

NORMATIVE LETTER 25-0220

February 20, 2025

To: Managed Care Organizations (MCOs) contracted to offer services under the Government Health Plan Program Vital: First Medical Inc., MMM, Plan de Salud de Menonita, and Triple-S

Re: Report 26: 2025 Adult and Child Core Measures

The Puerto Rico Health Insurance Administration (ASES) provides updated requirements for reporting related to Report 26: Adult and Child Core Measures for 2025.

Report 26: Adult and Child Core Measures (ACCMs)

The Adult and Child Core Measure Sets captures CMS published Medicaid Adult and Child Core standardized measures. The measures are updated on an annual basis which may result in measures being added, retired or a change in methodology. The Contractor must reference the core sets, and the reference manuals listed below. ASES requires MCOs to report the full array of Adult and Child Core Measure Sets and to include any measures that may be added by CMS at a later date.

Resources for the Adult and Child Core Measure Sets are provided by CMS and can be accessed at the CMS website:

2025 Child Core Set Resources 2025 Adult Core Set Resources

CMS has released the FFY 2025 Child Resource Manual and Technical Specifications and the FFY 2025 Adult Resource Manual and Technical Specifications. Population and data stratification categories should be reported as required by CMS. Below are highlights of changes that are included for the 2025 Child and Adult Core Sets:

2025 New Measures

There are six (6) new measures added to the Adult Core Set:

- Adult Immunization Status (AIS-AD)
- Ambulatory Care Sensitive Emergency Department Visits for Non-Traumatic Dental Conditions in Adults (EDV-AD)
- Low-Risk Cesarean Delivery: Age 20 and Older (LRCD-AD)
- Oral Evaluation During Pregnancy: Ages 21 to 44 (OEVP-AD)
- Prenatal Immunization Status: Age 21 and Older (PRS-AD)
- Postpartum Depression Screening and Follow-Up: Age 21 and Older (PDS-AD), provisional, but required by ASES.

There are three (3) new measures that have been added to the Child Core Set, these are listed as provisional by CMS but required by ASES:

- Oral Evaluation During Pregnancy: Ages 15 to 20 (OEVP-CH)
- Postpartum Depression Screening and Follow-Up: Under Age 21 (PDS-CH)
- Prenatal Immunization Status: Under Age 21 (PRS-CH)

2025 Stratifications

The 2025 Adult and Child Core Measure Sets include reporting requirements for race ethnicity, sex and geography. For reporting, the 2024 OMB Statistical Policy Directive No. 15 race and ethnicity standards should be used to identify race and ethnicity. When defining geography, areas are defined as Urban or Non-Urban.

There are seven (7) Child Core Measures that are identified for mandatory stratification reporting:

- Well-Child Visits in the First 30 Months of Life (W30-CH)
- Child and Adolescent Well-Care Visits (WCV-CH)
- Oral Evaluation, Dental Services (OEV-CH)
- Follow-Up After Hospitalization for Mental Illness: Ages 6 to 17 (FUH-CH)
- Prenatal and Postpartum Care: Up to Age 20 (PPC2-CH)
- Live Births Weighing Less Than 2,500 Grams (LBW-CH) Note: CMS calculates on behalf of states
- Low-Risk Cesarean Delivery: Under Age 20 (LRCD-CH) Note: CMS calculates on behalf of states
 - *Measures LBW-CH and LRCD-CH are calculated by CMS.

There are three (3) Adult Core Measures that are identified for mandatory stratification reporting:

- Initiation and Engagement of Substance Use Disorder Treatment (IET-AD)
- Follow-Up After Emergency Department Visit for Substance Use: Age 18 and Older (FUA-AD)
- Follow-Up After Hospitalization for Mental Illness: Age 18 and Older (FUH-AD)

2025 Updates

- HPCMI-AD: Diabetes Care for People with Serious Mental Illness: Hemoglobin A1c (HbA1c) Poor Control (> 9.0%) has been updated to Diabetes Care for People with Serious Mental Illness: Glycemic Status > 9.0%.
- HBD-AD: Hemoglobin A1c Control for Patients with Diabetes has been changed to GSD-AD: Glycemic Status Assessment for Patients with Diabetes

Submission Requirement:

The Contractor must submit the following documents:

- Attestation
- Original HEDIS vendor report.
- Excel Templates for both Child and Adult Core Set reporting, with the numerator, denominator and rate as outlined. This template follows the CMS submission requirements which allow the MCO to furnish the metrics that are publicly available. The templates now include fields for race ethnicity, sex and geography as instructed by CMS within the Technical Specifications and Resource Manuals for Adult and Child Core Measures.

Specifications:

The FFY 2025 Child Resource Manual and Technical Specifications and the FFY 2025 Adult Resource Manual and Technical Specifications should be used to report the 2025 Core set of Adult and Child Health Care Quality Measures for Medicaid.

The MCO must use hybrid data for:

- Glycemic Status Assessment for Patients with Diabetes (GSD)
- Prenatal and Postpartum Care (PPC)
- Controlling High Blood Pressure (CBP)

Administrative data for the remainder of the measures must be used unless there is a specific allowable data type directed by HEDIS® specifications.

Report 26, FFY 2025 Adult and Child Core Measure Submission Requirement:

The report is due on an annual basis within 6 months after the end of the calendar year with the first report being due to ASES by June 30, 2025. According to Regulatory Letter 24-0701-A issued by ASES on 16 August 2024. **ASES will not provide an extension to this due date.**

Note:

The Consumer Assessment of Healthcare Providers and Systems: CAHPS Health Plan Survey, Adult Version (CPA-AD) and the Consumer Assessment of Healthcare Providers and Systems (CAHPS) Health Plan Survey, Child Version Including Medicaid and Children with Chronic Conditions Supplemental Items (CPC-CH) are required for Report 23 and do not need to be reported within Report 26.

Cordially

Milagros A. Soto Mejía, MHSA

Clinical Operations Principal General Manager

Report 26 - Child Core Measures - 2025

This tab to be used for Stratification Data per the Technical Specifications and Resource Manual for Child Core Measures:

Reporting Stratified data: Reporting stratified results for Core Set measures is a priority for CMS as it supports CMS's goal of advancing health equity.

For Core Set reporting, states are encouraged to report stratified data for the following stratification categories:

Race

Ethnicity

Sex

Geography

More information is available at:

https://www.medicaid.gov/medicaid/quality-of-care/downloads/QMR-stratification-resource.pdf

Reporting Year: 2025 Measurement Year: 2024

Please enter available Stratification Data below:

Recommendation of the 2024 OMB Statistical Policy Directive No. 15 race and ethnicity standards

More information is available at:

Federal Register :: Revisions to OMB's Statistical Policy Directive No. 15: Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity

- Race and ethnicity
- American Indian or Alaska Native alone or in
- combination*
- Asian alone or in combination*
- o Chinese, Asian Indian, Filipino, Vietnamese,

Korean, Japanese, Another group

- Black or African American alone or in combination*
- o African American, Jamaican, Haitian, Nigerian,

Ethiopian, Somali, Another group

- Hispanic or Latino alone or in combination*
- o Mexican, Puerto Rican, Salvadoran, Cuban,

Dominican, Guatemalan, Another group

- Middle Eastern or North African alone or in combination*
- o Lebanese, Iranian, Egyptian, Syrian, Iragi,

Israeli, Another group

- Native Hawaiian or Other Pacific Islander alone or

in combination*

o Native Hawaiian, Samoan, Chamorro, Tongan,

Fijian, Marshallese, Another group

- White alone or in combination*
- o English, German, Irish, Italian, Polish, Scottish,

Another group

- Missing or Not Reported

Note

* For race and ethnicity categories marked with an asterisk, states can choose to report aggregate data for the category or further stratify by subcategory.

Report 26 – Adult Core Measures – 2025

This tab to be used for Stratification Data per the Technical Specifications and Resource Manual for Adult Core Measures:

Reporting Stratified data: Reporting stratified results for Core Set measures is a priority for CMS as it supports CMS's goal of advancing health equity.

For Core Set reporting, states are encouraged to report stratified data for the following stratification categories:

Race

Ethnicity

Sex

Geography

More information is available at:

https://www.medicaid.gov/medicaid/quality-of-care/downloads/QMR-stratification-resource.pdf

Reporting Year: 2025 Measurement Year: 2024

Please enter available Stratification Data below:

Recommendation of the 2024 OMB Statistical Policy Directive No. 15 race and ethnicity standards

More information is available at:

Federal Register :: Revisions to OMB's Statistical Policy Directive No. 15: Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity
