All rights reserved. It may be freely redistributed in its entirety provided that this copyright notice is not removed. It may not be sold for profit or used in commercial documents without the written permission of the copyright holder. This guide is provided "as is" without any express or implied warranty. Note that the copyright on the underlying ASC X12 Standards is held by DISA on behalf of ASC X12.

This document can be reproduced and/or distributed; however, its ownership by the Puerto Rico Department of Health must be acknowledged and the contents must not be modified.

Companion guides may contain two types of data, instructions for electronic communications with the publishing entity (communications/connectivity instructions), and supplemental information for creating transactions for the publishing entity while ensuring compliance with the associated ASC X12 implementation guide (transaction instructions). Either the communications/connectivity component or the transaction instruction component must be included in every companion guide. The components may be published as separate documents or as a single document.

The communications/connectivity component is included in the companion guide when the publishing entity wants to convey the information needed to commence and maintain communication exchange.

The transaction instruction component is included in the companion guide when the publishing entity wants to clarify the implementation guide instructions for submission of specific electronic transactions. The transaction instruction component content is limited by ASC X12's copyrights and Fair Use statement.

Preface

This companion guide to the v5010 ASC X12N Technical Report Type 3 (TR3) adopted under the Health Insurance Portability and Accountability Act of 1996 (HIPAA) clarifies and specifies the data content when exchanging transactions electronically with the Puerto Rico Department of Health. Transmissions based on this companion guide, used in tandem with the TR3, also called the Health Care Dental Claim/Encounter ASC X12N version 005010X224A2 (837D), are compliant with both ASC X12 syntax and those guides. This companion guide is intended to convey information that is within the framework of the ASC X12N TR3 adopted for use under HIPAA. The companion guide is not intended to convey information that in any way exceeds the requirements or usages of data expressed in the TR3.

Additional information on the Final Rule for Standards for Electronic Transactions can be found at <http://aspe.hhs.gov/admnsimp/final/bdin00.htm>. To access the HIPAA Implementation Guides, please contact the Washington Publishing Company by phone (425-562-2245) or email (admin@wpc-edi.com)

DPS.

1 INTRODUCTION

This section describes how TR3, also called 837D ASC X12N (version 005010X224A2), adopted under HIPAA, will be detailed with the use of a table. The tables contain a Notes/Comments column for each segment that Puerto Rico Department of Health has information additional to the TR3. That information can:

1. Limit the repeat of loops, or segments.
2. Limit the length of a simple data element.
3. Specify a sub-set of the implementation guides' internal code lists.
4. Clarify the use of loops, segments, composite, and simple data elements.
5. Provide any other information tied directly to a loop, segment, composite, or simple data element pertinent to trading electronically with Puerto Rico Department of Health.

In addition to the row for each segment, one or more additional rows are used to describe Puerto Rico Department of Health's usage for composite and simple data elements, and for any other information. Notes and comments should be placed at the deepest level of detail. For example, a note about a code value should be placed on a row specifically for that code value, not in a general note about the segment.

The following table specifies the columns and suggested use of the rows for the detailed description of the transaction set companion guides. The table contains a Notes/Comments column to provide additional information from Puerto Rico Department of Health for specific segments provided by the TR3. The following is just an example of the type of information that would be spelled out or elaborated on in Section 6 TRANSACTION-SPECIFIC INFORMATION.

Page #	Loop ID	Reference	Name	Codes	Length	Notes/Comments
193	21000	NM1	Subscriber Name			This type of row always exists to indicate that a new segment has begun. It is always shaded at 10 percent and notes or comments about the segment itself go in this cell.
195	21000	NM103	Subscriber Primary Identifier		45	This type of row exists to limit the length of the specified data element.
196	2100C	REF	Subscriber Additional Identification			
197	2100C	REF01	Reference Identifier on Qualifier	18-49 6P-11U N3		These are the only codes transmitted by Puerto Rico Department of Health.
			Plan Network Identifier Number	N3		This type of row exists when a note for a particular code value is required. For example, this note may say that value "N3" is the default. Not populating the first three columns makes it clear that the code value belongs to the row immediately above it.
218	2110C	EB	Subscriber Eligibility or Benefit Information			
231	2110C	EB13-1	Product/Service D Qualifier	AD		This row illustrates how to indicate a component data element in the Reference column and how to specify that only one code value is applicable.

1.1 Scope

This companion guide is intended for trading partner use in conjunction with the TR3 HIPAA 5010 837D (referred to as Dental Claim/Encounter in the rest of this document) for the purpose of submitting 837D electronically. This companion guide is not intended to replace the TR3. The TR3s define the national data standards, electronic format, and values for each data element within an electronic transaction. The purpose of this companion guide is to provide trading partners with a guide to communicate Puerto Rico Department of Health-specific information required to successfully exchange transactions electronically with Puerto Rico Department of Health. The instructions in this companion guide are not intended to be stand-alone requirements documents. This companion guide conforms to all the requirements of any associated ASC X12 Implementation Guide and is in conformance with ASC X12's Fair Use and Copyright statements.

The information contained in this companion guide applies to Puerto Rico Department of Health for processing.

Puerto Rico Department of Health will accept and process any HIPAA-compliant transaction; however, a compliant transaction that does not contain Puerto Rico Department of Health-specific information, though processed, may be denied. For example, a compliant 837D Claim/Encounter created with an invalid Puerto Rico Department of Health member identification number will be processed by Puerto Rico Department of Health, but will be denied. For questions regarding appropriate billing procedures, as well as for policy and billing information, providers should refer to their policy-specific area of the Puerto Rico Department of Health.

Refer to this companion guide first if there is a question about how Puerto Rico Department of Health processes a HIPAA transaction. For further information, contact their policy-specific area of the Puerto Rico Department of Health or PRMMIS MCO EDI (prmmis.edi.sauron123.com/welltechnologies.com). This guide is intended as a resource to assist trading partners (Managed Care Organizations – MCOs) and clearinghouses with Puerto Rico Department of Health in successfully conducting EDI of administrative health care transactions. This document provides instructions for obtaining technical assistance, initiating and maintaining connectivity, sending and receiving files, testing, and other related information. This document does not provide detailed data specifications, which are published separately by the industry committees responsible for their creation and maintenance.

1.2 Overview

Per HIPAA requirements, Puerto Rico Department of Health and all other covered entities must comply with the EDI standards for health care as established by the Secretary of the federal Department of Health and Human Services (HHS). The Secretary of the HHS is required under HIPAA to adopt standards to support the electronic exchange of administrative and financial health care transactions primarily between health care providers and plans. Additionally, HIPAA directs the Secretary to adopt standards for transactions, to enable health information to be exchanged electronically, and to adopt specifications for implementing each standard.

M
The HIPAA requirements serve to:

- Create better access to health insurance
- Limit fraud and abuse
- Reduce administrative costs.

DPS.
This guide is designed to help those responsible for testing and setting up electronic Dental Claim/Encounter transactions. Specifically, it documents and clarifies when situational data elements and segments must be used for reporting, and identifies codes and data elements that do not apply to Puerto Rico Department of Health. This guide supplements (but does not contradict) requirements in the ASC X12N 837D (version 005010X224A2) Implementation Guide. This guide provides communications-related information that a trading partner needs to enroll as

ADMINISTRACION DE
SEGUROS DE SALUD

a trading partner, obtain support, format the interchange control header (ISA) and functional group header (GS) envelopes, and exchange test and production transactions with Puerto Rico Department of Health.

This companion guide must be used in conjunction with the TR3 instructions. The companion guide is intended to assist trading partners in implementing electronic 837D transactions that meet Puerto Rico Department of Health processing standards by identifying pertinent structural and data-related requirements and recommendations.

1.3 References

For more information regarding the ASC X12 Standards for Electronic Data Interchange 837D Health Care Claim/Encounter (versión 005010X224A2) and to purchase copies of the TR3 documents, consult the Washington Publishing Company by phone (425-562-2245) or email (admin@wpc-edi.com).

The implementation guide specifies in detail the required formats for transactions exchanged electronically with an insurance company, health care payer, or government agency. The implementation guide contains requirements for the use of specific segments and specific data elements within those segments and applies to all health care providers and their trading partners. It is critical that the provider's Information Technology (IT) staff or software vendor review this document in its entirety and follow the stated requirements to exchange HIPAA-compliant files with Puerto Rico Department of Health.

To obtain the Provider taxonomy code set, please contact the Washington Publishing Company by phone (425-562-2245) or email (admin@wpc-edi.com).

1.4 Additional Information

The American National Standards Institute (ANSI) is the coordinator for information on national and international standards. In 1979, ANSI chartered the Accredited Standards Committee (ASC) X12 to develop uniform standards for electronic interchange of business transactions and eliminate the problem of non-standard electronic data communication. The objective of the ASC X12 committee is to develop standards to facilitate electronic interchange relating to all types of business transactions. The ANSI X12 standard is recognized by the United States as the standard for North America. Electronic Data Interchange adoption has been proved to reduce the administrative burden on providers.

The intended audience for this document is the technical and operational staff responsible for generating, receiving, and reviewing electronic health care transactions.

National Provider Identifier

ML
As a result of HIPAA, the federal HHS adopted a standard identifier for health care providers. The Final Rule published by the HHS adopted the National Provider Identifier (NPI) as the standard identifier.

The NPI replaces all payer-specific identification numbers (e.g., Medicaid provider numbers) on nationally recognized electronic transactions (also known as standard transactions); therefore, all health care providers are required to obtain an NPI to identify themselves on these transactions. The NPI is the only identification number that will be allowed on these transactions.

PPG
All providers, except those that the Puerto Rico Department of Health determined to not identify as a healthcare provider such as non-emergency transportation, are health care providers (per the definitions within the NPI Final Rule) and, therefore, are required to obtain and use an NPI. Puerto Rico Department of Health requires all health care providers to submit their NPI on electronic transactions.

ADMINISTRACION DE
SEGUROS DE SALUD

23 - 000446

Acceptable Characters

The HIPAA transactions must not contain any carriage returns nor line feeds; the data must be received in one, continuous stream. Puerto Rico Department of Health accepts the extended character set. Uppercase characters are recommended. Files should be less than 100 MB.

File/System Specifications

EDI only accepts Windows/PC/DOS formatted files. Any file transmitted to EDI must be named in accordance to standard file naming conventions, including a valid three-character file extension. The following standards should be used:

- To avoid accidentally overwriting files, do not send multiple files with the same name on the same day.
- File Names should not be longer than 45 characters.
- File Names should not contain spaces or special characters.
- File Names should contain a file extension such as .dat or .txt.
- Zip or compressed files are allowed, but a zip or compressed file should contain only one X12 file.
- Zip files must contain the extension .zip (not case sensitive).

2 CONNECTIVITY WITH PUERTO RICO DEPARTMENT OF HEALTH / COMMUNICATIONS

This section describes the process to interactively submit HIPAA 837D transactions, along with various submission methods, security requirements, and exception handling procedures.

2.1 Process Flows

This section contains process flow diagrams and appropriate text.

Each transaction is validated to ensure that the 837D complies with the 005010X224A2 TR3.

Transactions that fail this compliance check will generate a "Rejected" 999 file back to the sender with an error message indicating the compliance error. Transactions that pass this compliance check will generate an "Accepted" 999 file back to the sender with AK9'A to indicate that the file passed compliance. Transactions with multiple ST/SE loops that fail this compliance check in some of the ST/SE loops will generate a "Partial" 999 file back to the sender with an error message indicating the compliance error (all claims/encounters in the ST/SE envelopes that pass compliance will be processed). Claims/Encounters that pass compliance checks but fail to process (e.g., due to member not being found) will be denied. Claims/Encounters that pass compliance checks and have not failed to process (e.g., the member was found with enrollment) within the date(s) of service) will be classified as "paid".

2.2 Transmission Administrative Procedures

This section provides Puerto Rico Department of Health's specific transmission administrative procedures.

The trading partner must determine if the transmission being sent is Test or Production and is using the appropriate indicator (ISA15). For details about available Puerto Rico Department of Health access methods, refer to the Communication Protocol Specifications section

Puerto Rico Department of Health is available only to authorized users. Submitters must be Puerto Rico Department of Health trading partners. A submitter is authenticated using a username and password assigned by the trading partner.

2.3 Communication Protocol Specifications

This section describes Puerto Rico Department of Health's communication protocol(s). The following communication methods are available to get a member's Eligibility and Benefits from Puerto Rico Department of Health:

Batch

Trading partners can submit all batch transactions to Puerto Rico Department of Health and download acknowledgements and response files. Access is free; however, the user must have his or her own internet connection to access the web application.

ADMINISTRACION DE
SEGUROS DE SALUD

3 CONTROL SEGMENTS / ENVELOPES

3.1 ISA-IEA

This section describes Puerto Rico Department of Health's use of the interchange control segments. It includes a description of expected sender and receiver codes, authorization information, and delimiters.

Interchange Control Header (ISA)

To promote efficient, accurate electronic transaction processing, please note the following Puerto Rico Department of Health specifications:

- Each trading partner is assigned a Trading Partner ID.
- All dates are in the CCYYMMDD format. Except for ISA09.
- All datetimes are in the CCYYMMDDHHMM format.
- Payer IDs can be found in the companion guides.
- Batch responses are not returned until all inquiries are processed. Limiting the number of total inquiries per ISA-IEA will produce faster results.
- Each Payer ID must be in its own file.
- No more than 999 claims/encounters per Transaction Set (ST-SE).
- Only one interchange (ISA/IEA) loop and one functional (GS/GE) loop is allowed per file.

ML

Transactions transmitted as a batch are identified by an ISA and trailer segment (IEA), which form the envelope enclosing the transmission. Each ISA marks the beginning of the transmission (batch) and provides sender and receiver identification. The table below represents only those fields in which Puerto Rico Department of Health requires a specific value or has additional guidance on what the value should be. The table does not represent all of the fields necessary for a successful transaction — the TR3 should be reviewed for that information.

The ISA data segment is a fixed length record and all fields must be supplied. Fields that are not populated with actual data must be filled in with spaces.

Note: Puerto Rico Department of Health accepts files with one ISA/IEA loop per file.

TR3 Page #	Loop ID	Reference	Name	Codes	Notes/Comments
C.3	None	ISA	Interchange Control Header		
C.4		ISA01	Authorization Information Qualifier	03	ENCOUNTER – “03” – Additional Data Identification
C.4		ISA02	Authorization Information		ENCOUNTER – MCO Medicaid ID + [space fill]
C.4		ISA03	Security Information Qualifier	00	00 – No Security Information Present
C.4		ISA04	Security Information		[space fill]
C.4		ISA05	Interchange ID (Sender) Qualifier	ZZ	ZZ = Mutually defined
C.4		ISA05	Interchange Sender ID		Trading Partner ID supplied by Puerto Rico Department of Health, left-justified and space-filled.
C.5		ISA07	Interchange ID (Receiver) Qualifier	ZZ	ZZ = Mutually defined
C.5		ISA08	Interchange Receiver ID	PRMMIS	“PRMMIS” – left-justified and space-filled
C.5		ISA09	Interchange Date		The date format is YYMMDD

ADMINISTRACION DE
SEGUROS DE SALUD

TR3 Page #	Loop ID	Reference	Name	Codes	Notes/Comments
C.5		ISA10	Interchange Time		The time format is HHMM. A caret (^) is recommended.
C.5		ISA11	Repetition Separator	*	
C.6		ISA12	Interchange Control Version Number	00501	00501 = Control Version Number
C.5		ISA13	Interchange Control Number		The interchange control number assigned in ISA13 must be identical to the value in IEA02
C.6		ISA14	Acknowledgement Requested	0	0 = No interchange acknowledgement requested (IA1)
C.6		ISA15	Usage Identifier	P, T	Code indicating whether the data enclosed is Production or Test.
			Production Data	P	Enter value "P" to indicate that the file contains Production data.
			Test Data	T	Enter value "T" to indicate that the file contains Test data.
C.6		ISA16	Composed Separator	:	A colon (:) is recommended.

IEA – Interchange Control Header

Communications transport protocol interchange control trailer segment. This segment within the X12N implementation guide defines the end of an interchange of zero or more functional groups and interchange-related control segments. This segment may be thought of traditionally as the file trailer record

TR3 Page #	Loop ID	Reference	Name	Codes	Notes/Comments
C.10	None	IEA	Interchange Control Trailer		
C.10		IEA01	Number of Included Functional Groups		Number of included Functional Groups
C.10		IEA02	Interchange Control Number		Must be identical to the value in ISA13

3.2 GS-GE

This section describes Puerto Rico Department of Health's use of the functional group control segments

It includes a description of expected application sender and receiver codes.

Functional Group Header (GS)

In the table below are fields in which Puerto Rico Department of Health requires a specific value or has additional guidance on what the value should be. The TR3 should be reviewed for specific information

Note: Puerto Rico Department of Health only accepts files with one GS/GE loop per file

TR3 Page #	Loop ID	Reference	Name	Codes	Notes/Comments
C.7	None	GS	Functional Group Header		
C.7		GS01	Functional ID Code	HC	"HC" = Health Care Dental Claim/Encounter (837D)

ADMINISTRACION DE
SEGUROS DE SALUD

23 - 000449

TR3 Page #	Loop ID	Reference	Name	Codes	Notes/Comments
C.7		GS02	Application Sender's Code		'Trading Partner ID' supplied by Puerto Rico Department of Health.
C.7		GS03	Application Receiver's Code	PRMMIS	'PRMMIS' Puerto Rico Department of Health Sender ID.
C.7		GS04	Date		The date format is CCYYMMDD
C.8		GS05	Time		The time format is HHMM
C.8		GS06	Group Control Number		Group Control Number – Must be identical to C-E02.
C.8		GS07	Responsible Agency Code	X	"X" – Responsible Agency Code
C.8		GS08	Version / Release / Industry Identifier Code	005010X224A2	Version / Release / Industry Identifier Code

Functional Group Trailer (GE)

In the table below are fields in which Puerto Rico Department of Health requires a specific value or has additional guidance on what the value should be. The TR3 should be reviewed for specific information.

TR3 Page #	Loop ID	Reference	Name	Codes	Notes/Comments
C.9	None	GE	Functional Group Trailer		
C.9		GE01	Number of Transaction Sets Included		Total number of transaction sets
C.9		GE02	Group Control Number		Must be identical to the value in GS06

3.3 ST-SE

This section describes Puerto Rico Department of Health's use of transaction set control numbers.

RE
Puerto Rico Department of Health recommends that trading partners follow the guidelines set forth in the TR3 — start the first ST02 in the first file with "000000001" and increment from there. The TR3 should be reviewed for how to create compliant transaction set control segments.

TRANSACTION SET HEADER (ST)

The TR3 should be reviewed for specific information

TR3 Page #	Loop ID	Reference	Name	Codes	Notes/Comments
70	None	ST	Transaction Set Header		
70		ST01	Transaction Set Identifier Code	837	837 Health Care Claim
70		ST02	Transaction Set Control Number		The Transaction Set Control Number in ST02 and SE02 must be identical. The number must be unique within a specific interchange ((SA-IEA)).
70		ST03	Implementation Guide Version Name	005010X224A2	This field contains the same value as GS08.

ADMINISTRACION DE
SEGUROS DE SALUD

23 - 000446

TRANSACTION SET TRAILER (SE)

The TR3 should be reviewed for specific information.

TR3 page #	Loop ID	Reference	Name	Codes	Notes/Comments
496	None	SE	TRANSACTION SET TRAILER		
498		SE01	Transaction Segment Count		Total number of transaction sets
496		SE02	Transaction Set Control Number		The Transaction Set Control Number in ST02 and SE02 must be identical.

3.4 Control Segment Notes

The ISA data segment is a fixed length record and all fields must be supplied. Fields that are not populated with actual data must be filled in with spaces.

3.5 File Delimiters

Puerto Rico Department of Health requests that you use the following delimiters on your file. If used as delimiters, these characters must not be submitted within the data content of the transaction sets. Contact PRMMIS (MCO EDI) (prmmis_edi_support@gainwelltechnologies.com) if there is a need to use a delimiter other than the following:

- Segment Terminator = ~
- Element Separator = *
- Component Separator = :
- Repetition Separator = ^

Element Separator

Byte 4 in the ISA segment defines the element separator to be used throughout the entire transaction. The recommended element separator is an asterisk (*).

Repetition Separator

ISA11 defines the repetition separator to be used throughout the entire transaction. The recommended repetition separator is a caret (^).

Component Separator

ISA16 defines the component separator to be used throughout the entire transaction. The recommended component separator is a colon (:).

Segment Terminator

Byte 106 of the ISA segment defines the segment terminator used throughout the entire transaction. The recommended segment terminator is a tilde (~).

4 PUERTO RICO DEPARTMENT OF HEALTH-SPECIFIC BUSINESS RULES AND LIMITATIONS

4.1 Trading Partner Identification Number

In Module One of the Puerto Rico Department of Health's implementation of the PRMMIS, the EDI team will create any needed Trading Partner Profiles.

4.2 Testing

Module One of the Puerto Rico Department of Health's implementation of the PRMMIS will not require any Production Authorization Testing.

4.3 Terminology

The term "subscriber" will be used as a generic term throughout the companion guide.

4.4 Limits

File Size is restricted to 5,000 transactions (claims/encounters) per file. One transaction set includes all data between and including a Transaction ST segment and Transaction SE segment.

4.5 Scheduled Maintenance

Puerto Rico Department of Health schedules regular maintenance every Sunday from 01:00 a.m. to 05:00 a.m. EST

4.6 Procedures for Voiding Encounters

PRMMIS requires that the MCO's internal Transaction Control Number (TCN) be sent for every claim:

Loop 2330B – Other Payer Name

REF – Other Payer Claim Control Number

REF01 = F8 – Original Reference Number

REF02 = The TCN (in the MCO's system) of the claim being submitted

When voiding a claim/encounter, the MCO should send their internal Transaction ID of the claim being voided in:

Loop: 2300 — CLAIM INFORMATION

REF – PAYER CLAIM CONTROL NUMBER

REF01 = F8 – Original Reference Number

REF02 = The TCN (in the MCO's system) of the encounter being voided

5 ACKNOWLEDGEMENTS AND/OR REPORTS

5.1 Acknowledgements

TA1 — Transaction Acknowledgement

Puerto Rico Department of Health will only respond with a TA1 when the batch X12 contains Envelope errors. If a TA1 is produced, then a 999 will be sent. The submitted 837D will need to be corrected and resubmitted.

999 — Functional Acknowledgement

This file informs the submitter that the transaction arrived and provides information about the syntactical quality of the Functional Groups in a batch X12 file. Puerto Rico Department of Health will always respond with a 999 for a batch X12 file. If a "rejected" 999 is produced, then claims/encounters will not be sent to the claims engine for adjudication. The submitted 837D will need to be corrected and resubmitted.

6 TRANSACTION-SPECIFIC INFORMATION

This section describes how ASC X12N implementation guides adopted under HIPAA will be detailed with the use of a table. The tables contain a row for each segment that Puerto Rico Department of Health has something additional, over and above, the information in the implementation guides. That information can do the following:

1. Limit the repeat of loops, or segments.
2. Limit the length of a simple data element.
3. Specify a sub-set of the implementation guides' internal code listings.
4. Clarify the use of loops, segments, composite, and simple data elements.
5. Provide any other information tied directly to a loop, segment, composite or simple data element pertinent to trading electronically with Puerto Rico Department of Health.

In addition to the row for each segment, one or more additional rows are used to describe Puerto Rico Department of Health's usage for composite and simple data elements, and for any other information. Notes and comments will be placed at the deepest level of detail. For example, a note about a code value will be placed on a row specifically for that code value, not in a general note about the segment.

The following table specifies the columns and suggested use of the rows for the detailed description of the transaction set companion guides. The table contains a row for each segment that Puerto Rico Department of Health has something additional, over and above, the information in the TR3s.
