**June 30, 2005 Actuarial Valuation**

Dear Board Members:

Actuarial valuations of the Judiciary Retirement System of Puerto Rico (also the "**Retirement System**" or the "**System**") are prepared periodically by Buck Consultants, LLC Puerto Rico Branch (also "Buck") at the request of the Retirement System's Administration in order to:

- Determine the employer contribution required to fund the Retirement System on a sound actuarial basis,
- Provide a summary of the funded status of the System
- Present the financial statement disclosure information according to GASB 25 and 27, and
- Disclose liabilities related to certain benefit provisions granted by legislation and funded on a pay-as-you-go basis, known as "Special Laws Benefits" which prior to 2003 were included as commitments of the Retirement System

This report presents the results of the actuarial valuation and the contributions payable by the employer to the Retirement System for the fiscal year ending June 30, 2006. The last valuation report performed by Buck was as of June 30, 2003.

**Discussion of Valuation Results**

The actuarial valuation as of June 30, 2005 indicates that a total employer contribution rate of 33.19% of payroll is required to meet the employer normal cost and to amortize the unfunded actuarial liability over 21 years from July 1, 2005 as a level percentage of payroll. Based on a total payroll of \$29,331,112 as of June 30, 2005, the required actuarial contribution payable by the Commonwealth of Puerto Rico is \$9,735,243.

The actual contributions to the Retirement System are set by legislation of the Commonwealth of Puerto Rico. It is our understanding that the current employer contribution rate is 22.06% of salary. Therefore, we estimate an additional contribution of 11.13% of pay (approximately \$3.3 million per year) is recommended for the sound financing of the System. This contribution deficit will continue to deteriorate the financial status of the Retirement System. We recommend consideration of a gradual increase in

employer contributions and/or evaluation of Plan benefits in order to help improve the long-term funding of the System.

### Funded Status of Retirement System

Below we present a comparison of the funding ratio of the System as of June 30, 2005 and 2003. The market value of assets as of June 30, 2005 was obtained from the audited financial statements for the Commonwealth of Puerto Rico dated March 14, 2006.

#### Funding Ratio Comparison

	<u>June 30, 2005</u>	<u>June 30, 2003</u>
Actuarial Accrued Liability	\$174,454,131	\$166,732,009
Market Value of Assets	<u>\$69,797,000</u>	<u>\$61,781,000</u>
Unfunded Actuarial Accrued Liability	\$104,657,131	\$104,951,009
<b>Funding Ratio</b>	<b>40.01%</b>	<b>37.05%</b>

The funding ratio has increased about 2.96% due mostly to asset returns higher than expected and salary increases lower than anticipated.

The annual asset returns for the fiscal years ending June 30, 2004, and 2005 were approximately 12.9% and 6.3% respectively. This represents an average annual return of about 9.5% for the two years period, which is greater than the annual assumed investment return on assets of 8.5%

The average salary increased about 3.6% from June 30, 2003 to June 30, 2005. This represents an average annual increase of 1.8% for the two years period, which is lower than the 5.0% salary increase assumption used for valuation purposes.

### Accounting Disclosures (GASB 25/27)

The accounting information required under GASB Statements Nos. 25 and 27 for the fiscal year ending June 30, 2006 is presented in the attached Table I. Information in the schedules before 2001 is derived from the June 30, 2001 financial statements of the Commonwealth of Puerto Rico. We note the reported contributions paid reported for those years on the financial statements appear to include employee contributions. It is our understanding that only employer contributions should be included.

### Actuarial Assumptions and Methods, and System Provisions

The valuation is based on actuarial assumptions and methods presented on Table II, including an annual interest rate of 8.5% and salary and total payroll increases of 5.0% per year.

At the request of the System's Administration, the benefit of cost of living increases (COLA) of 3.00% triennially to present and future retirees, which prior to 2003 was included as an actuarial obligation of the Retirement System, has been removed as a System liability, as the Retirement System understands this

benefit was granted by special legislation and it is the responsibility of the Government of Puerto Rico. However, for completeness, the System has requested that this liability be presented separately in this report.

In an effort to disclosed all pension liabilities, including those that do not belong to the Retirement System, the table below shows the liabilities with and without COLA as follows:

	Without COLA	With COLA
Actuarial Accrued Liability	\$ 174,454,131	\$ 191,497,139
Market Value of Assets	<u>\$ 69,797,000</u>	<u>\$ 69,797,000</u>
Unfunded Actuarial Accrued Liability (UAAL)	\$ 104,657,131	\$ 121,700,139
<b>Funding Ratio</b>	<b>40.01%</b>	<b>36.45%</b>
<b>Required Employer Contribution</b>	<b>\$ 9,735,243</b>	<b>\$ 11,330,529</b>

Based on our discussions, we understand that the most recent review of the actual experience of the System was performed nearly ten years ago. We suggest the Board consider undertaking an experience study to evaluate the current assumptions and make modifications, if necessary.

**Valuation Data**

Finally, we have prepared the valuation using the System's members' data and the financial data provided by the Retirement System. Below we provide a summary of the member data used in the actuarial valuation.

	June 30, 2005 <u>Valuation</u>	June 30, 2003 <u>Valuation</u>	June 30, 2001 <u>Valuation</u>
Actives number	370	336	359
Actives - annual payroll	\$29,331,112	\$25,711,003	\$26,700,000

Retirees - annual benefits	\$10,530,115	\$9,373,618	\$7,887,742
Beneficiaries number	58	57	57
Beneficiaries - annual benefits	\$872,637	\$742,676	\$742,676
Deferred vested number	56	31	31
Deferred vested - annual benefits	\$2,549,300	\$809,006	\$809,006
Total inactives number	367	338	312
Total inactives annual benefits	\$11,994,493*	\$10,116,294*	\$8,630,418*

\* Excluding benefits of deferred vested employees.

Certification

Subject to the exclusion in benefit provisions requested by the Retirement System to the best of our knowledge, the results are complete and accurate and, in our opinion, the techniques and assumptions used are reasonable. There is no benefit or expense to be provided by the Retirement System and/or paid from the System's assets for which liabilities or current costs have not been established or otherwise taken into account in the valuation. To the best of our ability, all known events or trends that may require a material increase in System costs or required contribution rates have been taken into account in the valuation.
