2 Interface Overview

This document is the definition of the Inbound Objection to Payments Request File layout that will be received by Managed Care in a fixed position format. This interface file will contain the list of Objection to Payments requested by the Carrier.

2.1 Use Requirements

This monthly interface will be used by the Carriers to request changes to payments made by the Managed Care capitation process.

2.2 Communication Methods and Format

The file will be provided by the Carriers. The Inbound Objection to Payments Request File name will be MGD_OTP_Request_CARRIERID_CCYYMM_SS.txt, where CARRIERID is the 9-digit Carrier's Medicaid ID, CCYYMM is the capitation cycle year and month, and SS is the file version sequence number, which starts at "00" and is incremented if the Carrier sends subsequent files for the same Carrier and capitation cycle with adjustments or error fixes.

The inbound file will be in a fixed position format. The file will not contain header or trailer records. Any fields in the file that are not needed by PRMMIS will be marked "Unused" and ignored by PRMMIS.

2.3 Timing and Frequency

An Objection to Payments Request File for each capitation cycle month may only be sent within 90 calendar days after the monthly capitation payment has been made. Any subsequent version of the file, with adjustments or error fixes, must also be sent within that time period.

The Request file can be processed on the second, third, and fourth Tuesday of the month.

2.4 Monitoring and Reporting

PRMMIS will create an Outbound Objection to Payment Response file (ICD ICD_PRMMIS_MGD_0014_OUTBOUND_OBJECTION_TO_PAYMENTS_RESPONSE) and Outbound Objection to Payment Error Response file (ICD ICD_PRMMIS_MGD_0013_OUTBOUND_OBJECTION_TO_PAYMENTS_ERROR) after processing the Inbound Objection to Payments Request File. These files will be returned to the originating Carrier.

PRMMIS will also create two reports, the Objection to Payment Response and Summary Report MGD-0350-M, and the Objection to Payment Error and Summary Report MGD-0351-M, which will be loaded into OnBase.

2.5 Error Handling

Errors from processing the Inbound Objection to Payments Request File will be listed in the Outbound Objection to Payment Error Response file (ICD ICD_PRMMIS_MGD_0013_OUTBOUND_OBJECTION_TO_PAYMENTS_ERROR) that will be sent to the originating Carrier. The Carrier may send a new Inbound Objection to Payments Request File with error fixes, incrementing the file version sequence number, within 90 calendar days after the monthly capitation payment has been made.

PRMMIS will also create the Objection to Payment Error and Summary Report MGD-0351-M, which will be loaded into OnBase.

2 Interface Overview

This document is the definition of the Outbound Objection to Payments Error Response File layout that will be created by Managed Care in a fixed position format. This interface file will contain the list of errors returned when processing the inbound Objection to Payments Request file from the Carrier.

2.1 Use Requirements

This monthly interface will be used by Managed Care to send processing errors from the inbound Objection to Payments Request file back to the Carriers.

2.2 Communication Methods and Format

The file will be provided by Managed Care and sent to the Carriers. The Objection to Payments Error Response File name will be MGD_OTP_Error_CARRIERID_CCYYMM_SS.txt, where CARRIERID is the 9-digit Carrier's Medicaid ID, CCYYMM is the capitation cycle year and month, and SS is the file version sequence number used for the Request file, which starts at "00" and is incremented if Managed Care processes subsequent request files for the same Carrier and capitation cycle with adjustments or error fixes.

The outbound file will be in a fixed position format. The file will not contain header or trailer records.

2.3 Timing and Frequency

An Objection to Payments Request File for each capitation cycle month may only be sent within 90 calendar days after the monthly capitation payment has been made. Any subsequent version of the file, with adjustments or error fixes, must also be sent within that time period.

The Request file can be processed on the second, third, and fourth Tuesday of the month, and the error file will be returned to the Carrier.

2.4 Monitoring and Reporting

PRMMIS will create an Outbound Objection to Payment Response file (ICD ICD_PRMMIS_MGD_0014_OUTBOUND_OBJECTION_TO_PAYMENTS_RESPONSE) and Outbound Objection to Payment Error Response file after processing the Inbound Objection to Payments Request File. These files will be returned to the originating Carrier.

PRMMIS will also create two reports, the Objection to Payment Response and Summary Report MGD-0350-M, and the Objection to Payment Error and Summary Report MGD-0351-M, which will be loaded into OnBase.

2.5 Error Handling

Errors from processing the Inbound Objection to Payments Request File will be listed in the Outbound Objection to Payment Error Response file that will be sent to the originating Carrier. The Carrier may send a new Inbound Objection to Payments Request File with error fixes, incrementing the file version sequence number, within 90 calendar days after the monthly capitation payment has been made.

PRMMIS will also create the Objection to Payment Error and Summary Report MGD-0351-M, which will be loaded into OnBase.

2.6 Assumptions

- An Objection to Payments Request File for each capitation cycle month will be sent within 90 calendar days after the monthly capitation payment has been made.

Notes:

nr

Versioning

The first file submitted for a billing cycle should use *Version Sequence* equal to "00".
If a submitted file presents errors or requires adjustments, the Contractor may submit a second version incrementing by one the *Version Sequence*. Nonetheless, a new version can only be submitted within the 30 Calendar Days period after the payment is made.

2 Interface Overview

This document is the definition of the Outbound Objection to Payments Error Response File layout that will be created by Managed Care in a fixed position format. This interface file will contain the list of errors returned when processing the inbound Objection to Payments Request file from the Carrier.

2.1 Use Requirements

This monthly interface will be used by Managed Care to send processing errors from the inbound Objection to Payments Request file back to the Carriers.

ADMINISTRACION DE
SEGUROS DE SALUD

23 - 00044H

2.2 Communication Methods and Format

The file will be provided by Managed Care and sent to the Carriers. The Objection to Payments Error Response File name will be MGD_OTP_Error_CARRIERID_CCYYMM_SS.txt, where CARRIERID is the 9-digit Carrier's Medicaid ID, CCYYMM is the capitation cycle year and month, and SS is the file version sequence number used for the Request file, which starts at "00" and is incremented if Managed Care processes subsequent request files for the same Carrier and capitation cycle with adjustments or error fixes.

The outbound file will be in a fixed position format. The file will not contain header or trailer records.

2.3 Timing and Frequency

An Objection to Payments Request File for each capitation cycle month may only be sent within 90 calendar days after the monthly capitation payment has been made. Any subsequent version of the file, with adjustments or error fixes, must also be sent within that time period.

The Request file can be processed on the second, third, and fourth Tuesday of the month, and the error file will be returned to the Carrier.

2.4 Monitoring and Reporting

PRMMIS will create an Outbound Objection to Payment Response file (ICD ICD_PRMMIS_MGD_0014_OUTBOUND_OBJECTION_TO_PAYMENTS_RESPONSE) and Outbound Objection to Payment Error Response file after processing the Inbound Objection to Payments Request File. These files will be returned to the originating Carrier.

PRMMIS will also create two reports, the Objection to Payment Response and Summary Report MGD-0350-M, and the Objection to Payment Error and Summary Report MGD-0351-M, which will be loaded into OnBase.

2.5 Error Handling

Errors from processing the Inbound Objection to Payments Request File will be listed in the Outbound Objection to Payment Error Response file that will be sent to the originating Carrier. The Carrier may send a new Inbound Objection to Payments Request File with error fixes, incrementing the file version sequence number, within 90 calendar days after the monthly capitation payment has been made.

PRMMIS will also create the Objection to Payment Error and Summary Report MGD-0351-M, which will be loaded into OnBase.

2.6 Assumptions

- An Objection to Payments Request File for each capitation cycle month will be sent within 90 calendar days after the monthly capitation payment has been made.
- Any subsequent version of the file, with adjustments or error fixes, will also be sent within 90 calendar days after the monthly capitation payment has been made.

2.7 Key Contacts

Please provide the names, telephone numbers, and email addresses for source and destination contacts in the table below.
