ABOUT US

JL Apparel Development is a small business textile company specializing in design, patternmaking, manufacturing, cutting, and sewing services for brands and designers across Puerto Rico, the Caribbean, and the USA. With over 20 years of combined experience, our expert team is dedicated to delivering personalized and professional customer service. We are a one-stop shop, catering to both the Government and Private sector needs by providing high-quality textile clothing, innovative designs, and fashion-forward styles.

Our goal is to create unique, trend-setting designs while continuously developing original fabric patterns that stand out in the marketplace. We stay ahead of design trends by incorporating artistic, cultural, and technological influences into our work.

DIFFERENTIATORS

End-to-End Integrated Solutions: We offer a complete in-house process, including design, pattern making, grading, sampling, fitting, and mass production—all in one place.

Local Production in Puerto Rico: Being located in U.S. territory allows for fast deliveries, lower shipping costs, and compliance with federal procurement standards.

Proven Industry Experience: With over 20 years in the industry, we have worked with renowned designers featured in the Billboard Awards, fashion shows, and entertainment events.

Flexible Capacity for Emerging and Established Brands: We support both established companies and new designers, adapting our services and production volumes to each growth stage.

Personalized and Close Attention: Our clients work directly with the founder, ensuring clear communication, detailed follow-ups, and a human touch in every project.

COMPETENCIES

- **Pattern creation:** Our expert designers create new fabric patterns which can include print, weaves and textures.
- **Textile manufacturing:** This includes actual production of fabric, whether through weaving, knitting or other methods.
Quality Control: Ensuring that the fabrics produced meet the design specifications and quality standards.
- **Sourcing and Procurement:** Raws materials sourcing acquiring fibers, yarns, dyes and other necessary materials for fabric production.
- **Technology and Innovation:** Using design software to create patterns digitally, facilitating faster iterations and the ability to test patterns before they are produced.
- **Automation:** Implementing automated machinery in textile production to speed up processes, improve efficiency and reduce costs.
