Preface

This document is prepared to comply with the 27 Act of 2010 which add a new Article VIII Section 4 of Act No. 72 of September 7, 1993, as amended, known as the "Law of Health Insurance Administration of Puerto Rico."; establish a requirement for insurers and others to share information of eligibility with the Health Insurance Administration or its duly authorized Subcontractor; allow recovery of fees paid by the Administration, and for other purposes.

The insurer shall provide for the physical safeguarding of its Data processing facilities and the Systems and Information housed therein. The Insurer shall provide ASES with access to Data facilities upon ASES's request. The physical security provisions shall be in effect for the life of this Contract.

The Insurer shall ensure that the operation of all of its Systems is performed in accordance with Puerto Rico and Federal regulations and guidelines related to security and confidentiality of the protected information managed by the Insurer, and shall strictly comply with HIPAA Privacy and Security Rules, as amended, and with the Breach Notification Rules under the HITECH Act.

The Insurer will put in place procedures, measures and technical security to prohibit unauthorized access to the regions of the Data communications network inside of an Insurer's Span of Control.

The Insurer shall submit all reports electronically to ASES's FTP site unless directed otherwise by ASES. ASES shall provide the Insurer with access to the FTP site. The email generated by the FTP upload will be used as the time stamp for the submission of the report(s).

The Insurer Data transfers shall occur in standard format as prescribed by ASES and will be compliant with HIPAA and Federal regulations. The Insurer shall submit in formats as prescribed by ASES so long as ASES's direction does not conflict with any Federal law. With each submitted file the Insurer will include a Transmittal Sheet to indicate the record's totals submitted. See a Transmittal Sheet model in Appendix IV.

ASES will make available a secure FTP server, accessible via the Internet, for receipt of electronic files and reports from the Insurer. The Insurer shall provide a similar system for ASES to transmit files and reports deliverable by ASES to the Insurer. When such systems are not operational, ASES and the Insurer shall agree mutually on alternate methods for the exchange of files.

## 1 Introduction

### 1.1 Coordination of Benefits (COB)

Some people who are beneficiaries of the Government Health Plan of Puerto Rico, which thrives on federal funds under certain circumstances may be eligible to receive benefits for a private plan or other health insurance funded by the Government of Puerto Rico. In accordance with applicable laws and federal guidelines, Medicaid is the payer of last resort and the rest of the remedies must be exhausted before resorting to the services under the Medicaid funds provided.

By provision of Public Law 109-171, the Federal Government will require governments of the states and territories beneficiaries of Medicaid funds, authorizing him to health insurers to share certain information with the State agency responsible for administering the program Medicaid. The collection of this information facilitates coordination of services and the sound administration of the funds received and ensures that Medicaid is not paying for care to be covered by another payer.

### 1.2 Data Validation Process

All files will pass through a validation process. Validation will check the basic structure of the file and its records and may result in a file being rejected. Such rejections may be caused for example, by file names which fail to follow the naming convention, a file containing wrong length records, wrong field coding or other basic tests.

All files which are rejected will be notified to the Insurer with an explanation of why the file is rejected. No records from such a file will be retained in the system and the Insurer will be required to resubmit the rejected file in its entirety before the next month's files become due. Such re-submitted files must be carefully named using the sequence number part of the naming convention to ensure the name is distinct from the rejected file and is named in the correct order.

1.3 General Notes on data layout requirements

Date Fields - All date fields in the following data layout are defined to the same size and format as YYYYMMDD. An 8 byte field where YYYY = 4 digit year, MM = 2 digit month and DD = 2 digit day. 1 digit month and day values must always have the leading zero (0). Date fields must contain a valid date with months between 01 and 12 and days between 01 and maximum day in month. July 1, 2006 will be coded as 20060701.

Amount Fields – All amount fields representing money must be numeric and are defined as 9 bytes in the format 9(7)v99 where v represents an implied decimal point. This allows a maximum of 7 digits for dollars plus the last two digits for cents. These numbers are always right justified and zero filled to the left. As examples:

\$1.23 will be coded as 000000123  
 \$100.00 will be coded as 000010000

All amount fields are positive and follow the above definition unless clearly specified otherwise.  
 End of Record Filler – All file layouts have been designed to end with a filler field of 1 byte which must always be coded as an “\*” character. This is done to avoid issues between different systems when generating and transferring ASCII files in which ending field may be empty. The fixed End of Record Filler guarantees that all records in a file can be constructed to the fixed length format as defined in the layouts.

Justification and filling of Fields – The layouts have all been specified to provide fixed length fields and fixed length records. While other methods can be used, it is felt that this provides the best common ground for working with multiple entities each of which uses varying systems. To be sure everyone understands the same about the comments on justification and filling the following examples are given to help keep this concept clear.

All numeric fields must be filled completely with numeric digits. If there are exceptions these are clearly spelled out in the documentation of the layouts. Typically numeric field are right justified and to keep them numeric must be zero filled. In a field specified as numeric such a 9(7)v99 where v represents an implied decimal the following examples illustrate how data will look in the field:

Value	Field
12.50	000001250
101	000010100
1,234.56	000123456
1,000,000	100000000

ADMINISTRACION DE  
 SEGUROS DE SALUD

23 - 00044d

*me*  
*POS.*

All alphanumeric fields must be filled completely. If the value of data in the field is less than the width of the field then care must be taken to ensure that the field is filled with blanks. Allowing "NULLS" or other special characters through may cause unexpected results and make reading, loading and validation of the data difficult. Typically alphanumeric fields are left justified and filled to the right with blanks to complete the field. In a field specified as alphanumeric such as X(20) the following examples illustrate how data will look in the field where the [ ] characters represent the start and end of the field

<u>Value</u>	<u>Field</u>
P.R.	[P.R.]
José Rivera	[José Rivera]
blanks	[ ]

## 2 File Naming Convention

All data files to be delivered to ASES by the Insurers must follow the naming conventions below. Files which do not fit the naming convention will be ignored and the Insurer deemed to have failed in delivery of such a file.

File names must adhere strictly to this naming convention as the structure includes information for identification of the Insurer, dates and file type. If not named correctly the file cannot be processed properly.

The general format of file names will be – **cccyymmms.fff**

Where:

Character 1-3	<b>ccc</b>	=	Insurer Code (See attachment I)
Character 4-5	<b>yy</b>	=	Last two digits of year
Characters 6-7	<b>mm</b>	=	Month
Character 8	<b>s</b>	=	sequence number of file submission.

All submission start with s = 0 and continue in numeric if files are re-submitted to 9

If files must be re-submitted beyond 9, then alphabetic characters will be used a, b, c ...

Character 9	Always "."
Characters 10-12	Extension code identifying type of file

COB for COORDINATION OF SERVICES

ADMINISTRACION DE  
SEGUROS DE SALUD

23 - 00044

Contrato Número

ASES COB Data Submissions (Third Party Liability) 1.8.3

Files are always dated for the month being reported. For example, when sending coverage information in September 2013 the yymm part of the file name will be 1309 while the file will be sent to ASES in October.

Examples of completing this naming convention are --

For imaginary Insurer 096 in the files for COB in April 2013 will be named as follows --

Coordination of Services 09613040.COB

When the COB file is rejected, the corrected file will be re-submitted as

09612041.COB

The error log generated when the COB file is rejected will reference the rejected file name with ERR extension on it. The error file name will look as

09612041.ERR

All data files submitted must include a Transmittal Sheet with the following file name format.

The general format of file names will be -- **Cccyymmdds-tr.xls**

Where:

Character 1-3	ccc	=	Insurer's Code(See attachment I)
Character 4-5	yy	=	Last two digits of year
Characters 6-7	mm	=	Month
Character 10	s	=	sequence number of file submission.

All submission start with s = 0 and continue in numeric if files are re-submitted to 9  
If files must be re-submitted beyond 9, then alphabetic characters will be used a, b, c ...

Characters 11-13	Always "-tr"
Character 14	Always "."
Characters 15-17	Extension code identifying type of file (Always XLS)

XLS for MS EXCEL FILE FORMAT
