

## 2021 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2021 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2021: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2021, 8,195,517 clients received SMHA services from 59 states. This is an increase from 8,013,396 SMHA clients in 2020. There were 5,789,234 adults (or 17.3 per 1,000), 2,175,848 children (or 29.9 per 1,000) served. About 9,311 (0.1 percent) clients were missing age data.
- Among SMHA clients, there were 4,342,545 (53.0 percent) females served while there were 3,806,666 (46.4 percent) males served. In 21 states and U.S. territories, more SMHA males were served than females. While in 38 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 32.9 percent, followed by ages 45-64 with 23.6 percent, children ages 0-12 with 14.8 percent, and children ages 13-17 with 12.1 percent.
- The highest percentage of SMHA clients that were served was among the White population with 58.1 percent, followed by Black or African Americans with 17.9 percent, and only 15.7 percent for Hispanics.

**Note:**  
This table uses data from URS Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2020

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

**State Notes:**

Table 14a

Age A 21% less clients of age 45 years and more, can be observed, because ambulatory recovery oriented services were closed.  
 Gender None  
 Race None  
 Overall Because the pandemic of COVID - 19 ambulatory community services where close since March 2020 and no new admissions where registered in the Electronic Data System, lowering in 23% the clients served compared with those of 2020-2021.

Table 14b

Age None  
 Gender None  
 Race None  
 Overall Because the pandemic, ambulatory community recovery oriented services where close since March 2020 and no new admissions where registered in the State Electronic Data System, lowering in 23% the clients served compared with FY 2019-2020.

**Access Domain: Adults with SMI and Children with SED Served in Community Mental Health Programs by Age and Gender, FY 2021**

Forensics included in "non forensic" data? No

**Note:**

US totals are based on states reporting.  
This table uses data from URS Tables 20a and 20b.

**State Notes:**

The number of readmissions were calculated with the retrospective data of discharges. Discharge data is based in natural year period from 1/12/2020 to 12/31/2020. The readmission data corresponds to 30 days and 180 in 1/1/2021 to 6/30/2021. Note 10.

General Notes FY 2021

Puerto Rico

URS Table Number	General Notes
2A, 2B & 3	Children and adolescents Hospital close during the fiscal year of 2019-2020, affecting 9% less client 0-17 years served in FY 2020-2021. No admissions were reported in pediatric hospital. State Agency continue offering Community services and residential services for children and adolescents. Because the pandemic of COVID - 19 ambulatory community services where close since March 2020 and no new admissions where registered in the State Electronic Data System, lowering in 28% the total of clients served compared with those of 2019-2020.
4	During the pandemic, services provided by State Agency has decreased, particularly those directed to the ambulatory community centers. That's why a decrease in the served clients was observed within the community setting. For other hand, the State Agency Mental Health Centers (MHC) personnel move to residential treatment centers (RTC) where served the clients. The RTC clients were not counted in this table, the clients included corresponded to those living in the community, not in institutional settings. This issue was the primary reason of the negative percent of change from 2,588 in 2020 to 633 for 2021. Also is needed to explain that in 2020, services setting categories of the MHC were not defined in the data collection instrument as ambulatory or RTC, and most clients in RTC were included in categories "Not in Labor Force" and "Unemployed", observing the significant decrease in categories. For 2021, the service categories of the MHC and RTC providers were defined.
4A	Ambulatory services where close March 2020 because COVID 19, lowering the clients admitted to the services. This issue lower 82% in the not in labor force status compared to 2019-2020. Also lower to 24% the employed clients of ambulatory settings.
5B	Data is auto reported by clients, not claim base. Clients served in community programs, other psychiatric inpatient services and residential treatment are operated by PR SMHA for no charge. Hospitals and home care clients are served with state funds (non-Medicaid) and Medicaid for physical health.
7	A plan was developed to expand access to treatment, this led to the hiring of more staff for CSC – Evidence Base Practices for FEP, among other expenses.
7A	For FY 2021, increase expenditure for CSC Evidence Based Practices for FEP is observed because Singel State monitors recommendation. The calculation includes MHBG funds from FFYs 2019, 2020 and 2021.
12	It is observed a 9% decrease of the total children and adolescents served by state agency ambulatory clinics from 2021 to 2020 (352 to 322 clients). MH ambulatory clinics were close during the first semester of the FY 2021 and no new admissions were registered in the electronic data system. Similar tendency was observed in ambulatory services for substance use and drug court services, decreasing the number of clients served. Clients served in treatment use providers, as Juvenile Drug courts and TASCs, usually are referred to MH ambulatory services.
15A	Because the pandemic of COVID - 19 ambulatory community services where close since March 2020 and no new admissions where registered in the Electronic Data System, lowering in 52% the clients served compared with those of 2019-2020. Residential treatment centers clients increase in a 30% rate compared to previous FY, because mental health recovery services where provided in the setting.
16	Children and adolescents served in MH ambulatory clinics decrease during pandemic, affecting number of clients receiving MTS EBP services.
20A	Less admitted clients during the pandemic, affects the discharges and readmissions frequency.
20B	Less admitted clients during the pandemic, affects the discharges and readmissions frequency.
21	Less admitted clients during the pandemic, affected the discharges and readmissions frequency. During the FY 2020 occurs 3 readmissions, for the contrary in FY 2021 no readmissions were reported, thus in such too small counts there is an increase in the margin of error, which can render less precise estimates.

## **Errata Sheet to 2021 URS Output Tables**

This page includes clarifications and corrections to 2021 URS Output Tables.

### **APPROPRIATENESS DOMAIN: Living Situation of Consumers Service by State Mental Health Agency Systems, FY2021**

The table counts and percentages have been updated due to a processing error in the “Not Available” category.

### **APPROPRIATENESS DOMAIN: Adults with SMI and Children with SED Receiving Evidence-Based Services for First Episode Psychosis (FEP), 2021**

The table counts and percentages have been updated in “CSC-FEP Fidelity and Training State” and “Clients Served by Programs With and Without CSC-FEP Fidelity” due to a processing error in counting several fidelity programs.
