Network" providers. Additional Provider and Network files content requirements were added, for required fields that are unavailable for "Out of

New descriptions and/or validation rules were added to the CLAIMSERVICES Input File Layout, applicable to GHIP and Government Employee Carriers.

CARRIER CODES, PLAN VERSION LIST and Place of Service Codes were modified

Version 4.0C

Claims Transaction Handling requirements were modified for reversals and adjustments

Data File Naming Conventions requirements were modified.

Provider and Network files descriptions and/or validation rules were changed for required fields that are unavailable for providers/groups that do not qualify for an NPI.

Encounter Lag Reports requirements were added.

Capitation Adjustments specifications and Capitation Input File Layout fields were modified

CLAIMSERVICES Input File Layout new field added, and field description was modified

ATTACHMENT II - CARRIER CODES - updated

Carrier to ASES Data Submissions File Layouts

Introduction

de Salud (ASES) was established. In order to continuously review health care utilization, expenditures, and performance in Puerto Rico to submit their health care claims, network, provider, IPA, and capitation data to ASES many years to populate in the data warehouse and other systems. This layout document provides health insurance carriers information provide ASES with a data warehouse and analytics system. ASES has been capturing data from its managed care health carriers for and to enhance the ability of ASES to make informed and cost-effective health care choices, ASES has partnered with Milliman, Inc. to The island of Puerto Rico's Medicaid program, the Government Health Plan (GHP) was established in 1993 with the passing of Law Through Law 72, the program to administer the Medicaid program for roughly 1.3 Milliman people, the Administración de Seguros

Claims Transaction Handling

claims, held, rejected, or pre-adjudicated claims. Claims reversals and adjustments happen as follows: of an adjudicated claim line are accepted in the CLAIMSERVICES file. Do not send claims that are in an open status, such as pended All Claims files are to be submitted on a monthly basis, for all Claims PAID in the month of the file submitted. All adjustments

Paid or Denied FFS Claims

of 'A' or 'R', while the original claim has a status code of 'P' for paid, 'D' for denied claims, or 'E' for encounter claims. The adjusted or reversed service. Individual service lines are adjusted or reversed at the line level with additional adjustment services marked with a claim line status code

must include the claim id of the original claim to be adjusted or reversed, at the field named Original Claim Id Number, and may have the same claim ID and line number or a different claim ID and line number

Encounter Claims

of 'E' and the claim ID and service line number must be the same as the encounter being adjusted. Our process will remove the original needs to be updated to change any of the fields of the encounter, the adjusting claim must have a claim line status code (sv_stat field) Claims representing encounters have no allowed or paid amounts and are therefore not able to be adjusted monetarily. If an encounter

encounter so that duplicate encounters will not be counted in the data.

specifically for the following fields: Capitation Amount, Gross Capitation Amount, Net Capitation Amount, Capitation Days and Member for that particular date will be the aggregate of all the records and this example will result in \$0.00. Net Capitation Amount, Capitation Days and Capitation Percent fields as well. Inside MedInsight the capitation for that Provider but with a new Capitation Date, a Capitation Amount of -\$10.00, and the corresponding adjustments to the Gross Capitation Amount Capitation Percent. If a capitation of \$10.00 is to be reversed then the new record should contain the same information as the origina for the provider / member / experience date with the amount(s) to be added or subtracted from the previously reported amount(s)

Note that, as Capitation net amounts for any particular record may be negative, a reversal in such a case would be a positive amount.

Data Validation and Audit Process

established levels defined by ASES and Milliman. data audit process will be rejected. Load threshold levels for individual data elements submitted are validated against those prethe format and content of each submitted file is valid and complete. Monthly files that do not pass the reconciliation process and the After the files are loaded, Milliman will employ an automated validation process, File Field and Quality Checks (FFQC), to ensure that

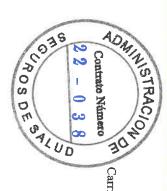

to ensure the name is distinct from the rejected file and is named in the correct order. month's files become due. Such re-submitted files must be carefully named using the sequence number part of the naming convention from such a file will be retained in the system and the carrier will be required to re-submit the rejected file in its entirety before the next Failure to conform to any of the submission requirements will result in the rejection and return of the applicable data file(s). No records

within the file. Partial replacement files or record specific corrections will not be accepted. Due to the large amount and complexity of the data processed, it is more efficient to resubmit an entire file rather than to correct data

Claims, Capitation and Encounter Lag Reports

encounter claims data that do not match the lag reports on record counts within a reasonable percentage will be deemed invalid and must will be used to reconcile the data submitted. Claims and capitation data that do not match the lag reports on paid amount, and/or be corrected Carriers are required to submit encounter, claims and capitation payment reports, called lag reports, on a monthly basis. These reports

Version 4.0C

Carrier to ASES Data Submissions
File Layouts
Page 10 of 104

De)

either from another source that the actual files that are submitted, or to verify that the lag reports tie to financial reports. purposes, including negotiations or other financial analyses. Therefore, it is in the carrier's best interests to produce lag reports that are The claims and capitation lag reports submitted by the carrier will be considered to be financially accurate and may be used for other

The required claims lag reports need to be an Excel file with the following characteristics:

- Claims paid amounts by:
- Region code of member as defined by ASES
- Incurred month with deliverable data format YYYYMM,
- Paid month with deliverable data format YYYYMM, and
- Claim type for claims, where can be filled in with one of the following default values: Medical, Pharmacy and Dental.
- The report must include at least all paid and incurred months going back 2 full years prior to the month the report is run.
- Naming of the claims lag reports should be as follows:

CLAIMLAG_ccyymms.xls(x)

Carrier to ASES Data Submissions File Layouts

Page 13 of 104

Version 4.0C

Primary Carrier ID

Input File is the carrier providing services to the enrollees. If this entity does not have an assigned carrier ID from ASES, the Primary Input File will contain the same value in the Carrier ID and Primary Carrier ID fields when the carrier generating the ClaimServices contains the ID of the carrier directly contracted with ASES and the one generating the ClaimServices Input File. The ClaimServices which provides services to the enrollees throughout a special or capitated financial arrangement. Another field called Carrier ID field Carrier ID can be filled in with one of the following 4 default values that represents the type of entity: The Primary Carrier ID field in the ClaimServices Input File Layout identifies the entity (MBHO, Sub Contractor Entity, or TPA)

MH – Mental Health

VS – Vision

DN – Dental OT – Other/Unknown

General Notes on Field Level Requirements

zero (0). Date fields must contain a valid date with months between 01 and 12 and days between 01 and maximum day in month. July where YYYY = 4 digit year, MM = 2 digit month and DD = 2 digit day. I digit month and day values must always have the leading 1, 2006 will be coded as 20060701. Date Fields - All date fields in the following data layout are defined to the same size and format as YYYYMMDD. An 8 byte field

are always right justified and zero filled to the left. As examples: represents and implied decimal point. This allows a maximum of 7 digits for dollars plus the last two digits for cents. These numbers Amount Fields – All amount fields representing money must be numeric and are defined as 9 bytes in the format s9(7)v99 where v

\$1.23 will be coded as 000000123 \$100.00 will be coded as 000010000

All amount fields are positive and follow the above definition unless clearly specified otherwise

may be empty. The fixed End of Record Filler guarantees that all records in a file can be constructed to the fixed length format as character. This is done to avoid issues between different systems when generating and transferring ASCII files in which ending field defined in the layouts. End of Record Filler - All file layouts have been designed to end with a filler field of 1 byte which must always be coded as an "*"

other methods can be used, it is felt that this provides the best common ground for working with multiple entities each of which uses given to help keep this concept clear. varying systems. To be sure everyone understands the same about the comments on justification and filling the following examples are Justification and filling of Fields – The layouts have all been specified to provide fixed length fields and fixed length records. While

specified as numeric such a s9(7)v99 the following conventions apply: documentation of the layouts. Typically numeric field are right justified and to keep them numeric must be zero filled. All numeric fields must be filled completely with numeric digits. If there are exceptions these are clearly spelled out in the In a field

- s Leading sign
- 9(7) 7 decimal digits
- v Implied decimal point
- 99 2 digits after the implied decimal point

The following examples illustrate how data will look in the field:

-1,234.56	1,000,000	1,234.56	101	12.50	Value
-00123456	100000000	000123456	000010100	000001250	Field

Carrier to ASES Data Submissions File Layouts

Page 15 of 104

and make reading, loading and validation of the data difficult. Typically alphanumeric field are left justified and filled to the right with the field where the [] characters represent the start and end of the field – blanks to complete the field. In a field specified as alphanumeric such a X(20) the following examples illustrate how data will look in taken to ensure that the field is filled with blanks. Allowing "NULLS" or other special characters through may cause unexpected results All alphanumeric fields must be filled completely. If the value of data in the field is less than the width of the field then care must be

(Metro-North Regi	blanks	José Rivera	P.R.	<u>Value</u>
ion) [(Metro-North]	[José Rivera	[P.R.	Field
