## 1 Introduction

### NCPDP – NATIONAL COUNCIL FOR PRESCRIPTION DRUG PROGRAMS

The Health Insurance Portability and Accountability Act (HIPAA) of 1996 carries provisions for administrative simplification. This requires the Secretary of the Department of Health and Human Services (HHS) to adopt standards to support the electronic exchange of administrative and financial health care transactions primarily between health care providers and issuers. HIPAA directs the Secretary to adopt standards for transactions to enable health information to be exchanged electronically and to adopt specifications for implementing each standard.

The National Council for Prescription Drug Programs (NCPDP) is a non-profit organization formed in 1976. It is dedicated to the development and dissemination of voluntary consensus standards that are necessary to transfer information that is used to administer the prescription drug benefit program.

Refer to the NCPDP Post Adjudication Version 4.2 documents (NCPDP Post Adjudication Standard Implementation Guide (IG), Data Dictionary, and External Code List) for more detailed information on field values and segments.

The following information is intended to serve only as a Companion Guide to the aforementioned NCPDP Post Adjudication Standard Version 4.2 documents. The use of this Companion Guide is solely for the purpose of clarification. The information describes specific requirements to be used for processing data. This Companion Guide supplements, but does not contradict, any requirements in the NCPDP Post Adjudication Standard Version 4.2 Implementation Guide and related documents.

To request a copy of the NCPDP Standard Formats or for more information contact the National Council for Prescription Drug Programs, Inc. at [www.ncdpd.org](http://www.ncdpd.org). The contact information is as follows:

This section describes how the NCPDP Post Adjudication (4.2) Implementation Guides (IGs) will be detailed with the use of a table. The table contains a row for each element/field of the NCPDP Post Adjudication V4.2 records.

Each row will indicate whether the element/field is required or is not required by PRMMIS.

## 2 NCPDP Post Adjudication Transaction Standard Version 4.2 File Information

The batch specifications contained in this document include the header, detail, compound, and trailer segments. Batch files should contain one header record, one trailer record, and a maximum of 200,000 transaction details.

- Post Adjudication History Header (Occurs 1)
- Post Adjudication History Detail (Occurs 1 to 200,000)
- Post Adjudication History Compound Detail 1 (Occurs 1 as Applicable with Detail Record)
- Post Adjudication History Compound Detail 2 (Occurs 1 as Applicable with Detail Record)
- Post Adjudication History Trailer (Occurs 1)

**Note:** All ingredients in a Compound detail should be consecutive and contiguous to each other; gaps or holes in the sequence are not accepted. Also, only send a Compound Detail 2 record if and only if Compound Detail 1 has all 8 ingredients already set up, and more ingredients or components are required.

Batch files should have a creation date in the batch header that is valid and less than 30 days old from the submission date of the file, or the file will be rejected. Values in the header and trailer will be edited to verify that they contain appropriate values.

### 2.1 Record Delimiter

The V4.2 Post Adjudication V4.2 record is 3,700 characters followed by a Carriage return only – UNIX-based system (record length n+1).
