Agreement. In such event, Design-Builder's right to use the existing Work Product shall be as set forth in Section 4.4.1, and Design-Builder shall pay Design-Build Subcontractor for the following:

8.2.1.1 All Work executed and for proven loss, cost or expense in connection with the Work;

8.2.1.2 The reasonable costs and expenses attributable to such termination, including amounts due in settlement of terminated contracts with its Design Consultants and Sub-Subcontractors; and

8.2.1.3 ***[Choose one of the following.]***

☐ The fair and reasonable sums for overhead and profit on the sum of items 8.2.1.1 and 8.2.1.2 above.

or

☐ Overhead and profit in the amount of _____ percent (_____%) on the sum of items 8.2.1.1 and 8.2.1.2 above.

8.2.2 If Design-Builder's termination of Design-Build Subcontractor for convenience is the result of Owner's termination of Design-Builder for convenience under the Design-Build Agreement, then

© 2022 Design-Build Institute of America

Design-Builder shall pay Design-Build Subcontractor only those amounts Design-Builder actually receives from Owner on behalf of Design-Build Subcontractor.

8.3 Design-Builder's Right to Terminate for Cause.

8.3.1 If Design-Build Subcontractor persistently fails to (i) provide a sufficient number of skilled workers, (ii) supply the materials required by the Contract Documents, (iii) comply with applicable Legal Requirements, (iv) timely pay, without cause, its Sub-Subcontractors or Design Consultants, (v) prosecute the Work with promptness and diligence to ensure that the Work is completed in accordance with the Project Schedule, as such schedule may be adjusted or (vi) perform material obligations under the Contract Documents, then Design-Builder shall have the rights, in addition to any other rights and remedies provided in the Contract Documents or by law, set forth in Sections 8.3.2 and 8.3.3 below.

8.3.2 Upon the occurrence of an event set forth in Section 8.3.1 above, Design-Builder may provide written notice to Design-Build Subcontractor that it intends to terminate the Agreement unless the problem cited is cured, or commenced to be cured, within seven (7) days of Design-Build Subcontractor's receipt of such notice. If Design-Build Subcontractor fails to cure, or reasonably commence to cure, such problem, then Design-Builder may give a second written notice to Design-Build Subcontractor of its intent to terminate within an additional seven (7) day period. If Design-Build Subcontractor, within such second seven (7) day period, fails to cure, or reasonably commence to cure, such problem, then Design-Builder may declare the Agreement terminated for default by providing written notice to Design-Build Subcontractor of such declaration.

8.3.3 Upon declaring the Agreement terminated pursuant to Section 8.3.2 above, Design-Builder may enter upon the premises and take possession, for the purpose of completing the Work, of all materials, equipment, scaffolds, tools, appliances and other items thereon, which have been purchased or provided for the performance of the Work, all of which Design-Build Subcontractor hereby transfers, assigns and sets over to Design-Builder for such purpose, and to employ any person or persons to complete the Work and provide all of the required labor, services, materials, equipment and other items. Design-Builder shall have the right to use the existing Work Product for purposes of completing the Project as set forth in Section 4.4.2. In the event of such termination, Design-Build Subcontractor shall not be entitled to receive any further payments under the Contract Documents until the Work shall be finally completed in accordance with the Contract Documents. At such time, if the unpaid balance of the Contract Price exceeds the cost and expense incurred by Design-Builder in completing the Work, such excess shall be paid by Design-Builder to Design-Build Subcontractor. If Design-Builder's cost and expense of completing the Work exceeds the unpaid balance of the Contract Price, then Design-Build Subcontractor shall be obligated to pay the difference to Design-Builder. Such cost and expense shall include not only the cost of completing the Work, but also losses, damages, costs and expenses, including attorneys' fees and expenses, incurred by Design-Builder in connection with the reprocurement and defense of claims arising from Design-Build Subcontractor's default, subject to the waiver of consequential damages set forth in Section 13.7 hereof.

8.3.4 If Design-Builder improperly terminates the Agreement for cause, the termination for cause will be converted to a termination for convenience in accordance with the provisions of Section 8.2 of the Agreement.

8.4 Design-Build Subcontractor's Right To Stop Work.

8.4.1 If (i) Owner fails to pay amounts due Design-Builder under the Design-Build Agreement for Work performed by Design-Build Subcontractor, such failure is not due to the fault of Design-Build Subcontractor, and Design-Build Subcontractor has not been paid such amounts due, or (ii) Design-Builder fails to pay any undisputed amounts due Design-Build Subcontractor under this Agreement, Design-Build Subcontractor may, in addition to any other rights afforded under the Contract Documents or at law, stop work in accordance with Section 8.4.2.

8.4.2 Design-Build Subcontractor shall provide Design-Builder with written notice that Design-Build Subcontractor will stop work unless said failure to pay the amount is cured within seven (7) days from Design-Builder's receipt of Design-Build Subcontractor's notice. Design-Build

© 2022 Design-Build Institute of America

Subcontractor shall not stop work unless it provides such written notice and Design-Builder has failed to cure the reason for default within the seven (7) day cure period. If Design-Builder does not cure the problem within such seven (7) day period, Design-Build Subcontractor may stop work. In such case, Design-Build Subcontractor shall be entitled to make a claim for adjustment to the Contract Price and the times for completion of the Work to the extent it has been adversely impacted by such stoppage. To the extent Design-Builder's failure to pay is related to a dispute between the parties, the dispute will be resolved in accordance with Article 13 and the parties will continue performance in accordance with Section 13.6.

8.5 Design-Build Subcontractor's Right to Terminate For Cause.

8.5.1 Design-Build Subcontractor, in addition to any other rights and remedies afforded under the Contract Documents or at law, may terminate the Agreement for cause in accordance with Section 8.5.2 below if Design-Builder fails to cure the problems set forth in Section 8.4.1 above within thirty (30) days after Design-Build Subcontractor has stopped the work.

8.5.2 Upon the occurrence of the event set forth in Section 8.5.1 above, Design-Build Subcontractor may provide written notice to Design-Builder that it intends to terminate the Agreement unless the problem cited is cured, or commenced to be cured, within seven (7) days of Design-Builder's receipt of such notice. If Design-Builder fails to cure, or reasonably commence to cure, such problem, then Design-Build Subcontractor may give a second written notice to Design-Builder of its intent to terminate within an additional seven (7) day period. If Design-Builder, within such second seven (7) day period, fails to cure, or reasonably commence to cure, such problem, then Design-Build Subcontractor may declare the Agreement terminated for default by providing written notice to Design-Builder of such declaration. In such case, Design-Build Subcontractor shall be entitled to recover in the same manner as if Design-Builder had terminated this Agreement for its convenience under Section 8.2 of the Agreement.

8.6 Bankruptcy of Design-Builder or Design-Build Subcontractor.

8.6.1 If either Design-Builder or Design-Build Subcontractor institutes or has instituted against it a case under the United States Bankruptcy Code (such party being referred to as the "Bankrupt Party"), such event may impair or frustrate the Bankrupt Party's ability to perform its obligations under the Contract Documents. Accordingly, should such event occur:

8.6.1.1 The Bankrupt Party, its trustee or other successor, shall furnish, upon request of the non-Bankrupt Party, adequate assurance of the ability of the Bankrupt Party to perform all future material obligations under the Contract Documents, which assurances shall be provided within ten (10) days after receiving notice of the request; and

8.6.1.2 The Bankrupt Party shall file an appropriate action within the bankruptcy court to seek assumption or rejection of the Agreement within sixty (60) days of the institution of the bankruptcy filing and shall diligently prosecute such action.

If the Bankrupt Party fails to comply with its foregoing obligations, the non-Bankrupt Party shall be entitled to request the bankruptcy court to reject the Agreement, declare the Agreement terminated and pursue any other recourse available to the non-Bankrupt Party under this Article 8.

8.6.2 The rights and remedies under Section 8.6.1 above shall not be deemed to limit the ability of the non-Bankrupt Party to seek any other rights and remedies provided by the Contract Documents or by law, including its ability to seek relief from any automatic stays under the United States Bankruptcy Code.

Article 9

Representatives of the Parties

© 2022 Design-Build Institute of America

9.1 Design-Builder's Representatives.

9.1.1 Design-Builder designates the individual listed below as its Senior Representative ("Design-Builder's Senior Representative"), which individual has the authority and responsibility for avoiding and resolving disputes under Section 13.4 of the Agreement: *(Identify individual's name, title, address and telephone numbers.)*

9.1.2 Design-Builder designates the individual listed below as its Design-Builder's Representative, which individual has the authority and responsibility set forth in Section 3.2 of the Agreement: *(Identify individual's name, title, address and telephone numbers.)*

9.2 Design-Build Subcontractor's Representatives.

9.2.1 Design-Build Subcontractor designates the individual listed below as its Senior Representative ("Design-Build Subcontractor's Senior Representative"), which individual has the authority and responsibility for avoiding and resolving disputes under Section 13.4 of the Agreement: *(Identify individual's name, title, address and telephone numbers.)*

9.2.2 Design-Build Subcontractor designates the individual listed below as its Design-Build Subcontractor's Representative, which individual has the authority and responsibility set forth in Section 2.1.2 of the Agreement: *(Identify individual's name, title, address and telephone numbers.)*

Article 10

Insurance and Bonds

10.1 Design-Build Subcontractor's Insurance Requirements.

10.1.1 Design-Build Subcontractor is responsible for procuring and maintaining, from insurance companies authorized to do business in the state in which the Project is located, the insurance coverages set forth in the Insurance Exhibit to this Agreement, with the minimum ratings set forth in said exhibit for certain claims which may arise from or out of the performance of this Agreement and obligations under the Contract Documents.

10.1.2 Design-Build Subcontractor shall require its Design Consultants and Sub-Subcontractors to procure and maintain, from insurance companies authorized to do business in the state in which the Project is located, the insurance coverages set forth in the Insurance Exhibit.

10.1.3 Design-Build Subcontractor's and its Design Consultants' and Sub-Subcontractors' insurance coverage set forth in the Insurance Exhibit shall specifically delete any design-build or similar exclusions that could compromise coverages because of the design-build delivery of the Project.

10.1.4 To the extent Design-Builder requires Design-Build Subcontractor or its Design Consultant to provide professional liability insurance for claims arising from the negligent performance of design services by Design-Build Subcontractor or the Design Consultant, the coverage limits, duration and other specifics of such insurance shall be as set forth in the Insurance Exhibit. Such policies shall be provided prior to the commencement of any design services hereunder.

10.1.5 Prior to commencing any services hereunder, Design-Build Subcontractor shall provide Design-Builder with certificates evidencing that (i) all insurance obligations required by the Contract Documents are in full force and in effect and will remain in effect for the duration required by the Contract Documents and (ii) no insurance coverage will be canceled, renewal refused or materially changed unless at least thirty (30) days prior written notice is given to Design-Builder.

© 2022 Design-Build Institute of America

10.1.6 Except as otherwise stated in the Insurance Exhibit, the insurance policies required herein shall list Design-Builder, and any other entities required by the Contract Documents, if any, as an additional insured.

10.1.7 If any of the foregoing insurance coverages are required to remain in force after final payment, an additional certificate evidencing continuation of such coverage shall be submitted with the final Application for Payment.

10.2 Property Insurance.

10.2.1 In accordance with the Contract Documents, Owner or Design-Builder shall procure and maintain property insurance upon the entire Project.

10.3 Waiver of Subrogation.

10.3.1 Design-Builder and Design-Build Subcontractor waive against each other and Owner, Sub-Subcontractors, Design Consultants, Owner's or Design-Builder's separate contractors, agents and employees of each and all of them, all damages covered by property insurance provided herein, except such rights as they may have to the proceeds of such insurance. Design-Builder and Design-Build Subcontractor shall, where appropriate, require similar waivers of subrogation from Design Consultants and Sub-Subcontractors and separate contractors of Design-Builder, and shall require each of them to include similar waivers in their contracts. These waivers of subrogation shall not contain any restriction or limitation that will impair the full and complete extent of its applicability to any person or entity unless agreed to in writing prior to the execution of this Agreement.

10.4 Bonds and Other Performance Security.

10.4.1 Design-Build Subcontractor shall provide the following performance bond and labor and material payment bond or other performance security: *(Indicate the amount of bonds and any other conditions of the bonds or other security.)*

Article 11

Indemnification

11.1 Patent and Copyright Infringement.

11.1.1 Design-Build Subcontractor shall defend any action or proceeding brought against Owner or Design-Builder based on any claim that the Work, or any part thereof, or the operation or use of the Work or any part thereof, constitutes infringement of any United States patent or copyright, now or hereafter issued. Design-Builder shall give prompt written notice to Design-Build Subcontractor of any such action or proceeding and will reasonably provide authority, information and assistance in the defense of same. Design-Build Subcontractor shall indemnify and hold harmless Owner and Design-Builder from and against all damages and costs, including but not limited to attorneys' fees and expenses awarded against Owner or Design-Builder in any such action or proceeding. Design-Build Subcontractor agrees to keep Design-Builder informed of all developments in the defense of such actions.

11.1.2 If Owner is enjoined from the operation or use of the Work, or any part thereof, as the result of any patent or copyright suit, claim or proceeding, Design-Build Subcontractor shall at its sole expense take reasonable steps to procure the right to operate or use the Work. If Design-Build Subcontractor cannot so procure such right within a reasonable time, Design-Build Subcontractor shall promptly, at Design-Build Subcontractor's option and at Design-Build Subcontractor's expense, (i) modify the Work so as to avoid infringement of any patents or copyrights, or (ii) replace said Work with Work that does not infringe or violate any such patent or copyright.

© 2022 Design-Build Institute of America

11.1.3 Sections 11.1.1 and 11.1.2 above shall not be applicable to any suit, claim or proceeding based on infringement or violation of a patent or copyright (i) relating to a particular process or product of a particular manufacturer specified by Owner or Design-Builder or (ii) arising from modifications to the Work by Owner or Design-Builder after acceptance of the Work. If the suit, claim or proceeding is based upon events set forth in the preceding sentence, Design-Builder shall defend, indemnify and hold harmless Design-Build Subcontractor to the same extent Design-Build Subcontractor is obligated to defend, indemnify and hold harmless Design-Builder in Section 11.1.1 above.

11.1.4 The obligations set forth in this Section 11.1 shall constitute the sole agreement between the parties relating to liability for infringement or violation of any patent or copyright.

11.2 Tax Claim Indemnification.

11.2.1 If, in accordance with Design-Builder's direction, an exemption for all or part of the Work is claimed for taxes, Design-Builder shall indemnify, defend and hold harmless Design-Build Subcontractor from and against any liability, penalty, interest, fine, tax assessment, attorneys' fees or other expenses or costs incurred by Design-Build Subcontractor as a result of any action taken by Design-Build Subcontractor in accordance with Design-Builder's directive.

11.3 Payment Claim Indemnification.

11.3.1 Providing that Design-Builder is not in breach of its contractual obligation to make payments to Design-Build Subcontractor for the Work, Design-Build Subcontractor shall indemnify, defend and hold harmless Owner and Design-Builder from any claims or mechanic's liens brought against Owner, Design-Builder or against the Project as a result of the failure of Design-Build Subcontractor, or those for whose acts it is responsible, to pay for any services, materials, labor, equipment, taxes or other items or obligations furnished or incurred for, or in connection with the Work. Within three (3) days of receiving written notice from Design-Builder that such a claim or mechanic's lien has been filed, Design-Build Subcontractor shall commence to take the steps necessary to discharge said claim or lien, including, if necessary, the furnishing of a mechanic's lien bond. If Design-Build Subcontractor fails to do so, Design-Builder will have the right to discharge the claim or lien and hold Design-Build Subcontractor liable for costs and expenses incurred, including attorneys' fees.

11.4 Design-Build Subcontractor's General Indemnification.

11.4.1 Except as set forth in Section 11.4.2 below, Design-Builder Subcontractor, to the fullest extent permitted by law, shall indemnify, hold harmless and defend Owner, Design-Builder its officers, directors, and employees from and against claims, losses, damages, liabilities, including attorneys' fees and expenses, for non-party bodily injury, sickness or death and non-party property damage or destruction (other than to the Work itself) but only to the extent resulting from the negligent acts or omissions of Design-Builder Subcontractor, Design Consultants, its Sub-Subcontractors, anyone employed directly or indirectly by any of them or anyone for whose acts any of them may be liable.

11.4.2 For indemnity obligations that arise from professional errors and omissions, Design-Builder Subcontractor, to the fullest extent permitted by law, shall indemnify Owner, Design-Builder its officers, directors, and employees from and against claims, losses, damages, liabilities, including attorneys' fees and expenses, for non-party bodily injury, sickness, or death and non-party property damage or destruction (other than to the Work itself) but only to the extent resulting from the negligent acts or omissions of Design-Builder Subcontractor, Design Consultants, its Sub-Subcontractors, anyone employed directly or indirectly by any of them or anyone for whose acts any of them may be liable.

11.4.3 If an employee of Design-Build Subcontractor, Design Consultant, anyone employed directly or indirectly by Design-Build Subcontractor or anyone for whose acts any of them may be liable has a claim against any party indemnified pursuant to Section 11.4.1 and 11.4.2 above, Design-Build Subcontractor's indemnity obligations shall not be limited by any limitation on the

© 2022 Design-Build Institute of America

amount of damages, compensation or benefits payable by or for Design-Build Subcontractor, its Design Consultants, its Sub-Subcontractors, or other entity under any employee benefit acts, including workers' compensation or disability acts.

11.5 Design-Builder's General Indemnification.

11.5.1 Except as set forth in Section 11.5.2 below, Design-Builder, to the fullest extent permitted by law, shall indemnify, hold harmless and defend Design-Build Subcontractor and its officers, directors, employees and agents from and against claims, losses, damages, liabilities, including attorneys' fees and expenses, for non-party bodily injury, sickness or death and non-party property damage or destruction (other than to the Work itself) but only to the extent resulting from the negligent acts or omissions of Design-Builder, Design-Builder's Design Consultants, Design-Builder's other contractors, anyone employed directly or indirectly by any of them or anyone for whose acts any of them may be liable.

11.5.2 For indemnity obligations that arise from professional errors and omissions, Design-Builder, to the fullest extent permitted by law, shall indemnify Design-Build Subcontractor, its officers, directors and employees from and against claims, losses, damages, liabilities, including attorneys' fees and expenses, for non-party bodily injury, sickness or death and non-party property damage or destruction (other than to the Work itself) but only to the extent resulting from the negligent acts or omissions of Design-Builder, Design-Builder's Design Consultants, Design-Builder's other contractors, anyone employed directly or indirectly by any of them or anyone for whose acts any of them may be liable.

11.5.3 If an employee of Design-Builder, anyone employed directly or indirectly by Design-Builder or anyone for whose acts any of them may be liable has a claim against any party indemnified pursuant to this Section 11.5, Design-Builder's indemnity obligations set forth in Sections 11.5.1 and 11.5.2 above shall not be limited by any limitation on the amount of damages, compensation or benefits payable by or for Design-Builder, Design-Builder's Design Consultant, Design-Builder's other contractors or other entity under any employee benefit acts, including workers' compensation or disability acts.

11.6 Limited Recourse.

11.6.1 None of the obligations set forth in this Agreement (on behalf of any Party) constitute personal obligations of any natural persons who are the officers, shareholders, members, partners, employees or agents of any Party unless the natural person is expressly identified as a contracting party. All Parties to this Agreement shall not seek recourse against any natural person described herein. This provision, however, shall not protect such natural persons from liability for willful misconduct, illegal acts or intentional violation of any duty of corporate loyalty.

Article 12

Changes to the Contract Price and Time

12.1 Owner-Generated Changes.

12.1.1 If Owner issues changes affecting the Work, Design-Build Subcontractor agrees, if directed by Design-Builder, to meet with Design-Builder and Owner to review and discuss the changes. Design-Build Subcontractor shall only be entitled to adjustments in its Contract Price and the times for completion of the Work attributable to such Owner-generated changes to the extent Design-Builder actually receives such adjustments from Owner. If Design-Build Subcontractor disputes the adjustment, such dispute shall be resolved pursuant to Section 13.3 of this Agreement.

12.2 Design-Builder Generated Changes.

© 2022 Design-Build Institute of America

12.2.1 Changes to the Work issued by Design-Builder shall be governed by the provisions set forth in the following sections of this Article 12.

12.3 Change Orders.

12.3.1 A Change Order is a written instrument issued after execution of the Agreement signed by Design-Builder and Design-Build Subcontractor, stating their agreement upon all of the following:

12.3.1.1 The scope of the change in the Work;

12.3.1.2 The amount of the adjustment to the Contract Price; and

12.3.1.3 The extent of the adjustment to the times for completion of the Work.

12.3.2 All changes in the Work authorized by applicable Change Order shall be performed under the applicable conditions of the Contract Documents. Design-Builder and Design-Build Subcontractor shall negotiate in good faith and as expeditiously as possible the appropriate adjustments for such changes.

12.3.3 If Design-Builder requests a proposal for a change in the Work from Design-Build Subcontractor and subsequently elects not to proceed with the change, a Change Order shall be issued to reimburse Design-Build Subcontractor for reasonable costs incurred for preparing the proposal.

12.4 Work Change Directives.

12.4.1 A Work Change Directive is a written order prepared and signed by Design-Builder directing a change in the Work prior to agreement on an adjustment in the Contract Price and/or the times for completion of the Work.

12.4.2 Design-Builder and Design-Build Subcontractor shall negotiate in good faith and as expeditiously as possible the appropriate adjustments for the Work Change Directive. Upon reaching an agreement, the parties shall prepare and execute an appropriate Change Order reflecting the terms of the agreement.

12.5 Minor Changes in the Work.

12.5.1 Minor changes in the Work are changes that do not involve an adjustment in the Contract Price and/or times for completion of the Work and do not materially and adversely affect the Work, including the design, quality, performance and workmanship required by the Contract Documents. Design-Builder may make minor changes in the Work consistent with the intent of the Contract Documents, provided, however, that Design-Builder shall promptly inform Design-Build Subcontractor, in writing, of any such changes.

12.6 Contract Price Adjustment.

12.6.1 The increase or decrease in Contract Price resulting from a change in the Work shall be determined by one or more of the following methods:

12.6.1.1 Unit prices set forth in the Agreement or as subsequently agreed between the parties;

12.6.1.2 A mutually accepted lump sum, properly itemized and supported by sufficient substantiating data to permit evaluation by Design-Builder;

12.6.1.3 Costs, fees and any other markups set forth in the Agreement; and

12.6.1.4 If an increase or decrease cannot be agreed to as set forth in items 12.6.1.1 through 12.6.1.3 above and Design-Builder issues a Work Change Directive, the cost of the change of the Work shall be determined by the reasonable expense and savings in the performance of the Work resulting from the change, including a reasonable overhead and profit, as may be set forth in this Agreement. If the net result of both additions and deletions to the Work is an increase in the Contract Price, reasonable overhead and profit shall be

© 2022 Design-Build Institute of America

calculated on the basis of the net increase to the Contract Price. Design-Build Subcontractor shall maintain a documented, itemized accounting evidencing the expenses and savings associated with such changes.

12.6.2 If unit prices are set forth in the Contract Documents or are subsequently agreed to by the parties, but application of such unit prices will cause substantial inequity to Design-Builder or Design-Build Subcontractor because of differences in the character or quantity of such unit items as originally contemplated, such unit prices shall be equitably adjusted.

12.6.3 If Design-Builder and Design-Build Subcontractor disagree upon whether Design-Build Subcontractor is entitled to be paid for any services required by Design-Builder, or if there are any other disagreements over the scope of Work or proposed changes to the Work, Design-Builder and Design-Build Subcontractor shall resolve the disagreement pursuant to Article 13 hereof. As part of the negotiation process, Design-Build Subcontractor shall furnish Design-Builder with a good faith estimate of the costs to perform the disputed services in accordance with Design-Builder's interpretations. If the parties are unable to agree and Design-Builder expects Design-Build Subcontractor to perform the services in accordance with Design-Builder's interpretations, Design-Build Subcontractor shall proceed to perform the disputed services, conditioned upon Design-Builder issuing a written order to Design-Build Subcontractor (i) directing Design-Build Subcontractor to proceed and (ii) specifying Design-Builder's interpretation of the services that are to be performed.

12.7 Emergencies.

12.7.1 In any emergency affecting the safety of persons and/or property, Design-Build Subcontractor shall act, at its discretion, to prevent threatened damage, injury or loss. Any change in the Contract Price and/or times for completion of the Work on account of emergency work shall be determined as provided in this Article 12.

Article 13

Contract Adjustments and Disputes

13.1 Requests for Contract Adjustments and Relief.

13.1.1 If either Design-Build Subcontractor or Design-Builder believes that it is entitled to relief against the other for any event arising out of or related to the Work or the Project, such party shall provide written notice to the other party of the basis for its claim for relief. Such notice shall be in accordance with specific notice requirements contained in applicable sections of the Contract Documents and, if possible, be made prior to incurring any cost or expense. Design-Build Subcontractor shall provide Design-Builder written notice of claims for which Owner may be responsible in sufficient time for Design-Builder to meet its notice requirements to Owner set forth in the Contract Documents. In the absence of any specific notice requirement, written notice shall be given within a reasonable time, not to exceed ten (10) days, after the occurrence giving rise to the claim for relief or after the claiming party reasonably should have recognized the event or condition giving rise to the request, whichever is later. The claimant shall provide more complete information with respect to the claim within ten (10) days of the initial notice. The more complete information shall be in accordance with the Contract Documents and shall include sufficient information to advise the other party of the circumstances giving rise to the claim for relief, the specific contractual adjustment or relief requested and the basis of such request. Design-Build Subcontractor shall comply with all documentation requirements set forth in the Design-Build Agreement when submitting its claim to Design-Builder.

13.2 Dispute Avoidance and Resolution.

13.2.1 The parties are fully committed to working with each other throughout the Project and agree to communicate regularly with each other at all times so as to avoid or minimize disputes or disagreements. If disputes or disagreements do arise, Design-Build Subcontractor and Design-

© 2022 Design-Build Institute of America

Builder each commit to resolving such disputes or disagreements in an amicable, professional and expeditious manner so as to avoid unnecessary losses, delays and disruptions to the Work.

13.3 Disputes Involving Owner.

13.3.1 To the extent a claim, dispute or controversy arises out of, or relates to, problems caused by Owner or for which Owner is responsible ("Owner Disputes"), such Owner Disputes shall be resolved pursuant to the dispute resolution clause set forth in the Design-Build Agreement. Both Design-Builder and Design-Build Subcontractor agree to cooperate in the presentation and prosecution or defense of Owner Disputes. If, after a request for an extension of time or additional compensation from Design-Build Subcontractor, Design-Builder believes that the event causing the delay or additional compensation is the responsibility of Owner, then Design-Builder will cooperate with and assist Design-Build Subcontractor in presenting a request for an extension of time or additional compensation to Owner. Notwithstanding the above, Design-Builder reserves the right not to submit a claim to Owner. In such cases, the claim shall be resolved pursuant to Section 13.4.

13.3.2 Notwithstanding any other provisions herein to the contrary, Design-Builder and Design-Build Subcontractor each agree to accept the relief as to a time extension or additional compensation obtained from Owner, if any, as well as all other aspects of the final decision following appeal or the expiration of the time for appeal, as full and final resolution of any Owner Dispute.

13.3.3 If Design-Builder asserts a claim against Owner involving Design-Build Subcontractor, each party shall bear its own costs for outside counsel and third-party consultants retained to prosecute claims against Owner and for any other litigation costs. Each party shall present its portion of the claim to Owner.

13.3.4 If Owner contends that the Contract Documents have been breached, or otherwise asserts a claim or set-off against Design-Builder, the party determined to be responsible for the breach either by settlement or by the trier of fact shall be responsible for all costs occasioned by the breach, including counsel and litigation costs. If the trier of fact fails to determine the relative degrees of fault of Design-Builder and Design-Build Subcontractor in connection with any claim by Owner, then Design-Builder and Design-Build Subcontractor agree that the allocation of fault shall be determined pursuant to Section 13.4.

13.4 Disputes Not Involving Owner.

13.4.1 For any claim, dispute or controversy not arising out of, or relating to, problems caused by Owner or for which Owner is responsible, Design-Build Subcontractor and Design-Builder will first attempt to resolve such claim, dispute or controversy at the field level through discussions between Design-Builder's Representative and Design-Build Subcontractor's Representative.

13.4.2 If a claim, dispute or controversy cannot be resolved through Section 13.4.1, Design-Builder's Senior Representative and Design-Build Subcontractor's Senior Representative, upon the request of either party, shall meet as soon as conveniently possible, but in no case later than thirty (30) days after such a request is made, to attempt to resolve such claim, dispute or controversy. Five (5) days prior to any meetings between the Senior Representatives, the parties will exchange relevant information that will assist the parties in resolving the claim, dispute or controversy.

13.4.3 If after meeting the Senior Representatives determine that the claim, dispute or controversy cannot be resolved on terms satisfactory to both parties, the parties shall submit within thirty (30) days of the conclusion of the meeting by the Senior Representatives the claim, dispute or controversy to non-binding mediation. The mediation shall be conducted by a mutually agreeable impartial mediator, or if the parties cannot so agree, a mediator designated by the American Arbitration Association ("AAA") pursuant to its Construction Industry Mediation Rules. The mediation will be governed by and conducted pursuant to a mediation agreement negotiated by the parties or, if the parties cannot so agree, by procedures established by the mediator. Unless otherwise mutually agreed by Design-Builder and Design-Build Subcontractor and consistent with the mediator's schedule, the mediation shall commence within ninety (90) days of the submission of the dispute for mediation. Representatives with authority to resolve the dispute shall be present at the mediation.

© 2022 Design-Build Institute of America

13.5 Arbitration.

13.5.1 Any claims, disputes or controversies between the parties arising out of or relating to the Agreement, or the breach thereof, which have not been resolved in accordance with the procedures set forth in Section 13.4 above, shall be decided by arbitration in accordance with the Construction Industry Arbitration Rules of the AAA then in effect, unless the parties mutually agree otherwise.

13.5.2 The award of the arbitrator(s) shall be final and binding upon the parties without the right of appeal to the courts. Judgment may be entered upon it in accordance with applicable law by any court having jurisdiction thereof.

13.5.3 Design-Build Subcontractor and Design-Builder expressly agree that any arbitration pursuant to this Section 13.5 may be joined or consolidated with any arbitration involving any other person or entity (i) necessary to resolve the claim, dispute or controversy, or (ii) substantially involved in or affected by such claim, dispute or controversy. Both Design-Builder and Design-Build Subcontractor will include appropriate provisions in all contracts they execute with other parties in connection with the Project to require such joinder or consolidation.

13.5.4 The prevailing party in any arbitration, or any other final, binding dispute proceeding upon which the parties may agree, shall be entitled to recover from the other party reasonable attorneys' fees and expenses incurred by the prevailing party. The prevailing party, if any, shall be determined by the applicable binding dispute tribunal.

13.6 Duty to Continue Performance.

13.6.1 Unless provided to the contrary in the Contract Documents, Design-Build Subcontractor shall continue to perform the Work and Design-Builder shall continue to satisfy its payment obligations for undisputed amounts to Design-Build Subcontractor, pending the final resolution of any dispute or disagreement between Design-Builder and Design-Build Subcontractor.

13.7 CONSEQUENTIAL DAMAGES.

13.7.1 NOTWITHSTANDING ANYTHING HEREIN TO THE CONTRARY (EXCEPT AS SET FORTH IN SECTION 13.7.2 BELOW), NEITHER DESIGN-BUILDER NOR DESIGN-BUILD SUBCONTRACTOR SHALL BE LIABLE TO THE OTHER FOR ANY CONSEQUENTIAL LOSSES OR DAMAGES, WHETHER ARISING IN CONTRACT, WARRANTY, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY OR OTHERWISE, INCLUDING BUT NOT LIMITED TO LOSSES OF USE, PROFITS, BUSINESS, REPUTATION OR FINANCING.

13.7.2 Notwithstanding Section 13.7.1 above, Design-Builder shall be entitled to recover against Design-Build Subcontractor (i) any liquidated damages that Owner may assess against Design-Builder which are attributable to Design-Build Subcontractor, even though both parties recognize that such liquidated damages may include some damages that might otherwise be deemed to be consequential and (ii) any liability of Design-Build Subcontractor for consequential damages that may be imposed upon the Design-Builder by the Design-Build Agreement.

Article 14

Miscellaneous

14.1 Assignment.

14.1.1 Neither Design-Build Subcontractor nor Design-Builder shall, without the written consent of the other, assign, transfer or sublet any portion or part of the Work or the obligations required by the Contract Documents.

14.2 Successorship.

14.2.1 Design-Builder and Design-Build Subcontractor intend that the provisions of the Contract Documents are binding upon the parties, their employees, agents, heirs, successors and assigns.

© 2022 Design-Build Institute of America

14.3 Governing Law.

14.3.1 The Agreement and all Contract Documents shall be governed by the laws of the location of the Project, without giving effect to its conflict of law principles.

14.4 Severability.

14.4.1 If any provision or any part of a provision of the Contract Documents shall be finally determined to be superseded, invalid, illegal or otherwise unenforceable pursuant to any applicable Legal Requirements or court order, such determination shall not impair or otherwise affect the validity, legality or enforceability of the remaining provision or parts of the provision of the Contract Documents, which shall remain in full force and effect as if the unenforceable provision or part were deleted.

14.5 No Waiver.

14.5.1 The failure of either Design-Builder or Design-Build Subcontractor to insist, in any one or more instances, on the performance of any of the obligations required by the other under the Contract Documents shall not be construed as a waiver or relinquishment of such obligation or right with respect to future performance.

14.6 Headings.

14.6.1 The headings used in this Agreement, or any other Contract Document, are for ease of reference only and shall not in any way be construed to limit or alter the meaning of any provision.

14.7 Notice.

14.7.1 Whenever the Contract Documents require that notice be provided to the other party, notice will be deemed to have been validly given (i) if delivered in person to the individual intended to receive such notice, (ii) four (4) days after being sent by registered or certified mail, postage prepaid to the address indicated in the Agreement, or (iii) if transmitted by facsimile, by the time stated in a machine generated confirmation that notice was received at the number of the intended recipient or (iv) by electronic mail, by the time frame stated in the email-generated confirmation that notice was received by the email of the intended recipient.

14.8 Amendments.

14.8.1 The Contract Documents may not be changed, altered or amended in any way except in writing signed by a duly authorized representative of each party.

14.9 Survival.

14.9.1 Design-Build Subcontractor's obligations under this Agreement shall not be released and shall specifically survive the completion of all services hereunder by Design-Build Subcontractor, final payment to Design-Build Subcontractor, and the termination of this Agreement for any reason.

Article 15

Electronic Data

15.1 Electronic Data.

15.1.1 The parties recognize that Contract Documents, including drawings, specifications and three-dimensional modeling (such as Building Information Models) and other Work Product may be transmitted among Design-Builder, Design-Build Subcontractor and others in electronic media as an alternative to paper hard copies (collectively "Electronic Data").

© 2022 Design-Build Institute of America

15.2 Transmission of Electronic Data.

15.2.1 Design-Builder shall determine, after consultation with Design-Build Subcontractor, the software and the format for the transmission of Electronic Data. Each party shall be responsible for securing the legal rights to access the agreed-upon format, including, if necessary, obtaining appropriately licensed copies of the applicable software or electronic program to display, interpret and/or generate the Electronic Data.

15.2.2 Neither party makes any representations or warranties to the other with respect to the functionality of the software or computer program associated with the electronic transmission of Work Product. Unless specifically set forth in the Agreement, ownership of the Electronic Data does not include ownership of the software or computer program with which it is associated, transmitted, generated or interpreted.

15.2.3 By transmitting Work Product in electronic form, the transmitting party does not transfer or assign its rights in the Work Product. The rights in the Electronic Data shall be as set forth in Article 4 of the Agreement. Under no circumstances shall the transfer of ownership of Electronic Data be deemed to be a sale by the transmitting party of tangible goods.

15.3 Electronic Data Protocol.

15.3.1 The parties acknowledge that Electronic Data may be altered or corrupted, intentionally or otherwise, due to occurrences beyond their reasonable control or knowledge, including but not limited to compatibility issues with user software, manipulation by the recipient, errors in transcription or transmission, machine error, environmental factors and operator error. Consequently, the parties understand that there is some level of increased risk in the use of Electronic Data for the communication of design and construction information and, in consideration of this, agree, and shall require their independent contractors, Subcontractors and Design Consultants to agree, to the following protocols, terms and conditions set forth in this Section 15.3.

15.3.2 Electronic Data will be transmitted in the format determined in Section 15.2.1 above, including file conventions and document properties, unless prior arrangements are made in advance in writing.

15.3.3 The Electronic Data represents the information at a particular point in time and is subject to change. Therefore, the parties shall agree upon protocols for notification by the author to the recipient of any changes which may thereafter be made to the Electronic Data, which protocol shall also address the duty, if any, to update such information if such information changes prior to Final Completion of the Project.

15.3.4 The transmitting party specifically disclaims all warranties, expressed or implied, including, but not limited to, implied warranties of merchantability and fitness for a particular purpose, with respect to the media transmitting the Electronic Data. However, transmission of the Electronic Data via electronic means shall not invalidate or negate any duties pursuant to the applicable standard of care with respect to the creation of the Electronic Data, unless such data is materially changed or altered after it is transmitted to the receiving party, and the transmitting party did not participate in such change or alteration.

15.4 In the event the Design-Build Agreement contains a provision governing Electronic Data, and there is a conflict between the provision in the Design-Build Agreement and this Article 15, the provision in the Design-Build Agreement takes precedence notwithstanding the order of precedence set forth in Section 1.4.2.

Article 16

Confidential Information

16.1 Confidential and/or Proprietary Information.

© 2022 Design-Build Institute of America

16.1.1 Confidential Information is defined as information which is determined by the transmitting party to be of a confidential or proprietary nature and: (i) the transmitting party identifies as either confidential or proprietary; (ii) the transmitting party takes steps to maintain the confidential or proprietary nature of the information; and (iii) the document is not otherwise available in or considered to be in the public domain. The receiving party agrees to maintain the confidentiality of the Confidential Information and agrees to use the Confidential Information solely in connection with the Project.

16.1.2 Design-Build Subcontractor may receive information from Design-Builder that is either confidential or proprietary to either Design-Builder or to Owner. Such information shall be labeled as confidential and/or proprietary. Design-Build Subcontractor agrees to maintain the confidential nature of such information and to execute any such additional agreements as may be required by Owner or Design-Builder with respect to such information.

16.1.3 In the event the Design-Build Agreement contains a provision governing Confidential Information, and there is a conflict between the provision in the Design-Build Agreement and this Article 16, the provision in the Design-Build Agreement takes precedence notwithstanding the order of precedence set forth in Section 1.4.2.

Article 17

Other Provisions

17.1 Other provisions, if any, are as follows:

(Insert any additional provisions, including those that relate to options that might have been selected by Design-Builder and Owner in the Design-Build Agreement related to Warranty Reserves, alternatives to Liquidated Damages, etc. as the parties may deem commercially appropriate.)

[In lieu of Sections 13.5.1 through 13.5.3 of the Agreement, the parties may want to delete such sections and include the following alternative dispute resolution clause.]

☐ Any claims, disputes, or controversies between the parties arising out of or related to the Agreement, or the breach thereof which have not been resolved in accordance with the procedures set forth in Section 13.4 herein shall be resolved in a court of competent jurisdiction in the state in which the Project is located.

© 2022 Design-Build Institute of America

In executing this Agreement, Design-Builder and Subcontractor each individually represents that it has the necessary financial resources to fulfill its obligations under this Agreement, and each has the necessary corporate approvals to execute this Agreement, and perform the Work described herein.

Washington, D.C.

Design-Build Institute of America - Contract Documents

LICENSE AGREEMENT

By using the DBIA Contract Documents, you agree to and are bound by the terms of this License Agreement.

1. **License.** The Design-Build Institute of America ("DBIA") provides DBIA Contract Documents and licenses their use worldwide. You acknowledge that DBIA Contract Documents are protected by the copyright laws of the United States. You have a limited nonexclusive license to: (a) Use DBIA Contract Documents on any number of machines owned, leased or rented by your company or organization; (b) Use DBIA Contract Documents in printed form for bona fide contract purposes; and (c) Copy DBIA Contract Documents into any machine-readable or printed form for backup or modification purposes in support of your permitted use.

2. **User Responsibility.** You assume sole responsibility for the selection of specific documents or portions thereof to achieve your intended results, and for the installation, use and results obtained from the DBIA Contract Documents. You acknowledge that you understand that the text of the DBIA Contract Documents has important legal consequences and that consultation with an attorney is recommended with respect to use or modification of the text. You will not represent that any of the contract documents you generate from DBIA Contract Documents are DBIA documents unless (a) the document text is used without alteration or (b) all additions and changes to, and deletions from, the text are clearly shown.

3. **Copies.** You may not use, copy, modify or transfer DBIA Contract Documents, or any copy, modification or merged portion, in whole or in part, except as expressly provided for in this license. Reproduction of DBIA Contract Documents in printed or machine-readable format for resale or educational purposes is expressly prohibited. You will reproduce and include DBIA's copyright notice on any printed or machine-readable copy, modification or portion merged into another document or program.

4. **Transfers.** You may not transfer possession of any copy, modification or merged portion of DBIA Contract Documents to another party, except that a party with whom you are contracting may receive and use such transferred material solely for purposes of its contract with you. You may not sublicense, assign or transfer this license except as expressly provided in this Agreement, and any attempt to do so is void.

5. **Term.** The license is effective for one year from the date of purchase. DBIA may elect to terminate it earlier, by written notice to you, if you fail to comply with any term or condition of this Agreement.

6. **Limited Warranty.** DBIA warrants the electronic files or other media by which DBIA Contract Documents are furnished to be free from defects in materials and workmanship under normal use during the Term. There is no other warranty of any kind, expressed or implied, including, but not limited to the implied warranties of merchantability and fitness for a particular purpose. Some states do not allow the exclusion of implied warranties, so the above exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state. DBIA does not warrant that the DBIA Contract Documents will meet your requirements or that the operation of DBIA Contract Documents will be uninterrupted or error free.

7. **Limitations of Remedies.** DBIA's entire liability and your exclusive remedy shall be: the replacement of any document not meeting DBIA's "Limited Warranty" which is returned to DBIA with a copy of your receipt, or at DBIA's election, your money will be refunded. In no event will DBIA be liable to you for any damages, including any lost profits, lost savings or other incidental or consequential damages arising out of the use or inability to use DBIA Contract Documents even if DBIA has been advised of the possibility of such damages, or for any claim by any other party. Some states do not allow the limitation or exclusion of liability for incidental or consequential damages, so the above limitation or exclusion may not apply to you.

8. **Acknowledgement.** You acknowledge that you have read this agreement, understand it and agree to be bound by its terms and conditions and that it will be governed by the laws of the District of Columbia. You further agree that it is the complete and exclusive statement of your agreement with DBIA which supersedes any proposal or prior agreement, oral or written, and any other communications between the parties relating to the subject matter of this agreement.

General Instructions

No.	Subject	Instruction
1.	Standard Forms	Standard form contracts have long served an important function in the United States and international construction markets. The common purpose of these forms is to provide an economical and convenient way for parties to contract for design and construction services. As standard forms gain acceptance and are used with increased frequency, parties are able to enter into contracts with greater certainty as to their rights and responsibilities.
2.	DBIA Standard Form Contract Documents	Since its formation in 1993, the Design-Build Institute of America ("DBIA") has regularly evaluated the needs of owners, design-builders and other parties to the design-build process in preparation for developing its own contract forms. Consistent with DBIA's mission of promulgating best design-build practices, DBIA believes that the design-build contract should reflect a balanced approach to risk that considers the legitimate interests of all parties to the design-build process. DBIA's Standard Form Contract Documents reflect a modern risk allocation approach, allocating each risk to the party best equipped to manage and minimize that risk, with the goal of promoting best design-build practices.
3.	Use of Non-DBIA Documents	To avoid inconsistencies among documents used for the same project, DBIA's Standard Form Contract Documents should not be used in conjunction with non-DBIA documents unless the non-DBIA documents are appropriately modified on the advice of legal counsel. Moreover, care should also be taken when using different editions of the DBIA Standard Form Documents on the same project to ensure consistency.
4.	Legal Consequences	DBIA Standard Form Contract Documents are legally binding contracts with important legal consequences. Contracting parties are advised and encouraged to seek legal counsel in completing or modifying these Documents.
5.	Reproduction	DBIA hereby grants to purchasers a limited license to reproduce its original Documents consistent with the License Agreement accompanying these Documents. At least two original versions of the Agreement should be signed by the parties. Any other reproduction of DBIA Documents is strictly prohibited.
6.	Modifications	Effective contracting is accomplished when the parties give specific thought to their contracting goals and then tailor the contract to meet the unique needs of the project and the design-build team. For that reason, these Documents may require modification for various purposes including, for example, to comply with local codes and laws, or to add special terms. Also, in some instances, these Documents must be modified to indicate the selection of a particular contract term. DBIA's latest revisions to its Documents provide the parties an opportunity to customize their contractual relationship by selecting various optional contract clauses that may better reflect the unique needs and risks associated with the project. Any modifications to these Documents should be initialed by the parties. At no time should a document be re-typed in its entirety. Re-creating the document violates copyright laws and destroys one of the advantages of standard forms — familiarity with the terms.
7.	Execution	It is good practice to execute two original copies of the Agreement. Only persons authorized to sign for the contracting parties may execute the Agreement.

Specific Instructions

Section	Title	Instruction
General	Purpose of This Agreement	DBIA Document No. 570, *Standard Form of Agreement Between Design-Builder and Subcontractor (Where Subcontractor Does Not Provide Design Services),* 2022 Edition ("Agreement") sets forth the terms and conditions under which construction of a specified portion of the Project will be performed, and should be used when the parties intend that Design-Builder pay a lump sum to a Subcontractor that is not providing design services for the completion of the Work.
General	Purpose of These Instructions	These Instructions are not part of this Agreement, but are provided to aid the parties in their understanding of the Agreement and in completing the Agreement.
General	Date	On Page 1, enter the date when both parties reach a final understanding. It is possible, due to logistical reasons, that the dates when the parties execute the Agreement may be different. Once both parties execute the Agreement, the effective date of the Agreement will be the date recorded on Page 1. This date does not, however, determine the Date of Commencement, which is measured according to the terms of Article 5.
General	Parties: Design-Builder and Subcontractor	On Page 1, enter the legal name and full address of Design-Builder, Subcontractor and Owner, as well as the legal form of each entity, e.g., corporation, partnership, limited partnership, limited liability company or other.
1.1.1	Pass Through	The section recognizes that Subcontractor has the same rights, responsibilities and obligations to Design-Builder as Design-Builder by the Design-Build Agreement has against and to Owner. However, because the Design-Build Agreement also affords Design-Builder and Owner many opportunities to customize their contractual relationship by the selection of optional provisions, DBIA does not believe that these optional provisions should automatically pass through to Subcontractor. Accordingly, if Design-Builder and Subcontractor believe it is appropriate to afford Subcontractor the same rights, responsibilities and obligations as it relates to these optional provisions, the parties should make that clear by adding the necessary and appropriate provisions at Article 17 of this Agreement.
1.2	Definitions	Except to the extent set forth in Section 1.2 of this Agreement, terms, words and phrases used in the Agreement shall have the same meanings used in the Design-Build Agreement between Owner and Design-Builder (either DBIA Document No. 525, *Standard Form of Agreement Between Owner and Design-Builder — Lump Sum* (2022 Edition), or DBIA Document No. 530, *Standard Form of Agreement Between Owner and Design-Builder — Cost Plus Fee with an Option for a Guaranteed Maximum Price* (2022 Edition), and including DBIA Document No. 535, *Standard Form of General Conditions of Contract Between Owner and Design-Builder* (2022 Edition).
1.2.1.15	Definition of the Work	The parties must identify the specific portion of the Project which Subcontractor is responsible for constructing.
1.3.1	Contract Documents	Identify any other Contract Documents.
1.4.2	Order of Precedence	The Contract Documents are listed in Section 1.3 in the order of their precedence.
2.9	Patents and Copyrights	Subcontractor shall pay all license fees and royalties for items or processes it selects which are subject to copyrights or patent rights.
2.11.1	Government Approvals and Permits	Subcontractor is responsible for obtaining the specific permits, approvals and licenses set forth in an exhibit to the Agreement.
3.3.1	Furnishing of Information	Design-Builder shall furnish Subcontractor with the listed Owner-provided information. Subcontractor is entitled to rely on the Owner-provided information to the same extent Design-Builder is entitled to pursuant to the Design-Build Agreement.

© 2022 Design-Build Institute of America

Section	Title	Instruction
5.1	Date of Commencement	Subcontractor's obligation to commence work is triggered by its receipt of a Notice to Proceed unless the parties mutually agree otherwise.
6.1.1	Contract Price	Insert lump sum price Design-Builder will pay Subcontractor for the Work.
6.2.1	Markups for Changes	Enter the markups agreed upon by Design-Builder and Subcontractor to be used for pricing Changes to the Work.
7.2.1	Progress Payments	Enter the day of the month when Subcontractor shall submit its Application for Payment.
7.3.1	Retainage on Progress Payments	Enter the percent Design-Builder will retain from Progress Payments to Subcontractor. Note that the contract between Owner and Design-Builder may contain a number of ways to release retainage. The parties in this Agreement should be mindful of these options when developing this provision.
7.7.1	Interest	The parties should enter the rate at which interest will accrue on Subcontractor's payments if unpaid five (5) days after due. Late payment creates a hardship for Subcontractor and its Sub-Subcontractors.
7.11.1	Record Keeping	The Design-Builder is provided access to, and has the right to audit Subcontractor's records with respect to changes in the Work. However, if the parties have agreed to multipliers or markups, the time to challenge and negotiate those percentages is at the time the parties execute the Agreement and not during the Project or after it has been completed. Accordingly, Design-Builder can at any time audit these percentages only to confirm that such percentage has been properly charged and not to challenge the composition of such percentage.
8.2.1.3	Termination for Convenience: Overhead and Profit	The parties should choose prior to execution of the Agreement the method that will be used to determine overhead and profit paid to Subcontractor in the event Design-Builder terminates Subcontractor for its convenience. The parties may choose to set percentage rates for overhead and profit prior to execution of the Agreement, or may choose to determine reasonable sums to be paid for overhead and profit at the time of the termination. If the parties choose to set overhead and profit rates prior to execution of the Agreement, the percentages should be entered in Section 8.2.1.3.
8.2.2	Termination for Convenience	If Design-Builder terminates Subcontractor for convenience because Owner has terminated Design-Builder for its convenience, Subcontractor is only entitled to receive such amount as Design-Builder receives from Owner on behalf of Subcontractor.
8.5	Subcontractor's Right to Terminate for Cause	If Subcontractor properly terminates the Agreement for cause, it shall recover from Design-Builder in the same way as if Design-Builder had terminated the Agreement for convenience under Section 8.2 of the Agreement.
Article 9	Representatives of the Parties	Enter the name, title, address and telephone number of Design-Builder's Senior Representative and Design-Builder's Representative at Sections 9.1.1 and 9.1.2, respectively. Enter the name, title, address and telephone number of Subcontractor's Senior Representative and Subcontractor's Representative at Sections 9.2.1 and 9.2.2, respectively. The parties can elect to establish these Representatives during the performance of the Project rather than at the time of execution of this Agreement. If Representatives are identified after execution of the Agreement, an appropriate amendment should be made to the Agreement at the time these individuals are designated.

© 2022 Design-Build Institute of America

Section	Title	Instruction
10.1.1	Subcontractor's Insurance Requirements	Attach an Insurance Exhibit setting forth in detail the insurance coverages Subcontractor is required to provide for the Project. Parties are advised to familiarize themselves with the terms of Article 5 of the General Conditions of Contract, Insurance and Bonds, and to consult their insurance advisors.
10.1.2	Sub-Subcontractor's Insurance Requirements	Subcontractor is obligated to require its Sub-Subcontractors to provide the insurance coverage set forth in the Insurance Exhibit. Parties are advised to consult their insurance advisors.
10.1.3	Exclusions to Design-Build	Parties are advised that standard liability insurance policies may contain exclusions for the design-build delivery method. This Section 10.1.3 requires that any such exclusions be deleted from the policy.
10.4.1	Bonds and Other Performance Security	Enter the type and amount of bonds or other performance security required for the Project. Where bonding is not required by statute, Design-Builder may want to evaluate the project risk versus the bonding costs in deciding what type of performance security to require.
13.3	Disputes Involving Owner	Disputes for which Owner is responsible will be resolved in accordance with the dispute resolution clause in the Design-Build Agreement.
13.4	Disputes Not Involving Owner	DBIA endorses the use of partnering, negotiation, mediation and arbitration for the prevention and resolution of disputes. The Agreement provides for the parties' Representatives and Senior Representatives to attempt to negotiate the dispute. If this attempt fails, the dispute shall be submitted to mandatory, non-binding mediation. Any dispute that cannot be resolved by mediation shall then be submitted to binding arbitration pursuant to Section 13.5.4.
13.5	Arbitration	The prevailing party in any arbitration shall receive reasonable attorneys' fees from the other party. DBIA supports this "loser pays" provision to encourage parties to negotiate or mediate their differences and to minimize the number of frivolous disputes.
13.6	Duty to Continue Performance	Pending the resolution of any dispute, both Design-Builder and Subcontractor shall continue to perform their respective duties under the Contract Documents, unless the parties provide otherwise in the Contract Documents.
13.7	Consequential Damages	DBIA believes that it is inappropriate for either Design-Builder or Subcontractor to be responsible to the other for consequential damages arising from the Project. This limitation on consequential damages in no way restricts, however, Design-Builder's entitlement to recover against Subcontractor liquidated damages assessed by Owner against Design-Builder which are attributable to Subcontractor and which may include damages that might otherwise be deemed consequential.
Article 15	Electronic Data	Design-Builder will determine, after consultation with Subcontractor, the software and format for the transmission of Electronic Data. The transmitting party disclaims all warranties with respect to the media transmitting the Electronic Data, but nothing in this Article is intended to negate duties with respect to the standard of care in creating the Electronic Data. In the event the Design-Build Agreement contains a conflicting provision governing Electronic Data, the provision in the Design-Build Agreement takes precedence.
Article 17	Other Provisions	Insert any other provisions. For example, the parties may elect to have disputes resolved through litigation rather than arbitration in which case the optional language in this Section should be included.

Standard Form of Agreement Between Design-Builder and Subcontractor (Where Subcontractor Does Not Provide Design Services)

This document has important legal consequences. Consultation with an attorney is recommended with respect to its completion or modification.

This **AGREEMENT** is made as of the _____ day of _____ _____ in the year of 20_____, by and between the following parties, for services in connection with the Project identified below:

DESIGN-BUILDER:
(Name and address)

SUBCONTRACTOR:
(Name and address)

PROJECT:
(Include Project name and location as it will appear in the Contract Documents)

OWNER:
(Name and address)

In consideration of the mutual covenants and obligations contained herein, Design-Builder and Subcontractor agree as set forth herein.

© 2022 Design-Build Institute of America

Article 1

General

1.1 Basic Purpose.

1.1.1 Design-Builder has contracted with Owner to provide the services necessary for the design and construction of the Project as set forth in the Design-Build Agreement. Subcontractor, through itself, and Sub-Subcontractors, agrees to provide all construction and other aspects of the Work consistent with the Contract Documents. Design-Builder and Subcontractor agree that to the extent applicable to the performance of the Work hereunder, Subcontractor shall have the same rights, responsibilities and obligations as to Design-Builder as Design-Builder by the Design-Build Agreement has against and to Owner, except as may be modified herein. Notwithstanding the foregoing, if Design-Builder and Owner have checked boxes indicating the selection of optional provisions from the Design-Build Agreement, those optional provisions are only passed through to the Subcontractor to the extent, those provisions have been expressly set forth in Article 17.

1.2 Basic Definitions.

1.2.1 Terms used in this Agreement shall have the meanings set forth in the Design-Build Agreement between Owner and Design-Builder unless otherwise provided herein, with the following specific terms defined as follows:

1.2.1.1 *Agreement* refers to this executed contract between Design-Builder and Subcontractor under DBIA Document 570, *Standard Form of Agreement Between Design-Builder and Subcontractor (Where Subcontractor Does Not Provide Design Services)*, 2022 Edition.

1.2.1.2 *Construction Documents* are the documents consisting of Drawings and Specifications, prepared or assembled by Design-Builder in accordance with the Design-Build Agreement.

1.2.1.3 *Day* or *Days* shall mean calendar days unless otherwise specifically noted in the Contract Documents.

1.2.1.4 *Design-Build Agreement* refers to the contract between Design-Builder and Owner for the design and construction of the Project under either DBIA Document No. 525, *Standard Form of Agreement Between Owner and Design-Builder – Lump Sum* (2022 Edition), or DBIA Document No. 530, *Standard Form of Agreement Between Owner and Design-Builder – Cost Plus Fee with an Option for a Guaranteed Maximum Price* (2022 Edition), including the DBIA Document No. 535, *Standard Form of General Conditions of Contract Between Owner and Design-Builder* (2022 Edition), and all exhibits, attachments, and other Contract Documents enumerated and incorporated therein.

1.2.1.5 *Design Consultant* is a qualified, licensed design professional who is not an employee of Design-Builder, but is retained by Design-Builder, or employed or retained by anyone under contract with Design-Builder, to furnish design services required under the Design-Build Agreement.

1.2.1.6 *Final Completion* is the date on which all Work is complete in accordance with the Contract Documents, including but not limited to any items identified in the punch list prepared under the Design-Build Agreement and the submission of all documents set forth in Section 7.5.2.

1.2.1.7 *Force Majeure Events* are those events that are beyond the control of

© 2022 Design-Build Institute of America

Subcontractor, Design-Builder and Owner, including the events of war, floods, labor disputes, earthquakes, epidemics, adverse weather conditions not reasonably anticipated and other acts of God.

1.2.1.8 *Hazardous Conditions* are any materials, wastes, substances and chemicals deemed to be hazardous under applicable Legal Requirements, or the handling, storage, remediation or disposal of which are regulated by applicable Legal Requirements.

1.2.1.9 *Legal Requirements* are all applicable federal, state and local laws, codes, ordinances, rules, regulations, orders and decrees of any government or quasi-government entity having jurisdiction over the parties, the Project or Site, the practices involved in the Project or Site, or any Work.

1.2.1.10 *Owner's Project Criteria* are developed by or for Owner to describe Owner's program requirements and objectives for the Project, including use, space, price, time, site and expandability requirements, as well as submittal requirements and other requirements governing Design-Builder's performance of the Work. Owner's Project Criteria may include conceptual documents, design criteria, design performance specifications, design specifications and LEED® or other sustainable design criteria and other Project-specific technical materials and requirements.

1.2.1.11 *Project Schedule* refers to the schedule setting forth the dates by which the various stages of both the design and construction of the Project must be performed so as to satisfy Design-Builder's obligations to Owner.

1.2.1.12 *Site* is the land or premises on which the Project is located.

1.2.1.13 *Sub-Subcontractor* is any person or entity retained by Subcontractor as an independent contractor to perform a portion of the Subcontractor's Work and shall include materialmen and suppliers.

1.2.1.14 *Substantial Completion or Substantially Complete* is the date on which the Project, or an agreed upon portion of the Project, is sufficiently complete in accordance with the Contract Documents so that Owner can occupy and use the Project or a portion thereof for its intended purposes.

1.2.1.15 *Work* is comprised of all Subcontractor's construction and other services required by the Contract Documents, including procuring and furnishing all supervision, labor, inspection, testing, start-up, materials, tools, equipment, machinery, transportation, temporary utilities, temporary facilities and all other items and services reasonably inferable from this Agreement and the other Contract Documents necessary to complete the portion of the Project described in Exhibit _____.

1.3 Contract Documents.

1.3.1 The Contract Documents are comprised of the following:

1.3.1.1 All written modifications, amendments, minor changes and Change Orders to this Agreement;

1.3.1.2 This Agreement, including all exhibits. (*List for example, performance standard requirements, performance incentive arrangements, markup exhibits, allowances, unit prices or exhibit detailing offsite reimbursable personnel.*);

1.3.1.3 The Construction Documents; and

© 2022 Design-Build Institute of America

1.3.1.4 The Design-Build Agreement, but only to the extent the Design-Build Agreement relates to the Work and the terms and conditions under which the Work shall be performed.

1.4 Interpretation and Intent.

1.4.1 Design-Builder and Subcontractor, prior to execution of the Agreement, shall carefully review all the Contract Documents for any conflicts or ambiguities. Design-Builder and Subcontractor will discuss and resolve any identified conflicts or ambiguities prior to execution of the Agreement.

1.4.2 The Contract Documents are intended to be complementary and interpreted in harmony so as to avoid conflict, with words and phrases interpreted consistent with construction and design industry standards. In the event of any inconsistency, conflict, or ambiguity between or among the Contract Documents, the Contract Documents shall take precedence in the order in which they are listed in Section 1.3 hereof.

1.5 Mutual Obligations and Acknowledgments.

1.5.1 Design-Builder and Subcontractor commit at all times to cooperate fully with each other, and proceed on the basis of trust and good faith, to permit each party to realize the benefits afforded under the Contract Documents. Design-Builder and Subcontractor shall perform their respective responsibilities, obligations and services in a timely manner to facilitate the other's timely and efficient performance and so as not to delay or interfere with the other's performance of its obligations under the Contract Documents.

1.5.2 Subcontractor acknowledges that it has reviewed the Design-Build Agreement, and has met with Design-Builder to review, discuss and familiarize itself with the Design-Build Agreement, as well as all documents incorporated therein and attached thereto.

1.6 Entire Agreement.

1.6.1 Subject to the limitation in Section 1.3.1.4, the Contract Documents, all of which are incorporated by reference into this Agreement, form the entire agreement between Design-Builder and Subcontractor and are as fully binding on the parties as if repeated herein. No oral representations or other agreements have been made by the parties except as specifically stated in the Contract Documents.

Article 2

Subcontractor's Services and Responsibilities

2.1 General.

2.1.1 Within seven (7) days after execution of this Agreement, Design-Builder and Subcontractor will meet to discuss issues affecting the administration and schedule of the Work, and implement the necessary procedures, including but not limited to those relating to schedule updates, submittals and payment, to facilitate the ability of the parties to perform their obligations under this Agreement.

2.1.2 Subcontractor's Representative shall be reasonably available to Design-Builder and shall have the necessary expertise and experience required to supervise the Work. Subcontractor's

© 2022 Design-Build Institute of America

Representative shall communicate regularly with Design-Builder and shall be vested with the authority to act on behalf of Subcontractor. Subcontractor shall replace its Representative upon the reasonable request of Design-Builder.

2.1.3 Subcontractor shall only communicate with Owner, Design-Builder's Design Consultant or separate contractors of Design-Builder or Owner through Design-Builder.

2.2 Review of Site and Contract Documents.

2.2.1 Subcontractor represents that it has examined the Site and the Contract Documents prior to executing this Agreement so as to reasonably ascertain the nature of the Work and the various conditions affecting the Work.

2.2.2 Subcontractor shall promptly report to Design-Builder any errors, inconsistencies, omissions or violations of Legal Requirements that Subcontractor discovers. Subcontractor shall be liable to Design-Builder for any damages resulting from any such errors, inconsistencies, omissions or violations of Legal Requirements which Subcontractor discovers and fails to report to Design-Builder. Nothing in this Agreement shall be deemed to transfer any design liability from Design-Builder to Subcontractor.

2.3 Construction Services Generally.

2.3.1 Subcontractor shall perform all construction activities efficiently and with the requisite expertise, skill and competence to satisfy the requirements of the Contract Documents and the Project Schedule.

2.3.2 At the request of Design-Builder, Subcontractor shall attend meetings with Design-Builder, Owner and/or separate design professionals or contractors of Design-Builder or Owner to discuss design and/or construction issues which may arise during the Project.

2.4 Submittals and Substitutions.

2.4.1 In accordance with the Contract Documents and the Project Schedule, Subcontractor shall submit for Design-Builder's review and approval submittals, including shop drawings, product data and samples. Design-Builder shall advise Subcontractor on or before the meeting required by Section 2.1.1 hereof of the submittal requirements for the Project. Any variances with the Construction Documents shall be specifically identified in Subcontractor's submittals. Design-Builder's review and approval shall not relieve Subcontractor of its responsibilities to perform the Work in accordance with the Construction Documents unless Design-Builder expressly approves in writing any such variance in its response to Subcontractor's submittals. Subcontractor shall make any necessary revisions to the submittals requested by Design-Builder.

2.4.2 Subcontractor shall not make any substitutions in the Work or procedures or methods specified by Owner, Design-Builder or the Construction Documents for performing the Work unless it first receives written approval for such substitution from Design-Builder.

2.5 Sub-Subcontractors.

2.5.1 Subcontractor shall employ only Sub-Subcontractors who are duly licensed and qualified to perform the Work consistent with the Contract Documents. Subcontractor agrees that each Sub-Subcontractor shall be fully bound to Subcontractor in the same manner as Subcontractor is bound to Design-Builder for all the requirements of the Contract Documents to the extent applicable to the Sub-Subcontractor's scope of work.

© 2022 Design-Build Institute of America

2.5.2 Subcontractor assumes responsibility to Design-Builder for the proper performance of the Work of Sub-Subcontractors and any acts and omissions in connection with such performance. Subcontractor shall coordinate the activities of all Sub-Subcontractors. Nothing in this Agreement is intended or deemed to relieve Subcontractor from responsibility for the work performed by its Sub-Subcontractors, or create any legal or contractual relationship between Owner or Design-Builder and any Sub-Subcontractor, including but not limited to any third-party beneficiary rights.

2.6 Work of Others.

2.6.1 Subcontractor agrees to reasonably cooperate with, and coordinate its activities so as not to interfere with, those parties performing work at the Site, including Owner's and Design-Builder's separate contractors, so that the Project can be completed in an orderly and coordinated manner without unreasonable disruption.

2.6.2 If any part of the Work depends upon other work performed by Design-Builder, or Design-Builder's or Owner's separate contractors, Subcontractor shall, prior to proceeding with that part of the Work, inspect such other work and promptly notify Design-Builder of any discovered discrepancies or defects that would render it unacceptable for the proper performance of the Work. Subcontractor shall not proceed with such part of the Work without further direction from Design-Builder. Design-Builder shall promptly correct or cause to be corrected any such discrepancy or defect in the other work. Except to the extent such discrepancies or defects in such other work are latent, Subcontractor shall be liable for appropriate losses or damages incurred due to any discrepancies or defects in such other work not reported to Design-Builder by Subcontractor.

2.7 Site Cleanup.

2.7.1 Subcontractor shall keep the Site reasonably free from debris, trash and construction wastes resulting from the performance of the Work. Upon Substantial Completion of the Work, or a portion of the Work, Subcontractor shall remove all debris, trash, construction wastes, materials, equipment, machinery and tools arising from the Work or applicable portions thereof to permit Owner to occupy the Project or a portion of the Project for its intended use.

2.8 Inspection.

2.8.1 At all reasonable times, Subcontractor shall provide sufficient facilities for inspection of the Work by Design-Builder at the Site and at all locations where portions of the Work are in progress or various stages of completion. When appropriate portions of the Work are ready for inspection, Subcontractor shall notify Design-Builder.

2.9 Patents and Copyrights.

2.9.1 Subcontractor shall pay all license fees and royalties due for items, materials, methods, systems or processes applicable to the Work which are subject to copyrights or patent rights and which are selected by Subcontractor.

2.10 Legal Requirements.

2.10.1 Subcontractor shall perform the Work in accordance with all applicable Legal Requirements.

2.10.2 The Contract Price and/or the times for completion of the Work shall be adjusted to compensate Subcontractor for the effects, if any, of any changes in the Legal Requirements enacted after the date of the Agreement affecting the performance of the Work.

© 2022 Design-Build Institute of America

2.11 Government Approvals and Permits.

2.11.1 Subcontractor shall obtain and pay for the necessary permits, approvals, licenses, government charges and inspection fees required for the prosecution of the Work as set forth in Exhibit _____.

2.11.2 Subcontractor shall provide reasonable assistance to Design-Builder in obtaining those permits, approvals and licenses, if any, that are the responsibility of Owner or Design-Builder and related to the Work.

2.12 Project Safety.

2.12.1 Subcontractor recognizes the importance of performing the Work in a safe manner so as to prevent damage, injury or loss to (i) all individuals at the Site, whether working or visiting; (ii) the Work, including materials and equipment incorporated into the Work or stored on-Site or off-Site; (iii) the work of others on the Project; and (iv) all other property at the Site or adjacent thereto. Subcontractor assumes responsibility for implementing and monitoring all safety precautions and programs related to the performance of the Work.

2.12.2 Subcontractor and Sub-Subcontractors shall comply with all Legal Requirements relating to safety, as well as any Owner-specific and/or Design-Builder-specific safety requirements set forth in the Contract Documents or established for the Project, provided that such Owner-specific and/or Design-Builder-specific requirements do not violate any applicable Legal Requirement. Subcontractor will immediately report in writing any safety-related injury, loss, damage or accident arising from the Work to Design-Builder's Representative and, to the extent mandated by Legal Requirements, to all government or quasi-government authorities having jurisdiction over safety-related matters involving the Project or the Work.

2.13 Warranty.

2.13.1 Subcontractor warrants to Design-Builder that the construction, including all materials and equipment furnished as part of the construction, shall be new unless otherwise specified in the Contract Documents, of good quality, in conformance with the Contract Documents and free of defects in materials and workmanship. Subcontractor's warranty obligation excludes defects caused by abuse, alterations or failure to maintain the Work in a commercially reasonable manner. Nothing in this warranty is intended to limit any manufacturer's warranty which provides Owner and/or Design-Builder with greater warranty rights than set forth in this Section 2.13 or the Contract Documents. Subcontractor will provide and, if requested, assign to Design-Builder all manufacturers' warranties upon Substantial Completion.

2.14 Correction of Defective Work.

2.14.1 Subcontractor agrees to correct any of the Work that is found not to be in conformance with the Contract Documents, including that part of the Work subject to Section 2.13 hereof, within a period of one year from the date of Substantial Completion of the Work or any portion of the Work, or within such longer period to the extent required by any specific warranty included in the Contract Documents.

2.14.2 Subcontractor shall, within seven (7) days of receipt of written notice from Design-Builder that the Work is not in conformance with the Contract Documents, take meaningful steps to commence correction of such nonconforming Work, including the correction, removal or replacement of the nonconforming Work and any damage caused to other parts of the Work or the Project affected by the nonconforming Work. If Subcontractor fails to commence the necessary steps within such seven (7) day period, Design-Builder, in addition to any other remedies provided under the Contract Documents, may provide Subcontractor with written notice that Design-Builder

© 2022 Design-Build Institute of America

will commence correction of such nonconforming Work with its own forces. If Design-Builder does perform such corrective Work, Subcontractor shall be responsible for all reasonable costs incurred by Design-Builder in performing such correction. If the nonconforming Work creates an emergency requiring an immediate response, the seven (7) day period identified herein shall be deemed inapplicable.

2.14.3 The one year period referenced in Section 2.14.1 above applies only to Subcontractor's obligation to correct nonconforming Work and is not intended to constitute a period of limitations for any other rights or remedies Design-Builder may have regarding Subcontractor's obligations under the Contract Documents.

2.15 Start-Up and Training.

2.15.1 If required as part of Subcontractor's Work, Subcontractor shall be responsible for the start-up, testing and commissioning of the Work, and shall train Owner's personnel with respect to the operation and maintenance of the Work.

2.16 Hazardous Conditions.

2.16.1 Subcontractor is responsible for Hazardous Conditions introduced to the Site by itself, Sub-Subcontractors or anyone for whose acts they may be liable. Subcontractor shall indemnify, defend and hold harmless Owner, Design-Builder and their officers, directors, employees and agents from and against all claims, losses, damages, liabilities and expenses, including reasonable attorneys' fees and expenses, arising out of or resulting from those Hazardous Conditions introduced to the Site by Subcontractor, Sub-Subcontractors or anyone for whose acts they may be liable.

Article 3

Design-Builder's Services and Responsibilities

3.1 Timely Reviews and Approvals.

3.1.1 Design-Builder shall provide timely reviews and approvals of all submittals, consistent with the turnaround times set forth in the Project Schedule, or as agreed to by the parties at the meeting required under Section 2.1.1 hereof.

3.2 Design-Builder's Representative.

3.2.1 Design-Builder's Representative shall be responsible for providing Design-Builder-supplied information and approvals in a timely manner to permit Subcontractor to fulfill its obligations under the Contract Documents.

3.3 Furnishing of Services and Information.

3.3.1 Unless expressly stated to the contrary in the Contract Documents, and to the extent Design-Builder has received such items from Owner, Design-Builder shall provide for Subcontractor's information the items listed below. Design-Builder does not warrant the accuracy or completeness of such items provided, however, that Subcontractor is entitled to rely on these items to the same extent Design-Builder is entitled to rely upon such items in the Design-Build Agreement:

© 2022 Design-Build Institute of America

3.3.1.1 Surveys describing the property, boundaries, topography and reference points for use during construction, including existing service and utility lines;

3.3.1.2 Geotechnical studies describing subsurface conditions, and other surveys describing other latent or concealed physical conditions at the Site;

3.3.1.3 Temporary and permanent easements, zoning and other requirements and encumbrances affecting land use, or necessary to permit the proper construction of the Project and enable Subcontractor to perform the Work;

3.3.1.4 A legal description of the Site;

3.3.1.5 Record drawings of any existing structures at the Site;

3.3.1.6 Environmental studies, reports and impact statements describing the environmental conditions, including Hazardous Conditions, in existence at the Site;

3.3.1.7 Owner's Project Criteria;

3.3.1.8 All permits, approvals and licenses set forth in the Owner's Permit List attached as an exhibit to the Design-Build Agreement; and

3.3.1.9 Test and inspection reports.

3.3.2 Design-Builder shall provide Subcontractor with a copy of the Design-Build Agreement, including all exhibits, attachments and other Contract Documents enumerated and incorporated therein.

3.3.3 Upon Subcontractor's written request, Design-Builder shall provide Subcontractor with information in Design-Builder's possession regarding Owner's financial ability to pay for the Work set forth in this Agreement.

3.3.4 Design-Builder shall provide Subcontractor with the Project Schedule and appropriate updates thereto.

3.3.5 Design-Builder shall obtain those permits, approvals and licenses that are not required to be provided by Owner pursuant to the Design-Build Agreement or by Subcontractor pursuant to Section 2.11.1 hereof. Design-Builder shall provide reasonable assistance to Subcontractor in obtaining those permits, approvals and licenses that are Subcontractor's responsibility.

3.4 Notification of Errors.

3.4.1 Design-Builder shall notify Subcontractor of any errors, inconsistencies, or omissions Design-Builder discovers in the Work. Notwithstanding anything to the contrary in this Agreement, nothing in this Agreement shall relieve Subcontractor of responsibility for errors, inconsistencies, or omissions in the Work.

3.5 Attendance at Design Meetings.

3.5.1 Design-Builder shall afford Subcontractor and its Sub-Subcontractors the opportunity to attend all necessary design meetings with Owner, Design-Builder's Design Consultant or others furnishing portions of the design for the Project.

3.6 Review and Approval of Submittals.

© 2022 Design-Build Institute of America

3.6.1 Design-Builder shall review and approve submittals, including shop drawings, product data and samples, submitted by Subcontractor. Design-Builder's review and approval of submittals shall be only for the purpose of confirming general conformance with the Construction Documents. Design-Builder's review and approval shall not relieve Subcontractor of its responsibilities to perform the Work in accordance with the Construction Documents unless Design-Builder expressly approves in writing any such variance in its response to Subcontractor's submittals. If revisions are necessary to a submittal prior to Design-Builder's approval, Design-Builder shall inform Subcontractor of any such necessary revisions.

3.7 Design-Builder's Separate Contractors.

3.7.1 Design-Builder is responsible for all work performed on the Project or at the Site by separate contractors under Design-Builder's control. Design-Builder shall contractually require its separate contractors to cooperate with, and coordinate their activities so as not to interfere with, Subcontractor's ability to timely complete its Work consistent with the Contract Documents.

Article 4

Ownership of Work Product

4.1 Work Product.

4.1.1 The Subcontractor shall have no ownership and property rights in any drawings, specifications and other documents and electronic data ("Work Product") furnished by Design-Builder to Subcontractor under this Agreement. Design-Builder shall be granted ownership of all Work Product, if any, furnished by Subcontractor to Design- Builder under this Agreement.

4.2 Indemnification for Use of Work Product.

4.2.1 If either Design-Builder or Subcontractor uses the Work Product furnished to them by the other on any other project, it agrees that it shall do so at its sole risk and without liability or legal exposure to the other party, Owner or anyone working through them. Such party further agrees that it shall defend, indemnify and hold harmless the other party from and against any and all claims, damages, liabilities, losses and expenses, including attorneys' fees, arising out of or resulting from such use of the Work Product on another project.

Article 5

Time of Performance

5.1 Date of Commencement.

5.1.1 The Work shall commence five (5) days after Subcontractor's receipt of Design-Builder's Notice to Proceed ("Date of Commencement") unless the parties mutually agree otherwise in writing.

5.2 Time of Completion.

5.2.1 Subcontractor shall diligently and continuously prosecute and complete the Work in accordance with the Project Schedule as it may be revised and issued from time to time during the performance of the Work, and any other scheduling requirements listed in the Contract Documents.

© 2022 Design-Build Institute of America

5.2.2 Subcontractor shall participate and cooperate in the development of schedules and other efforts to achieve timely completion of the Work. Subcontractor shall provide Design-Builder information for the scheduling of the times and sequence of operations required for the Work to meet Design-Builder's overall schedule requirements; shall continuously monitor the Project Schedule, including any revisions thereto, so as to be fully familiar with the timing, phasing and sequence of operation of the Work and of other work on the Project; and shall execute the Work in accordance with the requirements of the Project Schedule including any revisions thereto.

5.2.3 Subcontractor shall timely perform the various stages of the Work so that Design-Builder can achieve the dates set forth in the Project Schedule, including any revisions thereto.

5.3 Time is of the Essence.

5.3.1 Design-Builder and Subcontractor mutually agree that time is of the essence with respect to the dates and times set forth in the Contract Documents and the Project Schedule.

5.4 Delays to the Work.

5.4.1 If Subcontractor is delayed on the critical path in the performance of the Work due to acts, omissions, conditions, events or circumstances beyond its control and due to no fault of its own or those for whom Subcontractor is responsible, the time for performance shall be reasonably extended by Change Order. By way of example, events that may entitle Subcontractor to an extension of the time for completion of the work include acts or omissions of Design-Builder, Owner or anyone under Design-Builder's or Owner's control (including separate contractors), changes in the Work, Differing Site Conditions, Hazardous Conditions and Force Majeure events.

5.4.2 In addition to Subcontractor's right to a time extension for those events set forth in Section 5.4.1 above, Subcontractor shall also be entitled to an appropriate adjustment of the Contract Price provided, however, that the Contract Price shall not be adjusted for Force Majeure events unless otherwise provided for in Article 17.

5.4.3 Notwithstanding any other provision to the contrary, any delay and resulting damages that arise out of, or relate to, problems caused by Owner or for which Owner is responsible shall be resolved pursuant to Section 13.3 hereof.

5.4.4 If the Project is delayed due to the Subcontractor or anyone for whom Subcontractor is responsible, and not due to Design-Builder or Owner, Subcontractor shall compensate and indemnify Design-Builder for all costs, damages and expenses arising from such delay, including but not limited to any liquidated damages or other damages that Owner may assess against Design-Builder which are attributable to Subcontractor or anyone for whom Subcontractor is responsible. In addition, Subcontractor shall, at the direction of Design-Builder and at Subcontractor's own cost and expense, work such overtime and take such other measures as may be necessary to make up for all time lost in the completion of the Project due to such delay.

Article 6

Contract Price

6.1 Contract Price.

6.1.1 Design-Builder shall pay Subcontractor in accordance with Article 6 hereof the sum of ___ _____ Dollars ($_____) ("Contract Price"), subject to adjustments made in accordance with the Contract Documents. Unless otherwise provided in the Contract Documents, the Contract Price is deemed to include all sales, use, consumer and other

© 2022 Design-Build Institute of America

taxes mandated by applicable Legal Requirements. Design-Builder is not responsible for Subcontractor's bidding or estimating mistakes or miscalculation of market conditions.

6.2 Markups for Changes.

6.2.1 If the Contract Price requires an adjustment due to changes in the Work, and the cost of such changes is determined under Sections 12.6.1.3 or 12.6.1.4 hereof, the following markups shall be allowed on such changes:

6.2.1.1 For additive Change Orders, including additive Change Orders arising from both additive and deductive items, it is agreed that Subcontractor shall receive a Fee of _____ _____ percent (_____%) of the additional Costs of the Work incurred for that Change Order, plus any other markups set forth at Exhibit _____ hereto.

6.2.1.2 For deductive Change Orders, including deductive Change Orders arising from both additive and deductive items, the deductive amounts shall include:

[Check one box only.]

☐ No additional reduction to account for Subcontractor's Fee or any other markup.

or

☐ An amount equal to the sum of: (a) _____percent (_____ %) applied to the direct costs of the net reduction (which amount will account for a reduction associated with Subcontractor's Fee); plus (b) any other markups set forth at Exhibit ____ _____ hereto applied to the direct costs of the net reduction.

Article 7

Procedure for Payment

7.1 Schedule of Values.

7.1.1 Unless required by Design-Builder upon execution of this Agreement, within ten (10) days of execution of the Agreement, Subcontractor shall submit for Design-Builder's review and approval a schedule of values for all of the Work. The Schedule of Values will (i) subdivide the Work into its respective parts; (ii) include values for all items comprising the Work; and (iii) serve as the basis for monthly progress payments made to Subcontractor throughout the Work.

7.2 Progress Payments.

7.2.1 Beginning with the first month after the Date of Commencement, Subcontractor shall submit on the _____(_____) day of each month for Design-Builder's review and approval, Subcontractor's Application for Payment requesting payment for all Work performed as of the date of the Application for Payment. The Application for Payment shall be accompanied by all supporting documentation required by the Contract Documents and/or established at the meeting required by Section 2.1.1 hereof. Design-Builder will submit Subcontractor's proper Application for Payment to Owner with Design-Builder's Application.

7.2.2 The Application for Payment may request payment for equipment and materials not yet incorporated into the Project, provided that (i) Design-Builder is satisfied that the equipment and materials are suitably stored at either the Site or another acceptable location, (ii) the equipment

© 2022 Design-Build Institute of America

and materials are protected by suitable insurance, and (iii) upon payment, Design-Builder will receive the equipment and materials free and clear of all liens and encumbrances.

7.2.3 The Application for Payment shall constitute Subcontractor's representation that the Work has been performed consistent with the Contract Documents, has progressed to the point indicated in the Application for Payment, and that title to all Work will pass to Owner free and clear of all claims, liens, encumbrances and security interests upon the incorporation of the Work into the Project, or upon Subcontractor's receipt of payment, whichever occurs earlier.

7.2.4 Design-Builder shall make payment on Subcontractor's properly submitted and accurate Application for Payment within three (3) days after Design-Builder's receipt of payment from Owner on account of Subcontractor's monthly Application for Payment, but in each case less the total of payments previously made, and less amounts properly withheld under this Agreement.

7.3 Retainage on Progress Payments.

7.3.1 Design-Builder will retain from each of Subcontractor's Application for Payment _____ _____ percent (_____%). Unless mutually agreed otherwise between the parties, retainage will be included in Design-Builder's final payment to Subcontractor, provided Design-Builder has received such retained amounts from Owner.

7.4 Withholding of Payments.

7.4.1 If Design-Builder determines that Subcontractor is not entitled to all or part of an Application for Payment, it will notify Subcontractor in writing at least five (5) days prior to the date payment is due. The notice shall indicate the specific amounts Design-Builder intends to withhold, the reasons and contractual basis for the withholding and the specific measures Subcontractor must take to rectify Design-Builder's concerns. Design-Builder and Subcontractor will attempt to resolve Design-Builder's concerns prior to the date payment is due. If the parties cannot resolve such concerns, Design-Builder shall pay Subcontractor the uncontested amount of the Application for Payment, and Subcontractor may pursue its rights under the Contract Documents, including those under Article 13 hereof.

7.5 Final Payment.

7.5.1 Subcontractor shall submit its Final Application for Payment to Design-Builder in accordance with Section 7.5.2 below. Design-Builder shall make payment on Subcontractor's properly submitted and accurate Final Application for Payment within ten (10) days after Design-Builder's receipt of final payment from Owner on account of Subcontractor's Final Application for Payment, provided also that Subcontractor has satisfied the requirements for final payment set forth in Section 7.5.2 below.

7.5.2 At the time of submission of its Final Application for Payment, Subcontractor shall provide the following information:

7.5.2.1 An affidavit that there are no claims, obligations or liens outstanding or unsatisfied for labor, services, material, equipment, taxes or other items performed, furnished or incurred for or in connection with the Work which will in any way affect Design-Builder's or Owner's interests;

7.5.2.2 A general release executed by Subcontractor waiving, upon receipt of final payment by Subcontractor, all claims, except those claims previously made in writing to Design-Builder and remaining unsettled at the time of final payment;

© 2022 Design-Build Institute of America

7.5.2.3 Consent of Subcontractor's surety, if any, to final payment;

7.5.2.4 All operating manuals, warranties and other deliverables required by the Contract Documents; and

7.5.2.5 Certificates of insurance confirming that required coverages will remain in effect consistent with the requirements of the Contract Documents.

7.5.3 Upon making final payment, Design-Builder waives all claims against Subcontractor except claims relating to (i) Subcontractor's failure to satisfy its payment obligations, if such failure affects Design-Builder's or Owner's interests; (ii) Subcontractor's failure to complete the Work consistent with the Contract Documents, including defects appearing after final completion of the Work; and (iii) the terms of any special warranties required by the Contract Documents.

7.6 Pay When Paid.

7.6.1 Subcontractor agrees that all payments to Subcontractor hereunder, whether progress or final payment, or for changes or delays to the Work, shall not be due until after Design-Builder actually receives payment on account of same from Owner. Notwithstanding the preceding sentence, Design-Builder shall pay Subcontractor within a reasonable time if it has not been paid by the Owner unless the Owner's failure to pay the Design-Builder is caused by the Subcontractor's failure to perform in accordance with this Agreement.

7.7 Interest.

7.7.1 Payments due and unpaid under this Agreement shall bear interest commencing five (5) days after payment is due at the rate of _____ percent (_____%) per month until paid.

7.8 Advance Payments.

7.8.1 Design-Builder has the right, at its sole option, to advance any payment due Subcontractor under this Agreement.

7.9 Payment Not Acceptance.

7.9.1 No payment to Subcontractor under this Agreement shall be evidence of, or construed to be, acceptance of defective, faulty, improper or non-conforming work.

7.10 Subcontractor's Payment Obligations.

7.10.1 Subcontractor will pay its Sub-Subcontractors, in accordance with its contractual obligations to such parties, all the amounts Subcontractor has received from Design-Builder on account of their work. Subcontractor will impose similar requirements on its Sub-Subcontractors to pay those parties with whom they have contracted. Subcontractor will indemnify and defend Owner and Design-Builder against any claims for payment and mechanic's liens as set forth in Section 11.3 hereof, providing Design-Builder is not in breach of its contractual obligations to make payment to Subcontractor for its Work.

7.11 Record Keeping and Finance Controls.

7.11.1 With respect to changes in the Work performed on a cost basis by Subcontractor pursuant to the Contract Documents, Subcontractor shall keep full and detailed accounts and exercise such controls as may be necessary for proper financial management, using accounting and control systems in accordance with generally accepted accounting principles and as may be provided in

© 2022 Design-Build Institute of America

the Contract Documents. During the performance of the Work and for a period of three (3) years after final payment of the Work, Design-Builder and Design-Builder's accountants shall be afforded access to and the right to audit from time to time, upon reasonable notice, Subcontractor's records, books, correspondence, receipts, subcontracts, purchase orders, vouchers, memoranda and other data relating to the changes in the Work, all of which Subcontractor shall preserve for a period of three (3) years after final payment. Such inspection shall take place at Subcontractor's offices during normal business hours unless another location and time is agreed to by the parties. Any multipliers or markups agreed to by Subcontractor and Design-Builder as part of this Agreement are only subject to audit to confirm that such multiplier or markup has been charged in accordance with this Agreement, with the composition of such multiplier or markup not being subject to audit.

Article 8

Stop Work and Termination

8.1 Design-Builder's Right to Stop Work.

8.1.1 Design-Builder may, without cause and for its convenience, order Subcontractor in writing to stop and suspend the Work. Such suspension shall not exceed sixty (60) consecutive days or aggregate more than ninety (90) days during the duration of the Project.

8.1.2 Subcontractor is entitled to seek an adjustment of the Contract Price and/or times for completion of the Work if its cost or time to perform the Work has been adversely impacted by any suspension or stoppage of work by Design-Builder. Notwithstanding anything to the contrary herein, if Design-Builder's suspension of the Work is the result of Owner's suspension of Design-Builder's work under the Design-Build Agreement, then Design-Builder shall pay Subcontractor only those amounts Design-Builder actually receives from Owner on account of the Work.

8.2 Design-Builder's Right to Terminate for Convenience.

8.2.1 Upon ten (10) days' written notice to Subcontractor, Design-Builder may, for its convenience and without cause, elect to terminate this Agreement. In such event, Design-Builder shall have the right to use the existing Work Product, if any, for purposes of completing the Project, and shall pay Subcontractor for the following:

8.2.1.1 All Work executed and for proven loss, cost or expense in connection with the Work;

8.2.1.2 The reasonable costs and expenses attributable to such termination, including amounts due in settlement of terminated contracts with Sub-Subcontractors; and

8.2.1.3 ***[Choose one of the following.]***

☐ The fair and reasonable sums for overhead and profit on the sum of items 8.2.1.1 and 8.2.1.2 above.

or

☐ Overhead and profit in the amount of _____ percent (_____%) on the sum of items 8.2.1.1 and 8.2.1.2 above.

8.2.2 If Design-Builder's termination of Subcontractor for convenience is the result of Owner's termination of Design-Builder for convenience under the Design-Build Agreement, then Design-

© 2022 Design-Build Institute of America

Builder shall pay Subcontractor only those amounts Design-Builder actually receives from Owner on behalf of Subcontractor.

8.3 Design-Builder's Right to Terminate for Cause.

8.3.1 If Subcontractor persistently fails to (i) provide a sufficient number of skilled workers, (ii) supply the materials required by the Contract Documents, (iii) comply with applicable Legal Requirements, (iv) timely pay, without cause, its Sub-Subcontractors, (v) prosecute the Work with promptness and diligence to ensure that the Work is completed in accordance with the Project Schedule, as such schedule may be adjusted, or (vi) perform material obligations under the Contract Documents, then Design-Builder shall have the rights, in addition to any other rights and remedies provided in the Contract Documents or by law, set forth in Sections 8.3.2 and 8.3.3 below.

8.3.2 Upon the occurrence of an event set forth in Section 8.3.1 above, Design-Builder may provide written notice to Subcontractor that it intends to terminate the Agreement unless the problem cited is cured, or commenced to be cured, within seven (7) days of Subcontractor's receipt of such notice. If Subcontractor fails to cure, or reasonably commence to cure, such problem, then Design-Builder may give a second written notice to Subcontractor of its intent to terminate within an additional seven (7) day period. If Subcontractor, within such second seven (7) day period, fails to cure, or reasonably commence to cure, such problem, then Design-Builder may declare the Agreement terminated for default by providing written notice to Subcontractor of such declaration.

8.3.3 Upon declaring the Agreement terminated pursuant to Section 8.3.2 above, Design-Builder may enter upon the premises and take possession, for the purpose of completing the Work, of all materials, equipment, scaffolds, tools, appliances and other items thereon, which have been purchased or provided for the performance of the Work, all of which Subcontractor hereby transfers, assigns and sets over to Design-Builder for such purpose, and to employ any person or persons to complete the Work and provide all of the required labor, services, materials, equipment and other items. In the event of such termination, Subcontractor shall not be entitled to receive any further payments under the Contract Documents until the Work shall be finally completed in accordance with the Contract Documents. At such time, if the unpaid balance of the Contract Price exceeds the cost and expense incurred by Design-Builder in completing the Work, such excess shall be paid by Design-Builder to Subcontractor. If Design-Builder's cost and expense of completing the Work exceeds the unpaid balance of the Contract Price, then Subcontractor shall be obligated to pay the difference to Design-Builder. Such costs and expense shall include not only the cost of completing the Work, but also losses, damages, costs and expenses, including attorneys' fees and expenses, incurred by Design-Builder in connection with the reprocurement and defense of claims arising from Subcontractor's default, subject to the waiver of consequential damages set forth in Section 13.7 hereof.

8.3.4 If Design-Builder improperly terminates the Agreement for cause, the termination for cause will be converted to a termination for convenience in accordance with the provisions of Section 8.2 of the Agreement.

8.4 Subcontractor's Right to Stop Work.

8.4.1 If (i) Owner fails to pay amounts due Design-Builder under the Design-Build Agreement for Work performed by Subcontractor, such failure is not due to the fault of Subcontractor and Subcontractor has not been paid such amounts due, or (ii) Design-Builder fails to pay any undisputed amounts due Subcontractor under this Agreement, Subcontractor may, in addition to any other rights afforded under the Contract Documents or at law, stop work in accordance with Section 8.4.2.

8.4.2 Subcontractor shall provide Design-Builder with written notice that Subcontractor will stop work unless said failure to pay the amount is cured within seven (7) days from Design-Builder's

© 2022 Design-Build Institute of America

receipt of Subcontractor's notice. Subcontractor shall not stop work unless it provides written notice and Design-Builder has failed to cure the reason for default within the seven (7) day cure period. If Design-Builder does not cure the problem within such seven (7) day period, Subcontractor may stop work. In such case, Subcontractor shall be entitled to make a claim for adjustment to the Contract Price and the times for completion of the Work to the extent it has been adversely impacted by such stoppage. To the extent Design-Builder's failure to pay is related to a dispute between the parties, the dispute will be resolved in accordance with Article 13 and the parties will continue performance in accordance with Section 13.6.

8.5 Subcontractor's Right to Terminate For Cause.

8.5.1 Subcontractor, in addition to any other rights and remedies afforded under the Contract Documents or at law, may terminate the Agreement for cause in accordance with Section 8.5.2 below if Design-Builder fails to cure the problems set forth in Section 8.4.1 above within thirty (30) days after Subcontractor has stopped the work.

8.5.2 Upon the occurrence of the event set forth in Section 8.5.1 above, Subcontractor may provide written notice to Design-Builder that it intends to terminate the Agreement unless the problem cited is cured, or commenced to be cured, within seven (7) days of Design-Builder's receipt of such notice. If Design-Builder fails to cure, or reasonably commence to cure, such problem, then Subcontractor may give a second written notice to Design-Builder of its intent to terminate within an additional seven (7) day period. If Design-Builder, within such second seven (7) day period, fails to cure, or reasonably commence to cure, such problem, then Subcontractor may declare the Agreement terminated for default by providing written notice to Design-Builder of such declaration. In such case, Subcontractor shall be entitled to recover in the same manner as if Design-Builder had terminated this Agreement for its convenience under Section 8.2 of the Agreement.

8.6 Bankruptcy of Design-Builder or Subcontractor.

8.6.1 If either Design-Builder or Subcontractor institutes or has instituted against it a case under the United States Bankruptcy Code (such party being referred to as the "Bankrupt Party"), such event may impair or frustrate the Bankrupt Party's ability to perform its obligations under the Contract Documents. Accordingly, should such event occur:

8.6.1.1 The Bankrupt Party, its trustee or other successor, shall furnish, upon request of the non-Bankrupt Party, adequate assurance of the ability of the Bankrupt Party to perform all future material obligations under the Contract Documents, which assurances shall be provided within ten (10) days after receiving notice of the request; and

8.6.1.2 The Bankrupt Party shall file an appropriate action within the bankruptcy court to seek assumption or rejection of the Agreement within sixty (60) days of the institution of the bankruptcy filing and shall diligently prosecute such action.

If the Bankrupt Party fails to comply with its foregoing obligations, the non-Bankrupt Party shall be entitled to request the bankruptcy court to reject the Agreement, declare the Agreement terminated and pursue any other recourse available to the non-Bankrupt Party under this Article 8.

8.6.2 The rights and remedies under Section 8.6.1 above shall not be deemed to limit the ability of the non-Bankrupt Party to seek any other rights and remedies provided by the Contract Documents or by law, including its ability to seek relief from any automatic stays under the United States Bankruptcy Code.

© 2022 Design-Build Institute of America

Article 9

Representatives of the Parties

9.1 Design-Builder's Representatives.

9.1.1 Design-Builder designates the individual listed below as its Senior Representative ("Design-Builder's Senior Representative"), which individual has the authority and responsibility for avoiding and resolving disputes under Section 13.4 of the Agreement: *(Identify individual's name, title, address and telephone numbers.)*

9.1.2 Design-Builder designates the individual listed below as its Design-Builder's Representative, which individual has the authority and responsibility set forth in Section 3.2 of the Agreement: *(Identify individual's name, title, address and telephone numbers.)*

9.2 Subcontractor's Representatives.

9.2.1 Subcontractor designates the individual listed below as its Senior Representative ("Subcontractor's Senior Representative"), which individual has the authority and responsibility for avoiding and resolving disputes under Section 13.4 of the Agreement: *(Identify individual's name, title, address and telephone numbers.)*

9.2.2 Subcontractor designates the individual listed below as its Subcontractor's Representative, which individual has the authority and responsibility set forth in Section 2.1.2 of the Agreement: *(Identify individual's name, title, address and telephone numbers.)*

Article 10

Insurance and Bonds

10.1 Subcontractor's Insurance Requirements.

10.1.1 Subcontractor is responsible for procuring and maintaining, from insurance companies authorized to do business in the state in which the Project is located, the insurance coverages set forth in the Insurance Exhibit to this Agreement, with the minimum ratings set forth in said Exhibit, for certain claims which may arise from or out of the performance of this Agreement and obligations

© 2022 Design-Build Institute of America

under the Contract Documents.

10.1.2 Subcontractor shall require its Sub-Subcontractors to procure and maintain, from insurance companies authorized to do business in the state in which the Project is located, the insurance coverages set forth in the Insurance Exhibit.

10.1.3 Subcontractor's and its Sub-Subcontractors' insurance coverage set forth in the Insurance Exhibit shall specifically delete any design-build or similar exclusions that could compromise coverages because of the design-build delivery of the Project.

10.1.4 Prior to commencing any services hereunder, Subcontractor shall provide Design-Builder with certificates evidencing that (i) all insurance obligations required by the Contract Documents are in full force and in effect and will remain in effect for the duration required by the Contract Documents and (ii) no insurance coverage will be canceled, renewal refused or materially changed unless at least thirty (30) days' prior written notice is given to Design-Builder.

10.1.5 Except as otherwise stated in the Insurance Exhibit, the insurance policies required herein shall list Design-Builder, and any other entities required by the Contract Documents, if any, as an additional insured.

10.1.6 If any of the foregoing coverages are required to remain in force after final payment, an additional certificate evidencing continuation of such coverage shall be submitted with the final Application for Payment.

10.2 Property Insurance.

10.2.1 In accordance with the Contract Documents, Owner or Design-Builder shall procure and maintain property insurance upon the entire Project.

10.3 Waiver of Subrogation.

10.3.1 Design-Builder and Subcontractor waive against each other and Owner, Sub-Subcontractors, Design Consultants, Owner's or Design-Builder's separate contractors, agents and employees of each and all of them, all damages covered by property insurance provided herein, except such rights as they may have to the proceeds of such insurance. Design-Builder and Subcontractor shall, where appropriate, require similar waivers of subrogation from Design Consultant and Sub-Subcontractors and separate contractors of Design-Builder, and shall require each of them to include similar waivers in their contracts. These waivers of subrogation shall not contain any restriction or limitation that will impair the full and complete extent of its applicability to any person or entity unless agreed to in writing prior to the execution of this Agreement.

10.4 Bonds and Other Performance Security.

10.4.1 Subcontractor shall provide the following performance bond and labor and material payment bond or other performance security: *(Indicate the amount of bonds and any other conditions of the bonds or other security.)*

© 2022 Design-Build Institute of America

Article 11

Indemnification

11.1 Patent and Copyright Infringement.

11.1.1 Subcontractor shall defend any action or proceeding brought against Owner or Design-Builder based on any claim that the Work, or any part thereof, or the operation or use of the Work or any part thereof, constitutes infringement of any United States patent or copyright, now or hereafter issued. Design-Builder shall give prompt written notice to Subcontractor of any such action or proceeding and will reasonably provide authority, information and assistance in the defense of same. Subcontractor shall indemnify and hold harmless Owner and Design-Builder from and against all damages and costs, including but not limited to attorneys' fees and expenses awarded against Owner or Design-Builder in any such action or proceeding. Subcontractor agrees to keep Design-Builder informed of all developments in the defense of such actions.

11.1.2 If Owner is enjoined from the operation or use of the Work, or any part thereof, as the result of any patent or copyright suit, claim or proceeding, Subcontractor shall at its sole expense take reasonable steps to procure the right to operate or use the Work. If Subcontractor cannot so procure such right within a reasonable time, Subcontractor shall promptly, at Subcontractor's option and at Subcontractor's expense, (i) modify the Work so as to avoid infringement of any patents, or copyrights, or (ii) replace said Work with Work that does not infringe or violate any such patent or copyright.

11.1.3 Sections 11.1.1 and11.1.2 above shall not be applicable to any suit, claim or proceeding based on infringement or violation of a patent or copyright (i) relating to a particular process or product of a particular manufacturer specified by Owner or Design-Builder or (ii) arising from modifications to the Work by Owner or Design-Builder after acceptance of the Work. If the suit, claim or proceeding is based upon events set forth in the preceding sentence, Design-Builder shall defend, indemnify and hold harmless Subcontractor to the same extent Subcontractor is obligated to defend, indemnify and hold harmless Design-Builder in Section 11.1.1 above.

11.1.4 The obligations set forth in this Section 11.1 shall constitute the sole agreement between the parties relating to liability for infringement or violation of any patent or copyright.

11.2 Tax Claim Indemnification.

11.2.1 If, in accordance with Design-Builder's direction, an exemption for all or part of the Work is claimed for taxes, Design-Builder shall indemnify, defend and hold harmless Subcontractor from and against any liability, penalty, interest, fine, tax assessment, attorneys' fees or other expenses or costs incurred by Subcontractor as a result of any action taken by Subcontractor in accordance with Design-Builder's directive.

11.3 Payment Claim Indemnification.

11.3.1 Providing that Design-Builder is not in breach of its contractual obligation to make payments to Subcontractor for the Work, Subcontractor shall indemnify, defend and hold harmless Owner and Design-Builder from any claims or mechanic's liens brought against Owner, Design-Builder, or against the Project as a result of the failure of Subcontractor, or those for whose acts it is responsible, to pay for any services, materials, labor, equipment, taxes or other items or obligations furnished or incurred for, or in connection with the Work. Within three (3) days of receiving written notice from Design-Builder that such a claim or mechanic's lien has been filed, Subcontractor shall commence to take the steps necessary to discharge said claim or lien, including, if necessary, the furnishing of a mechanic's lien bond. If Subcontractor fails to do so, Design-Builder will have the right to discharge the claim or lien and hold Subcontractor liable for

© 2022 Design-Build Institute of America

costs and expenses incurred, including attorneys' fees.

11.4 Subcontractor's General Indemnification.

11.4.1 Subcontractor, to the fullest extent permitted by law, shall indemnify, hold harmless and defend Owner, Design-Builder, their officers, directors, employees and agents from and against claims, losses, damages and liabilities, including attorneys' fees and expenses, for bodily injury, sickness or death, and property damage or destruction (other than to the Work itself) to the extent resulting from the negligent acts or omissions of Subcontractor, Sub-Subcontractors, anyone employed directly or indirectly by any of them or anyone for whose acts any of them may be liable.

11.4.2 If an employee of Subcontractor, anyone employed directly or indirectly by Subcontractor or anyone for whose acts any of them may be liable has a claim against any party indemnified pursuant to Section 11.4.1 above, Subcontractor's indemnity obligation set forth in Section 11.4.1 above shall not be limited by any limitation on the amount of damages, compensation or benefits payable by or for Subcontractor, Sub-Subcontractors, or other entity under any employee benefit acts, including workers' compensation or disability acts.

11.5 Design-Builder's General Indemnification.

11.5.1 Design-Builder, to the fullest extent permitted by law, shall indemnify, hold harmless and defend Subcontractor and its officers, directors, employees and agents from and against claims, losses, damages, liabilities, including attorneys' fees and expenses, for non-party bodily injury, sickness or death, and non-party property damage or destruction (other than to the Work itself) but only to the extent resulting from the negligent acts or omissions of Design-Builder, Design Consultant, Design-Builder's other contractors, anyone employed directly or indirectly by any of them or anyone for whose acts any of them may be liable.

11.5.2 If an employee of Design-Builder, anyone employed directly or indirectly by Design-Builder or anyone for whose acts any of them may be liable has a claim against any party indemnified pursuant to Section 11.5.1 above, Design-Builder's indemnity obligation set forth in Section 11.5.1 above shall not be limited by any limitation on the amount of damages, compensation or benefits payable by or for Design-Builder, Design-Builder's Design Consultant, Design-Builder's other contractors or other entity under any employee benefit acts, including workers' compensation or disability acts.

11.6 Limited Recourse.

11.6.1 None of the obligations set forth in this Agreement (on behalf of any Party) constitute personal obligations of any natural persons who are the officers, shareholders, members, partners, employees or agents of any Party unless the natural person is expressly identified as a contracting party. All Parties to this Agreement shall not seek recourse against any natural person described herein. This provision, however, shall not protect such natural persons from liability for willful misconduct, illegal acts or intentional violation of any duty of corporate loyalty.

Article 12

Changes to the Contract Price and Time

12.1 Owner-Generated Changes.

© 2022 Design-Build Institute of America

12.1.1 If Owner issues changes affecting the Work, Subcontractor agrees, if directed by Design-Builder, to meet with Design-Builder and Owner to review and discuss the changes. Subcontractor shall only be entitled to adjustments in its Contract Price and the times for completion of the Work attributable to such Owner-generated changes to the extent Design-Builder actually receives such adjustments from Owner. If Subcontractor disputes the adjustment, such dispute shall be resolved pursuant to Section 13.3 of this Agreement.

12.2 Design-Builder-Generated Changes.

12.2.1 Changes to the Work issued by Design-Builder shall be governed by the provisions set forth in the following sections of this Article 12.

12.3 Change Orders.

12.3.1 A Change Order is a written instrument issued after execution of the Agreement signed by Design-Builder and Subcontractor, stating their agreement upon all of the following:

12.3.1.1 The scope of the change in the Work;

12.3.1.2 The amount of the adjustment to the Contract Price; and

12.3.1.3 The extent of the adjustment to the times for completion of the Work.

12.3.2 All changes in the Work authorized by applicable Change Order shall be performed under the applicable conditions of the Contract Documents. Design-Builder and Subcontractor shall negotiate, in good faith and as expeditiously as possible, the appropriate adjustments for such changes.

12.3.3 If Design-Builder requests a proposal for a change in the Work from Subcontractor and subsequently elects not to proceed with the change, a Change Order shall be issued to reimburse Subcontractor for reasonable costs incurred for preparing the proposal.

12.4 Work Change Directives.

12.4.1 A Work Change Directive is a written order prepared and signed by Design-Builder directing a change in the Work prior to agreement on an adjustment in the Contract Price and/or the times for completion of the Work.

12.4.2 Design-Builder and Subcontractor shall negotiate, in good faith and as expeditiously as possible, the appropriate adjustments for the Work Change Directive. Upon reaching an agreement, the parties shall prepare and execute an appropriate Change Order reflecting the terms of the agreement.

12.5 Minor Changes in the Work.

12.5.1 Minor changes in the Work are changes that do not involve an adjustment in the Contract Price and/or times for completion of the Work and do not materially and adversely affect the Work, including the design, quality, performance and workmanship required by the Contract Documents. Design-Builder may make minor changes in the Work consistent with the intent of the Contract Documents, provided, however, that Design-Builder shall promptly inform Subcontractor, in writing, of any such changes.

12.6 Contract Price Adjustment.

© 2022 Design-Build Institute of America

12.6.1 The increase or decrease in Contract Price resulting from a change in the Work shall be determined by one or more of the following methods:

12.6.1.1 Unit prices set forth in the Agreement or as subsequently agreed between the parties;

12.6.1.2 A mutually accepted lump sum, properly itemized and supported by sufficient substantiating data to permit evaluation by Design-Builder;

12.6.1.3 Costs, fees and any other markups set forth in the Agreement; and

12.6.1.4 If an increase or decrease cannot be agreed to as set forth in items 12.6.1.1 through 12.6.1.3 above and Design-Builder issues a Work Change Directive, the cost of the change of the Work shall be determined by the reasonable expense and savings in the performance of the Work resulting from the change, including a reasonable overhead and profit, as may be set forth in this Agreement. If the net result of both additions and deletions to the Work is an increase in the Contract Price, reasonable overhead and profit shall be calculated on the basis of the net increase to the Contract Price. Subcontractor shall maintain a documented, itemized accounting evidencing the expenses and savings associated with such changes.

12.6.2 If unit prices are set forth in the Contract Documents or are subsequently agreed to by the parties, but application of such unit prices will cause substantial inequity to Design-Builder or Subcontractor because of differences in the character or quantity of such unit items as originally contemplated, such unit prices shall be equitably adjusted.

12.6.3 If Design-Builder and Subcontractor disagree upon whether Subcontractor is entitled to be paid for any services required by Design-Builder, or if there are any other disagreements over the scope of Work or proposed changes to the Work, Design-Builder and Subcontractor shall resolve the disagreement pursuant to Article 13 hereof. As part of the negotiation process, Subcontractor shall furnish Design-Builder with a good faith estimate of the costs to perform the disputed services in accordance with Design-Builder's interpretations. If the parties are unable to agree and Design-Builder expects Subcontractor to perform the services in accordance with Design-Builder's interpretations, Subcontractor shall proceed to perform the disputed services, conditioned upon Design-Builder issuing a written order to Subcontractor (i) directing Subcontractor to proceed and (ii) specifying Design-Builder's interpretation of the services that are to be performed.

12.7 Emergencies.

12.7.1 In any emergency affecting the safety of persons and/or property, Subcontractor shall act, at its discretion, to prevent threatened damage, injury or loss. Any change in the Contract Price and/or times for completion of the Work on account of emergency work shall be determined as provided in this Article 12.

Article 13

Contract Adjustments and Disputes

13.1 Requests for Contract Adjustments and Relief.

13.1.1 If either Subcontractor or Design-Builder believes that it is entitled to relief against the other for any event arising out of or related to the Work or the Project, such party shall provide written notice to the other party of the basis for its claim for relief. Such notice shall be in accordance with

© 2022 Design-Build Institute of America

specific notice requirements contained in applicable sections of the Contract Documents and, if possible, be made prior to incurring any cost or expense. Subcontractor shall provide Design-Builder written notice of claims for which Owner may be responsible in sufficient time for Design-Builder to meet its notice requirements to Owner set forth in the Contract Documents. In the absence of any specific notice requirement, written notice shall be given within a reasonable time, not to exceed ten (10) days, after the occurrence giving rise to the claim for relief or after the claiming party reasonably should have recognized the event or condition giving rise to the request, whichever is later. The claimant shall provide more complete information with respect to the claim within ten (10) days of the initial notice. The more complete information shall be in accordance with the Contract Documents and shall include sufficient information to advise the other party of the circumstances giving rise to the claim for relief, the specific contractual adjustment or relief requested and the basis of such request. Subcontractor shall comply with all documentation requirements set forth in the Design-Build Agreement when submitting its claim to Design-Builder.

13.2 Dispute Avoidance and Resolution.

13.2.1 The parties are fully committed to working with each other throughout the Project and agree to communicate regularly with each other at all times so as to avoid or minimize disputes or disagreements. If disputes or disagreements do arise, Subcontractor and Design-Builder each commit to resolving such disputes or disagreements in an amicable, professional and expeditious manner so as to avoid unnecessary losses, delays and disruptions to the Work.

13.3 Disputes Involving Owner.

13.3.1 To the extent a claim, dispute or controversy arises out of, or relates to, problems caused by Owner or for which Owner is responsible ("Owner Disputes"), such Owner Disputes shall be resolved pursuant to the dispute resolution clause set forth in the Design-Build Agreement. Both Design-Builder and Subcontractor agree to cooperate in the presentation and prosecution or defense of Owner Disputes. If, after a request for an extension of time or additional compensation from Subcontractor, Design-Builder believes that the event causing the delay or additional compensation is the responsibility of Owner, then Design-Builder will cooperate with and assist Subcontractor in presenting a request for an extension of time or additional compensation to Owner. Notwithstanding the above, Design-Builder reserves the right not to submit a claim to Owner. In such cases, the claim shall be resolved pursuant to Section 13.4.

13.3.2 Notwithstanding any other provisions herein to the contrary, Design-Builder and Subcontractor each agree to accept the relief as to a time extension or additional compensation obtained from Owner, if any, as well as all other aspects of the final decision following appeal or the expiration of the time for appeal, as full and final resolution of any Owner Dispute.

13.3.3 If Design-Builder asserts a claim against Owner involving Subcontractor, each party shall bear its own costs for outside counsel and third-party consultants retained to prosecute claims against Owner and for any other litigation costs. Each party shall present its portion of the claim to Owner.

13.3.4 If Owner contends that the Contract Documents have been breached, or otherwise asserts a claim or set-off against Design-Builder, the party determined to be responsible for the breach either by settlement or by the trier of fact shall be responsible for all costs occasioned by the breach, including counsel and litigation costs. If the trier of fact fails to determine the relative degrees of fault of Design-Builder and Subcontractor in connection with any claim by Owner, then Design-Builder and Subcontractor agree that the allocation of fault shall be determined pursuant to Section 13.4.

© 2022 Design-Build Institute of America

13.4 Disputes Not Involving Owner.

13.4.1 For any claim, dispute or controversy not arising out of, or relating to, problems caused by Owner or for which Owner is responsible, Subcontractor and Design-Builder will first attempt to resolve such claim, dispute or controversy at the field level through discussions between Design-Builder's Representative and Subcontractor's Representative.

13.4.2 If a claim, dispute or controversy cannot be resolved through Section 13.4.1, Design-Builder's Senior Representative and Subcontractor's Senior Representative, upon the request of either party, shall meet as soon as conveniently possible, but in no case later than thirty (30) days after such a request is made, to attempt to resolve such claim, dispute or controversy. Five (5) days prior to any meetings between the Senior Representatives, the parties will exchange relevant information that will assist the parties in resolving the claim, dispute or controversy.

13.4.3 If after meeting the Senior Representatives determine that the claim, dispute or controversy cannot be resolved on terms satisfactory to both parties, the parties shall submit within thirty (30) days of the conclusion of the meeting by the Senior Representatives the claim, dispute or controversy to non-binding mediation. The mediation shall be conducted by a mutually agreeable impartial mediator, or if the parties cannot so agree, a mediator designated by the American Arbitration Association ("AAA") pursuant to its Construction Industry Mediation Rules. The mediation will be governed by and conducted pursuant to a mediation agreement negotiated by the parties or, if the parties cannot so agree, by procedures established by the mediator. Unless otherwise mutually agreed by Design-Builder and Subcontractor and consistent with the mediator's schedule, the mediation shall commence within ninety (90) days of the submission of the dispute for mediation. Representatives with authority to resolve the dispute shall be present at the mediation.

13.5 Arbitration.

13.5.1 Any claims, disputes or controversies between the parties arising out of or relating to the Agreement, or the breach thereof, which have not been resolved in accordance with the procedures set forth in Section 13.4 above, shall be decided by arbitration in accordance with the Construction Industry Arbitration Rules of the AAA then in effect, unless the parties mutually agree otherwise.

13.5.2 The award of the arbitrator(s) shall be final and binding upon the parties without the right of appeal to the courts. Judgment may be entered upon it in accordance with applicable law by any court having jurisdiction thereof.

13.5.3 Subcontractor and Design-Builder expressly agree that any arbitration pursuant to this Section 13.5 may be joined or consolidated with any arbitration involving any other person or entity (i) necessary to resolve the claim, dispute or controversy, or (ii) substantially involved in or affected by such claim, dispute or controversy. Both Design-Builder and Subcontractor will include appropriate provisions in all contracts they execute with other parties in connection with the Project to require such joinder or consolidation.

13.5.4 The prevailing party in any arbitration, or any other final, binding dispute proceeding upon which the parties may agree, shall be entitled to recover from the other party reasonable attorneys' fees and expenses incurred by the prevailing party. The prevailing party, if any, shall be determined by the applicable binding dispute tribunal.

13.6 Duty to Continue Performance.

13.6.1 Unless provided to the contrary in the Contract Documents, Subcontractor shall continue to perform the Work and Design-Builder shall continue to satisfy its payment obligations for

© 2022 Design-Build Institute of America

undisputed amounts to Subcontractor, pending the final resolution of any dispute or disagreement between Design-Builder and Subcontractor.

13.7 CONSEQUENTIAL DAMAGES.

13.7.1 NOTWITHSTANDING ANYTHING HEREIN TO THE CONTRARY (EXCEPT AS SET FORTH IN SECTION 13.7.2 BELOW), NEITHER DESIGN-BUILDER NOR SUBCONTRACTOR SHALL BE LIABLE TO THE OTHER FOR ANY CONSEQUENTIAL LOSSES OR DAMAGES, WHETHER ARISING IN CONTRACT, WARRANTY, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY OR OTHERWISE, INCLUDING BUT NOT LIMITED TO LOSSES OF USE, PROFITS, BUSINESS, REPUTATION OR FINANCING.

13.7.2 Notwithstanding Section 13.7.1 above, Design-Builder shall be entitled to recover against Subcontractor (i) any liquidated damages that Owner may assess against Design-Builder which are attributable to Subcontractor, even though both parties recognize that such liquidated damages may include some damages that might otherwise be deemed to be consequential and (ii) any liability of Subcontractor for consequential damages that may be imposed upon the Design-Builder by Design-Build Agreement.

Article 14

Miscellaneous

14.1 Assignment.

14.1.1 Neither Subcontractor nor Design-Builder shall, without the written consent of the other, assign, transfer or sublet any portion or part of the Work or the obligations required by the Contract Documents.

14.2 Successorship.

14.2.1 Design-Builder and Subcontractor intend that the provisions of the Contract Documents are binding upon the parties, their employees, agents, heirs, successors and assigns.

14.3 Governing Law.

14.3.1 The Agreement and all Contract Documents shall be governed by the laws of the location of the Project, without giving effect to its conflict of law principles.

14.4 Severability.

14.4.1 If any provision or any part of a provision of the Contract Documents shall be finally determined to be superseded, invalid, illegal or otherwise unenforceable pursuant to any applicable Legal Requirements or court order, such determination shall not impair or otherwise affect the validity, legality or enforceability of the remaining provision or parts of the provision of the Contract Documents, which shall remain in full force and effect as if the unenforceable provision or part were deleted.

14.5 No Waiver.

14.5.1 The failure of either Design-Builder or Subcontractor to insist, in any one or more instances, on the performance of any of the obligations required by the other under the Contract Documents

© 2022 Design-Build Institute of America

shall not be construed as a waiver or relinquishment of such obligation or right with respect to future performance.

14.6 Headings.

14.6.1 The headings used in this Agreement, or any other Contract Document, are for ease of reference only and shall not in any way be construed to limit or alter the meaning of any provision.

14.7 Notice.

14.7.1 Whenever the Contract Documents require that notice be provided to the other party, notice will be deemed to have been validly given (i) if delivered in person to the individual intended to receive such notice, (ii) four (4) days after being sent by registered or certified mail, postage prepaid to the address indicated in the Agreement, (iii) if transmitted by facsimile, by the time stated in a machine-generated confirmation that notice was received at the number of the intended recipient, or (iv) by electronic mail, by the time frame stated in the email-generated confirmation that notice was received by the email of the intended recipient.

14.8 Amendments.

14.8.1 The Contract Documents may not be changed, altered or amended in any way except in writing signed by a duly authorized representative of each party.

14.9 Survival.

14.9.1 Subcontractor's obligations under this Agreement shall not be released and shall specifically survive the completion of all services hereunder by Subcontractor, final payment to Subcontractor and the termination of this Agreement for any reason.

Article 15

Electronic Data

15.1 Electronic Data.

15.1.1 The parties recognize that Contract Documents, including drawings, specifications and three-dimensional modeling (such as Building Information Models) and other Work Product may be transmitted among Design-Builder, Subcontractor and others in electronic media as an alternative to paper hard copies (collectively "Electronic Data").

15.2 Transmission of Electronic Data.

15.2.1 Design-Builder shall determine, after consultation with Subcontractor, the software and the format for the transmission of Electronic Data. Each party shall be responsible for securing the legal rights to access the agreed-upon format, including, if necessary, obtaining appropriately licensed copies of the applicable software or electronic program to display, interpret and/or generate the Electronic Data.

15.2.2 Neither party makes any representations or warranties to the other with respect to the functionality of the software or computer program associated with the electronic transmission of Work Product. Unless specifically set forth in the Agreement, ownership of the Electronic Data does not include ownership of the software or computer program with which it is associated, transmitted, generated or interpreted.

© 2022 Design-Build Institute of America

15.2.3 By transmitting Work Product in electronic form, the transmitting party does not transfer or assign its rights in the Work Product. The rights in the Electronic Data shall be as set forth in Article 4 of the Agreement. Under no circumstances shall the transfer of ownership of Electronic Data be deemed to be a sale by the transmitting party of tangible goods.

15.3 Electronic Data Protocol.

15.3.1 The parties acknowledge that Electronic Data may be altered or corrupted, intentionally or otherwise, due to occurrences beyond their reasonable control or knowledge, including but not limited to compatibility issues with user software, manipulation by the recipient, errors in transcription or transmission, machine error, environmental factors and operator error. Consequently, the parties understand that there is some level of increased risk in the use of Electronic Data for the communication of design and construction information and, in consideration of this, agree, and shall require their independent contractors, Subcontractors and Design Consultants to agree, to the following protocols, terms and conditions set forth in this Section 15.3.

15.3.2 Electronic Data will be transmitted in the format determined in Section 15.2.1 above, including file conventions and document properties, unless prior arrangements are made in advance in writing.

15.3.3 The Electronic Data represents the information at a particular point in time and is subject to change. Therefore, the parties shall agree upon protocols for notification by the author to the recipient of any changes which may thereafter be made to the Electronic Data, which protocol shall also address the duty, if any, to update such information if such information changes prior to Final Completion of the Project.

15.3.4 The transmitting party specifically disclaims all warranties, expressed or implied, including, but not limited to, implied warranties of merchantability and fitness for a particular purpose, with respect to the media transmitting the Electronic Data. However, transmission of the Electronic Data via electronic means shall not invalidate or negate any duties pursuant to the applicable standard of care with respect to the creation of the Electronic Data, unless such data is materially changed or altered after it is transmitted to the receiving party, and the transmitting party did not participate in such change or alteration.

15.4 In the event the Design-Build Agreement contains a provision governing Electronic Data, and there is a conflict between the provision in the Design-Build Agreement and this Article 15, the provision in the Design-Build Agreement takes precedence, notwithstanding the order of precedence set forth in Section 1.4.2.

Article 16

Confidential Information

16.1 Confidential and/or Proprietary Information.

16.1.1 Confidential Information is defined as information which is determined by the transmitting party to be of a confidential or proprietary nature and: (i) the transmitting party identifies as either confidential or proprietary; (ii) the transmitting party takes steps to maintain the confidential or proprietary nature of the information; and (iii) the document is not otherwise available in or considered to be in the public domain. The receiving party agrees to maintain the confidentiality of the Confidential Information and agrees to use the Confidential Information solely in connection with the Project.

16.1.2 Subcontractor may receive information from Design-Builder that is either confidential or proprietary to either Design-Builder or to Owner. Such information shall be labeled as confidential

© 2022 Design-Build Institute of America

and/or proprietary. Subcontractor agrees to maintain the confidential nature of such information and to execute any such additional agreements as may be required by Owner or Design-Builder with respect to such information.

16.1.3 In the event the Design-Build Agreement contains a provision governing Confidential Information, and there is a conflict between the provision in the Design-Build Agreement and this Article 16, the provision in the Design-Build Agreement takes precedence, notwithstanding the order of precedence set forth in Section 1.4.2.

Article 17

Other Provisions

17.1 Other provisions, if any, are as follows:

(Insert any additional provisions, including those that relate to options that might have been selected by Design-Builder and Owner in the Design-Build Agreement related to Warranty Reserves, alternatives to Liquidated Damages, etc. as the parties may deem commercially appropriate.)

[In lieu of Sections 13.5.1 through 13.5.3 of the Agreement, the parties may want to delete such sections and include the following alternative disputes proceeding clause.]

☐ Any claims, disputes or controversies between the parties arising out of or related to the Agreement, or the breach thereof which have not been resolved in accordance with the procedures set forth in Section 13.4 herein shall be resolved in a court of competent jurisdiction in the state in which the Project is located.

© 2022 Design-Build Institute of America

In executing this Agreement, Design-Builder and Subcontractor each individually represents that it has the necessary financial resources to fulfill its obligations under this Agreement, and each has the necessary corporate approvals to execute this Agreement, and perform the Work described herein.

Washington, D.C.

Design-Build Institute of America – Contract Documents

LICENSE AGREEMENT

By using the DBIA Contract Documents, you agree to and are bound by the terms of this License Agreement.

1. **License.** The Design-Build Institute of America ("DBIA") provides DBIA Contract Documents and licenses their use worldwide. You acknowledge that DBIA Contract Documents are protected by the copyright laws of the United States. You have a limited nonexclusive license to: (a) Use DBIA Contract Documents on any number of machines owned, leased or rented by your company or organization; (b) Use DBIA Contract Documents in printed form for bona fide contract purposes; and (c) Copy DBIA Contract Documents into any machine-readable or printed form for backup or modification purposes in support of your permitted use.
2. **User Responsibility.** You assume sole responsibility for the selection of specific documents or portions thereof to achieve your intended results and for the installation, use and results obtained from the DBIA Contract Documents. You acknowledge that you understand that the text of the DBIA Contract Documents has important legal consequences and that consultation with an attorney is recommended with respect to use or modification of the text. You will not represent that any of the contract documents you generate from DBIA Contract Documents are DBIA documents unless (a) the document text is used without alteration or (b) all additions and changes to, and deletions from, the text are clearly shown.
3. **Copies.** You may not use, copy, modify or transfer DBIA Contract Documents, or any copy, modification or merged portion, in whole or in part, except as expressly provided for in this license. Reproduction of DBIA Contract Documents in printed or machine-readable format for resale or educational purposes is expressly prohibited. You will reproduce and include DBIA's copyright notice on any printed or machine-readable copy, modification or portion merged into another document or program.
4. **Transfers.** You may not transfer possession of any copy, modification or merged portion of DBIA Contract Documents to another party, except that a party with whom you are contracting may receive and use such transferred material solely for purposes of its contract with you. You may not sublicense, assign or transfer this license except as expressly provided in this Agreement, and any attempt to do so is void.
5. **Term.** The license is effective for one year from the date of purchase. DBIA may elect to terminate it earlier, by written notice to you, if you fail to comply with any term or condition of this Agreement.
6. **Limited Warranty.** DBIA warrants the electronic files or other media by which DBIA Contract Documents are furnished to be free from defects in materials and workmanship under normal use during the Term. There is no other warranty of any kind, expressed or implied, including, but not limited to the implied warranties of merchantability and fitness for a particular purpose. Some states do not allow the exclusion of implied warranties, so the above exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state. DBIA does not warrant that the DBIA Contract Documents will meet your requirements or that the operation of DBIA Contract Documents will be uninterrupted or error free.
7. **Limitations of Remedies.** DBIA's entire liability and your exclusive remedy shall be: the replacement of any document not meeting DBIA's "Limited Warranty" which is returned to DBIA with a copy of your receipt, or at DBIA's election, your money will be refunded. In no event will DBIA be liable to you for any damages, including any lost profits, lost savings or other incidental or consequential damages arising out of the use or inability to use DBIA Contract Documents even if DBIA has been advised of the possibility of such damages, or for any claim by any other party. Some states do not allow the limitation or exclusion of liability for incidental or consequential damages, so the above limitation or exclusion may not apply to you.
8. **Acknowledgement.** You acknowledge that you have read this agreement, understand it and agree to be bound by its terms and conditions and that it will be governed by the laws of the District of Columbia. You further agree that it is the complete and exclusive statement of your agreement with DBIA which supersedes any proposal or prior agreement, oral or written, and any other communications between the parties relating to the subject matter of this agreement.

General Instructions

No.	Subject	Instruction
1.	Standard Forms	Standard form contracts have long served an important function in the United States and international construction markets. The common purpose of these forms is to provide an economical and convenient way for parties to contract for design and construction services. As standard forms gain acceptance and are used with increased frequency, parties are able to enter into contracts with greater certainty as to their rights and responsibilities.
2.	DBIA Standard Form Contract Documents	Since its formation in 1993, the Design-Build Institute of America ("DBIA") has regularly evaluated the needs of owners, design-builders, and other parties to the design-build process in preparation for developing its own contract forms. Consistent with DBIA's mission of promulgating best design-build practices, DBIA believes that the design-build contract should reflect a balanced approach to risk that considers the legitimate interests of all parties to the design-build process. DBIA's Standard Form Contract Documents reflect a modern risk allocation approach, allocating each risk to the party best equipped to manage and minimize that risk, with the goal of promoting best design-build practices.
3.	Use of Non-DBIA Documents	To avoid inconsistencies among documents used for the same project, DBIA's Standard Form Contract Documents should not be used in conjunction with non-DBIA documents unless the non-DBIA documents are appropriately modified on the advice of legal counsel. Moreover, care should also be taken when using different editions of the DBIA Standard Form Documents on the same project to ensure consistency.
4.	Legal Consequences	DBIA Standard Form Contract Documents are legally binding contracts with important legal consequences. Contracting parties are advised and encouraged to seek legal counsel in completing or modifying these Documents.
5.	Reproduction	DBIA hereby grants to purchasers a limited license to reproduce its Documents consistent with the License Agreement accompanying these Documents. At least two original versions of the Agreement should be signed by the parties. Any other reproduction of DBIA Documents is strictly prohibited.
6.	Modifications	Effective contracting is accomplished when the parties give specific thought to their contracting goals and then tailor the contract to meet the unique needs of the project and the design-build team. For that reason, these Documents may require modification for various purposes including, for example, to comply with local codes and laws, or to add special terms. DBIA's latest revisions to its Documents provide the parties an opportunity to customize their contractual relationship by selecting various optional contract clauses that may better reflect the unique needs and risks associated with the project. Any modifications to these Documents should be initialed by the parties. At no time should a document be re-typed in its entirety. Re-creating the document violates copyright laws and destroys one of the advantages of standard forms – familiarity with the terms.
7.	Execution	It is good practice to execute two original copies of the Agreement. Only persons authorized to sign for the contracting parties may execute the Agreement.

Specific Instructions

Section	Title	Instruction
General	Purpose of This Agreement	DBIA Document No. 575, *Standard Form of Agreement Between Design Consultant and Design Sub-Consultant* (2022 Edition) ("Agreement"), sets forth the terms and conditions under which the design for the Project and other design services during the construction phase of the Project will be performed. This Agreement envisions that Design Sub-Consultant and Design Consultant have reviewed the requirements of the Design Consultant Agreement between Design-Builder and Design Consultant and the Design-Build Agreement between Design-Builder and Owner (either DBIA Document No. 525, *Standard Form of Agreement Between Owner and Design-Builder – Lump Sum* (2022 Edition), DBIA Document No. 530, *Standard Form of Agreement Between Owner and Design-Builder – Cost Plus Fee with an Option for a Guaranteed Maximum Price* (2022 Edition), DBIA Document No. 544, *Standard Form of Progressive Design-Build Agreement* (2022 Edition), or DBIA Document No. 545, *Standard Form Progressive Design-Build Agreement for Water and Wastewater Projects* (2022 Edition) and including DBIA Document No. 535, *Standard Form of General Conditions of Contract Between Owner and Design-Builder* (2022 Edition), and requires Design Sub-Consultant to design the portion of the Project within Design Sub-Consultant's Scope of Services consistent with the Contract Documents.
General	Purpose of These Instructions	These Instructions are not part of this Agreement, but are provided to aid the parties in their understanding of the Agreement and in completing the Agreement.
General	Date	On Page 1, enter the date when both parties reach a final understanding. It is possible, due to logistical reasons, that the dates when the parties execute the Agreement may be different. Once both parties execute the Agreement, the effective date of the Agreement will be the date recorded on Page 1. This date does not, however, determine the Date of Commencement, which is measured according to the terms of Section 5.1.1.
General	Parties: Design-Builder and Design Consultant	On Page 1 enter the legal name and full address of Design Consultant, Design Sub-Consultant, Design-Builder and Owner, as well as the legal form of each entity, e.g., corporation, partnership, limited partnership, limited liability company or other.
1.1.1	Pass Through	The section recognizes that Design Sub-Consultant has the same rights, responsibilities and obligations as to Design Consultant as Design Consultant by the Design Consultant Agreement has against and to Design-Builder. However, because the Design Consultant Agreement also affords Design Consultant and Design-Builder many opportunities to customize their contractual relationship by the selection of optional provisions, DBIA does not believe that these optional provisions should automatically pass through to Design Sub-Consultant. Accordingly, if Design Consultant and Design Sub-Consultant believe it is appropriate to afford Design Sub-Consultant the same rights, responsibilities and obligations as it relates to these optional provisions, the parties should make that clear by adding the necessary and appropriate provisions at Article 15 of this Agreement. This section requires that the parties identify in an Exhibit Design Sub-Consultant's Scope of Services, defined as that portion of the professional services for the Project to be performed by Design Sub-Consultant.
1.2	Definitions	Terms, words and phrases used in the Agreement shall have the same meanings used in the Design Consultant Agreement between Design-Builder and Design Consultant except to the extent set forth in Section 1.2.
1.3.1	Contract Documents	This section identifies the Contract Documents, which include the Basis of Design Documents defined in Section 1.2.1.3.
1.4.2	Order of Precedence	The Contract Documents are listed in Section 1.3 in the order of their precedence.

© 2022 Design-Build Institute of America

Section	Title	Instruction
1.4.3	Design Specifications	If Design-Builder has provided design specifications to Design Consultant, Design Sub-Consultant is entitled to rely on the information provided to the same extent as Design Consultant. If said information is not accurate, Design Sub-Consultant may be entitled to an adjustment of costs and/or time to the extent Design Consultant recovers from Design-Builder.
1.5.2	Mutual Obligations and Acknowledgments	This Agreement contemplates that Design Consultant and Design Sub-Consultant have either cooperated in the procurement of the Design-Build Agreement and/or Design Consultant Agreement or met to review, discuss and familiarize themselves with the Design-Build Agreement and the Design Consultant Agreement and that Design Sub-Consultant has familiarized itself with Design Consultant Agreement and Design-Build Agreement, including Owner's Project Criteria and the Basis of Design Documents.
2.1.1	Design Professional Services	The parties should be aware that in addition to requiring compliance with state licensing laws for design professionals, some states also require that the design professional have a corporate professional license.
2.1.2	Lower Tier Design Sub-Consultants	Design Sub-Consultant must obtain Design Consultant's approval to engage Lower Tier Design Sub-Consultants and to substitute any approved Lower Tier Design Sub-Consultants. Design Consultant's approval cannot be unreasonably withheld.
2.2.1	Standard of Care for Design Professional Services	Design Sub-Consultant's obligation is to deliver a design that meets prevailing industry standards.
2.4.1	Primary Personnel	Attach a list of Design Sub-Consultant's primary personnel for the Project.
2.5.1	Government Approvals and Permits	Design Sub-Consultant is responsible for obtaining the specific permits, approvals and licenses set forth in an exhibit to the Agreement.
2.6.1	Design Development Services	In accordance with the Design Schedule, the parties will hold design monitoring meetings during the development of the Project design so that the final design shall be consistent with the requirements of the Contract Documents, including Owner's Project Criteria and the Basis of Design Documents, as the Basis of Design Documents may have been modified.
2.6.1	Deviations from the Basis of Design Documents	Under the Design-Build Agreement, Design-Builder is obligated to provide notice to Owner of the evolution of the design or if there are any changes or deviations from the Contract Documents. Design-Builder is obligated to incorporate Owner's Comments to Design Submissions; however, if incorporation of Owner's Comments results in a design that is inconsistent with or otherwise gives rise to a change for which Design-Builder would be entitled to a change under the Design-Build Agreement, Design-Builder must provide notice to Owner of such change. Design Consultant, Design Sub-Consultants have the same obligation to review the Design Submissions and to identify and provide notice to Design-Builder of such changes with respect to those documents that are within Design Sub-Consultant's Scope of Services, if Design Sub-Consultant fails to identify changes that it made to the Contract Documents, including the Basis of Design Documents, or fails to produce Construction Documents consistent with approved changes, Design Sub-Consultant is responsible for any additional costs incurred by Design Consultant as a result of the undisclosed changes.
2.7.6	Site Visits	If the parties agree to a specific frequency of Design Sub-Consultant site visits, attach an exhibit setting forth such requirements.
2.8	Additional Services	If the parties agree that Design Sub-Consultant shall provide any services beyond those contained in the Agreement, such Additional Services shall be set forth in an exhibit attached to the Agreement.

© 2022 Design-Build Institute of America

Section	Title	Instruction
3.3.1	Furnishing of Information	Design-Consultant shall furnish Design Sub-Consultant with the listed Design-Builder-provided information. Design Sub-Consultant is entitled to rely on the Design-Builder-provided information to the same extent Design Consultant is entitled to pursuant to the Design Consultant Agreement.
4.1	Work Product	This Agreement provides that Design Sub-Consultant shall retain ownership of the Work Product. However, if the Design Consultant Agreement conflicts with the above, then Design Sub-Consultant grants Design Consultant the same rights that Design Consultant has provided Design-Builder and Owner.
4.2	Agreement to Grant Rights to Owner	Design Sub-Consultant has reviewed the Design Consultant Agreement and Design-Build Agreement and understands that it is required to grant Design-Builder and/or Owner the rights to the Work Product according to the terms and circumstances described in the Design Consultant Agreement and the Design-Build Agreement.
4.3	Indemnification for Use of Work Product	If either Design Consultant or Design Sub-Consultant uses the Work Product on any other project, that party shall defend, indemnify and hold harmless the other party, Design-Builder and Owner.
4.4.1	Use of Work Product Upon Termination for Convenience or Design Consultant's Default	If Design Consultant terminates this Agreement for convenience or if Design Sub-Consultant terminates this Agreement due to Design Consultant's default, Design Sub-Consultant grants Design Consultant, Design-Builder and Owner the right to use the Work Product as set forth in Section 4.1.1. The granting of these rights is conditioned on (i) paying Design Sub-Consultant all amounts due under the Agreement, including paying Design Sub-Consultant an additional sum (to be negotiated) under Section 4.4.1.2 for the use of the Work Product; and (ii) Design Consultant, Design-Builder and/or Owner using the Work Product at their risk.
4.4.2	Use of Work Product Upon Design Sub-Consultant's Default	If Design Sub-Consultant is properly terminated for default, Design Consultant shall have the same rights to use the Work Product as set forth in Section 4.1.1.
5.1	Date of Commencement	Design Sub-Consultant's obligation to commence work is triggered by its receipt of a Notice to Proceed unless the parties mutually agree otherwise.
6.1.2	Design Sub-Consultant's Fee	Attach an exhibit setting forth the basis for compensating Design Sub-Consultant for its Design Phase Services, Construction Phase Services, Additional Services, if any, and Reimbursable Costs.
6.2.1	Applications for Payment	Enter the day of the month when Design Sub-Consultant shall submit its Application for Payment.
6.7	Interest	The parties should enter the rate at which interest will accrue on Design Sub-Consultant's payments if unpaid five (5) days after due. Late payment creates a hardship for Design Sub-Consultant and its Lower Tier Design Sub-Consultants.
6.9	Record Keeping	Design Consultant is provided access to, and the right to audit Design Sub-Consultant's records. However, if the parties have agreed to fees (that are either a lump sum or percentage of construction costs), multipliers or markups, the time to challenge and negotiate those percentages is at the time the parties execute the Agreement and not during the Project or after it has been completed. Accordingly, Design Consultant can at any time audit these percentages only to confirm that such percentage has been properly charged and not to challenge the composition of such percentage.
7.1	Design Consultant's Right to Terminate for Convenience	Design Consultant shall only have the right to terminate Design Sub-Consultant without cause if Design-Builder elects to terminate Design Consultant for any reason.

© 2022 Design-Build Institute of America

Section	Title	Instruction
Article 8	Representatives of the Parties	Enter the name, title, address and telephone number of Design Consultant's Senior Representative and Design Consultant's Representative at Sections 8.1.1 and 8.1.2, respectively. Enter the name, title, address and telephone number of Design Sub-Consultant's Senior Representative and Design Sub-Consultant's Representative at Sections 8.2.1 and 8.2.2, respectively.
9.1.1	Design Sub-Consultant's Insurance Requirements	Attach an Insurance Exhibit setting forth in detail the insurance coverages Design Sub-Consultant is required to provide for the Project. Parties are advised to consult their insurance advisors.
9.1.2	Design Sub-Consultant's Insurance Requirements	Design Sub-Consultant is obligated to require its Lower Tier Design Sub-Consultants to provide the insurance coverage set forth in the Insurance Exhibit to the Agreement. Parties are advised to consult their insurance advisors.
9.1.3	Exclusions to Design-Build	Parties are advised that standard liability insurance policies may contain exclusions for the design-build delivery method. This Section 9.1.3 requires that any such exclusions be deleted from the policy.
9.1.4	Errors and Omissions Insurance	Should Design Consultant, after its analysis of the risk factors involved, require this insurance, the coverage required shall be as set forth in the Insurance Exhibit.
11.3	Disputes Involving Owner or Design-Builder	Disputes for which Owner or Design-Builder is responsible will be resolved in accordance with the dispute resolution clause in the Design-Build Agreement or Design Consultant Agreement.
11.4	Disputes Not Involving Owner or Design-Builder	DBIA endorses the use of partnering, negotiation, mediation and arbitration for the prevention and resolution of disputes. The Agreement provides for the parties' Representatives and Senior Representatives to attempt to negotiate the dispute or disagreement. If this attempt fails, the dispute shall be submitted to mandatory, non-binding mediation. Any dispute that cannot be resolved by mediation shall then be submitted to binding arbitration pursuant to Section 11.5 unless the parties elect the option in Section 15.1 of the Agreement to submit their dispute to a court of competent jurisdiction.
11.5.4	Arbitration	The prevailing party in any arbitration shall receive reasonable attorneys' fees from the other party. DBIA supports this "loser pays" provision to encourage parties to negotiate or mediate their differences and to minimize the number of frivolous disputes.
11.6	Duty to Continue Performance	Pending the resolution of any dispute or disagreement, both Design Consultant and Design Sub-Consultant shall continue to perform their respective duties under the Contract Documents, unless the parties provide otherwise in the Contract Documents.
11.7	Consequential Damages	If the Design Consultant Agreement waives Consequential Damages, DBIA believes that it is inappropriate for either Design Consultant or Design Sub-Consultant to be responsible to the other for consequential damages arising from the Project. This limitation on consequential damages in no way restricts, however, Design Consultant's entitlement to recover against Design Sub-Consultant liquidated damages assessed by Design-Builder against Design Consultant which are attributable to Design Sub-Consultant, and which may include damages that might otherwise be deemed consequential.

Section	Title	Instruction
Article 13	Electronic Data	Design-Builder will determine, after consultation with Design Consultant, the software and format for the transmission of Electronic Data. Ownership of Work Product in electronic form is governed by Article 4 of the Agreement. The transmitting party disclaims all warranties with respect to the media transmitting the Electronic Data, but nothing in this Article is intended to negate duties with respect to the standard of care in creating the Electronic Data. In the event the Design Consultant Agreement contains a conflicting provision governing Electronic Data, the provision in the Design Consultant Agreement takes precedence.
Article 15	Other Provisions	Insert any other provisions. For example, the parties may elect to have disputes resolved through litigation rather than arbitration, in which case the optional language in this Section should be included. Also, the parties may want to incorporate specific optional provisions from the Design Consultant Agreement, in which case those provisions should be expressly incorporated in Article 15.

Standard Form of Agreement Between Design Consultant and Design Sub-Consultant

This document has important legal consequences. Consultation with an attorney is recommended with respect to its completion or modification.

This **AGREEMENT** is made as of the _____ day of _____ in the year of 20_____, by and between the following parties:

DESIGN CONSULTANT:
(Name and address)

DESIGN SUB-CONSULTANT
(Name and address)

for services in connection with the Project identified below:
DESIGN-BUILDER:
(Name and address)

PROJECT:
(Include Project name and location as it will appear in the Contract Documents)

OWNER:
(Name and address)

In consideration of the mutual covenants and obligations contained herein, Design Consultant and Design Sub-Consultant agree as set forth herein.

© 2022 Design-Build Institute of America

Article 1
General

1.1 Basic Purpose

1.1.1 Design-Builder has contracted with Owner to provide the services of a licensed design professional to perform all necessary design services for the Project as set forth in the Design-Build Agreement between Owner and Design-Builder. Design Consultant, through itself and its design sub-consultants, has agreed in the Design Consultant Agreement to provide such architectural, engineering and other services required by this Agreement and the other Contract Documents. Design Consultant and Design Sub-Consultant hereby agree to provide the professional services outlined in Exhibit _____ ("Scope of Services") in accordance with the Design-Build Agreement and the Design Consultant Agreement. Design Consultant and Design Sub-Consultant further agree that to the extent applicable to the performance of the Services hereunder, Design Sub-Consultant shall have the same rights, responsibilities and obligations as to Design Consultant as Design Consultant by the Design Consultant Agreement has against and to Design-Builder, except as may be modified herein. Notwithstanding the foregoing, if Design-Builder and Owner have checked boxes indicating the selection of optional provisions from the Design-Build Agreement and Design-Builder and Design Consultant have passed through those provisions in the Design Consultant Agreement, those optional provisions are only passed through to Design Sub-Consultant to the extent those provisions have been expressly set forth in Article 15.

1.2 Basic Definitions

1.2.1 Terms used in this Agreement shall have the meanings set forth in the Design-Build Agreement between Owner and Design-Builder and in the Design Consultant Agreement unless otherwise provided herein, with the following specific terms defined as follows:

1.2.1.1 *Additional Services* are those services identified in Section 2.8 hereof.

1.2.1.2 *Agreement* refers to this executed contract between Design Consultant and Design Sub-Consultant under DBIA Document 575, *Standard Form of Agreement Between Design Consultant and Design Sub-Consultant* (2022 Edition).

1.2.1.3 *Basis of Design Documents* are as follows: For DBIA Document No. 530, *Standard Form of Agreement Between Owner and Design-Builder – Cost Plus Fee With an Option for a Guaranteed Maximum Price* (2022 Edition), and for DBIA Document No. 544, *Standard Form of Progressive Design-Build Agreement* (2022 Edition), and Document No. 545, *Standard Form Progressive Design-Build Agreement for Water and Wastewater Projects* (2022 Edition), the Basis of Design Documents are those documents specifically listed in, as applicable, the GMP Exhibit or GMP Proposal as being the "Basis of Design Documents." For DBIA Document No. 525, *Standard Form of Agreement Between Owner and Design-Builder – Lump Sum* (2022 Edition), the Basis of Design Documents are Owner's Project Criteria, Design-Builder's Proposal and the Deviation List, if any.

1.2.1.4 *Construction Documents* are the documents, consisting of Drawings and Specifications, to be prepared or assembled by Design Consultant and Design Sub-Consultants consistent with the Basis of Design Documents, unless a deviation from the Basis of Design Documents is specifically set forth in a Change Order.

1.2.1.5 *Construction Phase Services* refers to those services identified in Section 2.7 hereof.

© 2022 Design-Build Institute of America

1.2.1.6 *Day* or *Days* shall mean calendar days unless otherwise specifically noted in the Contract Documents.

1.2.1.7 *Design-Build Agreement* refers to the contract between Design-Builder and Owner for the design and construction of the Project under either DBIA Document No. 525, *Standard Form of Agreement Between Owner and Design-Builder – Lump Sum* (2022 Edition), DBIA Document No. 530, *Standard Form of Agreement Between Owner and Design-Builder – Cost Plus Fee with an Option for a Guaranteed Maximum Price* (2022 Edition), DBIA Document No. 544, *Standard Form of Progressive Design-Build Agreement* (2022 Edition), or Document No. 545, *Standard Form Progressive Design-Build Agreement for Water and Wastewater Projects* (2022 Edition), including the DBIA Document No. 535, *Standard Form of General Conditions of Contract Between Owner and Design-Builder* (2022 Edition), and all exhibits, attachments and other Contract Documents enumerated and incorporated therein.

1.2.1.8 *Design Consultant Agreement* refers to the contract between Design-Builder and Design Consultant for the design of the Project under DBIA Document No. 540, *Standard Form of Agreement Between Design-Builder and Design Consultant*, and all exhibits, attachments, and other Contract Documents enumerated and incorporated therein.

1.2.1.9 *Design Phase Services* refers to those services set forth in Sections 2.5 and 2.6 hereof.

1.2.1.10 *Design Schedule* refers to the schedule setting forth the dates by which Design Consultant and Design Sub-Consultant must perform the various Services required herein, consistent with the Project Schedule.

1.2.1.11 *Design Sub-Consultant's Fee* shall refer to the compensation due Design Sub-Consultant for the performance of the Services as set forth herein.

1.2.1.12 *Design Submission* means any and all documents, shop drawings, electronic information, including computer programs and computer generated materials, data, plans, drawings, sketches, illustrations, specifications, descriptions, models and other information developed, prepared, furnished, delivered or required to be delivered by, or for, Design-Builder, Design Consultant or Design Sub-Consultant.

1.2.1.13 *Final Completion* is the date on which all Work is complete in accordance with the Contract Documents, including but not limited to any items identified in the punch list prepared under Section 6.6.1 of the General Conditions of the Design-Build Agreement and the submission of all documents set forth in Section 6.7.2 of the General Conditions of the Design-Build Agreement.

1.2.1.14 *Hazardous Conditions* are any materials, wastes, substances and chemicals deemed to be hazardous under applicable Legal Requirements, or the handling, storage, remediation or disposal of which are regulated by applicable Legal Requirements.

1.2.1.15 *Legal Requirements* are all applicable federal, state and local laws, codes, ordinances, rules, regulations, orders and decrees of any government or quasi-government entity having jurisdiction over the parties, the Project or Site, the practices involved in the Project or Site, or any Services.

1.2.1.16 *Lower Tier Design Sub-Consultant* is a qualified, licensed design professional who is not an employee of Design Sub-Consultant, but is retained by Design Sub-

© 2022 Design-Build Institute of America

Consultant or employed or retained by anyone under contract with Design Sub-Consultant, to furnish design services required under the Contract Documents.

1.2.1.17 *Owner's Project Criteria* are developed by or for Owner to describe Owner's program requirements and objectives for the Project, including use, space, price, time, site and expandability requirements, as well as submittal requirements and other requirements governing Design-Builder's performance of the Work. Owner's Project Criteria may include conceptual documents, design criteria, design performance specifications, design specifications and LEED® or other sustainable design criteria and other Project-specific technical materials and requirements.

1.2.1.18 *Project Schedule* refers to the schedule setting forth the dates by which the various stages of both the design and construction of the Project must be performed so as to satisfy Design-Builder's obligations to Owner.

1.2.1.19 *Scope of Services* shall include all Design Phase Services, Construction Phase Services and Additional Services required by Exhibit _____ or as may be authorized in writing by Design Consultant except for those design services provided by others under Section 1.5.3 or by Owner's design consultants.

1.2.1.20 *Site* is the land or premises on which the Project is located.

1.2.1.21 *Subcontractor* is any person or entity retained by Design-Builder as an independent contractor to perform a portion of the construction work for the Project and shall include materialmen and suppliers.

1.2.1.22 *Sub-Subcontractor* is any person or entity retained by a Subcontractor as an independent contractor to perform any portion of the Subcontractor's work and shall include materialmen and suppliers.

1.2.1.23 *Substantial Completion* or *Substantially Complete* is the date on which the Project, or an agreed upon portion of the Project, is sufficiently complete so that Owner can occupy and use the Project or a portion thereof for its intended purposes.

1.3 Contract Documents

1.3.1 The Contract Documents are comprised of the following:

1.3.1.1 All written modifications, amendments, minor changes and Change Orders to this Agreement;

1.3.1.2 The Basis of Design Documents;

1.3.1.3 This Agreement, including all exhibits and attachments, executed by Design Consultant and Design Sub-Consultant;

1.3.1.4 The Design Consultant Agreement (excluding the Basis of Design Documents), but only to the extent the Design Consultant Agreement relates to the Services and the terms and conditions under which the Services in this Agreement shall be performed;

1.3.1.5 The Design-Build Agreement (excluding the Basis of Design Documents), but only to the extent the Design-Build Agreement relates to the Services and the terms and conditions under which the Services in this Agreement shall be performed; and

© 2022 Design-Build Institute of America

1.3.1.6 Construction Documents prepared and approved in accordance with Section 2.4 of the General Conditions of the Design-Build Agreement.

1.4 Interpretation and Intent

1.4.1 Design Consultant and Design Sub-Consultant, prior to execution of the Agreement, shall carefully review all the Contract Documents, including the various documents comprising the Basis of Design Documents relating to the Scope of Services, for any conflicts or ambiguities. Design Consultant and Design Sub-Consultant will discuss and resolve any identified conflicts or ambiguities prior to execution of the Agreement.

1.4.2 The Contract Documents are intended to be complementary and interpreted in harmony so as to avoid conflict with words and phrases interpreted consistent with construction and design industry standards. In the event inconsistencies, conflicts or ambiguities between or among the Contract Documents are discovered after execution of the Agreement, the parties shall attempt to resolve such ambiguities, conflicts or inconsistencies informally, recognizing that the Contract Documents shall take precedence in the order in which they are listed in Section 1.3 hereof.

1.4.3 If Owner's Project Criteria contain design specifications, Design Sub-Consultant shall be entitled to reasonably rely on the accuracy of the information represented in such design specifications and their compatibility with other information set forth in Owner's Project Criteria, including any performance specifications, to the same extent as Design-Builder and Design Consultant are entitled to so rely on the Design-Build Agreement and the Design Consultant Agreement. If Design Sub-Consultant contends that its costs and/or time of performance have been adversely impacted by such inaccurate design specifications, then it shall proceed in accordance with Section 11.3.

1.5 Mutual Obligations and Acknowledgments

1.5.1 Design Consultant and Design Sub-Consultant commit at all times to cooperate fully with each other, and proceed on the basis of trust and good faith, to permit each party to realize the benefits afforded under the Contract Documents. Design Consultant and Design Sub-Consultant shall perform their respective responsibilities, obligations and services in a timely manner to facilitate the other's timely and efficient performance and so as not to delay or interfere with the other's performance of its obligations under the Contract Documents.

1.5.2 Design Consultant and Design Sub-Consultant acknowledge the following:

[Check appropriate box.]

☐ They have cooperated with each other in the procurement of the Design-Build Agreement and that Design Consultant and Design Sub-Consultant have met to review, discuss and familiarize themselves with the Design-Build Agreement and the Design Consultant Agreement, including Owner's Project Criteria and the Basis of Design Documents that relate to the Scope of Services.

☐ Design-Builder and Design Consultant have met to review, discuss and familiarize themselves with the Design-Build Agreement and the Design Consultant Agreement, including Owner's Project Criteria and the Basis of Design Documents that relate to the Scope of Services.

1.5.3 Design-Builder or Design Consultant may choose to have portions of the overall design (e.g., structural and MEP) undertaken by design professionals directly employed by or contracting with Design-Builder or Design Consultant. Design Consultant and Design Sub-Consultant

© 2022 Design-Build Institute of America

acknowledge the importance of integrating all of the designs into the Project's overall design concept. The parties commit to working with each other and with any other design professionals working on the Project with Design-Builder and Design Consultant to facilitate the coordination and integration of other Design Consultants and Design Sub-Consultant's Services with the Project's overall design concept. Design-Builder is responsible for the services performed by design professionals under contract with Design-Builder. Design Consultant is responsible for the services performed by design professionals under contract with Design Consultant, but nothing herein is intended to relieve Design Sub-Consultant of its obligation to coordinate its Services with the services performed by other design professionals and Lower Tier Design Sub-Consultants.

1.5.4 Design Consultant and Design Sub-Consultant mutually agree that time is of the essence with respect to the dates and times set forth in the Design Schedule, Project Schedule and Contract Documents. Each party agrees to provide the other party with information in a timely fashion and in the form and manner as reasonably required.

1.6 Entire Agreement

1.6.1 Subject to the limitations in Section 1.3.1, the Contract Documents, all of which are incorporated by reference into this Agreement, form the entire agreement between Design Consultant and Design Sub-Consultant and are as fully binding on the parties as if repeated herein. No oral representations or other agreements have been made by the parties except as specifically stated in the Contract Documents.

Article 2
Design Sub-Consultant's Services and Responsibilities

2.1 General

2.1.1 Design Sub-Consultant shall, consistent with applicable state licensing laws, provide the Services, including architectural, engineering and other professional services, required by the Scope of Services. Design Sub-Consultant agrees that such Services shall be provided through qualified, licensed professionals who are either (i) employed by Design Sub-Consultant or (ii) procured by Design Sub-Consultant from qualified, licensed Lower Tier Design Sub-Consultants.

2.1.2 Design Sub-Consultant shall not engage the services of any Lower Tier Design Sub-Consultant without first obtaining the approval of Design Consultant and Design-Builder, which approval shall not be unreasonably withheld. Design Sub-Consultant agrees that each Lower Tier Design Sub-Consultant shall be fully bound to Design Sub-Consultant in the same manner as Design Sub-Consultant is bound to Design Consultant for all the requirements of the Contract Documents to the extent applicable to the Lower Tier Design Sub-Consultant's scope of services. Design Sub-Consultant shall at all times be responsible for the services performed by its Lower Tier Design Sub-Consultants, and shall coordinate the services of its Lower Tier Design Sub-Consultants to satisfy Design Sub-Consultant's obligations under the Contract Documents. Nothing in this Agreement shall relieve Design Sub-Consultant from responsibility for the services performed by its Lower Tier Design Sub-Consultants, or create any legal or contractual relationship between Design Consultant and any Lower Tier Design Sub-Consultant. Design Sub-Consultant may not substitute approved Lower Tier Design Sub-Consultants without Design-Consultant's written consent, such consent shall not be unreasonably withheld. Nothing in the Contract Documents is intended or deemed to create any legal or contractual relationship between Design Consultant and any Lower Tier Design Sub-Consultant, including but not limited to any third-party beneficiary rights.

© 2022 Design-Build Institute of America

2.1.3 If Design Consultant, Design-Builder or Owner performs other work on the Project with separate design professionals under Design Consultant's, Design-Builder's or Owner's control, Design Sub-Consultant agrees to reasonably cooperate and coordinate its activities with those of such separate design professionals so that the Project can be completed in an orderly and coordinated manner and without disruption.

2.1.4 Design Sub-Consultant shall only communicate with Design-Builder, Owner, Subcontractors or Sub-Subcontractors through Design Consultant unless the parties agree otherwise. Notwithstanding the preceding sentence, Design Sub-Consultant may communicate directly with Owner and Design-Builder (with written copy to Design Consultant) on matters of public health, safety and welfare when required by applicable Legal Requirements or professional codes of ethics.

2.1.5 Within seven (7) days after execution of this Agreement, Design Consultant and Design Sub-Consultant will meet to discuss issues affecting the administration of the Services and to implement the necessary procedures, including but not limited to those relating to the schedule for the Services, schedule updates, review of submittals and payment, to facilitate the ability of the parties to perform their obligations under the Contract Documents and allow Design Consultant to meet its obligations to design the Project consistent with the Contract Documents, without compromising any professional obligations of Design Sub-Consultant. This meeting may take place in connection with the meeting described in Section 2.1.5 of the Design Consultant Agreement or in Section 2.1.4 of the General Conditions of the Design-Build Agreement.

2.2 Standard of Care

2.2.1 The standard of care for all professional services performed by Design Sub-Consultant and its Lower Tier Design Sub-Consultants pursuant to this Agreement shall be the care and skill ordinarily used by members of the applicable profession practicing under similar conditions at the same time and locality of the Project.

2.3 Legal Requirement

2.3.1 Design Sub-Consultant agrees to perform the Services in accordance with all applicable Legal Requirements.

2.3.2 Design Sub-Consultant's Fee and/or the Design Schedule shall be adjusted to compensate Design Sub-Consultant for the effects, if any, of any changes in the Legal Requirements enacted after the date of the Agreement affecting the performance of the Services. Such effects may include, without limitation, revisions Design Sub-Consultant is required to make to the Construction Documents because of changes in Legal Requirements.

2.4 Design Sub-Consultant's Personnel

2.4.1 Design Sub-Consultant agrees that the primary personnel assigned to perform the Services shall be as listed in Exhibit _____. Design Sub-Consultant shall not change such personnel without Design Consultant's prior written approval.

2.4.2 Design Sub-Consultant's Representative shall be reasonably available to Design Consultant and Design-Builder and shall have the necessary expertise and experience required to supervise the Services. Design Sub-Consultant's Representative shall communicate regularly with Design Consultant and shall be vested with the authority to act on behalf of Design Sub-Consultant. Design Sub-Consultant shall replace its Representative upon the reasonable request of Design Consultant.

© 2022 Design-Build Institute of America

2.5 Government Approvals and Permits

2.5.1 Design Sub-Consultant shall obtain and pay for the permits, approvals and licenses, if any, set forth in Exhibit _____.

2.5.2 Design Sub-Consultant shall provide reasonable assistance to Design Consultant, Design-Builder and Owner in obtaining any permits, approvals and licenses which are not Design Sub-Consultant's obligation to obtain, but which are required for the construction of the Project.

2.5.3 Design Sub-Consultant shall make any revisions to the Construction Documents necessary to secure permits, approvals and licenses, including those which have been denied for failure of the Construction Documents to meet Legal Requirements. If such revisions are necessary for reasons beyond the control of Design Sub-Consultant or its Lower Tier Design Sub-Consultants, Design Sub-Consultant shall be compensated for such revisions as a change to this Agreement.

2.6 Design Development Services

2.6.1 In accordance with the times set forth in the Design Schedule, Design Sub-Consultant shall submit to Design Consultant all interim Design Submissions and revisions as required by the Contract Documents. Interim Design Submissions shall be consistent with Owner's Project Criteria and the Basis of Design Documents, as the Basis of Design Documents may have been modified in accordance with the Contract Documents. Such interim Design Submissions shall be in the form and quantity called for in the Contract Documents and may include design criteria, drawings, diagrams and specifications setting forth the Project requirements. Design Consultant and Design Sub-Consultant agree that prior to the scheduled date for submitting all interim Design Submissions to Design-Builder, Design Consultant and Design Sub-Consultant will hold meetings for the purpose of discussing and monitoring the design for consistency with the requirements of the Contract Documents.

2.6.2 In accordance with the Contract Documents and with the times set forth in the Design Schedule, Design Sub-Consultant shall submit to Design Consultant Construction Documents setting forth in detail drawings and specifications describing the requirements for construction of the Work. Design Sub-Consultant shall provide the Construction Documents in the form and quantity required by the Design Consultant. Design Sub-Consultant shall perform agreed upon revisions and submit revised Construction Documents to Design Consultant for approval by the Design Consultant, Design-Builder and Owner.

2.6.3 Design Sub-Consultant shall attend and participate in such meetings as are held between Design Consultant, Owner and Design-Builder to discuss interim Design Submissions and the Construction Documents as requested by Design Consultant. To the extent relevant to Design Sub-Consultant's Scope of Services, Design Sub-Consultant shall identify to Design Consultant during each such meeting, among other things, the evolution of the design and any changes or deviations from the Contract Documents, including the Basis of Design Documents, Owner's comments on the Design Submissions or, if applicable, previously submitted Design Submissions. If incorporation of the Owner's comments results in a design that is inconsistent with or otherwise gives rise to a change in Owner's Project Criteria, the Basis of Design Documents, the Contract Price established in the Design-Build Agreement and/or the Contract Time established in the Design-Build Agreement, Design Sub-Consultant shall provide written notice thereof to Design-Consultant in sufficient time for Design Consultant to provide timely notice to Design-Builder pursuant to the Design Consultant Agreement. To the extent that Design Sub-Consultant fails to identify such changes or fails to produce Construction Documents consistent with the Basis of Design Documents and identified and approved changes and Design Consultant incurs additional uncompensated costs as a result, Design Sub-Consultant shall be responsible for such costs. Minutes of these meetings, including a full listing of all changes, will be maintained by Design-

© 2022 Design-Build Institute of America

Builder and provided to all attendees for review. Design Sub-Consultant shall review such minutes and provide notice to Design Consultant and Design-Builder of any objections thereto. The Construction Documents shall be consistent with the latest set of interim Design Submissions, as such submissions may have been modified in a design review meeting and recorded in the meetings minutes.

2.6.4 In addition to the interim Design Submissions and Construction Documents, Design Sub-Consultant shall, if requested by Design Consultant, prepare (i) those design documents necessary for the establishment of a GMP Exhibit or GMP Proposal and (ii) interim Design Submissions and Construction Documents required to permit commencement of construction on a portion of the Project before the entire Construction Documents for the Project are completed.

2.6.5 Design Consultant's, Design-Builder's and Owner's review and/or approval of interim Design Submissions and the Construction Documents are for the purpose of mutually establishing a conformed set of Construction Documents compatible with the requirements of the Contract Documents. The review and/or approval by Design Consultant, Design-Builder or Owner of any interim Design Submission or the Construction Documents shall not be deemed to transfer any design liability from Design Sub-Consultant to Design Consultant, Design-Builder or Owner.

2.6.6 Design Sub-Consultant will, at its own cost, revise any interim Design Submission or the Construction Documents drafted by Design Sub-Consultant to correct any of its errors, mistakes or omissions. Such revisions shall be performed timely and so as not to jeopardize the Design Schedule and/or the Project Schedule.

2.6.7 Design Sub-Consultant shall be responsible for paying all royalties and licensing fees for patented or copyrighted materials, methods or systems specified by Design Sub-Consultant and incorporated into the Project.

2.7 Construction Phase Services

2.7.1 Design Sub-Consultant shall assist Design Consultant and Design-Builder in preparing bidding documents for specified portions of the Project's construction and clarifying and responding to questions involving the bidding documents.

2.7.2 Design Sub-Consultant shall timely provide requested clarifications and interpretations of the Construction Documents, which shall be consistent with the intent of, and reasonably inferable from, the Contract Documents. Design Sub-Consultant shall make all revisions to the Construction Documents necessary for the proper construction of the Project.

2.7.3 Design Sub-Consultant shall review and recommend approval or rejection of such submittals, including shop drawings, product data and samples, as they relate to Design Sub-Consultant's Scope of Services and as may be required by Design Consultant. Design Sub-Consultant shall expeditiously inform Design Consultant of any revisions that are necessary as a condition to Design Sub-Consultant's approval of submittals. The time within which Design Sub-Consultant shall review and respond to submittals will be as established at the meeting required by Section 2.1.5 hereof. Design Sub-Consultant's review and approval shall not relieve Design-Builder or Subcontractors of responsibility for construction means and methods or safety precautions.

2.7.4 If requested, Design Sub-Consultant shall review, and if acceptable approve, any substitutions for materials or equipment proposed by Design-Builder.

2.7.5 Design Sub-Consultant shall, if requested by Design Consultant, review any inspection reports or tests involving the construction of the Project and provide its comments to Design

© 2022 Design-Build Institute of America

Consultant and Design-Builder. Design Sub-Consultant is not responsible for the accuracy or completeness of the tests or inspections performed by others.

2.7.6 Unless otherwise provided, Design Sub-Consultant is not providing full-time resident services. Nevertheless, Design Sub-Consultant shall at appropriate intervals visit the Site to determine if the construction is proceeding in accordance with the Construction Documents. If Design Consultant and Design Sub-Consultant have agreed to a specific frequency of Design Sub-Consultant's Site visits, such frequency shall be set forth as an exhibit to this Agreement. Design Sub-Consultant shall promptly notify Design-Builder and Design Consultant of any defects, deficiencies, deviations, omissions or violations observed by Design Sub-Consultant in the construction of the Project and make recommendations to Design Consultant and Design-Builder on how to proceed.

2.7.7 At the request of Design Consultant or Design-Builder, Design Sub-Consultant shall attend meetings with Design Consultant, Design-Builder and/or Owner and/or Subcontractor(s) and Sub-Subcontractors to discuss design issues which may arise during construction.

2.7.8 Design Sub-Consultant shall, if requested by Design-Builder or Design Consultant, provide such certifications as may be necessary relative to Substantial Completion, and if required by the Design-Build Agreement, Final Completion, with the understanding that such certification shall be reasonably consistent with Design Consultant's scope of services.

2.7.9 Design Sub-Consultant's provision of the Construction Phase Services shall not be construed to make Design Sub-Consultant responsible for (i) the acts or omissions of Design Consultant, Design-Builder, any Sub-Consultants, Subcontractors or any Sub-Subcontractors; (ii) the means, methods, sequences and techniques of construction of the Project; or (iii) safety precautions and programs in connection with the construction of the Project. Nothing in this Agreement shall create any legal or contractual relationship between Design Sub-Consultant and any other Design Sub-Consultant, Subcontractor or Sub-Subcontractor.

2.8 Additional Services

2.8.1 Additional Services, if any, agreed upon by the parties shall be set forth in Exhibit _____ and may include by way of example only, site visits in excess of those agreed upon by the parties, evaluating changes, including the preparation or revision of the Construction Documents, providing record drawings and providing consultation concerning replacement of Work damaged by fire or other causes during construction.

Article 3
Design Consultant's Services and Responsibilities

3.1 Timely Reviews, Approvals and Submittals

3.1.1 Design Consultant shall provide timely reviews and approvals of all interim Design Submissions and Construction Documents consistent with the turnaround times set forth in the Design Schedule, or as agreed to by the parties at the meeting required under Section 2.1.5 hereof.

3.1.2 Design Consultant shall timely submit to Design Sub-Consultant all submittals, including shop drawings, product data and samples, for Design Sub-Consultant's review and approval consistent with the Project Schedule, or as agreed to by the parties at the meeting required under Section 2.1.5 hereof.

© 2022 Design-Build Institute of America

3.1.3 Design Consultant shall provide timely notice to Design Sub-Consultant of any delays to the Project caused by Design Sub-Consultant.

3.2 Design Consultant's Representative

3.2.1 Design Consultant's Representative shall be responsible for providing Design Consultant-supplied information and approvals in a timely manner to permit Design Sub-Consultant to fulfill its obligations under the Contract Documents.

3.3 Furnishing of Services and Information

3.3.1 Unless expressly stated to the contrary in the Contract Documents, and to the extent Design Consultant has received such items from Design-Builder, Design Consultant shall provide for Design Sub-Consultant's information the items listed below, to the extent that such items relate to Design Sub-Consultant's Scope of Services. Design Consultant does not warrant the accuracy or completeness of such items, provided, however, that Design Sub-Consultant is entitled to rely upon such items to the same extent Design Consultant is entitled to rely upon such items in the Design Consultant Agreement:

3.3.1.1 Surveys describing the property, boundaries, topography and reference points for use during construction, including existing service and utility lines;

3.3.1.2 Geotechnical studies describing subsurface conditions, and other surveys describing other latent or concealed physical conditions at the Site;

3.3.1.3 Temporary and permanent easements, zoning and other requirements and encumbrances affecting land use, or necessary to permit the proper design and construction of the Project and enable Design Sub-Consultant to perform the Services;

3.3.1.4 A legal description of the Site;

3.3.1.5 Record drawings of any existing structures at the Site;

3.3.1.6 Environmental studies, reports and impact statements describing the environmental conditions, including Hazardous Conditions, in existence at the Site;

3.3.1.7 Owner's Project Criteria;

3.3.1.8 All permits, approvals and licenses set forth in the Owner's Permit List attached as an exhibit to the Design-Build Agreement; and

3.3.1.9 Test and inspection reports.

3.3.2 Design Consultant shall provide Design Sub-Consultant with a copy of the Design-Build Agreement and the Design-Build Consultant Agreement, including all exhibits, attachments and other Contract Documents enumerated and incorporated therein.

3.3.3 Design Consultant shall provide to Design Sub-Consultant information regarding any cost estimating and scheduling services provided by Design-Builder and related to the construction of the Project; however, Design Consultant shall not be responsible for mistakes or miscalculations of market conditions that result in construction costs that are contrary to Design-Builder's or Design Consultant's budget and pricing assumptions. Nothing herein shall relieve Design Sub-Consultant from its obligation to prepare a design for the Project that is consistent with the Contract Documents.

© 2022 Design-Build Institute of America

3.3.4 Upon Design Sub-Consultant's reasonable request, Design Consultant shall provide Design Sub-Consultant with information it receives from Design-Builder regarding Owner's financial ability to pay for the Services set forth in this Agreement.

3.3.5 Design Consultant shall provide Design Sub-Consultant with the Project Schedule and appropriate updates thereto that it receives from Design-Builder.

3.3.6 Design Consultant shall use reasonable efforts to grant Design Sub-Consultant reasonable access to the Project and the Site, upon written request.

3.4 Notification of Errors

3.4.1 Design-Builder or Design Consultant shall notify Design Sub-Consultant of any errors, inconsistencies or omissions Design-Builder or Design Consultant discover in the Services, including any interim Design Submissions, Construction Documents or other Services. Notwithstanding anything to the contrary in this Agreement, nothing in this Agreement shall relieve Design Sub-Consultant of responsibility for errors, inconsistencies or omissions in the Services.

3.5 Attendance at Design Meetings

3.5.1 Design Consultant shall afford Design Sub-Consultant and its Lower Tier Design Sub-Consultants the opportunity to attend all necessary design meetings with Owner, Subcontractors and/or Sub-Subcontractors.

Article 4
Ownership of Work Product

4.1 Work Product

4.1.1 All drawings, specifications and other documents and electronic data furnished by Design Sub-Consultant to Design Consultant or Design-Builder under this Agreement ("Work Product") are deemed to be instruments of service and Design Sub-Consultant shall retain ownership and property interests therein provided, however, that Design Sub-Consultant hereby grants Design Consultant and Design-Builder (for the purpose of allowing Design-Builder to grant to Owner), upon Design Consultant's payment to Design Sub-Consultant of amounts properly due under this Agreement, a limited license to use the Work Product in connection with completing this Project. Notwithstanding the preceding sentence, if the Design-Build Agreement or the Design Consultant Agreement grants ownership and/or property rights to Owner and/or Design-Builder that conflict with the above, then Design Sub-Consultant hereby grants such rights to Design Consultant and Design-Builder (for the purpose of allowing Design-Builder to grant to Owner) under the same terms and conditions that Design Consultant and Design-Builder grant such rights to Owner.

4.2 Agreement to Grant Rights to Owner

4.2.1 Design Sub-Consultant has reviewed the Design Consultant and Design-Build Agreements and is fully aware of the ownership and property rights to use the Work Product which may be granted to Design-Builder and/or Owner therein. Design Sub-Consultant accepts and agrees to Design-Builder's and/or Owner's ownership and property rights with respect to the Work Product contained in the Design Consultant and Design-Build Agreements.

© 2022 Design-Build Institute of America

4.3 Indemnification for Use of Work Product

4.3.1 If either Design Consultant or Design Sub-Consultant uses the Work Product on any other project, such party agrees that it shall do so at its sole risk and without liability or legal exposure to the other party, Design-Builder, Owner or anyone working through them. Such party further agrees that it shall defend, indemnify and hold harmless the other party, Design-Builder and Owner from and against any and all claims, damages, liabilities, losses and expenses, including attorneys' fees, arising out of or resulting from such use of the Work Product on another project.

4.4 Use of Work Product on Termination or Default

4.4.1 If Design Consultant terminates this Agreement for its convenience as set forth in Section 7.1 hereof, or if Design Sub-Consultant elects to terminate this Agreement in accordance with Section 7.4 of this Agreement, Design Sub-Consultant, upon Design Consultant's payment in full of the amounts due Design Sub-Consultant under the Contract Documents, grants Design Consultant, Design-Builder and Owner the same rights as set forth in Section 4.1.1 above to use the Work Product to complete the Project and subsequently occupy the Project, conditioned on the following:

4.4.1.1 Use of the Work Product is at Design-Builder's and Design Consultant's sole risk and without liability or legal exposure to Design Sub-Consultant or anyone working by or through Design Sub-Consultant, and on the indemnity set forth in Section 4.3 herein, and

4.4.1.2 Design Consultant agrees to pay Design Sub-Consultant the additional sum of _____ dollars ($ _____) as compensation for the right to use the Work Product to complete the Project and subsequently use the Work Product in accordance with Section 4.1.1 if Design-Builder or Design Consultant resumes the Project through its employees, agents or third parties.

4.4.2 If this Agreement is terminated due to Design Sub-Consultant's default pursuant to Section 7.2 of this Agreement, then Design-Builder and Design Consultant shall have the same rights as set forth in Section 4.1.1 above to use the Work Product to complete the Project and subsequently occupy the Project, and Design Consultant, Design-Builder and Owner shall thereafter have the same rights and obligations as set forth in Section 4.1.1 above. Notwithstanding the preceding sentence, if it is ultimately determined that Design Sub-Consultant was not in default, Design Consultant shall be deemed to have terminated the Agreement for convenience, and Design Sub-Consultant shall be entitled to the rights and remedies set forth in Section 4.4.1 above.

Article 5
Time of Performance

5.1 Date of Commencement

5.1.1 The Services shall commence five (5) days after Design Sub-Consultant's receipt of Design Consultant's Notice to Proceed ("Date of Commencement") unless the parties mutually agree otherwise in writing.

© 2022 Design-Build Institute of America

5.2 Design Schedule

5.2.1 Unless a schedule for the execution of the Work has been attached to the Agreement as an exhibit at the time this Agreement is executed, Design Sub-Consultant shall coordinate with Design Consultant to prepare a schedule for the Design Phase Services. If requested by Design Consultant, Design Sub-Consultant shall prepare a schedule for Design Sub-Consultant's Scope of Services that meet Design-Builder's requirements and the requirements in the Design Consultant Agreement. Design Consultant will review Design Sub-Consultant's schedule to determine whether it permits Design Consultant to satisfy its obligations under the Project Schedule and the Design Consultant Agreement. The accepted schedule (the "Design Schedule") shall be revised as required by conditions and progress of the Project, but such revisions shall not relieve Design Sub-Consultant of its obligations to perform the Services in accordance with the Contract Documents, subject to its rights under this Agreement.

5.3 Status Reports

5.3.1 Design Sub-Consultant shall provide Design Consultant on a regular basis a status report detailing the progress of Design Sub-Consultant's Scope of Services, including whether (i) the Services are proceeding according to the Design Schedule, and (ii) items exist which require resolution so as not to jeopardize Design Sub-Consultant's ability to meet the dates set forth in the Design Schedule and Design-Builder's and Design Consultant's ability to meet the Project Schedule. The frequency of the status reports shall be established at the meeting required by Section 2.1.5 hereof.

5.4 Delays

5.4.1 If Design Sub-Consultant's performance of the Services are delayed for any reason so as to impact the Design Schedule or the Project Schedule, Design Sub-Consultant shall promptly notify Design Consultant in writing of the cause(s) of such delay within sufficient time to permit Design Consultant to provide timely notice to Design-Builder in accordance with the Design Consultant Agreement. If the delay is due to any act, neglect or omission on the part of Design Sub-Consultant, its Lower Tier Design Sub-Consultants or anyone for whom they are responsible, Design Sub-Consultant shall, subject to any limitations contained herein, compensate and indemnify Design Consultant and Design-Builder for all costs, damages and expenses arising from such delay. If the delay is caused by Design Consultant, Design Sub-Consultant's Fee and the Design Schedule shall be adjusted to compensate Design Sub-Consultant for the effects, if any, of the delay, subject to any limitations contained herein.

5.4.2 Notwithstanding any other provision to the contrary, any delays and resulting damages that arise out of, or relate to, problems caused by Design-Builder or Owner or for which Design-Builder or Owner is responsible shall be resolved pursuant to Section 11.3 hereof.

Article 6
Design Sub-Consultant's Compensation

6.1 Design Sub-Consultant's Fee

6.1.1 Design Sub-Consultant's Fee shall be the compensation due Design Sub-Consultant for the performance of the Scope of Services, including all Design Phase Services, Construction Phase Services and Additional Services, and for Reimbursable Costs, all as set forth in this Agreement.

© 2022 Design-Build Institute of America

Unless otherwise provided in the Contract Documents, the Design Sub-Consultant's Fee is deemed to include all sales, use, consumer and other taxes mandated by applicable Legal Requirements.

6.1.2 Design Sub-Consultant will be compensated for the Design Phase Services, Construction Phase Services, Additional Services, if any, and Reimbursable Costs as set forth in Exhibit _____. *(Provide for a fixed lump sum amount, hourly rates, percentage fees or some other basis of compensation for the Services.)*

6.2 Applications for Payment

6.2.1 Beginning with the first month after the Date of Commencement, Design Sub-Consultant shall submit on the _____ (_____) day of each month for Design Consultant's review and approval, Design Sub-Consultant's certified Application for Payment requesting payment for all Services performed as of the date of the Application for Payment. The Application for Payment shall be accompanied by all supporting documentation required by the Contract Documents and/or established at the meeting required by Section 2.1.5 hereof. Once approved, Design Consultant will submit Design Sub-Consultant's Application for Payment to Design-Builder with Design Consultant's application.

6.2.2 The Application for Payment shall constitute Design Sub-Consultant's representation that (i) the Services have been performed consistent with the Contract Documents; (ii) the Services have progressed to the point indicated in the Application for Payment; (iii) Lower Tier Design Sub-Consultants have been paid all amounts previously received by Design Sub-Consultant on account of their services; and (iv) there are no claims, obligations or liens outstanding or unsatisfied for labor, services, taxes or other items performed, furnished or incurred for or in connection with the Scope of Services.

6.2.3 Design Consultant shall make payment on Design Sub-Consultant's properly submitted and accurate Application for Payment within three (3) days after Design Consultant's receipt of payment from Design-Builder on account of Design Sub-Consultant's monthly Application for Payment, but in each case less the total of payments previously made, and less amounts properly withheld hereunder.

6.3 Retainage on Applications for Payment

6.3.1 Design Consultant will not retain any funds from Design Sub-Consultant's Applications for Payment unless Design-Builder is retaining funds from Design Consultant's progress payments for the Services, and then only in the same amount or percentage retained from Design Consultant's progress payments as set forth in the Design Consultant Agreement. Unless mutually agreed otherwise between the parties, retainage (if applicable) will be released to Design Sub-Consultant within three (3) days after Design Consultant's receipt of such retained amounts from Design-Builder.

6.4 Withholding of Payment

6.4.1 If Design Consultant determines that Design Sub-Consultant is not entitled to all or part of an Application for Payment, it will notify Design Sub-Consultant in writing at least five (5) days prior to the date payment is due. The notice shall indicate the specific amounts Design Consultant intends to withhold, the reasons and contractual basis for the withholding and the specific measures Design Sub-Consultant must take to rectify Design Consultant's concerns. Design Consultant and Design Sub-Consultant will attempt to resolve Design Consultant's concerns prior to the date payment is due. If the parties cannot resolve such concerns, Design Consultant shall pay Design Sub-Consultant the uncontested amount of the Application for Payment, and Design Sub-Consultant may pursue its rights under this Agreement, including those under Article 11 hereof.

© 2022 Design-Build Institute of America

6.5 Final Payment

6.5.1 At the time Design Sub-Consultant submits its final Application for Payment to Design Consultant, Design Sub-Consultant shall provide (i) all deliverables required by the Contract Documents; (ii) an affidavit that there are no claims, obligations or liens outstanding or unsatisfied for or in connection with the Services which will in any way affect Design Consultant's, Design-Builder's or Owner's interests; (iii) a general release executed by Design Sub-Consultant waiving, upon receipt of final payment by Design Sub-Consultant, all claims, except those claims previously made in writing to Design Consultant and remaining unsettled at the time of final payment; and (iv) certificates of insurance confirming that required coverages will remain in effect consistent with the requirements of the Contract Documents. Design Consultant shall make payment on Design Sub-Consultant's properly submitted and accurate final Application for Payment within ten (10) days after Design Consultant's receipt of final payment from Design-Builder on account of Design Sub-Consultant's final Application for Payment, provided also that Design Sub-Consultant has satisfied the requirements for final payment set forth herein.

6.6 Pay When Paid

6.6.1 Design Sub-Consultant agrees that all payments to Design Sub-Consultant hereunder, whether progress or final payment, or for changes or delays to the Services, shall not be due until after Design Consultant actually receives payment on account of same from Design-Builder. Notwithstanding the preceding sentence, Design Consultant shall pay Design Sub-Consultant within a reasonable time if it has not been paid by the Design-Builder unless the Design-Builder's failure to pay the Design Consultant is caused by the Design Sub-Consultant's failure to perform in accordance with this Agreement.

6.7 Interest

6.7.1 Payments due and unpaid under this Agreement shall bear interest commencing five (5) days after payment is due at the rate of _____ percent (_____%) per annum.

6.8 Design Sub-Consultant's Payment Obligations

6.8.1 Design Sub-Consultant will pay Lower Tier Design Sub-Consultants, in accordance with its contractual obligations to such parties, all the amounts Design Sub-Consultant has received from Design Consultant on account of their services. Design Sub-Consultant will impose similar requirements on Lower Tier Design Sub-Consultants to pay those parties with whom they have contracted. Design Sub-Consultant will indemnify and defend Design Consultant, Owner and Design-Builder against any claims for payment and mechanic's liens, provided Design Consultant is not in breach of its contractual obligations to make payments to Design Sub-Consultant for its Services.

6.9 Record Keeping and Finance Controls

6.9.1 Design Sub-Consultant shall keep full and detailed accounts and exercise such controls as may be necessary for proper financial management, using accounting and control systems in accordance with generally accepted accounting principles and as may be provided in the Contract Documents. During the performance of the Services and for a period of three (3) years after final payment of the Services or such longer period as set forth in the Design Consultant Agreement for the review of Design Consultant's records, Design-Builder, Design Consultant and their accountants shall be afforded access to and the right to audit from time to time, upon reasonable notice, Design Sub-Consultant's records, books, correspondence, receipts, subcontracts, purchase orders, vouchers, memoranda and other data relating to the cost of performing the Services,

© 2022 Design-Build Institute of America

including changes in the Services, and reimbursable expenses all of which Design Sub-Consultant shall preserve for a period of three (3) years after final payment. Such inspection shall take place at Design Sub-Consultant's offices during normal business hours unless another location and time is agreed by the parties. Any fee (that is either a lump sum or percentage of construction cost), multipliers or markups agreed to by the Design Consultant and Design Sub-Consultant as part of this Agreement are only subject to audit to confirm that such fee, multiplier or markup has been charged in accordance with this Agreement, with the composition of such fee, multiplier or markup not being subject to audit, unless the Design-Build Agreement grants Owner greater audit rights, in which case Owner's audit rights shall govern.

Article 7
Termination and Design Sub-Consultant's Right to Stop Services

7.1 Design Consultant's Right to Terminate for Convenience

7.1.1 If Design-Builder terminates Design Consultant for any reason, then Design Consultant may terminate this Agreement. In such event, Design Consultant shall pay Design Sub-Consultant only those amounts Design Consultant actually receives from Design-Builder on behalf of Design Sub-Consultant. Notwithstanding the preceding sentence, in the event Design Consultant does not receive any compensation from Design-Builder because Design Consultant was terminated for default, Design Consultant is obligated to pay Design Sub-Consultant for all services properly performed by Design Sub-Consultant prior to receiving notice of the termination, to the extent that Design Consultant's default was not caused by Design Sub-Consultant's failure to perform in accordance with its obligations.

7.2 Design Consultant's Right to Terminate for Cause

7.2.1 If Design Sub-Consultant persistently fails to (i) comply with applicable Legal Requirements, (ii) timely pay, without cause, its Lower Tier Design Sub-Consultants, (iii) prosecute the Services with promptness and diligence so that the Scope of Services is completed by the times set forth in the Design Schedule or the Project Schedule, (iv) provide qualified, licensed design professionals, or (v) perform material obligations under the Contract Documents, then Design Consultant shall have the rights, in addition to any other rights and remedies provided in the Contract Documents or by law, set forth in Sections 7.2.2 and 7.2.3 below.

7.2.2 Upon the occurrence of an event set forth in Section 7.2.1 above, Design Consultant may provide written notice to Design Sub-Consultant that it intends to terminate the Agreement unless the problem cited is cured, or commenced to be cured, within seven (7) days of Design Sub-Consultant's receipt of such notice. If Design Sub-Consultant fails to cure, or reasonably commence to cure, such problem, then Design Consultant may give a second written notice to Design Sub-Consultant of its intent to terminate within an additional seven (7) day period. If Design Sub-Consultant, within such second seven (7) day period, fails to cure, or reasonably commence to cure, such problem, then Design Consultant may declare the Agreement terminated for default by providing written notice to Design Sub-Consultant of such declaration.

7.2.3 Upon declaring the Agreement terminated pursuant to Section 7.2.2 above, Design Consultant may complete the Services in whatever fashion it deems most efficient, and shall have the right to use the existing Work Product for purposes of completing the Project, subject to Section 4.4 above. To the extent Design Consultant has been adversely impacted by Design Sub-Consultant's default and termination, Design Consultant shall be entitled to recover against Design Sub-Consultant all of Design Consultant's costs. Such costs and expense shall include not only the

© 2022 Design-Build Institute of America

cost of completing the Services, but also losses, damages, costs and expense, including attorneys' fees and expenses, incurred by Design Consultant in connection with the reprocurement and defense of claims arising from Design Sub-Consultant's default, subject to the waiver of consequential damages set forth in Section 11.7 hereof.

7.3 Design Sub-Consultant's Right to Stop Services

7.3.1 If (i) Design-Builder fails to pay undisputed amounts due Design Consultant under the Design Consultant Agreement for Services performed by Design Sub-Consultant, and such failure is not due to the fault of Design Sub-Consultant, and Design Sub-Consultant has not been paid such amounts due, or (ii) Design Consultant fails to pay any undisputed amounts due Design Sub-Consultant under this Agreement, Design Sub-Consultant may, in addition to any other rights afforded under the Contract Documents or at law, stop work in accordance with Section 7.3.2 below.

7.3.2 Should either of the events set forth in Section 7.3.1 above occur, Design Sub-Consultant has the right to provide Design Consultant with written notice that Design Sub-Consultant will stop work unless said failure to pay is cured within seven (7) days from Design Consultant's receipt of Design Sub-Consultant's notice. Design Sub-Consultant shall not stop work unless it provides such written notice and the Design Consultant has failed to cure the reason for default within the seven (7) day cure period. If Design Consultant does not cure the problem within such seven (7) day period, Design Sub-Consultant may stop work. In such case, Design Sub-Consultant shall be entitled to make a claim for adjustment to Design Sub-Consultant's Fee and the Design Schedule to the extent it has been adversely impacted by such stoppage. To the extent Design Consultant's failure to pay is related to a dispute between the parties, the dispute will be resolved in accordance with Article 11, and the parties will continue performance in accordance with Section 11.6.

7.4 Design Sub-Consultant's Right to Terminate for Cause

7.4.1 Design Sub-Consultant, in addition to any other rights and remedies afforded under the Contract Documents or at law, may terminate the Agreement for cause in accordance with Section 7.4.2 if Design Consultant has failed to cure the problems set forth in Section 7.3.2 within thirty (30) days after Design Sub-Consultant has stopped work.

7.4.2 Upon the occurrence of the event set forth in Section 7.4.1 above, Design Sub-Consultant may provide written notice to Design Consultant that it intends to terminate the Agreement unless the problem cited is cured, or commenced to be cured, within seven (7) days of Design Consultant's receipt of such notice. If Design Consultant fails to cure, or reasonably commence to cure, such problem, then Design Sub-Consultant may give a second written notice to Design Consultant of its intent to terminate within an additional seven (7) day period. If Design Consultant, within such second seven (7) day period, fails to cure, or reasonably commence to cure, such problem, then Design Sub-Consultant may declare the Agreement terminated for default by providing written notice to Design Consultant of such declaration.

7.5 Bankruptcy of Design Consultant or Design Sub-Consultant

7.5.1 If either Design Consultant or Design Sub-Consultant institutes or has instituted against it a case under the United States Bankruptcy Code (such party being referred to as the "Bankrupt Party"), such event may impair or frustrate the Bankrupt Party's ability to perform its obligations under the Contract Documents. Accordingly, should such event occur:

7.5.1.1 The Bankrupt Party, its trustee or other successor, shall furnish, upon request of the non-Bankrupt Party, adequate assurance of the ability of the Bankrupt Party to perform

© 2022 Design-Build Institute of America

all future material obligations under the Contract Documents, which assurances shall be provided within ten (10) days after receiving notice of the request; and

7.5.1.2 The Bankrupt Party shall file an appropriate action within the bankruptcy court to seek assumption or rejection of the Agreement within sixty (60) days of the institution of the bankruptcy filing and shall diligently prosecute such action.

If the Bankrupt Party fails to comply with its foregoing obligations, the non-Bankrupt Party shall be entitled to request the bankruptcy court to reject the Agreement, declare the Agreement terminated and pursue any other recourse available to the non-Bankrupt Party under this Article 7.

7.5.2 The rights and remedies under Section 7.5.1 above shall not be deemed to limit the ability of the non-Bankrupt Party to seek any other rights and remedies provided by the Contract Documents or by law, including its ability to seek relief from any automatic stays under the United States Bankruptcy Code.

Article 8
Representatives of the Parties

8.1 Design Consultant's Representatives.

8.1.1 Design Consultant designates the individual listed below as its Senior Representative ("Design-Consultant's Senior Representative"), which individual has the authority and responsibility for avoiding and resolving disputes under Section 11.4 hereof: *(Identify individual's name, title, address and telephone numbers.)*

8.1.2 Design Consultant designates the individual listed below as its Design Consultant's Representative, which individual has the authority and responsibility set forth in Section 3.2 hereof: *(Identify individual's name, title, address and telephone numbers.)*

8.2 Design Sub-Consultant's Representatives.

8.2.1 Design Sub-Consultant designates the individual listed below as its Senior Representative ("Design Sub-Consultant's Senior Representative"), which individual has the authority and responsibility for avoiding and resolving disputes under Section 11.4 hereof: *(Identify individual's name, title, address and telephone numbers.)*

© 2022 Design-Build Institute of America

8.2.2 Design Sub-Consultant designates the individual listed below as its Design Sub-Consultant's Representative, which individual has the authority and responsibility set forth in Section 2.4.2 hereof: *(Identify individual's name, title, address and telephone numbers.)*

Article 9
Insurance

9.1 Design Sub-Consultant's Insurance Requirements

9.1.1 Design Sub-Consultant is responsible for procuring and maintaining, from insurance companies authorized to do business in the state in which the Project is located, the insurance coverages set forth in the Insurance Exhibit, with the minimum ratings set forth in said exhibit, for certain claims which may arise from or out of the performance of this Agreement and the obligations under the Contract Documents.

9.1.2 Design Sub-Consultant shall require its Lower Tier Design Sub-Consultants to procure and maintain, from insurance companies authorized to do business in the state in which the Project is located, the insurance coverages set forth in the Insurance Exhibit.

9.1.3 Design Sub-Consultant's and its Lower Tier Design Sub-Consultants' insurance coverage set forth in the Insurance Exhibit shall specifically delete any design-build or similar exclusions that could compromise coverages because of the design-build delivery of the Project.

9.1.4 To the extent Design Consultant requires Design Sub-Consultant to provide professional liability insurance for claims arising from the negligent performance of design services by Design Sub-Consultant or Lower Tier Design Sub-Consultants, the coverage limits, duration and other specifics of such insurance shall be set forth in the Insurance Exhibit. Such policies shall be provided prior to the commencement of any design services hereunder.

9.1.5 Prior to commencing any services hereunder, Design Sub-Consultant shall provide Design Consultant with certificates evidencing that (i) all insurance obligations required by the Contract Documents are in full force and in effect and will remain in effect for the duration required by the Contract Documents and (ii) no insurance coverage will be canceled, renewal refused or materially changed unless at least thirty (30) days' prior written notice is given to Design Consultant.

9.1.6 Except as otherwise stated in the Insurance Exhibit, the insurance policies required herein shall list Design-Builder, Design Consultant and all other entities required by the Contract Documents, if any, as an additional insured.

9.1.7 If any of the foregoing insurance coverages are required to remain in force after final payment, an additional certificate evidencing continuation of such coverage shall be submitted with the final Application for Payment.

9.2 Waiver of Subrogation

9.2.1 Design Consultant and Design Sub-Consultant waive against each other and Owner, Owner's separate contractors, Subcontractors, Sub-Subcontractors, Design-Builder and Design Consultant's separate Sub-Consultants, agents and employees of each and all of them, all damages covered by property insurance provided in the Contract Documents, except such rights as they may have to the proceeds of such insurance. Design Consultant and Design Sub-

© 2022 Design-Build Institute of America

Consultant shall, where appropriate, require similar waivers of subrogation from Lower Tier Design Sub-Consultants and Subcontractors and shall require each of them to include similar waivers in their contracts. These waivers of subrogation shall not contain any restriction or limitation that will impair the full and complete extent of its applicability to any person or entity unless agreed to in writing prior to the execution of this Agreement.

Article 10
Indemnification

10.1 Patent and Copyright Infringement

10.1.1 Design Sub-Consultant shall defend any action or proceeding brought against Design Consultant, Owner or Design-Builder based on any claim that the portion of the Project included in Design Sub-Consultant's Scope of Services, or any part thereof, or the operation or use of that portion of the Project or any part thereof, constitutes infringement of any United States patent or copyright, now or hereafter issued. Design Consultant shall give prompt written notice to Design Sub-Consultant of any such action or proceeding and will reasonably provide authority, information and assistance in the defense of same. Design Sub-Consultant shall indemnify and hold harmless Design Consultant, Owner and Design-Builder from and against all damages and costs, including but not limited to attorneys' fees and expenses awarded against Design Consultant, Owner or Design-Builder in any such action or proceeding. Design Sub-Consultant agrees to keep Design-Builder and Design Consultant informed of all developments in the defense of such actions.

10.1.2 If Owner is enjoined from the operation or use of the Project, or any part thereof, as the result of any patent or copyright suit, claim or proceeding that arises from Design Sub-Consultant's Scope of Services, Design Sub-Consultant shall at its sole expense take reasonable steps to procure the right to operate or use the Project, or applicable part thereof. If Design Sub-Consultant cannot so procure such right within a reasonable time, Design Sub-Consultant shall promptly, at Design Sub-Consultant's option and at Design Sub-Consultant's expense, (i) modify the Project, or applicable part thereof, so as to avoid infringement of any patents or copyrights, or (ii) replace said work with work that does not infringe or violate any such patent or copyright, and is consistent with the Contract Documents.

10.1.3 Sections 10.1.1 and 10.1.2 above shall not be applicable to any suit, claim or proceeding based on infringement or violation of a patent or copyright (i) relating solely to a particular process or product of a particular manufacturer specified by Design Consultant, Owner or Design-Builder and not offered or recommended by Design Sub-Consultant to Design Consultant, Owner or Design-Builder; or (ii) arising from modifications to the Project by Design Consultant, Owner or Design-Builder after acceptance of the Project.

10.1.4 The obligations set forth in this Section 10.1 shall constitute the sole agreement between the parties relating to liability for infringement or violation of any patent or copyright.

10.2 Design Sub-Consultant's General Indemnification

10.2.1 Design Sub-Consultant, to the fullest extent permitted by law, shall indemnify and hold harmless Design Consultant, Owner, Design-Builder and their officers, directors, employees and agents from and against claims, losses and damages, including attorneys' fees and expenses, for non-party bodily injury, sickness or death, and non-party property damage or destruction (other than to the Work itself) but only to the extent resulting from the negligent acts or omissions of

© 2022 Design-Build Institute of America

Design Sub-Consultant, any Lower Tier Design Sub-Consultants and anyone employed directly or indirectly by any of them or anyone for whose acts any of them may be liable.

10.2.2 If an employee of Design Sub-Consultant, anyone employed directly or indirectly by Design Sub-Consultant or anyone for whose acts any of them may be liable has a claim against any party indemnified pursuant to Section 10.2.1 above, Design Sub-Consultant's indemnity obligation set forth in Section 10.2.1 above shall not be limited by any limitation on the amount of damages, compensation or benefits payable by or for Design Sub-Consultant, or other entity under any employee benefit acts, including workers' compensation or disability acts.

10.3 Design Consultant's General Indemnification

10.3.1 Design Consultant, to the fullest extent permitted by law, shall indemnify and hold harmless Design Sub-Consultant and its officers, directors, employees and agents from and against losses and damages, including attorneys' fees and expenses, for bodily injury, sickness or death, and property damage or destruction (other than to the Work itself) to the extent resulting from the negligent acts or omissions of Design Consultant, anyone employed directly or indirectly by Design Consultant or anyone for whose acts Design Consultant may be liable.

10.3.2 If an employee of Design Consultant, anyone employed directly or indirectly by Design Consultant or anyone for whose acts Design Consultant may be liable has a claim against any party indemnified pursuant to Section 10.3.1 above, Design Consultant's indemnity obligation set forth in Section 10.3.1 above shall not be limited by any limitation on the amount of damages, compensation or benefits payable by or for Design Consultant or other entity under any employee benefit acts, including workers' compensation or disability acts.

10.4 Limited Recourse

10.4.1 None of the obligations set forth in this Agreement (on behalf of any Party) constitute personal obligations of any natural persons who are the officers, shareholders, members, partners, employees or agents of any Party unless the natural person is expressly identified as a contracting party. All Parties to this Agreement shall not seek recourse against any natural person described herein. This provision, however, shall not protect such natural persons from liability for willful misconduct, illegal acts or intentional violation of any duty of corporate loyalty.

Article 11
Contract Adjustments and Disputes

11.1 Requests for Contract Adjustments and Relief

11.1.1 If either Design Sub-Consultant or Design Consultant believes that it is entitled to relief against the other for any event arising out of or related to the Services or the Project, such party shall provide written notice to the other party of the basis for its claim for relief. Such notice shall be in accordance with specific notice requirements contained in applicable sections of the Contract Documents and, if possible, be made prior to incurring any cost or expense. Design Sub-Consultant shall provide Design Consultant written notice of claims for which Owner or Design-Builder may be responsible, including but not limited to changes in the Basis of Design Documents, in sufficient time for Design Consultant to meet its notice requirements to Design-Builder set forth in the Contract Documents. In the absence of any specific notice requirement, written notice shall be given within a reasonable time, not to exceed ten (10) days, after the occurrence giving rise to the claim for relief or after the claiming party reasonably should have recognized the event or condition

© 2022 Design-Build Institute of America

giving rise to the request, whichever is later. The claimant shall provide more complete information with respect to the claim within ten (10) days of the initial notice. The more complete information shall be in accordance with the Contract Documents and shall include sufficient information to advise the other party of the circumstances giving rise to the claim for relief, the specific contractual adjustment or relief requested and the basis of such request. Design Sub-Consultant shall comply with all documentation requirements set forth in the Design Consultant Agreement when submitting its claim to Design Consultant.

11.2 Dispute Avoidance and Resolution

11.2.1 The parties are fully committed to working with each other throughout the Project and agree to communicate regularly with each other at all times so as to avoid or minimize disputes or disagreements. If disputes or disagreements do arise, Design Sub-Consultant and Design Consultant each commit to resolving such disputes or disagreements in an amicable, professional and expeditious manner so as to avoid unnecessary losses, delays and disruptions to the Services.

11.3 Disputes Involving Owner or Design-Builder

11.3.1 To the extent a claim, dispute or controversy arises out of, or relates to, problems caused by Owner or for which Owner is responsible ("Owner Disputes") or by Design-Builder or for which Design-Builder is responsible ("Design-Builder Disputes"), such Owner and/or Design-Builder Disputes shall be resolved pursuant to the dispute resolution clause set forth in the Design-Build Agreement with respect to Owner Disputes and the Design Consultant Agreement with respect to Design-Builder Disputes. Both Design Consultant and Design Sub-Consultant agree to cooperate in the presentation and prosecution or defense of Owner or Design-Builder Disputes. If, after a request for an extension of time or additional compensation from Design Sub-Consultant, Design Consultant believes that the event causing the delay or additional compensation is the responsibility of Design-Builder or Owner, then Design Consultant will cooperate with and assist Design Sub-Consultant in presenting a request for an extension of time or additional compensation to Owner. Notwithstanding the above, Design Consultant reserves the right not to submit a claim to Owner or Design-Builder. In such cases, the claim shall be resolved pursuant to Section 11.4.

11.3.2 Notwithstanding any other provisions herein to the contrary, Design Consultant and Design Sub-Consultant each agree to accept the relief as to a time extension or additional compensation obtained from Design-Builder and/or Owner, if any, as well as all other aspects of the final decision following appeal or the expiration of the time for appeal, as full and final resolution of any Design-Builder and/or Owner Dispute.

11.3.3 If Design Consultant asserts a claim against Design-Builder or Owner involving Design Sub-Consultant, each party shall bear its own costs for outside counsel and third-party consultants retained to prosecute claims against Design-Builder and/or Owner and for any other litigation costs. Each party shall present its portion of the claim to Design-Builder and/or Owner.

11.3.4 If Owner or Design-Builder contends that the Contract Documents have been breached, or otherwise asserts a claim or set-off against Design Consultant, the party determined to be responsible for the breach either by settlement or by the trier of fact shall be responsible for all costs occasioned by the breach, including counsel and litigation costs. If the trier of fact fails to determine the relative degrees of fault of Design Consultant and Design Sub-Consultant in connection with any claim by Design-Builder or Owner, then Design Consultant and Design Sub-Consultant agree that the allocation of fault shall be determined pursuant to Section 11.4.

11.4 Disputes Not Involving Owner or Design-Builder

© 2022 Design-Build Institute of America

11.4.1 For any claim, dispute or controversy not arising out of, or relating to, problems (i) caused by Owner or Design-Builder, or (ii) for which Owner or Design-Builder is responsible, Design Consultant and Design Sub-Consultant will first attempt to resolve such claim, dispute or controversy at the field level through discussions between Design Consultant's Representative and Design Sub-Consultant's Representative.

11.4.2 If a claim, dispute or controversy cannot be resolved through Section 11.4.1, Design Consultant's Senior Representative and Design Sub-Consultant's Senior Representative, upon the request of either party, shall meet as soon as conveniently possible, but in no case later than thirty (30) days after such a request is made, to attempt to resolve such claim, dispute or controversy. Five (5) days prior to any meetings between the Senior Representatives, the parties will exchange relevant information that will assist the parties in resolving the claim, dispute or controversy.

11.4.3 If after meeting, the Senior Representatives determine that the claim, dispute or controversy cannot be resolved on terms satisfactory to both parties, the parties shall submit within thirty (30) days of the conclusion of the meeting by Senior Representatives the claim, dispute or controversy to non-binding mediation. The mediation shall be conducted by a mutually agreeable impartial mediator, or if the parties cannot so agree, a mediator designated by the American Arbitration Association ("AAA") pursuant to its Construction Industry Mediation Rules. The mediation will be governed by and conducted pursuant to a mediation agreement negotiated by the parties or, if the parties cannot so agree, by procedures established by the mediator. Unless otherwise mutually agreed by Design Consultant and Design Sub-Consultant and consistent with the mediator's schedule, the mediation shall commence within ninety (90) days of the submission of the dispute for mediation. Representatives of the parties with authority to resolve the dispute shall be present at the mediation.

11.5 Arbitration

11.5.1 Any claims, disputes or controversies between the parties arising out of or relating to the Agreement, or the breach thereof, which have not been resolved in accordance with the procedures set forth in Section 11.4 above, shall be decided by arbitration in accordance with the Construction Industry Arbitration Rules of the AAA then in effect, unless the parties mutually agree otherwise.

11.5.2 The award of the arbitrator(s) shall be final and binding upon the parties without the right of appeal to the courts. Judgment may be entered upon it in accordance with applicable law by any court having jurisdiction thereof.

11.5.3 Design Sub-Consultant and Design Consultant expressly agree that any arbitration pursuant to this Section 11.5 may be joined or consolidated with any arbitration involving any other person or entity (i) necessary to resolve the claim, dispute or controversy, or (ii) substantially involved in or affected by such claim, dispute or controversy. Both Design Consultant and Design Sub-Consultant will include appropriate provisions in all contracts they execute with other parties in connection with the Project to require such joinder or consolidation.

11.5.4 The prevailing party in any arbitration, or any other final, binding dispute proceeding upon which the parties may agree, shall be entitled to recover from the other party reasonable attorneys' fees and expenses incurred by the prevailing party. The prevailing party, if any, shall be determined by the applicable binding dispute tribunal.

11.6 Duty to Continue Performance

11.6.1 Unless provided to the contrary in the Contract Documents, Design Sub-Consultant shall continue to perform the Services and Design Consultant shall continue to satisfy its payment

© 2022 Design-Build Institute of America

obligations for undisputed amounts to Design Sub-Consultant, pending the final resolution of any dispute or disagreement between Design Consultant and Design Sub-Consultant.

11.7 CONSEQUENTIAL DAMAGES

11.7.1 NOTWITHSTANDING ANYTHING HEREIN TO THE CONTRARY (EXCEPT AS SET FORTH IN SECTION 11.7.2 BELOW) AND TO THE EXTENT THAT SUCH DAMAGES ARE WAIVED IN THE DESIGN CONSULTANT AGREEMENT, NEITHER DESIGN CONSULTANT NOR DESIGN SUB-CONSULTANT SHALL BE LIABLE TO THE OTHER FOR ANY CONSEQUENTIAL LOSSES OR DAMAGES, WHETHER ARISING IN CONTRACT, WARRANTY, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY OR OTHERWISE, INCLUDING BUT NOT LIMITED TO LOSSES OF USE, PROFITS, BUSINESS, REPUTATION OR FINANCING.

11.7.2 Notwithstanding Section 11.7.1 above, Design Consultant shall be entitled to recover against Design Sub-Consultant (i) any liquidated damages that Design-Builder may assess against Design Consultant to the extent they are attributable to Design Sub-Consultant, even though both parties recognize that such liquidated damages may include some damages that might otherwise be deemed to be consequential, and (ii) consequential damages that may be imposed upon Design Consultant by the Design Consultant Agreement to the extent they are attributable to Design Sub-Consultant.

Article 12
Miscellaneous

12.1 Assignment

12.1.1 Neither Design Sub-Consultant nor Design Consultant shall, without the written consent of the other, assign, transfer or sublet any portion or part of the Services or the obligations required by the Contract Documents.

12.2 Successorship

12.2.1 Design Consultant and Design Sub-Consultant intend that the provisions of the Contract Documents are binding upon the parties, their employees, agents, heirs, successors and assigns.

12.3 Governing Law

12.3.1 The Agreement and all Contract Documents shall be governed by the laws that govern the Design Consultant Agreement, without giving effect to its conflict of law principles.

12.4 Severability

12.4.1 If any provision or any part of a provision of the Contract Documents shall be finally determined to be superseded, invalid, illegal or otherwise unenforceable pursuant to any applicable Legal Requirements or court order, such determination shall not impair or otherwise affect the validity, legality or enforceability of the remaining provision or parts of the provision of the Contract Documents, which shall remain in full force and effect as if the unenforceable provision or part were deleted.

© 2022 Design-Build Institute of America

12.5 No Waiver

12.5.1 The failure of either Design Consultant or Design Sub-Consultant to insist, in any one or more instances, on the performance of any of the obligations required by the other under the Contract Documents shall not be construed as a waiver or relinquishment of such obligation or right with respect to future performance.

12.6 Headings

12.6.1 The headings used in this Agreement, or any other Contract Document, are for ease of reference only and shall not in any way be construed to limit or alter the meaning of any provision.

12.7 Notice

12.7.1 Whenever the Contract Documents require that notice be provided to the other party, notice will be deemed to have been validly given (i) if delivered in person to the individual intended to receive such notice, (ii) four (4) days after being sent by registered or certified mail, postage prepaid to the address indicated in the Agreement, (iii) if transmitted by facsimile or electronic mail, by the time stated in a machine generated confirmation that notice was received at the number of the intended recipient, or (iv) by electronic mail, by the time frame stated in the email generated confirmation that notice was received by the email of the intended recipient.

12.8 Amendments

12.8.1 The Contract Documents may not be changed, altered or amended in any way except in writing signed by a duly authorized representative of each party.

12.9 Survival

12.9.1 Design Sub-Consultant's obligations under this Agreement shall not be released, and shall specifically survive, the completion of all Services hereunder, final payment to Design Sub-Consultant, and the termination of this Agreement for any reason.

Article 13
Electronic Data

13.1 Electronic Data

13.1.1 The parties recognize that Contract Documents, including drawings, specifications and three-dimensional modeling (such as Building Information Models) and other Work Product may be transmitted among Design-Builder, Design Consultant, Design Sub-Consultant and others in electronic media as an alternative to paper hard copies (collectively "Electronic Data").

13.2 Transmission of Electronic Data

13.2.1 Design-Builder shall determine, after consultation with Design Consultant, the software and the format for the transmission of Electronic Data. Each party shall be responsible for securing the legal rights to access the agreed-upon format, including, if necessary, obtaining appropriately licensed copies of the applicable software or electronic program to display, interpret and/or generate the Electronic Data.

© 2022 Design-Build Institute of America

13.2.2 Neither party makes any representations or warranties to the other with respect to the functionality of the software or computer program associated with the electronic transmission of Work Product. Unless specifically set forth in this Agreement, ownership of the Electronic Data does not include ownership of the software or computer program with which it is associated, transmitted, generated or interpreted.

13.2.3 By transmitting Work Product in electronic form, the transmitting party does not transfer or assign its rights in the Work Product. The rights in the Electronic Data shall be as set forth in Article 4 above. Under no circumstances shall the transfer of ownership of Electronic Data be deemed to be a sale by the transmitting party of tangible goods.

13.3 Electronic Data Protocol

13.3.1 The parties acknowledge that Electronic Data may be altered or corrupted, intentionally or otherwise, due to occurrences beyond their reasonable control or knowledge, including but not limited to compatibility issues with user software, manipulation by the recipient, errors in transcription or transmission, machine error, environmental factors and operator error. Consequently, the parties understand that there is some level of increased risk in the use of Electronic Data for the communication of design and construction information and, in consideration of this, agree, and shall require their independent contractors, Subcontractors and Lower Tier Design Sub-Consultants to agree, to the following protocols, terms and conditions set forth in this Section 13.3.

13.3.2 Electronic Data will be transmitted in the format determined in Section 13.2.1 above, including file conventions and document properties, unless prior arrangements are made in advance in writing.

13.3.3 The Electronic Data represents the information at a particular point in time and is subject to change. Therefore, the parties shall agree upon protocols for notification by the author to the recipient of any changes which may thereafter be made to the Electronic Data, which protocol shall also address the duty, if any, to update such information if such information changes prior to Final Completion of the Project.

13.3.4 The transmitting party specifically disclaims all warranties, expressed or implied, including, but not limited to, implied warranties of merchantability and fitness for a particular purpose, with respect to the media transmitting the Electronic Data. However, transmission of the Electronic Data via electronic means shall not invalidate or negate any duties pursuant to the applicable standard of care with respect to the creation of the Electronic Data, unless such data is materially changed or altered after it is transmitted to the receiving party, and the transmitting party did not participate in such change or alteration.

13.4 In the event the Design-Build Agreement contains a provision governing Electronic Data, and there is a conflict between the provision in the Design-Build Agreement and this Article 13, the provision in the Design-Build Agreement takes precedence notwithstanding the order of precedence set forth in Section 1.4.2.

© 2022 Design-Build Institute of America

Article 14
Confidential Information

14.1 Confidential and/or Proprietary Information

14.1.1 Confidential Information is defined as information which is determined by the transmitting party to be of a confidential or proprietary nature and: (i) the transmitting party identifies as either confidential or proprietary; (ii) the transmitting party takes steps to maintain the confidential or proprietary nature of the information; and (iii) the document is not otherwise available in or considered to be in the public domain. The receiving party agrees to maintain the confidentiality of the Confidential Information and agrees to use the Confidential Information solely in connection with the Project.

14.1.2 Design Sub-Consultant may receive information from Design-Builder or Design Consultant that is either confidential or proprietary to either Design-Builder, Design Consultant or to Owner. Such information shall be labeled as confidential and/or proprietary. Design Sub-Consultant agrees to maintain the confidential nature of such information and to execute any such additional agreements as may be required by Design, Consultant, Owner or Design-Builder with respect to such information.

14.1.3 In the event the Design-Build Agreement or the Design Consultant Agreement contains a provision governing Confidential Information, and there is a conflict between either of those agreements and this Article 14, the provision in the Design-Build Agreement takes precedence notwithstanding the order of precedence set forth in Section 1.4.2.

Article 15
Other Provisions

15.1 Other provisions, if any, are as follows:
(Insert any additional provisions such as incentives or other provisions from the Design-Build Agreement that the parties believe are appropriate to be passed through to Design Consultant.)

(In lieu of Sections 11.5.1 through 11.5.3 of the Agreement, the parties may want to delete such sections and include the following alternative dispute resolution clause.)

☐ Any claims, disputes or controversies between the parties arising out of or related to the Agreement, or the breach thereof, which have not been resolved in accordance with the procedures set forth in Section 11.4 herein shall be resolved in a court of competent jurisdiction in the state in which the Project is located.

Design-Build Institute of America – Contract Documents
LICENSE AGREEMENT

By using the DBIA Contract Documents, you agree to and are bound by the terms of this License Agreement.

1. **License.** The Design-Build Institute of America ("DBIA") provides DBIA Contract Documents and licenses their use worldwide. You acknowledge that DBIA Contract Documents are protected by the copyright laws of the United States. You have a limited nonexclusive license to: (a) Use DBIA Contract Documents on any number of machines owned, leased, or rented by your company or organization; (b) Use DBIA Contract Documents in printed form for bona fide contract purposes; and (c) Copy DBIA Contract Documents into any machine-readable or printed form for backup or modification purposes in support of your permitted use.
2. **User Responsibility.** You assume sole responsibility for the selection of specific documents or portions thereof to achieve your intended results and for the installation, use, and results obtained from the DBIA Contract Documents. You acknowledge that you understand that the text of the DBIA Contract Documents has important legal consequences and that consultation with an attorney is recommended with respect to use or modification of the text. You will not represent that any of the contract documents you generate from DBIA Contract Documents are DBIA documents unless (a) the document text is used without alteration or (b) all additions and changes to, and deletions from, the text are clearly shown.
3. **Copies.** You may not use, copy, modify, or transfer DBIA Contract Documents, or any copy, modification, or merged portion, in whole or in part, except as expressly provided for in this license. Reproduction of DBIA Contract Documents in printed or machine-readable format for resale or educational purposes is expressly prohibited. You will reproduce and include DBIA's copyright notice on any printed or machine-readable copy, modification, or portion merged into another document or program.
4. **Transfers.** You may not transfer possession of any copy, modification, or merged portion of DBIA Contract Documents to another party, except that a party with whom you are contracting may receive and use such transferred material solely for purposes of its contract with you. You may not sublicense, assign, or transfer this license except as expressly provided in this Agreement, and any attempt to do so is void.
5. **Term.** The license is effective for one year from the date of purchase. DBIA may elect to terminate it earlier, by written notice to you, if you fail to comply with any term or condition of this Agreement.
6. **Limited Warranty.** DBIA warrants the electronic files or other media by which DBIA Contract Documents are furnished to be free from defects in materials and workmanship under normal use during the Term. There is no other warranty of any kind, expressed or implied, including, but not limited to the implied warranties of merchantability and fitness for a particular purpose. Some states do not allow the exclusion of implied warranties, so the above exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state. DBIA does not warrant that the DBIA Contract Documents will meet your requirements or that the operation of DBIA Contract Documents will be uninterrupted or error free.
7. **Limitations of Remedies.** DBIA's entire liability and your exclusive remedy shall be: the replacement of any document not meeting DBIA's "Limited Warranty" which is returned to DBIA with a copy of your receipt, or at DBIA's election, your money will be refunded. In no event will DBIA be liable to you for any damages, including any lost profits, lost savings, or other incidental or consequential damages arising out of the use or inability to use DBIA Contract Documents even if DBIA has been advised of the possibility of such damages, or for any claim by any other party. Some states do not allow the limitation or exclusion of liability for incidental or consequential damages, so the above limitation or exclusion may not apply to you.
8. **Acknowledgement.** You acknowledge that you have read this agreement, understand it, and agree to be bound by its terms and conditions, and that it will be governed by the laws of the District of Columbia. You further agree that it is the complete and exclusive statement of your agreement with DBIA which supersedes any proposal or prior agreement, oral or written, and any other communications between the parties relating to the subject matter of this agreement.

PERFORMANCE BOND FOR DESIGN-BUILD PROJECTS

This bond form has been endorsed by The National Association of Surety Bond Producers and The Surety & Fidelity Association of America

DESIGN-BUILDER/PRINCIPAL: *(Name and address)*	**SURETY:** *(Name and contact information)*
OWNER/OBLIGEE: *(Name and address)*	**PROJECT:** *(Name and location)*
DESIGN-BUILD AGREEMENT: Dated: Amount:	**BOND DATE:** *(Not earlier than date of Design-Build Agreement)* **BOND AMOUNT:**

MODIFICATIONS TO THIS BOND:
(List modifications to this Bond below. If none, write "None")

© 2015 Design-Build Institute of America

BOND TERMS AND CONDITIONS

1 Binding Effect. The Design-Builder and Surety, jointly and severally, bind themselves, their heirs, executors, administrators, successors and assigns to the Owner for the performance of the Design-Build Agreement, which is incorporated herein by reference.

2 Intent of Bond. If the Design-Builder performs its obligations under the Design-Build Agreement, then the Surety's obligations under this Bond are null and void, except to participate in meetings as provided in Section 4.

3 Waiver of Notice. The Surety hereby waives notice of changes to the Design-Build Agreement, including changes within the general scope, or of time or price, or to related subcontracts or purchase orders.

4 Owner's Obligations. If there is no default in Owner's obligations under the Design-Build Agreement, then the Surety's obligation under this Bond shall arise after the following steps have been taken by Owner, as a condition precedent to a Bond claim:

4.1 The Owner has first provided written notice to the Design-Builder and Surety at the addresses listed on page 1 of this Bond, that Owner is considering declaring the Design-Builder in default and has requested and attempted to arrange a meeting with the Design-Builder and Surety, to be held not later than fourteen (14) days after receipt of Owner's notice, to discuss methods of performing the Design-Builder's obligations under the Design-Build Agreement. If the Owner, Design-Builder and Surety agree, the Design-Builder shall be allowed a reasonable time to perform its obligations under the Design-Build Agreement, but such an agreement shall not waive the Owner's right, if any, subsequently to declare the Design-Builder in default;

4.2 The Owner declares the Design-Builder to be in default, terminates the Design-Build Agreement and notifies the Surety in writing; and

4.3 The Owner has agreed to pay the balance remaining under the Design-Build Agreement (i.e., the total amount payable by the Owner to the Design-Builder thereunder less amounts properly paid by the Owner to the Design-Builder, the "Contract Balance") to:

.1 The Surety, in accordance with the terms of the Design-Build Agreement; or
.2 Another design-builder selected pursuant to Section 5.3 to perform the remaining obligations under the Design-Build Agreement.

5 Surety's Obligations. When Owner has satisfied the conditions of Section 4, the Surety shall promptly take one of the following actions, at the Surety's expense:

5.1 Arrange for the Design-Builder to perform and complete the remaining obligations under the Design-Build Agreement, with consent of Owner;

5.2 Undertake to perform and complete the remaining obligations under the Design-Build Agreement itself, through its agents or through independent contractors;

5.3 Obtain bids or negotiated proposals from qualified design-builders acceptable to Owner for a contract for performance and completion of the Design-Build Agreement, arrange for a contract to be prepared for execution by Owner and a design-builder selected with Owner's concurrence, to be secured by performance and payment bonds equivalent to those for the Design-Build Agreement, issued by a qualified surety. The Surety shall: a. make available as Work progresses sufficient funds to pay the cost of completion of the Design-Build Agreement; and, b. pay to Owner the amount of damages as described in Section 7;

5.4 Waive its right to complete the Work under Sections 5.2 or 5.3, and reimburse the Owner the amount of its reasonable costs to complete the Work; or

© 2015 Design-Build Institute of America

5.5 Deny liability, in whole or in part, and notify the Owner in writing, citing reasons therefor.

6 Owner's Rights. If the Surety does not proceed as provided in Section 5 with reasonable promptness, the Surety shall be deemed to be in default on this Bond seven (7) days after receipt of an additional written notice from the Owner to the Surety demanding that the Surety perform its obligations under this Bond and stating that the Owner shall be entitled to enforce any remedy available to the Owner. If the Surety proceeds as provided in Section 5.4, and the Owner refuses the payment, or the Surety has denied liability, in whole or in part, under Section 5.5, the Owner shall be entitled without further notice to enforce any remedy available to it.

7 Damages Covered. In any event, the Surety's obligations to the Owner, and the Owner's obligations to the Surety, shall not be greater than those of the Owner and Design-Builder to each other, respectively, under the Design-Build Agreement. Subject to commitment by Owner to payment of the Contract Balance, the Surety is obligated without duplication for:

7.1 The responsibilities of Design-Builder for correction of defective Work and completion of the Project;
7.2 Additional legal, design professional and delay costs resulting from Design-Builder's default, and resulting from the actions or failure to act of Surety under Section 5; and
7.3 Liquidated damages, or if no liquidated damages are specified in the Design-Build Agreement, actual damages caused by delayed performance or non-performance of Design-Builder.

8 Bond Liability. If the Surety elects to act under Sections 5.1, 5.3 or 5.4, the Surety's total liability shall not exceed the Bond Amount.

8.1 The Surety shall not be liable to the Owner or others for obligations of the Design-Builder that are unrelated to the Design-Build Agreement, and the Contract Balance shall not be reduced or set off on account of any such unrelated obligations.

9 Beneficiaries. No right of action shall accrue on this Bond to any person or entity other than Owner or its heirs, executors, administrators, or successors, unless some other party is named in this Bond as a dual obligee.

10 Dispute Resolution. All disputes related to this Bond shall be instituted in any court of competent jurisdiction in the location in which the Project is located and shall be commenced within two (2) years after: a. the Owner declares the Design-Builder in default under Section 4.2; or, b. Substantial Completion of the Project, whichever occurs first. If the provisions of this Section 10 are prohibited by law, the minimum period of limitation available to sureties in the jurisdiction in which the Project is located shall be applicable.

10.1 In the event of bankruptcy of the Design-Builder, the Surety agrees that the Design-Builder is not a necessary or indispensable party to any legal action by Owner against Surety to enforce the Surety's obligations under this Bond.

11 Notice. Unless otherwise noted below, written notice under this Bond to Surety, Owner or Design-Builder shall be mailed or delivered electronically or by hard mail to the contact information shown on page 1.
(List any alternate contact information below for notice to the Surety of any claim on this Bond. If none, then use the contact information on page 1)

For Claims on this Bond:

□ Use the contact information shown on page 1; or
□ Use the following alternate contact information:
(fill in Surety claims administrator contact information below)

12 Statutory Compliance. If this Bond has been furnished to comply with a statutory requirement in the location where the Project is located, then any provision herein that conflicts with a statutory

© 2015 Design-Build Institute of America

requirement shall be deemed deleted and replaced by provisions conforming to such statutory requirement. The intent is that this Bond shall be construed as a statutory bond conforming to the applicable statutes.

13 Warranty Obligation. The Surety's obligations to the Owner for warranties of the Design-Builder shall be the same as those required of the Design-Builder under the Design-Build Agreement, subject to the time limitation in Section 10. Unless otherwise stated below, the Surety's obligation for such warranties excludes: a) products, materials or equipment covered by a manufacturer's separate warranty; and b) claims by the Owner first noticed to Surety in writing more than one year after the effective date of such warranty as specified under the Design-Build Agreement.
(List below any exceptions to the above limitations on Surety's warranty obligation, if any)

14 Authorization. The Surety represents that it is admitted to act as an authorized corporate surety in the state in which the Project is located. Surety and Design-Builder, intending to be legally bound hereby, subject to the terms set out above, do each cause this Performance Bond to be duly executed on its behalf by its authorized officer, agent, or representative.

Design-Build Institute of America – Contract Documents
LICENSE AGREEMENT

By using the DBIA Contract Documents, you agree to and are bound by the terms of this License Agreement.

1. **License.** The Design-Build Institute of America ("DBIA") provides DBIA Contract Documents and licenses their use worldwide. You acknowledge that DBIA Contract Documents are protected by the copyright laws of the United States. You have a limited nonexclusive license to: (a) Use DBIA Contract Documents on any number of machines owned, leased, or rented by your company or organization; (b) Use DBIA Contract Documents in printed form for bona fide contract purposes; and (c) Copy DBIA Contract Documents into any machine-readable or printed form for backup or modification purposes in support of your permitted use.
2. **User Responsibility.** You assume sole responsibility for the selection of specific documents or portions thereof to achieve your intended results and for the installation, use, and results obtained from the DBIA Contract Documents. You acknowledge that you understand that the text of the DBIA Contract Documents has important legal consequences and that consultation with an attorney is recommended with respect to use or modification of the text. You will not represent that any of the contract documents you generate from DBIA Contract Documents are DBIA documents unless (a) the document text is used without alteration or (b) all additions and changes to, and deletions from, the text are clearly shown.
3. **Copies.** You may not use, copy, modify, or transfer DBIA Contract Documents, or any copy, modification, or merged portion, in whole or in part, except as expressly provided for in this license. Reproduction of DBIA Contract Documents in printed or machine-readable format for resale or educational purposes is expressly prohibited. You will reproduce and include DBIA's copyright notice on any printed or machine-readable copy, modification, or portion merged into another document or program.
4. **Transfers.** You may not transfer possession of any copy, modification, or merged portion of DBIA Contract Documents to another party, except that a party with whom you are contracting may receive and use such transferred material solely for purposes of its contract with you. You may not sublicense, assign, or transfer this license except as expressly provided in this Agreement, and any attempt to do so is void.
5. **Term.** The license is effective for one year from the date of purchase. DBIA may elect to terminate it earlier, by written notice to you, if you fail to comply with any term or condition of this Agreement.
6. **Limited Warranty.** DBIA warrants the electronic files or other media by which DBIA Contract Documents are furnished to be free from defects in materials and workmanship under normal use during the Term. There is no other warranty of any kind, expressed or implied, including, but not limited to the implied warranties of merchantability and fitness for a particular purpose. Some states do not allow the exclusion of implied warranties, so the above exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state. DBIA does not warrant that the DBIA Contract Documents will meet your requirements or that the operation of DBIA Contract Documents will be uninterrupted or error free.
7. **Limitations of Remedies.** DBIA's entire liability and your exclusive remedy shall be: the replacement of any document not meeting DBIA's "Limited Warranty" which is returned to DBIA with a copy of your receipt, or at DBIA's election, your money will be refunded. In no event will DBIA be liable to you for any damages, including any lost profits, lost savings, or other incidental or consequential damages arising out of the use or inability to use DBIA Contract Documents even if DBIA has been advised of the possibility of such damages, or for any claim by any other party. Some states do not allow the limitation or exclusion of liability for incidental or consequential damages, so the above limitation or exclusion may not apply to you.
8. **Acknowledgement.** You acknowledge that you have read this agreement, understand it, and agree to be bound by its terms and conditions, and that it will be governed by the laws of the District of Columbia. You further agree that it is the complete and exclusive statement of your agreement with DBIA which supersedes any proposal or prior agreement, oral or written, and any other communications between the parties relating to the subject matter of this agreement.

BOND TERMS AND CONDITIONS

1 Binding Effect. The Design-Builder and Surety, jointly and severally, bind themselves, their heirs, executors, administrators, successors and assigns to pay for labor, services, materials and equipment furnished by Claimants for use in the performance of the Design-Build Agreement, which is incorporated herein by reference.

2 Intent of Bond. If the Design-Builder promptly makes payment of all sums for all labor, services, materials, and equipment furnished for use in the performance of the Design-Build Agreement, then the Surety's obligations under this Bond are null and void. Otherwise the Surety's obligations shall remain in full force and effect.

3 Notice of Claim. Every Claimant who has not been paid in full before the expiration of a period of ninety (90) days after such Claimant provided or performed the last of the work, services or labor, or furnished the last of the materials or equipment for which said claim is made, may have a right of action on this Bond.

3.1 Claimants shall provide written notice to the Surety and send a copy, or notice thereof, to Owner and Design-Builder, stating that a claim is being made under this Bond and, with substantial accuracy, the amount of the claim, and the last date such work, services or labor were performed, or the last materials or equipment were furnished in furtherance of the Design-Build Agreement.

3.2 If Claimant does not have a direct contract with Design-Builder, the notice shall identify the person or entity with whom Claimant contracted and who has not made payment to Claimant.

4 Surety's Obligations. When a Claimant has satisfied the conditions of Section 3, the Surety shall promptly take the following actions at the Surety's expense:

4.1 Send an answer to that Claimant, with a copy to the Owner and Design-Builder, within sixty (60) days after receipt of the claim, stating the amounts that are undisputed and the basis for challenging any disputed portions or amounts.

4.2 Pay or arrange for payment of any undisputed amounts.

5 Bond Liability. The Surety's total obligation shall not exceed the Bond Amount, plus the amount of reasonable attorney's fees provided for herein.

5.1 If the Surety fails to discharge its obligations under Sections 4.1 or 4.2, the Surety shall indemnify the Claimant for the reasonable attorney's fees the Claimant incurs thereafter to successfully recover any sums found to be due and owing to the Claimant. If Claimant does not recover the entire amount claimed in its notice under Section 3, then such attorney's fees shall be reduced in proportion to the amount actually recovered.

5.2 The Surety shall not be liable to the Owner, Claimants or others for obligations of the Design-Builder that are unrelated to the Design-Build Agreement, and the Contract Balance shall not be reduced or set off on account of any such unrelated obligations.

6 Waiver of Notice. The Surety hereby waives notice of changes to the Design-Build Agreement, including changes within the general scope, or of time or price, or to related subcontracts or purchase orders.

7 Dispute Resolution. No suit or action shall be commenced by a Claimant under this Bond other than in a court of competent jurisdiction in the State in which the Project is located. Such suit or action must be filed within one (1) year from the date: a) on which the Claimant sent a claim to the Surety pursuant to Section 3.1; or, b) on which the Claimant last performed labor or services or furnished materials or equipment on the Project, whichever occurs first. If the provisions of this Section 7 are prohibited by law, the minimum period of limitation available to sureties in the jurisdiction in which the

© 2015 Design-Build Institute of America

Project is located shall be applicable.

7.1 In the event of bankruptcy of the Design-Builder, the Surety agrees that the Design-Builder is not a necessary or indispensable party to any legal action by any party against the Surety to enforce the Surety's obligations under this Bond.

8 Statutory Compliance. If this Bond has been furnished to comply with a statutory requirement in the location where the Project is located, then any provision herein that conflicts with a statutory requirement shall be deemed deleted and replaced by provisions conforming to such statutory requirement. The intent is that this Bond shall be construed as a statutory bond conforming to the applicable statutes.

9 Copy To Be Furnished. Upon written request of any person or entity appearing to be a potential Claimant on this Bond, Design-Builder shall promptly furnish a copy of this Bond or shall permit a copy to be made.

10 Claimant Defined. A Claimant is any individual or entity having a direct contract with the Design-Builder or having a contract with a subcontractor that has a direct contract with the Design-Builder to furnish services, labor, materials or equipment for use in the performance of the Design-Build Agreement.

10.1 A Claimant may include amounts owed by the Design-Builder for design and other professional services furnished or performed by Claimant regardless of whether such services might form the basis for a mechanic's lien under applicable State law.

11 Notice. Unless otherwise noted below, written notice under this Bond to Surety, Owner or Design-Builder shall be mailed or delivered electronically or by hard mail to the contact information shown on page 1.
(List any alternate contact information below for notice to the Surety of any claim on this Bond. If none, then use the contact information on page 1)

For Claims on this Bond:
(check appropriate box)
□ Use the contact information shown on page 1; or
□ Use the following alternate contact information:
(fill in Surety claims administrator contact information below)

12 Subcontractor Bonds. If this Bond is issued for an agreement between the Design-Builder and a subcontractor, the term Design-Builder in this Bond shall be deemed to be the bonded subcontractor and the term Owner shall be deemed to be Design-Builder.

13 Authorization. The Surety represents that it is admitted to act as an authorized corporate surety in the state in which the Project is located. Surety and Design-Builder, intending to be legally bound hereby, subject to the terms set out above, do each cause this Payment Bond to be duly executed on its behalf by its authorized officer, agent, or representative.

Design-Build Institute of America – Contract Documents
LICENSE AGREEMENT

By using the DBIA Contract Documents, you agree to and are bound by the terms of this License Agreement.

1. **License.** The Design-Build Institute of America ("DBIA") provides DBIA Contract Documents and licenses their use worldwide. You acknowledge that DBIA Contract Documents are protected by the copyright laws of the United States. You have a limited nonexclusive license to: (a) Use DBIA Contract Documents on any number of machines owned, leased, or rented by your company or organization; (b) Use DBIA Contract Documents in printed form for bona fide contract purposes; and (c) Copy DBIA Contract Documents into any machine-readable or printed form for backup or modification purposes in support of your permitted use.
2. **User Responsibility.** You assume sole responsibility for the selection of specific documents or portions thereof to achieve your intended results and for the installation, use, and results obtained from the DBIA Contract Documents. You acknowledge that you understand that the text of the DBIA Contract Documents has important legal consequences and that consultation with an attorney is recommended with respect to use or modification of the text. You will not represent that any of the contract documents you generate from DBIA Contract Documents are DBIA documents unless (a) the document text is used without alteration or (b) all additions and changes to, and deletions from, the text are clearly shown.
3. **Copies.** You may not use, copy, modify, or transfer DBIA Contract Documents, or any copy, modification, or merged portion, in whole or in part, except as expressly provided for in this license. Reproduction of DBIA Contract Documents in printed or machine-readable format for resale or educational purposes is expressly prohibited. You will reproduce and include DBIA's copyright notice on any printed or machine-readable copy, modification, or portion merged into another document or program.
4. **Transfers.** You may not transfer possession of any copy, modification, or merged portion of DBIA Contract Documents to another party, except that a party with whom you are contracting may receive and use such transferred material solely for purposes of its contract with you. You may not sublicense, assign, or transfer this license except as expressly provided in this Agreement, and any attempt to do so is void.
5. **Term.** The license is effective for one year from the date of purchase. DBIA may elect to terminate it earlier, by written notice to you, if you fail to comply with any term or condition of this Agreement.
6. **Limited Warranty.** DBIA warrants the electronic files or other media by which DBIA Contract Documents are furnished to be free from defects in materials and workmanship under normal use during the Term. There is no other warranty of any kind, expressed or implied, including, but not limited to the implied warranties of merchantability and fitness for a particular purpose. Some states do not allow the exclusion of implied warranties, so the above exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state. DBIA does not warrant that the DBIA Contract Documents will meet your requirements or that the operation of DBIA Contract Documents will be uninterrupted or error free.
7. **Limitations of Remedies.** DBIA's entire liability and your exclusive remedy shall be: the replacement of any document not meeting DBIA's "Limited Warranty" which is returned to DBIA with a copy of your receipt, or at DBIA's election, your money will be refunded. In no event will DBIA be liable to you for any damages, including any lost profits, lost savings, or other incidental or consequential damages arising out of the use or inability to use DBIA Contract Documents even if DBIA has been advised of the possibility of such damages, or for any claim by any other party. Some states do not allow the limitation or exclusion of liability for incidental or consequential damages, so the above limitation or exclusion may not apply to you.
8. **Acknowledgement.** You acknowledge that you have read this agreement, understand it, and agree to be bound by its terms and conditions, and that it will be governed by the laws of the District of Columbia. You further agree that it is the complete and exclusive statement of your agreement with DBIA which supersedes any proposal or prior agreement, oral or written, and any other communications between the parties relating to the subject matter of this agreement.

Building Information Modeling Exhibit

This document has important legal consequences. Consultation with an attorney is recommended with respect to its completion or modification and its relation to the other Contract Documents set forth in DBIA Document No. 525, *Standard Form of Agreement Between Owner and Design-Builder - Lump Sum* (2010 Edition) or DBIA Document No. 530, *Standard Form of Agreement BetweenOwner and Design-Builder - Cost Plus Fee with an Option for a Guaranteed Maximum Price* (2010 Edition).

This Exhibit is attached to and made a part of the Underlying Contract between the following parties:

PARTIES TO THIS EXHIBIT *(list parties)***:**

_____

_____

with respect to the Project noted below:

PROJECT:
(Include Project name and location as it will appear in the Contract Documents)

DESIGN-BUILDER:
(Hereinafter "Design-Builder")

OWNER:
(Hereinafter "Owner")

DATE:

Article 1

Definitions

1.1 *BIM* or *BIM Process* means the Building Information Modeling system that is described in this Exhibit and that has been agreed to between Owner and Design-Builder.

1.2 *Deliverable* means a document, either in hard copy or electronic form that contains designs, drawings, calculations, information or other data that is utilized in the BIM Process. A Deliverable may be in the form of a submission from a Participant to the BIM Process or a document generated through the BIM Process.

1.3 *Design-Build Agreement* means the Agreement identified below between the Design-Builder and Owner for the design and construction of the Project. Definitions in this Exhibit shall be the same as the definitions set forth in DBIA Document No. 535, *Standard Form of General Conditions of Contract Between Owner and Design-Builder* (2010 Edition). The Design-Build Agreement is based on the following:

(check one box below)

☐ DBIA Document No. 525*, Standard Form of Agreement Between Owner and Design-Builder - Lump Sum* (2010 Edition) ("DBIA 525").

☐ DBIA Document No. 530, *Standard Form of Agreement Between Owner and Design-Builder - Cost Plus Fee with an Option for a Guaranteed Maximum Price ("GMP")* (2010 Edition) ("DBIA 530").

1.4 *General Conditions of Contract* means the General Conditions of Contract attached to the Design-Build Agreement and is based on the DBIA Document No. 535 *Standard Form of General Conditions of Contract Between Owner and Design-Builder* (2010 Edition).

1.5 *Information* means any information, data, drawings, concepts, designs, submittals, models, calculations, or any other information in any media whatsoever, submitted by a Participant to the Design-Builder or Information Manager for use in the BIM Process.

1.6 *Information Manager* means the entity or individual designated in Section 3.2 of this Addendum.

1.7 *Intellectual Property Rights* means the copyrights, patents, licenses and other rights associated with the use and/or modification of any Information or Deliverables.

1.8 *Participant* means an entity who is a party to the Design-Build Agreement, Subcontract, Design Consultant Agreement, or a contract of a lower tier, who has or will provide either Information or a Deliverable to the BIM Process.

1.9 *Project* means the Project described and set forth above.

1.10 *Subcontractor* or *Design Consultant* and their lower tier *Sub-Subcontractors* and *Design Sub-Consultants* shall have the meanings set forth in the General Conditions of Contract.

1.11 *Subcontract* or *Design Consultant Agreement* shall mean an agreement between the Design-Builder, and a Subcontractor or a Design Consultant to perform a portion of the Work set forth in the Design-Build Agreement.

1.12 *Underlying Contract* means the contract under which the Participant is obligated to provide Information, Deliverables and/or design and/or construction services to the Project. Underlying Contracts include the Design-Build Agreement, Subcontracts, Design Consultant Agreements, and contracts of a lower tier.

©2010 Design-Build Institute of America

Article 2

Purpose

2.1 The Participants have agreed to utilize BIM to assist with the design and/or planning of the Project set forth above. The purpose of this Exhibit is to establish the procedures associated with the use of BIM for the Project.

2.2 The Participants will, in connection with the meeting set forth in Section 2.1.4 of the General Conditions of Contract ("Initial Conference"), determine the following:

2.2.1 The desired use and outcome of BIM for the Project, including but not limited to the Deliverables to be developed from the use of BIM;

2.2.2 The Information and Deliverables to be submitted by the Participants, including but not limited to the format for the Information and/or Deliverable;

2.2.3 The identities of the Participants to the BIM Process;

2.2.4 The roles and responsibilities of the Participants to the BIM Process; and

2.2.5 Establish submission schedules for Information and Deliverables.

2.3 All Participants will incorporate this Exhibit into their respective Subcontracts, Design Consultant Agreements, and lower tier contracts with Participants.

Article 3

Information Management

3.1 Design-Builder will identify the software program(s) that the Participants are required to utilize in the BIM Process. The cost of the software is:

(check one box below)

☐ A Cost of The Work pursuant to Section 6.3 of DBIA 530;

☐ Included in the lump sum set forth in Section 6.1 of DBIA 525;

☐ Paid by Owner outside the Contract Price;

☐ Obtained, provided, and paid for by each Participant;

☐ Included in the cost of the Underlying Contract; or

☐ Other: _____

3.2 Design-Builder will designate an Information Manager who will be responsible for the following:

©2010 Design-Build Institute of America

3.2.1 Establishment of submission standards for Information and Deliverables and other data to be submitted through the BIM Process;

3.2.2 Control of access to the BIM Process, including but not limited to, control over access to the submissions contained therein. Such control shall include establishment of passwords and security for Participants; assigning and maintaining user accounts; applying controls so that only authorized Participants may access and/or modify files; and recording information regarding the data entry by each Participant;

3.2.3 Receipt and organization of the Information submitted through the BIM Process;

3.2.4 Maintenance and updating of the software and electronic files associated with the BIM Process, including but not limited to, regularly backing up the programs and data associated with BIM and/or restoring such data and programs, if necessary; and

3.2.5 Serving as the central communications point for all Participants with respect to questions and problems associated with BIM, including but not limited to, questions regarding software, access to BIM, and troubleshooting.

3.3 The Owner will provide such Information as agreed to in the Initial Conference. The Participants may rely on the Owner's Information and Owner shall remain responsible for such Information in the same manner as set forth in Section 3.2.1 of the General Conditions of Contract.

Article 4

Responsibility for Information and Deliverables

4.1 Each Participant to the BIM Process shall be responsible for complying with their respective Underlying Contracts with regard to Information and Deliverables.

4.2 Each Participant shall review and coordinate the Information and/or Deliverable submitted by its Subcontractors, Design Consultants or others as the case may be and shall remain fully responsible for the Information and Deliverables so provided.

4.3 If a Participant modifies the Information and/or Deliverable of another Participant without the professional involvement of the non-modifying Participant, the modifying Participant shall be responsible to the extent of the modification and shall indemnify, defend and hold harmless the non-modifying Participant from and against any claims, suits, damages, losses, liabilities, costs and expenses (including reasonable attorney's fee) to the extent caused by such modification(s).

4.4 Information and Deliverables provided by each Participant are represented as suitable for incorporation into the BIM Process for this Project only, and are not represented as appropriate or suitable for any other project, nor for adaptation of this Project design to another location. Any further use of the Participant's Information and Deliverables for another project or location is strictly prohibited without the written consent and professional involvement of the Participant.

4.5 Participants are not responsible for errors in their Information and Deliverables caused by software or hardware compatibility with the BIM software specified by the Information Manager. However, upon notice from the Information Manager of such incompatibility, the Participant shall work in good faith to resolve such compatibility issues, including errors in transmission, at no added cost to any Participant.

©2010 Design-Build Institute of America

Article 5

Participant's Responsibilities

5.1 Participants shall carefully review the Information and Deliverables submitted to and developed by the Participant through the BIM Process to determine whether the Information and/or Deliverable that the Participant provides is adequately and accurately reflected in the Deliverable and that such Information and/or Deliverable is consistent with the overall Project and the Basis of Design Documents. If a Participant identifies any error, omission or inconsistency in any Information or Deliverable submitted to or developed through the BIM Process, the Participant shall immediately notify Design-Builder and the Information Manager of such error, omission or inconsistency, regardless of Participant's responsibility for the error, omission or inconsistency.

5.2 Each Participant is responsible for maintaining a record of the Information and Deliverables that the Participant submits to the BIM Process.

Article 6

Intellectual Property Rights

6.1 Each Participant represents that it has the appropriate Intellectual Property Rights to submit its Information or Deliverable to the BIM Process and that it has obtained such rights from any of its Subcontractors and Design-Consultants and lower tier parties whose Information or Deliverable the Participant furnishes. Such Intellectual Property Rights shall comply with Article 4 of DBIA Document No. 525, *Standard Form of Agreement Between Owner and Design-Builder – Lump Sum* (2010 Edition) or DBIA Document No. 530, *Standard Form of Agreement BetweenOwner and Design-Builder - Cost Plus Fee with an Option for a Guaranteed Maximum Price* (2010 Edition), and each Participant represents that it will provide such licenses and/or ownership rights in the Work Product as is required in Article 4 of the Design-Build Agreement.

Article 7

Miscellaneous

7.1 This Exhibit shall not modify or alter any Underlying Contract, except as expressly set forth in this Addendum.

7.2 Resolution of any disputes arising out of this Exhibit shall be pursuant to the Participants' Underlying Contracts.

Design-Build Institute of America - Contract Documents

LICENSE AGREEMENT

By using the DBIA Contract Documents, you agree to and are bound by the terms of this License Agreement.

1. **License.** The Design-Build Institute of America ("DBIA") provides DBIA Contract Documents and licenses their use worldwide. You acknowledge that DBIA Contract Documents are protected by the copyright laws of the United States. You have a limited nonexclusive license to: (a) Use DBIA Contract Documents on any number of machines owned, leased or rented by your company or organization; (b) Use DBIA Contract Documents in printed form for bona fide contract purposes; and (c) Copy DBIA Contract Documents into any machine-readable or printed form for backup or modification purposes in support of your permitted use.
2. **User Responsibility.** You assume sole responsibility for the selection of specific documents or portions thereof to achieve your intended results, and for the installation, use, and results obtained from the DBIA Contract Documents. You acknowledge that you understand that the text of the DBIA Contract Documents has important legal consequences and that consultation with an attorney is recommended with respect to use or modification of the text. You will not represent that any of the contract documents you generate from DBIA Contract Documents are DBIA documents unless (a) the document text is used without alteration or (b) all additions and changes to, and deletions from, the text are clearly shown.
3. **Copies.** You may not use, copy, modify, or transfer DBIA Contract Documents, or any copy, modification or merged portion, in whole or in part, except as expressly provided for in this license. Reproduction of DBIA Contract Documents in printed or machine-readable format for resale or educational purposes is expressly prohibited. You will reproduce and include DBIA's copyright notice on any printed or machine-readable copy, modification, or portion merged into another document or program.
4. **Transfers.** You may not transfer possession of any copy, modification or merged portion of DBIA Contract Documents to another party, except that a party with whom you are contracting may receive and use such transferred material solely for purposes of its contract with you. You may not sublicense, assign, or transfer this license except as expressly provided in this Agreement, and any attempt to do so is void.
5. **Term.** The license is effective for one year from the date of purchase. DBIA may elect to terminate it earlier, by written notice to you, if you fail to comply with any term or condition of this Agreement.
6. **Limited Warranty.** DBIA warrants the electronic files or other media by which DBIA Contract Documents are furnished to be free from defects in materials and workmanship under normal use during the Term. There is no other warranty of any kind, expressed or implied, including, but not limited to the implied warranties of merchantability and fitness for a particular purpose. Some states do not allow the exclusion of implied warranties, so the above exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state. DBIA does not warrant that the DBIA Contract Documents will meet your requirements or that the operation of DBIA Contract Documents will be uninterrupted or error free.
7. **Limitations of Remedies.** DBIA's entire liability and your exclusive remedy shall be: the replacement of any document not meeting DBIA's "Limited Warranty" which is returned to DBIA with a copy of your receipt, or at DBIA's election, your money will be refunded. In no event will DBIA be liable to you for any damages, including any lost profits, lost savings or other incidental or consequential damages arising out of the use or inability to use DBIA Contract Documents even if DBIA has been advised of the possibility of such damages, or for any claim by any other party. Some states do not allow the limitation or exclusion of liability for incidental or consequential damages, so the above limitation or exclusion may not apply to you.
8. **Acknowledgement.** You acknowledge that you have read this agreement, understand it and agree to be bound by its terms and conditions and that it will be governed by the laws of the District of Columbia. You further agree that it is the complete and exclusive statement of your agreement with DBIA which supersedes any proposal or prior agreement, oral or written, and any other communications between the parties relating to the subject matter of this agreement.

The Design-Build Institute of America provides these example contract provisions and guidance as part of our commitment to promoting diversity, equity and inclusion in the A/E/C space. This commitment is based on our core values of mutual respect for and appreciation of diverse perspectives and ideas, as well as our commitment to professionalism, fairness and the highest level of ethical behavior. Therefore, to build bridges that eradicate racial and gender bias: when undertaking a design-build project, owners and practitioners should intentionally involve and engage historically under-represented companies and individuals, prioritizing fair treatment without any racism or bias. This document is designed to assist in achieving those goals.

INSTRUCTIONS

For DBIA Document No. E-DEI, DIVERSITY, EQUITY & INCLUSION EXAMPLE PROVISIONS
(2023 Edition)

General Instructions

No.	Subject	Instruction
1.	Standard Forms	Standard form contracts have long served an important function in the United States and international construction markets. The common purpose of these forms is to provide an economical and convenient way for parties to contract for design and construction services. As standard forms gain acceptance and are used with increased frequency, parties are able to enter into contracts with greater certainty as to their rights and responsibilities.
2.	DBIA Standard Form Contract Documents	Since its formation in 1993, the Design-Build Institute of America ("DBIA") has regularly evaluated the needs of owners, design-builders, and other parties to the design-build process in preparation for developing its own contract forms. Consistent with DBIA's mission of promulgating best design-build practices, DBIA believes that the design-build contract should reflect a balanced approach to risk that considers the legitimate interests of all parties to the design-build process. DBIA's Standard Form Contract Documents reflect a modern risk allocation approach, allocating each risk to the party best equipped to manage and minimize that risk, with the goal of promoting best design-build practices.
3.	Use of Non-DBIA Documents	To avoid inconsistencies among documents used for the same project, DBIA's Standard Form Contract Documents should not be used in conjunction with non-DBIA documents unless the non-DBIA documents are appropriately modified on the advice of legal counsel. Moreover, care should also be taken when using different editions of the DBIA Standard Form Documents on the same project to ensure consistency.
4.	Legal Consequences	DBIA Standard Form Contract Documents are legally binding contracts with important legal consequences. Contracting parties are advised and encouraged to seek legal counsel in completing or modifying these Documents.
5.	Reproduction	DBIA hereby grants to purchasers a limited license to reproduce its Documents consistent with the License Agreement accompanying these Documents. At least two original versions of the Agreement should be signed by the parties. Any other reproduction of DBIA Documents is strictly prohibited.
6.	Modifications	Effective contracting is accomplished when the parties give specific thought to their contracting goals and then tailor the contract to meet the unique needs of the project and the design-build team. For that reason, these Documents may require modification for various purposes including, for example, to comply with local codes and laws, or to add special terms. DBIA's latest revisions to its Documents provide the parties an opportunity to customize their contractual relationship by selecting various optional contract clauses that may better reflect the unique needs and risks associated with the project. At no time should a document be re-typed in its entirety. Re-creating the document violates copyright laws and destroys one of the advantages of standard forms – familiarity with the terms.
7.	Execution	It is good practice to execute two original copies of the Agreement. Only persons authorized to sign for the contracting parties may execute the Agreement.

© 2023 Design-Build Institute of America

Specific Instructions

Section	Title	Instruction
General	Purpose of This Agreement	DBIA Document No. E-DEI includes sample language for two different types of provisions. Part 1 is sample non-discrimination language. Part 2 is an Exhibit for inclusion of Underutilized Businesses that can be attached to DBIA Document No. 410, Standard Form of Request for Proposals.
General Note	Labor Inclusion	Owners interested in increasing workforce participation amongst workers local to or affected by the project, or who are identified as "Targeted Workers," sometimes use "Community Workforce Agreements" ("CWAs") that set out requirements for outreach and hiring of qualified members of certain groups on the part of both the design-builder, its subcontractors and applicable unions. These workforce participation requirements can be in the contract specifications or part of a Community Workforce Agreement or project labor agreement. Geographical hiring preferences can be defined by city, county or state boundaries, zip codes and census tracts, and the selection of the areas can be based on economic factors such as per capita income levels, poverty rates and unemployment rates. Targeted workers can include members of groups such as veterans, women interested in joining the trades, persons with criminal records, persons receiving public assistance, persons emancipated from the foster care system, persons of certain income levels in the prior year or any of a number of other groups Owner has an interest in encouraging involvement in the Project. Targeted Workers must have the requisite skills and qualifications for the work. To facilitate this, the design-builder, subcontractor or unions, as appropriate, should be required to work with community-based job placement organizations to obtain referrals for Targeted Workers. Owners can also require that a certain percentage of apprentices be Targeted Workers. It is important that any owner considering a CWA review the legal and regulatory requirements applicable to the Project as they may place limitations on, or forbid, certain CWA features. For instance, previously, federal law prohibited the use of local hiring preferences on federal aid transit and highway projects. The Bipartisan Infrastructure Law ("BIL"), enacted as the Infrastructure Investment and Jobs Act (Pub. L. 117-58, November 15, 2021) removed that limitation. See Section 25019(a).
General Note	Federal Small Business Definitions	As a standard form document, the purpose is to provide a document that can be used in most states and for most projects. Using Federal Small Business definitions for guidance in this document is consistent with such purpose. Owners should check with the legal requirements applicable to their procurement and seek legal counsel to evaluate specific federal and state guidelines.
Part 1	Non-Discrimination	This section contains sample language Owners can insert into Article 11, Section 11.1 "Other Provisions" of any of the DBIA Agreement forms. Owners should check the applicable state law to determine whether the listed protected classifications are relevant for their state.
Part 2	Underutilized Business Goals	State and local laws vary widely with respect to the extent to which public owners can require Offerors to achieve Underutilized Business Goals. Owners should check with the legal requirements applicable to their procurement.

© 2023 Design-Build Institute of America

Section	Title	Instruction
	Use with DBIA Document No. 405	If Part 2 is included, changes must be made to DBIA Document No. 405, Standard Form of Request for Qualifications, to include the Underutilized Business Enterprise ("UBE") Goals in the Evaluation Criteria in Section 3.3.4 and to the submission requirements in the Standard Form RFP.
1.1	Checkbox 1: Certifying Agency	For Owners who want to require all UBEs to be certified by a specific agency, the first checkbox next to Section 1.1 should be checked, and Owner should designate the relevant agency. Sample language is provided in the Exhibit.
1.1	Checkbox 2: Self-Certification	For Owners who will allow self-certification, the second checkbox next to Section 1.1 should be checked, and Owner should specify the requirements of self-certification.
1.1.1 – 1.1.5	Business Categories	The Exhibit provides a sample list of types of UBEs and definitions for each. Owners should determine those businesses that it would like to include in Offeror's Inclusion Plan and list those businesses here.
Article 2	UBE Inclusion Plan	The Inclusion Plan is intended to be a separate attachment of Offeror's Proposal.
Article 3	UBE Goals	This Article has two options: Goals pre-established by Owner and goals proposed by Offeror. Only one of these checkboxes should be checked.
3.1	Owner-Established Goals	Goals set by Owner should be reasonably calculated such that they reflect realities in the marketplace for the specific scope and types of work presented by the project. This typically entails reviewing the scope of work and performing due diligence on the availability of UBEs to perform the type of work necessary to complete the project. For example, if a significant portion of the scope of the project is (or could be) expected to be prefabricated off-site, such as for a pedestrian bridge project over a busy roadway, Owner should investigate the availability of UBEs with the skill, experience and credentials necessary to fabricate necessary components and the general capacity of the UBE marketplace. Owners should be aware that mandates with respect to subcontract awards to UBE may not be enforceable or may even be prohibited in some jurisdictions. In certain circumstances, no amount of reasonable efforts will produce the desired results, such as where the mandatory goal exceeds the capacity of the UBE marketplace in the applicable jurisdiction. However, an obligation to make good faith efforts and to provide such reporting and analysis to Owner is more likely to be enforceable. These efforts and reporting requirements may be considered part of the scope of work of the project. Consideration should also be given to the certification requirements in determining whether a UBE qualifies against the goals. Owner's use of local certification regulators, national certification regulators or self-certification process may increase or decrease the market availability of potential UBE. However, use of self-certification processes may result in inaccurate certifications, UBEs not performing a commercially useful function or may result in Owner legal risk under applicable UBE regulations.
3.2	Offeror-Proposed Goals	This box should be checked if Owner wants Offeror to propose goals rather having Owner set the goals.
Table	UBE Percentages	The table is intended to be used for either Owner-provided or Offeror-proposed goals. In calculating the proposed goals, Owners and Offerors will need to clarify the calculation basis of the percentage. The DBIA recommends that the Owner identify separate goals for UBE percentages for design and construction services.
Article 4	Evaluation of Inclusion Plan	This section describes how the Inclusion Plan will be evaluated by Owner.

© 2023 Design-Build Institute of America

Section	Title	Instruction
4.2	Timing and Evaluation of Inclusion Plan	This section should be filled out by Owner to detail the timing associated with Offeror's reporting requirements for the Inclusion Plan goals and the timing of Owner's evaluation of the Plan and goals. Consideration should be given to the burden of requesting submitted reports and evaluation thereof. Monthly reporting and evaluations are recommended.

© 2023 Design-Build Institute of America

Part 1: Non-Discrimination Language

11.1 During the performance of Agreement, Design-Builder agrees as follows:

11.1.1 Design-Builder shall not discriminate against any employee or applicant for employment relating to this Project because of race, color, religious creed, sex, national origin, ancestry, age, physical or mental disability, sexual orientation, gender or gender identity unless related to a bona fide occupational qualification. Design-Builder shall take action to ensure that applicants are employed, and employees are treated during employment, without regard to their race, color, religion, sex, age, national origin, physical or mental disability, sexual orientation, gender or gender identity. Such action shall include but not be limited to the following: employment, upgrading, demotions or transfers; recruitment or recruitment advertising; layoffs or terminations; rates of pay or other forms of compensation; and selection for training including apprenticeship.

11.1.2 Design-Builder shall, in all solicitations or advertising for employees placed by or on behalf of Design-Builder relating to this Project, state that all qualified applicants shall receive consideration for employment without regard to race, color, religious creed, sex, national origin, ancestry, age, physical or mental disability, sexual orientation, gender or gender identity.

11.1.3 Design-Builder shall send to each labor union or representative of the workers with which it has a collective bargaining agreement, or other contract or understanding, whereby it is furnished with labor for the performance of the Work, a notice advising the said labor union or workers' representative of Design-Builder's commitment under this section.

11.1.4 Design-Builder shall cause the foregoing provisions to be inserted in any subcontract for any work covered by the Contract Documents so that such provisions shall be binding upon each Subcontractor and Design Consultant, with such modification of language as may be necessary to make them binding on such entity, provided that the foregoing provisions shall not apply to contracts or subcontracts for standard commercial supplies or raw materials.

11.1.5 This Agreement may be forthwith canceled, terminated or suspended, in whole or in part, by Owner upon a finding that Design-Builder has violated any provision in this Article.

©2023 Design-Build Institute of America

Part 2: UNDERUTILIZED BUSINESS ENTERPRISE PARTICIPATION REQUIREMENTS EXHIBIT

ARTICLE 1 DEFINITIONS

Owner is committed to encouraging the participation of Underutilized Business Enterprises (UBE) in its contracts. The following definitions apply to this Project:

1.1 A UBE includes any of the following businesses:
[Check the relevant box below.]:

☐ ***[Check this box if Owner will require UBEs to be certified by an agency such as the "Small Business Administration" or the "Office of Minority and Women Owned Enterprises." For example, "businesses that are certified by the Small Business Administration as small, disadvantaged, minority, women, or veteran owned." "businesses that are certified by the state Office of Minority and Women Owned Enterprises as minority, women, veteran, small, or disadvantaged businesses."]***

☐ ***[Check this box if Owner will accept self-certified businesses to achieve the UBE goals set forth in Article 3]*** Owner will evaluate and allow the Underutilized Business to self-certify that they comply with the definition of such a business under this Section 1 provided, however, Owner at its sole discretion may disallow such self-certification upon facts that present that the Underutilized Business does not actually qualify as such.

1.1.1 A Disabled Person Owned Business is one that is at least 51% owned by a Disabled Person.

1.1.2 A Minority Owned Business is one that is at least 51% minority owned.

1.1.3 A Woman Owned Business is one that is at least 51% woman owned.

1.1.4 A Veteran Owned Business is one that is at least 51% veteran owned.

1.1.5 A Small Business is one that qualifies under the federal Small Business Association standard for the relevant NAICS category.

1.2 A Commercially Useful Function means a function performed by a business enterprise that is responsible for the execution of a distinct element of the work and carrying out its responsibilities by performing, managing and supervising the work with its own resources and employees. Acting as a conduit to transfer funds to another business performing, managing or supervising the work does not typically constitute a Commercially Useful Function. Whether a business has performed a Commercially Useful Function is determined by many factors, including but not limited to the following:

i. The amount of work subcontracted to the Underutilized Business is consistent with normal industry practice;

ii. The amount paid to the Underutilized Business is commensurate with the work it is actually performing;

iii. Whether the Underutilized Business is merely a pass-through entity in order to obtain the appearance of participation;

iv. Whether the Underutilized Business manages its own work, owns or leases its own equipment, manages its own work force for installation, is responsible for supplying its own materials and supplies, and maintains responsibility for the performance of the Work;

©2023 Design-Build Institute of America

v. In the context of an Underutilized Business being a partner within a joint venture, that the Underutilized Business is providing resources and staff consistent with the stated percentage of the Underutilized Business's interest in such joint venture; and

vi. For materials and supplies, whether the Underutilized Business is responsible for negotiating the price, determining quality and quantity, ordering the materials and paying for the material itself.

ARTICLE 2 UBE INCLUSION PLAN

2.1 As a separate attachment, submit Offeror's UBE Inclusion Plan for this Project. The Inclusion Plan should reflect a thoughtful and relevant commitment to include UBEs in the design and construction for this Project. Work performed by an UBE must have a Commercially Useful Function. The Inclusion Plan should include the following elements and be detailed and specific to the Project.

i. Outreach strategies to identify UBEs capable of performing the work in the geographic region of the Project;

ii. Contracting strategies to remove barriers that allow UBEs to be able to subcontract for the Project, such as the use of joint ventures in partnering with non-UBEs;

iii. Business strategies to support UBEs in being successful on the project such as introductions to banks and/or bonding companies, design-build training and retainage;

iv. Training opportunities in supporting the successful performance of the work by the UBE;

v. Challenges and opportunities that Offeror will face in achieving its UBE Goals for the Project; and

vi. A description of Offeror's successful utilization of UBEs in previous projects. As part of this section, identify whether Offeror has been given a Deficiency Rating by Owner in a previous project with respect to UBE Goals.

2.2 Lower tier subcontractors and/or subconsultants may be used to satisfy Offeror's UBE Inclusion Goals.

ARTICLE 3 UBE INCLUSION GOALS

3.1 ☐ ***[For goals established by Owner:]*** Owner has established the following UBE Inclusion Goals. The Goals must be pursued in good faith, and Offeror must provide an Inclusion Plan that demonstrates achievable, reasonable efforts. UBEs may only be used once to satisfy a UBE Inclusion Goal and may not be listed in multiple categories.

3.2 ☐ ***[For goals proposed by Offerors:]*** As part of the UBE Inclusion Plan, please identify Offeror's aspirational UBE Inclusion Goals for the following categories. The Goals must be developed in good faith and must be achievable by reasonable efforts. UBEs may only be used once to satisfy a UBE Inclusion Goal and may not be listed in multiple categories.

©2023 Design-Build Institute of America

[The following is an example. Include those businesses that are listed in Article 1.]

	Design Professional Services	Construction Work
Estimated percentage of the base contract work to Disabled Person Owned Businesses	%	%
Estimated percentage of the base contract work to Minority Owned Businesses	%	%
Estimated percentage of the base contract work to Woman Owned Businesses	%	%
Estimated percentage of the base contract work to Veteran Owned Businesses	%	%
Estimated percentage of the base contract work to Small Businesses	%	%
Total estimated base contract work to UBEs	%	%

ARTICLE 4 Evaluation of UBE Inclusion Plan

4.1 The UBE Inclusion Plan will be evaluated on the basis of the reasonableness of the Goals, the extent of the good faith efforts for outreach, the viability of the contracting and business strategies, and the realistic evaluation of the challenges and opportunities presented by the UBE Inclusion Goals.

4.2 The successful Offeror will provide a written report to Owner detailing Offeror's success in meeting the UBE Inclusion Plan and Goals. Offeror will submit the report and updates to the report to Owner [*monthly, quarterly, specific date*]. Owner will evaluate the report and progress in meeting the UBE Inclusion Plan Goals [*monthly, quarterly*], but in no event later than the Date of Substantial Completion.

Design-Build Institute of America – Contract Documents
LICENSE AGREEMENT

By using the DBIA Contract Documents, you agree to and are bound by the terms of this License Agreement.

1. **License.** The Design-Build Institute of America ("DBIA") provides DBIA Contract Documents and licenses their use worldwide. You acknowledge that DBIA Contract Documents are protected by the copyright laws of the United States. You have a limited nonexclusive license to: (a) Use DBIA Contract Documents on any number of machines owned, leased, or rented by your company or organization; (b) Use DBIA Contract Documents in printed form for bona fide contract purposes; and (c) Copy DBIA Contract Documents into any machine-readable or printed form for backup or modification purposes in support of your permitted use.
2. **User Responsibility.** You assume sole responsibility for the selection of specific documents or portions thereof to achieve your intended results and for the installation, use, and results obtained from the DBIA Contract Documents. You acknowledge that you understand that the text of the DBIA Contract Documents has important legal consequences and that consultation with an attorney is recommended with respect to use or modification of the text. You will not represent that any of the contract documents you generate from DBIA Contract Documents are DBIA documents unless (a) the document text is used without alteration or (b) all additions and changes to, and deletions from, the text are clearly shown.
3. **Copies.** You may not use, copy, modify, or transfer DBIA Contract Documents, or any copy, modification, or merged portion, in whole or in part, except as expressly provided for in this license. Reproduction of DBIA Contract Documents in printed or machine-readable format for resale or educational purposes is expressly prohibited. You will reproduce and include DBIA's copyright notice on any printed or machine-readable copy, modification, or portion merged into another document or program.
4. **Transfers.** You may not transfer possession of any copy, modification, or merged portion of DBIA Contract Documents to another party, except that a party with whom you are contracting may receive and use such transferred material solely for purposes of its contract with you. You may not sublicense, assign, or transfer this license except as expressly provided in this Agreement, and any attempt to do so is void.
5. **Term.** The license is effective for one year from the date of purchase. DBIA may elect to terminate it earlier, by written notice to you, if you fail to comply with any term or condition of this Agreement.
6. **Limited Warranty.** DBIA warrants the electronic files or other media by which DBIA Contract Documents are furnished to be free from defects in materials and workmanship under normal use during the Term. There is no other warranty of any kind, expressed or implied, including, but not limited to the implied warranties of merchantability and fitness for a particular purpose. Some states do not allow the exclusion of implied warranties, so the above exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state. DBIA does not warrant that the DBIA Contract Documents will meet your requirements or that the operation of DBIA Contract Documents will be uninterrupted or error free.
7. **Limitations of Remedies.** DBIA's entire liability and your exclusive remedy shall be: the replacement of any document not meeting DBIA's "Limited Warranty" which is returned to DBIA with a copy of your receipt, or at DBIA's election, your money will be refunded. In no event will DBIA be liable to you for any damages, including any lost profits, lost savings, or other incidental or consequential damages arising out of the use or inability to use DBIA Contract Documents even if DBIA has been advised of the possibility of such damages, or for any claim by any other party. Some states do not allow the limitation or exclusion of liability for incidental or consequential damages, so the above limitation or exclusion may not apply to you.
8. **Acknowledgement.** You acknowledge that you have read this agreement, understand it, and agree to be bound by its terms and conditions, and that it will be governed by the laws of the District of Columbia. You further agree that it is the complete and exclusive statement of your agreement with DBIA which supersedes any proposal or prior agreement, oral or written, and any other communications between the parties relating to the subject matter of this agreement.

Sustainable Project Goals Exhibit

This document has important legal consequences. Consultation with an attorney is recommended with respect to its completion or modification and its relation to the other Contract Documents set forth in DBIA Document No. 525, *Standard Form of Agreement Between Owner and Design-Builder Lump - Sum* (2010 Edition) or DBIA Document No. 530, *Standard Form of Agreement Between Owner and Design-Builder - Cost Plus Fee with an Option for a Guaranteed Maximum Price* (2010 Edition).

PROJECT:
(Include Project name and location as it will appear in the Contract Documents)

Article 1

Project Goals

1.1 The Parties shall discuss prior to execution of the Design-Build Agreement the extent to which they will incorporate sustainable design elements, including whether LEED® Certification will be required, under the guidelines of the U.S. Green Building Council's (USGBC) LEED® Rating Systems. The Parties can either select one or both of the boxes below as they deem appropriate.

☐ It is the shared goal of the Parties to design and construct a Project that imposes a minimal negative impact on the environment while maximizing the health and comfort of the Project's users and occupants by exploring commercially available sustainable design products, technologies, and practices that can be incorporated into the Project. Accordingly, Design-Builder and Owner shall discuss with the Design Consultant, during the design phase, and incorporate into the Project, design and construction methods, materials and systems for an environmentally beneficial, cost effective, and resource efficient Project. This may include sustainable practices that impact the Project site, energy and water use, materials, indoor air quality, and maintenance, provided that the sustainable design elements and construction practices are consistent with the Contract Price and Project Schedule. In the event said sustainable design elements and practices are not included in the Basis of the Design Documents or the Contract Price and Project Schedule, Design-Builder will be entitled to a Change Order.

and/or

☐ Owner and Design-Builder agree that a shared goal is that the Project will achieve (1) the following sustainable rating system _____, or (2) the following level of LEED® certification under version _____ of the USGBC's

© 2010 Design-Build Institute of America

_____ [E.g., New Construction & Major Renovations, Core and Shell, Commercial Interiors, etc.] Rating System.

☐ Certified ☐ Gold

☐ Silver ☐ Platinum

1.2 The requisite credits to achieve the applicable LEED® certification will be set forth in the Basis of Design Documents if feasible. If it is not feasible to ascertain the achievable LEED® credits as part of the Basis of Design Documents, the Design-Builder and Owner will work together as part of the design development process described in Section 2.4 of the DBIA Document No. 535, *Standard Form of General Conditions of Contract Between Owner and Design-Builder* (2010 Edition) ("General Conditions of Contract") to identify the achievable LEED® credits. In the event said LEED® credits are not included in the Basis of Design Documents or the Contract Price and Project Schedule, Design-Builder will be entitled to a Change Order.

Article 2

Project Commissioning

2.1 The Parties agree that if LEED® certification is required, that an independent Commissioning Authority (CxA) shall be retained to lead, review, and oversee the completion of all commissioning process activities, including monitoring compliance with the Contract Documents and completing all necessary documentation for commissioning credits. The CxA shall be a LEED® Accredited Professional (LEED® AP) and meet the credit requirements of the applicable LEED® rating system. The CxA shall report results, findings and recommendations directly to the Owner, with a copy to the Design-Builder.

2.2 The CxA shall conduct, consistent with the review requirements of the LEED® rating system, the necessary commissioning design reviews of the Basis of Design Documents and design documents prior to completion of the Construction Documents, and back-check the review comments in subsequent design submissions. The CxA shall also review Design-Builder's submittals applicable to systems being commissioned for compliance with the Basis of Design Documents. This review shall be concurrent with Design Consultant's reviews and submitted to the Design-Builder and the Owner.

2.3 The CxA shall be retained by:

☐ Design-Builder, as part of the Contract Price;

☐ The Owner, as an independent consultant.

2.4 The CxA shall provide the following level of service:

☐ Fundamental Building Systems Commissioning

☐ Enhanced Commissioning

Article 3

Legal Requirements

3.1 The parties will discuss whether LEED® certification or other sustainable standards are required by law (Legal Requirements). The Owner shall be responsible to identify any such requirements applicable to the Project and the Design-Builder is entitled to rely on the Owner's representations without any independent verification.

3.2 The Design-Builder shall not be liable for any costs or delay due to changes in the law after establishment of the agreed Contract Price which increases the cost or time for completion of the Project due to sustainable requirements.

3.3 The Owner has identified the following Legal Requirements for the Project that relate to sustainable design:

(Insert here any ordinance, statute, executive order or other Legal Requirement; if nothing is inserted here, it is presumed that there are no applicable requirements.)

3.4 The Design-Builder acknowledges that as a matter of law the Project is obligated to satisfy or achieve the level of LEED® certification or other sustainable standards identified in the above-cited Legal Requirements. Owner recognizes that the ultimate decision to certify the Project under a LEED® Rating System and/or the satisfaction of other sustainable standards is dependent on a variety of circumstances, including the subjective determination of the USGBC and/or other interested organizations or entities. Therefore, Owner and Design-Builder pledge to each other to use best efforts to satisfy or achieve the level of LEED® certification or to satisfy the other sustainable standards indicated in the Basis of Design Documents or mandated by Legal Requirements.

Article 4

Remedies

4.1 In the event that the Project fails to satisfy or obtain such level of LEED® certification or other sustainable standards as identified or as required by the Legal Requirements, the parties agree to file a timely appeal to the USGBC, or other appropriate entity, of such action. The costs of such appeal shall be paid for by the Owner.

4.2 In the event that, after a timely appeal to the USGBC or other certifying organization, the Project fails to satisfy or obtain such level of LEED® certification or other sustainable standards as are identified in, or as required by the Legal Requirements, the parties agree as follows:

(check the appropriate box below)

☐ **Waiver.** In no event shall the failure of the Project to satisfy or obtain such level of LEED® certification or other sustainable standards be deemed a breach of contract, or otherwise actionable by the Owner, and any claims for failure of Design-Builder to satisfy or achieve LEED®

© 2010 Design-Build Institute of America

certification at any level or other sustainable standards are hereby waived by the Owner against Design-Builder.

or

☐ **Liquidated Damages.** Design-Builder has a contractual obligation to satisfy or achieve the level of LEED® certification indicated above and/or to satisfy or achieve other sustainable standards as are identified, or as required by the Legal Requirements, provided the Owner has fully satisfied its obligations in relation thereto. In the event such level of LEED® certification or other sustainable standards are not satisfied or achieved, subject to a timely filed appeal, and provided the Owner has fully performed its obligations in relation thereto, Design-Builder agrees to pay the Owner the following amount not by way of penalty, but as liquidated damages, the sum of _____ Dollars ($_____). Design-Builder shall not be liable for any other related damages including, but not limited to consequential damages as identified in the General Conditions of Contract.

or

☐ **Limited Obligation to Cure.** Design-Builder has an obligation to cure the situation through the addition, replacement or correction of materials, configurations, systems or equipments in order to obtain the level of LEED® certification indicated above and/or to satisfy or achieve other sustainable standards as are identified, or as required by the Legal Requirements, provided the Owner has fully satisfied its obligations in relation thereto. However, Design-Builder's obligation is limited to:

☐ Design-Builder's remaining contingency (if a GMP contract);

☐ Design-Builder's share of the savings (if a GMP contract); or,

☐ The sum of _____ Dollars ($_____).

Article 5

Experimental Products, Design or Systems

5.1 In order to achieve the desired LEED® level of certification or other similar rating, the Design-Builder or its Design Consultant has recommended the use of the products, materials or building systems (hereafter "Sustainable Product") identified on the attached **Exhibit 1**. The Design-Builder has disclosed to the Owner that it has limited or no prior professional experience with such Sustainable Product in actual construction. However, the Design-Builder and its Design Consultant have reviewed technical literature on the Sustainable Product and, if the Sustainable Product performs as represented by the manufacturer, the Design-Builder believes that it will meet the Owner's requirements and help achieve the desired LEED® certification or other similar rating.

5.2 The Design-Builder has advised the Owner of the risks and benefits of such Sustainable Product, and that the proposed use of such Sustainable Product is untested with this Design-Builder and, therefore, experimental. The Design-Builder and Owner have discussed alternative methods, products, materials or building systems, and the Owner desires, nonetheless, to use the Sustainable Product identified in **Exhibit 1**.

5.3 Given all this information, and with full knowledge of the risks and rewards, the Owner consents to the Design-Builder's inclusion of the Sustainable Product identified in **Exhibit 1** in the Project design. The Owner understands that the Design-Builder does not warrant the performance of the Sustainable

© 2010 Design-Build Institute of America

Product and, in the event the Owner is not satisfied with the performance of the same, the Owner shall look solely to the manufacturer, supplier or installer of the same, and waives any claim against the Design-Builder and its Design Consultant that result from the Owner's selection of the Sustainable Product for use on this Project.

Article 6

Miscellaneous

6.1 The registration, certification, credit interpretation ruling and any other fees charged by the USGBC, The Green Building Certification Institute or other similar organizations shall be paid by the Owner, directly to such organizations, and shall not be an obligation of the Design-Builder, nor included in the Contract Price unless otherwise agreed in writing.

6.2 In no event shall the dates of Substantial Completion or Final Completion be contingent on any certification of the Project to meet any level of the USGBC's LEED® rating system or other similar system.

Attachment 7: HUD GENERAL PROVISIONS AND OTHER FEDERAL STATUES, REGULATIONS, AND PRDOH REQUIREMENTS OF HEALTHCARE STRENGTHENING SET-ASIDE

These terms and conditions must be included in their entirety by the CONTRACTOR and SUBCONTRACTOR in all purchase orders or subcontracts that are directly related to the contract, even though some of the terms and conditions might not apply to a particular kind of purchase order or subcontract.

PROVISIONS REQUIRED BY LAW DEEMED INSERTED

If, by mistake or for any other reason, any of the provisions are not included, or are not included correctly, then, at the request of either party, the contract will be amended immediately to make such inclusion or correction.

STATUTORY AND REGULATORY COMPLIANCE

The CONTRACTOR shall comply with all laws and regulations applicable to the Community Development Block Grant-Disaster Recovery funds appropriated by the Supplemental Appropriations for Disaster Relief Requirements, 2017 (Pub. L. 115-56), approved September 8, 2017 (Appropriations Act), as amended, including but not limited to the applicable Office of Management and Budget Circulars, which may impact the administration of funds and/or set forth certain cost principles, including if certain expenses are allowed.

BREACH OF CONTRACTOR AGREEMENT TERMS

The Puerto Rico Medical Services (ASEM) and/or Puerto Rico Department of Housing (PRDOH) reserves its right to all administrative, contractual, or legal remedies, including but not limited to suspension or termination of the contract, in instances where the CONTRACTOR or any of its subcontractors violate or breach any contract term. If the CONTRACTOR or any of its subcontractors violate or breach any contract term, they shall be subject to such sanctions and penalties as may be appropriate. The duties and obligations imposed by the contract documents, and the rights and remedies available thereunder, shall be in addition to and not a limitation of any duties, obligations, rights and remedies otherwise imposed or available by law.

Attachment 7: HUD GENERAL PROVISIONS AND OTHER FEDERAL STATUES, REGULATIONS, AND PRDOH REQUIREMENTS OF HEALTHCARE STRENGTHENING SET-ASIDE

SMALL AND MINORITY FIRMS, WOMEN'S BUSINESS ENTERPRISES, VETERNAN'S BUSINESS ENTERPRISES, AND LABOR SURPLUS AREA FIRMS

The CONTRACTOR will take necessary affirmative steps to assure that minority firms, women's business enterprises, veteran's business enterprises, and labor surplus area firms are used in subcontracting when possible. Steps include, but are not limited to:

- Placing qualified small and minority businesses, women's business enterprises, and veteran's business enterprises on solicitation lists;

- Assuring that small and minority businesses, women's business enterprises, and veteran's business enterprises are solicited whenever they are potential sources;

- Dividing total requirements. when economically feasible, into smaller tasks or quantities to permit maximum participation by small and minority businesses, women's business enterprises, and veteran's business enterprises;

- Establishing delivery schedules, where the requirement permits, which encourage participation by small and minority businesses, women's business enterprises; and veteran's business enterprises; and

- Using the services and assistance of the Small Business Administration, and the Minority Business Development Agency of the Department of Commerce.

Additionally, for contracts of $10,000 or more, the CONTRACTOR shall file Form HUD 2516 (Contract and Subcontract Activity) with the ASEM and/or PRDOH on a quarterly basis.

RIGHTS TO INVENTIONS MADE UNDER A CONTRACT OR AGREEMENT

Contracts or agreements for the performance of experimental, developmental, or research work shall provide for the rights of the Federal Government and the recipient in any resulting invention in accordance with 37 C.F.R. Part 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms under Government Grants, Contracts and Cooperative Agreements", and any implementing regulations issued by HUD.

DEBARMENT, SUSPENSION, AND INELIGIBILITY

The CONTRACTOR represents and warrants that it and its subcontractors are not debarred or suspended or otherwise excluded from or ineligible for participation in Federal assistance programs subject to 2 C.F.R. Part 2424.

Attachment 7: HUD GENERAL PROVISIONS AND OTHER FEDERAL STATUES, REGULATIONS, AND PRDOH REQUIREMENTS OF HEALTHCARE STRENGTHENING SET-ASIDE

REPORTING REQUIREMENTS

The CONTRACTOR shall complete and submit all reports, in such form and according to such schedule, as may be required by the ASEM and/or PRDOH and/or the Government of Puerto Rico. The CONTRACTOR shall cooperate with all the ASEM and/or PRDOH and/or the Government of Puerto Rico efforts to comply with HUD requirements and regulations pertaining to reporting, including but not limited to 2 C.F.R. § 200.328 and 24 C.F.R. § 570.507, when applicable.

CONFLICTS OF INTEREST

The CONTRACTOR shall notify the ASEM and/or PRDOH as soon as possible if the contract or any aspect related to the anticipated work under the contract raises an actual or potential conflict of interest, if applicable. The CONTRACTOR shall explain the actual or potential conflict in writing in sufficient detail so that the ASEM and/or PRDOH are able to assess such actual or potential conflict. The CONTRACTOR shall provide the ASEM and/or PRDOH any additional information necessary to fully assess and address such actual or potential conflict of interest. The CONTRACTOR shall accept any reasonable conflict mitigation strategy employed by the ASEM and/or PRDOH, including but not limited to the use of an independent subcontractor(s) to perform the portion of work that gives rise to the actual or potential conflict.

SUBCONTRACTING

When subcontracting, the CONTRACTOR shall solicit for and contract with such subcontractors in a manner providing for fair competition. Some of the situations considered to be restrictive to competition include, but are not limited to:
Placing unreasonable requirements on firms for them to qualify to do business:

- Requiring unnecessary experience and excessive bonding;
- Noncompetitive pricing practices between firms or between affiliated Companies;
- Noncompetitive awards to consultants that are on retainer contracts,
- Organizational conflicts of interest;
- Specifying only a brand name product instead of allowing an equal product to be offered and describing the performance of other relevant requirements of the procurement; and
- Any arbitrary action in the procurement process.

Attachment 7: HUD GENERAL PROVISIONS AND OTHER FEDERAL STATUES, REGULATIONS, AND PRDOH REQUIREMENTS OF HEALTHCARE STRENGTHENING SET-ASIDE

The CONTRACTOR represents to the ASEM and/or PRDOH that all work shall be performed by personnel experienced in the appropriate and applicable profession and areas of expertise, considering the nature of the work to be performed under the contract.

The CONTRACTOR will include these HUD General Provisions in every subcontract issued by it, so that such provisions will be binding upon each of its subcontractors as well as the requirement to flow down such terms to all lower-tiered subcontractors.

ASSIGNABILITY

The CONTRACTOR shall not assign any interest in the contract and shall not transfer any interest in the same (whether by assignment or novation) without prior written approval of the ASEM and/or PRDOH.

COPELAND "ANTI-KICKBACK" ACT

(Applicable to all construction or repair contracts)

Salaries of personnel performing work under the contract shall be paid unconditionally and not less often than once a month without payroll deduction or rebate on any account except only such payroll deductions as are mandatory by law or permitted by the applicable regulations issued by the Secretary of Labor pursuant to the Copeland "Anti-Kickback Act" of 1934, 48 Stat. 948; (codified at 18 U.S.C. § 874; and 40 U.S.C. § 3145). The CONTRACTOR shall comply with all applicable "Anti-Kickback" regulations and shall insert appropriate provisions in all subcontracts covering work under the contract to ensure compliance by subcontractors with such regulations and shall be responsible for the submission of affidavits required of subcontractors thereunder except as the Secretary of Labor may specifically provide for variations of or exemptions from the requirements thereof.

CONTRACT WORK HOURS AND SAFETY STANDARDS ACT

(Applicable to construction contracts exceeding $2,000 and contracts exceeding $2,500 that involves the employment of mechanics or laborers.)

The CONTRACTOR shall comply with Sections 103 and 107 of the Contract Work Hours and Safety Standards Act (40 U.S.C. §§ 3701-3708) as supplemented by Department of Labor regulations (29 C.F.R. Part 5).

All laborers and mechanics employed by CONTRACTOR or subcontractors shall receive overtime compensation in accordance with and subject to the provisions of the CWHSSA, and the CONTRACTOR and subcontractors shall comply with all regulations issued pursuant to that act and with other applicable Federal laws and regulations pertaining to labor standards.

Attachment 7: HUD GENERAL PROVISIONS AND OTHER FEDERAL STATUES, REGULATIONS, AND PRDOH REQUIREMENTS OF HEALTHCARE STRENGTHENING SET-ASIDE

DAVIS-BACON ACT

(Applicable to construction contracts exceeding $2,000 when required by Federal program legislation.)

The CONTRACTOR shall comply with the Davis Bacon Act (40 U.S.C. § 3141 et seq.) as supplemented by Department of Labor regulations (29 C.F.R. Part 5).

All laborers and mechanics employed by CONTRACTOR or subcontractors, including employees of other governments, on construction work assisted under the contract and subject to the provisions of the federal acts and regulations listed in this paragraph, shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis Bacon Act.

On a semi-annual basis, the CONTRACTOR shall submit Form HUD 4710 (Semi-Annual labor Standards Enforcement Report) to ASEM and/or PRDOH.

TERMINATION FOR CAUSE

(Applicable to contracts exceeding $10,000)

If, through any cause, the CONTRACTOR shall fail to fulfill in a timely and proper manner his or her obligations under the contract or if the CONTRACTOR shall violate any of the covenants, agreements, or stipulations of the contract, the ASEM and/or PRDOH shall thereupon have the right to terminate the contract by giving written notice to the CONTRACTOR of such termination and specifying the effective date thereof, at least five (5) days before the effective date of such termination. In such event, all finished or unfinished documents, data, studies, surveys, drawings, maps, models, photographs, and reports prepared by the CONTRACTOR under the contract shall, at the option of the ASEM and/or PRDOH, become the ASEM and/or PRDOH property and the CONTRACTOR shall be entitled to receive just and equitable compensation for any work satisfactorily completed hereunder. Notwithstanding the above, the CONTRACTOR shall not be relieved of liability to the Government of Puerto Rico, PRDOH, and ASEM for damages sustained by the Government of Puerto Rico and/or PRDOH and/or ASEM by virtue of any breach of the contract by the CONTRACTOR, and the Government of Puerto Rico and/or PRDOH and/or ASEM may withhold any payments to the CONTRACTOR for the purpose of set-off until such time as the exact amount of damages due to the Government of Puerto Rico and/or PRDOH and/or ASEM from the CONTRACTOR is determined.

Attachment 7: HUD GENERAL PROVISIONS AND OTHER FEDERAL STATUES, REGULATIONS, AND PRDOH REQUIREMENTS OF HEALTHCARE STRENGTHENING SET-ASIDE

TERMINATION FOR CONVENIENCE

(Applicable to contracts exceeding $10,000)

The ASEM and/or PRDOH may terminate the contract at any time by giving at least a ten (10) days' notice in writing to the CONTRACTOR, If the contract is terminated by the ASEM and/or PRDOH as provided herein, the CONTRACTOR will be paid for the time provided and expenses incurred up to the termination date.

SECTION 503 OF THE REHABILITATION ACT OF 1973

(Applicable to contracts exceeding $10,000)

The CONTRACTOR shall comply with Section 503 of the Rehabilitation Act of 1973 (29 U.S.C. § 793), as amended, and any applicable regulations, Equal Opportunity for Workers with Disabilities:

- The CONTRACTOR will not discriminate against any employee or applicant for employment because of physical or mental disability regarding any position for which the employee or applicant for employment is qualified. The CONTRACTOR agrees to take affirmative action to employ, advance in employment and otherwise treat qualified individuals with disabilities without discrimination based on their physical or mental disability in all employment practices, including the following:

    - Recruitment, advertising, and job application procedures;
    - Hiring, upgrading, promotion, award of tenure, demotion, transfer, layoff, termination, right of return from layoff and rehiring;
    - Rates of pay or any other form of compensation and changes in compensation;
    - Job assignments, job classifications, organizational structures, position descriptions, lines of progression, and seniority lists;
    - Leaves of absence, sick leave, or any other leave;
    - Fringe benefits available by virtue of employment, whether or not administered by the CONTRACTOR;
    - Selection and financial support for training, including apprenticeship, professional meetings, conferences, and other related activities, and selection for leaves of absence to pursue training;
    - Activities sponsored by the CONTRACTOR, including social or recreational programs; and
    - Any other term, condition, or privilege of employment.

- The CONTRACTOR agrees to comply with the rules, regulations, and relevant

orders of the Secretary of Labor issued pursuant to the Act.

- In the event of the CONTRACTOR 's noncompliance with the requirements of this clause, actions for noncompliance may be taken in accordance with the rules, regulations, and relevant orders of the Secretary of Labor issued pursuant to the Act.

- The CONTRACTOR agrees to post in conspicuous places, available to employees and applicants for employment, notices in a form to be prescribed by the Deputy Assistant Secretary for Federal Contract Compliance Programs, provided by or through the contracting officer. Such notices state the rights of applicants and employees as well as the CONTRACTOR 's obligation under the law to take affirmative action to employ and advance in employment qualified employees and applicants with disabilities. The CONTRACTOR must ensure that applicants and employees with disabilities are informed of the contents of the notice (e.g., the CONTRACTOR may have the notice read to a visually disabled individual or may lower the posted notice so that it might be read by a person in a wheelchair).

- The CONTRACTOR will notify each labor organization or representative of workers with which it has a collective bargaining agreement or other contract understanding, that the CONTRACTOR is bound by the terms of Section 503 of the Rehabilitation Act of 1973, as amended, and is committed to take affirmative action to employ and advance in employment individuals with physical or mental disabilities.

- The CONTRACTOR will include the provisions of this clause in every subcontract or purchase order in excess of $10,000, unless exempted by the rules, regulations, or orders of the Secretary issued pursuant to Section 503 of the Rehabilitation Act of 1973, as amended, as amended, so that such provisions will be binding upon each subcontractor or vendor. The CONTRACTOR will take such action with respect to any subcontract or purchase order as the Deputy Assistant Secretary for Federal Contract Compliance Programs may direct to enforce such provisions, including action for noncompliance.

EQUAL EMPLOYMENT OPPORTUNITY
(Applicable to construction contracts and subcontracts exceeding $10,000)
The CONTRACTOR shall comply with Executive Order 11246 of September 24, 1965, entitled "Equal Employment Opportunity," as amended by Executive Order 11375 of

October 13, 1967, and as supplemented by Department of Labor regulations [41 C.F.R. Subpt. B, Ch. 60).

During the performance of the contract, the CONTRACTOR agrees as follows:

- The CONTRACTOR shall not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The CONTRACTOR shall take affirmative action to ensure that applicants for employment are employed, and that employees are treated during employment, without regard to their race, color, religion, sex, or national origin. Such action shall include, but not be limited to, the following: employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship.

- The CONTRACTOR shall post in conspicuous places available to employees and applicants for employment, notices to be provided by Contracting Officer setting forth the provisions of this non-discrimination clause. The CONTRACTOR shall state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.

- The CONTRACTOR will, in all solicitations or advertisements for employees placed by or on behalf of the CONTRACTOR, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex or national origin.

The CONTRACTOR will send to each labor union or representative of workers with which he or she has a collective bargaining agreement or other contract or understanding, a notice, to be provided by the agency contracting officer, advising the labor union or workers representative of the CONTRACTOR's commitments under Section 202 of Executive Order 11246 of September 24, 1965, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

The CONTRACTOR will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations and relevant orders of the Secretary of Labor.

The CONTRACTOR will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by the rules, regulations and orders of the Secretary of Labor, or pursuant thereto, and will permit access to books, records and accounts by the

contracting agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations and orders.

In the event of the CONTRACTOR 's non-compliance with the non-discrimination clause of the contract or with any of such rules, regulations or orders, the contract may be cancelled, terminated or suspended in whole or in part and the CONTRACTOR may be declared ineligible for further government contracts in accordance with procedures authorized in Executive Order 11246 and such other sanctions as may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation or order of the Secretary of Labor, or as otherwise provided by law.

The CONTRACTOR shall incorporate the provisions above in every subcontract or purchase order unless exempted by rules, regulations or orders of the Secretary of Labor so that such provisions shall be binding on such subcontractors. The CONTRACTOR will take such action with respect to any subcontract or purchase order as the contracting agency may direct as a means of enforcing such provisions including sanctions for non-compliance, provided, however, that in the event the CONTRACTOR becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the contracting agency, the CONTRACTOR may request the United States to enter into such litigation to protect the interests of the United States.

CERTIFICATION OF NONSEGREGATED FACILITIES

(Applicable to construction contracts exceeding $10,000)

The CONTRACTOR certifies that it does not maintain or provide for its establishments, and that it does not permit employees to perform their services at any location under its control, where segregated facilities are maintained. It certifies further that it will not maintain or provide for employees any segregated facilities at any of its establishments, and it will not permit employees to perform their services at any location under its control where segregated facilities are maintained. The CONTRACTOR agrees that a breach of this certification is a violation of the equal opportunity clause of the contract.

As used in this certification, the term "segregated facilities" means any waiting rooms, work areas, rest rooms and wash rooms, restaurants and other eating areas, time clocks, locker rooms, and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation and housing facilities provided for employees which are segregated by explicit directive or are, in fact, segregated on the basis of race, color, religion, or national origin because of habit, local custom, or any other reason.

The CONTRACTOR further agrees that (except where it has obtained for specific time periods) it will obtain identical certification from proposed subcontractors prior to the award of subcontracts exceeding $10,000 which are not exempt from the provisions of the equal opportunity clause; that it will retain such certifications in its files; and that it will forward the preceding notice to such proposed subcontractors (except where proposed subcontractors hove submitted identical certifications for specific time periods).

CERTIFICATION OF COMPLIANCE WITH CLEAN AIR AND WATER ACTS
(Applicable to contracts exceeding $100,000)
The CONTRACTOR and all subcontractors shall comply with the requirements of the Cleon Air Act, as amended, 42 U.S.C. § 7401 et seq., the Federal Water Pollution Control Act, as amended, 33 U.S.C. § 1251 et seq., and the regulations of the Environmental Protection Agency with respect thereto, at 40 C.F.R. Ch. I, Subch. C, Pt. 60, Subpt. B and Ch. I, Subch. C, Pt. 93, Subpt. B, as amended, Section 508 of the Federal Water Pollution Control Act (33 U.S.C. § 1368) and Executive Order 11738 of September 10, 1973.

In addition to the foregoing requirements, all nonexempt contractors and subcontractors shall furnish to the owner, the following:

A stipulation by the CONTRACTOR or subcontractors, that any facility to be utilized in the performance of any nonexempt contract or subcontract, is not listed on the Excluded Porty Listing System pursuant to Ch. I, Subch. C, PL 93, Subpt, B or on the List of Violating Facilities issued by the Environmental Protection Agency (EPA) pursuant to 40 CFR. Ch. I, Subch. C, PL 60, Subpt, B, as amended.

Contract by the CONTRACTOR to comply with all the requirements of Section 114 of the Cleon Air Act, as amended, (42 USC§ 7414) and Section 308 of the Federal Water Pollution Control Act, as amended, (33 U.S.C § 1318) relating to inspection, monitoring, entry, reports and information, as well as all other requirements specified in said Section 114 and Section 308, and all regulations and guidelines issued thereunder.

A stipulation that as a condition for the award of the contract, prompt notice will be given of any notification received from the Director, Office of Federal Activities, EPA, indicating that a facility utilized, or to be utilized for the Agreement, is under consideration to be listed on the Excluded Party Listing System or the EPA List of Violating Facilities.

Agreement by the CONTRACTOR that he or she will include, or cause to be included, the criteria and requirements of this section in every nonexempt subcontract and requiring

that the CONTRACTOR will take such action as the government may direct as a means of enforcing such provisions.

ANTI-LOBBYING

(Applicable to contracts exceeding $100,000)

By the execution of the contract, the CONTRACTOR certifies, to the best of his or her knowledge and belief, that:

- No Federal appropriated funds have been paid or will be paid, by or on behalf of the CONTRACTOR, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, on officer or employee of Congress, or on employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loon, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loon, or cooperative agreement.

- If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the CONTRACTOR shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying", in accordance with its instructions.

- The CONTRACTOR shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, contracts under grants, loans, and cooperative agreements) and that all CONTRACTORs shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a CONTRACTOR Agreement Between the Puerto Rico Medical Services Administration.

For the Infrastructure Mitigation Program - Healthcare Strengthening Set-Aside under CDBG-MIT prerequisite for making or entering this transaction imposed by 31 U.S.C. § 1352. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

Attachment 7: HUD GENERAL PROVISIONS AND OTHER FEDERAL STATUES, REGULATIONS, AND PRDOH REQUIREMENTS OF HEALTHCARE STRENGTHENING SET-ASIDE

BONDING REQUIREMENTS
(Applicable to construction and facility improvement contracts exceeding $100,000)

The CONTRACTOR shall comply with 2 C.F.R. § 200.326 minimum bonding requirements: A bid guarantee from each bidder is equivalent to five percent (5%) of the bid price. The "bid guarantee" shall consist of a firm commitment such as a bid bond, certified check, or other negotiable instrument accompanying a bid as assurance that the bidder will, upon acceptance of his or her bid, execute such contractual documents as may be required within the time specified.

A performance bond on the part of the CONTRACTOR for one hundred percent (100%) of the Agreement price. A "performance bond" is one executed in connection with a contract to secure fulfillment of all the CONTRACTOR's obligations under such contract.

A payment bond on the part of the CONTRACTOR for one hundred percent (100%) of the Agreement price. A "payment bond" is one executed in connection with a contract to ensure payment as required by law of all persons supplying labor and material in the execution of the work provided for in the contract.

SECTION 3 OF THE HOUSING AND URBAN DEVELOPMENT ACT OF 1968
The work to be performed under the contract is subject to the requirements of Section 3 of the Housing and Urban Development Act of 1968, as amended, 12 U.S.C. § 1701u (Section 3). The purpose of Section 3 is to ensure that employment and other economic opportunities generated by HUD assistance or HUD-assisted projects covered by Section 3, shall, to the greatest extent feasible, be directed to low- and very low-income persons, particularly persons who are recipients of HUD assistance for housing.

The CONTRACTOR agree to comply with HUD's regulations in 24 C.F.R. Part 75, which implement Section 3. As evidenced by their execution of the contract, the parties to the contract certify that they are under no contractual or other impediment that would prevent them from complying with the in 24 C.F.R. Part 75 regulations.

The CONTRACTOR agrees to send to each labor organization or representative of workers with which the CONTRACTOR has a collective bargaining agreement or other understanding, if any, a notice advising the labor organization or workers' representative of the CONTRACTOR 's commitments under this Section 3 clause and will post copies of the notice in conspicuous places at the work site where both employees and applicants for training and employment positions can see the notice. The notice shall describe the

Section 3 preference, shall set forth minimum number and job titles subject to hire, availability of apprenticeship and training positions, the qualifications for each; and the name and location of the person(s) taking applications for each of the positions; and the anticipated date the work shall begin.

The CONTRACTOR agrees to include this Section 3 clause in every subcontract subject to compliance with regulations in 24 C.F.R. Part 75, and agrees to take appropriate action, as provided in an applicable provision of the subcontract or in this Section 3 clause, upon a finding that the subcontractor is in violation of the regulations in 24 C.F.R. Part 75. The CONTRACTOR will not subcontract with any subcontractor where the CONTRACTOR has notice or knowledge that the subcontractor has been found in violation of the regulations in 24 C.F.R. Part 75.

The CONTRACTOR acknowledges that CONTRACTORs, contractors, and subcontractors are required to meet the employment, training, and contracting requirements of 24 C.F.R. 75.19, regardless of whether Section 3 language is included in recipient or CONTRACTOR agreements, program regulatory agreements. or contracts signed after the contract.

The CONTRACTOR will certify that any vacant employment positions, including training positions, that are filled: (I) after the CONTRACTOR is selected but before the Agreement is executed, and (2) with persons other than those to whom the regulations of 24 C.F.R. Part 75 require employment opportunities to be directed, were not filled to circumvent the CONTRACTOR 's obligations under 24 C.F.R. Part 75.

Noncompliance with HUD's regulations in 24 C.F.R. Part 75 may result in sanctions, termination of the contract for default, and debarment or suspension from future HUD assisted contracts.

With respect to work performed in connection with Section 3 covered Indian housing assistance, Section 7(b) of the Indian Self-Determination and Education Assistance Act (46 U.S.C. § 5307) also applies to the work to be performed under the contract. Section 7(b) requires that to the greatest extent feasible: (i) preference and opportunities for training and employment shall be given to Indians, and (ii) preference in the award of contracts and subcontracts shall be given to Indian organizations and Indian-owned Economic Enterprises. Parties to the contract that are subject to the provisions of Section 3 and Section 7(b) agree to comply with Section 3 to the maximum extent feasible, but not in derogation of compliance with Section 7(b).

Attachment 7: HUD GENERAL PROVISIONS AND OTHER FEDERAL STATUES, REGULATIONS, AND PRDOH REQUIREMENTS OF HEALTHCARE STRENGTHENING SET-ASIDE

The CONTRACTOR agrees to submit, and shall require its subcontractors to submit to them, quarterly reports to the ASEM and/or PRDOH detailing the total number of labor hours worked on the Section 3 Project, the total number of labor hours worked by Section 3 Workers, and the total number of hours worked by Targeted Section 3 Workers, and any affirmative efforts made during the quarter to direct hiring efforts to low- and very low-income persons, particularly persons who are Section 3 Workers and Targeted Section 3 Workers.

UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES ACT (URA)

Every project funded in part or in full by Community Development Block Grant - Disaster Recovery (CDBG-DR/MIT) funds, and all activities related to that project, are subject to the provisions of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (URA), as amended, 42 U.S.C. § 4601 et seq., and section 104(d) of the Housing and Community Development Act of 1992, as amended (HCDA), 42 U.S.C. § 5304(d), except where waivers or alternative requirements have been provided by the U.S. Department of Housing and Urban Development (HUD).

The implementing regulations for URA are at 49 C.F.R. Part 24, and the regulations for section 104(d) are at 24 C.F.R. Part 42, subpart C. Additionally, HUD has established regulations specific to CDBG-funded housing activities at 24 C.F.R. § 570.606. ASEM and/or PRDOH has also established the Uniform Relocation Assistance Guide & Residential Ant Displacement and Relocation Assistance Plan (URA & ADP Guide) which provides guidance and requirements regarding URA compliance and minimizing displacement that are applicable to all CDBG-DR/MIT programs. The primary purpose of these laws and regulations is to provide uniform. fair, and equitable treatment of persons whose real property is acquired or who are displaced in connection with federally funded projects.

When CDBG-DR/MIT funds are planned, intended, or used for any activity or phase of a project and the phases are interdependent, URA applies to that activity or project. This includes any property acquisition, even if CDBG-DR/MIT funds are not used to fund the purchase, if the contract to acquire property is executed with the intention of seeking CDBG-DR/MIT funds to complete the project or an interdependent phase of the project. ASEM is responsible for ensuring URA compliance throughout the design proposal. and implementation of any project that includes real property acquisition or displacement of residential or business occupants.

Attachment 7: HUD GENERAL PROVISIONS AND OTHER FEDERAL STATUES, REGULATIONS, AND PRDOH REQUIREMENTS OF HEALTHCARE STRENGTHENING SET-ASIDE

FAIR HOUSING ACT

CONTRACTOR shall comply with the provisions of the Fair Housing Act of 1968, as amended. The Act prohibits discrimination in the sale or rental of housing. the financing of housing or the provision of brokerage services against any person on the basis of race, color. religion, sex, national origin, disability, or familial status. The Equal Opportunity in Housing Act prohibits discrimination against individuals on the basis of race. color, religion, sex or national origin in the sale, rental, leasing or other disposition of residential property, or in the use or occupancy of housing assisted with Federal funds.

ENERGY POLICY AND CONSERVATION ACT

CONTRACTOR shall comply with mandatory standards and policies relating to energy efficiency as contained in the Government of Puerto Rico's energy conservation plan, issued in compliance with the Energy Policy and Conservation Act (42 U.S.C. 6201 et seq).

POLITICAL ACTIVITY

The CONTRACTOR agrees to comply with mandatory standards and policies relating to Hatch Political Activity Act (Hatch Act), 5 U.S.C. §§ 1501-1508, which limits the political activity of employees.

The CONTRACTOR shall comply with the Hatch Act and shall ensure that no funds provided, nor personnel employed under the contract, shall be in any way or to any extent engaged in the conduct of political activities in violation of the Hatch Act, 5 U.S.C. §§ 1501-1508.

The Hatch Act applies to political activities of certain state and local employees. As a CONTRACTOR, you may participate in any of the following activities be a candidate in nonpartisan elections; attend political meetings and conventions: contribute money; campaign in partisan elections; and hold office in political parties.

The CONTRACTOR may not do the following activities be a candidate in partisan elections; use official influence to interfere in elections; coerce political contributions from subordinates in support of political parties or candidates the office of special counsel operates a website that provides guidance concerning hatch act issues.

HEALTH AND SAFETY STANDARDS

All parties participating in this project agree to comply with Sections 3702 and 3704 (a) of the Contract Work Hours and Safety Standards Act (CWHSSA). 40 U.S.C. §§ 3702 and 3704. Section 3704 (a) of the Act is applicable to construction work and provides that no laborer or mechanic shall be required to work in surroundings or under working

conditions, which are unsanitary, hazardous, or dangerous to his or her health and safety as determined under construction, safety, and health standards promulgated by the Secretary of Labor. These requirements do not apply to a contract to acquire a commercial product (as defined in 41 U.S.C. § 103) or a commercial service (as defined in 41 U.S.C. § 103a).

PERSONNEL

The CONTRACTOR represents that it has, or will secure at its own expense, all personnel required in performing the services under the contract. Such personnel shall not be employees of, or have any contractual relationship with, the contracting party. All the services required hereunder will be performed by the CONTRACTOR or under its supervision, and all personnel engaged in the work shall be fully qualified and shall be authorized or permitted under State and local law to perform such services. No person who is serving sentence in a penal or correctional institution shall be employed on work under the contract.

WITHHOLDING OF WAGES

If in the performance of the contract, there is any underpayment of wages by the CONTRACTOR or by any subcontractor thereunder, the ASEM and/or PRDOH may withhold from the CONTRACTOR out of payment due to him or her an amount sufficient to pay to employees underpaid the difference between the wages required thereby to be paid and the wages actually paid such employees for the total number of hours worked. The amounts withheld may be disbursed by the ASEM and/or PRDOH for and on account of the CONTRACTOR or subcontractor to the respective employees to whom they are due.

CLAIMS AND DISPUTES PERTAINING TO WAGE RATES

Claims and disputes pertaining to wage rates or to classifications of professional staff or technicians performing work under the contract shall be promptly reported in writing by the CONTRACTOR to the ASEM and/or PRDOH for the latter's decision, which shall be final with respect thereto.

DISCRIMINATION BECAUSE OF CERTAIN LABOR MATTERS

No person employed on the services covered by the contract shall be discharged or in any way discriminated against because he or she has filed any complaint or instituted or caused to be instituted any proceeding or has testified or/is about to testify in any proceeding under or relating to the labor standards applicable hereunder to his or her employer.

Attachment 7: HUD GENERAL PROVISIONS AND OTHER FEDERAL STATUES, REGULATIONS, AND PRDOH REQUIREMENTS OF HEALTHCARE STRENGTHENING SET-ASIDE

INTEREST OF MEMBERS OF LOCAL PUBLIC AGENCY AND OTHERS

The CONTRACTOR agrees to establish safeguards to prohibit employees from using positions for a purpose that is or gives the appearance of being motivated by a desire for private gain for themselves or others, particularly those with whom they have a family, business, or other tie. The CONTRACTOR will be aware of and avoid any violation of the laws of this State which prohibit municipal officers and employees from having or owning any interest or shore, individually or as agent or employee of any person or corporation, either directly or indirectly, in any contract made or let by the governing authorities of such municipality for the construction or doing of any public work, or for the sale or purchase of any materials, supplies or property of any description, or for any other purpose whatsoever, or in any subcontract arising therefrom or connected therewith, or to receive, either directly or indirectly, any portion or share of any money or other thing paid for the construction or doing of any public work, or for the sale or purchase of any property, or upon any other contract made by the governing authorities of the municipality, or subcontract arising therefore or connected therewith.

The CONTRACTOR will also be aware of and avoid any violation of the laws of this State which prescribe a criminal penalty for any public officer who has an interest in any contract passed by the board of which he or she is a member during the time he or she was a member and for one year thereafter.

INTEREST OF CERTAIN FEDERAL OFFICERS

No member of. or delegate to, the Congress of the United States and no Resident Commissioner shall be admitted any share or part of the contract or to any benefit to arise therefrom.

INTEREST OF CONTRACTOR

The CONTRACTOR agrees that it presently has no interest and shall not acquire any interest, direct or indirect, in the above described project or any parcels therein or any other interest which would conflict in any manner or degree with the performance of the Work hereunder. The CONTRACTOR further agrees that no person having any such interest shall be employed in the performance of the contract.

RELIGIOUS ACTIVITY

The CONTRACTOR, in compliance with 24 C.F.R. 570.2000) and 24 C.F.R. § 5.109 (c), agrees to provide equal participation to faith-based organizations in HUD programs and activities and to abstain from disfavoring any faith-based organization, including by failing to select a faith-based organization, disqualifying an faith-based organization, or

imposing any condition or selection criterion that otherwise disfavors or penalizes an faith-based organizations in the selection process using any funds related to the contract.

FLOOD DISASTER PROTECTION ACT OF 1973

The CONTRACTOR will ensure that procedures and mechanisms are put into place to monitor compliance with all flood insurance requirements as found Section 202(0) of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4106, and the regulations in 44 C.F.R. Parts 59 through 79 and 24 C.F.R. § 570.605.

LEAD BASED PAINT

The CONTRACTOR must comply with the regulations regarding lead-based paint found at 24 C.F.R. Part 35, Subpt. A on LEAD-BASED PAINT POISONING PREVENTION IN CERTAIN RESIDENTIAL STRUCTURES with regards to all housing units assisted using CDBG-DR/MIT funds.

VALUE ENGINEERING

(Applicable to construction contracts exceeding $2,000 when required by Federal Program legislation.)

The CONTRACTOR must comply with the regulations regarding systematic and organized approach to analyze functions of systems, equipment, facilities, services, and materials to ensure they achieve their essential functions at the lowest cost consistent to life cycle in execution, reliability, quality, and safety, in accordance with 2 C.F.R. § 200.318(g).

GENERAL COMPLIANCE

The CONTRACTOR shall comply with all applicable provisions of the Housing and Community Development Act of 1974, as amended, and the regulations at 24 C.F.R. § 570, as modified by the Federal Register notices that govern the use of CDBGDR/MIT funds available under the contract. See Federal Register Notice 83 FR 5844 (February 9, 2018). Notwithstanding the foregoing, (1) the CONTRACTOR does not assume any applicable of the ASEM and/or PRDOH responsibilities for environmental review, decision making, and action, described in 24 C.F.R. Part 58 and [2] the CONTRACTOR does not assume any applicable of the PRDOH's responsibilities for initiating the review process under the provisions of 24 C.F.R. Part 52.

Regulations, and PRDOH Requirements.

The CONTRACTOR shall also comply with all other applicable Federal, state and local laws, regulations, and policies that govern the use of the CDBG-DR/MIT funds in

complying with its obligations under the contract, regardless of whether CDBGDR/MIT funds are made available to the CONTRACTOR on an advance or reimbursement basis. This includes, without limitation, applicable Federal Registers; 2 C.F.R. Part 200 Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards; Community Development Act of 1974; 24 C.F.R. Part 570 Community Development Block Grant; applicable waivers; Fair Housing Act. 24 C.F.R. Part 35. Subpt. A; 24 C.F.R. Part 58; 24 C.F.R. Part 75; National Historic Preservation Act, and any other applicable state laws or regulations, including the requirements related to nondiscrimination, labor standards and the environment; and Action Plan amendments and HUD's guidance on the funds.

Where waivers or alternative requirements are provided for in the applicable Federal Register Notice dated February 9, 2018, at 83 FR 5844 or any future Federal Register Notice published by HUD ("HUD Notices"), such requirements, including any regulations referenced therein, shall apply.

The CONTRACTOR also agrees to comply with all other applicable Federal, State, and local laws, regulations, HUD Notices, policies, and guidelines, whether existing or to be established, provided the same are applied to activities occurring after the date the policy or guideline was established, governing the Grant Funds provided under the contract. In the event a conflict arises between the provisions of the contract and any of the foregoing, the Federal, State, and local laws, regulations. HUD Notices. policies, and guidelines shall control and the contract shall be interpreted in a manner so as to allow for the terms contained herein to remain valid and consistent with such Federal, State, and local laws, regulations, HUD Notices, policies and guidelines.

The CONTRACTOR shall also comply with applicable PRDOH's policies and guidelines as established in Program Guidelines and their amendments, if any, as found in the CDBG-DR Website (https://recuperacion.pr.qov/) which are herein included and made integral part of the contract, as it may be updated from time to time.

DUPLICATION OF BENEFITS

The CONTRACTOR shall not carry out any of the activities under the contract in a manner that results in a prohibited duplication of benefits as defined by Section 312 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. § 5155) and described in Appropriations Act. The CONTRACTOR must comply with HUD's requirements for duplication of benefits, imposed by Federal Register notice on the ASEM and/or PRDOH, which ore published in a separate notices entitled: "Clarification to Duplication of Benefits Requirements Under the Stafford Act for Community Development Block

Grant (CDBG) Disaster Recovery Grantees" (November 16, 2011, 76 FR 71060); "Updates to Duplication of Benefits Requirements Under the Stafford Act for Community Development Block Grant (CDBG) Disaster Recovery Grantees" (June 20, 2019, 84 FR 28836); and "Applicability of Updates to Duplication of Benefits Requirements Under the Stafford Act for Community Development Block Grant (CDBG) Disaster Recovery Grantees," (June 20, 2019, 84 FR 28848). The CONTRACTOR shall carry out the activities under the contract in compliance with PRDOH's procedures to prevent duplication of benefits.

DRUG-FREE WORKPLACE

The CONTRACTOR must comply with drug-free workplace requirements in 2 C.F.R. §§ 182.200 through 182.230 of the Drug-Free Workplace Act of 1988, 41 U.S.C. §§ 81018106.

HOLD HARMLESS

The CONTRACTOR shall and hereby agrees to hold harmless, defend (with counsel acceptable to the ASEM and/or PRDOH) and indemnify the Government of Puerto Rico, PRDOH, ASEM, HUD and each and all of its successors, affiliates, or assigns, and any of their employees, officers, directors, attorneys, consultants, agents, managers, and affiliates, from and against any and all damages, costs, attorneys' fees, claims, expenses, injuries, property damage, causes of action, violations of law, violations of the contract, and losses of any form or nature arising from or related to the conduct of the CONTRACTOR in the performance of the efforts called for in the contract. This indemnity shall expressly include, but is not limited to, the obligation of the CONTRACTOR to indemnify and reimburse the ASEM and/or PRDOH for any and all attorneys' fees and other litigation or dispute resolution costs incurred or to be incurred in the ASEM and/or PRDOH enforcement of the contract or any portion thereof against the CONTRACTOR or otherwise arising in connection with the CONTRACTOR 's breach, violation, or other noncompliance with the contract. This clause shall survive indefinitely the termination of the contract for any reason.

PRDOH RECOGNITION

Unless otherwise directed by the ASEM and/or PRDOH, the CONTRACTOR shall ensure recognition of the role of ASEM, HUD, and PRDOH in providing funding, services, and efforts through the contract. Unless otherwise directed by the ASEM and/or PRDOH, all activities, facilities, and items utilized pursuant to the contract shall be prominently labeled as to role of HUD, ASEM, and PRDOH. In addition, the CONTRACTOR shall include a reference to the support provided herein in all publications made possible with funds made available under the contract. The ASEM and/or PRDOH reserves the right to direct

specific reasonable recognition requirements on a case-by-case basis, including but not limited, to the size and content, waiver, removal or addition of such recognition.

LOGOS CLAUSE

The CONTRACTOR hereto will not use the name of the other party, seals, logos, emblems or any distinctive trademark/ trade name, without the prior written express authorization of the other party.

UNIFORM ADMINISTRATIVE REQUIREMENTS, COST PRINCIPLES, ANDAUDIT REQUIREMENTS FOR FEDERAL AWARDS

The CONTRACTOR shall comply with the applicable provisions in 2 C.F.R. Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, 2 C.F.R. Part 200.

FINANCIAL & PROGRAM MANAGEMENT

The CONTRACTOR shall expend and account for all CDBG-DR/MIT funds received under the contract in accordance with 2 C.F.R. § 200.302 and 2 C.F.R. § 200.303 and agrees to adhere to the accounting principles and procedures required therein, utilize adequate internal controls, and maintain necessary source documentation for all costs incurred.

The CONTRACTOR shall administer its program in conformance with Cost Principles as outlined in 2 C.F.R. § 200.400 through 2 C.F.R. § 200.476, as applicable. These principles shall be applied for all costs incurred whether charged on a direct or indirect basis.

DOCUMENTATION AND RECORD KEEPING

The CONTRACTOR shall maintain all records required by applicable law to be maintained, including but not limited to the Federal regulations specified in (1) 2 C.F.R. Part 200; (2) 24 C.F.R. § 570.506; and (3) the applicable HUD Notices that are pertinent to the activities to be funded under the contract, as well as any additional records required by the PRDOH. Such records should include but not be limited to:

- Records providing a full description of each activity undertaken;
- Records demonstrating that each activity undertaken meets one of the National Objectives of the CDBG-DR/MIT programs, as modified by the HUD Notices;
- Records required to determine the eligibility of activities;
- Records required to document the acquisition, improvement, use, or disposition of real property acquired or improved with CDBG-DR/MIT funds;
- Records documenting compliance with the fair housing and equal opportunity components of the CDBG-DR/MIT program;

- Financial records as required by (1) 24 C.F.R. § 570.502; and (2) 2 C.F.R. Part 200;
- Other records necessary to document compliance with Subpart K of 24 C.F.R. Part 570.

ACCESS TO RECORDS

The ASEM, Government of Puerto Rico, the PRDOH, HUD, the Comptroller General of the United States, or any of their duly authorized representatives, shall have at any time and from time to time during normal business hours, access to any work product, books, documents, papers, and records of the CONTRACTOR which are related to the contract, for the purpose of inspection, audits, examinations, and making excerpts, copies and transcriptions.

RECORD RETENTION AND TRANSMISSION OF RECORDS TO THE ASEM and/or PRDOH

The CONTRACTOR shall retain all official records on programs and individual activities shall be retained for the greater of five (5) years, starting from the closeout of the grant between PRDOH and HUD, or the end of the affordability period for each housing activity, whichever is longer. If any other laws and regulations as described in 24 C.F.R. § 570.490 applies to a project, the record retention period may be extended. All records involved in litigation, claims, audits, negotiations, or other actions, which have started before the expiration date of their retention, will be kept until completion of the action and resolution of all issues or the end of the regular five (5) years period, whichever is longer. (See 2 C.F.R. § 200.334 and 24 C.F.R. § 570.490(d) .)

Records shall be made available to ASEM and/or PRDOH upon request.

CLIENT DATA AND OTHER SENSITIVE INFORMATION

If the CONTRACTOR comes to possess client data and other sensitive information as a result of the contract, then the CONTRACTOR shall maintain client data demonstrating client eligibility for services provided. Such data shall include, but not be limited to, client name, address, income level or other basis for determining eligibility, and description of service provided. Such information should be made available to ASEM and/or PRDOH monitors or their designees for review upon request.

The CONTRACTOR must comply with 2 C.F.R. § 200.303 and shall take reasonable measures to safeguard protected personally identifiable information, as defined in 2 C.F.R. § 200.82, and other information ASEM, HUD or the PRDOH designates as sensitive or the CONTRACTOR considers sensitive consistent with applicable Federal, state, local, and tribal laws regarding privacy and obligations of confidentiality. Additionally, the

CONTRACTOR must comply with the PRDOH CDBG-DR Personally Identifiable Information, Confidentiality, and Nondisclosure Policy, as found in the CDBG-DR Website

https://recuperacion.pr.qov/en/download/personallyidentifiable-informationconfidentiality-and-nondisclosure-policy/) which is herein included and made integral part of the contract, as it may be updated from time to time

The CONTRACTOR shall comply with all State or local requirements concerning the privacy of personal records, consistent with 24 C.F.R. § 570.508 (local governments) and§ 570.490(c) (States).

CLOSE-OUT

The CONTRACTOR 's obligation to ASEM and/or PRDOH shall not end until all close-out requirements are completed. Activities during this close-out period may include, but are not limited to: making final payments, disposing of program assets (including the return of all unused materials, equipment, unspent cash advances, program income balances, and accounts receivable to the ASEM and/or PRDOH, properly addressing Program Income (as that term is defined in Section VI (A)(19) of the HUD Notice 83 FR 5844, 5856 [February 9, 2018, as may be amended by HUD)), balances, and accounts receivable to the PR DOH), determining the custodianship of records, and the CONTRACTOR certification of compliance with the terms of the contract. Notwithstanding the foregoing, the terms of the contract shall remain in effect during any period that the CONTRACTOR has control over CDBG-DR/MIT funds, including Program Income.

Notwithstanding the terms of 2 C.F.R. § 200.343, upon the expiration of the contract, the CONTRACTOR shall transfer to the recipient any CDBG-DR/MIT funds on hand at the time of expiration and any accounts receivable attributable to the use of CDBGDR/MIT funds, further, any real property under the CONTRACTOR 's control that was acquired or improved in whole or in part with CDBG-DR/MIT funds (including CDBGDR/MIT funds provided to the CONTRACTOR in the form of a loan) shall be treated in accordance with 24 C.F.R. § 570.503(b) (7).

AUDITS AND INSPECTIONS

All CONTRACTOR records with respect to any matters covered by the contract shall be made available to the ASEM, PRDOH, HUD, and the Comptroller General of the United States, or any of their authorized representatives, at any time during normal business hours, as often as deemed necessary, to audit, examine, and make excerpts or transcripts of all relevant data. Any deficiencies noted in audit reports must be fully cleared by the CONTRACTOR within thirty (30} days after receipt by the CONTRACTOR.

Failure of the CONTRACTOR to comply with the above audit requirements shall constitute a violation of the contract and may result in the withholding of future payments and/or termination.

SINGLE AUDIT

The CONTRACTOR must be audited as required by 2 C.F.R. Part 200, Subpt. F, when the CONTRACTOR 's Federal awards expended during the respective fiscal year equaled or exceeded the threshold set forth in 2 C.F.R. § 200.501 (Audit requirements). Once said threshold is reached or exceeded, the CONTRACTOR shall notify the ASEM and/or PRDOH and shall report that event in the corresponding monthly progress report, as provided in Part VI, Performance, Monitoring, and Reporting, Subpart B (Reporting) of the contract.

The CONTRACTOR shall procure or otherwise arrange for the audit to be conducted for that year, as required in 2 C.F.R. § 200.501 (a)-(b); moreover, that it is properly performed and submitted when due in accordance with provisions that include but are not limited to those set forth in 2 C.F.R. § 200.512 (Report submission), as stated in 2 C.F.R. § 200.508(a) (Auditee responsibilities).

Among other relevant provisions, the CONTRACTOR shall comply with: (a) the Electronic submission of data and reports to the Federal Audit Clearinghouse (FAC) (2 C.F.R. § 200.512(d)) and; (b) ensuring that reports do not include protected personally identifiable information as set forth in 2 C.F.R. § 200.512(a)(2)).

INSPECTIONS AND MONITORING

The CONTRACTOR shall permit the ASEM and/or PRDOH and auditors to have access to the CONTRACTOR 's records and financial statements as necessary for the ASEM and/or PRDOH to meet the requirements of 2 C.F.R. Part 200.

CORRECTIVE ACTIONS

The ASEM and/or PRDOH may issue management decisions and may consider taking enforcement actions including but not limited to corrective actions in 24 C.F.R. § 570.910 if noncompliance is detected during monitoring and audits. The PRDOH may require the CONTRACTOR to take timely and appropriate action on all deficiencies pertaining to the Federal award provided to the CONTRACTOR from the pass-through entity detected through audits, on-site reviews, and other means. A timely and appropriate action shall be predicated on reasonable standard wherein the CONTRACTOR utilizes all available resources to correct the noted issue or issues. In response to audit deficiencies or other findings of noncompliance with the contract, the ASEM and/or PRDOH may impose

additional conditions on the use of the CDBG-DR/MIT funds to ensure future compliance or provide training and technical assistance as needed to correct noncompliance.

NONDISCRIMINATION

The CONTRACTOR shall comply with 24 C.F.R. Port 6, which implements the provisions of Section 109 of Title I of the Housing and Community Development Act of 1974, 42 U.S.C. § 5309. Section 109 provides that no person in the United States shall, on the ground of race, color, national origin, religion, or sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity funded in whole or in port with Federal financial assistance.

The CONTRACTOR shall adhere to the prohibitions against discrimination on the basis of age under the Age Discrimination Act of 1975, 42 U.S.C. §§ 6101-6107 (Age Discrimination Act) and the prohibitions against discrimination on the basis of disability under Section 504 of the Rehabilitation Act of 1973, 29 U.S.C. § 794 (Section 504). Section 109 of the Housing and Community Development Act of 1974 makes these requirements applicable to programs or activities funded in whole or in port with CDBG-DR/MIT funds. Thus, the CONTRACTOR shall comply with regulations of 24 C.F.R. Port 8, which implement Section 504 for HUD programs, and the regulations of 24 C.F.R. Port 146, which implement the Age Discrimination Act for HUD programs.

The CONTRACTOR shall ensure that all CDBG-DR/MIT activities conducted by itself or its contractors ore consistent with the applicable federal and local legal provisions, regulations, and policies that prohibit discrimination on the basis of race, creed, color, notional origin, religion, sex, disability, familial status, actual or perceived sexual orientation or gender identity, marital status, or age, as established in the CDBG-DR Fair Housing and Equal Opportunity (FHEO) Policy for CDBG-DR Programs.[1]

ARCHITECTURAL BARRIERS ACT AND THE AMERICANS WITH DISABILITIES ACT

The CONTRACTOR shall ensure that its Activities are consistent with requirements of Architectural Barriers Act and the Americans with Disabilities Act.

The Architectural Barriers Act of 1968, 42 U.S.C. §§ 4151-4156, requires certain Federal and Federally funded buildings and other facilities to be designed, constructed, or altered in accordance with standards that ensure accessibility to, and use by, physically

[1] Follow the link for document access to the CDBG-DR Website: https://recuperacion.pr.gov/en/download/fair-housing- and-equal-0pportunity-fheo-policy-for-cdbg-dr-programs/

handicapped people. A building or facility designed, constructed, or altered with funds allocated or reallocated under this part after December 11, 1995, and that meets the definition of "residential structure" as defined in 24 C.F.R. § 40.2 or the description of "facilities" in 41 C.F.R. § 102-76.60 are subject to the requirements of the Architectural Barriers Act of 1968 and shall comply with the Uniform Federal Accessibility Standards (appendix A to 24 C.F.R. Part 40 for residential structures, and 41 C.F.R. Subt. C, Ch. 102, for general type buildings).

The Americans with Disabilities Act of 1990 ("ADA"), 42 U.S.C. § 12101 et seq. {ADA), provides comprehensive civil rights to individuals with disabilities in the areas of employment, public accommodations, State and local government services, and telecommunications. It further provides that discrimination includes a failure to design and construct facilities for first occupancy no later than January 26, 1993, that are readily accessible to and usable by individuals with disabilities. Further, the ADA requires the removal of architectural barriers and communication barriers that are structural in nature in existing facilities, where such removal is readily achievable-that is, easily accomplishable and able to be carried out without much difficulty or expense.

The Follow the link for document access to the CDBG-DR Website: https://recuperacion.pr.gov/en/download/fair-housing- and-equal-0pportunity-fheo-policy-for-cdbg-dr-programs/ agrees to comply with the non-discrimination in employment and contracting opportunities laws, regulations, and executive orders referenced in 24 C.F.R. § 570.607, as revised by Executive Order 13279. The applicable non- discrimination provisions in Section 109 of the HCDA are still applicable.

TITLE VI OF THE CIVIL RIGHTS ACT OF 1964 (24 C.F.R. PART 1)

General Compliance:

The Follow the link for document access ot the CDBG-DR Website: https://recuperacion.pr.gov/en/download/fair-housing- and-equal-opportunity-the-policy-for-cdbg-dr-programs/ shall comply with the requirements of Title VI of the Civil Rights Act of 1964, 42 U.S.C. § 2000d et seq., and 24 C.F.R. § 570.601 and§ 570.602. No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity funded by the contract. The specific nondiscrimination provisions at 24 C.F.R. § 1.4 apply to the use of these funds. The Follow the link for document access of the CDBG-DR Website: https://recuperacion.pr.gov/en/download/fair-housing- and-equal-0pportunity-fheo-policy-for-cdbg-dr-programs/ shall not intimidate, threaten, coerce, or discriminate against any person for the purpose of interfering with any right or privilege secured by

Attachment 7: HUD GENERAL PROVISIONS AND OTHER FEDERAL STATUES, REGULATIONS, AND PRDOH REQUIREMENTS OF HEALTHCARE STRENGTHENING SET-ASIDE

Title VI of the Civil Rights Act of 1964 or 24 C.F.R. Part 1, or because he or she has made a complaint, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under 24 C.F.R. Part 1. The identity of complainants shall be kept confidential except to the extent necessary to carry out the purposes of 2 C.F.R. Part 1, including the conduct of any investigation, hearing, or judicial proceedings arising thereunder.

Assurances and Real Property Covenants:
As a condition to the approval of the contract and the extension of any Federal financial assistance, the Follow the link for document access of the CDBG-DR Website: https://recuperacion.pr.gov/en/download/fair-housing- and-equal-0pportunity-fheo-policy-for-cdbg-dr-programs/ assures that the program or activities described in the contract shall be conducted and the housing, accommodations, facilities, services, financial aid, or other benefits to be provided shall be operated and administered in compliance with all requirements imposed by or pursuant to this 2 CFR, Part I.

If the Federal financial assistance under the contract is to provide or is in the form of personal property or real property or interest therein or structures thereon, the CONTRACTOR's assurance herein shall obligate the CONTRACTOR or, in the case of a subsequent transfer, the transferee, for the period during which the property is used for a purpose for which the Federal financial assistance is extended or for another purpose involving the provision of similar services or benefits, or for as long as the recipient retains ownership or possession of the property, whichever is longer. In all other cases the assurance shall obligate the CONTRACTOR for the period during which Federal financial assistance is extended pursuant to the contract or application.

This assurance gives the ASEM and/or PRDOH and the United States a right to seek judicial enforcement of the assurance and the requirements on real property.

In the case of real property, structures or improvements thereon, or interests therein, acquired with Federal financial assistance under the contract or acquired with CDBG-DR/MIT funds and provided to the CONTRACTOR under the contract, the instrument effecting any disposition by the CONTRACTOR of such real property, structures or improvements thereon, or interests therein, shall contain a covenant running with the land assuring nondiscrimination for the period during which the real property is used for a purpose for which the Federal financial assistance is extended or for another purpose involving the provision of similar services or benefits.

If the CONTRACTOR receives real property interests or funds or for the acquisition of real property interests under the contract, to the extent that rights to space on, over. or under any such property are included as part of the program receiving such assistance, the nondiscrimination requirements of this part shall extend to any facility located wholly or in part in such space.

Women- and Minority-Owned Businesses (W/MBE)

The CONTRACTOR shall take the affirmative steps listed in 2 C.F.R. § 200.321 (b)(l) through (6) to assure that minority businesses, women's business enterprises, and labor surplus area firms are used when possible when the CONTRACTOR procures property or services under the contract, as used in the contract, the terms "small business" means a business that meets the criteria set forth in Section 3{a) of the Small Business Act, as amended, 15 U.S.C. § 632 (a). and "minority and women's business enterprise" means a business at least fifty-one (51) percent owned and controlled by minority group members or women. For the purpose of this definition, "minority group members" are Afro-Americans, Spanish-speaking, Spanish surnamed or Spanish heritage Americans, Asian- Americans, and American Indians. The CONTRACTOR may rely on written representations by businesses regarding their status as minority and female business enterprises in lieu of an independent investigation.

In compliance with the CDBG-DR/MIT Minority and Women-Owned Business Enterprise Policy (M/WBE Policy), the CONTRACTOR shall complete a utilization plan to identify how they plan on successfully achieving the contracting goals for MBE and WBE's. CONTRACTOR shall also complete quarterly reporting to provide information on contracting opportunities and payouts provided to WBE or MBE contractors or subcontractors. CONTRACTOR shall also document their efforts and submit those to ASEM and/or PRDOH on a quarterly basis. See the M/WBE Policy, as found in the CDBG-DR Website (https://recuperacion.pr.gov/) which is herein included and made integral part of the contract, as it may be updated from time to time.

Notifications

The CONTRACTOR will send to each labor union or representative of workers with which it has a collective bargaining agreement or other contract or understanding, a notice, to be provided by the agency contracting officer, advising the labor union or worker's representative of the CONTRACTOR 's commitments hereunder, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

Attachment 7: HUD GENERAL PROVISIONS AND OTHER FEDERAL STATUES, REGULATIONS, AND PRDOH REQUIREMENTS OF HEALTHCARE STRENGTHENING SET-ASIDE

Equal Employment Opportunity and Affirmative Action (EEO/AA) Statement
The CONTRACTOR shall, in all solicitations or advertisements for employees placed by or on behalf of the CONTRACTOR, state that it is an Equal Opportunity or Affirmative Action employer.

LABOR STANDARDS
The CONTRACTOR shall comply with the in labor standards in Section 110 of the Housing and Community Development Act of 1974, 42 U.S.C. § 5310, and ensure that all laborers and mechanics employed by contractors or subcontractors in the performance of construction work financed in whole or in part with assistance received under the contract shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis Bacon Act, as amended (40 U.S.C. § 314l, et seq.), and 29 C.F.R. Parts l, 3, 5, 6, and 7, provided, that this requirement shall apply to the rehabilitation of residential property only if such property contains not less than eight (8) units.

The CONTRACTOR agrees to comply with 18 U.S.C. § 874 and it's implementing regulations of the U.S. Department of Labor at 29 C.F.R. Part 3 and Part 5. The CONTRACTOR shall maintain documentation that demonstrates compliance with applicable hours and wage requirements. Such documentation shall be made available to the ASEM and/or PRDOH for review upon request.

The CONTRACTOR is prohibited from using funds provided herein or personnel employed in the administration of the program for: political activities: inherently religious activities; lobbying; political patronage; or nepotism activities.

CONDUCT

Contracts Monitoring: As applicable, the CONTRACTOR will monitor all contracted services on a regular basis to assure contract compliance. Results of monitoring efforts shall be summarized in written reports and supported with documented evidence of follow-up actions taken to correct areas of noncompliance.

Content: The CONTRACTOR shall cause all of the provisions of this contract in its entirety to be included in and made a part of any contract executed in the performance of the contract, as applicable.

Notification: The CONTRACTOR shall notify and provide a copy of any and all contracts related to the contract and CDBG-DR/MIT funds to the ASEM and Contract

Administration Area of the PRDOH CDBG-DR/MIT Legal Division within three (3) days of its execution.

Conflict of Interest

The CONTRACTOR agrees to abide by the provisions of 2 C.F.R. Part 200, as applicable, and 24 C.F.R. § 570.611, which include (but are not limited to) the following:

- It is presumed that the CONTRACTOR is subject to state and local ethic laws and regulations related to the conduct of its officers, employees or agents engaged in the award and administration of the contract.
- In the event the CONTRACTOR is not, the CONTRACTOR shall maintain written standards of conduct governing the performance of its employees engaged in the award and administration of the contract. No employee, officer, or agent shall participate in the selection, award, or administration of a contract supported by Federal funds if a real or apparent conflict of interest would be involved. Such a conflict would arise when the employee, officer, or agent. any member of his or her immediate family, his or her partner. or an organization which employs or is about to employ any of the Parties indicated herein, has a financial or other interest in the firm selected for an award. The officers, employees, and agents of the recipient shall neither solicit nor accept gratuities. favors, or anything of monetary value from contractors, or Parties to sub Agreements. However, recipients may set standards for situations in which the financial interest is not substantial, or the gift is an unsolicited item of nominal value. The standards of conduct shall provide for disciplinary actions to be applied for violations of such standards by officers, employees, or agents of the recipient.

No covered persons who exercise or have exercised any functions or responsibilities with respect to CDBG-DR/MIT assisted activities, or who are in a position to participate in a decision-making process or gain inside information with regard to such activities. may obtain a financial interest in any contract, or have a financial interest in any contract, subcontract, or Agreement with respect to the CDBG-DR/MIT assisted activity, or with respect to the proceeds from the CDBG-DR/MIT assisted activity, either for themselves or those with whom they have business or immediate family ties, during their tenure or for a period of one {I) year thereafter. For purposes of this paragraph, a "covered person" includes any person who is an employee, agent, consultant, officer. or elected or appointed official of the ASEM, PRDOH, CONTRACTOR, or any designated public agency.

Attachment 7: HUD GENERAL PROVISIONS AND OTHER FEDERAL STATUES, REGULATIONS, AND PRDOH REQUIREMENTS OF HEALTHCARE STRENGTHENING SET-ASIDE

Clause of Governmental Ethics Certification of Absence of Conflict of Interests

The CONTRACTOR certifies that: (1) No public servant of the ASEM and/or PRDOH has pecuniary interest in this contract. (2) No public servant of the ASEM and/or PRDOH has solicited or accepted, directly or indirectly, for him (her), for any member of his family unit or for any other person, gifts. allowances, favors, services, donations loans or any other thing of monetary value. (3) No public servant of the ASEM and/or PRDOH related to this transaction. asked for or accepted any good of economic value, from any person or organization as payment for the duties and responsibilities of his employment. (4) No public servant of the ASEM and/or PRDOH has solicited. directly or indirectly. for him (her), any member of his family unit, neither for any other person. business or organization. any good of economic value, including gifts, loans, promises, favors or services in exchange for his(her) obligations and performance of said public employment, to influence or favor any organization. (5) No public Regulations, and PRDOH Requirements servant of the ASEM and/or PRDOH has kinship relationship, within the fourth degree of consanguinity and second by affinity, with nobody in public employment that has faculty to influence and to participate in the institutional decisions of the contract.

CITIZEN GRIEVANCES

If the CONTRACTOR receives any complaint or grievance, it shall refer said complaint or grievance immediately to the ASEM and/or PRDOH CDBG-DR/MIT Program so that ASEM and/or PRDOH may respond appropriately.

TECHNICAL ASSISTANCE AND TRAININGS

The CONTRACTOR shall attend any and all technical assistance and/or training that the ASEM and/or PRDOH require from time to time at its discretion. Failure to attend may be considered as cause of termination.

DISASTER RELIEF ACCOUNT

Pursuant to Federal Register Vol. 85, No. 17, 85 FR 4681 (January 27, 2020), PRDOH must comply with an additional requirement imposed by an Order of October 26, 2017, granted by the United States District Court for the District of Puerto Rico, as may be amended from time to time. As required by the Order, grant funds or disaster relief funds received by the Commonwealth of Puerto Rico or other Non-Federal Entities (as defined by 2 C.F.R. § 200.69) shall be deposited solely into a Disaster Relief Account.

As a result thereof, under the terms of the beforementioned Court order and under the conditions of the contract, any and all CDBG-DR/MIT funds subawarded by PRDOH to its CONTRACTORs shall be deposited into a new, separate, non-co-mingled,

unencumbered account held in the name of the CONTRACTOR. The funds shall be used solely for eligible activities. Further, the CONTRACTOR shall provide and make available to PRDOH any and all documentation related to such account.

ADDITIONAL SPECIFIC CONDITIONS

Notwithstanding the special conditions established in the contract and its exhibits, in accordance with 2 C.F.R. § 200.208, PRDOH reserves the right and authority to impose additional specific conditions under any of the following circumstances:

- At the ASEM and/or PRDOH sole discretion when ASEM and/or PRDOH finds that CONTRACTOR has a history of failure to comply with the general or specific terms and conditions applicable to the CDBG-DR and/or CDBG-MIT funds allocated under this or previous contracts.
- When CONTRACTOR fails to meet expected performance goals under the contract.
- When CONTRACTOR poses an increased risk for noncompliance based on factors including, but not limited to, financial stability, quality of management systems, history of performance under Federal awards, history of timeliness under Federal awards, history of conformance with terms and conditions of previous federal awards, and reports and findings from audits.
- When, in the ASEM and/or PRDOH sole discretion, such conditions are necessary to ensure timely and compliant performance under the CDBG-MIT Program.

Such additional specific conditions may include but are not limited to, withholding of authority to proceed to the next phase of an otherwise eligible Project, requiring additional detailed financial reports, requiring additional project monitoring, requiring the CONTRACTOR to obtain technical or management assistance, establishing additional prior approvals, or any other condition ASEM and/or PRDOH deems reasonable and necessary to safeguard Federal funds or the ASEM and/or PRDOH interests.

Notice of additional specific conditions shall include, but not be limited to, the nature of the additional requirements, the reason why the additional requirements are being imposed, the nature of the action needed to remove the additional requirement (if applicable), and the time allowed for completion of the actions (if applicable).

OCCUPATIONAL SAFETY AND HEALTH ACT OF 1970 (OSH ACT)

The CONTRACTOR shall comply with the Occupational Safety and Health Act of 1970 (OSH Act) as supplemented by the Department of Labor regulations. This Act created

the Occupational Safety and Health Administration (OSHA). OSHA sets and enforces protective standards of safety and health in the workplace. Under the OSH Act, employers have a responsibility to provide a safe workplace.

Employers must comply with the 29 CFR 1910 General Obligations Clause of the OSH Act. This clause requires employers to maintain their workplaces free from serious, recognized hazards. This includes the adoption of safety and health guidelines and the subsequent training of the employer's workforce in these.

CONTRACTOR whose Scope of Work includes construction activities must comply with the General Clauses, and with provisions of 29 CFR 1926 "Construction Health and Safety Regulations". It shall be a condition of any contract for construction, alteration and/or repair, including painting and decorating, that no contractor or subcontractor for any part of the contract work shall require any worker or mechanic employed in the performance of the contract to work in an environment or in unhealthy, hazardous or dangerous working conditions to their health or safety.

Attachment 7: HUD GENERAL PROVISIONS AND OTHER FEDERAL STATUES, REGULATIONS, AND PRDOH REQUIREMENTS OF HEALTHCARE STRENGTHENING SET-ASIDE

CONTRACTUAL CLAUSES - APPENDIX II, 2 CFR PART 200

Any acquisition that will be paid for in whole or in part with funds from a federal grant must contain the provisions described below, as applicable:

1. Administrative, Contractual, or Legal Remedies (apply to all contracts exceeding the simplified acquisition threshold)

   This contract shall be governed by the applicable laws of the Government of Puerto Rico and federal laws. If any provision, cause of action, or part of this contract is brought before a court of law and declared unconstitutional or void, such determination shall not affect, undermine, or invalidate the remaining provisions or clauses of this contract, but shall, in effect, limit only the provision declared unconstitutional or void. The parties acknowledge and agree that the Superior Court of San Juan (Court of First Instance) shall be the court with jurisdiction to resolve any legal dispute arising from this contract.

2. Termination for Cause or Convenience (applies to all contracts exceeding $10,000.00)

   Either party may terminate this contract at any time by providing the other party with 30 days' written notice prior to the effective date of termination. However, the prior notice requirement will not apply if probable cause is determined for the Contractor's arrest for any crime under the jurisdiction of the Government of Puerto Rico or the Federal Government, or for any of the reasons stipulated in this contract. ASEM may terminate this contract immediately in the event of negligence, abandonment of duties, or breach of any contractual obligation. Breach shall include, but is not limited to, the Contractor's failure to provide services required by ASEM after having been requested in writing or through any other approved means of communication.

3. Equal Employment Opportunity (applies to all construction contracts, as defined by "federally assisted construction contract" under 41 CFR Part 60-1.3)

   ASEM agrees to incorporate, or make incorporated, into any construction work contract, or modification thereof, as defined in the Secretary of Labor's regulations at 41 CFR Chapter 60, that is paid in whole or in part with funds obtained from the Federal Government or borrowed on credit from the Federal

Government by means of a grant, contract, loan, insurance, or guarantee, or undertaken pursuant to any federal program involving such grant, contract, loan, insurance, or guarantee, the following equal opportunity clause:

During the performance of this contract, the Contractor acknowledges and agrees to the following:

a. The Contractor will not discriminate against any ASEM employee, applicant, or personnel based on race, color, religion, sex, sexual orientation, gender identity, or national origin. The Contractor will take affirmative action to ensure that employees exist and are treated during employment without discrimination based on race, color, religion, sex, sexual orientation, gender identity, or national origin. Such action will include, but is not limited to, the following:

   i. Employment, promotion, demotion, or transfer; recruitment or hiring advertising; termination; types of pay or other forms of compensation; and selection for training, including apprenticeships. The Contractor agrees to post notices in conspicuous locations, available to employees and job applicants, setting forth the provisions of this non-discrimination clause.

   ii. In all employee solicitations or advertisements made by or on behalf of the Contractor, the Contractor shall state that all qualified applicants will be considered for employment without regard to race, color, religion, sex, sexual orientation, gender identity, or national origin.

   iii. The Contractor shall not dismiss or discriminate in any way against any employee or applicant for employment because such employee or applicant inquired about, discussed, or disclosed the compensation of the employee or applicant or of another employee or applicant. This provision shall not apply where an employee who has access to the compensation information of other employees or applicants as part of their essential job duties discloses the compensation of such other employees or applicants to persons who do not have access to such information, except that such disclosure is in response to a formal complaint or charge, in compliance with an investigation, proceeding, hearing, or action,

including an investigation conducted by the employer, or is consistent with the Contractor's statutory duty to provide information.

iv. The Contractor shall send each union or workers' representative with whom it has a collective bargaining agreement or other contract or understand a notice informing such union or workers' representatives of the Contractor's commitments under this section and shall post copies of the notice in conspicuous locations accessible to employees and job applicants.

v. The Contractor shall comply with all provisions of Executive Order 11246 of September 24, 1965, as well as with the applicable rules, regulations, and orders of the Secretary of Labor.

vi. The Contractor shall provide all information and reports required by, or pursuant to, Executive Order 11246 of September 24, 1965, as well as by the rules, regulations, and orders of the Secretary of Labor, and shall allow the administering agency and the Secretary of Labor access to its books, records, and accounts for investigative purposes and to determine compliance with such rules, regulations, and orders.

vii. If the Contractor fails to comply with the non-discrimination clauses of this contract or any of the aforementioned rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part, and the Contractor may be declared ineligible for new government contracts or federally assisted construction contracts pursuant to the procedures authorized in Executive Order 11246 of September 24, 1965, and remedies may be imposed and invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as provided by law.

viii. The contractor shall include the portion of the sentence immediately preceding paragraph (1) and the provisions of paragraphs (1) through (8) in each subcontract or purchase order, unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24,

1965, so that such provisions are binding upon each subcontractor or vendor. The contractor shall take such measures with respect to any subcontract or purchase order as the administering agency may require enforcing such provisions, including penalties for noncompliance.

a. However, whenever a Contractor becomes involved in, or feels threatened with, litigation with a subcontractor or vendor as a result of such management agency direction, the Contractor may request the United States to initiate such litigation to protect the interests of the United States.

b. ASEM further agrees that it will be subject to the aforementioned equal opportunity clause with respect to its own labor practices when participating in federally assisted construction work, provided that, if the applicant participating is a state or local government, the aforementioned equal opportunity clause does not apply to any agency, instrument, or subdivision of that government that is not participating in work under or under the contract.

c. ASEM agrees to actively assist and cooperate with the administering agency and the Secretary of Labor in ensuring that contractors and subcontractors comply with the equal opportunity clause and the Secretary of Labor's applicable rules, regulations, and orders, by providing the administering agency and the Secretary of Labor with the information they require to monitor such compliance, and that, otherwise, it will assist the administering agency in fulfilling its primary responsibility to ensure compliance.

d. ASEM further agrees that it will refrain from entering into any contract or contract modification subject to Executive Order 11246 of September 24, 1965, with a contractor who is disqualified or has not demonstrated eligibility for government contracts and federally assisted construction contracts pursuant to the Executive Order, and will apply the penalties and sanctions for violations of the equal opportunity clause that may be imposed on contractors and subcontractors by the administering agency or the Secretary of Labor pursuant to Part II, Subpart D of the Executive Order. ASEM further agrees that if it fails to comply with or refuses to comply with these commitments, the administering agency may take any or all of

the following actions: cancel, terminate, or suspend this grant (contract, loan, insurance, guarantee) in whole or in part; refrain from providing any further assistance to ASEM under the program in respect of which the breach occurred or from providing reimbursement until ASEM has received satisfactory assurance of future performance; and refer the case to the Department of Justice for appropriate legal proceedings.

4. Davis-Bacon Act, as amended (applies to all construction contracts valued at more than $2,000.00, pursuant to 40 U.S.C. 3141-3148)

   The Contractor is required to pay wages to workers and mechanics at a rate no lower than the prevailing wages specified in a wage determination issued by the Secretary of Labor. In addition, the Contractor is required to pay wages at least once a week. The non-federal entity shall include a copy of the current prevailing wage determination issued by the Department of Labor in each application and bidding process. The decision to award a contract or subcontract is contingent upon acceptance of the wage determination. The non-federal entity shall report all suspected or reported violations to the federal agency granting the grant.

5. Copeland Anti-Kickback Act (applies to all construction contracts valued at more than $2,000.00, pursuant to 40 U.S.C. 3145), supplemented by regulations of the Department of Labor (29 CFR Part 3, "Contractors and Subcontractors in Public Buildings or Public Works Financed Wholly or Partly by Loans or Grants from the United States")

   No Contractor or sub-grantee is prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public works to waive any portion of the compensation to which they are otherwise entitled. The non-federal entity shall report all suspected or reported violations to the federal agency that granted the grant.

6. Contractual Hours and Safety Standards (applies to all contracts valued at more than $100,000.00), pursuant to 40 U.S.C. 3701-3708, supplemented by the Department of Labor regulations 29 CFR Part 5)

   The Contractor is required to calculate the wages of each mechanic and laborer based on a standard 40-hour workweek. Work exceeding the standard workweek is permitted provided the worker receives compensation of no less than one and a half times the basic rate for all hours worked in excess of 40 hours in the

workweek. The requirements of 40 U.S.C. 3704 apply to construction work and stipulate that no laborer or mechanic shall be required to work in unhealthy, hazardous, or dangerous work environments or conditions. These requirements do not apply to purchases of supplies, materials, or items ordinarily available on the open market, nor to contracts for the transportation or transmission of intelligence

7. Rights to Inventions Made Under a Contract or Agreement (applies when the grant meets the definition of a "funding agreement" under 31 CFR § 401.2(a) and the contract is with a small business or nonprofit organization regarding the substitution of parts, assignment, or performance of experimental, development, or research work under that "funding agreement")

   ASEM acknowledges and agrees to comply with the requirements of 37 CFR Part 401, "Rights to Inventions Made by Nonprofit Organizations and Small Businesses Under Government Grants, Contracts, and Cooperation Agreements," and any implementing regulations issued by the awarding agency.

8. Clean Air Act and Federal Water Pollution Control Act (applies to all contracts exceeding $150,000.00, pursuant to 42 U.S.C. 7401-7671q and 33 U.S.C. 1251-1387)

   The Contractor and ASEM agree to comply with all applicable rules, orders, or regulations pursuant to the Clean Air Act and the Federal Water Pollution Control Act. ASEM will report any violations to the federal agency granting the grant and to the Regional Office of the Environmental Protection Agency (EPA).

9. Exclusion and Suspension, pursuant to Executive Orders 12549 and 12689 ASEM will not award contracts, pursuant to 2 CFR 180.220, to parties included in the government exclusions of the System of Award Management (SAM), in accordance with the OMB guidelines in 2 CFR 180 implementing Executive Orders 12549 (3 CFR Part 1986 Comp., p. 189) and 12689 (3 CFR Part 1989 Comp., p. 235), "Disqualification and Suspension." The SAM Exclusions list contains the names of parties excluded, suspended, or otherwise barred by agencies, as well as parties declared ineligible under legal or regulatory authority other than Executive Order 12549.

   The Contractor agrees to comply with 2 CFR Part 180 and certifies that neither its entity, nor its directors, affiliates, or subcontractors are included on the System for All Government Exclusion List in the Systems for Award Management (SAM). This certification is a material representation of fact upon which ASEM relies in

awarding the contract. The Contractor will include a provision requiring such compliance in its internal-level transactions.

10. Anti-Lobbying Agreement (applies to all contracts valued at more than $100,000.00, pursuant to 31 U.S.C. 1352)

    The parties certify that they will not use and have not used allocated federal funds to pay any person or organization to influence or attempt to influence any official or employee of any agency, a member of Congress, an official or employee of Congress, or an employee of a member of Congress, in connection with obtaining any federal contract, grant, or any other concession covered by 31 U.S.C. 1352.

    The parties agree and acknowledge that they will also disclose, up to the non-federal award, any lobbying activity involving non-federal funds that takes place in connection with obtaining any federal grant.

11. Acquisition of Recovered Materials (applies to any contract where the purchase price of the item exceeds $10,000.00 or the value of the quantity acquired during the prior fiscal year exceeded $10,000.00, pursuant to 42 U.S.C. 6962, 40 CFR Part 247, and Section 101 of Executive Order 14057)

    The parties acknowledge and agree to comply with Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976 and further amended, 42 U.S.C. 6962, this includes the requirements of Section 6002 to acquire only items designated in the Environmental Protection Agency (EPA) guidelines in 40 CFR Part 247 that contain the highest possible percentage of recovered materials, consistent with maintaining a satisfactory level of competition; to contract for solid waste management services in a manner that maximizes energy and resource recovery; and to establish an affirmative procurement program for the acquisition of recovered materials identified in the EPA guidelines.

    The recipient or subrecipient must, to the greatest extent possible and in accordance with the law, purchase, acquire, or use products and services that can be reused, reclaimed, or recycled; contain recycled content, are bio-based, or are energy- and water-efficient; and are sustainable. This may include purchasing compostable products and other products and services that reduce the use of single-use plastic products.

12. Prohibition of Certain Telecommunications and Video Surveillance Equipment or Services (Applies to All Contracts)

    a. ASEM is prohibited from obligating or spending loan or grant funds to:

        i. Acquire or obtain covered telecommunications equipment or services;

        ii. Extend or renew a contract to acquire or obtain covered telecommunications equipment or services; or

        iii. Enter into a contract (or extend or renew a contract) to acquire or obtain covered telecommunications equipment or services.

    b. As described in Section 889 of Public Law 115-232, "covered telecommunications equipment or services" means any of the following:

        i. Telecommunications equipment produced by Huawei Technologies Company or ZTE Corporation (or any subsidiary or affiliate of such entities);

        ii. For purposes of public safety, protection of government facilities, physical surveillance of critical infrastructure, and other national security purposes, video surveillance and telecommunications equipment produced by Hytera Communications Corporation, Hangzhou Hikvision Digital Technology Company, or Dahua Technology Company (or any subsidiary or affiliate of such entities);

        iii. Telecommunications or video surveillance services provided by such entities or using such equipment;

        iv. Telecommunications or video surveillance equipment or services produced or provided by an entity that the Secretary of Defense, in consultation with the Director of National Intelligence or the Director of the Federal Bureau of Investigation, reasonably believes to be an entity owned or controlled by, or otherwise connected with, the government of a covered foreign country;

c. For purposes of this section, "covered telecommunications equipment or services" also includes systems that use covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology as part of any system.

d. In implementing the prohibition under Section 889 of Public Law 115-232, executive agency officials administering loan, grant, or subsidy programs must prioritize available funding and technical support to assist affected businesses, institutions, and organizations, as reasonably necessary to enable them to transition from covered telecommunications equipment or services to replacement equipment or services, and to ensure that communications service for users and customers remains maintained.

e. When the recipient or subrecipient accepts a loan or grant, they certify that they will comply with the prohibition on covered telecommunications equipment and services in this section. The recipient or subrecipient is not required to certify that no funds will be spent on covered telecommunications equipment or services beyond the certification provided upon accepting the loan or grant and those provided upon submitting payment requests and financial reports.

f. All of the foregoing includes the provisions of Section 889 of Public Law 115-232 and § 200.471.

13. Internal Procurement Preferences (Applies to all contracts)

a. ASEM and Contractor acknowledges and agrees that it must, to the greatest extent possible and in accordance with the law, give preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States (including, but not limited to, iron, aluminum, steel, cement, and other manufactured products). The requirements of this section must be included in all sub-appraisals, contracts, and purchase orders under federal awards.

b. For the purposes of this section:

i. "Produced in the United States" means, for iron and steel products, that all manufacturing processes, from the initial melting stage through the application of coatings, were performed in the United States.

ii. "Manufactured products" means articles and construction materials composed wholly or partially of non-ferrous metals such as aluminum; plastics and polymer-based products such as polyvinyl chloride pipes; aggregates such as concrete; glass, including fiber optics; and wood.

iii. Federal agencies that provide federal financial assistance for infrastructure projects must implement the Buy America preferences established in Part 184 of 2 CFR.

PUERTO RICO VERDE

UNIFORM GENERAL CONDITIONS FOR PUBLIC WORKS CONTRACTS

INDEX

PART A. INTRODUCTION

Article 1 - LEGAL BASIS; APPLICATION....1
1.1 Legal Basis
1.2 Application

PART B. UNIFORM GENERAL CONDITIONS

Article 1 - DEFINITIONS AND TERMINOLOGY....1
1.1 Defined Terms
1.2 Other Terms
1.3 Terminology

Article 2 – CONTRACT DOCUMENTS....10
2.1 Intent and Interpretation of Contract Documents
2.2 Order of Precedence of Contract Documents
2.3 Written Interpretations
2.4 Execution and Correlation
2.5 Review of Contract Documents and Field Conditions by Contractor
2.6 Amending and Supplementing Contract Documents
2.7 Copies Furnished, Ownership and Reuse of Documents

Article 3 – BONDS AND INSURANCE....13
3.1 General for Owners with OCIP
3.2 General for Owners without OCIP
3.3 Performance, Payment, and Other Bonds
3.4 Workmen's Compensation Insurance
3.5 Contractor's Liability Insurance
3.6 Business Auto Policy
3.7 Contract Work - Builders Risk Insurance
3.8 Installation Floater Policy

3.9 Subcontractor's and Sub-Subcontractor's Liability Insurance
3.10 Owner's Liability Insurance

Article 4 – SITE....20
4.1 Availability of Lands
4.2 Subsurface and Physical Conditions
4.3 Differing Subsurface or Physical Conditions
4.4 Price and Time Adjustments
4.5 Underground Facilities
4.6 Reference Points
4.7 Hazardous Environmental Condition at Site

Article 5 – OWNER....26
5.1 General
5.2 Information and Services Required of the Owner
5.3 Pay Promptly When Due
5.4 Owner's Right to Stop the Work
5.5 Owner's Right to Carry Out the Work Without Terminating the Employment of the Contractor
5.6 Owner's Right to Clean Up
5.7 Evidence of Financial Arrangements
5.8 Limitations on Owner's Responsibilities

Article 6 – CONTRACTOR....28
6.1 Supervision and Superintendence
6.2 Labor and Working Hours
6.3 Services, Materials, and Equipment
6.4 Progress and Other Schedules
6.5 Submittals for Approvals, Substitutes and or "Equals"
6.6 Review of Contract Documents
6.7 Patent, Fees and Royalties
6.8 Permits
6.9 Laws and Regulations
6.10 Taxes
6.11 Use of Site and Other Areas
6.12 Record Document
6.13 Safety and Protection
6.14 Safety Representative
6.15 Hazard Communication Programs
6.16 Plans and Working Drawings; As-Built Plans
6.17 As Built Record Drawings
6.18 Notice to Proceed
6.19 Contractor's General Warranty and Guarantee
6.20 Indemnification
6.21 Subcontractors, Suppliers and Others

Article 7 – ARCHITECT/ENGINEER AND DESIGNATED INSPECTOR....55
7.1 Administration of the Contract
7.2 Duties of Architect/Engineer and the Owner's Representative

Article 8 – OTHER WORK AND SEPARATE CONTRACTS....58

8.1 Owner's Right to Award Separate Contract, Perform Work with Owners Employees and Utility Workers. Related Work at Site
8.2 Owner's Right to Award Separate Contract
8.3 Mutual Responsibility of Contractors

Article 9 – TIME.....62
9.1 Progress and Completion
9.2 Change of Contract Time
9.3 Delays and Extensions of Time
9.4 Delay Damages
9.5 Liquidated Damages
9.6 Early Completion Incentive

Article 10 – CHANGE OF CONTRACT PRICE, COST OF THE WORK AND UNIT PRICE WORK.....67
10.1 Change of Contract Price
10.2 Cost of the Work
10.3 Cash Allowances
10.4 Unit Price Work
10.5 Contractor's Fee

Article 11 – CHANGES IN THE WORK.....72
11.1 Authorized Changes in the Work
11.2 Unauthorized Changes in the Work
11.3 Execution of Change Orders and Extra Work Orders
11.4 Notification to Surety
11.5 Claims and Disputes

Article 12 – TESTS AND INSPECTIONS; CORRECTION, REMOVAL OR ACCEPTANCE OF DEFECTIVE WORK.....74
12.1 Notice of Defects
12.2 Access to Work
12.3 Tests and Inspections
12.4 Uncovering Work
12.5 Correction or Removal of Deficient Work
12.6 Correction Period
12.7 Acceptance of Non-Compliant Work
12.8 Owner's Right to Correct Deficient Work

Article 13 – PAYMENTS AND COMPLETION.....79
13.1 Proposal Schedule and Schedule of Values
13.2 Progress Payments
13.3 Contractor's Warranty of Title
13.4 Substantial Completion
13.5 Partial Utilization
13.6 Final Inspection
13.7 Final Payment
13.8 Final Completion Delayed
13.9 Waiver of Claims
13.10 Unilateral Liquidation

Article 14 – PROTECTION OF PERSONS AND PROPERTY.....90
14.1 Public Convenience and Safety
14.2 Laws to be Observed
14.3 Sanitary, Health and Safety Provisions
14.4 Labor Relations and Wages
14.5 Environmental Protection
14.6 Construction Over or Adjacent to Navigable Waters
14.7 Traffic Protection Devices
14.8 Use of Explosives
14.9 Protection and Restoration of Property
14.10 Forest Protection
14.11 Responsibility for Damage Claims
14.12 Contractor's Responsibility for Work
14.13 Emergencies

Article 15 – SUSPENSION OF WORK AND TERMINATION.....96
15.1 Suspension of Work
15.2 Owner May Terminate for Cause
15.3 Owner May Terminate the Contract For Convenience
15.4 Contractor's Right to Terminate the Contract

Article 16 – DISPUTE RESOLUTION.....101
16.1 Disputes
16.2 Remedies
16.3 Mediation
16.4 Arbitration

Article 17 – MISCELLANEOUS.....103
17.1 Governing Law
17.2 Federal Funds
17.3 Notice
17.4 Computation of Time
17.5 Ownership of Documents
17.6 Personal Liability of Public Officials
17.7 No Waiver of Legal Rights
17.8 Cumulative Remedies
17.9 Successors and Assigns
17.10 Survival of Obligations
17.11 Language
17.12 Amendments

PART C. ADDITIONAL PROVISIONS

ARTICLE 1: SEPARABILITY CLAUSE; EFFECTIVENESS.....106

1.1 Separability Clause.
1.2 Effectiveness

CERTIFICATION

UNIFORM GENERAL CONDITIONS FOR PUBLIC WORKS CONTRACTS

PART A. INTRODUCTION

ARTICLE 1 –LEGAL BASIS; APPLICATION

1.1 Legal Basis. The Secretary of Transportation and Public Works, in accordance with the powers conferred upon him by Law No. 198 of May 15, 1943, as amended by Law No. 131 of September 2, 2010 and Law No. 170 of August 12, 1988, as amended, hereby enacts the following regulations to establish the applicable legal framework for the contracting and management of all public works.

1.2. Application. The provisions of these Regulations shall be applicable to all contracts for public works executed by all government agencies, departments, public corporations and instrumentalities.

PART B. UNIFORM GENERAL CONDITIONS

ARTICLE 1 -DEFINITIONS AND TERMINOLOGY

1.1 Defined Terms

1.1.1 Wherever used in the Contract Documents and printed with initial capital letters, the terms listed below will have the meanings indicated which are applicable to both the singular and plural thereof.

1.1.1.1. Agreement (or Contract) - The written instrument, which is evidence of the agreement between Owner and Contractor covering the Work.

1.1.1.2. Application for Payment - The form acceptable to Owner which is to be used by Contractor during the course of the Work in requesting progress or final payment and which is to be accompanied by such supporting documentation as is required by the Contract Documents.

1.1.1.3. Architect/Engineer - The Architect or Engineer, referred herein as Architect/Engineer, is the collegiate professional licensed to practice architecture, engineering or surveying in the Commonwealth of Puerto Rico and is referred to throughout the Contract Documents. It is the Architect or Engineer authorized by the Owner for the preparation of all construction documents, plans and specifications and to submit such documents for the approval of the related public agency. The Architect/Engineer may designate an authorized representative. The Architect/Engineer is the individual or entity named as such in the Agreement.

1.1.1.4. Architect/Engineer's Consultant - An individual or entity having a contract with the Architect/Engineer to furnish services as Architect/Engineer's independent professional and collegiate consultant with respect to the Project and who is identified as such in the Supplementary Conditions.

1.1.1.5. Bonds - Performance and Payment bonds and other instruments of surety required in the Contract Documents.

1.1.1.6. Certificate of Final Acceptance - Certificate issued by the Owner, or its duly authorized representative to Contractor indicating the date that the Work reached Final Acceptance.

1.1.1.7. Certificate of Substantial Completion - Certificate issued by the Owner, or its duly authorized representative, to the Contractor indicating the date that Substantial Completion was achieved for the Work.

1.1.1.8. Change in Law – Change in Law shall include: (i) the enactment or adoption by any legislative, regulatory, executive or administrative body of the Commonwealth of Puerto Rico or of the United States of America of any law, or any change or amendment to any law, in force as of the bid opening date, (ii) any change in the interpretation thereof which is final and not subject to administrative or judicial review, which cannot be complied with by a party without incurring in additional costs.

1.1.1.9. Change Order - A written order issued by the Owner, or its duly authorized representative, to the Contractor, signed by both parties, covering, additions, deletions, and/or revisions in the Work and/or an adjustment in the Contract Price and/or the Contract Time, if any, issued on or after the Effective Date of the Agreement. In Unit Price Contracts, a Change Order can also reflect a change in the number of items, as well as an increase or decrease, contained in the proposal. In Lump Sum Contracts, it reflects an order for additional or less work.

1.1.1.10. Claim - A claim is a demand or assertion by one of the parties seeking, as a matter of right, adjustment or interpretation of Contract terms, payment of money, extension of time or other relief with respect to the terms of the Contract. The term "Claim" also includes other disputes and matters in question between the Owner and Contractor arising out of or relating to the Contract. Claims must be made by written notice and in accordance with Article 11.5. The responsibility to substantiate Claims shall rest with the party making the Claim.

1.1.1.11. Commonwealth - The Commonwealth of Puerto Rico.

1.1.1.12. Construction Change Directive – A Construction Change Directive is a written order signed by the Owner, directing a change in the Work prior to agreement on adjustment, if any, in the Contract Price or Contract Time, or both. The Owner may, without invalidating the Contract, order changes in the Work within the general scope of the Contract consisting of additions, deletions or other revisions, the Contract Price and Contract Time adjusted accordingly. A Construction Change Directive shall be used only in the absence of total agreement on the terms of the Change Order, Extra Work Order or Work Change Directive, and shall be paid with the monthly Progress Payment according to the method indicated in Article 10.1.2.3.

1.1.1.13. Contract (or Agreement) - The entire and integrated written Agreement between the Owner and Contractor concerning the Work. The Contract supersedes prior negotiations, representations, or agreements, whether written or oral.

1.1.1.14. Contract Documents - The Contract Documents establish the rights and obligations of the parties and include: (i) the Agreement, (ii) addenda (which pertain to the Contract Documents), (iii) Contractor's bid or proposal (including documentation accompanying the Bid and any post Bid documentation submitted prior to the Notice of Award), (iv) the Notice to Proceed, (v) the Bonds, (vi) these General Conditions, (vii) the Supplementary Conditions, (viii) the Special Provisions, (ix) the Specifications, (x) the Drawings as the same are more specifically identified in the Agreement, including Standard Drawings, if applicable and (xi) Instructions to Bidders. It shall also include: (i) all Written Amendments, (ii) Change Orders and Extra Work Orders, (iii) Work Change Directives, (iv) Field Orders and (v) Architect/Engineer's written interpretations and clarifications issued on or after the Effective Date of the Agreement. Approved Shop Drawings and the reports and drawings of subsurface and physical conditions are not Contract Documents. Only printed or hard copies of the items listed in this Article are Contract Documents. Files in electronic media format of text, data, graphics, and the like that may be furnished by Owner to Contractor are not Contract Documents, unless otherwise specified in the bid documents.

1.1.1.15. Contract Item or Pay Item - A portion of Work specifically described and for which a price either unit or lump sum is provided. It includes the performance of all Work and the furnishing of labor, equipment and materials described in the Specifications.

1.1.1.16. Contract/Project Limits - The area, including Site and off-Site, within which the Work is to be performed.

1.1.1.17. Contract Price - See Contract Sum.

1.1.1.18. Contract Sum - It is the Contract Price as stated in the Agreement and is the total amount payable by the Owner to the Contractor for the performance of the Work under the Contract Documents subject to additions and deductions, stipulated in the Contract Documents.

1.1.1.19. Contract Time or Time - It is the period of time allotted in the Contract Documents for Substantial Completion of the Work.

1.1.1.20. Contract Unit - A major subdivision of the construction Project identified as such in the Contract Documents.

1.1.1.21. Contracting Officer - The Contracting Officer is the authorized representative of the Owner under the Contract Documents.

1.1.1.22. Contractor - The Contractor is the person or organization that contracts with the Owner for the performance of the Work described in the Contract Documents. The term Contractor, identified as such in the Agreement, means the Contractor or his authorized representative. In cases of Design-Build Contracts, the term Contractor shall also signify the Design-Builder Contractor.

1.1.1.23. Cost of the Work - See section 10.2 for definition.

1.1.1.24. Day - The word "day" shall constitute a calendar day of twenty-four (24) hours measured from midnight to the next midnight.

1.1.1.25. Design-Build Contracts – Shall be those contracts where the Contractor undertakes the duty to design the Work, in addition to performing the duties of Contractor.

1.1.1.26. Design-Builder Contractor – Shall be the Contractor in Design-Build Contracts, who in addition to having all duties of Contractor has the duty to design the Work, as specified in the Contract Documents.

1.1.1.27 Dispute – Any Claim, dispute or other disagreement involving the interpretation of the Contract Documents, a change in the Contract Sum, and or a change in the Contract Time, and other matters in question arising out of, or relating to the Contract or the breach thereof, except for Claims which have been waived by lack of proper notice and/or the making or acceptance of final payment as provided in Articles 13.7.2 and 13.9.1

1.1.1.28. Drawings or Plans - The approved drawings and supplementary drawings showing the location, character, dimensions, and details of the Work to be done which are part of the Contract Documents.

1.1.1.29. Effective Date of the Agreement - The date indicated in the Agreement on which it becomes effective, but if no such date is indicated, it means the date on which the Agreement is signed and delivered by the last of the parties to the Contract.

1.1.1.30. Engineer or Architect - See Architect/Engineer.

1.1.1.31. Equal or Similar and Substitute - "Similar or Equal" or "Substitute", when used in relation to materials, parts, machinery, equipment, formulas of the Project and/or anything to them related, shall mean that they be of substantially the same quality, form, appearance, resistance, endurance, efficiency, capacity, safety, specifications and any other quality inherent, or related, to them as they are indicated in the drawings and/or specifications of the Contract.

1.1.1.32. Equipment - All machinery and implements, together with the necessary supplies for upkeep and maintenance, and all tools and apparatus necessary for the proper construction and acceptable completion of the Work.

1.1.1.33. Extra Work - An item of Work not provided for in the Contract as awarded but found by the Owner or its duly authorized representative necessary for the satisfactory completion of the Contract within its generally intended scope.

1.1.1.34. Extra Work Order - Is a written order issued by the Owner to Contractor and signed by both parties in a unit price contract concerning the performance of the Work or furnishing of materials involving Extra Work. It authorizes a change in the Work, adjustments in the Contract Price and/or Contract Time for services, or Work, for which there is no basis of payment, either direct or indirect, provided in the proposal, or Contract, or if the resulting overruns, or underruns, of any item, or items, exceed certain percentages. Extra Work Orders apply only to unit price contracts. Such Extra Work may be performed at agreed prices or as provided in Section 10.2 of these General Conditions.

1.1.1.35. Federal Agency - Any agency of the government of the United States of America or its succeeding agency.

1.1.1.36. Field Order - A written order issued by the Owner that requires minor changes in the Work but which does not involve a change in the Contract Price or the Contract Time.

1.1.1.37. Final Acceptance - Shall mean the acceptance of the Work by the Owner after the final inspection as evidenced by the Certificate of Final Acceptance sent to Contractor by Owner.

1.1.1.38. Force Account Work - Additional Work that is paid for based on the Cost of the Work as defined in Article 10.2.

1.1.1.39. Force Majeure - Means an act of God; earthquake; tidal wave; hurricane; act of the public enemy; war; blockade; public riot; lighting; fire; flood; explosion; a strike, excluding strikes and any other activity or demonstration by Owner's personnel that does not interfere directly with the Work; and any other cause, whether of the kind specifically enumerated herein or otherwise, which is not reasonably within the sole control of Contractor. A rain, windstorm flood or other natural phenomenon of normal intensity for the particular locality shall not be construed as Force Majeure.

1.1.1.40. Hazardous Environmental Condition - The presence at the Site of asbestos, PCBs, petroleum, hazardous waste, or radioactive material in such quantities or circumstances that may present a substantial danger to persons or property exposed thereto in connection with the Work.

1.1.1.41. Hazardous Waste - The term Hazardous Waste shall have the meaning provided in Section 1004 of the Solid Waste Disposal Act (42 U.S.C. §6903) as amended.

1.1.1.42. Holidays - Saturdays, Sundays and the legal holidays listed below on which the Contractor will not be allowed to perform Work under the Contract except as otherwise ordered or authorized in writing by the Owner. All other Holidays not listed below will be considered working days. Also, if any of the listed holidays falls on a Sunday, the following Monday will be considered a holiday.

New Year's Day	January 1
Three Kings Day	January 6
Good Friday	Variable
Independence Day	July 4
Constitution Day	July 25
Labor Day	First Monday of September
Election Day (when occurring)	Tuesday after 1st Monday in November
Thanksgiving	Fourth Thursday in November
Christmas Day	December 25

1.1.1.43. Laboratory - The material testing laboratory of the Owner or any other testing laboratory which may be approved by the Owner or its duly authorized representative.

1.1.1.44. Laws and Regulations; Laws or Regulations - Any and all applicable laws, rules, regulations, ordinances, codes, and orders of any and all governmental bodies, agencies, authorities, and courts having jurisdiction.

1.1.1.45. Liens - Charges, security interests, or encumbrances upon Project funds, real property, or personal property.

1.1.1.46. Major and Minor Contract Items - Any item having a Contract value equal to or greater than five per cent (5%) of the original Contract amount shall be considered as a major item. All the other Contract items shall be considered as minor items. A minor item may become a major item when the minor item is increased to the extent that the total cost of the item is equal to or greater than five per cent (5%) of the original Contract amount.

1.1.1.47. Materials - Any substances specified for use in the construction of the Project and its appurtenances.

1.1.1.48. Milestone - A principal event specified in the Contract Documents related to an intermediate completion date or time prior to the Substantial Completion of the whole Work.

1.1.1.49. Notice of Award - The written notice by the Owner to the apparent successful bidder stating that upon timely compliance by the apparent successful bidder with the conditions precedent listed therein, Owner will sign and deliver the Agreement.

1.1.1.50. Notice to Proceed - A written notice issued by the Owner to the Contractor fixing the date on which the Contract Time will commence to run and on which Contractor shall start to perform the Work under the Contract Documents. Such Notice to Proceed shall identify the persons included in article 5.2.2. Unless otherwise agreed by the parties, all permits and/or endorsements to be furnished by the Owner needed to start construction of the Project must be obtained prior to issuance of the Notice to Proceed.

1.1.1.51. OCIP - see Owner-Controlled Insurance Program.

1.1.1.52. Off-Site Work - Work to be performed outside of the of the Project's limits.

1.1.1.53. Owner - The Owner is the Department, Agency, Public Corporations, or any other instrumentality of the Commonwealth of Puerto Rico as identified in the Agreement and is referred to throughout the Contract Documents as if singular in number and masculine in gender. The term Owner means the Owner or his authorized representative. It shall also mean any person, or entity, named as such in the Contract Documents.

1.1.1.54. Owner-Controlled Insurance Program - also known as "OCIP". An insurance program under which

Commercial General Liability, Excess General Liability, Builder's Risk, and Contractor's Pollution Liability coverage are procured or provided by the Owner for the Contractor, Subcontractors of any tier, who have been properly enrolled, while performing operations at the Project Site.

1.1.1.55. Owner's Representative – One or more persons or entity designated by the Owner, who will perform the functions of the Owner as described in these General Conditions. The Owner's Representative may employ Project Inspectors and/or other assistants to perform any function, duty or responsibility, as delegated by the Owner's Representative, including but not limited to the detailed inspections of performance of any or all portions of the Work.

1.1.1.56. Partial Utilization - Use by Owner of a substantially completed part of the Work for the purpose for which it is intended (or a related purpose) prior to Substantial Completion of all the Work.

1.1.1.57. Pay Item - See Contract Item.

1.1.1.58. Payment Bond - The security required to be furnished by the Contractor and his Surety and approved by the Owner to guarantee the payment of all persons or entities supplying labor, material and equipment in the prosecution of the Work or services required for completion of the Contract.

1.1.1.59. Performance Bond - The security required to be furnished by the Contractor and his Surety and approved by the Owner to guarantee the completion of all the requirements of the Contract.

1.1.1.60. Plans - See Drawings.

1.1.1.61. Project – The total construction of which the Work to be performed under the Contract Documents is the whole, or part.

1.1.1.62. Project Inspector - The professional, duly licensed and collegiate Engineer or Architect, or a legally qualified entity, contracted and/or designated by the Owner and/or the Owner's Representative to perform, as a Project Inspector, the continuous on Site inspection of any or all portions of the Work.

1.1.1.63. Project Manager- The professional licensed and collegiate Engineer or Architect, designated in accordance with the Contract as the Contractor's authorized representative who is made by Contractor responsible for and placed in charge of the Work.

1.1.1.64. Project Manual - The bound documentary information prepared for bidding and constructing the Work.

1.1.1.65.Project Schedule- A schedule, prepared and maintained by Contractor, describing the sequence and duration of the activities comprising the Work within the Contract Times, as required by Article 6.4 of these General Conditions.

1.1.1.66. Reasonable Close Conformity - Compliance with reasonable and customary manufacturing and construction tolerances when working tolerances are not specified. When working tolerances are specified, reasonably close conformity means compliance with such working tolerances. Without detracting from the complete and absolute discretion of the Owner or its duly authorized representative to insist upon compliance with such tolerances, the Owner or its duly authorized representative may, at his sole option and reasonable discretion, accept variations beyond such tolerances when and where they will not materially affect the value or utility of the Work and the interests of the Owner.

1.1.1.67. Reference Specifications - Specifications issued by other official and/or professional organizations that are referred to and made part of the Owner's specifications and other Contract Documents. Unless otherwise specifically indicated in the Contract Documents, references cited shall be the edition of such specifications in effect at the time the Project is advertised for bids/proposals.

1.1.1.68. Right of Way - A general term denoting land, property, easement or interest therein, usually in a strip, acquired for the Project or for the benefit of another project or public utility.

1.1.1.69. Samples - Physical examples of materials, equipment, or workmanship that are representative of some portion of the Work and which establish the standards by which such portion of the Work will be judged.

1.1.1.70. Shop Drawings or Working Drawings - All drawings, diagrams, schedules, and other data or information, which are specifically prepared or assembled by or for the Contractor and submitted by Contractor to illustrate some portion of the Work.

1.1.1.71. Site - Lands or areas indicated in the Contract Documents as being furnished by Owner upon which the Work is to be performed, including rights-of-way and easements for access thereto, and such other lands furnished by Owner that are designated for the use of Contractor. It shall also mean areas for the performance of off-site work, if same is required in the Contract Documents.

1.1.1.72. Special Conditions - Special requirements, regulations or direction, covering conditions peculiar to a particular project. Special Conditions shall prevail over particular provisions of these General Conditions only when such option is provided in any particular Article of these General Conditions by the use of words such as "unless otherwise indicated in the Contract Documents..." In all other instances these General Conditions shall prevail over any conflicting provision contained in the Special Conditions.

1.1.1.73. Specialty Item - A Contract Item, which is specifically identified in the Contract Documents as exempted from the computations to determine the total amount of the Work that the Contractor may be authorized to subcontract.

1.1.1.74. Specifications - That part of the Contract Documents consisting of written Technical Specifications, descriptions of materials, equipment, systems, standards, and workmanship as applied to the Work and certain administrative details applicable to the Work.

1.1.1.75. Standard Drawings - See Standard Plans.

1.1.1.76. Standard Plans (or Standard Drawings) - Drawings approved for repetitive use, showing details to be used where appropriate, included in the Plans or published as a separate document.

1.1.1.77. Standard Specifications - The set of specifications approved by the Owner for general application and repetitive use.

1.1.1.78. Subcontractor - A Subcontractor is an individual or entity that has a direct contract with the Contractor to perform any of the Work at the Site. The term Subcontractor as referred throughout the Contract Documents means the Subcontractor or his authorized representative.

1.1.1.79. Substantial Completion - The time at which the Work (or a specified part thereof) has progressed to the point where, in the opinion of the Owner, or its authorized representative, the Work (or a specified part thereof) is sufficiently complete, in accordance with the Contract Documents, so that the Work (or a specified part thereof) can be utilized for the purposes for which it is intended. The terms "substantially complete" and "substantially completed" as applied to all or part of the Work refer to Substantial Completion thereof.

1.1.1.80. Supplemental Agreement - A written agreement executed by the Contractor and Owner supplementing the Contract to cover Extra Work and/or changes and/or changed conditions incidental to and necessary for the acceptable completion or the Project.

1.1.1.81. Supplemental Specifications - Approved additions and/or revisions to the Standard Specifications, including Technical Specifications.

1.1.1.82. Supplementary Conditions - That part of the Contract Documents that amends, or supplements, where allowed, these General Conditions.

1.1.1.83 Supplier - A manufacturer, fabricator, supplier, distributor, materialmen, or vendor having a direct contract with Contractor or with any Subcontractor to furnish materials or equipment to be incorporated in the Work.

1.1.1.84. Surety - The insurance or bonding corporation or other legal entity, other than the Contractor, authorized to do business in Puerto Rico, bound with and for the Contractor for the proposal guaranty and/or the Payment Bond and/or the Performance Bond, or other bonds and insurances required by the Contract Documents.

1.1.1.85. Technical Specifications - The directions, provisions and requirements setting forth, or relating to, the performance of the Work and to the kind and quality of materials and labor to be furnished under the Contract for the execution of the Project. Any entity making changes in the Technical Specifications and/or Plans and Drawings, must perform so complying with all laws, codes, rules and regulations applying to them.

1.1.1.86. Underground Facilities/Utilities - All underground pipelines, conduits, ducts, cables, wires, manholes, vaults, tanks, tunnels, or other such facilities or attachments, and any easements containing such facilities, including those that convey electricity, gases, steam, liquid petroleum products, telephone or other communications, cable television, water, wastewater, storm water, other liquids or chemicals, or traffic or other control systems.

1.1.1.87. Unit Price Work - Work to be paid for based on unit prices.

1.1.1.88. Utility - A public or privately owned agency or entity and the lines and facilities for producing, transmitting or distributing data or voice communications, power, electricity, gas, oil, gasoline, water, sewer and similar commodities for public or private use.

1.1.1.89. Work - The entire construction referred to in the Agreement and the performance of the services identified to be provided in the Contract Documents. Work includes and is the result of performing or providing all labor, services, and documentation necessary to produce and make workable such construction, and furnishing, installing, and incorporating all materials and equipment into such construction, all as required by the Contract Documents.

1.1.1.90. Work Change Directive - A written statement to Contractor issued on or after the Effective Date of the Agreement and signed by the Owner and recommended by the Architect/Engineer ordering an addition, deletion, or revision in the Work, or responding to differing or unforeseen subsurface or physical conditions under which the Work is to be performed or to emergencies. A Work Change Directive will not change the Contract Price or the Contract Time but is evidence that the parties expect that the change ordered or documented by a Work Change Directive will be incorporated in a subsequently issued Change Order following negotiations by the parties as to its effect, if any, on the Contract Price or Contract Time.

1.1.1.91. Work Order - A written order, signed by the Owner, or its duly authorized representative, which requires performance of a specific contractual issue by, the Contractor without negotiation of any sort. If Contractor is not in agreement with the Work Order, he may present a Claim as established in Article 11.5.

1.1.1.92. Working Day - A calendar day, exclusive of Saturday and Sunday and designated legal holidays. All periods of time under the Contract Documents shall be measured in calendar days, unless Working Days are specified.

1.1.1.93. Working Drawings - See Shop Drawings.

1.1.1.94. Written Amendment - See Supplemental Agreement.

1.2 Other Terms - The Owner's manuals and sets of regulations contain additional terms, not included above, which are used in the plans and other Contract Documents. Such terms shall be interpreted as defined in the Owner's manuals and sets of regulations.

1.3 Terminology

1.3.1 Intent of Certain Terms or Adjectives.

1.3.1.1. Unless otherwise indicated in the Contract Documents, whenever in the Contract Documents the terms "as allowed," "as approved," or terms of like effect or import are used, or the adjectives "reasonable," "suitable," "acceptable," "proper," "satisfactory," or adjectives of like effect or import are used to describe an action or determination of Architect/Engineer as to the Work, it is intended that such action or determination will be solely to evaluate, in general, the completed Work for compliance with the requirements of and information in the Contract Documents and conformance with the design concept of the completed Project as a functioning whole as shown or indicated in the Contract Documents (unless there is a specific statement indicating otherwise). The use of any such term or adjective shall not be effective to assign to Architect/Engineer any duty or authority to supervise or direct the performance of the Work or any duty or authority to undertake responsibility contrary to the provisions of these General Conditions and the Contract Documents.

1.3.2 Deficient.

1.3.2.1. The word "deficient," when modifying the word "Work," refers to Work, or part of it, that is unsatisfactory, faulty, or defective in that it does not conform to the Contract Document or does not meet the requirements of any inspection, reference standard, test, or approval referred to in the Contract Documents, or has been damaged prior to Owner's Representative's recommendation of final payment, unless responsibility for the protection thereof has been assumed by Owner at Substantial Completion in accordance with these General Conditions.

1.3.3 Furnish, Install, Perform, Provide.

1.3.3.1. The word "furnish," when used in connection with services, materials, or equipment, shall mean to supply and deliver said services, materials, or equipment to the Site (or some other specified location) ready for use, assembling, or installation and in usable or operable condition.

1.3.3.2. The word "install," when used in connection with services, materials, or equipment, shall mean to put into use or place in final position, said services, materials, or equipment complete and ready for intended use.

1.3.3.3. The words "perform" or "provide," when used in connection with services, materials, or equipment, shall mean to furnish and install said services, materials, or equipment complete and ready for intended use.

1.3.3.4. When "furnish," "install," "perform," or "provide" is not used in connection with services, materials, or equipment in a context clearly requiring an obligation of Contractor, "install", "perform" and/or, "provide" is implied.

1.3.4 Unless stated otherwise in the Contract Documents, words or phrases that have a well-known technical or construction industry or trade meaning are used in the Contract Documents in accordance with such recognized meaning.

ARTICLE 2 - CONTRACT DOCUMENTS

2.1 Intent and Interpretation of Contract Documents

2.1.1 The Contract Documents constitutes the Contract. The Contract Documents represent the entire and integrated agreement between the parties hereto and supersedes all prior negotiations, representations, or agreements, either written or oral, including the bidding documents. The Contract Documents may be amended or modified as set forth in section 2.6.

2.1.2 The intent of the Contract Documents is to provide for the construction and completion of the Work described.

2.1.3 The Contractor shall furnish all labor, materials, equipment, tools, transportation and supplies required to complete the Work in accordance with the plans, specifications and terms of the Contract Documents.

2.1.4 The relationship which the parties intend to create under the Contract Documents is that of principal and independent Contractor and nothing herein is intended or shall be construed, so as to create a relationship of any kind, form or manner, such as but not limited to partnership, co-venturers, or employment between the Owner and Contractor, unless clearly otherwise expressed in the Contract Documents.

2.2 Order of Precedence of Contract Documents

2.2.1 The Contract Documents for each particular Project shall specify the order of precedence among the diverse documents that form the Contract Documents, except for the order of precedence of the General Conditions which may not be altered unless allowed to be altered by means of the Special Conditions as described in Article 1.1.1.72. If no such order of precedence is established in the Contract Documents for the Project, the following order shall be followed:

2.2.1.1. Agreement (which shall include the Bonds and required insurance policies).

2.2.1.2. Dated Contractor's Proposal

2.2.1.3. All addenda issued prior to Bid Date. Unless no conflict exist between addenda, the issuance of a subsequent addendum will supersede all previously issued addenda.

2.2.1.4. Instructions to Bidders

2.2.1.5. The General Conditions of the Contract, (except where in accordance with Article 1.1.1.72 they are allowed to be changed by the Special Conditions).

2.2.1.6. Special Conditions.

2.2.1.7. Plans or Drawings

2.2.1.8. The Standard Drawings.

2.2.1.9. Specifications.

2.2.1.10. Technical Specifications.

2.2.1.11. Supplemental Specifications.

2.2.1.12. Standard Specifications.

2.3 Written Interpretations

2.3.1 Provided reasonable time is granted to Owner, written interpretations necessary for the proper execution or progress of the Work in the form of drawings, or otherwise, will be issued with reasonable promptness by the Owner, its designated representative, or Architect/Engineer so as not to adversely affect the critical path of the Project Schedule.

2.3.2 Contractor may make written request to the Owner, Owner's Representative, or the Architect/Engineer for such interpretations, when deemed necessary for the proper progress of the Work.

2.3.2.1. Such interpretations shall be consistent with and reasonably inferable from the Contract Documents and may be effected by Field Orders.

2.3.2.2. Interpretation drawings are not necessarily changes in the Work.

2.3.3 Except as may otherwise specifically stated in the Contract Documents, the provisions of the Contract Documents shall take precedence in resolving any conflict, error, ambiguity, or discrepancy between the provisions of the Contract Documents and:

2.3.3.1. the provisions of any standard, specification, manual, code, or instruction (whether or not specifically incorporated by reference in the Contract Documents); or

2.3.3.2. the provisions of any Laws or Regulations applicable to the performance of the Work (unless such an interpretation of the provisions of the Contract Documents would result in violation of such Law or Regulation).

2.4 Execution and Correlation

2.4.1. The Agreement shall be signed by the Owner and Contractor or their authorized representatives. The other component parts of the Contract Documents, if not signed by the Owner or Contractor, shall be marked by their authorized representative.

2.4.2 By executing the Contract Documents, the Contractor represents that he has visited the Contract Limits within the Site, familiarized himself with the local conditions under which the Work is to be performed, correlated his observations with the requirements of Contract Documents, and accepts the same.

2.4.2.1 The Owner warrants that it has submitted all the necessary documents required of Owner to be submitted to the appropriate governmental agencies needed for the prosecution of the Work, as required by applicable laws and regulations.

2.4.3 The Owner and the Contractor acknowledge that no service or Work under the Contract Documents will be performed until both parties duly sign the Contract and the Notice to Proceed is issued.

2.4.3.1. No payment and/or disbursement will be made or paid for services rendered in violation of this clause.

2.4.4 The Contract Time.

2.4.4.1. The Contract Time must be specifically expressed on the Contract.

2.4.4.2. The Contract Time will be extended by the same number of days in which the term to execute the Work is extended by Change Orders or by any other mean allowed or permitted by the Contract or Contract Documents.

2.4.4.3. Furthermore, the parties agree that no Work or service will be performed or received beyond Final Acceptance of the Contract.

2.4.4.4. No payment and/or disbursement will be made or paid for services rendered in violation of this clause.

2.4.5 The Contract Documents are complementary, and what is required by anyone shall be as obligatory as if required by all. The intention of the Contract Documents is to include all labor, materials, equipment and other items as provided on these General Conditions necessary for the proper execution and completion of the Work.

2.4.5.1. It is not intended that Work not covered under any heading, section, branch, class or trade of the Specifications shall be supplied unless it is required elsewhere in the Contract Documents.

2.4.5.2. The organization of the Specifications in divisions, sections, articles, and the arrangement of drawings shall not control the Contractor in dividing the Work among subcontractors or in establishing the extent of Work to be performed by any trade.

2.5 Review of Contract Documents and Field Conditions by Contractor.

2.5.1 Before undertaking each part of the Work, Contractor shall carefully study and compare the Contract Documents with each other and check and verify pertinent dimensions and quantities therein and all applicable field measurements.

2.5.2 Contractor shall promptly report in writing to Owner any conflict, error, ambiguity, inconsistency, discrepancy, or omission that Contractor may discover and shall obtain a written interpretation or clarification from Owner before proceeding with any Work affected by said conflict, error, ambiguity, inconsistency, discrepancy or omission.

2.5.2.1. However, Contractor shall not be liable to Owner for failure to report any conflict, error, ambiguity, or discrepancy in the Contract Documents, unless Contractor failed to report it to the Owner with sufficient time for the Owner to provide a solution before the critical path of the Project is affected.

2.5.2.2. If the Contractor performs any construction activity in violation of this Article 2.5, the Contractor shall assume appropriate responsibility for such performance and shall bear an appropriate amount of the costs attributed to correction.

2.5.2.3. The Owner shall provide a solution to any reported conflict, error, ambiguity, discrepancy, or omission and if such solution adversely affects cost or the critical path of the Project, Owner will adjust Contract Price and Contract Time accordingly.

2.6 Amending and Supplementing Contract Documents

2.6.1 The Contract Documents may be amended to provide for additions, deletions, and revisions in the Work or to modify the terms and conditions thereof in one (1) or more of the following ways:

2.6.1.1. a Written Amendment;

2.6.1.2. a Change Order;

2.6.1.3. an Extra Work Order; or

2.6.1.4. a Work Change Directive.

2.6.2 The requirements of the Contract Documents may be supplemented and minor variations and deviations in

the Work may be authorized, by one (1) or more of the followings ways:

2.6.2.1. a Field Order;

2.6.2.2. Owner's, or his authorized representative's, approval of a Shop Drawing or Sample; or

2.6.2.3. Owner's, his authorized representatives, or Architect/Engineer's written interpretation or clarification.

2..6.3 A modification may be made only after execution of the Contract.

2..7 Copies Furnished, Ownership and Reuse of Documents

2.7.1. The Contractor will be furnished, free of charge, four (4) complete copies of the Contract Documents. Additional copies will be furnished upon request at the cost of reproduction. If Contractor so requests it, Owner will also furnish, free of charge, if available, an electronic file in PLT format (plot to File) so that the Contractor may make the copies of plans and/or drawings that he needs to build the Project. If such electronic files are not available, the Owner shall allow the Contractor to prepare electronic files and to print, at Contractor's cost, but without additional payment to Owner or Architect/Engineer, those copies needed for use by Contractor.

2.7.2. All Drawings, Specifications and copies thereof furnished by the Owner, Architect/Engineer, or Owner's Representative are, and shall remain, property of the Owner.

2.7.2.1. The Contractor can make copies of all the Drawings, Specifications, and other Contract Documents without permission, and without the payment of any fees or royalties, to the Owner, Architect/Engineer, or Owner's Representative as long as they are necessary for use in the execution of the Work.

2.7.3. Contractor and any Subcontractor or Supplier or other individual or entity performing or furnishing any of the Work under a direct or indirect contract with Owner:

2.7.3.1. shall not have or acquire any title to or ownership rights in any of the Drawings, Specifications, or other documents (or copies of any thereof) prepared by or bearing the seal of Owner, Architect/Engineer or Engineer's Consultant, including electronic media editions; and

2.7.3.2. shall not reuse any of such Drawings, Specifications, other documents, or copies thereof on extension of the Project or any other project without written consent of Owner.

2.7.4 This prohibition will survive final payment, completion, and acceptance of the Work, or termination or completion of the Contract. Nothing herein shall preclude Contractor from retaining copies of the Contract Documents for record purposes.

ARTICLE 3- BONDS AND INSURANCE

3.1 General- For Owners with OCIP

3.1.1 The Contractor shall not commence work under the Contract until he has obtained the various insurances policies and bonds specified in the Owner's Controlled Insurance Program. Owner shall provide to Contractor an exact copy of the applicable Owner Controlled Insurance Program manual together with the Contract Documents.

3.2 General- For Owners without OCIP.

3.2.1 The Contractor shall not commence work under the Contract until he has obtained the various

insurances and bonds specified in this section and has submitted to the Owner certificates of insurance (and other evidence requested by Owner) evidencing his compliance with the various insurance requirements set forth in this Article.

3.2.1.1. Unless otherwise indicated in the Contract Documents, Contractor must, within ten (10) calendar days from the Notice of Award, provide to Owner, in form satisfactory to Owner as provided in detail in this Article, the following:

3.2.1.1.1. Performance Bond

3.2.1.1.2. Payment Bonds

3.2.1.1.3. Workmen's Compensation Insurance Policy issued by The Puerto Rico State Insurance Fund and all Social Insurances required by law.

3.2.1.1.4. General Liability Insurance

3.2.1.1.5. Business Auto Policy

3.2.1.1.6. Contract Works Policy (Builder's Risk)

3.2.1.1.7. Installation Floater Policy (when applicable)

3.2.2 Notwithstanding the requirements set forth in this Article, the Owner may opt out of part of the requirements included in this Article and require any and all other policies that it understands are needed for its particular construction projects, including other policies not required herein.

3.2.2.1. However, such decision to opt out of part of the requirements of this Article must be written and signed by the Owner stating particularly the reasoning behind it Such written decision must be made part of Owner's Project file.

3.2.3. The insurance and bond policies required herein shall be obtained from insurance and surety companies complying with the requirements of Puerto Rico's Insurance Commissioner.

3.2.3.1. Prior to Bid announcement Date, Owner will publish a list of unacceptable insurance and bonding companies so that Contractor has knowledge of which companies are not authorized to provide insurances or bonds for the Work. Unless otherwise indicated in the Contract Documents, the Contractor must obtain an endorsement naming the Owner as an additional insured in each of the required insurance policies in this Article (as applicable).

3.2.4 The Contractor shall, throughout the performance of Work under the Contract and until the Final Acceptance of the Project, maintain current, and in effect all the required insurance, except the Contract Works Policy (Builder's Risk), which shall terminate on the date of Substantial Completion.

3.2.4.1. If on the termination date of any of the policies, the Project is still under construction and the Contractor has not renewed the policies, the Owner can renew them and deduct the amount paid for the premium, and applicable costs from the next payment, only if Contractor does not remedy and provide timely evidence of coverage.

3.2.5. Insurance coverage in the minimum limit amounts set forth herein shall not be construed to release the

Contractor from liability in excess of such coverage limit. Contractor must give thirty (30) calendar days written notice to Owner before any policy coverage is changed, canceled or not renewed and shall cause the insurance carrier to do the same.

3.2.6 Acceptance of Insurance; Option to Replace. If either Owner or Contractor has any objection to the coverage afforded by or to other provisions of the insurance required to be purchased and maintained by the other party in accordance with this Article on the basis of non-conformance with the Contract Documents, the objecting party shall so notify the other party in writing within twenty (20) days after receipt of the certificates of insurance and bonds (or other such evidence) required by Article 3.1.1.

3.2.6.1. Owner and Contractor shall each provide to the other such additional information with respect to insurance provided as the other may reasonably request.

3.2.6.2. If either party fails to purchase or maintain all of the insurance required of such party by the Contract Documents, such party shall notify the other party in writing of such failure prior to the start of the Work, or of such failure is to maintain, prior to any change in the required coverage.

3.2.6.3. Without prejudice to any other right or remedy, the other party may elect to obtain equivalent insurance to protect such other party's interest at the expense of the party who was required to provide such coverage, and a Change Order (or Extra Work Order in a unit price Contract) shall be issued to adjust the Contract Price accordingly.

3.2.7. If Owner finds it necessary or convenient to occupy or use a portion or portions of the Work prior to Substantial Completion of all the Work as provided in section 14.5 no such use or occupancy shall commence before the insurers providing the property insurance pursuant to section 3.6 have acknowledged notice thereof and in writing effected any changes in coverage needed thereby.

3.2.7.1. The insurers providing the property insurance shall consent by endorsement on the policy or policies, but the property insurance shall not be canceled or permitted to lapse on account of any such partial use or occupancy.

3.2.7.2. If the Owner accepts, occupies, or uses a portion, or portions, of the Work for its intended use, or whatever use he deems necessary or convenient, it is the Owner's responsibility to insure the property comprising said portion, or portions of the Work.

3.2.7.3. If the Contractor obtained the Contract Works Policy (Builder's Risk) for the Work, the Owner may request that Contractor continues to carry said insurance and will pay the cost, as a Change Order, based on the proportion of the occupied area versus the total Project area.

3.2.7.4. If requested by Contractor, the Owner shall supply copy of its insurance policy, and/or certificate of insurance evidencing that said portion, or portions, of the Work now under the Owner's care, custody and control is properly insured.

3.3 Performance, Payment, and Other Bonds

3.3.1. Unless otherwise stated in the Contract Documents, the Contractor must, within ten (10) calendar days from the date of Notice of Award, furnish and file with the Owner, in form satisfactory to, and with Sureties approved by the Owner, the following:

3.3.1.1. Performance Bond to guarantee the faithful performance of the Contract, in an amount equal to at least fifty percent (50%), but not more than one hundred percent (100%) of the Contract Sum, as stated in the Supplementary General Conditions of the Contract. If none is stated, the amount shall be one hundred percent

(100%) of the Contract Sum.

3.3.1.2. Payment Bond, including Labor Bond in an amount equal to at least fifty percent (50%), but not more than one hundred percent (100%) of the Contract Sum, as stated in Supplementary General Conditions of the Contract. If none is stated, the amount shall be one hundred percent (100%) of the Contract Sum.

3.3.1.3. A separate and additional Payment Bond in an amount equal to the requirements of Law No. 111, approved June 22, 1961, as it may be amended in the future, payable to the Secretary of Labor of the Commonwealth of Puerto Rico to guarantee payment to laborers and employees of the Contractor.

3.3.1.4. Contractor shall also furnish such other Bonds as are required by the Contract Documents.

3.3.2. The Payment and Performance Bonds shall remain in effect as follows:

3.3.2.1. Under the Performance Bond: one (1) year after the date when the final payment becomes due for warranty work, as stipulated in the warranty clause, or as provided otherwise by Laws or Regulations or by the Contract Documents.

3.3.2.2. Under the Payment Bond: six (6) months after the retainage is paid in full to the Contractor, except as provided otherwise by Laws or Regulations or by the Contract Documents.

3.3.3 All Bonds shall be in the form prescribed by the Contract Documents except as provided otherwise by Laws or Regulations. All Bonds must be signed by an attorney in fact duly authorized by the Commissioner of Insurance of Puerto Rico, and must be accompanied by a certified copy of such power of attorney.

3.3.4 If the Surety on any Bond furnished by Contractor is declared bankrupt or becomes insolvent or its right to do business is terminated in any state where any part of the Project is located or it ceases to meet the requirements of the Puerto Rico's Insurance Commissioner, Contractor shall within twenty (20) days thereafter substitute said Bond and Surety with acceptable substitutes.

3.4 Workmen's Compensation Insurance

3.4.1 The Contractor shall provide Worker's Compensation Insurance as required by the "Workers' Compensation Act of the Commonwealth of Puerto Rico". The Contractor shall furnish the Owner a certificate from the State Insurance Fund Corporation covered by the Workers' Compensation Act of the Commonwealth of Puerto Rico.

3.4.2 The Contractor shall also be responsible for compliance with said "Workers' Compensation Act" by all his subcontractors and agents.

3.5 Contractor's Liability Insurance

3.5.1 Contractor shall purchase and maintain the following liability insurance coverage, in an occurrence format, and other insurance as is appropriate for the Work being performed and will provide protection from claims set forth which may arise out of or result from Contractor's performance of the Work and Contractor's other obligations under the Contract Documents, whether it is to be performed by Contractor, any Subcontractor or Supplier, or by anyone directly or indirectly employed by any of them to perform any of the Work, or by anyone for whose acts any of them may be liable:

3.5.1.1. Limits. Unless otherwise stated in the Special Conditions of the Contract, the liability insurance limits shall not be less than:

3.5.1.1.1.	General Aggregate Limit	$1,000,000
3.5.1.1.2.	Products/Completed Operations Aggregate Limit	$1,000,000
3.5.1.1.3.	Personal and Advertising Injury Limits	$ 500,000
3.5.1.1.4.	Each Occurrence Limit	$ 500,000
3.5.1.1.5.	Fire Damage Limit	$ 50,000
3.5.1.1.6.	Medical Expense Limit	$ 5,000

3.5.1.2. Claims for damages because of bodily injury, occupational sickness or disease, or death of any person other than Contractor's employees;

3.5.1.3. Claims for damages insured by reasonably available personal injury liability coverage which are sustained: (i) by any person as a result of an offense directly or indirectly related to the employment of such person by Contractor, or (ii) by any other person for any other reason;

3.5.1.4. Claims for damages, other than to the Work itself, because o injury to or destruction of tangible property wherever located, including loss of use resulting there from.

3.5.2 The insurance policies so required by this section 3.4 to be purchased and maintained, unless otherwise specified in the Contract Documents, shall:

3.5.2.1. include at least the specific coverage and be written for no less than the limits of liability provided in the Supplementary Conditions or required by Laws or Regulations, whichever is greater,

3.5.2.2. include complete operations/premises/products insurance;

3.5.2.3. include contractual liability insurance covering Contractor's indemnity obligations under these General Conditions. Unless otherwise specified in the Contract Documents, the indemnity clause shall read as follows:

3.5.2.3.1. The Contractor for itself, agents, employees, successors and assigns agrees to save harmless the Owner, its Officers, Agents, Employees and Architect/Engineer from and against any and all claims, demands and/or suits, except as stated below, whether judicial or extra judicial for any cost whatever arising out or related to the execution of the Contract, and its insurers shall defend the Owner, its officers, agents, Employees and Architect/Engineer from such claims, demands and/or suits and shall bear all the expenses for such defense contemplated within the coverage limits provided by the Contractor's general liability policy, except where such claims, demands and/or suits are due solely to the negligence of the Owner, its Officers, Agents, employees and negligence, errors and/or omissions of the work performed by the Architect/Engineer.

3.5.2.4. include personal & advertising liability.

3.5.2.5 include XCU hazards (Explosion, Collapse, and Underground), as applicable.

3.5.2.6. include Contractor's subcontracted work;

3.5.2.7. include fire damage and medical expenses;

3.5.2.8. remain in effect at least until Final Acceptance and at all times thereafter when Contractor may be correcting, removing or replacing Work; in accordance with section 13.7 and

3.5.2.9. Include Employer's Liability - Stop Gap coverage with a minimum limit of five hundred thousand

dollars ($500,000.00) each personal occurrence and five hundred thousand dollars ($500,000.00) each accident.

3.6 Business Auto Policy

3.6.1 Automobile Liability coverage shall be written to protect the Contractor against all claims for bodily injuries to members of the public and damage to property of others arising from the use of motor vehicles, and shall cover operations on or the site of all motor vehicles, whether they are owned, non-owned or hired.

3.6.2 Unless otherwise stated in the Contract Documents, the liability limits shall not be less than:

3.6.2.1. Bodily Injury: two hundred and fifty thousand dollars ($250,000.00) each person and five hundred thousand dollars ($500,000.00) each occurrence.

3.6.2.2. Property Damage: one hundred thousand dollars ($100,000.00) each occurrence or two hundred and fifty thousand dollars ($250,000.00) combined single limit for bodily injuries and property damage liability.

3.7 Contract Work-Builders Risk Insurance

3.7.1 Unless otherwise provided in the Contract Documents, the Contractor shall provide a Builder's Risk policy for the amount of coverage set in the Contract Documents. The Builders Risk policy will insure against property damage to the building or structure being constructed or erected during the course of construction.

3.7.1.1. The description of covered property should include all fixtures, materials and supplies to be used in or incidental to, the construction. It should also cover equipment, machinery, materials, etc., not yet installed but destined to become a permanent part of the structure, on the Site or at off Site temporary storage locations.

3.7.1.2. This insurance shall be written under an Inland Marine all risk form, including earthquake, windstorm and flood coverage and shall protect the Contractor, Subcontractors, and the Owner and shall contain a waiver of subrogation clause against the insured parties.

3.7.1.3. Coverage shall be for an amount equal to the Contract Sum, unless otherwise specified in the Contract Documents.

3.7.1.4. Coverage shall include expenses incurred in the repair or replacement of any insured property.

3.7.1.5. Coverage shall include materials and/or equipment stored at the Site or at another location that was agreed to in writing by Owner prior to being incorporated in the Work, provided that such materials and/or equipment have been included in an Application for Payment recommended by Owner.

3.7.1.6. Coverage shall allow partial utilization of the Work by Owner, if Owner complies with Article 3.2.7, herein

3.7.1.7. Coverage shall include testing and startup.

3.7.1.8. Coverage shall be maintained in effect until Substantial Completion is achieved unless otherwise agreed to in writing by Owner and Contractor with thirty (30) days written notice to each other additional insured to whom a certificate of insurance has been issued.

3.7.1.9. Unless otherwise stated in the Contract Documents, flood coverage limits shall be for the Contract Sum or up to a maximum of $250,000.00, whichever is lower.

3.7.1.10. Deductibles under this Policy shall be no more than:

3.7.1.10.1. Flooding no more than $5,000.00

3.7.1.10.2. For named windstorms, or hurricanes, no more than two percent (2%) of the Contract Sum.

3.7.1.10.3. For Earthquakes, no more than five percent (5%) of the total Contract Sum.

3.7.2. If the Contract Documents specify that Owner shall purchase the Builders Risk policy, said policy shall be under the same or better terms and conditions, than those indicated in section 3.6. If Contractor requests in writing that other special insurance be included in the property insurance policies provided under this section 3.6, Owner shall, if possible, include such insurance, and the cost thereof will be charged to Contractor by appropriate Change Order or Written Amendment.

3.7.2.1. Unless otherwise provided in the contract Documents, Owner shall be responsible for the deductible under this policy.

3.7.2.2. Prior to commencement of the Work at the Site, Owner shall in writing advice Contractor whether or not such other insurance has been procured by Owner.

3.7.3. The Contract Documents shall set forth, whenever applicable, which party shall purchase and maintain such boiler and machinery insurance or additional property insurance as may be required by the Supplementary Conditions or Laws and Regulations which will insure the interest of Owner, Contractor, and Subcontractors, each of whom is deemed to have an insurable interest and each shall be listed as an insured or additional insured. Unless otherwise set forth in the Contract Documents, said insurance, if needed, shall be purchased and paid for, by the Owner.

3.7.4. Receipt and Application of Insurance Proceeds

3.7.4.1. If Owner purchases said insurance, Owner is authorized and shall have power to adjust and settle any loss with the insurers unless one of the parties in interest shall object in writing to Owner's exercise of this power within fifteen (15) days after the occurrence of loss.

3.7.4.2. Owner shall settle with the insurers in accordance with what is agreed by the parties who own the insurable interest.

3.7.4.3. If no such agreement among the parties in interest is reached, Owner shall, on behalf of all parties, adjust and settle the loss with the insurers.

3.8 Installation Floater Policy

3.8.1. This policy shall be provided by the Contractor when Builders Risk policy does not apply and coverage is required for only a specific type of property during its installation.

3.8.2. The limit of insurance shall include the aggregate value of the Contractor's, Subcontractor's, or Owner's furnished equipment and materials to be erected or installed by the Contractor.

3.8.3. This insurance shall be written under an Inland Marine all risk form, including earthquake, windstorm and flood coverage and shall protect the Contractor, Subcontractors, and the Owner and shall contain a waiver of subrogation clause against the insured parties.

3.9 Subcontractor's and Subcontractor's Liability Insurance.

3.9.1. Unless otherwise indicated in the Contract Documents, the Contractor shall, throughout the performance of Work under the Contract, procure and maintain in effect, and require all Subcontractors and others performing any such Work to procure and maintain in effect, insurance of the types applicable and with limits no less than the minimum amounts specified above, or insure the activity of his Subcontractors in his own policy.

3.10 Owner's Liability Insurance.

3.10.1 In addition to the insurance required to be provided by Contractor under Article 3.4, Owner, at Owner's option, may purchase and maintain Owner's own liability insurance as will protect Owner against claims which may arise from operations under the Contract Documents.

ARTICLE 4-SITE

4.1 Availability of Lands

4.1.1. Unless otherwise stated in the Contract Documents, Owner shall furnish the Site.

4.1.1.1. Owner shall notify Contractor of any known encumbrances or restrictions specifically related to use of the Site with which Contractor must comply in performing the Work.

4.1.1.2. Owner will obtain in a manner that does not adversely affect the critical path of the Work the easements for permanent structures or permanent changes to existing facilities.

4.1.1.3. If Contractor and Owner are unable to agree on the entitlement to or on the amount of any adjustment in the Contract Price or Contract Time, or both, as a result of any delay in Owner's complying with the responsibilities indicated above, Contractor may make a Claim therefore as provided in section 11.5.

4.1.2. Contractor shall secure and provide all additional lands and access thereto that may be required for temporary construction facilities or storage of materials and equipment.

4.2 Subsurface and Physical Conditions

4.2.1. Reports and Drawings. The Supplementary Conditions identify:

4.2.1.1. those reports of explorations and tests of subsurface conditions at or contiguous to the Site that Architect/Engineer has used in preparing the Contract Documents; and

4.2.1.2. those drawings of physical conditions in or relating to existing surface or subsurface structures at or contiguous to the Site (except Underground Facilities) that Architect/Engineer has used in preparing the Contract Documents.

4.2.2. Limited Reliance by Contractor on Technical Data Provided. On lineal type projects, Contractor may rely upon the general accuracy of the "technical data" contained in such reports and drawings, but such reports and drawings are

not part of the Contract Documents. Such "technical data" is identified in the Supplementary Conditions. Except for such reliance on such "technical data", Contractor may not rely upon or make any Claim against Owner, Architect/Engineer, or any of Architect/Engineer's Consultants with respect to:

4.2.2.1. the completeness of such reports and drawings for Contractor's construction purposes, including, but not limited to, any aspects of the means, methods, techniques, sequences, and procedures of construction to be employed by Contractor, and safety precautions and programs incident thereto; or

4.2.2.2. other data, interpretations, opinions, and information contained in such reports or shown or indicated in such drawings; or

4.2.2.3. any Contractor interpretation of, or conclusion drawn from, any "technical data" or any such other data, interpretations, opinions, or information.

4.2.3. Reliance by Contractor on Technical Data Provided. On building construction projects, Contractor may rely upon the general accuracy of the "technical data" contained in such reports and drawings, and such reports and drawings are part of the Contract Documents. Such "technical data" is identified in the Supplementary Conditions. Except for such reliance on such "technical data", Contractor may not rely upon or make any Claim against Owner, Architect/Engineer, or any of Architect/Engineer's Consultants with respect to:

4.2.3.1. the completeness of such reports and drawings for Contractor's construction purposes, including, but not limited to, any aspects of the means, methods, techniques, sequences, and procedures of construction to be employed by Contractor, and safety precautions and programs incident thereto; or

4

4.2.3.2. any Contractor interpretation of or conclusion drawn from any "technical data" or any such other data, interpretations, opinions, or information.

4.3 Differing Subsurface or Physical Conditions

4.3.1. Notice: If Contractor believes that any subsurface or physical condition at or contiguous to the Site that is uncovered or revealed either:

4.3.1.1. is of such a nature as to establish that any "technical data" on which Contractor is entitled to rely as provided in section 4.2 is materially inaccurate; or

4.3.1.2. is of such a nature as to require a change in the Contract Documents; or

4.3.1.3. differs materially from that shown or indicated in the Contract Documents; or

4.3.1.4. is of an unusual nature, and differs materially from conditions ordinarily encountered and generally recognized as inherent in work of the character provided for in the Contract Documents; then Contractor, shall promptly, in no event later than 3 working days, after becoming aware thereof and before further disturbing the subsurface or physical conditions or performing any Work in connection therewith (except in an emergency as required by Article 6.16), notify Owner's Representative, Owner and Architect/Engineer in writing about such condition. Contractor shall not further disturb such condition or perform any Work in connection therewith (except as aforesaid) until receipt of written order to do so.

4.3.2. Architect/Engineer's and/or Owner's Representative Review. After receipt of written notice as required by the preceding Article, Architect/Engineer and/or Owner's Representative will promptly review the pertinent condition and determine the necessity of Owner's obtaining additional exploration or tests with respect thereto, and advice Owner in writing of Architect/Engineer's and/or Owner's Representative findings and conclusions.

4.4. Price and Time Adjustments

4.4.1. The Contract Price, or the Contract Time, or both will be equitably adjusted to the extent that the existence of such differing subsurface or physical condition causes an increase or decrease in Contractor's costs of, or time required for, performance of the Work; subject, however, to the following:

4.4.1.1. such condition must meet any one or more of the categories described in Article 4.3.1; and

4.4.1.2. with respect to Work that is paid for on a Unit Price Basis, any adjustment in Contract Price will be subject to the provisions of section 11.3.

4.4.2 Contractor shall not be entitled to any adjustment in the Contract Price or Contract Time if:

4.4.2.1. Contractor knew of the existence of such conditions at the time Contractor made a final commitment to Owner in respect of Contract Price and Contract Time by the submission of a Bid or by becoming bound under a negotiated contract; or

4.4.2.2. the existence of such condition could reasonably have been discovered or revealed as a result of any visual examination, investigation, exploration, test, or study of the Site and contiguous areas required by the Bidding Requirements or Contract Documents to be conducted by Contractor prior to Contractor's making such final commitment; or

4.4.2.3. Contractor failed to give the written notice within the time and as required by Article 4.3.1.

4.4.3 If Owner and Contractor are unable to agree on entitlement to or on the amount or extent, if any, of any adjustment in the Contract Price, or Contract Time, or both, a Claim may be made therefore as provided in section 11.5.

4.5 Underground Facilities

4.5.1. Shown or Indicated. The information and/or data shown or indicated in the Contract Documents with respect to existing Underground Facilities at or contiguous to the Site is based on information and data furnished to Owner's Representative, Owner or Architect/Engineer by the owners of such Underground Facilities, including Owner, or by others. Unless it is otherwise expressly provided in the Supplementary Conditions:

4.5.1.1. Owner and Architect/Engineer shall be responsible for the reasonable accuracy or completeness of any such information or data; and

4.5.1.2. the costs of all of the following will be included in the Contract Price, and Contractor shall have full responsibility for:

4.5.1.2. 1. reviewing and checking all such information and data;

4.5.1.2.2. locating all Underground Facilities shown or indicated in the Contract Documents;

4.5.1.2.3. coordination of the Work with the owners of such Underground Facilities, including Owner, during construction; and

4.5.1.2.4. the safety and protection of all such Underground Facilities and repairing any damage thereto

resulting from the Work.

4.5.2. Not Shown or Indicated.

4.5.2.1. If an Underground Facility is uncovered or revealed at or contiguous to the Site which was not shown or indicated, or not shown or indicated with reasonable accuracy in the Contract Documents, Contractor shall, promptly after becoming aware thereof and before further disturbing conditions affected thereby or performing any Work in connection therewith (except in an emergency as required by Article 14.13), notify said findings in writing to the owner of such Underground Facility, Owner's Representative and Architect/Engineer.

4.5.2.2. Architect/Engineer, Owner's Representative and Owner will promptly review the Underground Facility and determine the extent, if any, to which a change is required in the Contract Documents to reflect and document the consequences of the existence or location of the Underground Facility.

4.5.2.3. During such time, Contractor shall be responsible for the safety and protection of such Underground Facility.

4.5.2.4. If Owner's Representative concludes that a change in the Contract Documents is required, a Work Change Directive, Change Order or Extra Work Order will be issued to reflect and document such consequences.

4.5.2.4.1. An equitable adjustment shall be made to the Contract Price or Contract Time, or both, if warranted under this Article 4.5.

4.5.2.4.2. If Owner and Contractor are unable to agree on entitlement to, or on the amount or extent, if any, of any such adjustment in Contract Price or Contract Time, Owner or Contractor may make a Claim therefore as provided in section 11.5.

4.6. Reference Points

4.6.1. In projects requiring construction of buildings, at the beginning of the project, the Owner will set construction stakes establishing sufficient property lines, baseline and a bench mark. These stakes and marks will constitute all the surveying work the Owner will provide for the use of the Contractor. From the above-mentioned stakes and marks, the Contractor shall develop and establish all necessary marks and controls to perform his work. The Contractor will be held responsible for the preservation of original stakes and marks provided by the Owner at the beginning of the project, and if any of these stakes or marks are carelessly or willfully destroyed or disturbed by the Contractor, the cost of replacing them will be at Contractor's expense. The Owner will be responsible for the accuracy of the original lines and marks furnished to the Contractor.

4.6.1.1. In lineal projects, Owner shall provide engineering surveys to establish reference points for construction which, in Architect/Engineer's judgment, are necessary to enable Contractor to proceed with the Work.

4.6.2. Contractor shall be responsible thereafter for establishing the reference points and property monuments in accordance with the survey provided by Owner and laying out the Work, shall protect and preserve the reference points and property monuments, and shall make no changes or relocations without the prior written approval of Owner. Contractor shall be responsible for replacing the established reference points and property monuments, if affected during construction.

4.6.3. Contractor shall report to Owner's Representative and Architect/Engineer whenever any reference point or property monument is lost or destroyed or requires relocation because of necessary changes in grades or locations, and shall be responsible for the accurate replacement or relocation of such reference points or property monuments by professionally qualified personnel.

4.7. Hazardous Environmental Condition at Site

4.7.1. Reports, Studies and Drawings. Reference is made to the Supplementary Conditions for the identification of those reports and drawings relating to a Hazardous Environmental Condition identified at the Site, if any, that have been utilized by the Architect/Engineer in the Preparation of the Contract Documents.

4.7.2. Limited Reliance by Contractor on Technical Data Provided. On lineal type projects, Contractor may rely upon the general accuracy of the 'technical data" contained in such reports and drawings, but such reports and drawings are not part of the Contract Documents. Such "technical data" is identified in the Technical Specifications. Except for such reliance on such "technical data", Contractor may not rely upon or make any Claim against Owner, Architect/Engineer, or any of Architect/Engineer's Consultants with respect to:

4.7.2.1. the completeness of such reports and drawings for Contractor's construction purposes, including, but not limited to, any aspects of the means, methods, techniques, sequences, and procedures of construction to be employed by Contractor, and safety precautions and programs incident thereto; or

4.7.2.2. other data, interpretations, opinions, and information contained in such reports or shown or indicated in such drawings; or

4.7.2.3. any Contractor interpretation of or conclusion drawn from any "technical data" or any such other data, interpretations, opinions, or information.

4.7.3. Reliance by Contractor on Technical Specifications Provided. On building construction projects, unless otherwise indicated in the Contract Documents, Contractor may rely upon the general accuracy of the "technical data" contained in such Technical Specifications and/or Plans and Drawings. Except for such reliance on such "technical data", Contractor may not rely upon or make any Claim against Owner, Architect/Engineer, or any of Architect/Engineer's Consultants with respect to:

4.7.3.1. the completeness of such reports and drawings for Contractor's construction purposes, including any aspects of the means, methods, techniques, sequences, and procedures of construction to be employed by Contractor, and safety precautions and programs incident thereto; or

4.7.3.2. any Contractor interpretation of or conclusion drawn from any "technical data" or any such other data, interpretations, opinions, or information.

4.7.4. Contractor shall not be responsible for any Hazardous Environmental Condition uncovered or revealed at the Site that was not shown or indicated in Drawings or Specifications or identified in the Contract Documents to be within the scope of the Work.

4.7.5. Contractor shall be responsible for Hazardous Environmental Conditions created due to any materials brought to the Site by Contractor, Subcontractors, Suppliers, or anyone else for whom Contractor is responsible.

4.7.6. If Contractor encounters a Hazardous Environmental Condition or if Contractor or anyone for whom Contractor is responsible creates a Hazardous Environmental Condition, Contractor shall immediately:

4.7.6.1. at Owner's cost, secure or otherwise isolate such condition, if it is not the Contractor's fault; or at Contractor's cost, if it is his fault, or anyone for whom Contractor is responsible;

4.7.6.2. stop all Work in connection with such condition and in any area affected thereby (except in an emergency as required by section 6.13 and 14.13); and

4.7.6.3. notify Owner's Representative, Owner and Architect/Engineer and promptly thereafter confirm such notice in writing, no later than 24 hours after the condition has been encountered. Failure to do so shall constituted a waiver of any claim in connection thereto.

4.7.6.3.1. Owner shall promptly consult with Architect/Engineer and/or Owner's Representative concerning the necessity for Owner to retain a qualified expert to evaluate such condition or take corrective action.

4.7.7. Contractor shall not be required to resume Work in connection with such condition or in any affected area until after Owner's Representative has obtained any required permits related thereto and delivered to Contractor written notice:

4.7.7.1. specifying that such condition and any affected area is or has been rendered safe for the resumption of Work; or

4.7.7.2. specifying any special conditions under which such Work may be resumed safely.

4.7.7.3. If Owner, through Owner's Representative, and Contractor cannot agree as to entitlement to, or on the amount or extent, if any, of any adjustment in Contract Price or Contract Time, or both, as a result of such Work stoppage or such special conditions under which Work is agreed to be resumed by Contractor, either party may make a Claim therefore as provided in Article 11.5.

4.7.8. If after receipt of such written notice, Contractor does not agree to resume such Work based on a reasonable belief it is unsafe, or does not agree to resume such Work under such special conditions, then Owner's Representative may order the portion of the Work that is in the area affected by such condition to be deleted from the Work.

4.7.8.1. If Owner, through Owner's Representative, and Contractor cannot agree as to entitlement to, or on the amount or extent, if any, of an adjustment in Contract Price or Contract Time as a result of deleting such portion of the Work, then either party may make a Claim therefore as provided in Article 11.5.

4.7.8.2. Owner may have such deleted portion of the Work performed by Owner's own forces or others in accordance with Article 8.

4.7.9. To the fullest extent permitted by Laws or Regulations, Owner shall indemnify and hold harmless Contractor, Subcontractors, and the officers, directors, partners, employees, agents, other consultants, and subcontractors of each and any of them from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to a Hazardous Environmental Condition, provided that such Hazardous Environmental Condition:

4.7.9.1. was not shown or indicated in the Drawings or Specifications or identified in the Contract Documents to be included within the scope of the Work, and

4.7.9.2. were not created by Contractor or by anyone for whom Contractor is responsible.

4.7.9.3. Nothing in this Article shall obligate Owner to indemnify any individual or entity from and against the consequences of that individual's or entity's own negligence.

4.7.10. To the fullest extent permitted by Laws or Regulations, Contractor shall indemnify and hold harmless Owner's Representative, Owner, Architect/Engineer, Architect/Engineer's Consultants, and the officers, directors, partners, employees, agents, other consultants, and subcontractors of each and any of them from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to a Hazardous Environmental Condition created by Contractor or by anyone for whom Contractor is responsible.

4.7.10.1. Nothing in this Article shall obligate Contractor to indemnify any individual or entity from and against the consequences of that individual's or entity's own negligence.

4.7.11. The provisions of sections 4.2, 4.3 and 4.4 are not intended to apply to a Hazardous Environmental Condition uncovered or revealed at the Site.

ARTICLE 5-OWNER

5.1 General

5.1.1. Owner's responsibilities and obligations are expressed throughout these General Conditions and are not limited to the ones contained in this Article.

5.1.2. All functions of the Owner will be performed by the Contracting Officer, unless delegated to others in the Contract Documents.

5.1.3. The Contracting Officer may delegate his full authority to another person, and to that effect shall notify the Contractor by written communication.

5.1.4. Unless otherwise specified in the Contract Documents, the person signing this Contract shall be interpreted to mean the Contracting Officer.

5.2 Information and Services Required of the Owner

5.2.1. The Owner shall furnish all available information describing the Project including, but not limited to, physical characteristics, legal limits and utility locations for the Project.

5.2.1.1. Said information should have been made available with reasonable time, and, unless otherwise specified in Bid Documents, prior to bid opening.

5.2.2 Before commencement of the Work, as specified in the Notice to Proceed, the Owner shall inform the Contractor in writing the name of the Owner's Infrastructure Area Director, Architect/Engineer, Contracting Officer, Owner's Representative and Project Inspector, if applicable. Owner reserves the right to change, from time to time, the designated persons or entities and any other designated representative who will perform the functions of the Owner. The Notice to Proceed shall also indicate the day of the week on which Contractor and Owner's Representative shall hold their weekly meeting to discuss matters related to the Project. The Owner's Representative may, from time to time, change said date of the week.

5.2.3 Furnishing of Right of Way - The Owner will be responsible for obtaining the necessary rights-of-way in advance of construction. Any exceptions will be indicated in the Contract Documents.

5.2.4 Information or services to be provided by Owner shall be furnished by the Owner with reasonable promptness so as to avoid any delay in the orderly programmed progress of the Work.

5.3 Pay Promptly When Due

5.3.1. Owner shall make payments to Contractor promptly when they are due.

5.4 Owner's Right to Stop the Work

5.4.1. The Owner's Representative and/or Owner may in accordance with Article 15.1.2 order the Contractor to stop the Work, or any portion thereof if the Contractor:

5.4.1.1. fails to start (and expeditiously continues) correcting defective work promptly after Contractor is notified in writing by the Owner;

5.4.1.2. persistently fails to supply materials or equipment in accordance with the Contract Documents; or

5.4.1.3. for any other significant reason deemed necessary to insure the proper execution of the Contract until the cause for such order has been eliminated.

5.5 Owner's Right to Carry Out the Work Without Terminating the Employment of the Contractor

5.5.1. If the Contractor persistently neglects to carry out the Work in accordance with the Contract Documents or persistently fails to comply with any provision of the Contract, the Owner, through the Owner's Representative, may, after ten (10) days written notice to the Contractor and Surety, if any, and without prejudice to any other remedy he may have, perform said Work and/or, remedy such deficiencies.

5.5.1.1. In such case, an appropriate deduction for the cost of performing said Work and/or correcting such deficiencies shall be made from the payments then, or thereafter, due the Contractor. If the payments then, or thereafter, due the Contractor are not sufficient to cover such amount, the Contractor and/or surety shall pay the difference to the Owner.

5.5.2. The cost to be charged to Contractor of such Work, repairs or replacement, will be the actual cost incurred by Owner.

5.6 Owner's Right to Clean Up

5.6.1. If a dispute arises between the separate contractors in the Project as to their responsibility for cleaning up as required by these General Conditions, the Owner may, after written notice to Contractor, clean up and charge the cost thereof to the several contractors in the proportion that the Architect/Engineer, or the Owner's Representative, determines equitable. If the Contractor is not in agreement with the cost distribution, he may make a claim as provided in Article 11.5.

5.7 Evidence of Financial Arrangements

5.7.1. Upon Contractor's request, Owner will furnish Contractor reasonable evidence that financial arrangements have been made for the payment of Owners' obligations under the Contract, and that all documentation for said purpose has been filed pursuant to applicable Laws and Regulations.

5.7.1.1. If requested in writing by Contractor, Owner shall supply reasonable written evidence that Owner has complied with these requirements.

5.8 Limitations on Owner's Responsibilities

5.8.1. Unless otherwise provided in the Contract Documents the Owner, through Owner's Representative, shall have no authority over, nor responsibility for, Contractor's means, methods, techniques, sequences, or procedures of construction, or the safety precautions and programs incident thereto, or shall not be held responsible for any failure of Contractor to comply with Laws or Regulations applicable to the performance of the Work. Owner's Representative, or Owner, will not be responsible for Contractor's failure to perform the Work in accordance with the Contract Documents.

ARTICLE 6 - CONTRACTOR

6.1 Supervision and Superintendence

6.1.1. Contractor shall supervise and direct the Work competently and efficiently, devoting such attention thereto and applying such skills and expertise as may be necessary to perform the Work in accordance with the Contract Documents.

6.1.1.1. Contractor shall be solely responsible for the means, methods, techniques, sequences, and procedures of construction, but Contractor shall not be responsible for the negligence of Owner or Architect/Engineer in the design or specification of a specific means, method, technique, sequence, or procedure of construction, which is shown or indicated in and expressly required by the Contract Documents.

6.1.1.1.1. When the Contract Documents specify the use of a specific means, method, technique, sequence, or procedure of construction, which is shown or indicated in and expressly required by the Contract Document, such means, method, technique, sequence, or procedure of construction shall be used unless others are authorized by the Owner's Representative.

6.1.1.1.2. If the Contractor desires to use a means, method, technique, sequence, or procedure of construction other than specified in the Contract Documents, he shall request authority from the Owner's Representative to do so.

6.1.1.1.2.1. The request shall be in writing and shall include a description of the methods and equipment proposed and of the reasons for desiring to make the change.

6.1.1.1.2.2. If approval is given, it will be on the condition that the Contractor will be fully responsible for producing work in conformity with the Contract Documents.

6.1.1.1.2.3. If, after trial use of the substituted methods or equipment, the Owner's Representative determines that the Work produced does not meet Contract requirements, the Contractor shall discontinue the use of the substitute method or equipment and shall complete the remaining Work with the specified methods and

equipment.

6.1.1.1.2.4. The Contractor shall remove the deficient Work and replace it with Work of specified quality, or take such other corrective action as the Owner's Representative may direct.

6.1.1.1.2.5. No change will be made in the Contract amount for the construction items involved or in Contract Time as a result of authorizing a change in methods or equipment under these provisions.

6.1.1.1.3. Contractor shall be responsible to ascertain that the completed Work complies accurately with the Contract Documents.

6.1.2. Project Manager. Unless otherwise indicated in the Contract Documents, the Contractor shall employ a competent licensed and collegiate architect or engineer, as the Project Manager, and necessary assistants to direct the Work. These assistants shall be in attendance at the project site at all times during the prosecution of the Work. The Project Manager shall be satisfactory to the Owner or his representatives and shall not be changed except with the consent of the Owner, unless the Project Manager proves to be unsatisfactory to the Contractor (and Contractor gives Owner written notice of the specific reason for removal as Project Manager) or ceases to be in Contractor's employ.

6.1.2.1. The Project Manager will be Contractor's representative at the Site and shall have authority to act on behalf of Contractor. The Contractor, prior to the start of the Project, will inform the Owner's Representative, if already assigned, or the Owner, if not assigned, the name, authority and responsibilities of the Project Manager and/or Superintendent.

6.1.2.1.1. All communications given or received from the Project Manager shall be binding on Contractor. All communications related to the Contract directed to the Contractor and/or proceeding from the Owner, Architect/Engineer, Owner's Representative and other representatives of the Owner shall be made thru the Project Manager.

6.2 Labor and Working Hours

6.2.1. Contractor shall provide competent, suitably qualified personnel to survey, layout, and construct the Work as required by the Contract Documents.

6.2.1.1. The Contractor shall at all times enforce strict discipline and good order among his employees and shall not employ in relation to the Project or the Work any unfit person or anyone not skilled in the task assigned to him.

6.2.1.1.1. The Contractor shall be responsible to the Owner for the acts and omissions of all of his employees and all subcontractors, their agents and employees and all other persons performing any work under a contract with the Contractor.

6.2.1.2. The Contractor shall, at all times, employ sufficient labor and equipment for prosecuting the Work to full completion in the manner and within the time required in the Contract Documents.

6.2.1.2.1. Workers engaged in special work or skilled work shall have sufficient experience in the performance of such work and in the operation of the equipment and tools to perform it properly and satisfactorily.

6.2.1.2.2. Any person employed by the Contractor or by a subcontractor who, as determined by the Owner's Representative, does not perform his work in a proper and skillful manner, or is disrespectful, intemperate, disorderly or otherwise objectionable shall, at the written request of the Owner's Representative, be removed forthwith by the Contractor or Subcontractor employing such employee, and such person shall not be employed again on any portion of the Work without the written consent of the Owner's Representative. Owner's Representative shall specify, in writing, the reason for the removal of such person from the jobsite.

6.2.1.2.2.1. Should the Contractor fail to remove such person or persons as required herein, the Owner may withhold payment of estimates which are or may become due, or may suspend the Work by written notice until such orders are complied with.

6.2.2. Except as otherwise required for the safety or protection of persons or the Work or property at the Site, or adjacent thereto, or for completion of daily Work as provided in Article 9.1.2.2.2. or as otherwise stated in the Contract Documents, all Work shall be performed during regular working hours and Contractor will not permit overtime work or the performance of Work on Saturday, Sunday, or any legal holiday without Owner's Representative's written consent (which will not be unreasonably withheld).

6.2.2.1. The Contractor shall comply with all the applicable Federal and Commonwealth laws, rules and regulations concerning fair labor practices including minimum wages, work hours, equal employment opportunities, non-discrimination, civil rights, employment of minors, and other labor relation matters.

6.2.2.2. The Contractor shall pay weekly, in lawful money of the United States of America, including payment by check or direct deposit, the entire amount of wages, less legally authorized or mandated deductions, earned by each of the laborers and employees engaged in the work.

6.2.2.2.1. The Contractor shall make available the Project payrolls to the Owner's Representative for inspection and shall submit copies of such payrolls to the Owner's Representative when required.

6.2.2.2.1.1. Any irregularities noted in the Project's payrolls will be brought to the attention of the Contractor by the Owner's Representative for appropriate corrective action and payment of any pending wages. Should the Contractor fail to take the necessary action, he will be subject to such civil and criminal proceedings as provided by law and regulations.

6.2.2.2.1.2. Payment of wages to laborers and employees of the Contractor for their work shall have preference over the payment of other debts of the Contractor, except as otherwise established by law.

6.3 Services, Materials, and Equipment

6.3.1. Unless otherwise specified in the Contract Documents, Contractor shall provide and assume full responsibility for all services, materials, equipment, labor, transportation, construction equipment and machinery, tools, appliances, fuel, power, light, heat, telephone, water, sanitary facilities, and all other facilities and incidentals necessary for the performance, testing, start-up, and completion of the Work.

6.3.2. All materials and equipment incorporated into the Work shall be as specified or, if not specified, shall be of good quality and new, except as otherwise provided in the Contract Documents.

6.3.2.1. All warranties and guarantees required by the Contract Documents shall expressly benefit Owner.

6.3.2.2. If required by Owner's Representative, Contractor shall furnish satisfactory evidence (including reports of required tests) as to the source, kind, and quality of materials and equipment.

6.3.2.3. All materials and equipment shall be stored, applied, installed, connected, erected, protected, used, cleaned, and conditioned in accordance with instructions of the applicable Supplier, except as otherwise provided in the Contract Documents.

6.4 Progress and Other Schedules

6.4.1. Measurement and payment.

6.4.1.1. Unless otherwise specified in the Contract Documents, all costs in connection with the preparation and maintenance of schedules, workplans, submittals and other work specified in this Article 6.4 are to be included and form part of the project's general administrative expenses. Contractor's Cost for said work required in Article 6.4 shall not be paid as a separate pay item in Unit Price contracts or as a Schedule of Values item, in Lump Sum contracts.

6.4.2. General.

6.4.2.1. Progress schedules shall represent a practical plan to complete the Work within the Contract Time, and shall convey the Contractor's intent as to the manner of prosecuting the progress of the Work.

6.4.2.2. The scheduling and execution of construction in accordance with the Contract Documents are the responsibility of the Contractor. The Contractor shall involve and coordinate all Subcontractors and Suppliers in the development and updating of progress schedules.

6.4.2.3. The submittal of progress schedules shall be understood to be the Contractor's representation that the progress schedule meets the requirements of the Contract Documents and that the Work is expected to be executed in the sequence and duration indicated in the progress schedule.

6.4.3. Scheduling format.

6.4.3.1. The Project Schedule shall be computer produced using the Critical Path Method ("CPM") format. The schedule shall be computer generated utilizing an Owner approved project scheduling software, as indicated in the Contract Documents, such as Primavera, Microsoft Project, or SureTrak. The project scheduling software selected shall be used consistently from commencement to Final Acceptance of the Project. If the Contractor desires to use a project scheduling software other than the one specified in the Contract Documents, he shall request authorization from the Owner's Representative to do so, prior to the issuance of the Notice to Proceed. If the Contract Documents do not indicate a specific scheduling program, the Contractor may use any of the three mentioned herein, at his sole option.

6.4.3.2. The Project Schedule shall be updated monthly and submitted as indicated in Article 6.4.4. .

6.4.3.3. The schedule shall show Contract tasks, percent complete, progress bars, baseline schedules, milestones, start and finish dates, and other breakdowns as required by the Owner's Representative. The schedules shall show clearly the sequence of activities and shall list specifically the following activities:

6.4.3.3.1. interim milestones completion dates. Phasing and staging of the Work as specified shall be prominently identified;

6.4.3.3.2. submittals and the Owner's Representative review of submittals;

6.4.3.3.3. acquisition of permits;

6.4.3.3.4. any long lead time (over 60 days) orders for material and equipment;

6.4.3.3.5. work to be performed by other contractors and agencies;

6.4.3.3.6. delivery of Owner's furnished equipment and materials indicated for incorporation in the Work.

6.4.3.4. Descriptions of scheduled activities shall include sufficient detail to identify the work that is to be accomplished.

6.4.3.4.1. The schedule shall contain sufficient activities to clearly show the sequence and interdependencies of the Work. The Owner's Representative may request that additional activities and information be added and from time to time may also require reasonable amendments to the schedule format that result in more clarity as to how the information is presented.

6.4.3.4.2. Activity durations shall be expressed in whole days. Work that is to be performed by Subcontractor shall be clearly defined.

6.4.3.4.3. Critical path activities are those activities with a total float equal to or less than zero. Schedules with negative total float may be found to be impractical by the Owner's Representative.

6.4.3.4.4. A schedule showing that Work that is completed in less than the completion time specified, shall be considered to have float. The float shall be the time between the scheduled completion of the Work and the Contract completion date. Float time shall not be for the exclusive benefit of either the Owner or the Contractor. Float shall be a resource available to both parties.

6.4.3.4.4.1. If according to the critical path of the originally approved Project Schedule any party that generates a float in said critical path, then said float shall belong exclusively to the party generating said float.

6.4.3.4.5. A schedule found to be impractical for the preceding reasons or any other reasons shall be revised by the Contractor and resubmitted.

6.4.4 Submittals.

6.4.4.1. Within thirty (30) days after the effective date of the Notice to Proceed (unless otherwise specified in the Contract Documents), Contractor shall submit to Owner's Representative for its timely review:

6.4.4.1.1. a preliminary progress schedule indicating the times (numbers and days or dates) for starting and completing the various stages of the Work, including any Milestones specified in the Contract Documents;

6.4.4.1.2. a preliminary schedule of Shop Drawings and Sample submittals which will list each required submittal and the times for submitting, reviewing, and processing such submittal; and

6.4.4.1.3. a preliminary schedule of values for all of the Work, as specified on Article 13, herein.

6.4.4.2. Submit one (1) electronic copy and the number of hard copies of the Submittals required in Article 6.4 which the Contractor requires to be returned, plus three (3) hard copies which will be retained by the Owner.

6.4.4.3. Schedule submittals will be reviewed by the Owner's Representative, and shall be updated and revised as indicated in section 6.4.6. Re-submittals shall conform to the same requirements as original submittals.

6.4.4.4. The Contractor shall prepare and submit all schedules and schedule analysis reports in electronic as well as hard copies.

6.4.4.5. All progress schedule submittals are subject to review and approval by the Owner's Representative.

6.4.4.5.1. Unless otherwise provided in the Contract Documents, at least ten (10) days before submission of the Application for Payment, a conference, to be attended by Contractor, Owner's Representative, Architect/Engineer, and others as appropriate, will be held to review for purposes of acceptability to Owner's Representative, as provided below, the progress schedules submitted in accordance to Article 6.4.4.1. If said meeting is not held, for reasons other than due to the fault of the Contractor, or if the Owner's Representative does not provide timely approval, or corrections, to the submitted submittals specified in Article 6.4.1., all the previously submitted submittals shall be considered approved, provided Contractor has given notice directly to Owner as required in Article 17.3.2.

6.4.4.5.1.1. Contractor shall have an additional ten (10) days to make corrections and adjustments and to complete and resubmit the schedules. Owner's Representative shall approve said corrections within a period of ten (10) days from the date of re-submittal otherwise they shall be considered approved, provided Contractor has given notice directly to Owner as required in Article 17.3.2.

6.4.4.5.1.1.1. The third progress payment shall not be paid to Contractor until acceptable schedules are submitted to Owner's Representative, or until schedules are considered approved as specified herein.

6.4.4.5.1.1.2. The Progress Schedule will be acceptable to Owner's Representative if in accordance with the Agreement it provides an orderly progression of the Work to completion within any specified Milestones and the Contract Time.

6.4.4.5.1.1.3. Contractor's schedule of Shop Drawings and Sample submittals will be acceptable to Owner's Representative if it provides, in Owner's sole discretion, a workable arrangement for reviewing and processing the required submittals.

6.4.4.6. The first schedule submitted by the Contractor will be reviewed for format, as well as content. The Owner's Representative may request format changes. Once the format has been approved, all subsequent schedules shall be submitted in the approved format.

6.4.5 Four-week work plan.

6.4.5.1. A schedule in calendar time-scaled bar chart format depicting the Contractor's intended work activities for the upcoming four (4) week period shall be submitted on a monthly basis and shall be due on the day of the project's weekly meeting. Each activity of one (1) day or more in duration shall be indicated.

6.4.5.2. Any deviations, such as sequences of work, timing, and durations of activities from the approved Project Schedule, shall be noted and explained in writing.

6.4.5.3. The four (4) week work plan shall be submitted on sheets not less than 8 ½ inches by 11 inches, or as approved by the Owner's Representative.

6.4.6. Review, updates and revisions

6.4.6.1. The Owner's Representative will review and return to Contractor the schedule submittals, with written comments, within the following deadlines counted from the date of receipt.

6.4.6.1.1. Project CPM schedule: 14 calendar days.

6.4.6.1.2. Four (4) week work plan: 8 calendar days.

6.4.6.2. The Contractor shall make all corrections to the Project Schedule requested by the Owner's Representative and resubmit the schedule for approval. If the Contractor does not agree with the Owner's Representative's comments, the Contractor shall provide written notice of disagreement within five (5) days from the receipt of the Owner's Representative's comments. The Owner's Representative's comments on the four (4) week work plan for which the Contractor disagrees shall be resolved in a meeting held for that purpose, if necessary.

6.4.6.3. At least once each month, or often if indicated in the Contract Documents, the Contractor shall submit an updated schedule showing the progress of the Work to date and anticipated activities to be worked on. All updated schedules must comply with Article 6.4.

6.4.6.4. If, according to the approved Project Schedule, the Contractor is thirty (30) or more days behind as to the completion date of any milestone, or the schedule contains thirty (30) or more days of negative float, considering all approved time extensions, the Contractor shall submit a revised schedule, showing a practical plan to complete the Work within the Contract Time.

6.5 Submittals for Approval, Substitutes and/or "Equals"

6.5.1. Submittal for Approval of Materials, Shop Drawings and Samples; Plans and Working Drawings; As-Built Plans.

6.5.1.1. The Contractor shall submit all submittals for approvals of Materials, Shop Drawings and Samples to the Owner's Representative. The Owner's Representative will either perform the review and approval, or forward the Contractor's submittal to the Architect/Engineer's for his review and approval, in accordance with the accepted itinerary for Shop Drawings and Sample submittals.

6.5.1.2. All submittals will be identified as required by Owner's Representative and presented with the number of copies specified in the Contract Documents. If a number is not mentioned, seven (7) copies will be submitted. Of these seven (7) copies, four (4) shall be returned, duly evaluated, to the Contractor.

6.5.1.3. The data shown on the Shop Drawings will be complete with respect to quantities, dimensions, specified performance and design criteria, materials, and similar data to show Owner's Representative the services, materials, and equipment Contractor proposes to provide and to enable Owner's Representative to review the

information for the limited purposes of complying with the requirements of Article 6.17.

6.5.1.4. The Architect/Engineer or the Owner's Representative shall have the following deadlines within which to approve, request additional information or reject any Submittal for Approval of Materials, Shop Drawings and Samples:

6.5.1.4.1. For Materials, Shop Drawings or Samples which are the ones specified in the Contract Documents or are, in the opinion of the Owner's Representative, non-complex Shop Drawings or Materials, the Architect/Engineer or Owner's Representative shall have a period of ten (10) working days.

6.5.1.4.2. For Materials, Shop Drawings or Samples not complying with the requirements indicated in the previous Article, the period shall be twenty (20) working days.

6.5.1.4.3. If no comment by the Architect/Engineer or Owner's Representative is made within said period of time, the Contractor will have the right to Claim if said delay impacts the critical path.

6.5.1.4.4. The above mentioned deadlines can be extended if requested in writing by the Architect/Engineer and/or Owner's Representative as long as approval is made within a time period that does not alter the critical path. Such request for extension shall not be unreasonably denied.

6.5.1.5. Each Sample will be identified clearly as to material, supplier, pertinent data such as catalog numbers, and the use for which it is intended or otherwise as Owner's Representative may require, to enable the Architect/Engineer or the Owner's Representative to review the submittal for the limited purposes of complying with the requirements of Article 6.17.

6.5.1.5.1. The numbers of items each Sample to be submitted will be as specified in the Specifications. If no number of items is mentioned, three (3) samples will be submitted. Of these, three (3) samples, two (2) shall be returned, duly evaluated, to the Contractor.

6.5.2. Where an approval of Materials, Shop Drawing or Samples is required by the Contract Documents or the schedule of Shop Drawings and Sample submittals, any related Work performed, including materials purchases, prior to Owner's Representative or Architect/Engineer's review and approval of the pertinent submittal will be at the sole responsibility of Contractor.

6.5.3. Submittal Procedures.

6.5.3.1. Before delivering each submittal for approvals of Material, Shop Drawing or Sample, Contractor shall have:

6.5.3.1.1. verified that all shop drawing measurements, quantities, shop drawing dimensions, specified performance criteria, installation requirements, materials, catalog numbers, and similar information are in accordance with the Contract Documents and if not in accordance, ascertained that all variations are indicated in the submittal;

6.5.3.1.2. verified all materials with respect to intended use, fabrication, shipping, handling, storage, assembly, and installation pertaining to the performance of the Work;

6.5.3.1.3. verified all information relative to means, methods, techniques, sequences, and procedures of construction and safety precautions and programs incident thereto; and

6.5.3.1.4. Contractor shall also have reviewed and coordinated each Shop Drawing or Sample with other Shop Drawings or Samples and with the requirements of the Work and the Contract Documents.

6.5.3.2. Each submittal shall bear a stamp or specific written indication that Contractor has satisfied Contractor's obligations under the Contract Documents with respect to Contractor's review and approval of that submittal. If required in the Special Conditions, submittals for Materials and Samples must bear a notarized certificate of compliance.

6.5.3.3. At the time of each submittal, Contractor shall give Owner's Representative specific written notice of such variations, if any, that the submittal for approvals of material, Shop Drawing or Sample submitted may have from the requirements of the Contract Documents, such notice to be in a written communication included with the submittal.

6.5.4. The Architect/Engineer or Owner's Representative's Review.

6.5.4.1. Owner's Representative, either himself or through the Architect/Engineer, will perform a timely review, evaluation and comment of Shop Drawings and Samples in accordance with the schedule of Shop Drawings and Sample submittals acceptable to Owner's Representative. If no comment by the Owner's Representative is made within the time stated in this Article 6.5 the Contractor will have the right to claim pursuant the provisions of Article 11.5, if said delay impacts the critical path.

6.5.4.1.1. The Architect/Engineer or the Owner's Representative review and approval will be only to determine if the items covered by the submittals will, after installation or incorporation in the Work, conform to the information given in the Contract Documents and be compatible with the design concept of the completed Project as a functioning whole as indicated by the Contract Documents.

6.5.4.1.2. The Architect/Engineer or the Owner's Representative's review and approval will not extend to means, methods, techniques, sequences, or procedures of construction (except where a particular means, method, technique, sequence, or procedure of construction is specifically and expressly called for by the Contract Documents) or to safety precautions or programs incident thereto.

6.5.4.1.2.1. The review and approval of a separate item, as such, will not indicate approval of the assembly in which the item functions.

6.5.4.1.3. The Architect/Engineer or the Owner's Representative's review and approval of Shop Drawings or Samples shall not relieve Contractor from responsibility for any variation from the requirements of the Contract Documents unless Contractor has in writing called the Architect/Engineer or the Owner's Representative attention to each such variation at the time of each submittal as required by Article 6.17 and the Architect/Engineer or the Owner's Representative has given written approval of each such variation by specific written notation thereof incorporated in or accompanying the Shop Drawing or Sample approval; nor will any approval by the Architect/Engineer or the Owner's Representative relieve Contractor from responsibility for complying with the requirements of Article 6.17.

6.5.5. Re-submittal Procedures.

6.5.5.1. Contractor shall make corrections required by the Architect/Engineer or the Owner's Representative and shall return the required copies of materials submittals, the required number of corrected copies of Shop Drawings and submit as required new Samples for review and approval.

6.5.6 Substitutes and "Or-equals".

6.5.6.1. Whenever an item or material or equipment is specified or described in the Contract Documents by using the name of a proprietary item or the name of a particular Supplier, the specification or description is intended to establish the type, function, appearance, and quality required. Unless the specification or description contains or is followed by words reading that no like, equivalent, or "or-equal" item or no substitution is permitted, other items of material or equipment or material or equipment of other Suppliers may be submitted to Owner's Representative for review under the circumstances described below. The Contractor will present his submittal for approval, indicating whether the item of material or equipment proposed is an Or Equal or a Substitute.

6.5.6.2. "Or-Equal" Items: If in Owner's Representative's sole discretion an item, or material or equipment proposed by Contractor is functionally equal to that named and sufficiently similar so that no change in related Work will be required, it will be considered by Owner's Representative as an "or-equal" item, in which case review and approval of the proposed item be accomplished without compliance with the special requirements for approval of the proposed substitute items and be acceptable or acceptable with comments. Owner's Representative's basis for rejection of the item of material or equipment as an "or equal" material shall be written and may be subject to appeal, as specified in Article 11.5 of these General Conditions, by Contractor. For the purposes of this Article, a proposed item of material or equipment will be considered functionally equal to an item so named if:

6.5.6.2.1. In the exercise of reasonable judgment, Owner's Representative determines that:

6.5.6.2.1.1. it is at least equal in quality, durability, appearance, strength, and design characteristics;

6.5.6.2.1.2. it will reliably perform at least equally well the function imposed by the design concept of the completed Project as a functioning whole, and;

6.5.6.2.2. Contractor certifies that:

6.5.6.2.2.1. there is no increase in cost to the Owner; and

6.5.6.2.2.2. it will conform substantially, even with deviations, to the detailed requirements of the item named in the Contract Documents.

6.5.6.2.2.3. Owner's Representative shall make the decision on the "or equal" material with sufficient time so as not to alter the Contractor's Programmed Schedule of the Work. If no comment by the Owner's Representative is made within said period of time, the Contractor will have the right to Claim pursuant the provisions of Article 11.5 if said delay impacts the critical path.

6.5.6.3. Substitute Items

6.5.6.3.1. If in Owner's Representative's sole discretion an item or material or equipment proposed by Contractor does not qualify as an "or-equal" item under Article 6.5.6, it will be considered a proposed substitute item.

6.5.6.3.2. Contractor shall submit sufficient information as provided below to allow Owner's Representative to determine that the item or material or equipment proposed is essentially equivalent to that specified and an acceptable substitute therefore.

6.5.6.3.2.1. Requests for review of proposed substitute items, material or equipment will not be accepted by

Owner's Representative from anyone other than Contractor.

6.5.6.3.3. The procedure for review by Owner's Representative will be as set forth in Article 6.5.6, as supplemented in these General Conditions and as Owner's Representative may decide is appropriate under the circumstances.

6.5.6.3.4. Contractor shall first make written application to Owner's Representative for review of a proposed substitute item, material or equipment that Contractor seeks to furnish or use.

6.5.6.3.4.1. The application shall certify that the proposed substitute item will perform adequately the functions and achieve the results called for by the general design, be similar in substance to that specified, and be suited to the same use as that specified.

6.5.6.3.4.2. The application will state the extent, if any, to which the use of the proposed substitute item will prejudice Contractor's timely achievement of Substantial Completion, whether or not use of the proposed substitute item in the Work will require a change in any of the Contract Documents (or in the provisions of any other direct contract with Owner for work on the Project) to adapt the design to the proposed substitute item and whether or not incorporation or use of the proposed substitute item in connection with the Work is subject to payment of any license fee or royalty.

6.5.6.3.4.3. All variations of the proposed substitute item from that specified will be identified in the application, and available engineering, sales, maintenance, repair, and replacement services will be indicated.

6.5.6.3.4.4. The application will also contain an itemized estimate of all costs or credits that will result directly or indirectly from use of such substitute item, including costs of redesign and claims of other contractors affected by any resulting change, all of which will be considered by Owner's Representative in the evaluation of the proposed substitute item.

6.5.6.3.4.5. Owner's Representative may require Contractor to furnish additional data about the proposed substitute item.

6.5.6.3.5. Owner's Representative shall make the decision on the "substitute" material with sufficient time so as not to alter the critical path. If no comment by the Owner's Representative is made within said period of time, the Contractor will have the right to Claim pursuant the provisions of Article 11.5 if said delay impacts the critical path.

6.5.6.3.6. Owner's Representative's basis for rejection of a "substitute" material shall be written and may be subject to appeal and Claim by Contractor, as specified in Article 11.5.

6.5.6.4. If a Substitute item is approved by the Owner and such change affects the Contract Price, then the Contract Price shall be equitably adjusted.

6.5.7. Substitute Construction Methods or Procedures.

6.5.7.1. If a specific means, method, technique, sequence, or procedure of construction is shown, or indicated in, or expressly required by the Contract Documents, Contractor may furnish or utilize a substitute means, method, technique, sequence, or procedure of construction approved by Owner's Representative.

6.5.7.1.1. Contractor shall submit sufficient information to allow Owner's Representative, in Owner's

Representative's sole discretion, to determine that the substitute proposed is equivalent to that expressly called for by the Contract Documents. Such submittal shall be made with sufficient time as to allow the Owner's Representative to review it.

6.5.7.1.1.1. The procedure for review by Owner's Representative will be similar to that provided in section 6.5.6 but no Claim may be made by contractor due to untimely evaluation by Owner.

6.5.8. Owner's Representative's Evaluation.

6.5.8.1. Owner's Representative or Architect/Engineer will be allowed a reasonable time, which will not unreasonably delay the critical path of the Work, within which to evaluate each proposal or submittal made pursuant to Article 6.5.

6.5.8.2. Except as provided above. Owner's Representative will be the sole judge of acceptability.

6.5.8.3. No "or-equal" or substitute will be ordered, installed or utilized until Owner's Representative's review is complete, which will be evidenced by written approval by Owner for a substitute or an approved Shop Drawing or an "or-equal."

6.5.8.4. Owner's Representative will advise Contractor in writing of any negative determination.

6.5.8.5. Owner's Representative will charge Contractor for any overtime expenses and other costs incurred in the evaluation of a proposed substitute, similar, or equal materials, unless said proposal was submitted by Contractor with reasonable time as to afford the Owner the time necessary to analyze the submittal without affecting the Project Schedule.

6.5.9. Special Guarantee.

6.5.9.1. Owner's Representative may require Contractor to furnish at Contractor's expense a special performance guarantee or other surety with respect to any substitute.

6.5.10. Contractor's Expense.

6.5.10.1. Contractor shall provide all data in support of any proposed substitute or "or-equal" at Contractor's expense.

6.5.11. Approval of Submittals.

6.5.11.1. If within the periods of time provided under this Article 6 for approval of submittals made by the Contractor, the Owner's Representative fails to render his decision as to any submittal and the critical path is adversely affected, the Contractor shall require in writing the approval of the Owner's Representative, who shall have ten (10) working days to issue his decision. If no decision is forthcoming from the Owner's Representative within the stated time, for reasons other than due to the fault of Contractor, the submittal shall be considered approved, provided Contractor has also given the same timely notice directly to Owner required in Article 17.3.2

6.6 Review of Contract Documents

6.6.1. The Contractor shall carefully study and compare the Contract Documents with each other and with

information furnished by the Owner and shall at once report to the Owner, Architect/Engineer, and Owner's Representative any error, inconsistency or omission he may discover.

6.6.1.1. The Contractor shall not be liable to the Owner for any errors, inconsistencies or omissions in the Contract Documents.

6.6.1.2. The Contractor shall not take advantage of any such errors, inconsistencies, or omissions.

6.6.1.3. The Owner's Representative after being notified by the Contractor of such errors, inconsistencies or omissions will make the corrections and interpretations deemed necessary for fulfilling the intent of the Contract Documents, within a reasonable time so as not to alter the programmed progress of the Work. If no comment by the Owner's Representative is made within said time the Contractor will have the right to Claim pursuant the provisions of Article 11.5 if said delay impacts the critical path.

6.7 Patent, Fees and Royalties

6.7.1. Contractor shall pay all license fees and royalties and assume all costs incident to the use, in the performance of the Work or the incorporation in the Work, of any invention, design, process, product, or device which is the subject or patent rights or copyrights held by others.

6.7.2. If a particular invention, design, process, product, or device is specified in the Contract Documents for use in the performance of the Work and if to the actual knowledge of Owner or Architect/Engineer its use is subject to patent rights or copyrights calling for the payment of any license fee or royalty to others, the existence of such rights shall be disclosed by Owner in the Contract Documents.

6.7.3 To the fullest extent permitted by Laws and Regulations, Contractor shall indemnify and hold harmless Owner, Architect/Engineer, Architect/Engineer's Consultants, and the officers, directors, partners, employees or agents, and other consultants of each and any of them from and against all claims, costs, losses, and damages (including but not limited to all fees and charges or engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to any infringement of patent rights or copyrights incident to the use in the performance of the Work or resulting from the incorporation in the Work of any invention, design, process, product, or device not specified in the Contract Documents.

6.8 Permits

6.8.1. Unless otherwise indicated in the Contract Documents, the responsibilities for securing and paying for permits, governmental fees and licenses for work to be performed are as follows:

6.8.1.1. To obtain the Construction Permit, the Contractor shall pay the premiums to secure the State insurance Fund policy and the Municipal Construction Taxes, at the rate that is in effect at bid date, unless the Contractor is explicitly not obligated to pay said taxes under the terms and provisions of the Contract Documents, in which case, shall so be specifically stated in the Contract Documents. The Owner shall secure all the Architect or Engineer's and Owner's Representative's certificates necessary and pertinent needed to secure the Construction Permit as well as submit applications and secure the permits for the Plan CES and for the Federal Storm Water Drainage plan, if same is required for the Project.

6.8.1.2. To obtain the Use Permit, the Contractor shall secure the endorsements required for said Use Permit from all government agencies, unless one or more of these cannot be obtained due to circumstances beyond the control of the

Contractor. The Owner must ascertain that the reports required for the Use Permit from the Architect or Engineer and Owner's Representative are duly filed with "Oficina de Gerencia de Permisos" and must also obtain any of the above mentioned endorsements that cannot be obtained due to circumstances beyond the control of Contractor.

6.8.1.3. All payments due, or to become due, to any agency, public or private, for connection to, or improvement of any of said agencies' infrastructure (Impact Fees) shall be paid by the Owner with sufficient time so as not to adversely affect the critical path of the Work.

6.8.1.4. The Contractor shall secure and pay for all incidental permits required for the completion of the Work, unless such incidental permits deviate from the normal procedures, or costs, of the requiring agency and shall do so in a timely manner so as not to adversely affect the critical path of the Work.

6.8.1.5. Any other fees or charges related to permitting to be paid by the Contractor will be indicated in the special conditions.

6.8.1.6. The duties of Owner and of Contactor stated in this Article 6.8 shall be performed in a timely manner as to not adversely affect the critical path of the Work.

6.9 Laws and Regulations

6.9.1. Contractor shall give all notices and comply with all Laws and Regulations applicable to the performance of the Work.

6.9.1.1. Except where otherwise expressly required by applicable Laws and Regulations, neither Owner, nor Owner's Representative nor Architect/Engineer shall be responsible for monitoring Contractor's compliance with any Laws or Regulations.

6.9.1.2. Should the Contractor observe that the Contract Documents are at variance with any Federal, Commonwealth and Municipal laws, ordinances, rules, regulations, by-laws, and all orders or decrees, he shall promptly notify the Owner's Representative in writing and the Owner's Representative shall instruct the Contractor, also in writing, as to how Contractor is to proceed. Any additional cost and /or extra time incurred by the Contractor to comply with Laws and Regulations enacted after the bid opening date, it may file a claim for equitable adjustment of the Contract Price or the Contract Time or both, as shall any decrease in cost or time resulting therefrom.

6.9.1.3. If the Contractor performs any work knowing it to be contrary to Federal, Commonwealth and Municipal laws, ordinances, rules, regulations, by-laws, orders or decrees, the Contractor shall assume full responsibility therefore, and shall bear all cost arising there from.

6.9.1.4. The Contractor shall save the Owner and its authorized representatives harmless from any claim or liability arising from or based on the infraction or violation of any such laws, ordinances, rules, regulations, by-laws, all orders or decrees, except if the infractions or violations are caused by acts of the Owner, or of Owner's authorized representatives.

6.9.1.5. If Contractor performs any Work knowing or having reason to know that he is acting contrary to said Laws or Regulations, Contractor shall bear all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) incurred as a consequence thereof. It shall not be Contractor's primary responsibility to make certain

that the Specifications and Drawings are in accordance with Laws and Regulations, but this shall not release Contractor of Contractor's obligations hereunder.

6.10 Taxes

6.10.1. Contractor shall pay all sales, consumer, use, and other similar taxes required to be paid by Contractor in accordance with the Laws and Regulations of the place of the Project which are applicable during the performance of the Work and which were in effect at the bid opening date.

6.10.1.1. Among said taxes, the Contractor shall pay the municipal construction taxes applicable to the Project in a timely fashion, but no later than fifteen (15) calendar days after the first partial (certification) payment is made by the Owner to Contractor.

6.10.1.2. If specifically stated in the Contract Documents, the Municipal Construction tax rate may be determined between Owner and the municipal government where the project is to be located, in such case a specific rate shall be established by the mayor and the municipal legislature, and notified to the Contractor before bid time. If no such rate is indicated in the Contract Documents regarding such arrangement between Owner and the municipal government, then the Contractor shall pay at the rates prevailing at the time of the bid.

6.10.1.1.1. The Contractor shall furnish and deliver to the Owner written evidence that said payment(s) was made before the second partial (certification) payment is made by the Owner to Contractor.

6.10.1.1.2. In case that the Contractor does not furnish and deliver said evidence of payment, the Owner shall deduct from said partial (certification) payments the undisputed amount of municipal tax plus any penalties and fines and pay it directly to the municipality.

6.10.1.1.2.1. If the amount of the second partial (certification) payment is not enough to cover the total amount of the municipal tax, the Owner shall continue to deduct from the following partial (certification) payments until the undisputed amount is paid in full.

6.10.1.1.2.2. The direct payment provided for in Article 6.10.1.1.2 shall be effected after the retainage required in Article 13.2.2 is deducted.

6.11 Use of Site and Other Areas

6.11.1. Limitation on Use of Site and Other Areas.

6.11.1.1. Contractor shall confine construction equipment, the storage of materials and equipment, and the operations of workers to the Site and other areas permitted by Laws and Regulations, and shall not unreasonably encumber the Site and other areas with construction equipment or other materials or equipment.

6.11.1.1.1. Contractor shall assume full responsibility for any damage to any such land or area, or to the Owner or occupant thereof, or of any adjacent land or areas, resulting from the performance of the Work.

6.11.1.1.2. Should any claim be made by any such owner or occupant because of the performance of the Work, Contractor shall promptly resolve the dispute with such other party by negotiation or otherwise resolve the claim by arbitration or other dispute resolution proceeding or at law.

6.11.1.1.3. To the fullest extent permitted by Laws and Regulations, Contractor shall indemnify and hold Owner, Architect/Engineer, Architect/Engineer's Consultant, and the officers, directors, partners, employees, agents, and other consultants of each and any of them harmless from and against all claims, costs, losses, and damages (including but not limited to all fees and charges or engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to any claim or action, legal or equitable, brought by any such owner or occupant against Owner, Architect/Engineer, or any other party indemnified hereunder to the extent caused by or based upon Contractor's performance of the Work.

6.11.2. Removal of Debris during Performance of the Work.

6.11.2.1. During the progress of the Work, Contractor shall keep the Site and other areas free from excessive accumulations of waste materials, rubbish, and other debris caused by his operations on the Site.

6.11.2.1.1. Removal and disposal of such waste materials, rubbish, and other debris shall conform to applicable Laws and Regulations.

6.11.3. Cleaning.

6.11.3.1. Prior to Substantial Completion of the Work Contractor shall clean the Site and make it ready for utilization by Owner.

6.11.3.1.1. At the completion of the Work Contractor shall remove from the Site all tools, appliances, construction equipment and machinery, and surplus materials and shall restore to original condition all property not designated for alteration by the Contract Documents.

6.11.3.1.1.1. If the Contractor fails to clean up as indicated above, the Owner may do so and the cost thereof shall be charged to the Contractor.

6.11.4. Loading Structures.

6.11.4.1. Contractor shall not load nor permit any part of any structure to be loaded in any manner that will endanger the structure, nor shall Contractor subject any part of the Work or adjacent property to stresses or pressures that will endanger it.

6.11.4.2. Owner's Representative shall not permit any of the Owner's Other Contractors, his personnel, or any other entity performing work for him directly at the Site, to load any part of any structure in any manner that will endanger the structure, nor shall Owner's Representative subject any part of the Work or adjacent property to stresses or pressures that will endanger it.

6.11.5. Rights To and Use of Materials Found On the Work.

6.11.5.1. The Contractor, with the prior written approval of the Owner's Representative, may use to perform the Work materials obtained from existing structures at the Site which are to be removed that are determined by the Owner's Representative to be acceptable for a use approved in writing by Owner's Representative.

6.11.5.2. Unless otherwise provided in the Contract Documents, material from any existing structures to be removed may be used temporarily by the Contractor in the erection of new structures.

6.11.5.2.1. If the material is to be salvaged for the Owner, its modification will not be permitted except as approved by the Owner's Representative.

6.11.5.2.2. Unless otherwise specified in the Contract Documents, all soil existing at the Project Site will be considered fit to be used as fill in the performance of the Work if such soil meets the Project's field fill criteria.

6.12 Record Document

6.12.1. Contractor shall maintain in a safe place at the Site one (1) record copy of all Drawings, Specifications, Addenda, Written Amendments, Change Orders, Extra Work Orders, Work Change Directives, Field Orders, permits, and written interpretations and clarifications in good order and annotated showing changes made during construction.

6.12.1.1. Said documents together with all approved Samples and a counterpart of all approved Shop Drawings will be available to Architect/Engineer and the Owner's Representative.

6.12.1.2. If not previously submitted, prior to Final Acceptance, said documents, Samples, and Shop Drawings will be delivered to Owner's Representative for delivery to Owner.

6.13 Safety and Protection

6.13.1. Contractor shall be solely responsible for initiating, maintaining and supervising all safety precautions and programs in connection with the Work. Contractor shall take all necessary precautions for the safety of, and shall provide the necessary protection to prevent damage, injury or loss to:

6.13.1.1. all persons on the Site or who may be affected by the Work;

6.13.1.2. all the Work and materials and equipment to be incorporated therein, whether in storage on or off the Site; and

6.13.1.3. other property at the Site or adjacent thereto, including trees, shrubs, lawns, walks, pavements, roadways, structures, utilities, and Underground Facilities not designated for removal, relocation, or replacement in the course of construction.

6.13.2. Contractor shall comply with all applicable Laws and Regulations relating to the safety of persons or property, or to the protection of persons or property from damage, injury, or loss; and shall erect and maintain all necessary safeguards for such safety and protection.

6.13.2.1. Contractor shall notify owners of adjacent property and of Underground Facilities and utility owners when prosecution of the Work may affect them, and shall cooperate with them in the protection, removal, relocation, and replacement of their property.

6.13.2.2. All damage, injury, or loss to any property referred to in Articles 6.13.1.2 or 6.13.1.3 caused, directly or indirectly, in whole or in part, by Contractor any Subcontractor, Supplier, or any other individual or entity directly or indirectly employed by any of them to perform any of the Work, or anyone for whose acts any of them may be liable, shall be remedied by Contractor (except damage or loss attributable to the fault of Drawings or Specifications or to the acts or omissions of Owner or Architect/Engineer or Architect/Engineer's Consultant, or anyone employed by any of them, or anyone for whose acts any of them may be liable, and not attributable, directly or indirectly, in whole or in part, to the fault or negligence of Contractor or any Subcontractor, Supplier, or other individual or entity directly or

indirectly employed by any of them).

6.13.2.3. Contractor's duties and responsibilities for safety and for protection of the Work shall continue until such time as all the Work is completed and Owner's Representative has issued a notice to Owner and Contractor of Final Acceptance of the Work (except as otherwise expressly provided in connection with Substantial Completion).

6.13.3. If so provided in the bid documents, the Owner has the right to establish any reasonable monetary penalties for violations of this Section 6.13.

6.14 Safety Representative

6.14.1. Contractor shall designate a qualified and experienced safety representative at the Site whose duties and responsibilities shall be the prevention of accidents and the maintaining and supervising of safety precautions and programs. The safety representative at the Site may have other duties assigned to him.

6.15 Hazard Communication Programs

6.15.1. Contractor shall be responsible for coordinating any exchange of material safety data sheets or other hazard communication information required to be made available at the Site in accordance with Laws or Regulations.

6.16 Plans and Working Drawings; As-Built Plans.

6.16.1. Plans and Working Drawings.

6.16.1.1. The detail Plans and Specifications for the Project have been prepared by licensed and collegiate competent Architect/Engineer exercising reasonable care and are intended to show as clearly as is practicable the Work required to be performed. Contractor will rely on the accuracy of said drawings, specifically in their compliance with all applicable codes and regulations in effect on the bid opening date.

6.16.1.1.1. The Contractor realizes, however, that construction details cannot always be accurately anticipated and that in executing the Work, field conditions may require reasonable minor modifications in the details of plans and quantities of Work.

6.16.1.1.1.1. Therefore, all Work must be carried out taking into account the mentioned considerations as well as field conditions, to the satisfaction of the Owner's Representative, and in accordance with his instructions and with the Contract Documents.

6.16.2 Working Drawings

6.16.2.1. The Plans will be supplemented by such Working Drawings as are necessary to adequately control the Work.

6.16.22. Working Drawings for structures shall be furnished by the Contractor and shall consist of such detailed Plans as may be required to adequately control the Work and to complement the Plans furnished by the Owner.

6.16.2.3. They shall include, among others, stress sheets, shop drawings, erection plans, false work plans,

cofferdam plans, bending diagrams for reinforcing steel or any other supplementary plans or similar data required of the Contractor.

6.16.3. Working Drawings and related documents submitted for manufactured and shop-fabricated products shall be accompanied by a certification from the manufacturer that the materials and/or equipment meet all the requirements of the Specifications.

6.16.3.1. In the event that any item is not exactly in accordance with the requirements of the Plans and Specifications, the certificate shall identify and explain each such difference.

6.16.4. Unless otherwise indicated, all Working Drawings are subject to review and acceptance by the Owner's Representative.

6.16.4.1. Such review and acceptance shall not release the Contractor from any of his responsibilities for the safe and successful completion of the Work.

6.16.4.2. The cost of preparing and furnishing all required Working Drawings is included in the Contract Price and no separate payment will be made for such Drawings.

6.17 As Built Record Drawings

6.17.1. The Contractor shall keep at the Site a copy of the Drawings marked in a neat manner that record all changes made during construction.

6.17.1.1. The set of provisional record Drawings shall be kept up to date and submitted for the inspection and approval of the Owner's Representative, at least five (5) days prior to any partial monthly payment, unless otherwise required in the Contract Documents.

6.17.2. Prior to Final Acceptance, the Contractor shall deliver the as built Drawings to the Owner's Representative.

6.17.2.1. These Drawings will be used as the draft for the preparation of the final As Built Drawings for the Project by Architect/Engineer.

6.17.3. The Architect/Engineer will, with the full cooperation of Contractor and of the Owner's representative prepare final as-built record drawings in reproducible form as reasonably required by Owner, to be delivered to the Owner.

6.17.3.1. The Owner will cause the Architect/Engineer to submit, with enough time so as not to adversely alter the critical path of the Work, the revised as-built drawings to the required governmental entities and obtain the approval of an amended Construction Permit, if same is required, and deliver the same to Owner and Contractor. This amended Construction Permit will be used to obtain the Use Permit for the project.

6.18 Notice to Proceed.

6.18.1. After the Agreement has been executed, the Contractor will be formally notified to proceed with the Work or service provided in the Contract Documents.

6.18.1.1. The Notice to Proceed will stipulate the date on which Owner expects the Contractor will begin construction and the date on which Contract Time will commence to run.

6.18.1.2. Pre-Construction Conference.

6.18.1.2.1. Prior to the start of the Project the Owner will summon all interested parties to a Pre-construction Conference in order to organize the start of the work and other matters. If no such conference is summoned by the Owner, and in any event, the Contractor may start the Work on the date stated in the Notice to Proceed.

6.18.2. Prosecution and Progress.

6.18.2.1. After obtaining written permission issued by the Owner, the Contractor may assemble materials and equipment and start preliminary Work as soon as he is notified of the award, but no responsibility for acceptance and payment of the Work so performed shall be assumed by the Owner until and unless the Contract has been executed and the order to proceed issued.

6.18.2.2. The rate of progress in the prosecution of the Work shall be compared in accordance with Articles 4.2 and 4.3 with approved Progress Schedule as the Work progresses.

6.18.2.2.1. If the Contractor is at fault for falling thirty (30) working days or more behind the approved schedule or ten percent (10%) of Contract Time, whichever is less, Contractor shall submit a revised schedule for completion of the Work within the Contract Time and modify his operations, including, but not limited to, working overtime and on Saturdays, Sundays and legal holidays, to providing such additional materials, equipment and labor as necessary to comply with the revised schedule. Any additional cost caused by the modified schedule will be at Contractor's expense.

6.18.2.3. Should the prosecution of the Work be discontinued for any reason, the Contractor shall notify the Owner's Representative at least twenty-four (24) hours in advance of resuming operations.

6.18.3. Conformity with Plans and Specifications.

6.18.3.1. All work performed and materials furnished shall be in reasonably close conformity with the Plans and other Contract Documents requirements.

6.18.3.2. Plan dimensions and Contract Specification values are to be considered the target values to be strived for and complied with as the design values to which any allowed tolerances are applied.

6.18.3.2.1. Materials and workmanship shall be uniform in character and shall be reasonably close to the prescribed target value or to the middle portion of the tolerance range.

6.18.3.3. When the Specifications include an acceptance plan for any construction or characteristic of materials, the acceptance plan will be used by the parties to determine the attainment of Reasonably Close Conformity with plans and specifications and to assign a value to the non-conforming work which does not meet that standard.

6.18.4 Cooperation with Utilities.

6.18.4.1. The Owner will notify all utility companies, all pipe line owners, or other parties affected, and endeavor to have all necessary adjustments of the public or private utility fixtures, pipe lines, and other

appurtenances within or adjacent to the limits of construction, which are not to be performed by the Contractor, made in accordance with the Project construction schedule.

6.18.4.2. Water lines, gas lines, wire lines, service connections, water and gas meter boxes, water and gas valve boxes, light standards, cableways, signals, and all other utility appurtenances within the limits of the proposed construction which are to be relocated or adjusted, are to be moved by their respective owners except for those to be moved by the Contractor as specifically provided in the Contract Documents.

6.18.4.3. It is understood and agreed that the Contractor has considered in his proposal all of the permanent and temporary utility appurtenances in their present or relocated positions as if same are shown on the plans and that no additional compensation will be considered for any delays, inconvenience, or damages sustained by Contractor due to any interference from the said known utility appurtenances or the operations of moving them, except in the case of failure by a utility to reasonably comply with its responsibility in relocating or adjusting its facility as required.

6.18.4.4. Prior to commencing Work, the Contractor shall make arrangements to protect the properties of all public and private utilities and other property within and adjacent to the Work area, if indicated in the Contract Documents, from damage by his construction operations.

6.18.4.5. Contractor shall cooperate with the utility owners in the removal and rearrangement of any underground or overhead utility lines or facilities to minimize interruption to service and duplication of work by the utility owners.

6.18.4.6. In the event of interruption to water or other utility services as a result of accidental breakage, or as a result of being exposed or unsupported, the Contractor shall promptly notify the proper authorities and shall cooperate with them in the restoration of service as promptly as possible.

6.18.4.7. Fire hydrants shall be kept accessible to the Fire Department at all times and no Work shall be undertaken near fire hydrants until provisions for continued service have been made.

6.18.4.8. Contractor shall be responsible for the repair costs of any damage to utility facilities caused by his equipment or operations, except for underground facilities whose existence or approximate location was previously unknown.

6.18.5. Materials.

6.18.5.1. Source of Supply and Quality Requirements.

6.18.5.1.1. The materials used in the Work shall meet all quality requirements of the Contract Documents.

6.18.5.1.2. Unless otherwise provided in the Contract Documents, all materials used in the Work shall be furnished by the Contractor from sources selected by the Contractor.

6.18.5.1.3. Materials will be tested and approved when delivered to the Project or in their final position after incorporation to the Work as provided by the individual specifications.

6.18.5.1.4. At the option of the Owner's Representative, sources of materials may be given preliminary approval before delivery is started.

6.18.5.2. Procurement and Delivery of Materials.

6.18.5.2.1. The Contractor shall schedule the delivery at the Site of all materials and equipment required for the execution and completion of the Work at a time convenient to him so as to avoid delays in the prosecution of the Work and to allow completion of the Work within the Contract Time specified in the Contract Documents.

6.18.5.3. Earthwork Material Sources.

6.18.5.3.1. Designated Sources.

6.18.5.3.1.1. Specific sources of materials from offsite or onsite locations may be designated on the Plans and described in the Contract Documents.

6.18.5.3.1.2. Unless otherwise provided in the Contract Documents, direct payment will be made for development, preparation, erosion control, hauling and restoration of material sources or related work areas and sites.

6.18.5.3.2. Contractor Sources.

6.18.5.3.2.1. When no materials sources are designated in the Contract Documents, or if the Contractor desires to use materials from sources other than those designated, the Contractor shall be responsible for acquiring the necessary rights to take materials from the sources selected, for determining that the materials meet the specified requirements, and he shall bear all expenses for the exploration, development, erosion control and restoration of such sources, and for all costs of hauling the materials. Contractor will make sure that his sources of materials have the required permits.

6.18.5.4. Contractor's Quality Control.

6.18.5.4.1. The Contractor is responsible for the quality of all materials and workmanship furnished in the construction of the Project.

6.18.5.4.1.1. If specifically required in the Supplementary General Conditions, the Contractor shall provide his own quality control system and procedures including all personnel, equipment, supplies and facilities necessary to obtain samples, perform tests, evaluate test results and adequately control his work in order to insure that all such materials and workmanship meet the Contract requirements.

6.18.5.4.2. The Contractor shall, in all instances, perform his own process control sampling, testing and inspection during all phases of the Work as often and at a rate sufficient to assure that the Work conforms to the Contract requirements.

6.18.5.4.2.1. The Contractor shall insure that all of the testing equipment to be used is properly calibrated and meets the specifications applicable to each specified test procedure.

6.18.5.4.3. The cost of complying with Contractor's quality control obligations referred to in Article 6.18.5.4 is included in the Contract Price and no additional payment will be made therefore.

6.18.5.5. Storage of Materials.

6.18.5.5.1. Materials shall be so stored as to assure the preservation of their quality and fitness for incorporation to the Work.

6.18.5.5.1.1. Stored materials, even though approved before storage, may again be inspected at any time prior to or during their incorporation to the Work.

6.18.5.5.1.2. Stored materials shall be located so as to facilitate their prompt inspection.

6.18.5.5.2. When authorized by the Owner's Representative, portions of the Project Site may be used for storage purposes and for the placing of the Contractor's plant/facilities and equipment provided that they are located so as not to constitute a hazard to the construction of the Project or otherwise.

6.18.5.5.2.1. Any additional space required therefore must be provided by the Contractor at his expense.

6.18.5.5.3. Private property may be used for storage purpose with written permission of the Owner or lessee, and, if requested by the Owner's Representative, copies of such written permission shall be furnished to him.

6.18.5.5.4. All temporary storage areas and plant sites shall be restored to their original condition by the Contractor, at his expense, in a manner acceptable to the Owner's Representative.

6.18.5.6. Handling of Materials.

6.18.5.6.1. All materials shall be handled in such manner as to preserve their quality and fitness for incorporation to the Work.

6.18.5.7. Materials Furnished by the Owner.

6.18.5.7.1. The Contractor shall furnish all materials required to complete the Work, except those indicated in the Contract Documents to be furnished by the Owner.

6.18.5.7.2. Except as provided in Article 6.18.5.7.4, if the material to be furnished by the Owner is to be delivered to the jobsite, the Owner, unless specified otherwise in the Contract Documents, will furnish the material to the Contractor at no cost to the Contractor and the Owner will pay for all transportation, insurance, taxes and other cost related to the furnishing of the material to the jobsite. Cost of unloading is included in the Contract Price and Contractor shall receive no additional compensation for unloading.

6.18.5.7.3. If the material to be furnished by the Owner is to be delivered to the jobsite, the Contract Documents will indicate the delivery schedule. If no such schedule is indicated, the delivery will be made as agreed by the parties. Owner shall program the delivery schedule as not to adversely affect the critical path.

6.18.5.7.4. If the material to be furnished by the Owner is not to be delivered to the jobsite the Contract Documents will indicate the terms and conditions of said delivery. If no terms and conditions are included in the Contract Documents then the cost of delivery to the jobsite is not included in the Contract Price.

6.18.5.7.5. If the material to be furnished by the Owner is not to be delivered to the jobsite the Contract Documents will indicate the date and time of availability of the material. If no such date and time is indicated, the material will be available by agreement as not to impact the critical path.

6.18.5.7.6. The material to be furnished by the Owner will include all ancillary items included in the Technical Specification that describes the material to be furnished by the Owner, unless indicated otherwise in the Contract Documents.

6.18.5.7.7. The Owner warrants that the materials furnished by the Owner to the Contractor are of a quality sufficient for the purpose of their use. The Owner further warrants that the material to be furnished is Equal or Similar to that specified in the Technical Specification that describes the material to be furnished by the Owner.

6.18.5.7.8. The material furnished by the Owner will be of sufficient quantity including normal construction breakage, waste and shrinkage to complete the Work, unless the Contract Documents indicate otherwise.

6.18.5.7.9. The Contractor will be responsible for all Owner furnished materials delivered or made available to him in accordance with the terms and conditions of this section. If due to the fault of the Contractor, the Owner has to supply more material to the Contractor than indicated in the Contract Documents, the Owner may deduct this cost from any Partial Payment or Retainage due to the Contractor.

6.18.5.7.10. If the Owner's Representative has informed in a timely manner, the date or schedule of delivery of the material, the Contractor will be liable for all demurrage charges if he fails to receive the Owner furnished material within the time limit or schedule specified.

6.18.5.7.11. Unless otherwise indicated in the Contract Documents, all costs at jobsite including unloading, handling, warehousing and Installation of the Owner furnished material are included in the Contract Price and Contractor shall not receive additional compensation therefore.

6.18.5.8. Certification of Compliance.

6.18.5.8.1. When a certification of a material or assembly is required by the Contract, each lot of such materials or assemblies delivered to the Site shall be accompanied by certificate of compliance in which the delivered material or assembly is clearly identified.

6.18.5.8.2. Commercially manufactured products shall be accompanied by certificates signed by the manufacturer and, when required, supported by tests performed by the manufacturer. Certified copies of such test results shall be furnished to the Owner's Representative.

6.18.5.8.3. Materials or assemblies accompanied by certificates of compliance may be sampled and tested at any time and if found not to be in conformity with Contract Documents will be subject to rejection at any time whether incorporated to the Work or not.

6.18.5.8.3.1. Removal of such rejected materials will be at the Contractor's expense, unless such materials have been supplied by the Owner and it was Owner's duty to test for conformity with the Contract Documents.

6.18.6 Contractor shall carry on the Work and adhere as reasonably as possible to the Progress Schedule during all Disputes or disagreements with Owner.

6.18.6.1. If the Dispute or disagreement hinders the ability of the Contractor to carry on the Work, the Contractor shall so inform the Owner.

6.18.6.2. If the Dispute allows more than one course of action to be followed in the prosecution of the Work, the Owner's Representative may instruct the Contractor on the course of action to be followed.

6.18.6.3. No Work shall be delayed or postponed pending resolution of any Disputes or disagreements, except as permitted in section 15.4 or as Owner's Representative and Contractor may otherwise agree in writing.

6.18.7. Limitations on Operations.

6.18.7.1. Unless otherwise specified in the Contract Documents, the Contractor shall not open up new Work to the prejudice or detriment of Work already started.

6.18.7.1.1. In lineal projects, the Owner's Representative may require the Contractor to finish a section on which Work is in progress before Work is started on any additional section, if the opening of such section is essential to public safety or convenience.

6.18.7.1.2. If said order causes the Project to be delayed, the Contract Price and/or Contract Time shall be equitable adjusted.

6.19 Contractor's General Warranty and Guarantee

6.19.1. Contractor warrants and guarantees to Owner that all Work will be in accordance with the Contract Documents and will not be deficient. Contractor's warranty and guarantee hereunder excludes defects or damage after substantial, or partial completion and occupancy caused by:

6.19.1.1. abuse, modification, or improper maintenance or operation by persons other than Contractor, Subcontractors, Suppliers, or any other individual or entity for whom Contractor is responsible; or

6.19.1.2. normal wear and tear under normal usage by Owner or individuals or entities for whom Owner is responsible.

6.19.2. Contractor's obligation to perform and complete the Work in accordance with the Contract Documents shall be absolute. None of the following will constitute an acceptance of Work that is not in accordance with the Contract Documents or a release of Contractor's obligation to perform the Work in accordance with the Contract Documents:

6.19.2.1. observations by Architect/Engineer and/or Owner's Representative;

6.19.2.2. recommendation by Owner's Representative or payment by Owner of any progress or final payment;

6.19.3. the issuance of a certificate of Substantial Completion by Owner's Representative or any payment related thereto by Owner;

6.19.4. use or occupancy of the Work or any part thereof by Owner;

6.19.3. The Contractor warrants to the Owner that all materials and equipment furnished under this Contract will be new unless otherwise specified, and that all Work will be free from faults and defects and in conformance with the Contract Documents for the time periods specified in the Contract Documents or for one (1) year, whichever is

longer, unless otherwise specified in the Contract Documents.

6.19.3.1. If required by the Owner's Representative, the Contractor shall furnish satisfactory evidence as to the kind and quality of materials and equipment.

6.20 Indemnification

6.20.1. To the fullest extent permitted by Laws and Regulations, Contractor shall indemnify and hold harmless Owner, Architect/Engineer, Architect/Engineer's Consultants, and the officers, directors, partners, employees, agents, and other consultants and subcontractors of each and any of them from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out or relating to the performance of the Work, provided that any such claim, cost, loss, or damage:

6.20.1.1. is attributable to bodily injury, sickness, disease, or death, or to injury to or destruction of tangible property (other than the Work itself), including the loss of use resulting there from; and

6.20.1.2. only to the extent caused by any negligent act or omission of Contractor, any Subcontractor, any Supplier, or any individual or entity directly or indirectly employed by any of them to perform any of the Work or anyone for whose acts any of them may be liable.

6.20.2. The indemnification obligations of Contractor under section 6.20.1 shall not extend to the Architect/Engineer and Architect/Engineer's Consultants or to their officers, directors, partners, employees, agents, and other consultants and subcontractors of each and any of them arising out of:

6.20.2.1. errors and/or omissions in the preparation or approval of, or the failure to prepare or approve, maps, Drawings, opinions, reports, surveys, Change Orders, designs, or Specifications; or

6.20.2.2. giving directions or instructions, or failing to give them, if that is the primary cause of the injury or damage.

6.21 Subcontractors, Suppliers and Others

6.21.1. Award of Subcontracts for Portions of The Work.

6.21.1.1. Unless otherwise specified in the Contract Documents the Contractor, as soon as practicable after the signing of the Contract, shall furnish to the Owner's Representative in writing for his acceptance a list of the names of the main Suppliers and Subcontractors proposed for the principal portions of the Work.

6.21.1.1.1. The Owner's Representative shall promptly notify the Contractor in writing if he, after due investigation, has reasonable objection to any Supplier or Subcontractor on such list and does not accept him. Said reasonable objection may include, but are not limited to, previous default by said Subcontractor or Supplier with Owner, a record of flagrant safety violations or an unsatisfactory past performance with Owner.

6.21.1.1.1.1. The Owner's Representative shall specify in writing the reasons for such objection

6.21.1.1.1.2. If within fifteen (15) calendar days from submittal by the Contractor, the Owner's Representative fails to make objections to any Supplier or Subcontractor on the list, the Contractor shall request the approval of the list by the Owner's Representative who shall have ten (10) days to issue his decision. If no reply is forthcoming from the Owner's Representative within the stated time, the list of Suppliers or Subcontractors shall be deemed approved.

6.21.1.1.2. The Contractor shall not contract with any Supplier or Subcontractor or any person or organization (including those who are to furnish materials or equipment fabricated to a special design) that has been rejected by the Owner's Representative in the manner indicated in Article 6.21.1.1.1, above.

6.21.1.1.3. If the Owner's Representative refuses to accept any Supplier, Subcontractor, person, or organization on a list submitted by the Contractor in response to the requirements of the Contract Documents, the Contractor shall submit an acceptable substitute.

6.21.1.1.3.1. No increase in the Contract Sum shall be allowed for any such substitution of a rejected Subcontractor and/or Supplier or other in accordance with Article 6.21.

6.21.1.1.3.2. No acceptance by Owner's Representative of any such Subcontractor, Supplier, or other individual or entity, whether initially, or as a replacement, shall constitute a waiver of any right of Owner's Representative or Engineer to reject defective Work.

6.21.1.1.4. Unless otherwise specified in the Contract Documents, the Contractor shall execute, with his own forces and organization, Work amounting to not less than twenty-five percent (25%) of the original total Contract Price.

6.21.1.1.4.1. Any items designated in the Contract Documents as "Specialty Trades or Items" shall be deducted from original total cost before computing the amount of the work required to be performed by the Contractor with his own forces and organization

6.21.2. Payments to Subcontractors.

6.21.2.1. The Contractor shall pay each Subcontractor for work performed in the Project in accordance with the terms and conditions stipulated in the contract executed by and between the Contractor and the Subcontractor.

6.21.2.1.1. The Contractor shall also require the Subcontractor to make similar payments to his Sub-Subcontractors.

6.21.3. Flow Down of Applicable Agreement Provisions.

6.21.3.1. The Contractor shall cause the inclusion, in all agreements executed by contractor with Subcontractors and Suppliers, of all applicable provisions of the Agreement with which Subcontractors and Suppliers need to comply for their proper performance on behalf of Contractor, of the duties and obligations imposed by the Contract Documents. Contractor shall also cause Subcontractor and Suppliers to include in their respective agreements with Sub-Subcontractors, and Sub-Suppliers the same duties to flow down to all lower tier agreements such applicable Agreement provisions.

6.21.4. The Contractor shall be considered as an independent contractor for all purposes under the Contract, and no persons engaged or contracted by the Contractor for the performance of Contractor's obligations shall be considered an employees or agents of the Owner.

6.21.5. Contractor shall be fully responsible to Owner's Representative, Owner and Architect/Engineer for all acts and omissions of the Subcontractors, Suppliers, and other such individuals or entities performing or furnishing any of the Work.

6.21.5.1. Nothing in the Contract Documents shall create for the benefit of any Subcontractor or Supplier a contractual relationship between Owner's Representative, Owner or Architect/Engineer, nor shall it create any obligation on the part of Owner's Representative, Owner or Architect/Engineer to pay or to see to the payment of any moneys due any such Subcontractor, Supplier, or other individual or entity except as may otherwise be required by Laws or Regulations.

6.21.6. Contractor shall be solely responsible for scheduling and coordinating the Work of Subcontractors, Suppliers, and other such individuals or entities performing or furnishing any of the Work under a direct or indirect contract with Contractor.

6.21.7. Contractor shall require all Subcontractors, Suppliers, and such other individuals or entities performing or furnishing any of the Work to communicate with Owner's Representative only through Contractor.

6.21.8. All Work performed for Contractor by a Subcontractor or Supplier will be pursuant to an appropriate agreement between Contractor and the Subcontractor or Supplier that specifically binds the Subcontractor or Supplier to the applicable terms and conditions of the Contract Documents for the benefit of Owner's Representative, Owner and Architect/Engineer, including required contract provisions applicable to Federal Agency funded projects.

6.21.8.1. Whenever any such agreement is with a Subcontractor or Supplier who is listed as an additional insured on the property insurance provided in section 3.6, the agreement between the Contractor and the Subcontractor or Supplier will contain provisions whereby the Subcontractor or Supplier waives all rights (including subrogation) against Owner, Contractor, Architect/Engineer, Architect/Engineer's Consultants, and all other individuals or entities identified in the Contract Documents to be listed as insured or additional insured (and the officers, directors, partners, employees, agents, and other consultants and subcontractors of each and any of them) for all losses and damages caused by, arising out of, relating to, or resulting from any of the perils or causes of loss covered by such policies and any other property insurance applicable to Work.

6.21.8.1.1. If the insurers underwriting any such policies require separate waiver forms to be signed by any Subcontractor or Supplier, Contractor will obtain the same.

ARTICLE 7 - ARCHITECT/ENGINEER AND DESIGNATED INSPECTOR

7.1 Administration of the Contract

7.1.1. The Owner will provide general Administration of the Construction Contract, including performance of the functions hereinafter described, through the Owner's Representative.

7.1.2. The Owner, prior to the start of the Project, will inform the Contractor in writing the name of the Owner's Representative. If the Owner's Representative is changed during the course of the project the Owner will inform the Contractor in writing the name of the new Owner's Representative. If the Contractor has valid reasons for objecting said designation, Contractor shall so inform the Owner in writing and, if Owner deems Contractor's reasons valid, a different Owner's representative shall be chosen by the Owner.

7.1.3. The Owner may from time to time change the person or entity designated as Owner's Representative, or may

assume and/or change the functions of the Owner's Representative, and the Architect/Engineer by notifying the Contractor in writing.

7.2 Duties of Architect/Engineer and the Owner's Representative

7.2.1. The Architect/Engineer is the person or entity who prepares the Drawings and Specifications for the Owner and is responsible for the analysis, design, and code compliance of the Project.

7.2.1.1. The Architect/Engineer will make periodic visits to the site to familiarize himself generally with the progress and quality of the Work and to determine in general if the Work is proceeding in accordance with the Contract Documents.

7.2.1.1.1. Based on on-Site observations, the Architect/Engineer will keep the Owner informed of the progress of the Work, and will endeavor to safeguard the Owner against defects and deficiencies in the Work.

7.2.1.1.2. The Architect/Engineer will be the Owner's representative for technical matters related to the Contract.

7.2.1.1.3. The Architect/Engineer will be the primary interpreter of the plans and specifications.

7.2.1.1.4. The Architect/Engineer and Owner's Representative will not be responsible for the acts or omissions of the Contractor, or any Subcontractor and vice-versa, or any of their agents or employees, or any other persons performing any of the Work.

7.2.2. The Owner's Representative will represent the Owner in the interpretation of all contractual and non-technical matters. The Owner's Representative will have authority to act on behalf of the Owner to the extent provided in the Contract Documents.

7.2.2.1. All communications related to this Contract between the Contractor and Architect/Engineer shall be made thru the Owner's Representative, except that any party may directly communicate orally or by written communication with the others if authorized by the Owner's Representative, or in case of an Emergency.

7.2.2.2. The Owner's Representative may delegate some or all of his functions to Project Inspectors and/or Inspectors.

7.2.2.2.1. The Owner's Representative will inform the Contractor the name of the Project Inspectors and/or Inspectors. If the Contractor has a valid reason for not accepting the designated Project Inspector, he shall so inform the Owner in writing and if Owner deems the reason valid a different Owner's representative shall be chosen by the Owner.

7.2.2.2.2. Inspectors employed by the Owner, the Architect/Engineer and/or the Owner's Representative are authorized to inspect all work done and materials furnished, including the preparation, fabrication or manufacture of the materials to be used.

7.2.2.2.3. Inspectors also have the authority to reject any materials and work until any questions at issue can be resolved.

7.2.2.3. Owner's Representative and/or inspectors are not authorized to alter or waive the provisions of the

Contract, to issue instructions contrary to the plans and specifications, or to act as foremen for the Contractor.

7.2.2.4. Based on his observations and the Contractor's Application for Payment, the Owner's Representative will determine the amount owed to the Contractor and will recommend approval of Payment in such amount.

7.2.2.4.1. If the Owner so requires, Architect/Engineer will also review, and approve, the Contractor's Application for Payment.

7.2.2.5. The Owner's Representative will prepare Change Orders, and Extra Work Orders, in accordance with these General Conditions.

7.2.3. The Owner's Representative, the Architect/Engineer and/or the Owner shall at all times have access to the Work either in preparation or in progress. The Contractor shall provide access to the Work so that at all times Owner's Representative may perform his duties under the Contract Documents, and Contractor shall provide such information and assistance, as is required, to make a complete and detailed inspections.

7.2.3.1. If the Owner's Representative, and/or the Owner, request it, the Contractor, at any time before Final Acceptance of the Work, shall remove or uncover such portions of the finished Work as instructed . After examination, the Contractor shall restore said portions of the Work to the standard required by the specifications.

7.2.3.1.1. Should the Work so exposed and examined prove acceptable, the uncovering, or removing, and the replacing of the covering will be paid by the Owner as extra work; but should the Work so exposed or examined prove unacceptable, the uncovering, removing, remediation and the replacing of the covering will be at the Contractor's expense.

7.2.3.1.2. Any Work done or materials used without supervision or inspection by an authorized Owner's representative may be ordered removed and replaced at the Contractor's expense unless the Owner representative failed to inspect after having been given a written notice of at least two (2) Working Days prior to the date in which Work was performed.

7.2.3.1.3. When any government agency or any utility is to accept or pay for any portion of the Work, its respective representatives shall have the right to inspect the Work. Such inspection shall not make the government agency or utility a party to the Contract. Contractor and Owner shall diligently perform all necessary actions to promote the timely inspection of the Work in a manner that does not affect the critical path.

7.2.3.1.4. The inspection of the Work and materials by the Owner shall not release the Contractor of any of his obligations under the Contract as prescribed in the plans, specifications and other Contract Documents.

7.2.3.1.5. The Owner's Representative will conduct inspections to determine the dates of Substantial Completion and final completion and will receive and review written guarantees and related documents submitted by the Contractor.

7.2.3.1.6. In case of any dispute between the Contractor and any one Project Inspector or Inspector as to materials furnished or the manner of performing the Work, the Project Inspector or the Inspector shall have the authority to reject materials or suspend the work until the question at issue can be referred to and decided by the Owner's Representative, within reasonable promptness, so at not to alter the critical path or modify substantially the float and the programmed progress of the job.

7.2.4. The Owner's Representative will be, in the first instance, the interpreter of the requirements of the Contract

Documents, except as indicated in Article 7.2.1.3. The Owner's Representative will, within a reasonable time, render such interpretations that he, or the Contractor, if so requested, may deem necessary for the proper execution or progress of the Work.

7.2.4.1. All interpretations and decisions of the Owner's Representative shall be consistent with the intent of the Contract Documents. In his capacity as interpreter, he will exercise his best efforts to insure faithful performance under the Contract.

7.2.4.2. Claims, disputes and other matters in question relating to the execution or progress of the Work or the interpretations of the Contract Documents shall be submitted initially to the Owner's Representative for a decision in accordance with Article 11.

7.2.5. The Owner's Representative will have authority to reject work only when such work does not conform to the Contract Documents. Whenever, in his reasonable opinion, he considers it necessary or advisable, to insure the proper implementation of the intent of the Contract Documents, he will have authority to require special inspection or testing of the Work in accordance with Article 12.3 whether or not such Work is then fabricated, installed or completed.

7.2.5.1. However, neither the Owner's Representative's authority to act under this Article, nor any decision made by him in good faith either to exercise or not to exercise such authority, shall give rise to any duty or responsibility of the Owner, Owner's Representative or Architect/Engineer to the Contractor, any Subcontractor, any of their agents or employees, or any other person performing any of the Work, nor will the Contractor be released from any of his obligations under the Contract.

7.2.5.1.1. The Owner's Representative shall have the authority to stop the Work in whole or in part when such stoppage is necessary to insure the proper execution of the Work and compliance by contractor with the Contract.

ARTICLE 8 - OTHER WORK AND SEPARATE CONTRACTS

8.1 Owner's Right to Award Separate Contract, Perform Work with Owner's Employees and Utility Workers. Related Work at Site

8.1.1. Owner's Right to Award Separate Contract, Perform Work with Owner's Employees and Utility Workers.- Owner may perform other work related to the Project at the Site with Owner's employees, or by awarding separate contracts, or by having the work performed by utility workers. Written notice thereof will be given to Contractor prior to starting any such other work.

8.1.1.1. If the terms and conditions of the work to be performed by Owner's employees, separate contractors or by others, are not described in the Contract Documents prior to the bid, the Contract Time and Sum will be equitably adjusted as a result of said work and any other work to the extent that such work performed by Owner's employees, separate contracts or by others affects the Contractor's Work.

8.1.1.2. If the terms and conditions of the work to be performed by Owner's employees, separate contractors or by others are described in the Contract Documents prior to the bid, then the Contract Time and Sum will be equitably adjusted but only to the extent that said work differs from the work indicated in the Contract Documents that is to be performed by Owner's employees, separate contractors or by others.

8.1.1.3. Should the performance of other work related to the Project at the Site by Owner's employees,

separate contractors, utility workers, that was not indicated in the Contract Documents, cause damages, delays or interferes with the Work being performed by the Contractor, the Owner will assume full responsibility and pay for all costs, expenses, and delays to which the Contractor is subjected caused by the execution and/or performance of said other work described herein if the critical path is adversely affected.

8.1.1.4. In the event one or more contracts are awarded related to the Project, the "contractor" in the contract document in each case, will be the contractor who signs each separate contract.

8.1.1.5. If there is under construction other work for Owner,by written contract or otherwise, adjacent to the limits of the site, the Contractor, if so ordered by the Owner, shall permit access to others performing such work through the Site.

8.1.1.5.1. If Owner authorizes the other contractors performing work adjacent to the Site to use said access Owner shall prescribe limitations and conditions for such use as required to protect Contractor's operations and the Work.

8.1.1.5.1.1. In accordance with this Article 8.1, the Owner will be responsible for any damages, costs, or delays caused to the Contractor by such order.

8.1.1.6. If Owner and Contractor are unable to agree on entitlement to or on the amount or time, if any, of any adjustment in the Contract Price or Contract Time necessary as a result of such other work, a Claim may be made therefore as provided in Article 11.5.

8.1.2. Coordination of the Separate Contracts and Work by Others.

8.1.2.1. Unless otherwise specified in accordance with Article 8.1.2.4, Owner shall be responsible for the coordination of the Work between the Contractor, Owner's employees, the separate contractors and any others, as to the interaction and scheduling of the various work and the proper and safe access to the Site and storage of the equipment and materials of the Contractor, the Owner's employees, the separate contractors and others contracted by Owner.

8.1.2.2. Contractor shall fully cooperate with the Owner in the coordination of the Contractor's Work with that of the Owner's employees, the separate contractors and any work by others as to the interaction and scheduling of the various work and the proper and safe access to the Site and storage of the equipment and materials of the Contractor, the separate contractors and others.

8.1.2.3. The Owner may delegate this coordination, in whole or in part, to a Construction Manager or separate contractor and must give prior notice to Contractor in writing, containing the terms and conditions of this delegation.

8.1.2.3.1. The Construction Manager or the separate contractor will act on behalf of Owner strictly within the limits of such delegation.

8.1.2.4. The Owner may delegate this coordination responsibility in whole or in part to one of the separate contractors or to the Contractor as follows:

8.1.2.4.1. If prior to the bid opening date, the Owner requires that the Contractor be responsible for the coordination of the Owner's employees, separate contracts or any work by others, the Owner will indicate the

terms and conditions of such obligation in the bid documents and it shall be the Contractor's responsibility to include in the Contract Price whatever costs are required for this coordination of the work.

8.1.2.4.2. If the Owner requires that Contractor be responsible for the coordination of Owner's employees, separate contracts or work by others after the bid has been awarded, the Owner will indicate the terms and conditions of such obligation as a Change Order.

8.1.2.5. Contractor Coordination Meetings:

8.1.2.5.1. If the Owner, or the party with the coordinating responsibility so requires it, the Contractor shall attend coordination meetings with the Owner's employees, separate contractors or others performing work at a site to be determined by the coordinator.

8.1.2.5.1.1. The purpose of the coordination meeting shall be for the Contractor and all separate contractors and/or others performing work to coordinate schedules and construction activities to enable the construction of the different work under the separate contracts to occur on a coordinated, efficient and expeditious manner.

8.1.2.5.1.2. The coordination meeting shall also serve as forum for the Contractor and all separate contractors and/or others performing work at the site to discuss, and try to avoid and try to resolve between and among themselves any conflicts in their respective schedules or construction activities and prevent delays in one contractor's activities caused by another.

8.1.2.5.2. If the different contractors cannot reach an agreement on the coordination of the construction activities and schedule to be followed, the Owner, or his designated coordinating representative, will decide on the course of action to be followed and shall provide the necessary instructions to the Contractor, Owner's employees, separate contractors and others performing work on how to proceed, as a Field Order or, if required, as a Change Order.

8.1.3. Contractor, and any other entity contracted by the Owner to perform direct work related to the Project, shall do all cutting, fitting, and patching of the Work that may be required to properly connect or otherwise make its several parts come together and properly integrate such other work with the work of the Contractor or any other entity contracted by the Owner to perform related work on the Project.

8.1.3.1. Contractor, or any other entity contracted by the Owner to perform related work on the Project, shall not endanger any work of others by cutting, excavating, or otherwise altering their work and will only cut or alter their work with the written consent of Owner and the others whose work will be affected.

8.1.4. The duties and responsibilities of Contractor under this Article are for the benefit of such utility owners and separate contractors to the extent that there are comparable provisions for the benefit of Contractor, including general, supplemental and special conditions, as well as similar insurance and hold harmless clauses, in said direct contracts between Owner and such utility owners and separate contractors.

8.1.4.1. Furthermore, the Owner will verify that the schedule of others contracted to perform related work on the Project does not interfere with the Project Schedule.

8.1.4.1.1. If in order to accommodate the work performed by others contracted by the Owner to perform related work in the Project, the critical path is adversely affected and/or any damage to the Work occurs, the Owner will compensate the Contractor in time and/or adjustment to Contract Price.

8.1.5. If the proper execution or results of any part of Contractor's Work depends upon work performed by others under this Article, Contractor shall promptly inspect such other work and, within ten (10) working days, report to Owner in writing any delays, defects, or deficiencies in such other work that, in his opinion, render it unavailable or unsuitable for the proper execution and results of the Work.

8.1.5.1. Contractor's failure to report will constitute acknowledgement that said work is suitable, except for hidden latent defects in such work.

8.1.5.2. The same rules stated herein will apply if other entities contracted by the Owner to perform related work in the Project depend on Work performed by the Contractor.

8.2 Owner's Right to Award Separate Contract.

8.2.1. The Owner may award separate contracts in connection with other portions of the Project or additional work to the Work covered by the Contract, and if such work affects the Work, Contractor will be notified by Owner in a timely manner of the award of such separate contract.

8.2.1.1. The Owner may assign these separate contracts, as a Change Order, to the Contractor for a fee, as indicated on Article 10.5.

8.2.2. When Separate Contracts are let within the limits of any project, the Owner shall coordinate the work of each contractor so as not to interfere with or hinder the progress or completion of the Work being performed by Separate Contractors.

8.2.2.1. Contractors working on the same Project shall fully cooperate with each other.

8.2.2.2. Furthermore, the Owner will be responsible to verify that the schedule of the Separate Contractors contracted to perform Work on the Project does not interfere with the Contractor's Project Programmed Schedule previously approved for the Project.

8.2.2.2.1. Owner will compensate the Contractor, in time and/or adjustment to Contract Price, if his schedule has to be varied, and/or any damage occurs, to accommodate the work performed by other entities contracted by the Owner to perform related work in the Site.

8.3 Mutual Responsibility of Contractors

8.3.1. Each Contractor involved shall assume all liability, financial or otherwise, in connection with his Contract and shall protect and save harmless the Owner from any and all damages or claims that may arise out of the performance of the Contractor's Work.

8.3.1.1. The Owner will require from each Separate Contractor and other entities working on the Project, Contract Documents, including General, Supplemental and Special Conditions, similar to those executed with the Contractor and to include similar insurance clauses and hold harmless clauses.

8.3.1.2. The Owner will also be responsible to verify that the schedule of the Separate Contractors) and other entities working on the project do not interfere with the Contractor's Project Programmed Schedule previously approved for the Project.

8.3.2. Should the Contractor cause damage to the work or property of any separate contractor and/or others working on the Project, the Contractor shall, be liable for said damage.

8.3.2.1. If such other separate contractor files a claim against Owner on account of any such damage alleged to have been so sustained, Contractor shall have the right to defend Owner, either by itself or in conjunction with Owner, and Contractor shall compensate Owner for damages, costs and expenses sustained therefore by Owner which are attributable to Contractor.

8.3.2.1.1. If the Contractor is found to be responsible for the alleged defects claimed by the separate contractor and any judgment or award against the Owner arises therefrom, the Contractor shall pay or satisfy it and shall reimburse the Owner for all attorney's fees and court, arbitration costs or other costs which the Owner has therefore incurred.

8.3.2.1.2. If the Contractor is found not to be responsible for the alleged defects claimed by the separate contractor, then the Owner shall pay for any judgment or award against him as well as reimburse the Contractor for all attorney's fees and court or arbitration costs incurred in defending the Owner.

ARTICLE 9-TIME

9.1 Progress and Completion

9.1.1 All time limits stated in the Contract Documents are of the essence of the Contract.

9.1.2 The time limit for the execution of this Contract has been figured out based on the Architect/Engineer and/or Owner's estimate.

9.1.2.1. Such time limit to into consideration all Sundays, legal holidays indicated in Article 1.1.1.4,1, included within the said time limit.

9.1.2.2. The Contractor will be entitled to work premium time (overtime) as required to comply with the schedule of the Project.

9.1.2.2.1. No work shall be performed on Saturdays, Sundays or legal holidays, except in cases of emergency, or unless prior written permission has been granted by the Owner's Representative.

9.1.2.2.1.1. Except in cases of emergency, request for permission to Work on Saturdays, Sundays or legal holidays shall be filed with the Owner's Representative not less than twenty four (24) hours in advance of said date, if the activity affects the critical path and not less than forty eight (48) hours if the proposed activity does not affect the critical path.

9.1.2.2.1.2. Said permission shall not be unreasonably denied.

9.1.2.2.2. Premium time (overtime) necessary in case of emergency, or for completion of daily work, or to comply with the Project schedule, shall be notified to the Project Inspector during the course of the day that said premium time will be worked.

9.1.3. The date of commencement of the Work shall be stated in the Notice to Proceed.

9.1.3.1. The Contractor shall begin the Work on such date of commencement fixed by the Notice to Proceed.

9.1.3.2. The Contractor shall carry out the Work expeditiously with adequate forces and shall complete it within the Contract Time

9.1.3.3. A Notice to Proceed issued without the Owner having furnished all required permits and/or endorsements necessary to commence the Work which fixes a commencement date which cannot be complied with due to the lack of such permits shall constitute a valid basis for a claim by Contractor under Article 11.5 if such act adversely affects the Project's critical path and no concurrent cause of delay by the Contractor is present.

9.1.4. The Contract Time limit to execute the Work until it is substantially complete shall be that number of calendar days resulting from the sum of the original Contract Time and the authorized extensions to the original Contract Time. Said Contract Time shall start to run on the date fixed in the Notice to Proceed (the commencement date) and shall end on the date of Substantial Completion. If the work is Substantially Completed prior to said time limit, the Contractor will have achieved early completion, if Work is not Substantially Completed within said time limit, the Contractor will not have completed the Work on time in accordance with the Contract.

9.1.4.1. Time under the Contract will, stop running on the date of Substantial Completion.

9.2 Change of Contract Time

9.2.1. The Contract Time (or Milestones) may only be changed with a Change Order, Extra Work Order or by a Written Amendment.

9.2.1.1. Any Claim for an adjustment in the Contract Time (or Milestones) shall be based on a written notice submitted by the party making the claim to the Owner in accordance with the provisions of Article 11.5.

9.2.2. Any adjustment of the Contract Time (or Milestones) due to any delay beyond the control of Contractor, will be made in an amount equal to the time lost due to such delay, including its consequences, if a Claim is made therefore as provided in Article 11.5 only if such delay affect the critical path, as reflected in the monthly Progress Schedule.

9.2.2.1. Delays beyond the control of Contractor shall include, but are not limited to, acts or neglect by Owner, acts or neglect of utility owners or other contractors performing other work as contemplated on these General Conditions, lack of, or lapse, of any permit, or endorsement, issued by the governmental entities having jurisdiction in the Project which are the responsibility of Owner, fires, floods, epidemics, weather conditions, or acts of God.

9.3 Delays and Extensions of Time

9.3.1. No extension of the Contract Time will be allowed for any reason except as provided below:

9.3.1.1. If satisfactory fulfillment of the Contract with authorized extension and increases requires the performance of Work in greater quantities than those set forth in the proposal so that the total final payment is

greater than the total original Contract Price, then the time allowance will be equitably adjusted taking into account the amount and difficulty of the additional Work and only if the scope of the Work is increased or the critical path of the Project Schedule is affected.

9.3.1.2. In case of total suspension ordered by the Owner and not due to any fault of the Contractor, the total number of calendar days during which the Work is suspended shall be added to the Contract Time. In case of suspension of part of the Work ordered by the Owner not due to any fault of the Contractor, the Contract Time shall be extended to the extent that the effect that such suspension has on the Contract Time, and only to the extent the critical path of the Project Schedule is affected.

9.3.1.2.1. After Contractor has taken all reasonable steps to minimize Project overhead during the suspension, the Project fixed overhead costs incurred during the suspension by the Contractor will be reimbursed to Contractor by the Owner.

9.3.1.3. In case of damage to the Work due to Force Majeure, the Owner shall equitably adjust Contract Time based on the time required to repair the damage, provided the critical path is affected.

9.3.1.4. In case of delays or interruptions to the Work caused by any act of the Owner, or by any separate Contractor employed by the Owner or by any other cause not attributable to the fault or negligence of the Contractor, then the Contract Time shall be equitably adjusted.

9.3.1.4.1. The Project reasonable fixed overhead costs incurred by the Contractor due to the time extension caused by the acts described in Article 9.3.1.4 ,will be reimbursed to the Contractor by the Owner.

9.3.1.5. Every Change Order, Extra Work Order or Supplemental Agreement, if any, shall include all adjustments to Contract Time and to Contract Price related thereto, if any.

9.3.1.6. Unless otherwise specified in the Contract Documents, additional Contract Time will be allowed due to weather conditions, and their consequences, which render the performance of Work impossible.

9.3.1.7. Except as otherwise stated in this Article 9, where Contractor is prevented from completing any part of the Work within the Contract Time (or Milestones) due to delays beyond the control of both Owner and Contractor, if the critical path of the Project Schedule is affected, an extension of the Contract Time (or Milestones) for a period of time equal to the time lost due to such delay shall be Contractor's sole and exclusive remedy for such delay.

9.3.2. Extension in Contract Time shall not be considered or allowed for the following reasons:

9.3.2.1. Suspensions of Work ordered by the Owner or Owner's Representative due to the fault of the Contractor or his Subcontractor.

9.3.2.2. Unauthorized suspensions of Work by the Contractor.

9.3.2.3. Delays within the control of Contractor.

9.3.2.3.1. Delays attributable to or within the control of a Subcontractor or Supplier shall be deemed to be delays within the control of Contractor.

9.3.3 All notifications of claims for extension of time shall be made in writing by the Contractor to the Owner's Representative not more than thirty (30) working days after acquiring knowledge of the occurrence of the delay. Once made, the Contractor must supplement such claim by notice to Owner within thirty (30) working days after the event that caused the delay has concluded. If proper notification of a claim or subsequent supplemental notice is not given to Owner, then all related claims regarding increases to Contract Time, and Contract Price will be deemed waived by Contractor.

9.3.3.1. Claims for extension of time shall include:

9.3.3.1.1. the reasons for the time extension as required by the Owner's Representative;

9.3.3.1.2. the operation(s) alleged to have been delayed;

9.3.3.1.3. the calendar dates on which the operation(s) were delayed;

9.3.3.1.4. the number of calendar days by which Contractor requests Contract Time be extended;

9.3.3.1.5. a complete and detailed statement as to how the critical path was affected; and

9.3.3.1.6. a complete and detailed breakdown of adjustment to Contract Price to be claimed due to the claimed time extension, if adjustment to Contract Price is to be claimed.

9.4 Delay Damages

9.4.1. In no event shall Owner or Architect/Engineer be liable to Contractor, any Subcontractor, any Supplier, or any other person or organization, or to any surety for or employee or agent of any of them, for damages arising out of or resulting from:

9.4.1.1. delays caused by or within the control of Contractor; or

9.4.1.2. delays caused by Force Majeure and/or beyond the control of both Owner and Contractor .

9.4.1.3. delays not notified within the time specified in Article 9.3.3 or contrary to Article 9.3.3.1.

9.4.2. Nothing in this Article 9 bars a change in Contract Price to compensate Contractor due to delay, interference, or disruption directly attributable to actions or inactions of Owner or anyone for whom Owner is responsible, provided Contractor complies with the requirements of Articles 9.3.3. and 9.3.3.1.

9.5 Liquidated Damages

9.5.1. Unless otherwise specified in the Contract Documents should the Contractor or, the Surety in case of Termination for Cause, fail to complete all the Work within the time specified in the Contract or as extended by the written authorization of the Owner, a deduction of the amount stipulated herein will be made for each and every calendar day that the Work is not completed after the expiration of the time limit to execute the Work described in Article 9.1.4:

SCHEDULE OF LIQUIDATED DAMAGES		
Original Contract Price		Daily Charge
From More Than	To and Including	
$ 0.00	$ 99,999.99	$ 300.00
$ 100,000.00	$ 499,999.99	$ 400.00
$ 500,000.00	$ 999,999.99	$ 800.00
$ 1,000,000.00	$ 1,999,999.99	$ 1,000.00
$ 2,000,000.00	$ 4,999,999.99	$ 2,000.00
$ 5,000,000.00	$ 9,999,999.99	$ 3,000.00
$ 10,000,000.00	$19,999,999.99	$ 4,000.00
$ 20,000,000.00	$29,999,999.99	$ 5,000.00
$ 30,000,000.00	$39,999,999.99	$6,000.00
$ 40,000,000.00	$49,999,999.99	$7,000.00
Over $50,000,000.00	Unlimited	$8,000.00 or as otherwise indicated in the Special Conditions

9.5.2. This amount will be deducted from any money due or that may become due the Contractor or his Surety by Owner.

9.5.3. The Original Contract Price in the above schedule of Liquidated Damages for unit price projects refers to the total original contract amount including all the units in a multi-unit contract. Liquidated damages will be applied on multi-unit contracts based on the daily charges applicable to the total original contract amount.

9.5.4. The amount stipulated in Article 9.5.1, or otherwise if otherwise specified in the Contract Document, as the case may be, shall be considered and treated not as a penalty, but as a total, fixed, and agreed upon liquidated damages due the Owner by the Contractor or, by the Surety in case of Termination for Cause, for and including but not limited to, public inconvenience, obstruction to traffic, interference with and/or loss of business, increase of engineering, inspection and administrative cost to the Owner; and other costs and expenses which have caused an expenditure of public funds, resulting from the Contractor's, or in case of Termination for Cause of the Surety's, failure to complete the work within the time specified in the Contract.

9.5.5. Permitting the Contractor to continue and finish the Work or any part thereof after expiration of the time limit for Substantial Completion described in Article 9.1.4 shall in no way operate as a waiver of any right or remedy available to Owner under this Contract or at law.

9.6 Early Completion Incentive

9.6.1. Unless otherwise stated in the Contract Documents, should Contractor Substantially Complete the Work before expiration of the Contract Time as extended by the Owner, the Contractor shall receive an incentive pay from the Owner equal to one half (1/2) of the stipulated liquidated damages for each calendar day the Work is Substantially Completed prior to the time limit to complete the Work described in Article 9.1.4.

ARTICLE 10 - CHANGE OF CONTRACT PRICE, COST OF THE WORK AND UNIT PRICE WORK

10.1 Change of Contract Price

10.1.1. The Contract Price may only be changed by a Change Order or by a Written Amendment. Any Claim for an adjustment in the Contract Price shall be based on written notice submitted by the party making the Claim to the Owner in accordance with Article 11.5.

10.1.2. The value of the Work covered by a Change Order or covered by a Claim for an adjustment in the Contract Price will be determined as follows:

10.1.2.1. where the Work involved is covered by unit prices contained in the Contract Documents, by application of such unit prices to the quantities of the items involved (subject to the provisions of section 10.4); or

10.1.2.2. where the Work involved is not covered by unit prices contained in the Contract Documents, by a mutually agreed lump sum (which may include an allowance for overhead and profit not necessarily in accordance with section 10.5) or by newly agreed unit prices; or

10.1.2.3. where the Work involved is either: (a) not covered by unit prices contained in the Contract Documents, or (b) agreement as to a lump sum is not reached (under Article 10.1.2.2,) the value of the work shall be computed on the basis of the Cost of the Work (determined as provided in Article 10.2) plus a Contractor's fee for overhead and profit (as provided in Article 10.5).

10.2 Cost of the Work

10.2.1. Costs Included: The term Cost of the Work means the sum of all costs necessarily incurred and paid by Contractor in the proper performance of a change in the Work. When the value of any Work covered by a Change Order, Extra Work Order or Construction Change Directive or when a Claim for an adjustment in Contract Price is determined on the basis of Cost of the Work, the costs to be reimbursed to Contractor will be only those additional or incremental costs required because of the change in the Work. Except as otherwise agreed in writing by Owner's Representative, such costs shall be in amounts no higher than those prevailing in the locality of the Project and shall include only the items indicated below:

10.2.1.1. Payroll costs for employees in the direct employ of Contractor in the performance of the Work under schedules of job classification agreed upon by Owner's Representative and Contractor.

10.2.1.1.1. Such employees shall include without limitation engineers, superintendents, foremen, and other supervisory, safety, security and clerical personnel employed full time at the Site.

10.2.1.1.2. Payroll costs for employees not working exclusively in connection with the Work shall be apportioned based on their time spent working on the Work.

10.2.1.1.3. Payroll costs shall include, but shall not be limited to, salaries and wages plus the cost of fringe benefits, which shall include social security contributions, unemployment, excise, and payroll taxes, workers' compensation, union, health and retirement benefits, bonuses, sick leave, vacation and holiday pay applicable thereto.

10.2.1.1.4. The expenses of performing Work outside the regular working hours, on Saturday, Sunday, or legal holidays, shall be included in the above mentioned costs, to the extent authorized by Owner's Representative.

10.2.1.2. Actual cost of all necessary materials and equipment furnished and incorporated in the Work, including costs of transportation, taxes and reasonable and necessary storage thereof, and Suppliers' field services required in connection therewith.

10.2.1.2.1. All cash discounts with regard to the purchase by Contractor of materials and equipment shall accrue for the benefit of Contractor unless Owner deposits funds with Contractor with which to purchase the materials and equipment, in which case the cash discounts shall accrue to Owner.

10.2.1.2.2. All trade discounts, rebates, and refunds and returns from sale of surplus materials and equipment shall accrue to Owner, and Contractor shall make provisions so that these discounts etc. may be obtained.

10.2.1.3. Payments made by Contractor to Subcontractors for Work performed by Subcontractors.

10.2.1.3.1. If required by Owner's Representative, Contractor shall obtain competitive bids from subcontractors acceptable to Owner and Contractor and shall deliver such bids to Owner, who will then determine, with the advice of Architect/Engineer, which bids, if any, will be acceptable.

10.2.1.3.2. If any subcontract provides that the Subcontractor is to be paid on the basis of Cost of the Work plus a fee, the Subcontractor's Cost of the Work and fee shall be determined in the same manner as Contractor's Cost of the Work and fee as provided in this Article 10.2.

10.2.1.4. Reasonable and necessary costs of special consultants (including but not limited to engineers, architects, testing laboratories, surveyors, attorneys, and accountants) employed for services exclusively related to the Work.

10.2.1.5. Supplemental costs including the following:

10.2.1.5.1. The proportion of reasonable and necessary transportation, travel, and subsistence expenses of Contractor's employees incurred in discharge of duties connected with the Work. Airplane travel shall be on coach class and the car transportation, hotel and subsistence shall be at moderate cost.

10.2.1.5.2. Reasonable cost, including transportation, taxes and maintenance, of all materials, supplies, equipment, machinery, appliances, computers, office, warehousing and temporary facilities exclusively related to the Contract, and cost, less market value, of such items used but not consumed which remain the property of Contractor.

10.2.1.5.3. Rentals of all construction equipment and machinery, and the parts thereof whether rented from Contractor or others in accordance with rental agreements approved by Owner's Representative with the advice of Architect/Engineer, and the costs of transportation, loading, unloading, assembly, dismantling, and

removal thereof.

10.2.1.5.3.1. All such costs shall be in accordance with the terms of said rental agreements.

10.2.1.5.3.2. The rental of any such equipment, machinery, or parts shall cease when the use thereof is no longer necessary for the Work.

10.2.1.5.4. Sales, consumer, use, and other similar taxes related to the Work, and for which Contractor is liable, imposed by Laws and Regulations.

10.2.1.5.5. In such instances (only) where Contractor is insured under OCIP, or where the Owner assumes responsibility for some part of the required projects insurances (such as Builder's Risk) losses and damages (and related expenses) caused by damage to the Work, not compensated by said insurance, sustained by Contractor in connection with the performance of the Work, provided such losses and damages have resulted from causes other than the negligence of Contractor, any Subcontractor, or anyone directly or indirectly employed by any of them or for whose acts any of them may be liable.

10.2.1.5.5. 1. Such losses shall include settlements made with the written consent and approval of Owner's Representative. No such losses, damages, and expenses shall be included in the Cost of the Work for the purpose of determining Contractor's fee.

10.2.1.5.6. The cost of all utilities, telephone, data, fax, internet, security services, fuel, and sanitary facilities within the Site.

10.2.1.5.7. When the Cost of the Work is used to determine the value of a Change Order, or Construction Change Directive, Extra Work Order or of a Claim, the cost of premiums for additional Bonds and insurance required because of the changes in the Work.

10.2.1.5.8. An amount of the Contractor's main office overhead costs, when applicable, reached by mutual accord between the parties. If no mutual accord can be reached, the cost for main office overhead shall be computed using the Eichleay case and subsequent case law. If the Contractor does not have financial statements prepared externally by a recognized CPA, he must prepare them in order to be able to present a claim for this purpose.

10.2.2 Costs Excluded: The term Cost of the Work shall not include any of the following items:

10.2.2.1. Payroll costs and other compensation of Contractor's officers, executives, principals (of partnerships and sole proprietorships), general managers, engineers, architects, estimators, attorneys, auditors, accountants, purchasing and contracting agents, expediters, timekeepers, clerks, and other personnel employed by Contractor who work at Contractor's principal, branch or other office, other than Contractor's office at the Site, for general administration of the Work, all of which are to be considered administrative costs covered by the Contractor's fee, and not specifically included in the agreed upon schedule of job classifications referred to in Article 10.2.1.1 or specifically covered by Article 10.2.1.4.

10.2.2.2. Expenses of Contractor's principal, branch or other offices, other than Contractor's office at the Site.

10.2.2.3. Any part of Contractor's capital expenses, including interest on Contractor's capital employed

for the Work and charges against Contractor for delinquent payments.

10.2.2.4. Costs due to the negligence of Contractor, any Subcontractor, or anyone directly or indirectly employed by any of them or for whose acts any of them may be liable, including but not limited to, the correction of defective Work, disposal of materials or equipment wrongly supplied, or making good any damage to property.

10.2.2.5. Other overhead or general expense costs of any kind and the costs of any item not specifically and expressly included in Articles 10.2.1.1 and 10.2.1.2, unless proven as a valid reasonable and necessary expense directly and exclusively related to the Project.

10.2.3. Contractor's Fee. When the value of any Work covered by a Change Order/Extra Work Order or when a Claim for an adjustment in Contract Price is determined on the basis of Cost of the Work, Contractor's fee shall be determined as set forth in Article 10.5.

10.2.4 Documentation: Whenever the Cost of the Work for any purpose is to be determined pursuant to Articles 10.2.1 and 10.2.2, Contractor will establish and maintain records thereof in accordance with generally accepted accounting practices and submit in a form acceptable to Architect/Engineer, or Owner's Representative, an itemized cost breakdown together with supporting documentation and data.

10.2.5 Time Extension: Whenever additional time is required to perform extra work, said time allotment shall be included as part of the Change Order.

10.2.6 If the requirement specified in Article 10.1.2.3, above, causes a delay in the project completion, the costs of said delays, including project and main office overhead shall be added to the cost of the Work and a reasonable time extension provided under the Contract.

10.3 Cash Allowances

10.3.1 Unless otherwise stated in the Contract Documents, it is understood that Contractor has included in the Contract Price all allowances so named in the Contract Documents.

10.3.2 Items covered by allowances shall be supplied for such amount and by such persons or entities as the Owner's Representative may direct, but the contractor shall not be required to employ persons or entities against which the Contractor makes written reasonable objections.

10.3.3 If the allowance covers the cost of only furnishing material or , the allowance should include:

10.3.3.1. The cost to Contractor (less any applicable discounts) of materials and equipment required by the allowances to be delivered at the Site, and all applicable taxes; and

10.3.3.2. Contractor's costs for unloading and handling on the Site. Labor and installation costs, have been included in the Contract Price.

10.3.4 If the allowances include the cost of furnishing and installing material or equipment to be furnished and installed by the Contractor the allowances include the cost to Contractor (less any applicable discounts) of materials and equipment required by the allowances to be delivered at the Site, and all applicable taxes plus the total cost of installation including unloading and handling.

10.3.5 If the allowances include the cost of furnishing and installing material or equipment to be furnished and installed by a Subcontractor the allowances include the cost to the Contractor of the subcontractor's price.

10.3.6 Unless otherwise provided in the Contract Documents, insurances and bonds do not form part of the allowance price, but are included as part of the Contract Price.

10.3.7 An appropriate Change Order/Extra Work Order will be issued to reflect any difference in the actual cost of the allowance versus the amount specified in said allowance in the Contract Documents. Said amount will be due to Contractor, or credited to Owner as the case may be, on account of Work covered by allowances, and the Contract Price, and Contract Time, if necessary, shall be correspondingly equitably adjusted. Said Change Order/Extra Work Order will include the costs of bonds, insurances and fee stated in Article 10.5. If the change order is a credit, the amount credited will be the net amount due the Owner.

10.4 Unit Price Work

10.4.1 Where the Contract Documents provide that all or part of the Work is to be Unit Price Work, initially the Contract Price will be deemed to include, for all Unit Price Work, an amount equal to the sum of the unit price for each separately identified item of Unit Price Work times the estimated quantity of each item as indicated in the Agreement.

10.4.1.1. The estimated quantities of items of Unit Price Work are not guaranteed and are solely for the purpose of comparison of bids and determining an initial Contract Price.

10.4.1.1.1. Determinations of the actual quantities and classifications of Unit Price Work performed by Contractor will be made by Owner's Representative subject to the provisions of Article 13.2.1.

10.4.2 Each unit price will be deemed to include an amount considered by Contractor in the proposal to be adequate to cover Contractor's overhead and profit for each separately identified item.

10.4.3 Owner and Contractor may make a Claim for an adjustment in the Contract Price in accordance with Article 11.5 if:

10.4.3.1. the quantity of any item of Unit Price Work performed by Contractor differs materially and significantly from the estimated quantity of such item indicated in the Agreement; and

10.4.3.2. there is no corresponding adjustment with respect any other item of Work; and

10.4.3.3. Contractor believes that Contractor is entitled to an increase in Contract Price as a result of having incurred additional expense or Owner believes that Owner is entitled to a decrease in Contract Price and the parties are unable to agree as to the amount of any such increase or decrease.

10.5 Contractor's Fee: The Contractor's fee for overhead and profit for Work performed under a Change Order/Extra Work Order shall be determined as follows:

10.5.1. a mutually acceptable fixed fee; or

10.5.2. if a fixed fee is not agreed upon, then a fee based on the following percentages of the various portions of the Cost of the Work:

10.5.2.1. for costs incurred under Articles 10.2.1.1 and 10.2.1.2, the Contractor's fee shall be fifteen (15) percent;

10.5.2.2. for costs incurred under Article 10.2.1.3, 10.2.1.4 and 10.2.1.5, the Contractor's fee shall be ten (10) percent;

10.5.2.3. where one (1) or more tiers of subcontracts are on the basis of Cost of the Work plus a fee and no fixed fee is agreed upon, the intent of Article 10.5.2.1 is that the Subcontractor who actually performs the Work, at whatever tier, will be paid a fee of fifteen (15) percent of the costs incurred by such Subcontractor under Articles 10.2.1.1 and 10.2.1.2 and that any higher tier Subcontractor and Contractor will each be paid a fee often (10) percent of the amount paid to the next lower tier Subcontractor;

10.5.2.4. no fee shall be payable on the basis of costs itemized under Articles 10.1.2.1 and 10.1.2.2;

10.5.2.5. the amount of credit to be allowed by Contractor to Owner for any change which results in a net decrease in cost will be the amount of the actual net decrease in cost; and

10.5.2.6. when both additions and credits are involved in any one change, the adjustment in Contractor's fee shall be computed based on the net change in accordance with Article 10.5.2.1 through 10.5.2.5, inclusive.

ARTICLE 11 - CHANGES IN THE WORK

11.1 Authorized Changes in the Work

11.1.1 Without invalidating the Agreement and without notice to any surety, Owner, through the Owner's Representative, may, at any time or from time to time, order additions, deletions, or revisions in the Work by a Written Amendment, a Change Order, an Extra Work Order, Work Change Directive, or a Construction Change Directive. Upon receipt of any such document, Contractor shall promptly proceed with the Work involved, which will be performed under the applicable conditions of the Contract Documents (except as otherwise specifically provided).

11.1.2 If there is agreement that said request will include an adjustment either in the Contract Sum, the Contract Time, or both, the adjustment shall be based on one of the following methods:

11.1.2.1. Mutual acceptance of a lump sum properly itemized and supported with sufficient substantiating data and documentation to permit evaluation and mutually acceptance of adjustment to Contract Time, and Contract Price if necessary;

11.1.2.2. Contract Price and Contract Time to be determined in a manner agreed upon by the parties and a mutually acceptable fixed or percentage Contractor's fee; or

11.1.2.3. As provided in Articles 9.2 and 10.

11.1.3 The Owner's Representative shall have authority to order minor changes in the Work not involving any adjustment in the Contract Sum or an extension of the Contract Time and not inconsistent with the intent of the Contract Documents.

11.1.3.1. Such changes shall be made by a written Field Order, or by other written orders.

11.1.3..2. Such changes shall be binding on the Owner and the Contractor.

11.1.3.2.1. If the Contractor is not in agreement that such order does not increase either the Contract Sum or the Contract Time, the Contractor shall promptly present his Claim in the method specified in Article 11.5, herein.

11.1.4. The Owner's Representative may issue written Field Orders covering minor changes in the Work without change in Contract Sum or Contract Time.

11.1.4.1. If the Contractor is not in agreement that such Field Order does not increase either the Contract Sum or the Contract Time, he shall promptly present his claim in the method specified in Article 11.5, herein.

11.1.5. If Owner and Contractor are unable to agree on entitlement to, or on the amount or extent, if any, of an adjustment in the Contract Price or Contract Time, or both, that should be allowed as a result of a Work Change Directive or a Construction Change Directive, a claim may be made therefore as provided in Article 11.5.

11.2 Unauthorized Changes in the Work

11.2.1. Contractor shall not be entitled to an increase in the Contract Price or an extension of the Contract Time with respect to any Work performed that is not required by the Contract Documents as amended, modified, or supplemented, except in the case of an emergency as provided in Article 14.13 or in the case of testing and/or uncovering Work as provided in Articles 12.3 and 12.4.

11.3 Execution of Change Orders and Extra Work Orders

11.3.1. Owner and Contractor shall execute appropriate written Change Orders and/or Extra Work Orders (or Written Amendments) recommended by Owner's Representative covering:

11.3.1.1. changes in the Work, which are:

11.3.1.1.1. ordered by Owner's Representative pursuant to Article 11.1;

11.3.1.1.2. required because of acceptance of defective Work under Article 12.7.1 or Owner's Representative's correction of defective Work under Article 12.8; or

11.3.1.1.3. agreed to by the parties;

11.3.1.2. changes in the Contract Price or Contract Time which are agreed to by the parties, including any undisputed sum or amount of time for Work actually performed in accordance with a Work Change Directive or a Construction Change Directive; and

11.3.1.3. changes in the Contract Price or Contract Time which embody the substance of any written decision rendered by Owner's Representative pursuant to Article 11.5; provided that in lieu of executing any such Change Order, an appeal may be taken from any such decision in accordance with the provisions of the Contract Documents and applicable Laws or Regulations, but during any such appeal of the Dispute, Contractor shall carry on the Work and adhere to the Progress Schedule and the Owner shall pay for such work performed subject to final resolution of the Dispute.

11.3.1.4. Owner, with the approval of the Change Order/Extra Work Order, shall submit written evidence to the Contractor that the money to pay for said Change Order Work has been assigned to make payment under the Contract.

11.4 Notification to Surety

11.4.1. If notice of any change affecting the general scope of the Work or the provisions of the Contract Documents (including, but not limited to Contract Price or Contract Time) is required by the provisions of any Bond to be given to a surety, the giving of any such notice will be Contractor's responsibility. The penal sum of each applicable Bond will be adjusted to reflect the effect of any such change.

11.4.1.1. Owner shall submit to the pertinent government agencies any documentation required by law or regulation to be submitted for the validity or enforceability of any Change Order Work, and shall provide proof of the proper submittal of said documentation if requested in writing by the Contractor.

11.5 Claims and Disputes

11.5.1. Written notice stating the general nature of each Claim, Dispute, or other matter shall be delivered by Contractor to Owner, through Owner's Representative, promptly (but in no event later than 30 days) after the start of the event giving rise thereto.

11.5.1.1. Notice of the amount or extent of the Claim, Dispute, or other matter with supporting data shall be delivered to the Owner within sixty (60) days after the end of such event (unless Owner's Representative allows additional time for claimant to submit additional or more accurate data in support of such Claim, dispute, or other matter).

11.5.1.2. A Claim for an adjustment in Contract Price shall be prepared in accordance with the provisions of Article 11.1.2.

11.5.1.3. A Claim for an adjustment in Contract Time shall be prepared in accordance with the provisions of Article 9.2.2.

11.5.1.4. Each Claim shall be accompanied by claimant's written statement that the adjustment claimed is the entire adjustment to which the claimant believes it is entitled as a result of said event.

11.5.2. If the Dispute is not decided by the Owner's Representative, or said decision notified to Contractor within thirty (30) days following the receipt of the notice of Dispute by the Owner's Representative, the Claim shall be deemed rejected.

11.5.3. Owner's Representative's Decision: Owner's Representative will render a formal decision in writing within thirty (30) days after receipt of the submittal of the Claim. Owner's Representative's written decision regarding the Dispute, or other matter, will be final and binding upon Owner and Contractor unless:

11.5.3.1. An appeal from Owner's Representative's decision is taken within the time limits and in accordance with the dispute resolution procedure set forth in Article 16.

11.5.4. No Claim for an adjustment in Contract Price or Contract Time (or Milestones) will be valid if not submitted in accordance with this section 11.5.

ARTICLE 12 - TESTS AND INSPECTIONS; CORRECTION, REMOVAL OR ACCEPTANCE OF DEFECTIVE WORK

12.1 Notice of Defects

12.1.1. Prompt notice of all defective Work of which Owner, Owner's Representative and Architect/Engineer has actual knowledge will be given to Contractor. If no notice is promptly given to Contractor of previously known defective Work, it shall be deemed acceptable to Owner.

12.1.2. All defective Work may be rejected, corrected, or accepted as provided in this Article.

12.2 Access to Work

12.2.1. Owner, Owner's Representative, Architect/Engineer, Architect/Engineer's Consultant, other representatives and personnel of Owner, independent testing laboratories, and governmental agencies with jurisdictional interests will have access to the Site and the Work at reasonable times for their observation, inspecting, and testing. Said access shall be previously coordinated with Contractor.

12.2.1.1. Contractor shall provide them proper and safe conditions for such access and advise them of Contractor's Site safety procedures and programs so that they may comply therewith as applicable.

12.3 Tests and Inspections

12.3.1. Inspection of Materials

12.3.1.1. Unless otherwise specified in the Contract Documents, all materials are subject to inspection, sampling, testing, retesting and rejection by the Owner's Representative as provided in the specifications and prior to acceptance of the Work.

12.3.1.2. Any work in which untested and unaccepted materials are used without the approval of the Owner's Representative, except if said material is the one specified in the Contract Documents, will be performed at the Contractor's risk.

12.3.1.1.2.1. Material found to be unacceptable will not be paid for and, if directed by the Owner's Representative, shall be removed at the Contractor's expense.

12.3.1.3. Unless otherwise indicated in the Contract Documents, the sampling of materials for testing will be performed by Owner's Representative personnel or by other personnel designated by the Owner, at Owner's expense.

12.3.1.1.3.1. Where sampling by the Contractor is specified, the samples shall be taken using approved Contractor furnished sampling devices, under the supervision of the Owner's Representative, and at such times or intervals as directed.

12.3.1.1.3.2. When materials are tested by the Owner, copies of the test reports will be furnished to the Contractor. Unless otherwise required in the Contract Documents, tests may or may not be performed by Owner and the Contractor shall not rely on the results of the Owner testing being available for process control.

12.3.1.4. Plant Inspection: Owner's Representative may undertake the inspection of materials at the production plant. In the event plant inspection is undertaken the following conditions shall be met:

12.3.1.1.4.1. The Owner's Representative shall have the cooperation and assistance of the Contractor and the producer with whom he has contracted for materials.

12.3.1.1.4.2. The Owner's Representative shall have full entry at all times to such parts of the plant as may

concern the manufacture or production of the materials being furnished.

12.3.1.1.4.3. Adequate safety measures shall be provided and maintained.

12.3.2 Contractor shall give Owner's Representative timely notice of readiness of the Work for all required inspections, tests, or approvals and shall cooperate with inspections and testing personnel to facilitate required inspections or tests. No delays, or hindrance in the performance of the Work, shall be caused by tardiness in Owner's Representative's inspection of the Work.

12.3.2.1. The Contractor shall submit to the Owner's Representative, within twenty (20) calendar days following the date of Notice to Proceed, the name of the local testing laboratory (ies) proposed for use with respect to the Work.

12.3.2.1.1. The Owner's Representative shall, within ten (10) calendar days after receipt of the submittal of the proposed testing laboratory(ies), approve said laboratory (ies), or submit written reasons for his disapproval.
12.3.2.1.2. If no notice of approval or disapproval is received within said period of time, Contractor shall submit the request for approval to the Chief of Construction or equivalent division head of Owner who shall have ten (10) calendar days to issue his decision. If the Chief of Construction or equivalent division head of Owner does not render his decision within said time, the testing laboratory (ies) will be deemed approved by the Owner's Representative.

12.3.3. Unless otherwise provided in the Contract Documents, Owner's Representative shall employ and pay for the services of independent testing entities to perform all inspections, tests, or approvals required by the Contract Documents except for inspections, tests, or approvals covered by Article 12.3.4. The costs incurred in connection with tests or inspections conducted pursuant to Article 12.4.2.1 shall be paid as provided in Article 12.4.

12.3.3.1 Whenever Contractor is responsible for arranging, obtaining and paying for costs in connection with any inspection, test, or approval required for Owner's Representative's or Architect/Engineer's acceptance of materials, mix designs, or equipment, the inspecting or testing entity shall be submitted for approval by Owner's Representative and the inspection or test shall be performed prior to Contractor purchasing such materials, mix designs, or equipment for incorporation to the Work.

12.3.3.1.1. Unless otherwise indicated in the Contract Documents, such inspections, tests, or approvals shall be performed by organizations acceptable to Owner, Owner's Representative and Architect/Engineer, whose acceptance shall not be unreasonably denied.

12.3.4. If Laws or Regulations of any public body having jurisdiction, at bid opening date, require any Work (or part thereof) specifically to be inspected, tested, or approved by an employee or other representative of such public body, Contractor shall assume full responsibility for arranging and obtaining such inspections, tests, or approvals, pay all costs in connection therewith, and furnish Owner's Representative the required certificates of inspection or approval. If said Laws and Regulations are enacted after bid opening date, the costs for said inspections shall be borne by the Owner.

12.4 Uncovering Work

12.4.1. If a portion of the Work, whether or not inspected, tested or approved is covered contrary to the Owner's Representative written request or to requirements specifically expressed in the Contract Documents,

it must, if required in writing by the Owner's Representative be uncovered for the Owner's Representative observation and be replaced or reconstructed at the Contractors expense without change in the Contract Time and Amount.

12.4.2. If a portion of the Work whether or not inspected, tested or approved has been covered and the Owner's Representative had not specifically required its inspection in writing prior to being covered, the Owner's Representative may required its inspection and it shall be uncovered by the Contractor.

12.4.2.1. If it is found that such Work is defective, Contractor shall pay all Claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to such uncovering, exposure, observation, inspection, and testing, and of satisfactory replacement or reconstruction (including but not limited to all costs of repair or replacement of work of others.)

12.4.2.2. If however, such Work is not found to be defective, Contractor shall be allowed an increase in the Contract Price or an extension of the Contract Time (or Milestones), or both, directly attributable to such uncovering, exposure, observation, inspection, testing, replacement, and reconstruction.

12.5 Correction or Removal of Deficient Work

12.5.1. Contractor shall correct all deficient Work, whether or not fabricated, installed, or completed, or, if the Work has been rejected by Owner's Representative's, remove it from the Project and replace it with Work that is not deficient. Contractor shall bear, exclusively, the cost of correcting such deficient Work.

12.6 Correction Period

12.6.1. If within one (1) year after the date of Substantial Completion or such longer period of time as may be prescribed by Laws or Regulations or by the terms of any applicable special guarantee required by the Contract Documents or by any specific provision of the Contract Documents, any Work is found to be deficient; or if the repair of any damages to the land or areas made available for Contractor's use by Owner or permitted by Laws and Regulations, at the Effective Date of the Agreement, as contemplated in Article 6.11.1 is found to be deficient, in all such instances Contractor shall promptly, without cost to Owner and in accordance with Owner's written instructions:

12.6.1. 1. repair such deficient land or areas; or

12.6.1.2. correct such deficient Work or, if the deficient Work has been rejected by Owner, remove it from the Project and replace it with Work that is not deficient, and

12.6.1.3. satisfactorily correct or repair or remove and replace any damage to other Work, to the work of others, or other's land or areas resulting therefrom.

12.6.1.3.1. If Contractor does not, after a ten (10) day written notice from Owner, promptly start complying and diligently comply with the terms of such instructions, (or in an emergency where delay would cause serious risk of loss or damage), Owner may have the deficient Work corrected or repaired or may have the rejected Work removed and replaced, and all costs, arising out of or relating to such correction or repair or such removal and replacement (including but not limited to all costs of repair or replacement of work of others) will be paid by Contractor.

12.6.2. In special circumstances where a particular item of equipment is placed in continuous service, at the request of the Owner's Representative, before Substantial Completion of all the Work, the correction period for that item shall start to run from the date that said equipment is placed on service.

12.6.3. Where deficient Work (and damage to other Work resulting there from) has been corrected or removed and replaced under this section 12.6, the correction period hereunder with respect to such Work will be extended for an additional period of one (1) year after such correction or removal and replacement has been satisfactorily completed.

12.7 Acceptance of Non-Compliant Work

12.7.1. If both parties agree, instead of requiring correction or removal and replacement of deficient Work, and Owner (prior to Architect/Engineer's recommendation of final payment) prefers to accept it, Owner may do so.

12.7.1.1. If both parties cannot reach agreement on acceptance of deficient work, then the Contractor shall correct such deficient Work to Owner's satisfaction or either party may make a Claim as provided in Article 11.5.

12.7.2. If any such acceptance occurs prior to Owner's Representative's recommendation of final payment, a Change Order/Extra Work Order will be issued incorporating the necessary revisions in the Contract Documents with respect to the Work, and Owner shall be entitled to an appropriate decrease in the Contract Price, reflecting the diminished value of Work so accepted.

12.7.2.1. If the parties are unable to agree as to the amount thereof, either party may Claim as provided in Article 11.5.

12.8 Owner's Right to Correct Deficient Work

12.8.1. If Contractor fails within a reasonable time after written notice from Owner's Representative to start correction of deficient Work or to diligently prosecute correction or to remove and replace rejected Work as required by Engineer in accordance with Article 12.6.1, or if Contractor fails to perform the Work in accordance with the Contract Documents, or if Contractor fails to substantially comply with any other provision of the Contract Documents, Owner may, after seven (7) days written notice to Contractor, correct and remedy any such deficiency.

12.8.2. In exercising the rights and remedies under this paragraph. Owner shall proceed expeditiously.

12.8.2.1. In connection with such corrective and remedial action, Owner may exclude Contractor from all or part of the Site, take possession of all or part of the Work and suspend Contractor's services related thereto, take possession of Contractor's tools, appliances, construction equipment and machinery at the Site, and incorporate in the Work all materials and equipment stored at the Site or for which Owner has paid Contractor but which are stored elsewhere.

12.8.2.2. Contractor shall allow Owner, Owner's representatives, agents and employees, Owner's other contractors, and Architect/Engineer and Architect/Engineer's Consultants access to the Site to enable Owner to exercise the rights and remedies under this paragraph.

12.8.3. All costs incurred or sustained by Owner in exercising the rights and remedies under this Article 12.8 will be

charged to Contractor.

12.8.3.1. If the parties are unable to agree as to the amount of the adjustment, a Claim therefore may be made as provided in Article 11.5.

12.8.3.1.1. Such claims, costs, losses and damages will include but not be limited to all costs of repair, or replacement of work of others destroyed or damaged by correction, removal, or replacement of Contractor's deficient Work.

12.8.4. Contractor shall not be allowed an extension of the Contract Time (or Milestones) because of any delay in the performance of the Work attributable to the exercise by Owner of Owner's rights and remedies under this Article 12.8.

ARTICLE 13 - PAYMENTS AND COMPLETION

13.1 Proposal Schedule and Schedule of Values

13.1.1. Proposal Schedule (Unit-Price Contracts)

13.1.1.1. In Unit-Price Contracts, the quantities in the proposal schedule are approximate only and the actual quantities to be paid for cannot be determined until the work is performed and accepted. Increases or decreases in the proposal schedule quantities will be considered as normal overruns or underruns, and the Contractor shall accept as payment in full, so far as contract items are concerned, payment at the original contract unit prices for the accepted quantities of work performed.

13.1.1.2. Payments to the Contractor shall be made only for the actual quantities of each contract item, performed and accepted in accordance with the plans and specifications and, if upon completion of the construction, these actual quantities shall show either a decrease or increase from the quantities in the proposal schedule, the contract unit prices will prevail.

13.1.1.2.1. In Unit-Price Contracts, the Contractor will submit for approval to the Owner's Representative a schedule of values for those Lump-Sum bid items only.

13.1.1.2.2. This schedule, when approved by the Owner's Representative, shall be used solely as a basis for the monthly partial payments.

13.1.1.3. If the "Basis of Payment" in the specifications relating to any unit price in the bid schedule requires that said unit price cover and be considered compensation for certain work or material essential to the item, this same work or material will not also be measured or paid for under any other pay item which may appear elsewhere in the Contract Documents.

13.1.2. Schedule of Values (Lump-Sum Contracts)

13.1.2.1. In Lump-Sum Contracts, the Contractor, within fifteen (15) days after the date of the Notice to Proceed, will submit for approval, to the Owner's Representative, a schedule of values prepared in approved forms of the various portions of the Work aggregating the total Contract Sum, divided so as to facilitate monthly partial payments.

13.1.2.2. Each item in the schedule of values shall include its proper share of overhead and profit. Initial disbursements items such as mobilization, temporary facilities, premiums for insurance, and bonds and all cost of government fees and permits required for work, shall be separately itemized to facilitate first partial payment.

13.1.2.3. This schedule, when approved by the Owner's Representative, shall be used solely as a basis for the monthly partial payments and not as unit prices for changes in the Work.

13.1.2.4. The schedule of values shall be approved, or rejected in writing for cause notified to Contractor within fifteen (15) calendar days after receipt by Owner's Representative.

13.1.2.4.1. Any individual item on the schedule of values that is rejected by the Owner's Representative must be properly identified and reason for rejection substantiated and notified to the Contractor within said time period.

13.1.2.4.2. The Owner's Representative may allow certain individual items to appear in the schedule of values as lump sum items. These items must be broken down into individual items prior to request any partial payment regarding said individual item.

13.1.2.5. If the Owner's Representative does not reject the schedule of values as specified herein, then the same shall be deemed approved.

13.2 Progress Payments

13.2.1. Applications for Payments

13.2.1.1. The Progress Payment Period shall be one (1) month long unless otherwise indicated in the Contract Documents. The end of the Progress Payment period shall be the last day of the month unless otherwise established in the Contract Documents. The Contractor does not have to submit an application for payment every month if he so chooses.

13.2.1.2. At least twenty (20) days before the date established for each progress payment, Contractor shall submit to Owner's Representative for review an Application for Payment filled out and signed by Contractor covering the Work completed as of the date of the Application and accompanied by such supporting documentation as is required by the Contract Documents.

13.2.1.3. The determination of quantities of acceptable completed Work under the terms of the Contract Documents will be jointly made by the Owner's Representative and Contractor. It will be based on measurements made by them, or their assistants, according to the units of measurement for each item as shown in the schedule of values and by the method indicated in the corresponding specification, if so indicated in said specification for said item.

13.2.1.4. If the requested payment is based on materials and equipment not incorporated in the Work, but delivered and suitably stored at the Site, or at another location, agreed to in writing, the Application for Payment shall also be accompanied by: (i) a bill of sale, invoice, or other documentation warranting that Owner has received the materials and equipment free and clear of all Liens and (ii) evidence that the materials and equipment are covered by appropriate property insurance or other arrangements to protect Owner's interest therein. All evidence required herein shall be in form satisfactory to Owner.

13.2.1.4.1. Such advance payment may be made to the Contractor for the cost of materials that are to be incorporated into the work, provided the materials meet the requirements of the plans and specifications and are on hand at the Site or stored in acceptable storage places.

13.2.1.4.1.1. No advance payment will be made on living or perishable plant materials.

13.2.1.4.1.2. In the case of materials that have been purchased by the Contractor, the cost shall be determined by the vendors invoice.

13.2.1.4.1.3. In the case of materials manufactured or obtained by the Contractor through the use of his own workmen or equipment, the cost will be determined by the Owner's Representative in accordance with and based upon that particular unit of the Project in which the materials are to be utilized.

13.2.1.4.2. The Contractor shall present signed receipts or other documentary evidence to prove that the cost of the materials for which he is to receive advance payment has been paid in full or, if the materials have not been paid for, the invoice shall be accompanied by a release from the materials dealer expressing his agreement with the payment for such materials to the Contractor by the Owner.

13.2.1.4.3. If at any time after the Contractor has received advance payment for materials on hand at the Site, the Owner or Owner's Representative obtains evidence indicating that said materials, or any part or parts thereof, are defective, or that said materials, or parts thereof, do not conform to the specifications, the Owner will proceed to deduct from any of the succeeding partial payments due the Contractor for work actually performed, a sum sufficient to cover the cost of the materials, or part or parts thereof, found to be defective.

13.2.1.4.4. Materials for which the Contractor has received advance payment shall be properly housed at the Site or in acceptable storage places in the vicinity of the Project in a secure manner that will insure the preservation of their quality and fitness for the Work.

13.2.1.4.4.1. Moreover, the Contractor shall not withdraw said materials for any purpose other than incorporation into the Project, unless he has written consent from the Owner or Owner's Representative to do so.

13.2.1.4.4.2. Storage and protection costs and the cost of replacing lost or damaged materials shall be borne by the Contractor.

13.2.1.4.5. Approval of partial payments for stockpiled materials will not constitute acceptance of such materials for use in completing items of Work.

13.2.1.4.6. An amount equal to the value of materials incorporated into the Work and for which an advance payment has been made, shall be deducted from the partial estimates.

13.2.1.4.7. Unless otherwise specified in the Contract Documents, Payment shall be made to the Contractor for materials fabricated, pre-cast or otherwise produced for the Project and stored at an approved site in Puerto Rico other than in the immediate vicinity of the Project, provided the Contractor furnish and file with the Owner insurance which shall protect the Contractor and the Owner from all risk of physical loss or damage to these materials.

13.2.1.4.7.1. The amount of such insurance shall not be less than the value of such materials.

13.2.2. Retainage

13.2.2.1. The amount of retainage with respect to progress payments shall be as stipulated in the bid documents.

13.2.2.1.1. Unless otherwise specified in the Contract Documents, such retainage shall be five percent (5%) of each partial payment made to the Contractor.

13.2.2.1.1.1. In cases in which a ten percent (10%) Retainage is required by Owner, then after fifty percent (50%) of the Work has been completed to the Owner's Representative's satisfaction and the Project is on schedule and the quality of Work is satisfactory to the Owner's Representative, all the remaining payments may be made in full.

13.2.2.1.2. Immediately after the Owner's Representative, on the basis of an inspection, has determined and certified that the Work is sufficiently complete, or the Work has been occupied for the use for which it was intended, the Owner will release to the Contractor fifty percent (50%) of the amount previously retained provided the following conditions are met.

13.2.2.1.2.1. A written consent of Surety to make such payment is submitted.

13.2.2.1.2.2. There are no claims to be settled from the Owner to the Contractor.

13.2.2.1.2.3. There are no liquidated damages due.

13.2.2.1.2.3.1. However, at Owner's discretion, the Owner may release to Contractor the difference between fifty percent (50%) of the retainage and the amount of liquidated damages.

13.2.3. Review of Applications

13.2.3.1. The Owner's Representative will review the Application for Payment as soon as it is received and will notify the Contractor within five (5) working days of any exceptions he may have. The Contractor will make the necessary corrections and resubmit the Application.

13.2.3.2. The Owner's Representative will, within seven (7) days of the Contractor's date of submittal or five (5) days from the date of resubmission, if the corrections are acceptable, submit the approved Application for Payment to the Owner with all required documentation and approvals from the Architect/Engineer and the Owner's Representative.

13.2.3.3. Owner's Representative's recommendation of any payment requested in an Application for Payment will constitute a representation by Owner's Representative to Owner, based on Owner's Representative's observations on the Site of the executed Work as an experienced and qualified professional and on Owner's Representative's review of the Application for Payment and the accompanying data and schedules, that to the best of Owner's Representative's knowledge, information and belief.

13.2.3.3.1. the Work has progressed to the point indicated

13.2.3.3.2. the quality of the Work is generally in accordance with the Contract Documents (subject to an evaluation of the Work as a functioning whole prior to or upon Substantial Completion, to the results of any subsequent test called for in the Contract Documents, to a final determination of quantities and classifications for Unit Price Work, and to any other qualifications stated in the recommendation); and

13.2.3.3.3. the conditions precedent to Contractor's being entitled to such payment appear to have been fulfilled

in so far as it is Owner's Representative's responsibility to observe the Work.

13.2.3.4. By recommending any such payment, Owner's Representative will not thereby be deemed to have represented that:

13.2.3.4.1. inspections made to check the quality or the quantity of the Work as it has been performed have been exhaustive, extended to every aspect of the Work in progress, or involved detailed inspections of the Work beyond the responsibilities specifically assigned to Owner's Representative in the Contract Documents; or

13.2.3.4.2. that there may not be other matters or issues between the parties that might entitle Contractor to be paid additionally by Owner or entitle Owner to withhold payment to Contractor.

13.2.3.5. Neither Owner's Representative's review of Contractor's Work for the purposes of recommending payments nor Owner's Representative's recommendation of any payment, including final payment, will impose responsibility on Owner's Representative to supervise, direct, or control the Work or for the means, methods, techniques, sequences, or procedures of construction, or the safety precautions and programs incident thereto, or for Contractor's failure to comply with Laws and Regulations applicable to Contractor's performance of the Work.

13.2.3.5.1. Additionally, said review or recommendation will not impose responsibility on Owner's Representative to make any examination to ascertain how or for what purposes Contractor has used the moneys paid on account of the Contract Price, or to determine that title to any of the Work, materials, or equipment has passed to Owner free and clear of any Liens.

13.2.3.6. Owner's Representative may refuse to recommend in whole or in part of any payment if, in Owner's Representative's reasonable opinion, it would be untruthful to make the representations to Owner referred to in Article 13.2.3.3.

13.2.3.6.1. Owner's Representative may also (i) refuse to recommend any such payment or, because of subsequently discovered evidence or the results of subsequent inspections or tests, (ii) revise or (iii) revoke any such payment recommendation previously made, to such extent as may be necessary in Owner's Representative's reasonable opinion to protect Owner from loss because:

13.2.3.6.1.1. the Work is defective, or completed Work has been damaged, requiring correction or replacement;

13.2.3.6.1.2. the Contract Price has been reduced by Written Amendment, Change Orders or Extra Work Orders to the extent that justifies withholding payment;

13.2.3.6.1.3. Owner has been required to correct deficient Work or complete Work and has not yet done so; or

13.2.3.6.1.4. Owner's Representative has actual knowledge of the occurrence of any of the events enumerated in Article 15.2.1.

13.2.4. Payments Becomes Due

13.2.4.1. Unless otherwise specified in the Contract Documents, forty (40) days after Owner's approval of the Application for Payment, with Owner's Representative's recommendation, the amount recommended will become due, and when due, shall be paid by Owner to Contractor.

13.2.5. Reduction in Payment

13.2.5.1. The Owner's Representative, without incurring in liability, may decline to approve any Application for Payment or, because of subsequently discovered evidence or subsequent inspection, he may nullify the whole or any part of any Application for Payment previously issued, to such extent as may be necessary in his opinion to protect the Owner from loss because of:

13.2.5.1.1. Deficient Work not remedied; or

13.2.5.1.2. Failure of the Contractor to comply with any requirements of the Contract Documents.

13.2.5.2. Owner may refuse to make payment of the full amount recommended by Owner's Representative because:

13.2.5.2.1. claims have been made against Owner on account of Contractor's performance or furnishing of the Work;

13.2.5.2.2. Liens have been filed in connection with the Work, except where Contractor has delivered a specific Bond satisfactory to Owner to secure the satisfaction and discharge of such Liens;

13.2.5.2.3. there are other items entitling Owner to a set-off against the amount recommended; or

13.2.5.2.4. Owner has actual knowledge of the occurrence of any of the events enumerated in Article 13.2.3.6 or 15.2.1.

13.2.5.3. If Owner refuses to make payment of the full amount recommended by Owner's Representative, Owner must give Contractor immediate written notice (with a copy to Owner's Representative) stating the reasons for such action and promptly pay Contractor any amount remaining after deduction of the amount so withheld.

13.2.5.3.1. Owner shall promptly pay Contractor the amount so withheld, or any adjustment thereto agreed to by Owner and Contractor, when Contractor corrects to Owner's Representative's satisfaction the reasons for such action.

13.2.5.3.2. If it is subsequently determined that Owner's refusal of payment was not justified, the amount wrongfully withheld shall be treated as an amount due as determined by Article 13.2.4.

13.2.5.4. Partial payments may be suspended when in the judgment of the Owner the Work has not proceeded according to the terms of the Contract Documents.

13.2.5.5. If at any time during the construction of the Project, the Owner receives proper notice from a third party stating a claim under Civil Code Article 1489, the Contractor shall settle the claim with the third party within fifteen (15) calendar days from the notice to the Owner and inform the Owner of said settlement or otherwise if Contractor disputes the validity of said claim, post a bond, acceptable to Owner, for the benefit of Owner to protect Owner against liability for payment to the third party under Civil Code Article 1489 in which case partial payment therefore will not be withheld. This will apply in any project where there is no Payment or Performance Bond, or the penal sum of such bond is an amount less than one hundred (100) percent of the Contract Sum.

13.2.5.5.1. If no settlement is reached or a bond is not posted and accepted, the Owner, the Contractor, and the claimant third party shall meet within thirty (30) days after the expiration of the fifteen (15) calendar days to ascertain the amount of the alleged debt.

13.2.5.5.2. Contractor shall then pay within five (5) calendar days the undisputed amount. If no payment is made, the Owner shall retain said amount from the next partial payment and proceed to pay directly the undisputed amount to the third party. If the Contractor posts a bond as provided in Article 13.2.5.5 the Owner will not withhold said amount from Contractor and will not pay the amount to the third party claimant until the Contractor or the third party claimant notify Owner that the dispute among them has been resolved at which time Owner will act accordingly.

13.2.6. Scope of Payment

13.2.6.1. The payment of any partial estimate or of any retained percentage, in no way shall release the obligation of the Contractor to renew or repair any deficient materials used in the construction, or to be responsible for all damage due to such deficiencies.

13.2.6.2. No payment will be made for any unauthorized work.

13.2.6.3. No certificate for a progress payment, nor any progress payment, or any partial or entire use or occupancy of the Project by the Owner shall constitute an acceptance of any Work not in accordance with the Contract Documents.

13.3 Contractor's Warranty of Title

13.3.1. Contractor warrants and guarantees that title to all Work, materials, and equipment covered by any Application for Payment, whether incorporated in the Project or not, will pass to Owner no later than the time of payment, and will pass free and clear of all Liens, Claims, security interests or encumbrances. Contractor also warrants and guarantees that no Work, materials, or equipment covered by an Application for Payment has been acquired by the Contractor, subject to an agreement under which an interest therein, or an encumbrance thereon, is retained by the seller or otherwise imposed by the Contractor or such other person. This will also apply to any other person performing the Work for the Project on behalf of Contractor , or furnishing materials and equipment for the Project.

13.4 Substantial Completion

13.4.1. When Contractor considers the entire Work ready for its intended use Contractor shall notify Owner and Owner's Representative in writing that the entire Work is Substantially Complete (except for items specifically listed by Contractor as incomplete) and request that Owner's Representative issue a Certificate of Substantial Completion. Owner may, at its sole option, request that part of the Work be declared Substantially Complete as provided in Article 13.5.1.

13.4.1.1. Within five (5) working days after such request, Owner, Contractor and Owner's Representative shall make an inspection of Work to determine the state of completion. If within this time period, the Owner's Representative fails to make objections or respond, the Contractor shall request the approval of the Chief of Construction or equivalent division head of Owner which shall have fifteen (15) working days to issue its approval or disapproval of the Certificate of Substantial Completion.

13.4.1.1.1. If Owner's Representative does not consider the Work substantially complete, Owner's Representative will notify Contractor in writing, within five (5) working days after the inspection, giving the reasons therefore.

13.4.1.1.2. If Owner's Representative considers the Work substantially complete, Owner's Representative will prepare and deliver to Owner, within ten (10) working days after the inspection, a tentative certificate of Substantial Completion which shall fix the date of Substantial Completion.

13.4.1.1.3. There shall be attached to the certificate a tentative list of items (punch list) to be completed or corrected before final payment.

13.4.1.2. Owner shall have ten (10) working days after receipt of the tentative certificate during which to make written objection to Owner's Representative as to any provisions of the certificate of Substantial Completion or attached list.

13.4.1.3. If, after considering such objections, indicated on Article 13.4.1.2, Owner's Representative concludes that the Work is not substantially complete, Owner's Representative will within fifteen (15) working days after submission of the tentative certificate of Substantial Completion to Owner notify Contractor in writing, stating the reasons therefore.

13.4.1.4. If, after consideration of Owner's objections, indicated on Article 13.4.1.2, Owner's Representative considers the Work Substantially Complete, Owner's Representative will, within said fifteen (15) working days, execute and deliver to Owner and Contractor a definitive certificate of Substantial Completion (with a revised final punch list of items to be completed or corrected). Such final certificate will reflect such changes from the tentative certificate as Owner's Representative believes justified, after consideration of any objections from Owner.

13.4.1.5. At the time of issuance of the certificate of Substantial Completion, Owner will assume all responsibilities with respect to security, operation, safety, and protection of the Work, maintenance, utilities, insurance, and Contractor warranties and guarantees periods will start to run.

13.4.1.6. Unless Owner and Contractor agree otherwise in writing and inform Owner's Representative also in writing prior to Owner's Representative's issuing the definitive certificate of Substantial Completion, Owner's Representative's aforesaid recommendation will be binding on Owner and Contractor until final payment is made.

13.4.2. Owner shall have the right to exclude Contractor from the Site after the date of Substantial Completion, but Owner shall allow Contractor reasonable access to complete or correct items on the final punch list.

13.5 Partial Utilization

13.5.1 Use by Owner, at Owner's option, of any substantially completed part of the Work which has specifically been identified in the Contract Documents, or which Owner, Owner's Representative, and Contractor agree constitutes a separately functioning and usable part of the Work that can be used by Owner for its intended purpose, without significant interference with Contractor's performance of the remainder of the Work, may be effected (put to such use) prior to Substantial Completion of all the Work subject to the following:

13.5.1.1. Owner at any time may request Contractor in writing to permit Owner to use any such part of the Work which Owner believes to be ready of its intended use and substantially complete.

13.5.1.1.1. If Contractor agrees that such part of the Work is substantially complete, Contractor will certify to Owner and Owner's Representative that such part of the Work is substantially complete and request Owner's Representative to issue a certificate of Substantial Completion for that part of the Work.

13.5.1.1.2. Contractor at any time may notify Owner and Owner's Representative in writing that Contractor considers any such part of the Work ready for its intended use and substantially complete and request Owner's Representative to issue a certificate of Substantial Completion for that part of the Work.

13.5.1.1.2.1. Within a reasonable time (not more than fifteen (15) days) after either party's request, Owner, Contractor, and Owner's Representative shall make an inspection of that part of the Work subject to the request to determine its state of completion.

13.5.1.1.2.2. If Owner's Representative does not consider that part of the Work to be substantially complete, Owner's Representative will notify Owner and Contractor in writing giving the reasons therefore.

13.5.1.1.2.3. If Owner's Representative issues a certificate of Substantial Completion for said part of the Work thereupon all applicable provisions of Article 13.4 shall apply.

13.5.1.1.3. No occupancy or separate operation of part of the Work may occur prior to compliance with the requirements of Article 13.4.1.5 regarding property insurance.

13.6 Final Inspection

13.6.1. Upon written notice from Contractor that the entire Work or an agreed portion thereof is complete, Owner's Representative will, within five (5) working days, make a final inspection with Owner and Contractor and will notify Contractor in writing of all particulars this inspection reveals with regard to incomplete or deficient Work.

13.6.1.1. Contractor shall immediately take measures to complete such Work and remedy such deficiencies.

13.7 Final Payment

13.7.1. Application for Payment

13.7.1.1. After Contractor has, in the opinion of Owner's Representative, satisfactorily remedied all incomplete and deficient Work identified during the final inspection and has delivered, in accordance with the Contract Documents, all maintenance and operating instructions, schedules, guarantees, Bonds, certificates or other evidence of insurance, certificates of inspection, marked-up record documents, and other documents required by the Contract, Contractor may make application for final payment following the procedure for progress payments.

13.7.1.2. The final Application for Payment shall be accompanied, except if previously delivered to Owner's Representative, by:

13.7.1.2.1. all documentation, guarantees, Bonds and insurance called for in the Contract; and.

13.7.1.2.2. consent of the surety, if any, to final payment; and

13.7.1.2.3. complete and legally effective releases, or waivers, (satisfactory to Owner) of all Lien rights arising out of or Liens filed in connection with the Work.

13.7.1.3. In lieu of the releases or waivers of Liens specified in Article 13.7.1.2.3, if approved by Owner, Contractor may furnish payment receipts or releases in full as part of an affidavit executed by Contractor to the effect that:

13.7.1.3.1. the releases and receipts include all liabilities related to labor, services, material, and equipment for which a Lien could be filed; and

13.7.1.3.2. all payrolls, material and equipment bills, and other indebtedness connected with the Work for which Owner and Owner's property might in any way be responsible, have been paid or otherwise satisfied.

13.7.1.3.3. If any Subcontractor or Supplier fails to furnish such a release or receipt in full, Contractor may furnish a Bond or other collateral satisfactory to Owner to indemnify Owner against liability related to any such Lien.

13.7.2 Review of Final Application for Payment and Acceptance of the Work.

13.7.2.1. If, on the basis of Owner's Representative's observation of the Work during construction and final inspection, and Owner's Representative's review of the final Application for Payment and accompanying documentation as required by the Contract Documents, Owner's Representative is satisfied that the Work has been completed and Contractor's other obligations under the Contract Documents have been fulfilled, Owner's Representative will, within fifteen (15) days after receipt of the final Application for Payment, indicate to Owner in writing Owner's Representative's recommendation regarding payment and if payment is recommended present the Application for Payment to Owner, for payment.

13.7.2.1.1. At the same time, Owner's Representative will also give written notice to Owner and Contractor that the Work is acceptable subject to the provisions of Article 13.9.

13.7.2.1.2. Otherwise, within the time specified in Article 13.7.2.1, Owner's Representative will return the Application for Payment to Contractor, indicating in writing the reasons for refusing to recommend final payment, in which case Contractor shall make the necessary corrections and resubmit the Application for Payment. If within said fifteen (15) days after submittal of the final Application for Payment by Contractor the Owner's Representative fails to make objections or respond, the Contractor shall request approval directly from the Owner who shall have fifteen (15) working days to issue approval or disapproval, provided Contractor has also given the same timely notice directly to Owner as required in Article 17.3.2. If no reply is forthcoming from the Owner within the stated time, the final Application for Payment shall be deemed approved.

13.7.3. Final Payment Becomes Due

13.7.3.1. Unless otherwise specified in the Contract Documents, forty (40) days after Owner's approval of the Application for Final Payment, with accompanying documentation, the amount recommended by Owner's Representative will become due, and when due, shall be paid by Owner to Contractor.

13.7.3.2. If payment is not made within the time stated in Article 13.7.3.1., thereafter Owner will pay Contractor interest at the legal rate on the amount due.

13.8 Final Completion Delayed

13.8.1. If, through no fault of the Contractor, final completion of the Work is significantly delayed, and if Owner's

Representative so confirms, Owner shall, upon receipt of Contractor's final Application for Payment and recommendation of Owner's Representative, and without terminating the Agreement, make payment of the balance due for that portion of the Work fully completed and accepted.

13.8.2. If the remaining balance to be held by Owner for Work not fully completed, or corrected, is less than the retainage stipulated in the Agreement, and if Bonds have been furnished as required in Article 3, the written consent of the surety to the payment of the balance due for that portion of the Work fully completed and accepted shall be submitted by Contractor to Owner's Representative with Application for such payment.

13.8.2.1. Such payment shall be made under the terms and conditions governing final payment, except that it shall not constitute a waiver of any claim or of any right under the Contract.

13.9 Waiver of Claims

13.9.1. The making and acceptance of final payment will constitute:

13.9.1.1. a waiver of all Claims by Owner against Contractor, except for Claims arising from unsettled Liens, from deficient Work appearing after final inspection as the result of failure to comply with the Contract Documents, from special guarantees or from Contractor's continuing obligations under the Contract Documents; and

13.9.1.2. a waiver of all other unsettled Claims by Contractor against Owner, other than those previously made in a timely manner in writing.

13.10 Unilateral Liquidation

13.10.1. The procedures established in this section will be applicable whenever the Contractor is not available in order for the Owner to issue the final payment in accordance with Article 13.7.

13.10.1.1. For purposes of this section, the term "unavailable" shall meant that the Contractor repeteadly fails to answer Owner's requests to meet with the Owner and/or to submit the required documentation under Article 13.7 in order to proceed with the final payment and Project liquidation.

13.10.2. If Contractor is unavailable, Owner shall proceed to issue and process the final application for payment. In order to accomplish this, whenever possible, the Owner will seek to obtain the documentation required under Article 13.7.1.2 and 13.7.1.3.

13.10.2.1. When Owner can not obtain documentation required under Article 13.7.1.2 and 13.7.1.3 such documentation it may be waived by Owner in order to proceed to the issuance of final payment. However, in case of such waiver, Owner may impose those reasonable conditions Owner deems relevant in order to protect Owner's interests and safeguard against claims by third parties.

13.10.3. If after finalizing liquidation of the Contract, payment is due Contractor and Contractor remains unavailable, Owner will retain such payment until Contractor is available to collect such payment. If the Final Payment is negative (i.e., the balance is in favor of the Owner), the Owner shall compensate such amount from any other payment in favor of Contractor, if any, and/or proceed to collect it by any means available.

ARTICLE 14 - PROTECTION OF PERSONS AND PROPERTY

14.1 Public Convenience and Safety

14.1.1. The Contractor shall at all times conduct the Work in a manner that insures the public safety and convenience and the protection of persons and property.

14.1.1.1. Contractor shall perform the Work in a manner that will not cause unreasonable inconvenience to the general public.

14.1.2. The Contractor shall comply with all laws, rules, codes and regulations applicable to the class of work being performed pertaining to public safety and the protection of persons and property.

14.2 Laws to be Observed

14.2.1 It is the Contractor's responsibility to be fully informed of and comply with all Federal, Commonwealth and municipal laws, ordinances, safety codes and regulations, and all such orders or decrees presently in effect or that may be enacted prior to Final Acceptance or which in any way affect the prosecution of the Work.

14.2.1.1. The Contractor shall at all times observe and comply with all such laws, ordinances, safety codes, regulations, orders and decrees; and shall protect Owner and its representatives against any claim or liability arising from or based on the violation of any such law, ordinance, regulation, order, or decree, whether by himself, his employees, his subcontractors, his suppliers, his agents, or the employees of any of them or by anyone for whom Contractor is responsible.

14.2.1.2. When the United States Government pays all or any portion of the cost of the Work, the federal laws and the rules and regulations pursuant to such laws, if applicable, must be observed by the Contractor, and the Work may be subject to the inspection by any appropriate federal agency.

14.2.2. All costs related to compliance with all laws, rules and regulations enacted after bid opening date, shall be paid for by the Owner and any resulting adjustment to the Contract Price or the Contract Time shall be made by a Change Order to the Contract.

14.2.2.1. If Owner's Representative and Contractor are unable to agree on entitlement to, or on the amount or extent, if any, of any such adjustment, a Claim may be made therefore as provided in Article 11.5.

14.2.2.2. Payment under this paragraph is contingent to those situations not covered under Article 14.4.4.

14.3 Sanitary, Health and Safety Provisions

14.3.1. The Contractor shall comply with all Federal, Commonwealth and local laws, rules and regulations concerning construction safety and health standards and shall admit without delay any inspector from such health and safety agencies upon presentation of proper credentials.

14.3.2. Contractor shall provide and maintain in orderly sanitary condition such facilities as necessary for the use of his employees, in compliance with the Commonwealth Departments of Health and Labor and other bodies having jurisdiction.

14.3.3. The Contractor shall not require work to be performed under unsanitary, hazardous or dangerous conditions.

14.4 Labor Relations and Wages

14.4.1. The Contractor shall comply with all the applicable Federal and Commonwealth laws, rules and regulations concerning fair labor practices including minimum wages, work hours, equal employment opportunities, non-discrimination, civil rights, employment of minors, and other labor relation matters.

14.4.2. The minimum wage rates to be paid shall be according to the regulations of the Minimum Wage Board of the Puerto Rico Department of Labor as indicated in the latest issue of its mandatory decree at any time during the execution of the Project.

14.4.3. The Contractor shall pay weekly, in lawful money of the United States of America, including payment by check or direct deposit, the entire amount of wages, less legally authorized or mandated deductions, earned by each of the laborers and employees engaged in the Work.

14.4.3.1. The Contractor shall make available to the Owner for inspection the project payrolls and shall submit copies of such payrolls to the Owner when required.

14.4.3.2. Any irregularities noted will be brought to the attention of the Contractor by the Owner for appropriate corrective action and payment of any pending wages.

14.4.3.2.1. Should the Contractor fail to take the necessary action, he will be subject to such civil and criminal proceedings provided by law and regulations.

14.4.3.3. Payment of wages to laborers and employees of the Contractor for their work shall have preference over the payment of other debts of the Contractor, except as otherwise established by law.

14.4.4. If during the term of the Contract, federal minimum wages are increased and said increase is applied to Puerto Rico, or if labor costs and/or fringe benefits are increased by local legislation, the cost of the increase in the Work shall be considered as a Change Order and proven cost increases, including fringe benefits and insurance costs, shall be paid to the Contractor, unless those increases have been legislated, or included as part of a resolution, by either the Commonwealth or Federal Legislative chambers prior to the bid opening date. If after the bid opening date, new local legislation or regulation is imposed which directly increases Contractor's costs of materials or transportation, the Contractor may present a Claim under Article 11.5 for such increases. Such increases in costs must be evidenced and substantiated by the Contractor.

14.4.4.1. If Owner's Representative and Contractor are unable to agree as to entitlement, amount or extent, if any, of any such adjustment under Article 14.4.4, a Claim may be made therefore as provided in Article 11.5.

14.5 Environmental Protection

14.5.1. Contractor shall comply with all Federal, Commonwealth and local environmental laws and regulations.

14.5.1.1. Contractor shall take all necessary precautions to prevent pollution of streams, lakes, ponds, and reservoirs with fuels, oil, bitumen, chemicals, or other harmful materials and to prevent pollution of the

atmosphere with particulate or gaseous matter.

14.5.2. Unless otherwise approved in writing by the Owner, construction operations in rivers, streams, lakes and other bodies of water shall be restricted to those areas where channel changes are shown on the plans and to those areas which must be entered for the construction of temporary or permanent structures.

14.5.2.1. Rivers, streams, lakes and reservoirs shall be promptly cleared of all false work, piling, debris, or other obstructions placed therein or caused by the construction operations.

14.5.3. Frequent fording of live streams with construction equipment will not be permitted. Temporary bridges or other structures shall be used wherever an appreciable number of stream crossings are necessary.

14.5.3.1. Unless otherwise approved in writing by the Owner, mechanized equipment shall not be operated in live streams except as may be required to construct channel changes and temporary or permanent structures.

14.5.4. Contractor shall comply with all the requirements regarding soil erosion and water pollution control included in the Environmental Quality Board's regulations, the Owner's other standard specifications, the Plans and other Contract Documents.

14.5.5. If the Contractor should encounter or expose during construction operations any abnormal condition, which may indicate the presence of a hazardous and/or toxic waste, the Contractor shall proceed in accordance with Article 4.7.

14.5.5.1. Abnormal conditions shall include, but shall not be limited, to the following, presence of barrels, discolored earth, metal or wood; obnoxious or unusual odors; visible fumes; excessively hot earth; smoke; or any other condition which appears to be a possible indication of hazardous and/or toxic waste.

14.6 Construction Over or Adjacent to Navigable Waters

14.6.1. All Work and related activity, over, on or adjacent to navigable waters shall be conducted so that free navigation of the waterways will not be interfered with and that the existing navigable depths and clearances will not be impaired except as allowed by permit issued by the U.S. Coast Guard and/or the U.S. Army Corps of Engineers, as applicable.

14.7 Traffic Protection Devices

14.7.1. The Contractor, when applicable, shall provide, erect and maintain all necessary advance warning signs, barricades, suitable and sufficient lights, danger signals, signs, and other traffic control devices; shall provide a sufficient number of watchmen and flag persons, and shall take all necessary precautions for the protection of the Work and the safety of the public in accordance with the plans and other Contract Documents.

14.8 Use of Explosives

14.8.1. When the use of explosives is necessary for the prosecution of the Work, the Contractor shall comply with all the Laws and Regulations concerning the use, storage, transporting, handling and detonating of explosives.

14.8.1.1. The Contractor shall exercise the utmost care with the explosives so as not to endanger life and

property and he shall be responsible for any and all damages that may result from his use of explosives.

14.8.2. Prior to initiating the use of explosives, the Contractor shall submit to the Owner evidence that his comprehensive general liability insurance required under Article 3 provides coverage for the use of explosives and blasting.

14.8.3. Blasting operations shall be conducted under the most careful and experienced supervision. The Contractor shall keep the Owner informed as to his drilling, blasting and demolition operations.

14.8.4. The Contractor shall furnish and erect special signs to warn the public of his blasting operations.

14.8.4.1. Such signs shall be placed at appropriate points within the Project limits, shall be maintained so as to be clearly evident to the public during all critical periods of the blasting operations and, if blasting is by means of electric detonators, shall include a warning statement to have radio transmitters turned off.

14.8.5. The Contractor shall notify each property owner and public utility company having structures in the proximity to the Site and the Work of his intention to use explosives.

14.8.5.1. Such notice shall be given sufficiently in advance to enable the parties being warned to take steps necessary to protect persons and property from injury.

14.9 Protection and Restoration of Property

14.9.1. The Contractor shall be responsible for the preservation of all public and private property, and shall carefully protect from disturbance or damages all land monuments and property marks until the Owner has witnessed or otherwise referenced their location, and shall not move them until directed.

14.9.2 When the Contractor's excavating operations encounter items of archeological interest such as remains of pre-columbine people's dwelling sites or artifacts of historical, paleontological or archeological significance, operations in the vicinity of such findings shall be temporarily discontinued and the Owner notified.

14.9.2.1. The Owner will contact the proper authorities to determine the disposition thereof.

14.9.2.2. When directed by the Owner, the Contractor shall excavate the site in such a manner as to preserve the artifacts encountered and shall remove them for delivery to the custody of the proper authorities.

14.9.2.2.1. Such specialized excavation and time delay costs, if any, will be considered and paid for as Extra Work unless the Owner elects to undertake such recovery work by other means.

14.9.2.2.2. If the Owner elects to perform this work by other means, he shall be responsible to the Contractor for costs associated with delay to the Work, only if said delay affects the critical path.

14.9.3 Contractor shall be responsible for all damages or injury to property of any character during the prosecution of the Work resulting from any act, omission, neglect or misconduct in the Contractor's manner or method of executing the Work, or at any time due to deficient work or materials. The Contractor's responsibility will not be released until the Project has been completed and accepted.

14.9.4 When any direct or indirect damage or injury is caused to public or private property by or on account of an

act, omission, neglect or misconduct in the execution of the work, or as a consequence of the non-execution thereof, by Contractor, such property shall be restored at the Contractor's expense to a condition similar or equal to that existing before such damage or injury was caused by repairing, rebuilding or otherwise restoring the same, or Contractor shall make good such damage or injury in a manner acceptable to owner.

14.9.5 Contractor shall comply with all necessary soil erosion and water pollution control measures, as indicated in the Contract Documents, and shall exercise due care in their implementation, to avoid causing erosion and drainage problems in all areas inside and outside the Project construction limits.

14.10 Forest Protection

14.10.1. In carrying out Work or related activity within or adjacent to Commonwealth or National Forests, the Contractor shall comply with all regulations of the Commonwealth Fire Service, Puerto Rico Department of Agriculture, United States Forest Service or other authority having jurisdiction, governing the protection of forests and the carrying out of Work within forests, and shall observe all sanitary laws and regulations with respect to the performance of work in forest areas.

14.10.1.1. Contractor shall keep all areas affected by construction related activities in an orderly condition, dispose of all refuse, obtain permits for the construction and maintenance of all construction camps, stores, warehouses, residences, latrines, cesspools, septic tanks, and other structures in accordance with the requirements of the agency having jurisdiction of the forest.

14.10.2 The Contractor shall take all reasonable precautions to prevent and suppress forest fires and shall require his employees and subcontractors, both independently and at the request of forest officials, to do all that is reasonably within their power to prevent and suppress and to assist in the prevention and suppressing forest fires. They shall make every possible effort to notify a forest official at the earliest possible moment of the location and extent of any fire seen by them.

14.11 Responsibility for Damage Claims

14.11.1. The Contractor shall indemnify and save harmless the Owner as follows:

14.11.1.1. The Contractor for itself, agents, employees, successors and assigns agrees to save harmless the Owner, its Officers, Agents, Employees and Architect/Engineer from and against any and all claims, demands and/or suits, except as stated below, whether judicial or extra judicial for any cost whatever arising out or related to the execution of the Contract, and it's insurers shall defend the Owner, its Officers, agents, Employees and Architect/Engineer from such claims, demands and/or suits and shall bear all the expenses for such defense contemplated within the coverage limits provided by the Contractor's general liability policy, except where such claims, demands and/or suits are due solely to the negligence of the Owner, its Officers, Agents, employees and negligence, errors and/or omissions of the work performed by the Architect/Engineer. In case that the amount to be paid exceeds the policy amount, then the Contractor shall be responsible for the exceeding amount.

14.12 Contractor's Responsibility for Work

14.12.1. Until the final written acceptance of the Work by the Owner, the Work shall be under the charge and care of the Contractor. He shall take every necessary precaution to protect it from injury or damage to any part thereof by the action of the elements or from any other cause whether arising from the execution or non-execution of the Work.

14.12.2. The Contractor shall rebuild, repair, restore and make good any damages to any portion of the Work occasioned by any of the causes indicated in paragraph 14.12.1, above, before its completion and acceptance, and shall bear the expense thereof, except damages to the Work due to unforeseeable causes beyond the control of and without fault or negligence of the Contractor, including but not restricted to acts of God, such as earthquake, hurricane, tidal wave, major flooding or other cataclysmic phenomenon of nature, acts of the public enemy or of the government.

14.12.3. In case of suspension of Work from any cause whatsoever, the Contractor shall be responsible for the Work under the Contract and shall take such precautions as may be necessary to prevent damage to the Project, provide suitable drainage and erect necessary temporary structures, signs or other facilities.

14.12.3.1. During such period of suspension of work, the Contractor shall properly and continuously maintain in acceptable growing conditions all living material in newly established plantings, seeding, and sodding furnished under his contract, and shall take adequate precautions to protect new tree growth and other important vegetative growth against injury.

14.12.3.2. All costs for the work described above attributable to a suspension by the Owner shall be reimbursed to the Contractor by the Owner.

14.12.3.3. If the temporary suspension of Work is caused by the Contractor, then he will bear the expenses in such event.

14.12.4. When Work is suspended by the Contractor without authorization from the Owner, or is suspended by the Owner due to the fault of the Contractor, the costs of providing the protective measures specified in paragraph 14.12.3, above, during the period of suspension shall be borne by the Contractor.

4

14.13 Emergencies

14.13.1. In any emergency affecting the safety of persons or property, the Contractor shall act at his discretion to prevent damage, injury, or loss.

14.13.1.1. Any additional compensation or extension of time claimed by the Contractor on account of emergency Work shall be determined as provided in Article 11. Additional costs incurred by the Contractor in a case of an emergency need not be authorized by the Owner's Representative when there is insufficient time to seek Owner's authorization.

14.13.2. If an emergency affects the safety of persons or property at the Site or property adjacent thereto, Contractor is obligated to act to prevent threatened damage, injury, or loss. Either the Owner or the Contractor can declare an emergency.

14.13.2.1. Contractor shall give Owner's Representative prompt notice if Contractor believes that any significant changes in the Work or variations from what is provided by the Contract Documents have been caused by the emergency or are required as a result thereof.

14.13.2.1.1. If Owner's Representative determines that an amendment to the Contract Price or Contract Time is required because of the action taken by Contractor in response to such an emergency, a Work Change Directive, a Change Order or an Extra Work Order will be issued.

ARTICLE 15 - SUSPENSION OF WORK AND TERMINATION

15.1 Suspension of Work

15.1.1. At any time and without cause, Owner may, with a minimum of seven (7) calendar days written notice, suspend the Work or any portion thereof for a period of not more than ninety (90) consecutive days by notice in writing to Contractor and Architect/Engineer. Said notice will fix the date on which Work will be resumed. Contractor shall resume the Work on the date so fixed. Contractor shall be allowed an adjustment in the Contract Price or an extension of the Contract Time, or both, directly attributable to any such suspension if Contractor makes a timely Claim therefore as provided in Article 11.5. Said adjustment shall be computed based on the following factors:

15.1.1.1. Fixed Project expenses (after all reasonable reduction and mitigation of expenses) for the period of the Work stoppage, such as: (i) the Contractor's and subcontractor's supervisory, administrative, and operations personnel salaries, together with their corresponding fringe benefits and insurance costs if this personnel has been kept in the Contractor's payroll and are not gainfully utilized by Contractor or someone else elsewhere, (ii) utilities, (iii) Project's fixed equipment, and (iv) miscellaneous expenses such as safety, and vigilance.

15.1.1.1.1. At any time during the suspension, the Owner may order the Contractor to demobilize, paying the Contractor the de-mobilization costs and any future mobilization costs to re-start the Project.

15.1.1.1.2. Cancellation costs and cost increases for materials already ordered which had to be canceled and reordered, provided that such costs are not in excess of reasonable market prices.

15.1.1.1.3. Differential increases in labor costs, and its corresponding fringe and insurance benefits, in the Project for the period that the work is stopped.

15.1.1.1.4. Construction equipment use costs for the stoppage period if said equipment remains stationed at the site (idle equipment rates), or transportation costs if the Owner orders in writing that it be removed from the site. If the equipment is owned by the Contractor, he will be paid the cost (depreciation) of said equipment.

15.1.1.1.5. Insurance costs whose rates are based on the time such insurance is in effect, such as Builder's Risk Insurance, for the period that the work is stopped.

15.1.1.1.6. Contractor's overhead and profit in the amount equivalent to fifteen percent (15%) of all expenses detailed above.

15.1.1.1.7. An amount of the Contractor's main office overhead costs (exclusively in this instance and solely related to suspension) reached by mutual accord between the parties or if no mutual accord can be reached, the cost for main office overhead shall be computed using the Eichleay formula using as base the previous two (2) years of Contractor's main office overhead cost taken from the previous two (2) years financial statements which have been externally audited by a recognized CPA. If the Contractor does not have financial statements prepared externally by a recognized CPA, he must prepare them in order to be able to present a claim for this purpose.

15.1.1.1.8. Contractor shall exert his best effort to mitigate the costs included in this Article 15.1.1.

15.1.2. At any time, the Owner's Representative may, with a minimum of seven (7) calendar days written notice, for the following causes suspend the Work or part of the Work due to:

15.1.2.1. the repeated and persistence failure of the Contractor to perform his contractual obligations;

15.1.2.2. the repeated and persistent failure of the Contractor to have sufficient labor and the trades necessary to maintain the quality and progress required in the Contract Documents;

15.1.2.3. the repeated and persistent failure of the Contractor to have sufficient material necessary to maintain the quality and progress required in the Contract Documents;

15.1.2.4. the repeated and persistent failure of the Contractor to have sufficient equipment and type of equipment necessary to maintain the quality and progress required in the Contract Documents.

15.1.3. The Contractor will be responsible for all of his costs due the suspension of the Work indicated in Article 15.1.2 and there will be no increase in Contract Price or extension to the Contract Time as a result of such suspension for cause.

15.1.3.1. The suspension for cause under Article 15.1.2 will last until the Contractor remedies the situation or until termination.

15.1.3.2. The Contractor shall also be responsible for the inspection costs made necessary by overtime work to restore the project to its intended schedule due to delays caused by the actions mentioned in Article 15.1.2. Said costs will consist of the actual cost paid therefore by and to the inspector, if his presence is required or necessary.

15.1.4. At any time, the Owner's Representative or the Contractor may suspend the work or part of the work without advanced notice due to any danger or potential danger that may exist to life, limb or property or any emergency whether on the Site or off the Site.

15.1.4.1. The Contractor will be responsible for all of his costs due the suspension and there will be no time extension to the Contract Time if the suspension is due to the failure of the Contractor to perform his contractual obligations.

15.1.4.2. The Owner will compensate the reasonable costs incurred by Contractor if the suspension is due to causes other than the failure of the Contractor to perform his contractual obligations and such causes are attributable to Owner.

15.1.5. In case of suspension of Work for any cause whatsoever, the Contractor shall be responsible for the Work under the Contract and shall take such precautions as may be necessary to prevent damage to the Project, provide suitable drainage and erect necessary temporary structures, signs or other facilities.

15.1.5.1. During such period of suspension, the Contractor shall properly and continuously maintain in acceptable growing conditions all living material in newly established plantings, seeding, and sodding furnished under his contract, and shall take adequate precautions to protect new tree growth and other important vegetative growth against injury.

15.1.5.2. When Work is suspended by the Contractor without authorization from the Owner, or is suspended by the Owner due to the causes specified in Article 15.1.2, the costs of providing the protective measures specified in Article 15.1.5. and 15.1.5.1, during the period of suspension shall be borne by the Contractor.

15.1.5.3. The Contractor will be responsible for all of its costs due to the suspension and there will be no time extension to the Contract Time if the suspension is due to the failure of the Contractor to perform its contractual obligations, or other causes attributable to Contractor.

15.1.5.4 The Owner will compensate the reasonable costs incurred by Contractor if the suspension is due to causes other than the failure of the Contractor to perform his contractual obligations and such causes are attributable to Owner.

15.2 Owner May Terminate for Cause

15.2.1. The occurrence of any one or more of the following events will justify termination for cause:

15.2.1.1. Contractor's persistent or repeated failure to perform the Work in accordance with the Contract Documents (including, but not limited to, failure to supply sufficient skilled workers or suitable materials or equipment or failure to adhere to the progress schedule established under the Contract, as adjusted from time to time); or

15.2.1.2. Contractor's egregious disregard of Laws or Regulations of any public body having jurisdiction; or

15.2.1.3. Contractor's persistent or repeated disregard of the authority of Architect/Engineer, Owner or Owner's Representative; or

15.2.1.4. Contractor's persistent and repeated violation of any substantial provisions of the Contract Documents; and does not start curing and without interruption continues to cure same prior to termination.

15.2.1.5. Contractor is adjudged bankrupt, or is a party to a fraud; or

15.2.1.6. Contractor should make a general assignment for the benefit of his creditors; or

15.2.1.7. A receiver be appointed on account of the Contractor's insolvency; or

15.2.1.8. An attachment is made upon a substantial amount the Contractor's properties utilized to perform the Work, and it is not lifted, or the claim otherwise secured, within five (5) working days thereafter; or

15.2.1.9. Contractor persistently fails to make prompt payment to subcontractors, as per Article 6.21.2, or for materials, services, or labor already paid to Contractor by the Owner; or

15.2.1.10. Contractor abandons or discontinues the prosecution of the Work without Owner's written authorization.

15.2.1.10.1 Nevertheless, Contractor may discontinue the prosecution of the Work during: (i) Holy Thursday; (ii) the Friday after Thanksgiving; and (iii) the time period commencing on the Saturday before Christmas Day (December 25) and ending on the Sunday after Three Kings' Day (January 6) without incurring in an event of default due to discontinuance of the Work.

15.2.2. If one or more of the events identified in Article 15.2.1 occur, Owner may, after giving Contractor (and the surety, if any) seven (7) days written notice to cure such default, terminate the services of Contractor, exclude Contractor from the Site, and take possession of the Work and of all Contractor's tools and appliances at the Site, and use the same to the full extent they could be used by Contractor (without liability to Contractor for trespass or conversion), incorporate in the Work all materials and equipment stored at the Site or for which Owner has paid Contractor but which are stored elsewhere, and finish the Work as Owner may deem expedient. In such case, Contractor shall not be entitled to receive any further payment until the Work is finished.

15.2.3. In Lump Sum contracts, if the unpaid balance of the Contract Price exceeds all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) sustained by Owner arising out of or relating to completing the Work, such excess will be paid to Contractor.

15.2.4. If such claims, costs, losses, and damages exceed such unpaid balance, Contractor shall pay the difference to Owner. Such claims, costs, losses, and damages incurred by Owner will be reviewed by Owner's Representative as to their reasonableness and, when so approved by Owner's Representative, incorporated in a Change Order or Extra Work Order. When exercising any rights or remedies under this paragraph Owner shall not be required to obtain the lowest price for the Work performed, but shall assume all reasonable means to complete the work at a reasonable cost.

15.2.5. When Contractor's services have been so terminated by Owner, the termination will not affect any rights or remedies of Owner against Contractor then existing or which may thereafter accrue. Any retention or payment of moneys due Contractor by Owner will not release Contractor from liability.

15.2.5.1. Termination of the Contract, as stated above, will not release the Contractor of his responsibilities for the Work completed, nor shall said termination release surety from its obligations.

15.3 Owner May Terminate the Contract For Convenience

15.3.1. Upon seven (7) days written notice to Contractor and Architect/Engineer, Owner may, without cause and without prejudice to any other right or remedy of Owner, elect to terminate the Contract for convenience.

15.3.2. After receipt of notice of termination for convenience from the Owner, the Contractor shall submit, within sixty (60) calendar days of the effective termination date, a Claim for compensation damages and/or costs. In such Claim, if presented, Contractor shall be paid, without duplication of any items, the following:

15.3.2.1. In lump sum contracts, the work performed and accepted by the Owner shall be paid in accordance with the schedule of values approved by the Owner.

15.3.2.2. The actual cost of all acceptable materials for which orders have been placed by the Contractor for use under this Contract, provided that, if required by the Owner, the Contractor shall make every reasonable effort to cancel such orders. If said orders can be canceled, the Owner shall pay for all restocking, or other charges, associated with said cancellation.

15.3.2.3. The actual cost of acceptable raw material ordered or purchased for fabrication, or materials already fabricated, whether those materials are located in the shop, the project, or in transit.

15.3.2.4. The actual amounts paid by the Contractor for construction equipment rentals up to the time of termination, plus any amounts accrued, or payable, under written contracts for the rental of such equipment. Contractor shall make every possible effort to cancel any such contracts. In the event that the rental contracts can be canceled by the Contractor, the Owner shall pay for all reasonable costs incurred directly caused by the rental cancellation. If the equipment is owned by the Contractor, he will be paid the cost (depreciation) of said equipment.

15.3.2.5. The actual costs disbursed by to the Contractor of bonds, insurance, taxes, and deposits required under the Contract, unless previously paid by Owner.

15.3.2.6. Contractor's overhead and profit in the amount equivalent to fifteen percent (15%) of all payments made under Articles 15.3.2.2 to 15.3.2.5.

15.3.2.7. Contractor shall exert his best effort to mitigate the costs mentioned in Articles 15.3.2.2 to 15.3.2.5.

15.3.2.7.1. From the total sum of all the costs indicated in Articles 15.3.2.2 to 15.3.2.6. there shall be deducted all payments therefore previously made and all proper charges to the Contractor in relation therewith.

15.3.3. In the event that the Work is suspended under Article 15.1, thereby stopped for a period of time, and after said suspension is cancelled, the amounts due to the Contractor under the Contract will be first calculated for the suspension period as per Article 15.1 hereunder and then calculated for the cancellation afterwards as per Article 15.3, hereunder. The total amount due the Contractor will be the sum of both.

15.3.4. If the Contract is terminated for convenience, the Owner shall assume all security, and insurance of the project on the effective date of the termination, or cancellation.

15.3.5. Termination of the Contract for convenience, as stated above, will not release Contractor from his responsibilities for the Work completed, nor shall it release his surety of its obligations.

15.3.6. Contractor shall not be entitled to payment on account of loss of anticipated or expected profits or revenues or other economic loss arising out of or resulting from such termination for convenience under this Article 15.3.

15.4 Contractor's Right to Terminate the Contract

15.4.1. The Contractor has the right to Terminate the Contract and recover from the Owner payment for all work executed as specified in Article 15.3.2, herein, if the Owner:

15.4.1.1. substantially stops the work for any reason whatsoever through no act, or fault, of the Contractor for a period of ninety (90) days starting from the written stoppage notice of the Owner and/or the Owner's Representative, or

15.4.1.2. fails to pay the duly approved Request for Payments within eighty (80) calendar days after the same was due.

15.4.2 The foregoing provisions are in addition to, and not in limitation of the rights of the Contractor under any other provisions of the Contract.

ARTICLE 16 - DISPUTE RESOLUTION

16.1 Disputes

16.1.1. In case of any timely Claim, Dispute or other matter involving the interpretation of the Contract Documents, a change in the Contract Sum, and or an Extension of Contract Time, and other matters in question arising out of, or relating to this Contract or the breach thereof, except for Claims which have been waived by the acceptance of final payment, shall be submitted to and decided first by the Owner's Representative as provided in Article 11.5.

16.1.2. If the Dispute submitted to the Owner's Representative as provided for in Article 11.5 is not decided by him within the thirty (30) day period established therein, the Claim shall be deemed rejected.

16.1.3. If the party establishing the Claim is not satisfied with the decision or automatic rejection by the Owner's Representative, the party will have fifteen (15) days to appeal the decision to the Chief of Construction, or equivalent division head, of the Owner.

16.1.4. The Chief of Construction shall have a period of thirty (30) days from the date of receipt of the notice of appeal during which he must render a decision.

16.1.4.1. However, if the Chief of Construction requires additional time to review the Claim, because of the nature or complexity of the Claim or if additional documents and/or information are needed from the Contractor to make a determination, the Chief of Construction shall submit, within five (5) calendar days of receipt of the notice of appeal, a written notice with an estimate of the additional time needed to review said claim and its justification. This additional time, shall not exceed thirty (30) days, unless more time is agreed upon by the parties.

16.1.4.2. If the Chief of Construction does not render a decision within the time allotted, including extensions, then the Claim shall be deemed rejected.

16.1.5. If the Contractor is not satisfied with the decision or automatic rejection by the Chief of Construction, the Claim shall be referred to the Owner and the Contractor. The parties will meet for negotiations within ten (10) working days of the notice of referral of said Claim. If the Dispute has not been resolved within thirty (30) days after said referral (which may be extended by mutual agreement) and subject to any rights to injunctive relief and unless otherwise specifically provided for herein, the parties shall proceed in accordance with Article 16.2.

16.1.6 Contractor shall carry on the Work and adhere to the progress schedule during all Disputes or disagreements with Owner. The Owner will continue making payments under the Contract for Work performed that is not in Dispute.

16.1.7. No Work shall be delayed or postponed pending resolution of any Disputes or disagreement unless Owner and Contractor otherwise agree in writing.

16.2 Remedies

16.2.1. All Disputes not resolved by the method indicated in Article 16.1, upon written agreement of the parties, shall be submitted to non-binding mediation as indicated in Article 16.3. Either party may, at any time, give written notice to the other party that it does not wish to mediate or to continue to mediate a Dispute. Such notice shall conclude the mediation process.

16.2.2. If the parties fail to agree to submit the Dispute to mediation, or one party decides to cancel the mediation after the mediation has started, or if the mediation process does not resolve all Disputed matters, then the remaining Disputes shall be decided by arbitration, upon timely demand for arbitration, notified by one party to the other within ten (10) days after the mediation process has concluded, if the amount of the claim does not exceed the limits established in Article 16.4.1. The mediation process shall conclude on the date notice is delivered by one party to the other stating that the party does not wish to mediate or to continue to mediate. Any undecided Disputes that exceed the limits established in Article 16.4.1, will be decided by the General Court of Justice of Puerto Rico.

16.3 Mediation

16.3.1. If the parties agree to mediate the Dispute they may chose between:

16.3.1.1. a mutually agreed mediation procedure; or

16.3.1.2. a mediation procedure under the supervision of the Bureau of Claim Resolution by Alternate Methods the Office of the General Court of Justice; or

16.3.1.3. a mediation procedure administered by the American Arbitration Association under its Construction Industry Mediation Rules.

16.3.2. All costs incurred as a result of the mediation shall be borne equally by the parties, unless the mediator orders otherwise in accordance to Article 16.3.4.

16.3.3. The parties will be required to exchange their positions as to the Dispute, fully and in good faith, with a detailed description of the facts and of the applicable law and shall fully exchange supporting documents. If after agreeing to mediate a Dispute a party is substantially unprepared to participate in the proceedings, or fails to participate in good faith, the Mediator at his discretion may require said party to pay all or part of the costs of the mediation incurred by the other party due to the non-compliance with this Article.

16.4 Arbitration

16.4.1. Disputes to be arbitrated shall be limited to those Disputes, which when all sums claimed therefore under the Contract are added, total an aggregate sum of five percent (5%) or less of the Contract Price or $500,000.00 or less, whichever is lower. Only such Disputes where the aggregate amount claimed is below said threshold shall be resolved through the arbitration procedures established in this Article 16.4. The aggregate sum shall be determined on the date of the notice of the demand for arbitration taking into consideration all pending Disputes regarding the Contract submitted by the Contractor pursuant to Articles 11.5 and 16. In order to qualify for resolution thru arbitration, all issues and Claims regarding liability and damages relating to a particular Dispute must be submitted together, within the same arbitration proceeding. The parties are specifically prohibited from submitting the issue of liability to arbitration and thereafter submitting the issue of damages (regarding the same Dispute) to another arbitration proceeding or to the court.

16.4.1.1. The $500,000.00 threshold will be adjusted every five (5) years. The adjustment will be based on the Consumer Price Index (CPI) published by the Government of Puerto Rico. The base year for such adjustment shall be the year 2010.

16.4.1.2. If Contractor invokes the provisions of this Article 16.4, but at a later date submits additional Claims to the Owner under the same Contract, pursuant to Article 11.5 and/or Article 16, for an additional sum which, if added to the amount claimed under the original Dispute(s), surpasses the threshold amount established in Article 16.4.1, then said additional Disputes that surpass the threshold may not be submitted to arbitration and shall be decided by the General Court of Justice of Puerto Rico. Nevertheless, the already pending arbitration proceedings under Article 16.4 shall continue until concluded. If additional Disputes are submitted after the arbitration proceedings are concluded and final award has been entered, then the amounts of the original Claims that were arbitrated and concluded shall not count towards the threshold stated in Article 16.4.1.

16.4.2. **Procedure For Binding Arbitration.**

16.4.2.1. Contractor shall submit to the Owner, together with the notice of demand for arbitration of a Dispute, a list of no less than five (5) proposed arbitrators, together with their respective curriculum vitae and a disclosure statement from each as to possible conflicts of interest.

16.4.2.2. Within five (5) working days of receipt of the notice of demand for arbitration, Owner shall either: (i) select one (1) arbitrator from the Contractor's list, or (ii) if all arbitrators proposed by Contractor are unacceptable to Owner, submit to Contractor a list of no less than five (5) proposed arbitrators, together with their respective curriculum vitae and a disclosure statement from each as to possible conflicts of interest.

16.4.2.3. Within five (5) working days of receipt of the Owner's list, contractor shall either: (i) select one (1) arbitrator from such list or (ii) reject all arbitrators from the Owner's list. If within the following ten (10) days the parties cannot agree as to an arbitrator or a panel of arbitrators, then each party within the following five (5) days will unilaterally appoint and notify to the other one arbitrator, and the two (2) arbitrators so appointed shall within ten (10) days after the appointment of both arbitrators select a third arbitrator and notify the Owner and the Contractor of said selection, and the three (3) arbitrators shall constitute the panel of arbitrators that shall decide the Dispute. The arbitrators so appointed or selected need not be on the original lists of arbitrators. Within ten (10) days of the selection of the third arbitrator, each arbitrator shall notify Owner and Contractor their respective curriculum vitae and statement as to possible bias or conflict of interest.

16.4.2.4. The arbitration proceedings shall be conducted under the provisions of the Puerto Rico Arbitration Act, Act No. 376 of May 8, 1951, as amended.

16.4.3. **Award**

16.4.3.1. The award entered need not include written determinations of fact and conclusions of law and the award shall be final and not be reviewable or appealable due to errors of fact or of law. Nevertheless, the arbitrators will endeavor to ascertain the facts and follow the law.

ARTICLE 17 -MISCELLANEOUS

17.1 Governing Law. The Contract Documents, and all questions relating to their validity, performance, interpretation and enforcement, shall be governed by and construed in accordance with the laws of the

Commonwealth of Puerto Rico. Any legal action brought concerning the above shall be brought in accordance with the contract and thereafter exclusively in the courts of the Commonwealth of Puerto Rico.

17.2 Federal Funds

17.2.1. When the United States government or any of its agencies finances or pays for all or any portion of the cost of the Work, federal laws and the applicable rules and regulations must be observed by the Contractor. The Owner will identify in the bid documents the program providing such funds.

17.2.2. If the Contract Documents include a specific provisions issued by such federal funding agency in case of conflict with other provisions of the Contract Documents, said federally issued provisions shall govern.

17.2.3. Unless specified elsewhere in the Contract Documents, the funding federal agency is not a party to this Contract.

17.2.4 When the United States government funds Work covered by the Contract Documents, the Work shall be under the supervision of the Owner but subject to the inspection by the appropriate Federal agency and in accordance with the applicable Federal statutes and rules and regulations.

17.2.4.1. Such inspection shall in no way make the Federal Government a party to this Contract and will in no way interfere with the rights of either party hereunder.

17.2.4.2. The Contractor shall extend the same courtesies to the representatives of the Federal government as required to be extended to representatives of the Commonwealth government.

17.3 Notice

17.3.1. Unless otherwise specified in the Agreement or in the Contract Documents, written notice shall be deemed to have been duly served if delivered:

17.3.1.1. to Contractor if delivered in person to the individual, to a member or partner of the firm or entity, or to an officer of the corporation for which it was intended; or if delivered at, or sent by registered or certified mail or by courier service providing proof of delivery to, the last business address known to the party giving notice.

17.3.1.2. to Owner if delivered in person to the Owner's Representative or to the Project Inspector; or if delivered at, or sent by registered or certified mail or by courier service providing proof of delivery to, the last business address known to the party giving notice with the requirements established in Article 17.3.2.

17.3.2. All notices whereby a consent, approval or action is required to be performed by the recipient within a specific period shall include, in bold and capitalized font, at the top of the transmittal communication the following legend: "IMPORTANT RIGHTS MAY BE LOST BY FAILURE OF [NAME OF PARTY] TO ACT PROMPTLY. SPECIFIC ACTION(S) AND/OR APPROVAL(S) ARE HEREIN REQUESTED. IN CASE OF AUTOMATIC APPROVAL DUE TO FAILURE TO ACT BY THE RECIPIENT THE NOTICE MUST STATE: THIS SUBMISSION WILL BE DEEMED APPROVED _____ BUSINESS DAYS AFTER RECEIPT BY [NAME OF PARTY] IF REJECTION IS NOT NOTIFIED TO [NAME OF SENDER]."

17.4 Computation of Time. When a period of time is to be computed for any purposes under the Contract Documents, the number of days within such period will exclude the first and include the last day. If the last day of

any such period falls on a Saturday, a Sunday or on a Holiday listed in Article 1.1.1.41, such day will be excluded from the computation.

17.5 Ownership of Documents. Any reports, information, findings, data, or any other documents prepared or assembled by the Contractor regarding the Contract will be the sole property of the Owner and shall not be made available by Contractor to any individual or organization without the prior written approval of the Owner, unless required by court order.

17.6 Personal Liability of Public Officials. In exercising rights or carrying out duties under the Contract, the Owner's Representative, the Contracting Officer, and their authorized representatives shall not be personally liable, it being understood that they act as the agents and representatives of Owner.

17.7 No Waiver of Legal Rights

17.7.1. In Unit Price Contracts, the Owner shall not be precluded or stopped by any measurement, estimate, or certificate made either before or after the completion and acceptance of the Work (and payment made therefore), from showing the true amount and character of the Work performed and materials furnished by the Contractor, nor from showing that any such measurement, estimate or certificate is untrue or is incorrectly made, nor from showing that the work or materials do not in fact conform to the Contract.

17.7.2. The Owner shall not be precluded or stopped, notwithstanding any such measurement, estimate or certificate and payment in accordance therewith, from recovering from the Contractor or his sureties, or both, such damage as Owner may have sustain by reason of his failure to comply with the terms of the Contract. Neither the acceptance by the Owner or any representative of the Owner nor any payment for or acceptance of the whole or any part of the Work, nor any extension of time, nor any possession taken by the Owner, shall operate as a waiver by Owner of any right hereunder.

17.7.3. A waiver by the Owner, or Contractor, of any breach of the Contract shall not be held to be a waiver as to any other breach.

17.7.4. The Contractor, shall be liable to the Owner for latent defects, fraud, (or such gross mistakes as may amount to fraud), and every contractual warranty or guaranty.

17.8 Cumulative Remedies. The duties and obligations imposed by these General Conditions and the rights and remedies available thereunder are in addition to, and are not to be construed in any way as a limitation of any rights and remedies available to any or all of them which are otherwise imposed or available by Laws or Regulations, by special warranty or guarantee, or by other provisions of the Contract Documents, and the provisions of this Article will be as effective as if repeated specifically in the Contract Documents in connection with each particular duty, obligation, right, and remedy to which they apply.

17.9 Successors and Assigns. The Owner and the Contractor each binds himself, his partners, successors, assigns and legal representatives to the other party hereto and to the partners, successors, assigns and legal representatives of such other party in respect to all covenants, agreements and obligations contained in the Contract Documents. Neither party to the Contract shall assign the Contract or sublet it as a whole without the written consent of the other, nor shall the Contractor assign any moneys due or to become due to him hereunder, without the previous written consent of the Owner.

17.10 Survival of Obligations. All representations, indemnifications, warranties, and guarantees made in,

required by, or given in accordance with the Contract Documents, as well as all continuing obligations indicated in the Contract Documents, will survive final payment, completion, and acceptance of the Work and termination or completion of the Agreement.

17.11 Language. These Uniform General Conditions were enacted by the Secretary and approved by the Governor of Puerto Rico in the English language, according to the Legislative authorization found in Law No. 1 of January 28, 1993.

17.12 Amendments. These Uniform General Conditions shall be amended whenever the Secretary deems it necessary in order to fulfill its purpose.

PART C. ADDITIONAL PROVISIONS

ARTICLE 1: SEPARABILITY CLAUSE; EFFECTIVENESS

1.1 Separability Clause. If any provision authorized in these regulations is declared unconstitutional or void by a Court of Competent jurisdiction, the remaining provisions of this Uniform General Conditions shall continue in effect.

1.2 Effectiveness. These Uniform General Conditions shall enter into effect thirty (30) days after having been filed and enacted by the Department of State, except with regard to Contracts whose Contract Price is paid by one or more Federal Agency in which case these Uniform General Condition, with regard to such Contracts, shall enter into effect immediately after said Federal Agencies, which provide such funds, consent in writing to their use as part of the Contract Documents. At the time of said effectiveness and from that moment forward, general conditions used and issued by a government agency, department, public corporation and instrumentality, may no longer be validly incorporated in Contracts for public works, with the exception of these Uniform General Conditions.

APPROVED ON February 22, 2011, IN SAN JUAN, PUERTO RICO.

Eng. Rubén Hernández Gregorat, MEM, PE
Secretary
Department of Transportation and Public Works

GOVERNMENT OF PUERTO RICO

CERTIFICATION

Pursuant to Law No. 198 of May 15, 1943, as amended, and Law No. 1 of January 28, 1993 and after compliance with the Puerto Rico Uniform Administrative Procedure Act, Law No. 170 of August 12, 1988, as amended, I hereby approve the final version of the Uniform General Conditions for Public Contracts of the Government of Puerto Rico, as prepared by the Secretary of Transportation and Public Works and submitted for my consideration on February 22, 2011.

In San Juan, Puerto Rico, this 23rd -day of February of 2011.

Re: **NEG-11-00061**
Proyecto de Condiciones Generales Uniformes para Obras Públicas

Estimado secretario Hernández Gregorat:

La Procuraduría de Pequeños Negocios, luego de analizar y hacer varias recomendaciones para el ***Proyecto de Condiciones Generales Uniformes para Obras Públicas***, presentado por el Departamento de Transportación y Obras Públicas, entiende que el mismo no tiene impacto sustancial que pueda afectar a los pequeños negocios.

Por otra parte, le recordamos que el Artículo 5 de la Ley Núm. 454 del 28 de diciembre de 2000, según enmendada, Ley de Flexibilidad Administrativa y Reglamentaria para el Pequeño Negocio (LFAR), impone a las agencia a deber de hacer públicas las copias del Análisis de Flexibilidad Reglamentaria en el Registro de Reglamentos del Departamento de Estado.

La falta de publicación del Análisis de Flexibilidad podría inducir que cualquier asociación de comerciantes y/o dueño de negocio radique en el Tribunal la impugnación del reglamento por no cumplir con los aspectos procesales establecidos en la LFAR. Este tipo de acción judicial requeriría que el pequeño negocio demuestre al Tribunal el impacto negativo que le puedan causar tanto el nuevo reglamento como la falta de un Análisis de Flexibilidad. El término para impugnar el referido reglamento es de un (1) año a partir de la fecha en que el mismo entre en vigor.

Por lo cual, la Procuraduría de Pequeños Negocios da un aval condicionado al reglamento propuesto y exhorta que el nuevo reglamento sea promulgado cumpliendo con todas las disposiciones en ley. Le exhortamos también a comunicarse con nuestra Procuraduría de tener alguna duda al respecto.

Respetuosamente,

Lcdo. Edison Negrón Ocasio
Procurador de Pequeños Negocios

ANALISIS DE FELIXIBILIDAD ADMINISTRATIVA Y REGLAMENTARIA PARA PEQUEÑOS NEGOCIOS

UNIFORM GENERAL CONDITIONS FOR PUBLIC WORKS CONTRACTS

10 DE DICIEMBRE DE 2010

ANÁLISIS SOBRE FLEXIBILIDAD ADMINISTRATIVA Y
REGLAMENTARIA PARA PEQUEÑOS NEGOCIOS

UNIFORM GENERAL CONDITIONS FOR PUBLIC WORKS

I. BASE LEGAL, NECESIDAD Y OBJETIVOS DEL REGLAMENTO PROPUESTO

A. Base legal y necesidad de adoptar reglamentación

La Ley Núm. 198 del 15 de mayo de 1943, según enmendada, 22 L.P.R.A. §59, et seq., autorizó y ordenó al Secretario de Transportación y Obras Públicas preparar un pliego de condiciones generales para la contratación de obras públicas en Puerto Rico. Mediante esta Ley se creó el marco jurídico aplicable a la contratación de toda obra pública y se estableció un procedimiento para su promulgación.

Habiendo transcurrido ya varios años desde la aprobación del último pliego de condiciones generales, el Departamento de Transportación y Obras Públicas (DTOP) y la Autoridad de Acueductos y Alcantarillados (AAA), con el insumo y cooperación del Asociación de Contratistas Generales (AGC), Capítulo de Puerto Rico, se dieron a la tarea de confeccionar un nuevo pliego de condiciones generales mediante el cual se pretendió cobijar uniformemente a todas las agencias gubernamentales que realizan obra pública, además de crear unas nuevas reglas que se atemperaran a la experiencia adquirida colectivamente por las distintas agencias gubernamentales a través de años de contratación.

Para canalizar el proceso y poder alcanzar las metas resultó indispensable enmendar la referida Ley Núm. 198. A estos efectos se preparó un ante proyecto de Ley el cual luego de ser evaluado por distintas Comisiones (Comisión de Gobierno, Urbanismo e Infraestructura) y aprobado por el Senado y la Cámara de Representantes, fue aprobado por el Gobernador, convirtiéndose en la Ley Núm. 131 del 2 de septiembre de 2010.

Las enmiendas que trajo la referida Ley 131 fueron, en esencia, las siguientes:

(a) la actualización de conceptos contenidos en la Ley 198 para conformarlos a la realidad jurídica actual;

(b) la inclusión de disposiciones específicas para establecer que el Pliego de Condiciones Generales Uniformes regiría las relaciones contractuales en la construcción de toda obra pública que realicen las agencias, departamentos, corporaciones públicas y demás instrumentalidades gubernamentales con excepción de los Municipios; y

(c) disponer que el proceso de aprobación del las condiciones generales uniformes se haría de conformidad con las disposiciones de la Ley de Procedimiento Administrativo Uniforme, Ley Núm. 170 de 12 de agosto de 1988, según enmendada.

Las enmiendas realizadas a la Ley 198 sentaron las bases legales que permiten la aprobación de este pliego de Condiciones Generales Uniformes.

La contratación, coordinación y supervisión de obras públicas presenta problemas y situaciones de carácter recurrentes tanto para las agencias como para los contratistas. Para atender estos problemas era necesaria la creación y aprobación de un conjunto de disposiciones que especificaran cuales son las responsabilidades, obligaciones y poderes de cada una de las partes contratantes y sus competencias en los campos de actuación respectivos.

B. Propósito del reglamento

El Pliego de Condiciones Generales Uniformes pretende uniformar la contratación y administración de toda la obra de construcción pública en Puerto Rico y eliminar el desfase que existe en la contratación en las diferentes agencias. Por ser el resultado de un esfuerzo común y de la experiencia de las partes contratantes, el nuevo pliego de Condiciones Generales Uniformes busca proveer soluciones o avenidas de acción a problemas contractuales, administrativos y legales comunes o similares y sirve de instrumento para nivelar el terreno para todas las partes de manera que se protejan adecuadamente los intereses de cada uno de los contratantes.

II. APLICABILIDAD

Las disposiciones contenidas en el Pliego de Condiciones Generales Uniformes son de aplicación a cualquier persona natural o jurídica que suscriba un contrato con cualquier agencia de gobierno, departamento, corporación pública o cualquier instrumentalidad del Gobierno de Puerto Rico en el cual el objeto del contrato sea la consecución de obra pública. Sin embargo, las Condiciones Generales Uniformes no sólo son de aplicación al contratista principal de la obra que contrata con una agencia sino que existen clausulas que son aplicables a los subcontratistas y materialistas que trabajan en dicha Obra. El trabajo que un subcontratista o suplidor realice para el contratista general del Proyecto deberá ser de conformidad a un acuerdo en el que se le obligue al Subcontratista a cumplir con los términos y condiciones de seguridad, y otros de las Condiciones Generales y de los Documentos Contractuales que le sean aplicables.

III. POSIBLES IMPACTOS DE LA REGLAMENTACIÓN

A. Pequeños negocios impactados

Este Reglamento tiene un impacto en toda entidad que contrate para la ejecución de una obra pública sin importar el tamaño que tenga esa operación comercial. El factor determinante no es el tamaño del negocio sino el objeto del contrato, o sea que el contrato conlleve la ejecución de una obra pública incluyendo pero sin limitarse a trabajos de construcción, restauración y reparación de edificios o construcciones existentes o nuevas, así como la conservación y mantenimiento de los elementos construidos y los proveedores de diferentes servicios contratados para trabajar en Obras.

Para que un contratista principal pueda hacer negocios con el Gobierno Federal de Los Estados Unidos y con el Gobierno de Puerto Rico este debe estar inscrito en el Registro Único de Licitadores. Este requisito no es de aplicación a los sub-contratistas y materialistas del contratista principal del Proyecto ya que la relación contractual de los materialistas o subcontratistas no es con el gobierno o la agencia, sino que su relación contractual es con el Contratista Principal. El Registro de Licitadores o proveedores le brinda la oportunidad legítima a las corporaciones o entidades de participar del proceso de compra gubernamental "procurement" y la participación de las subastas como contratista principal. En Puerto Rico existen varios

registros de licitadores o proveedores siendo el más importante el Registro Único de Licitadores que es dirigido por la Administración de Servicios Generales (ASG). Este Registro es respaldado por la Ley 85 de Junio 2002, mejor conocida como "Ley Registro Único de Licitadores". Uno de los propósitos principales de este Registro es que el Gobierno puede asegurarse de lo siguiente: Adquirir bienes y servicios de empresas que cumplan con todas las requisiciones fiscales; Contratar empresas bonafides debidamente autorizadas para hacer negocios en Puerto Rico; Contratar Individuos que estén al día en sus obligaciones fiscales; Contratar individuos y empresas que cumplan con solvencia ética y moral; Contratar empresas que puedan cumplir con los bienes o servicios solicitados.

Muchos de los contratistas registrados en el Registro Único de Licitadores no cualifican como pequeños negocios ya que emplean a más de quince (15) personas, por tanto estos contratistas, aunque están impactados por el Reglamento de Condiciones Generales Uniformes, no están dentro del marco de los negocios cubiertos por este análisis. No empece lo anterior, existen algunos contratistas que sí cualifican como pequeños negocios, estos contratistas en su mayoría son corporaciones dedicadas a proyectos de construcción que envuelven construcción de carreteras, puentes edificios y otros. Por otro lado, los sub-contratistas y materialistas de los proyectos de construcción de obra pública si son usualmente pequeños negocios, sin embargo, a estos no les aplica el requisito de pertenecer al Registro Único de Licitadores pues su relación contractual no es con el gobierno o la agencia sino con el contratista general de la obra.

A pesar de no requerir que el sub contratista pertenezca al registro único de licitadores las Condiciones Generales Uniformes si establecen que el dueño podrá objetar la contratación de un subcontratista o materialista si existen razones validas. Las Condiciones Generales Uniformes le requieren al Contratista Principal de la obra presentarle al gobierno o agencia con la cual contrata un listado en el que se detallen el nombre de los subcontratistas y materialistas principales que pretende utilizar en las porciones principales del Proyecto. Por su parte la agencia o gobierno tiene el deber de investigar y notificar al Contratista si objeta alguno de los subcontratistas o suplidores contenidos en la lista provista por el contratista principal. La objeción por parte de la agencia no podrá ser arbitraria, la misma deberá ser una razonable y los fundamentos para la misma deberán constar por escrito. Las causas para objetar a un subcontratista, suplidor o materialista pueden incluir, entre otras: record de incumplimientos previos de un subcontratista o materialista con la agencia, record flagrante de violaciones de seguridad o desempeño insatisfactorio en pasados Proyectos con la agencia. Este procedimiento tiene el propósito de garantizar algún control sobre los contratistas o suplidores de Proyectos de manera que se evite que subcontratistas o materialistas ineficientes y de alto riesgo trabajen en la obra retrasándola y aumentando los costos los cual al fin y al cabo termina siendo pagado con fondos públicos. Por ende, esta es una medida de control que pretende asistir a la mejor utilización de fondos públicos.

B. Impacto económico al pequeño negocio

Las Condiciones Generales Uniformes son el resultado de un esfuerzo interagencial dirigido por el DTOP y la AAA, agencias que por su vasta experiencia en la contratación de obras públicas tomaron la iniciativa de crear un conjunto de disposiciones que regularan y uniformaran la contratación de Obra. Durante la redacción de las Condiciones Generales Uniformes se contó con la participación y colaboración activa de la ACG, Capítulo de Puerto Rico. La ACG es una asociación que agrupa a más de 350 compañías que generan un 80% de la construcción en nuestra Isla. Entre los propósitos y objetivos de la ACG se encuentra el combatir las prácticas injustas, apoyar al contratista y sus asociaciones para verificar condiciones insatisfactorias y estimular métodos de contratación que no expongan al contratista a riesgos.

El proceso de redacción de la Condiciones Generales Uniformes incluyó la celebración de innumerables reuniones para la discusión de las disposiciones. En dichas reuniones las partes presentaban sus posiciones en cuanto a cada disposición. Por ende el borrador que resultó del ejercicio contó con la aprobación del ACG. Debido a que la participación de la ACG en este proceso fue esencial para la redacción de las Condiciones Generales Uniformes, los derechos de los contratistas al igual que impacto económico de estas condiciones generales fueron escuchados para que dicho impacto a los contratistas fuera mínimo.

No obstante, por tratarse de fondos públicos que van a ser desembolsados para la construcción de obras públicas, el Gobierno tiene que tener unas garantías de que dicho dinero será invertido de manera eficiente. Por tal razón siempre que la agencia suscribe un contrato con un contratista general para construcción de obra pública a este se le requiere la prestación de ciertas fianzas y seguros que garanticen que los fondos resultaran en la construcción de la obra. Las Condiciones Generales Uniformes también exigen la prestación de estas garantías, sin embargo, las mismas fueron redactadas para nivelar el campo del juego y salvaguardar los derechos de todas las partes envueltas.

C. Zonas geográficas de mayor impacto

Las disposiciones de las Condiciones Generales Uniformes impactan directamente a los contratistas principales que contratan con el gobierno o agencia. Estos contratistas, los cuales tienen que ser licitadores autorizados, se encuentran ubicados a través de todo Puerto Rico. Las estadísticas de la ASG demuestran que la mayoría de los licitadores autorizados se encuentran ubicados en la zona metropolitana. Sin embargo, como mencionamos anteriormente la mayoría aunque no todos estos contratistas principales no se consideran pequeños negocios. La mayoría de los pequeños negocios que están en alguna manera impactados por la Condiciones Generales son los subcontratistas, suplidores o materialistas los cuales se encuentran distribuidos por toda la Isla aunque en su mayoría también están ubicados en el área metropolitana.

IV. CUMPLIMIENTO CON EL REGLAMENTO

A. Personal que fiscalizará su cumplimiento

El personal encargado de hacer cumplir las disposiciones Condiciones Generales Uniformes consiste de los funcionarios de las agencias o instrumentalidades de gobierno contratantes que están a cargo de la contratación, supervisión y sobreseimiento de la construcción de la obra.

B. Sanciones y penalidades

El incumplimiento con las disposiciones del Reglamento de Condiciones Generales Uniformes puede conllevar la imposición de daños líquidos, cancelación de contratos, radicación de demanda por incumplimiento, imposición de multas y cancelación de autorizaciones o licencias.

Las Condiciones Generales Uniformes disponen que en caso de que el contratista o su aseguradora no completen el trabajo dentro del tiempo especificado por el contrato o según extendido se le impondrá al contratista una suma de daños líquidos por cada día calendario que el trabajo no sea completado en tiempo. Los daños líquidos fluctúan desde $300.00 dólares diarios en Contratos de $0 hasta $99,999.99 hasta $8,000.00 diarios en proyectos de $50 Millones en adelante (aunque esto puede variar según la

Provisión Especial que se incluya en el contrato. Por otro lado, las Condiciones Generales Uniformes también disponen de un incentivo equivalente a la mitad de los daños líquidos estipulados por cada día que la obra este sustancialmente completada antes de la fecha de terminación estipulada en el Contrato.

Lo anterior no impide que el Gobierno de Puerto Rico pueda, por los mismos hechos, iniciar un procedimiento criminal contra cualquier contratista que se identifique que ha cometido delitos relacionados con fraude en la construcción o cualquier otro delito tipificado en el Código Penal de Puerto Rico.

C. <u>Otros requisitos para cumplimiento</u>

Las Condiciones Generales Uniformes son un conjunto de disposiciones que definen los deberes y derechos del contratista principal y de las agencias en el proceso de contratación y construcción de obras públicas. Estas Condiciones Generales Uniformes también disponen los términos para actuar o presentar reclamaciones. Debido a su carácter regulador las Condiciones Generales Uniformes establecen múltiples requisitos a los contratistas a quienes se les adjudica la construcción de una obra pública y discutirlos todos seria vertir el contenido de las condiciones generales en este escrito. Sin embargo, entendemos que los requisitos más significativos en cuanto al impacto económico del Reglamento en aquellos pocos contratistas principales que cualifican como pequeños comerciantes es el asunto de la obtención de las fianzas y pólizas de seguros requeridas en el Articulo 3 de las Condiciones Generales Uniformes.

La Condiciones Generales Uniformes disponen que el contratista principal que haya recibido la buena pro en una subasta y contraté con el gobierno o agencia para la construcción de una obra pública no podrá comenzar trabajos hasta no haber obtenido ciertas pólizas de seguros y fianzas requeridas en las Condiciones Generales Uniformes. En el caso de las agencias que no tienen un "Owner's Controlled Insurance Program" el contratista principal de la obra deberá, dentro de los diez (10) días de haber recibido la notificación de adjudicación de subasta, proveer lo siguiente: (1) fianza de pago y fianza de cumplimiento en una suma de al menos 50% hasta 100% del monto del contrato; (3) pólizas del Fondo de Seguro de Estado y todas las pólizas de seguros social y laborales necesarias; (4) seguro de responsabilidad general; (5) póliza choferil para negocios; (6) builders risk; (7) instalation floater policy; (8) "contractors liability insurance" con un límite agregado general de $1 Millón, límite agregado de productos o operación de $1,000.00, límite de "advertising and injury", limite por ocurrencia de $5,000,000.00 limite de daños por fuego $50,000.00 límite de gastos médicos de $5,000.00. Estos requisitos son aplicables al contratista general porque su relación contractual es con la agencia pero no al subcontratista o suplidor ya que relación contractual es con el contratista general. A pesar de lo antes expresado al subcontratista le aplican algunas clausulas de las condiciones generales sobre calidad de trabajo, seguridad y otros relacionados al trabajos que contrate.

Otro requisito de impacto económico para aquellos contratistas generales que sean pequeños negocios es que el contratista general vendrá obligado al pago de todos los impuestos incluyendo impuesto de ventas, consumo, uso y otros de carácter similar necesarios para la consecución de de la Obra. Estos impuestos deben pagarse de acuerdo con las leyes, reglamentos y ordenanzas del lugar donde ubique la Obra que sean aplicables durante el periodo en de duración de la Obra y que estuvieran en efecto al momento de la subasta. Estos impuestos incluyen los impuestos municipales. Véase Art. 6.10.

Las pólizas de seguros y fianzas así como los impuestos y otros costos son gastos que el contratista general toma en consideración al momento de someter su propuesta ante la agencia o sea al momento de

licitar. Por tanto, estos gastos se encuentran absorbidos en el precio de licitación que el contratista general somete, a saber, en el Precio del Contrato. Los requisitos para las diferentes fianzas y seguros tienen el propósito de garantizarle a la agencia que el contratista principal será responsable. Estas disposiciones garantizan la ejecución de la obra y la mejor utilización de los fondos públicos que se desembolsan para pagar la Obra.

Por otro lado el impacto que tiene el Reglamento de Condiciones Generales Uniformes en los subcontratistas, materialistas y suplidores no es un impacto de carácter económico sino un impacto de carácter regulatorio ya que algunas disposiciones de las Condiciones Generales Uniformes como las de seguridad y otras que no son las de fianzas se incorporaran a los contratos que estos suscriben con el contratista general.

V. RELACIÓN CON OTROS REGLAMENTOS

Este Reglamento guarda relación con todos los reglamentos relacionados a las subastas, compras y contrataciones en obras de gobierno y con la ley y reglamentación de agencias federales que proveen subsidio a varias obras, este Reglamento deberá contar con la anuencia de esas agencias federales. Por tal razón las agencias que reciben ayuda federal notificarán el reglamento a las agencias federales concernidas y obtendrán su posición en cuanto al mismo.

VI. SEÑALAMIENTOS DEL PROCURADOR DE PEQUEÑOS NEGOCIOS

Los representantes del Departamento de Transportación y Obras Publicas se reunieron con el Procurador de Pequeños Negocios y el personal que analizó las disposiciones del propuesto Reglamento con el propósito de recibir el insumo y recomendación del Procurador y discutir y aclarar dudas sobre las clausulas del Reglamento. Las partes discutimos la sección 3.2.1. y 3.2.2 del propuesto Reglamento. Estas Clausulas en esencia requieren (i) que el contratista principal provea lo siguiente antes de dar comienzo a la obra: (1) fianza de cumplimiento; (2) fianza de pago; (3) póliza de compensación a trabajadores; (4) Fondo de Seguro de Estado y seguro social; (5) Seguro de Responsabilidad General; (6) Póliza de Chóferil; (7) Builders Risk; (8) Installation Floater (cuando sea aplicable); y (ii) que el contratista le conceda a las agencias y al gobierno discreción para eximir o solicitar pólizas o seguros de otra naturaleza a las antes mencionadas, según lo entienda necesario. Luego de analizar las disposiciones del Reglamento sobre este particular y atender las preocupaciones determinamos que la discreción que el Reglamento le concede a la agencia es razonable y necesaria. La clausula que permite se exima de algunas pólizas o seguros o que se requieran pólizas o seguros adicionales (sección 3.2.2) ya había sido previamente considerada y discutida el AGC. Precisamente con el propósito de atender la preocupación de posibles decisiones arbitrarias por parte de las agencias en cuanto a eximir o requerir más seguros se creó la Sección 3.2.2.1. Dicha sección obliga a la agencia a exponer por escrito y hacer formar parte del expediente del Proyecto las razones para no solicitar ciertas pólizas o para solicitar pólizas de diferente naturaleza. El propósito de la clausula 3.2.2 es darle cierto grado de flexibilidad al gobierno y agencias que construyen obras públicas para atender casos que ameriten que en bienestar de la consecución de la obra o para la protección de los fondos públicos haya que hacer modificaciones en las pólizas requeridas o en la naturaleza de las mismas. La flexibilidad que provee esta sección es necesaria toda vez que los proyectos de construcción de obra pública varían en complejidad y naturaleza. A pesar de que en general las pólizas requeridas son las mencionadas en la clausula 3.2.1 existen Proyectos que por su alto riesgo, peligrosidad o tecnicismo pueden requerir una modificación en el tipo de póliza. También existen Proyectos de Obra Pública tan sencillos que solicitar todas las pólizas nombradas en la clausula 3.2.1

resultaría innecesario y oneroso para el contratista lo cual haría la obra más costosa para el gobierno o la agencia. La construcción de obra pública requiere la flexibilidad de pólizas que se ajusten a la obra que se construye. El Reglamento pretende que no se haga más costosa una obra sencilla o que se que al descubierto una obra altamente compleja solo por la rigurosidad de una clausula. En fin el propósito es proteger y asegurar los fondos públicos y lograr la construcción de obras de manera rápida y eficaz pero segura. No empece lo anterior, el propio reglamento limita la flexibilidad de la agencia al tomar esta determinación requiriéndole que si se modifican las pólizas solicitadas en la seccion3.2.1.1 para eximir o aumentar de alguna póliza la agencia presente su justificación por escrito y haga que la misma obre en el expediente.

La segunda recomendación del Procurador de Pequeños Negocios se refiere al grado de control que la agencia o entidad gubernamental contratante tiene sobre la elección de los suplidores, materialistas y/o subcontratistas que se contrataran para el Proyecto. Para atender esta recomendación revisamos las disposiciones de la sección 6.21 del Reglamento y sus subincisos. De la sección antes mencionada surge que el Contratista general del Proyecto u Obra es quien determina cuales serán los subcontratistas, suplidores y materialistas que trabajaran en la Obra. En esa determinación inicial de quienes serán los que trabajaran la agencia no tiene ninguna intervención. Una vez el contratista principal hace su selección, entonces el Reglamento le requiere notificarle a la Agencia un listado de los subcontratistas y suplidores principales que el contratista ha escogido para las porciones principales del Proyecto. Nótese que solo se requieren los subcontratistas y suplidores principales de porciones principales del Proyecto o sea que el contratista no tiene que notificar a la agencia todos los subcontratistas sino solo los principales. La agencia hará una investigación y de tener una objeción justificada y razonable a los suplidores o subcontratistas principales que se le notificaron, entonces, lo expresará por escrito y ese subcontratista no podrá ser contratado para la Obra. Entre las razones que la agencia puede levantar para objetar la contratación de un subcontratista o suplidor se encuentra: (1) que el subcontratista haya incurrido en incumplimientos previos con la agencia; (2) que haya tenido record de violaciones de seguridad; o (3) que tenga historial de desempeño deficiente en sus funciones. Las razones que la agencia exprese para objetar tienen que ser razonables no pueden ser arbitrarias, injustas o ilegales. Esta clausula va dirigida a velar porque se logre la construcción rápida y eficiente de obras y sin exponer a la agencia o gobierno a riesgos innecesarios por subcontratistas riesgosos e ineficientes. Las objeciones de la agencia deberán estar fundamentadas en una investigación y constar por escrito y formar parte del expediente de modo que los derechos de un subcontratista o suplidor que quiera impugnar esta decisión pueda llevar la acción que en derecho estime. Por tanto, de lo anterior surge que la agencia no escoge los subcontratistas o materialistas de un Proyecto sino que si luego de una investigación surge que alguno de los que el contratista general pretende utilizar tiene un historial que puede afectar la obra, la agencia puede rechazarlo por el bienestar de la obra y la protección de los fondos.

VII. CONCLUSION

Luego de este análisis, se puede concluir que el reglamento de las Condiciones Generales Uniformes no tendrá un impacto económico adverso en los pequeños negocios que contraten con las diferentes agencias gubernamentales o corporaciones públicas para la construcción de obras públicas.

SUPPLEMENTARY CONDITIONS

Dated July 29, 2026

Attachment 9: SUPPLEMENTARY CONDITIONS

The following definitions and terminology will be replaced and shall read as follows:

1.1.1.1. Agreement (or Contract) - The written instrument, which is evidence of the agreement between Owner and Contractor covering the Work. For purposes of this Contract is the agreement entitled "Public Private Partnership Contract: ASEM - Design/Build/ Infrastructure Conservation Agreement" by and between the Design/Build/Conservation Contractor and ASEM.

1.1.1.3. Architect/Engineer - The Architect or Engineer, referred to herein as Architect/Engineer, is the professional licensed to practice architecture or engineering in the Commonwealth of Puerto Rico and is referred to throughout the Contract Documents. It is the Architect or Engineer authorized by the Contractor for the preparation of all construction documents, plans and specifications and to submit such documents for the approval of the related public agency. The Architect/Engineer may designate an authorized representative. The Architect/Engineer is the individual or duly authorized legal entity named as such in the Agreement.

1.1.1.4. Architect/Engineer's Consultant - An individual or duly authorized legal entity having a contract with the Architect/Engineer to furnish services as Architect/Engineer's independent professional and collegiate consultant with respect to the Project.

1.1.1.14. Contract Documents - The Contract Documents establish the rights and obligations of the parties and include: (i) the Agreement, (ii) addenda (which pertain to the Contract Documents), (iii) Contractor's bid or proposal (including documentation accompanying the Request for Sealed Proposal and any post Request for Sealed Proposal documentation submitted prior to the Notice of Award), (iv) the Notice to Proceed, (v) the Bonds, (vi) the General Conditions, (vii) the Supplementary Conditions, (viii) the Special Provisions, (ix) the Specifications, (x) the Drawings as the same are more specifically identified in the Agreement, including Standard Drawings, if applicable and (xi) Instructions to Bidders. It shall also include: (i) all Written Amendments, (ii) Change Orders and Extra Work Orders, (iii) Work Change Directives, (iv) Field Orders and (v) Owner's written interpretations and clarifications issued on or after the Effective Date of the Agreement. Approved Shop Drawings and the reports and drawings of subsurface and physical conditions are not Contract Documents. Only printed or hard copies of the items listed in this Article are Contract Documents. Files in electronic media format of text, data, graphics, and the like that may be furnished by Owner to Contractor are not Contract Documents, unless otherwise specified in the bid documents.

1.1.1.19. Contract Time or Time - It is the period of time allotted in the Contract Documents.

1.1.1.37. Final Acceptance - Shall mean the acceptance of the Design-Build portion of the Work by the Owner after the final inspection as evidenced by the executed Certificate of Final Acceptance sent to Contractor by Owner.

1.1.1.53. Owner - The Owner is the Department, Agency, Public Corporations, or any other instrumentality of the Commonwealth of Puerto Rico as identified in the Agreement and is referred to throughout the Contract Documents as if singular in number and masculine in gender. The term Owner means the Owner or his authorized representative. It shall also mean any person, or entity, named as such in the Contract Documents. For purposes of this contract, Owner shall mean and assigns ASEM, its successors and assign.

1.1.1.79. Substantial Completion - The time at which the Design-Build portion of the Work (or a specified part thereof) has progressed to the point where, in the opinion of the Owner, or its authorized representative, the Work (or a specified part thereof) is sufficiently complete, in accordance with the Contract Documents, so that the Design-Build portion of the Work (or a specified part thereof) can be utilized for the purposes for which it is intended. The terms "substantially complete" and "substantially completed" as applied to all or part of the Work refer to Substantial Completion thereof.

1.1.1.90. Work Change Directive - A written statement to Contractor issued on or after the Effective Date of the Agreement and signed by the Owner and recommended by the Owner's Representative ordering an addition, deletion, or revision in the Work, or responding to differing or unforeseen subsurface or physical conditions under which the Work is to be performed or to emergencies. A Work Change Directive will not change the Contract Price or the Contract Time but is evidence that the parties expect that the change ordered or documented by a Work Change Directive will be incorporated in a subsequently issued Change Order following negotiations by the parties as to its effect, if any, on the Contract Price or Contract Time.

The following definitions and terminology will be added as follows:

1.2.1 OTHER DEFINITIONS

1.2.1.1 Conditional Acceptance (or conditionally accepted) - The action taken by OWNER, through the Contracting Officer or OWNER's Representative depending upon the particular Submittal involved, by which the Contracting Officer or OWNER's Representative, as the case may be, makes a determination with respect to a particular Submittal, that the Submittal appears to be satisfactory. Conditional Acceptance of a Submittal shall not, however, relieve the Contractor of its sole responsibility for its (a) accuracy and completeness, (b) coordination with other elements of the Work, (c) compliance with requirements of the Contract Documents, or (d) for errors and omissions in the Submittal.

1.2.1.2 Contractor Certification - A notarized affidavit signed by the Contractor's Project Executive or the Contractor's Project Manager certifying, with respect to a Contractor Change Request, a Contractor Change Proposal, or a notice given under the provisions of Subsection 9.3.3.1.6.4 (each a "Claim Submission"), that he or she has personally reviewed the documentation submitted in support of the Claim Submission, that he or she is satisfied that the Claim Submission is true, accurate and complete, that the dollar amounts and time extensions claimed accurately reflect the adjustments in the Contract Price or the Contract Time for which the Contractor reasonably believes OWNER is liable under the terms and conditions of the Contract, and that the Claim Submission is made in good faith.

1.2.1.3 Delay Bank - The net number of Days accumulated, from time to time, as a result of deposits of Days into the Delay Bank (made pursuant to Clause .4 and Clause .5 of Subsection 9.3.3.1.6.2), and withdrawals of Days from the Delay Bank (made pursuant to Subsection 9.3.3.1.6.5).

1.2.1.4 Delay Day - Any Day of delay affecting Critical Path Activities resulting from a Delay Event.

1.2.1.5 Excusable Delay - Any act, omission, event or condition which delays performance of Critical Path Activities for which the Contractor is entitled, under applicable provisions of the Contract, to an extension of the Contract Time.

1.2.1.6 Executive Director - OWNER's Executive Director.

1.2.1.7 Good Industry Practices - Practices, procedures, methods and standards that (i) are consistent with current industry practices and standards established for, or employed by, leading participants in the construction industry in the United States and in Puerto Rico; (ii) comply with Applicable Laws and applicable industry technical standards, and underwriters' and fire and life safety codes and standards; and (iii) promote the highest standards of reliability, efficiency, safety and security. Good Industry Practices require, without limitation, that reasonable steps be taken to assure that sufficient personnel are employed and available to perform the Work, and that such personnel are adequately skilled, experienced and trained to construct and install the Work properly and efficiently, and that appropriate coordination, monitoring and testing is performed to assure that all elements of the Work are constructed and installed so as to function as required by the Contract Documents.

1.2.1.8 Hazardous Waste - Any substance or material that is defined as a hazardous substance, hazardous material, hazardous waste or Special Waste under Applicable Laws, and that is required by Applicable Laws to be removed, remediated, or disposed of in a regulated waste facility (*i.e.*, a waste facility, other than a sanitary landfill, which is permitted to receive Special Waste or other hazardous waste).

1.2.1.9 Special Waste - Any discarded product or material generated by or resulting from industrial, commercial, mining or agricultural operations, or household or community activities, that contains asbestos, lead, oils, greases, regulated biochemical waste, industrial waste or polychlorinated biphenyl (PCB) waste, as defined in 40 C.F.R., Part 762, and that, under Applicable Laws, must be disposed of in a non-hazardous waste facility that is permitted to receive Special Waste. Special Waste also includes any other non-hazardous solid wastes which the Puerto Rico Environmental Quality Board determines, due to their quantity, concentration or physical or chemical characteristics, require special handling to prevent imminent danger to human health or the environment, and which must be so disposed of.

1.2.1.10 Taxes - Any (i) fees or assessments imposed by governmental authorities for building permits, and other permits in the nature of building permits, that the Contractor is required to pay as a condition precedent to the performance of the Work, (ii) fees imposed by the Puerto Rico Engineer and Land Surveyor Association ("Colegio de Ingenieros y Agrimensores de Puerto Rico") for internal revenue stamps, (iii) sales, use, import/excise taxes and municipal or similar taxes (including municipal license ("patente" taxes) imposed upon, or in connection with, the Work, including, but not limited to, municipal construction taxes and the Puerto Rico excise taxes, and (iv) any other taxes or assessments against or on account of services, materials, equipment, processes or operations under, incidental to, or related to performance of the Contract.

1.2.1.11 Weather Delay Day - Any Working Day on which unusually severe weather or conditions resulting from unusually severe weather prevent the Contractor from proceeding with at least seventy-five percent (75%) of the normal labor and equipment force engaged on Critical Path Activities shown on the current conditionally accepted Progress Schedule and under the current Work Plan Schedule for at least fifty percent (50%) of the Working Day.

The following paragraph shall be read as follows:

1.3.1.1. Unless otherwise indicated in the Contract Documents, whenever in the Contract Documents the terms "as allowed," "as approved," or terms of like effect or import are used, or the adjectives "reasonable," "suitable," "acceptable," "proper," "satisfactory," or adjectives of like effect or import are used to describe an action or determination of the Owner as to the Work, it is intended that such action or determination will be solely to evaluate, in general, the completed Work for compliance with the requirements of and

information in the Contract Documents and conformance with the design concept of the completed Project as a functioning whole as shown or indicated in the Contract Documents (unless there is a specific statement indicating otherwise). The use of any such term or adjective shall not be effective to assign to Owner any duty or authority to supervise or direct the performance of the Work or any duty or authority to undertake responsibility contrary to the provisions of these General Conditions and the Contract Documents.

The following paragraph shall be read as follows:

2.1.2 The intent of the Contract Documents is to provide for the design, construction, conservation and completion of the Work described.

The following paragraphs shall be added:

2.1.5 PURPOSE OF CONTRACT DOCUMENTS

The Contractor is responsible for the construction of a complete, fully operational and functional facility in accordance with the Contract Documents and Good Industry Practices. The Contractor shall furnish all management, construction and installation, and all other labor (at staffing and manpower levels sufficient to complete each and every construction activity involved in the Work continuously, expeditiously and efficiently), materials, tools, supplies, equipment and other items necessary for the expeditious, proper execution and completion of the Work in accordance with the Contract Documents and in a manner so as to meet or exceed all standards established by the Contract Documents.

2.1.6 CONTRACTOR'S OBLIGATIONS NOT DIMINISHED

Any review, inspection, approval or acceptance by the Contracting Officer or OWNER's Representative of the Work, any portion thereof, or other services provided by the Contractor, or payment by OWNER for Work performed by the Contractor shall not (i) diminish the Contractor's obligations and responsibilities under the Contract or its warranties, or otherwise relieve the Contractor of any liability, or
(ii) be construed as a waiver of any rights available to OWNER under the Contract or Applicable Laws, or of any cause of action arising out of the Contractor's performance of, or failure of the Contractor to perform, the Contract.

2.1.7 TECHNICAL STANDARDS

The Contractor represents that it is fully familiar with all technical standards applicable to the Work, including, but not limited to, the manuals, standards, guidelines and criteria listed in the Contract Documents. References in the Contract Documents to technical standards shall be construed to refer to the most recent published technical standards of the institute, organization, association, authority, or society specified therein. Words and abbreviations which have well-known technical or trade meanings are used in the Contract Documents in accordance with such recognized meanings. Unless otherwise specified to the contrary in the Contract Documents:

1. all references to technical standards shall be construed to include the most recent revisions;

2. all such technical standards shall apply as if incorporated in the Contract Documents; and

3. if any revision of such technical standards occurs after the date when the Permits and Approvals authorizing the Work are issued and prior to completion of the applicable Work, the Contractor shall notify OWNER's Representative and, if directed to do so, shall perform the Work in accordance with the revised requirement.

Where the Contract Documents require materials or apparatus to conform to specified technical standards, the Contractor shall furnish to OWNER the manufacturer's written certification that such materials or apparatus conform to such technical standards. Such certifications shall not, with respect to OWNER, be conclusive as to such requirements, and failure of OWNER to request or reject any certification shall not release the Contractor from full responsibility for the accurate and complete performance of the Work in accordance with the Contract Documents.

2.1.8 LIABILITY FOR JOINT VENTURE

If the entity constituting the Contractor is a joint venture, each principal member of the Contractor is and shall be jointly and severally responsible and liable for all obligations, responsibilities and liabilities of the Contractor under the Contract.

2.1.9 DISCLAIMER OF OWNER'S LIABILITY

In no event shall OWNER be liable to the Contractor except for obligations expressly assumed by OWNER under the Contract Documents, nor shall OWNER ever be liable to the Contractor for indirect, special, incidental or consequential damages resulting from, arising out of, or in connection with, the Work, the Contract or its rescission, cancellation, termination or suspension or the acceleration of its expiration. No representative of OWNER, nor any officer, agent, consultant or employee of OWNER (including OWNER's Representative) shall be charged personally by the Contractor with any liability, or be held liable to it, under any term or provision of the Contract, or because of any breach of the Contract by OWNER, or otherwise in connection with performance under the Contract.

The following paragraphs shall be read as follows:

2.2.1. The Contract Documents for each Project shall specify the order of precedence among the diverse documents that form the Contract Documents, except for the order of precedence of the General Conditions which may not be altered unless allowed to be altered by means of the Special Conditions as described in Article 1.1.1.72. If no such order of precedence is established in the Contract Documents for the Project, the following order shall be followed:

2.2.1.1 any Contract Amendments;

2.2.1.2 any Change Orders – those of a later date taking precedence over those of an earlier date;

2.2.1.3 the Notice to Proceed;

2.2.1.4 the Agreement (including the Scope of Work and Attachments)

2.2.1.5 the Special and Supplementary Conditions (if any);

2.2.1.6 the General Conditions;

2.2.1.7 the Scope of Services (including the General Requirements);

2.2.1.8 the Schematic Drawings provided by Owner;

2.2.1.9 the Contractor Proposal;

2.2.1.10 the Contractual Exhibits and any other documents specifically identified and incorporated into any of the Contract Documents by reference – those of a later date taking precedence over those of an earlier date;

2.2.1.11 the Bonds;

2.2.1.12 the Tax Certifications;

2.2.1.13 the Contractor Insurance Policies; and

2.2.1.14 the Notice of Award.

2.3. WRITTEN INTERPRETATIONS

2.3.1. Provided reasonable time is granted to Owner, written interpretations necessary for the proper execution or progress of the Work in the form of drawings, or otherwise, will be issued with reasonable promptness by the Owner or its designated representative so as not to adversely affect the critical path of the Project Schedule.

2.3.2. Contractor may make written request to the Owner or Owner's Representative for such interpretations, when deemed necessary for the proper progress of the Work.

The following paragraph will be added as follows:

2.5.2.4 Notwithstanding the previous paragraphs in this Section 2.5, any conflict, ambiguity, errors, omissions or defects on plans, drawings and specifications developed by the Contractor are the full responsibility of the Contractor and shall not constitute grounds for a Change Order.

The following paragraphs shall be read as follows:

2.6.2.3. Owner's or his authorized representatives' written interpretation or clarification.

2.7.1. The Contractor will be furnished, free of charge, four (4) complete copies of the Contract Documents. Additional copies will be furnished upon request at the cost of reproduction. If Contractor so requests it, Owner will also furnish, free of charge, if available, an electronic file in PLT format (plot to File) so that the Contractor may make the copies of plans and/or drawings that he needs to build the Project and perform the Work. If such electronic files are not available, the Owner shall allow the Contractor to prepare electronic files and to print, at Contractor's cost, but without additional payment to Owner, those copies needed for use by Contractor.

2.7.2. All Drawings, Specifications and copies thereof furnished by the Owner, or Owner's Representative are, and shall remain, property of the Owner.

2.7.2.1. The Contractor can make copies of all the Drawings, Specifications, and other Contract Documents without permission, and without the payment of any fees or royalties, to the Owner, or Owner's Representative as long as they are necessary for use in the execution of the Work.

2.7.3.1. The Contractor shall not have or acquire any title to or Ownership rights in any of the Drawings, Specifications, or other documents (or copies of any thereof) prepared by or bearing the seal of Owner, including electronic media editions; and

The following paragraph will be added as follows:

2.7.5 During the Design Phase portion of the Work Contractor shall furnish to Owner copies of the plans, drawings and specifications for each deliverable as required in the General Design Criteria.

The following paragraphs shall be read as follows:

4.2 SUBSURFACE AND PHYSICALCONDITIONS

4.2.1. Reports and Drawings. The Scope of Work atthe Agreement identify:

4.2.1.1. Delete this Section.

4.2.1.2. those drawings of physical conditions in or relating to existing surface or subsurface structures at or contiguous to the Site (except Underground Facilities) used in preparing the Contract Documents.

4.2.2. Limited Reliance by Contractor on Technical Data Provided. On lineal type projects, Contractor may rely upon the general accuracy of the "technical data" contained in such reports and drawings, but such reports and drawings are not part of the Contract Documents. Such "technical data" is identified in the Supplementary Conditions. Except for such reliance on such "technical data", Contractor may not rely upon or make any Claim against Owner, or any of its Consultants with respect to:

4.2.3. Reliance by Contractor on Technical Data Provided. On building construction projects, Contractor may rely upon the general accuracy of the "technical data" contained in such reports and drawings, and such reports and drawings are part of the Contract Documents. Such "technical data" is identified in the Scope of Work in the Agreement. Except for such reliance on such "technical data", Contractor may not rely upon or make any Claim against Owner or any of its Consultants with respect to:

4.3.1.4. is of an unusual nature, and differs materially from conditions ordinarily encountered and generally recognized as inherent in work of the character provided for in the Contract Documents; then Contractor, shall promptly, in no event later than 3 working days, after becoming aware thereof and before further disturbing the subsurface or physical conditions or performing any Work in connection therewith (except in an emergency as required by Article 6.16), notify Owner's Representative and Owner in writing about such condition. Contractor shall not further disturb such condition or perform any Work in connection therewith (except as aforesaid) until receipt of written order to do so.

4.3.2. Owner's Representative Review. After receipt of written notice as required by the preceding Article, Owner's Representative will promptly review the pertinent condition. Determine the necessity of Owner's obtaining additional exploration or tests with respect thereto and advise Owner in writing of Owner's Representative findings and conclusions.

4.5. UNDERGROUND FACILITIES

4.5.1. Contractor is responsible for identifying in drawings and specifications existing Underground Facilities at or contiguous to the Site. Unless it is otherwise expressly provided in the Scope of Work:

4.5.1.1. Contractor shall be responsible for the reasonable accuracy or completeness of any such information or data; and

4.5.1.2. the costs of all the following will be included in the Contract Price, and Contractor shall have full responsibility for:

4.5.1.2. 1. reviewing and checking all such information and data;

4.5.1.2.2. locating all Underground Facilities shown or indicated in the drawings and specifications to be developed by Contractor;

4.5.1.2.3. coordination of the Work with the Owners of such Underground Facilities, including Owner, during construction; and

4.5.1.2.4. the safety and protection of all such Underground Facilities and repairing any damage thereto resulting from the Work.

4.5.2. Deleted.

4.5.2.1. and **4.5.2.2.** Deleted.

4.5.2.3. Deleted.

4.5.2.4. Deleted.

4.5.2.4.1. and **4.5.2.4.2.** Deleted.

4.6.1. In projects requiring construction of buildings, at the beginning of the project, the Owner will set construction stakes establishing sufficient project limits lines, baseline and a benchmark. These stakes and marks will constitute all the surveying work the Owner will provide for the use of the Contractor. From the afore-mentioned stakes and marks, the Contractor shall develop and establish all necessary marks and controls to perform his work. The Contractor will be held responsible for the preservation of original stakes and marks provided by the Owner at the beginning of the project, and if any of these stakes or marks are carelessly or willfully destroyed or disturbed by the Contractor, the cost of replacing them will be at Contractor's expense. The Owner will be responsible for the accuracy of the original lines and marks furnished to the Contractor.

4.6.1.1. Deleted.

4.6.2. Contractor shall be responsible thereafter for establishing the reference points and project monuments in accordance with the survey provided by Owner and laying out the Work, shall protect and preserve the reference points and project monuments, and shall make no changes or relocations without the prior written approval of Owner. Contractor shall be responsible for replacing the established reference points and project monuments, if affected during construction.

4.6.3. Contractor shall report to Owner's Representative whenever any reference point or project monument is lost or destroyed or requires relocation because of necessary changes in grades or locations and shall be responsible for the accurate replacement or relocation of such reference points or project monuments by professionally qualified personnel.

4.7.1. Reports, Studies and Drawings. Reference is made to the Scope of Work at the Agreement for the identification of those reports and drawings relating to a Hazardous Environmental Condition identified at the Site.

4.7.2. Limited Reliance by Contractor on Technical Data Provided. On lineal type projects, Contractor may rely upon the general accuracy of the 'technical data" contained in such reports and drawings, but such reports and drawings are not part of the Contract Documents. Such "technical data" is identified in the Technical Specifications. Except for such reliance on such "technical data", Contractor may not rely upon or make any Claim against Owner, or its Consultants with respect to:

4.7.3. Reliance by Contractor on Technical Specifications Provided. On building construction projects, unless otherwise indicated in the Contract Documents, Contractor may rely upon the general accuracy of the "technical data" contained in such Technical Specifications and/or Plans and Drawings. Except for such reliance on such "technical data", Contractor may not rely upon or make any Claim against Owner, its Consultants with respect to:

4.7.4. Contractor shall not be responsible for any Hazardous Environmental Condition uncovered or revealed at the Site that was not identified in the Contract Documents to be within the scope of the Work.

4.7.6.3. Contractor shall notify Owner's Representative and Owner promptly thereafter confirm such notice in writing, no later than 24 hours after the condition has been encountered. Failure to do so shall constitute a waiver of any claim in connection thereto.

4.7.9.1. was not indicated in the Contract Documents to be included within the scope of the Work, and

4.7.10. To the fullest extent permitted by Laws or Regulations, Contractor shall indemnify and hold harmless Owner's Representative, Owner, and the officers, directors, partners, employees, agents, other consultants, and subcontractors of each and any of them from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to a Hazardous Environmental Condition created by Contractor or by anyone for whom Contractor is responsible.

<u>The following paragraphs shall be read as follows:</u>

5.2.2. Before commencement of the Work, as specified in the Order to Proceed, the Owner shall inform the Contractor writing the name of the Owner's Infrastructure Area Director, Contracting Officer and Owner's Representative, if applicable. Owner reserves the right to change, from time to time, the designated persons or entities and any other designated representative who will perform the functions of the Owner.

5.6.1. If a dispute arises between the separate contractors in the Project as to their responsibility for cleaning up as required by these General Conditions, the Owner may, after written notice to Contractor, clean up and charge the cost thereof to the several contractors in the proportion that the Owner's Representative, determines equitable. If the Contractor is not in agreement with the cost distribution, he may make a claim as provided in Article 11.5.

The following paragraphs will be added as follows:

5.9 OWNER'S REPRESENTATIVE

5.9.1 Owner's Representative, through its authorized representatives, will provide general administration of the Contract, and will review and take other action as specified in the Contract Documents with respect to Submittals, and will monitor Construction of the Work.

5.9.2 Owner and Owner's Representative, and their respective authorized representatives, shall always have access to the Work wherever it is in preparation and progress. The Contractor will provide, at no cost to Owner, field facilities to the satisfaction of the Contracting Officer so that the Contracting Officer and Owner's Representative may perform their functions under the Contract Documents.

5.9.3 Owner's Representative will have authority to reject Work which does not conform to the Contract Documents. Whenever, in its reasonable opinion, it considers it necessary or advisable to ensure the proper implementation of the intent of the Contract Documents, Owner's Representative will have authority to require special inspection or testing of the Work, whether such Work shall be then fabricated, installed or completed. However, neither the authority of Owner's Representative to act under this Subsection 5.9.3, nor any decision made by it in good faith whether to exercise such authority, shall give rise to any duty or responsibility of Owner's Representative to the Contractor, any Subcontractor, or any Sub-Subcontractor, or any of their agents or employees, or any other person performing any of the Work, nor will the Contractor be relieved from any of its obligations under the Contract.

5.9.4 Owner's Representative will conduct inspections to determine the dates on which Substantial Completion and Final Completion occur and will receive and review written guarantees and other documents required as conditions precedent to Substantial Completion and Final Completion.

5.9.5 Owner's Representative will not be responsible for any acts or omissions of the Contractor, any Subcontractor or any Sub-Subcontractor, or any of their agents or employees, or any other persons performing any of the Work.

5.9.6 Owner's Representative shall have the right to stop the Work, in whole or in part, in an emergency or when such stoppage is necessary to insure safety or security of people or property; provided, however, the right of Owner's Representative to stop the Work in these circumstances shall not give rise to a duty on the part of Owner's Representative to exercise this right for the benefit of the Contractor or any person, nor to relieve the Contractor of its sole responsibility for safety and security at the Site.

The following paragraphs shall be read as follows:

6.1.1.1. Contractor shall be solely responsible for the means, methods, techniques, sequences, and procedures of construction. Contractor shall be responsible for its negligence in the design or specification

of a specific means, method, technique, sequence, or procedure of construction, which is shown or indicated in and expressly required by the drawings and specifications developed by Contractor.

6.1.1.1.1. When the drawings and specifications developed by Contractor and approved by Owner specify the use of a specific means, method, technique, sequence, or procedure of construction, which is shown or indicated in and expressly required by them, such means, method, technique, sequence, or procedure of construction shall be used unless others are authorized by the Owner's Representative.

6.1.2.1.1. All communications given or received from the Project Manager shall be binding on Contractor. All communications related to the Contract directed to the Contractor and/or proceeding from the Owner, Owner's Representative and other representatives of the Owner shall be made thru the Project Manager.

The following paragraphs will be added as follows:

6.1.2.1.2 MANAGEMENT PERSONNEL

Simultaneously with the execution of the Contract by the Contractor, the Contractor shall designate and describe, in writing to the Contracting Officer, the name, title, qualifications and experience of the proposed Contractor's Project Executive (who shall be the Contractor's Project Executive named in the Contractor Proposal unless otherwise directed or approved by the Contracting Officer). The Contractor's Project Executive shall have supervisory control over the Contractor's Project Manager and full authority to represent, bind and act for the Contractor with respect to any matters arising under the Contract. OWNER shall have the right, in its sole discretion, to approve, reject or to require replacement of the Contractor's Project Executive at any time.

The Contractor shall notify Owner's Representative, in writing, if the Contractor desires to change the Contractor's Project Manager, the Contractor's Project Executive or any senior staff member, and shall provide information in writing to the Contracting Officer as to the experience and qualifications of the proposed new Contractor's Project Manager, Contractor's Project Executive or any senior staff member, as the Contracting Officer may request. No change in the Contractor's Project Manager or Contractor's Project Executive or senior staff shall be made, however, without the Contracting Officer's prior written approval.

The Contractor shall employ a competent construction superintendent and necessary assistants who shall always attend the Site during Construction. The superintendent shall have full authority to act on behalf of the Contractor. The Contracting Officer may require the replacement of such personnel at any time. The Contractor shall coordinate and supervise the work of all Subcontractors and Sub-Subcontractors to the end that the Work is carried out without conflict between trades and so that no trade, at any time, causes delay to the general progress of the Work. The Contractor's Project Manager and, in his absence, the superintendent shall represent the Contractor, and communications given to the Contractor's Project Manager or the superintendent shall be as binding as if given to the Contractor directly. Communications may be confirmed in writing by PRDOH. Other communications shall be similarly confirmed on written requests in each case.

6.1.3 GENERAL

6.1.3.1 STANDARD OF PERFORMANCE

The Contractor shall perform all of the management, quality control, scheduling, procurement, construction,

installation and all other obligations set forth in, required by, or reasonably inferable from, the Contract Documents, in order to deliver a complete, fully operational and functional facility that meets or exceeds the requirements of Good Industry Practices and the standards established by, and other requirements of, the Contract Documents. The Contractor shall be solely responsible for constructing and installing all elements of the Work.

The following paragraphs shall replace Section 6.4.3 Scheduling Format as follows:

6.4.3 SCHEDULING

Contractor's Construction Scheduler

6.4.3.1 The Contractor shall employ or retain the services of a Construction Scheduler. The Construction Scheduler shall have at least five (5) years of verifiable experience as the person primarily responsible for preparing and maintaining detailed CPM schedules on projects of the same or similar size and nature as the Work. The Construction Scheduler shall attend all meetings pertaining to the scheduling and progress of the Work and any other meetings as may be scheduled by Owner.

6.4.3.2 Within five (5) Days after the date of issuance of the Notice to Proceed, the Contractor shall provide a written statement to Owner's Representative setting forth the following information:

1. identification, qualifications, and experience of the proposed Contractor's Construction Scheduler and all other members of the Contractor's scheduling staff; and

2. references of not less than two (2) previous projects on which the Contractor's Construction Scheduler has utilized CPM scheduling.

6.4.3.3 Owner's Representative reserves the right to reject any identified or proposed candidate for the Construction Scheduler and to require the Contractor to select another candidate acceptable to OWNER's Representative.

6.4.3.4 General Requirements for Progress Schedule. The Contractor shall prepare and submit for Owner's Representative's review and Conditional Acceptance a Contractor's Progress Schedule for the Work as previously described. The Progress Schedule shall show the full detail for the entire Work and once conditionally accepted by Owner's Representative, will become the baseline Project Schedule. The Progress Schedule shall be based upon a Work Breakdown Structure ("WBS") Level 6 and shall be a resource and cost-loaded schedule using the Critical Path Method of scheduling, providing monthly and long-term scheduling and cost control. It also should provide a basis for determining amounts of Progress Payments. The Progress Schedule shall be developed to provide for Progress Payments to be made on a schedule intended to compensate the Contractor for its costs incurred in performance of the Work on a reasonably current basis (sometimes referred to in the industry as "cash-flow neutral"), subject to the delays inherent in the payment process.

The Progress Schedule shall (a) include Scheduled Weather Delay Days, (b) be consistent with all milestone dates and completion dates specified in the Contract Documents, (c) be revised at the times required herein and at other appropriate intervals as required by the conditions of the Work, and (d) provide for expeditious and practicable execution of the Work. Owner's Representative's Conditional Acceptance of the Progress Schedule for the Work shall not constitute acceptance of construction means, methods,

techniques, sequences or procedures, for which the Contractor shall have sole responsibility. The Progress Schedule shall indicate the order, sequence, and interdependence of all activities that the Contractor plans to follow to accomplish the Work within the Contract Time, including authorized adjustments thereto. The Progress Schedule shall be comprehensive, orderly, and realistic, and shall cover activities onsite and offsite and activities of the school and other agencies that affect the Project.

The Contractor shall conform to the most recent Progress Schedule. The Contractor shall furnish sufficient forces, plant and equipment as may be necessary to insure the progress of the Work in accordance with the Progress Schedule. Without limiting OWNER's rights under Section 9.4.3, if the Contractor falls behind the Progress Schedule, the Contractor shall promptly submit to Owner's Representative an Updated Progress Schedule, demonstrating the manner in which the rate of progress shall be increased and shall take such steps as may be necessary to meet the Progress Schedule. The Contractor shall maintain its schedule so as not to delay the progress of the Work or the scheduled work of Other Contractors.

The Contractor shall, with each Application for Payment, submit an Updated Progress Schedule indicating the progress and sequence of the Work, in form acceptable to Owner's Representative.

The Contractor shall always provide adequate rates of progress for the various parts of the Work to properly advance the Work and so that the Work always meets the requirements of the Progress Schedule. Whenever Critical Path Activities fall behind the planned schedule of construction as shown on the Progress Schedule, or when activities which were not critical become critical, Owner's Representative shall be notified by the Contractor and advised of action being taken to return the Work to its original schedule and such action shall be indicated on an Updated Progress Schedule demonstrating the manner in which the rate of progress shall be increased and identifying the steps to be taken to recover lost time as may be necessary to meet the Progress Schedule.

6.4.3.5 Work Breakdown Structure (WBS)

The Contractor shall submit to Owner 's Representative for approval a detailed organized hierarchical division of the WBS for completing each portion of the Work. The WBS shall be the basis for organizing all Work under the Contract, and shall be used to structure the Progress Schedule, Submittal Schedule, and Schedule of Values and other cost control systems. The WBS shall be broken down into the following levels:

WBS Level 1 PROJECT
Work breakdown of the Project.

WBS Level 2 CONTRACT COMPONENT
Work breakdown into major components of the Contract.

WBS Level 3 SUBCOMPONENT
Work breakdown of the Contract components.

WBS Level 4 PHASE
Work breakdown into major phases of Work.

WBS Level 5 DISCIPLINES OF WORK
Work breakdown into Construction Disciplines.
Schedule of Values (Payment Schedule) Level.

WBS Level 6 DETAIL
Work breakdown defined by Contractor.

Progress Schedule Level.
Resource and Cost-Loaded.
Rolling 6 Month Schedule - To provide monthly schedule control.
Progressed and submitted on a monthly basis.

6.4.3.6 Scheduling System. The Contractor shall use Oracle Primavera P6 (Professional Project Management), and a hardware system commensurate with the size of the Project (the "Scheduling System"). The Scheduling System shall use the Critical Path Method and be capable of handling, processing, printing, and plotting data to satisfy all Owner's requirements. The Contractor shall maintain the Scheduling System, the Progress Schedule and Updated Progress Schedules, and the scheduling staff onsite or at a location approved by Owner's Representative.

6.4.3.7 Contents of Progress Schedule. The Progress Schedule shall:

6.4.3.7.1 Begin on the date of issuance of the Notice to Proceed and conclude with the date of Final Completion;

6.4.3.7.2 Identify Work on a calendar basis using Days as a unit of measure;

6.4.3.7.3 Show complete interdependence and sequence of construction and Work-related activities reasonably required to complete the Work;

6.4.3.7.4 Identify Work of separate stages and other logically grouped activities, and clearly identify the critical path of activities;

6.4.3.7.5 Reflect sequences of Work, restraints, delivery windows, review times, the Contract Time and Project Milestones as set forth in the Agreement.; and

6.4.3.7.6 Include, as applicable, the following activities:

6.4.3.7.6.1 Design deliverables

6.4.3.7.6.2 Time for obtaining permits, submittals for early product procurement and long lead time items.

6.4.3.7.6.3 Mobilization and other preliminary activities.

6.4.3.7.6.4 Initial site work.

6.4.3.7.6.5 Specified Work sequences, constraints, and Milestones, including date of Substantial Completion and trade Work.

6.4.3.7.6.6 Interfaces with Other Contractors.

6.4.3.7.6.7 Major equipment design, fabrication, factory testing, and delivery dates.

6.4.3.7.6.8 Site work.

6.4.3.7.6.9 Concrete work.

6.4.3.7.6.10 Structural steel work.

6.4.3.7.6.11 Architectural features work.

6.4.3.7.6.12 Conveying systems work.

6.4.3.7.6.13 Equipment work.

6.4.3.7.6.14 Mechanical work.

6.4.3.7.6.15 Electrical work.

6.4.3.7.6.16 Instrumentation and control work.

6.4.3.7.6.17 Interfaces with Owner -furnished equipment.

6.4.3.7.6.18 Other important work for each major facility.

6.4.3.7.6.19 Equipment and system startup and test activities.

6.4.3.7.6.20 Project closeout and cleanup.

6.4.3.7.6.21 Demobilization.

6.4.3.8 Progress Schedule Graphical Display. The graphical display for the Progress Schedule shall be furnished to OWNER's Representative on a Primavera P3 diskette and shall:

6.4.3.8.1 Plot or print on paper not greater than 30 inches by 42 inches or smaller than 22 inches by 34 inches, unless otherwise approved.

6.4.3.8.2 Include a title block indicating the name of the Project, Owner, date submitted, revision or update number, and the name of the scheduler. Updated Progress Schedules shall indicate data date.

6.4.3.8.3 Identify horizontally across the top of the schedule the time frame by year, month, and day.

6.4.3.8.4 Identify each activity with a unique number and a brief description of the Work associated with that activity.

6.4.3.8.5 Indicate the Critical Path.

6.4.3.8.6 Show, at a minimum, the controlling relationships between activities.

6.4.3.8.7 Plot activities on a time-scaled basis, with the length of each activity proportional to the current estimate of the duration.

6.4.3.8.8 Plot activities on an early start basis unless otherwise requested by OWNER's Representative.

6.4.3.8.9 Provide a legend to describe standard and special symbols used.

6.4.3.9 Progress Schedule Report. The Contractor shall submit a Progress Schedule Report with the Progress Schedule and with each Updated Progress Schedule. The Progress Schedule Report shall be printed on 8-1/2 inches by 11-inch white paper, unless otherwise approved by Owner's Representative. The Progress Schedule Report shall provide information for each activity in tabular format, including, at a minimum:

6.4.3.9.1 Activity Identification Number.

6.4.3.9.2 Activity Description.

6.4.3.9.3 Original Duration.

6.4.3.9.4 Remaining Duration.

6.4.3.9.5 Early Start Date (actual start on Updated Progress Schedules).

6.4.3.9.6 Early Finish Date (actual finish on Updated Progress Schedules).

6.4.3.9.7 Late Start Date.

6.4.3.9.8 Late Finish Date.

6.4.3.9.9 Total Float.

6.4.3.10 Float Time. Float time (whether identified in the initial Progress Schedule or in any Updated Progress Schedule) is a Project resource available to both the Contractor and to Owner to meet Milestones and the Contract Time. Use of float suppression techniques such as preferential sequencing or logic, special lead/lag logic restraints, and extended activity times are prohibited.

The use of float time disclosed or implied using alternate float suppression techniques shall be shared to the proportionate benefit of Owner and the Contractor.

6.4.3.1 Review and Conditional Acceptance of Progress Schedule. Not later than thirty (30) Days after the date of issuance of the Notice to Proceed, the Contractor shall submit to Owner's Representative for review, comment and Conditional Acceptance a Progress Schedule for the entire Contract Time. The proposed Progress Schedule shall be reviewed for purposes of determining (a) compliance with applicable provisions of the Contract Documents, (b) whether the logic of the proposed Progress Schedule is sound and consistently developed and demonstrates a logical sequencing and interdependence of activities required for the timely and orderly achievement of all Work activities and Milestones, including Substantial Completion and Final Completion of the Work within the Contract Time, and (c) whether float suppression techniques have been employed by the Contractor. Upon its Conditional Acceptance, such Progress Schedule will be employed by the Contractor in its scheduling and performance of the Work.

When conditionally accepted, the Progress Schedule shall become the schedule against which all progress and revisions shall be measured. The Contractor shall revise the Progress Schedule to reflect actual progress and the Contractor's current plan for completion of the Work for the remainder of the Contract Time and submit the Updated Progress Schedule to Owner's Representative for review, comment or Conditional Acceptance. As a condition precedent to Final Completion, the Contractor shall prepare and furnish to Owner's Representative a final as- built Progress Schedule.

The following paragraphs shall be read as follows:

6.4.4.5.1. Unless otherwise provided in the Contract Documents, at least ten (10) days before submission of the Application for Payment, a conference, to be attended by Contractor, Owner's Representative and others as appropriate, will be held to review for purposes of acceptability to Owner's Representative, as provided below, the progress schedules submitted in accordance with Article 6.4.4.1.

6.5.1.1. The Contractor shall submit all submittals already approved by its Architect/Engineer for approvals of Materials, Shop Drawings and Samples to the Owner's Representative. The Owner's Representative will either perform the review and approval or forward the Contractor's submittal to the Owner for his review and approval, in accordance with the accepted itinerary for Shop Drawings and Sample submittals.

6.5.1.4. The Owner's Representative shall have the following deadlines within which to approve, request additional information or reject any Submittal for Approval of Materials, Shop Drawings and Samples:

6.5.1.4.1. For Materials, Shop Drawings or Samples which are the ones specified in the Contract Documents or are, in the opinion of the Owner's Representative, non-complex Shop Drawings or Materials, the Owner's Representative shall have a period of ten (10) working days.

6.5.1.4.3. If no comment by the Owner's Representative is made within said period, the Contractor will have the right to Claim if said delay impacts the critical path.

6.5.1.4.4. The above-mentioned deadlines can be extended if requested in writing by the Owner's Representative if approval is made within a period that does not alter the critical path. Such request for extension shall not be unreasonably denied.

6.5.2. Where approval of Materials, Shop Drawing or Samples is required by the Contract Documents or the schedule of Shop Drawings and Sample submittals, any related Work performed, including materials purchases, prior to Owner and Owner's Representative review and approval of the pertinent submittal will be at the sole responsibility of Contractor.

6.5.4 OWNER OR OWNER'S REPRESENTATIVE'S REVIEW

6.5.4.1. Owner's Representative, either himself or through the Owner, will perform a timely review, evaluation and comment on Shop Drawings and Samples in accordance with the schedule of Shop Drawings and Sample submittals acceptable to Owner's Representative.

6.5.4.1.1. Owner or the Owner's Representative review and approval will be only to determine if the items covered by the submittals will, after installation or incorporation in the Work, conform to the information given in the Contract Documents and approved drawings and specifications developed by Contractor and be compatible with the design concept of the completed Project as a functioning whole as indicated by the Contract Documents.

6.5.4.1.2. Owner or the Owner's Representative's review and approval will not extend to means, methods, techniques, sequences, or procedures of construction (except where a particular means, method, technique, sequence, or procedure of construction is specifically and expressly called for by the Contract Documents or approved drawings and specifications developed by Contractor) or to safety precautions or programs incident thereto.

6.5.4.1.3. Owner or the Owner's Representative's review and approval of Shop Drawings or Samples shall not relieve Contractor from responsibility for any variation from the requirements of the Contract Documents unless Contractor has in writing called the Owner's Representative attention to each such variation at the time of each submittal as required by Article 6.17 and the Owner's Representative has given written approval of each such variation by specific written notation thereof incorporated in or accompanying the Shop Drawing or Sample approval; nor will any approval by the Owner's Representative relieve Contractor from responsibility for complying with the requirements of Article 6.17.

6.5.5. RE-SUBMITTAL PROCEDURES

6.5.5.1. Contractor shall make corrections required by the Owner's Representative and shall return the required copies of materials, submittals, the required number of corrected copies of Shop Drawings and submit as required new Samples for review and approval.

6.5.8.1. Owner's Representative will be allowed a reasonable time, which will not unreasonably delay the critical path of the Work, within which to evaluate each proposal or submittal made pursuant to Article 6.5.

6.6.1. The Contractor shall carefully study and compare the Contract Documents with each other and with information furnished by the Owner and shall at once report to the Owner and Owner's Representative any error, inconsistency or omission he may discover.

6.6.1.1. The Contractor shall not be liable to the Owner for any errors, inconsistencies or omissions in the Contract Documents but is liable to any conflict, ambiguity, errors, omissions or defects on drawings and specifications developed by the Contractor.

6.7.2. If a particular invention, design, process, product, or device is specified in the Contract Documents for use in the performance of the Work and if to the actual knowledge of Owner its use is subject to patent rights or copyrights calling for the payment of any license fee or royalty to others, the existence of such rights shall be disclosed by Owner in the Contract Documents.

6.7.3. To the fullest extent permitted by Laws and Regulations, Contractor shall indemnify and hold harmless Owner, Owner's Representatives, and the officers, directors, partners, employees or agents, and other consultants of each and any of them from and against all claims, costs, losses, and damages (including but not limited to all fees and charges or engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to any infringement of patent

rights or copyrights incident to the use in the performance of the Work or resulting from the incorporation in the Work of any invention, design, process, product, or device not specified in the Contract Documents.

6.9.1.1. Except where otherwise expressly required by applicable Laws and Regulations, neither Owner, nor Owner's Representative shall be responsible for monitoring Contractor's compliance with any Laws or Regulations.

6.11.1.1.3. To the fullest extent permitted by Laws and Regulations, Contractor shall indemnify and hold Owner, Owner's Representative and the officers, directors, partners, employees, agents, and other consultants of each and any of them harmless from and against all claims, costs, losses, and damages (including but not limited to all fees and charges or engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to any claim or action, legal or equitable, brought by any such Owner or occupant against Owner, Owner's Representatives or any other party indemnified hereunder to the extent caused by or based upon Contractor's performance of the Work.

6.12.1.1 Said documents together with all approved Samples and a counterpart of all approved Shop Drawings will be available to the Owner's Representative.

6.13.1. The Contractor shall be fully responsible for initiating, maintaining enforcing and supervising all safety and security precautions and programs in connection with the performance of the Contract, including, but not limited to, compliance by the Contractor, all Subcontractors and Sub-Subcontractors with all occupational safety standards and regulations required by the Occupational Safety and Health Act, other Applicable Laws, the Contract Documents, and any insurance carrier providing insurance coverage for Owner or the Contractor in connection with the Project. Without limiting the generality of the foregoing, the Contractor shall, prior to commencement of Construction, prepare a written Construction Safety and Security Plan which shall be submitted to Owner and issued to all Subcontractors and all forces employed on the Work. Such program shall include weekly safety meetings with employees and subcontractors, and the Contractor shall prepare, circulate and maintain on file at the Site minutes and attendance of all safety meetings and comply with the program. The Construction Safety Program besides the Occupational Safety and Health Act, shall include responsibility levels and disciplinary action for employees and Subcontractors not following the Safety Program. Such programs shall include but not limited to, job hazard analysis, fall protection program, excavation safety program, scaffolds safety program, electrical safety program, lock out tag out program, confined spaces entry program, stairs and ladder safety program, cranes safety, hand powered tools safety, housekeeping and hygiene program, hazard communication program, emergency and fire prevention program, personal protective equipment program, employees and subcontractors disciplinary action program or other safety program as required by the applicable construction activities, OSHA regulations in 29 CFR 1926, 1910, and the Puerto Rico Occupational Safety and Health Act. Contractors shall take all necessary precautions for the safety of, and shall provide the necessary protection to prevent damage, injury or loss to:

6.13.1.1. all people, subcontractors, sub-subcontractors on the Site who may be affected by the Work;

The following paragraphs shall be read as follows:

6.13.2.2. All damage, injury, or loss to any property referred to in Articles 6.13.1.2 or 6.13.1.3 caused, directly or indirectly, in whole or in part, by Contractor any Subcontractor, Supplier, or any other individual or entity directly or indirectly employed by any of them to perform any of the Work, or anyone for whose acts any of them may be liable, shall be remedied by Contractor (except damage or loss attributable to the fault of Drawings or Specifications or to the acts or omissions of Owner or Owner's Representative, or

anyone employed by any of them, or anyone for whose acts any of them may be liable, and not attributable, directly or indirectly, in whole or in part, to the fault or negligence of Contractor or any Subcontractor, Supplier, or other individual or entity directly or indirectly employed by any of them).

The following paragraphs will be added as follows:

6.13.4 The general contractor shall submit the safety program to the Owner to verify if it contains the minimum OSHA 29 CFR 1926, 1910 and the Puerto Rico Occupational Safety and Health Act requirements applicable to the Project or other codes or regulations by reference.

The following paragraphs shall be read as follows:

6.14.1 Contractor shall designate a qualified experienced safety representative at the Site whose duties and responsibilities shall be the prevention of accidents and maintaining and supervising safety precautions and programs. The Safety representative main activity shall be the implementation of the Contractor safety program.

The following paragraphs will be added as follows:

6.14.1.1 The Contractor shall designate a member of the Contractor's organization assigned at the Site, experienced in OSHA construction safety standards by formal training and safety, who shall be present at the Project during days of construction work activities, who shall report directly to the Contractor's Project Executive, and who will have as his primary responsibility, implementation of the Contractor's safety plan, and the implementation of a security program to provide for, at a minimum:

6.14.1.1.1 security requirements and procedures to address responding to, and protecting against, acts of crime, trespassing and vandalism, and lost or stolen equipment and materials from the Site;

6.14.1.1.2 procedures for Site safety; employee and visitor Site security and in-progress construction security; and

6.14.1.1.3 implementation of security perimeters and implementation of security measures at the Site, such as fencing, and lighting.

6.14.1.1.4 the designated safety and security member shall have a minimum of 3 years of experience and documented safety education similar to the OSHA 30 hours training for construction.

6.14.1.1.5 the designated safety and security representative can perform other activities only at the project site or premises. Neither the Owner nor the project engineer maybe designated as the safety representative.

The following paragraphs shall be read as follows:

6.16.1.1. The detailed Plans and Specifications for the Project have been prepared by licensed and collegiate competent Architect/Engineer exercising reasonable care and are intended to show as clearly as is practicable the Work required to be performed. Contractor will be responsible on the accuracy of said drawings, specifically and their compliance with all applicable codes and regulations in effect on the bid opening date.

6.19.2.1. observations by Designated Inspector and/or Owner's Representative;

6.20.1. To the fullest extent permitted by Laws and Regulations, Contractor shall indemnify and hold harmless Owner, Owner's Representative, and the officers, directors, partners, employees, agents, and other consultants and subcontractors of each and any of them from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out or relating to the performance of the Work, provided that any such claim, cost, loss, or damage:

6.20.2, 6.20.2.1 and **6.20.2.2** Deleted.

6.21.1.1.3.2. No acceptance by Owner's Representative of any such Subcontractor, Supplier, or other individual or entity, whether initially, or as a replacement, shall constitute a waiver of any right of Owner's Representative or Designated Inspector to reject defective Work.

6.21.5. Contractor shall be fully responsible to Owner's Representative and Owner for all acts and omissions of the Subcontractors, Suppliers, and other such individuals or entities performing or furnishing any of the Work.

6.21.5.1. Nothing in the Contract Documents shall create for the benefit of any Subcontractor or Supplier a contractual relationship between Owner's Representative or Owner, nor shall it create any obligation on the part of Owner's Representative or Owner to pay or to see to the payment of any moneys due any such Subcontractor, Supplier, or other individual or entity except as may otherwise be required by Laws or Regulations.

6.21.8.1. Whenever any such agreement is with a Subcontractor who is listed as an additional insured on the property insurance provided in section 3.6, the agreement between the Contractor and the Subcontractor or Supplier will contain provisions whereby the Subcontractor or Supplier waives all rights (including subrogation) against Owner, Contractor, Owner's Representative, and all other individuals or entities identified in the Contract Documents to be listed as insured or additional insured (and the officers, directors, partners, employees, agents, and other consultants and subcontractors of each and any of them) for all losses and damages caused by, arising out of, relating to, or resulting from any of the perils or causes of loss covered by such policies and any other property insurance applicable to Work.

The following paragraphs will be added as follows:

6.22 UTILITY WORK

6.22.1 UTILITY FACILITIES

Owner makes no representation or warranty that the utility facilities ("utilities" or "utility facilities") shown or otherwise referred to in the Contract Documents are in the locations indicated or are the only utility facilities that may be encountered. Prior to commencing the Work, the Contractor shall visit the Site and shall confirm the existence and location of all utility facilities and shall, during the course of the Work, make diligent and continuous efforts to confirm the locations of all utility facilities at and adjacent to the Site. The Contractor shall make necessary arrangements with, and obtain approvals from, utility companies for the design, protection, alteration and relocation of utility facilities which may be necessary in connection with performance of the Work, as hereafter provided, and shall notify all municipal departments and utility companies concerned of the time and location of any work which may affect them. The Contractor shall be responsible for all costs and all claims, damages and liabilities arising directly or indirectly from any

damage to utility facilities or any intentional or unintentional interruption of service occurring in connection with the Work or other operations of the Contractor.

6.22.2 RESPONSIBILITY FOR RELOCATION OF UTILITIES

Except as expressly otherwise provided below, the Contractor shall be solely responsible for the temporary or permanent relocation of all existing utilities, public and private, located on, over, under or adjacent to the Site, which conflict with, or are affected by, the construction and installation of the Work, and for obtaining all related approvals required from utility companies.

The utilities to be relocated, replaced or rehabilitated shall include, without limitation, all electric power, telephone, cable television, telecommunication, gas, petroleum products, water, sewer, storm drain, irrigation, steam, and similar lines and facilities located within the Site, whether located on the surface, underground or overhead, and whether indicated in the Contract Documents, Drawings and Specifications developed by Contractor or discovered during performance of the Work.

The Contractor shall use its best efforts to relocate or cause the existing utilities to be relocated in the most expeditious manner, with the least damage to existing trees and shrubbery and the operations of the affected utility company and its customers. The Contractor shall comply with all Applicable Laws, easements or other agreements governing or relating to the existing utilities, and with any provisions thereof relating to relocation of such utilities. The Contract Price includes all the Contractor's costs, expenses, overhead and profit for all private utility relocation Work and public utility relocation work. The Contractor shall be responsible for informing and reporting the list of existing public utilities in the Project area. If Contractor should interrupt or cause damage to any public utility, he shall be held responsible or accountable for such interruption or damages and the full cost of repairing and restoring the same. The Contractor shall be responsible for overviewing and receiving all claims as stated in Section 6.22.2.

6.22.3 PRIVATE UTILITIES

With respect to cable television, telephone and other privately-owned utilities, the Contractor shall notify such utility company of the need to relocate such utility at the private utility company's expense, the acceptable locations for the relocated utility and the necessary timetable for such relocation for the Work to proceed in accordance with the Contractor's Progress Schedule. The Contractor shall cooperate and coordinate with the private utility company to cause the relocation work for such company to occur in accordance with the Contractor's Progress Schedule. If necessary, the Contractor, himself, shall relocate the utilities. The Contractor shall be responsible for informing and reporting the list of existing private utilities in the Project area. If Contractor should interrupt or cause damage to any private utility, he shall be held responsible or accountable for such interruption or damages and the full cost of repairing and restoring the same. The Contractor shall be responsible for the overview of and receiving of all claims as stated in Section 6.22.3.

With respect to the relocation of telephone lines, the Contractor shall be responsible for all construction and installation work required to relocate the telephone utility lines and all related work using contractors approved by the telephone company, except for work involving splicing of fiber optic cables (which shall be performed by the telephone company). The Contractor shall be responsible for causing the telephone company to perform all work necessary to splice fiber optic cables.

The Contractor shall be responsible for obtaining reimbursement from the private utility companies for all costs, equipment rental, labor or other charges or fees incurred by the Contractor, any Subcontractor or Sub-Subcontractor and any mark-up or profit of the Contractor, any Subcontractor or Sub-Subcontractor in
