## Preface

The purpose of this document is to describe how the folders are organized in the ASES Enterprise File Transfer (EFT) solution for the Data Exchange between ASES and the Insurance Carriers.

ASES EFT solution is also known as "*ASES Secure FTP*" and it's currently contracted with CITRIX which uses a secure FTP protocol.

Some Insurance Carriers used a different folder organization in the past. Please note that this will no longer be supported:

#### Other Guidelines

- No Entity other than ASES should create folders or subfolders without the written authorization of ASES, as they will be deleted without prior notice and files placed in a folder not authorized by ASES will not be considered received.

- For Test environments the folder structure will be the same as the Production Environment, except that the root folder will be as follows:

- For QA Tests the root folder is:

- FTP\_ASES\_TEST

- For other required tests that are used in parallel, a specific structure can be created using a number after the word TEST, this environment will be created on demand.

Example of root folders:

- FTP\_ASES\_TEST01

- FTP\_ASES\_TEST02
