Written notice of the disposition of the Grievance as expeditiously as the Enrollee’s health condition requires, but in any event, within ninety (90) Calendar Days from the day the Contractor receives the Grievance.

Topic V. Availability, Accessibility and Network Adequacy

Network Adequacy

Number	Indicator	Response
C1V.1	Gaps/challenges in network adequacy What are the state's biggest challenges? Describe any challenges MCPs have maintaining adequate networks and meeting access standards. If the state and MCPs did not encounter any challenges, please enter "No challenges were encountered" as your response. "N/A" is not an acceptable response.	Vieques and Culebra are extremely remote island municipalities and residents are challenged to see providers in a timely manner due to travel restrictions. There are overall network challenges due to a lack of available providers. Challenges include providers leaving the island for the mainland and difficulty with transportation and infrastructure in parts of the island.

C1V.2**State response to gaps in network adequacy**

How does the state work with MCPs to address gaps in network adequacy?

"The state has required the Contractor to ensure that residents of these municipalities receive Preferential Turns when seeing providers, meaning they will receive priority when seeing a provider due to the distance required to travel to seek medical attention. MCPs are also encouraging providers to use telemedicine to address gaps in services where appropriate. Since the COVID-19 pandemic in 2020, the providers have increased their infrastructure to provide services via telehealth. The MCOs have engaged in a variety of efforts from care management to streamlined provider enrollment and engagement with the School of Medicine to combat provider reluctance to join the Medicaid network. Some key efforts include tax credits for newly graduated students, free office space, and reduced paperwork for provider enrollment, with increased technical assistance from MCO staff to reduce the administrative burden of tasks such as credentialing. Although some efforts have been productive, others, such as the expansion of telehealth and broadband internet access, will take additional resources and time to fully demonstrate intervention success or failure. Multi-specialty clinics are one way MCOs have worked to address the availability of specialist care in integrated care settings, by providing primary and specialty care in one location. Multi-specialty options allow for optimal leveraging of specialists, especially in less densely populated areas, creating more of a one stop shopping opportunity to enrollees."

Access Measures

Describe the measures the state uses to monitor availability, accessibility, and network adequacy. Report at the program level.

Revisions to the Medicaid managed care regulations in 2016 and 2020 built on existing requirements that managed care plans maintain provider networks sufficient to ensure adequate access to covered services by: (1) requiring states to develop quantitative network adequacy standards for at least eight specified provider types if covered under the contract, and to make these standards available online; (2) strengthening network adequacy monitoring requirements; and (3) addressing the needs of people with long-term care service needs (42 CFR 438.66; 42 CFR 438.68).

42 CFR 438.66(e) specifies that the MCPAR must provide information on and an assessment of the availability and accessibility of covered services within the MCO, PHIP, or PAHP contracts, including network adequacy standards for each managed care program.

The appeal and critical incident do not have to have been "related" to the same issue - they only need to have been filed by (or on behalf of) the same enrollee. Neither the critical incident nor the appeal need to have been filed in relation to delivery of LTSS — they may have been filed for any reason, related to any service received (or desired) by an LTSS user. To calculate this number, states or managed care plans should first identify the LTSS users for whom critical incidents were filed during the reporting year, then determine whether those enrollees had filed an appeal during the reporting year, and whether the filing of the appeal preceded the filing of the critical incident.

Topic VIII. Sanctions

Describe sanctions that the state has issued for each plan. Report all known actions across the following domains: sanctions, administrative penalties, corrective action plans, other. The state should include all sanctions the state issued regardless of what entity identified the non-compliance (e.g. the state, an auditing body, the plan, a contracted entity like an external quality review organization).

42 CFR 438.66(e)(2)(viii) specifies that the MCPAR include the results of any sanctions or corrective action plans imposed by the State or other formal or informal intervention with a contracted MCO, PIHP, PAHP, or PCCM entity to improve performance.
