About Us

AG Environmental, P.S.C. is a small and agile core organization, combined with the right balance of disciplines, allows our firm to execute efficiently and in a cost-efficient manner, allowing us to perform as a high-level player in the environmental services sector.

Core Competencies

- Environmental compliance program management
- Environmental planning, permitting and compliance consulting for large-scale infrastructure developments
- National Environmental Policy Act (NEPA) Review Process
- Environmental restoration/mitigation design, implementation and monitoring
- USACE permitting and CWA compliance
- All Appropriate Inquiry (ASTM-compliant) due diligence audits and investigations for soil and groundwater
- Brownfields planning, cleanup and redevelopment consulting
- Stormwater compliance planning for industry, municipalities and construction
- RCRA and hazardous waste compliance consulting and Site Selection Studies

Differentiators

- Regulatory and planning authority relations, excellent relations with local and federal environmental regulators and planning authorities.
- Strategic technical input to project planning starts with AGE's input since the early stages the project to assist in the evolution and optimization of project goals.
- Understanding the wider context of project development decisions. AGE focuses in evaluating and identifying options to effectively plan a course of action and overcome potential problems or regulatory hurdles at an early stage management task.

Past Performance

Army Terminal Restoration – Stantec

Served as Subject Matter Expert (SME) for planning and regulatory compliance. Provided strategic guidance on environmental permitting, interagency coordination, and compliance documentation to support large-scale restoration efforts.

Navy Pier Bulkhead and New Boardwalk CDBG-DR-IPG-PRCCDA-2025-02 - Interlink

Provided environmental compliance and permitting coordination services for waterfront infrastructure improvements, supporting timely regulatory approvals and construction readiness.

Puerto Rico Ports Authority – San Juan Waterfront Development (Project Value: \$140MM)

Served as Technical Leader on behalf of CSA Group for major infrastructure development along the San Antonio Channel. Led environmental strategy and regulatory coordination,

Port of the Americas Authority - Municipality of Ponce

Puerto de Las Americas Permitting and Compliance Lead. Environmental compliance efforts for port infrastructure projects, including permitting strategy, agency coordination, and regulatory documentation.

Municipality of Mayagüez El Seco Flood Control Project – Sea Horse Wastewater

Provided environmental review and compliance leadership for flood control infrastructure improvements, supporting mitigation planning and regulatory approvals.

Municipality of Utuado Flood Control Project INFRA-MIT-00044 - Salo Engineering

Provided environmental planning and compliance support for municipal flood mitigation infrastructure, ensuring adherence to federal and local regulatory requirements.
